Att.* iv. 2 nos. 623 *d* and 623 *e* (records of the Dionysiastai, who met *Ποσιδεῶνος ἀγορᾷ κυρίᾳ*).

Anthesteria, a birth at the Rural Dionysia. Thoukydides speaks of the Anthesteria as 'the older Dionysia[1],' presumably in comparison with 'the Dionysia[2],' *i.e.* the City Dionysia, in the following month. The ritual of the Anthesteria with its *Pithoigía*, its *Chóes*, and its *Chýtroi* is fairly well known. It culminated on Anthesterion 12[3], the one day in the year on which 'the oldest and holiest sanctuary of Dionysos in the Marshes' was thrown open[4]. For what purpose this temple was opened, while all others were religiously kept shut[5], we are not told. But we have at least materials for forming a reasonable guess. Beside the altar in the sanctuary stood a marble *stéle*, on which was inscribed a law relating to the *status* and chastity of the *Basílinna*[6], *i.e.* the wife of the *Basileús* who had presided over the drinking-competition of the *Chóes*[7]. Now it was the duty of the *Basílinna* to administer an oath of ritual purity to fourteen sacred women chosen by the *Basileús* and named *Gerairaí*[8], who took it standing at the above-mentioned altar and laying their hands upon certain baskets before they ventured to touch 'the holy things[9].' In view of the ascertained character of Dionysos *Eleuthereús*[10] I should conjecture with some confidence that these baskets contained *phalloí* covered with seed or the like, and that the temple was opened once a year for the performance of a phallic rite[11]. This conjecture is in general agreement with the wording of the oath taken by the *Gerairaí*:

[1] Thouk. 2. 15. [2] Thouk. 5. 23, cp. 5. 20.

[3] This is the day mentioned by Thouk. 2. 15 as a Dionysiac festival common to the Athenians and their Ionian descendants.

[4] Dem. *c. Neaer.* 76. The temple in question was probably identical with the small pre-Persic building beside the theatre; for this is expressly described by Paus. 1. 20. 3 as 'the oldest sanctuary of Dionysos,' and its situation immediately south of the Akropolis accords well with the account given by Thouk. 2. 15 of the temple in the Marshes. It seems to have contained the ancient wooden image of the god, brought to Athens from Eleutherai (Paus. 1. 38. 8) by Pegasos (Paus. 1. 2. 5).

[5] So Mommsen *Feste d. Stadt Athen* p. 391 and Farnell *Cults of Gk. States* v. 216 f. relying on Phanodemos *frag.* 13 (*Frag. hist. Gr.* i. 368 Müller) *ap.* Athen. 437 b—d.

[8] The evidence is collected by P. Stengel in Pauly—Wissowa *Real-Enc.* vii. 1232 f.

[9] Dem. *c. Neaer.* 73 and 78 f. A. Frickenhaus *Lenäenvasen* (*Winckelmannsfest-Progr. Berlin* lxxii) Berlin 1912 p. 25 n. 17 understands ἅπτεσθαι τῶν ἱερῶν of the *cista mystica* (cp. *id.* in the *Ath. Mitth.* 1908 xxxiii. 29 f. and 173). E. Petersen in the *Rhein. Mus.* 1913 lxviii. 241 argues that the reference is, not to 'Kultgegenstände,' but to 'Kulthandlungen.' [10] *Supra* p. 682.

[11] A red-figured *pelíke* in the British Museum (fig. 510), belonging to a late stage of the fine period (*c.* 440—400 B.C.), is thus described in the *Brit. Mus. Cat. Vases* iii. 387 no. E 819: '(*a*) A girl, with long sleeved chiton, himation knotted around her waist, and hair looped up with fillet, leans forward to r., holding in her l. a rectangular box; with her r. she sprinkles with seed (?) four objects in the form of phalli set upright in the ground, around which are leaves (?) springing up. Above her on l. hangs a sash, on r. a looped fillet.... (*b*) An ephebos in himation and fillet moving to r. with arm extended, as if

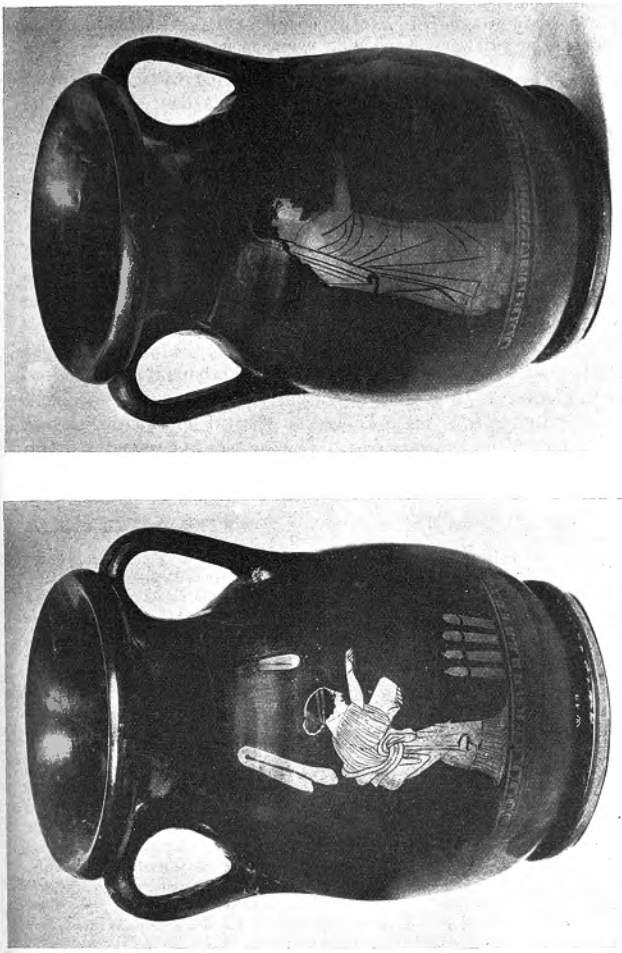

Fig. 510.

signing to the figure in (*a*).' Sir Cecil Smith suggests that the scene may have reference to one of the mystic ceremonies of Athenian women, such as the Thesmophoria. If so, it might convey to us some hint of the πολλὰ καὶ ἅγια καὶ ἀπόρρητα performed by the *Basilinna* (Dem. *c. Neaer.* 73).

'I am holy, pure, and clean from all impurities, especially from intercourse with man; and I perform in Dionysos' honour the *Theógnia* and the *Iobákcheia* according to ancestral custom and at the times appointed'.

The *Theógnia* were presumably rites connected with the birth of the god, very possibly the ceremonial of his conception[2]. The *Iobákcheia* may have been some service associated with the *Theógnia* in Anthesterion, since at Astypalaia this month was called Iobakchios[3], or else an equivalent of the *Theógnia* in Elaphebolion, since the Athenian Iobakchoi are known to have been active at the time of the City Dionysia[4]. Here, however, a difficulty arises. Modern scholars commonly assure us that on Anthesterion 12 the wife of the *Basileús* was married to Dionysos[5]. If so, my notion that the god was conceived on this day falls to the ground. But inspection shows that, although the ritual marriage is a well-attested fact, no ancient author early or late connects it with the Anthesteria at all. When it took place, we do not know. Perhaps it synchronised with the Lenaia[6]. In any case we are left with the curious problem that the Anthesteria was a Dionysiac festival at which Dionysos himself played no obvious part. The problem is solved, if I am

[1] Dem. c. *Neaer.* 78 Ἁγιστεύω καὶ εἰμὶ καθαρὰ καὶ ἁγνὴ ἀπό τε τῶν ἀλλων τῶν οὐ καθαιρόντων καὶ ἀπ' ἀνδρὸς συνουσίας, καὶ τὰ Θεόγνια (so codd. S. F. Q. *θεοίνια* vulg.) καὶ τὰ Ἰωβάκχεια τελῶ (Dobree cj. *τεραῶ*) τῷ Διονύσῳ κατὰ τὰ πάτρια καὶ ἐν τοῖς καθήκουσι χρόνοις.

[2] F. Blass (ed. 1891) prints the inferior reading *θεοίνια*, which has rightly been rejected by A. Mommsen *Heortologie* Leipzig 1864 p. 359 n. 2 and by E. Petersen in the *Rhein. Mus.* 1913 lxviii. 248. The *Θοινία* was a name given to the demotic Dionysia as a festival of Dionysos Θόινος (Harpokr. *s.v.* Θοινίων). If that reading were sound, we should have an additional reason for linking the Anthesteria with the Rural Dionysia.

[6] A. Frickenhaus *l. c.* p. 80 ff. has adduced strong reasons for thinking that the *ἐπιστάτης ἐπιτηδεύσας ἐπενεγκεῖν Διόνυσον ἀπὸ τῆς ἐσχάρας εἰς τὸ θέατρον μετὰ φωτός* (*Corp. inscr. Att.* iii. 1 nos. 471, 12 b, *cp. ib.* nos. 469, 14 f. 470, 11 f.) at the festival of the Lenaia. It is possible that this torch-light procession stood in some relation to the marriage of Dionysos.

Mr D. S. Robertson, Fellow of Trinity College, kindly draws my attention to the fact that Frazer *Golden Bough*[3]: The Magic Art ii. 137 has called in question the date usually assigned to the marriage, and has even (*ib.* n. 1) been inclined to conjecture that it took place in Gamelion. If so, it may well have happened at the Lenaia. In any case Mommsen's attempt (*Heortologie* p. 357 ff., *Feste d. Stadt Athen* p. 392 ff.) to connect it with Anthesterion 12 remains conjectural and unconvincing.

right in my contention that Dionysos as yet was not. Let us suppose that the *Anthestéria* was originally a day or days set apart for magic rites intended 'to make things bloom[1],' and that, when Dionysos first came to be worshipped at Athens, this season was chosen as the fittest time for his conception. The view here advanced is not inconsistent with the Athenian belief that at the Anthesteria souls came up from the Underworld[2]. It is likely enough that the yearly renewal of vegetation was attributed to the agency, perhaps even to the actual re-embodiment[3], of the nameless and numberless dead. If Dionysos too was to be reborn, this surely was the moment for the procreative rite. The *panspermía* boiled in a pot (*chýtros*), which gave its name to the last day of the festival[4], was a piece of primitive magic applicable at once to vegetation and the vegetative god. But, if the Anthesteria resembled the City Dionysia in celebrating the conception of Dionysos, did it also resemble the City Dionysia in providing the germ of comedy? Aristophanes in a familiar chorus tells how at the precinct in the Marshes on the day of the *Chýtroi* a scarcely-sobered *kômos* sang of Dionysos son of Zeus[5]. From such a *kômos*-song comedy, the *kômos*-song *par excellence*[6], might well have arisen; and the more so, since we hear of definite contests as held on that concluding day[7]. The contests in question were

[1] See the simple and satisfactory remarks of Farnell *Cults of Gk. States* v. 222.

[2] Mommsen *Feste d. Stadt Athen* p. 390 n. 3, Farnell *op. cit.* v. 215 ff., and especially Harrison *Proleg. Gk. Rel.*[2] p. 32 ff.

[3] Boetticher *Baumkultus* p. 254 ff. ('Bezug der Bäume auf Grab, Tod und Apotheose des Menschen') gives a good collection of relevant facts. Note also Emped. *frag.* 117 Diels *ap.* Diog. Laert. 8. 77 *καὶ τὴν ψυχὴν παντοῖα εἴδη ζῴων καὶ φυτῶν ἐνδύεσθαι· φησὶ γοῦν· 'Ἤδη γάρ ποτ' ἐγὼ γενόμην κοῦρός τε κόρη τε | θάμνος τ' οἰωνός τε καὶ ἐξ ἁλὸς ἔμπυρος ἰχθύς*, Emped. *frag.* 127 Diels *ap.* Ail. *de nat. an.* 12. 7 *λέγει δὲ καὶ Ἐμπεδοκλῆς τὴν ἀρίστην εἶναι μετοίκησιν τὴν τοῦ ἀνθρώπου, εἰ μὲν ἐς ζῷον ἡ λῆξις αὐτὸν μεταγάγοι, λέοντα γίνεσθαι· εἰ δὲ ἐς φυτόν, δάφνην. ἃ δὲ Ἐμπεδοκλῆς λέγει, ταῦτά ἐστιν· 'Ἐν θήρεσσι λέουτες ὀρειλεχέες χαμαιεῦναι | γίνονται, δάφναι δ' ἐνὶ δένδρεσιν ἠυκόμοισιν.* It seems probable that trees were planted on or around graves, not, originally at least, as a mere pleasance (Rohde *Psyche*[2] i. 230), but rather as a vehicle for the soul of the deceased. See further A. Dieterich *Mutter Erde*[2] Leipzig and Berlin 1913 p. 49.

[4] Mommsen *Feste d. Stadt Athen* p. 397 ff.

[5] Aristoph. *ran.* 211 ff. *λιμναῖα κρηνῶν τέκνα, | ξύναυλον ὕμνων βοάν, | φθεγξώμεθ', εὐγηρυν ἐμὰν ἀοιδάν, | κοὰξ κοάξ, | ἀν ἀμφὶ Νυσήιον | Διὸς Διώνυσον ἐν Λίμναισιν ἀχήσαμεν | ἀνίχ' ὁ κραιπαλόκωμος | τοῖς ἱεροῖσι Χύτροισι | χωρεῖ κατ' ἐμὸν τέμενος λαῶν ὄχλος.*

[6] The word *κωμῳδία* means properly 'the performance of the *κωμῳδοί*'; and the *κωμῳδοί* are 'those who sing in the *κῶμος*' (L. Meyer *Handb. d. gr. Etym.* ii. 345, Boisacq *Dict. étym. de la Langue Gr.* p. 544). The connexion with *κώμη*, 'village,' is quite fallacious.

[7] Philochoros *frag.* 137 (*Frag. hist. Gr.* i. 407 Müller) *ap.* schol. Aristoph. *ran.* 218 *ἤγοντο δὲ ἀγῶνες αὐτόθι οἱ Χύτρινοι καλούμενοι, καθά φησι Φιλόχορος ἐν τῇ ἕκτῃ τῶν Ἀτθίδων*, cp. Favorin. *lex.* p. 1880, 44 f.

an obsolete custom revived by the orator Lykourgos (*c.* 396—323 B.C.), who passed a law to the effect that comedians should compete in the theatre on the day of the *Chýtroi* and that the successful competitor should enter for the more important contest of the City Dionysia[1]. This points to a comic contest as a time-honoured institution at the *Chýtroi*, later superseded by the more brilliant shows of the City Dionysia, but restored in the fourth century B.C. as a first heat or preliminary competition. Theatrical displays of a quasi-comic character were certainly given at the Anthesteria during the first or second century of our era[2]; for Philostratos[3] says of Apollonios:

'The story goes that he rebuked the Athenians for the way in which they kept the Dionysiac festival in the month of Anthesterion. He supposed that they were flocking to the theatre in order to hear solos and songs, choruses and music, such as you get in comedy and tragedy. But, when he heard that, as soon as the flute gave the signal, they danced with all sorts of contortions and performed the epic and theological poems of Orpheus, playing the parts of Horai or Nymphs or Bacchants, he broke out into open censure of their conduct.'

Ten months later came the Rural Dionysia, a festival which we have already taken to be the equivalent of the Lenaia[4]. As such it would involve that 'rustic ode' which set forth the rending of Dionysos and so furnished the original core of tragedy. In short, the Anthesteria was an early festival of reproduction, at which the begetting of Dionysos was celebrated with rites that led on towards comedy; the Rural Dionysia was another early festival, at which the life-history of Dionysos was represented with rites that developed into tragedy. It will doubtless be objected[5] that Dikaiopolis, who in Aristophanes' *Acharnians* conducts a private celebration of the Rural Dionysia[6], equips his daughter with a basket, his slave Xanthias with a *phallós*, and himself sings a phallic song[7],—a performance more comic than tragic. To

[1] A. Westermann *Biographi minores* Brunswick 1845 p. 272, 39 ff.

[2] Hence perhaps the curious and misleading statement of Diog. Laert. 3. 56 *οἷον ἐκεῖνοι* (the Attic tragedians) *τέτρασι δράμασιν ἠγωνίζοντο, Διονυσίοις, Ληναίοις, Παναθηναίοις, Χύτροις, ὧν τὸ τέταρτον ἦν Σατυρικόν. τὰ δὲ τέτταρα δράματα ἐκαλεῖτο τετραλογία.*

[4] *Supra* pp. 666, 673.

[5] The objection was at once pointed out to me by Mr F. M. Cornford.

[6] Aristoph. *Ach.* 195 ff.

[7] Cp. Plout. *de cupid. divit.* 8 *ἡ πάτριος τῶν Διονυσίων ἑορτὴ τὸ παλαιὸν ἐπέμπετο δημοτικῶς καὶ ἰλαρῶς, ἀμφορεὺς οἴνου καὶ κληματίς, εἶτα τράγον τις εἵλκεν, ἄλλος ἰσχάδων ἄρριχον ἠκολούθει κομίζων, ἐπὶ πᾶσι δὲ ὁ φαλλός. ἀλλὰ νῦν ταῦτα παρορᾶται καὶ ἠφάνισται, χρυσωμάτων περιφερομένων καὶ ἱματίων πολυτελῶν καὶ ζευγῶν ἐλαυνομένων καὶ προσωπείων.* There is here, however, no definite indication of season, place, or date.

this objection I would reply, first, that when Aristophanes penned his play in 425 B.C. comedy had already invaded not only the Lenaia (at which the *Acharnians* was produced) but also its provincial counterpart the Rural Dionysia[1]. Authors and inscriptions alike attest both comedies and, more often, tragedies as held at this festival[2]. Secondly, I would point out that in Aristophanes' play the procession marshalled by Dikaiopolis leads up to a climax in which he is murderously assaulted by the Chorus. They spring upon him from an ambush, crying 'Pelt him! Pelt him![3]' and declaring that they hate him more than Kleon, whom they mean to cut into pieces[4]. Now we lose half the fun of the situation, if we fail to realise that this is a travesty of the *sparagmós* or 'rending' of Dionysos by the Titans. It is, of course, always difficult to know when one has got to the bottom of an Aristophanic jest. It may even be that in *Xanthías* attacked by the Acharnians, the 'Fair'-man by the charcoal-burners, we should recognise a tragedy-turned-comedy resembling our own rough-and-tumble between the miller and the sweep[5].

[1] The *Ἀσκωλιασμός*, in which the competitors balanced themselves on an inflated goat-skin, standing the while upon one leg (Sir W. Smith in Smith—Wayte—Marindin *Dict. Ant.* i. 209 f., E. Saglio in Daremberg—Saglio *Dict. Ant.* i. 472 f., E. Reisch in Pauly—Wissowa *Real-Enc.* ii. 1698 ff.), recalls the use of the *Διὸς κώδιον*, upon which persons stood to be purified supporting themselves on their left foot alone (*supra* p. 422 ff.). Perhaps the *Ἀσκωλιασμός* too originated as a serious rite, designed to bring the celebrants one by one into contact with the skin of the sacred beast. According to Hyg. *poet. astr.* 2. 4, Icarus (*sic*) slew the he-goat that had cropped his vine-leaves, inflated its skin, and made his comrades dance round it—whence the line of Eratosthenes *Ἰκαρίου ποσὶ πρῶτα περὶ τράγον ὠρχήσαντο* (*supra* p. 678 n. 4).

[2] Mommsen *Feste d. Stadt Athen* p. 355.

[3] Possibly the pelting received by Aischines as an actor (Dem. *de cor.* 262) is to be connected with his performance at the Rural Dionysia (*ib.* 180, 242).

[4] Aristoph. *Ach.* 280 ff.

[5] Dr L. R. Farnell in the *Journ. Hell. Stud.* 1909 xxix p. xlvii and in his *Cults of Gk. States* v. 130 f., 234 ff., continuing Usener's fruitful investigation of the Macedonian festival *τὰ Ξανθικά, i.e. Ξανθικά* (*Archiv f. Rel.* 1904 vii. 301 ff. = H. Usener *Kleine Schriften* Leipzig and Berlin 1913 iv. 438 ff.), has argued that the tale of the Boeotian Xanthos slain by the Neleid Melanthos with the aid of Dionysos *Μελάναιγις* (schol. Aristoph. *Ach.* 146; cp. schol. Plat. *Symp.* 208 D, who calls the Boeotian Xanthios and does not mention Dionysos) presupposes 'an old Thrako-Greek mummers' play in which a divine figure in a black goat-skin kills another divine figure who is the fair or bright god.' Dr Farnell holds that this play was properly a vegetation-masque performed in the winter, which, attached to the goat-god *qua* vegetation-god in his own northern home, was carried through Greece by the Minyans (Melanthos as a Neleid was a Minyan, as were the *Ψολόεις* and *Ὀλεῖαι* of Orchomenos in Boiotia (Plout. *quaestt. Gr.* 38)), acquired variety of *motif* as it spread from village to village, reached Athens *viâ* Eleutherai, and ultimately became the parent of Greek tragedy. This important contention cannot be discussed in a foot-note. It certainly contains large elements of truth, and has not, in my opinion, been materially shaken by Prof. Ridgeway's criticism (W. Ridgeway *The Origin of Tragedy* Cambridge 1910 p. 73 ff.). But here it is in point only to quote

The relation of the four Dionysiac festivals as here determined may be conveniently set forth in tabular form. It appears that the Anthesteria and the Rural Dionysia were duplicated after a month's interval by the City Dionysia and the Lenaia respectively[1]. How is this duplication to be explained? According to the Greek and Roman chronologists, the earliest attempt to correct the lunar by the solar year was the adoption of a *trieterís* or two-year cycle, wherein the years consisted alternately of twelve and thirteen months[2]. We are expressly told that this cycle was used for the mysteries of Dionysos[3], who in many places had trieteric rites[4]. Further, we have learnt that in Crete at least these rites were performed side by side with an annual celebration[5] and represented

Dr Farnell's words: 'The black man could easily degenerate into comedy; the soot-covered figure in the phallophoria [Athen. 622 D] appears to have been comic, and this is the case now with our May-day sweep.'

[1] On the attempt of O. Gilbert *Die Festzeit der Attischen Dionysien* Göttingen 1872 to prove that 'die Lenaeen und Anthesterien sind identisch und gehören zu den ländlichen Dionysien' see O. Kern in Pauly-Wissowa *Real-Enc.* v. 1021 f.

[2] Gemin. *elem. astr.* 8. 26, Censorin. *de die nat.* 18. 2. So T. Mommsen *Die römische Chronologie bis auf Caesar* Berlin 1859 p. 224 ff. and A. S. Wilkins in Smith—Wayte—Marindin *Dict. Ant.* i. 337: see, however, F. K. Ginzel *Handbuch der mathematischen und technischen Chronologie* Das Zeitrechnungswesen der Völker Leipzig 1911 ii. 366 ff.

[3] Censorin. *de die nat.* 18. 2.

[4] Gruppe *Gr. Myth. Rel.* p. 956, W. Quandt *De Baccho ab Alexandri aetate in Asia Minore culto* Halis Saxonum 1913 p. 279 Index *s.v.* Τριετηρίδες.

Dr Farnell in the *Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 139 f. and in his *Cults of Gk. States* v. 177 ff. rejects the calendrical explanation of the Dionysiac τριετηρίδες on grounds that to me seem unsatisfactory: (*a*) 'we know that the Greeks corrected their calendar every eight years[c] ([c] Macr. *Sat.* 1, 13). But there is nothing to suggest that they ever did this every other year.' This ignores the definite statements of Gemin. *elem. astr.* 8. 26 and Censorin. *de die nat.* 18. 2, who both assert that the most ancient form of the luni-solar year was the *trieterís* of 12+13 months. (*b*) 'And it is not with Greeks but with uncultured Thracians that we are here concerned....But the barbarous tribes of Thrace were scarcely capable of such accurate solar observations as would compel them to correct their lunar calendar every other year.' If it comes to *à priori* argumentation, surely the very rough approximation of the *trieterís* is much more suitable to a barbaric tribe than the comparatively exact eight-year cycle.

But Dr Farnell is constructive as well as destructive: 'I venture to suggest, as a new hypothesis, that the "trieterica" are to be associated with the original shifting of land-cultivation which is frequent in early society owing to the backwardness of the agricultural processes[d] ([d] Vide Hansen, Agrarhistorische Abhandlungen, i, pp. 125—126.); and which would certainly be consecrated by a special ritual attached to the god of the soil.' The weak point in this ingenious view is that it does not account for the trieteric rites in other cults, of which Gruppe *Gr. Myth. Rel.* p. 956 n. 4 gives a formidable list. Dr Farnell attributes these to 'casual local convenience or exigencies of finance.' It is, I think, safer to postulate the two-year cycle as a *vera causa* of all trieteric rites.

[5] I cannot share the odd view advanced by A. Fick *Hattiden und Danubier Griechenland* Göttingen 1909 p. 47: 'Das *Eros* der Trieteris bestand aus 12 Halbmonaten, wie auch die 13 Monate des Mythos von Ares' Fesselung durch die Aloaden *E* 385 ff.

THE ATTIC FESTIVALS
OF DIONYSOS

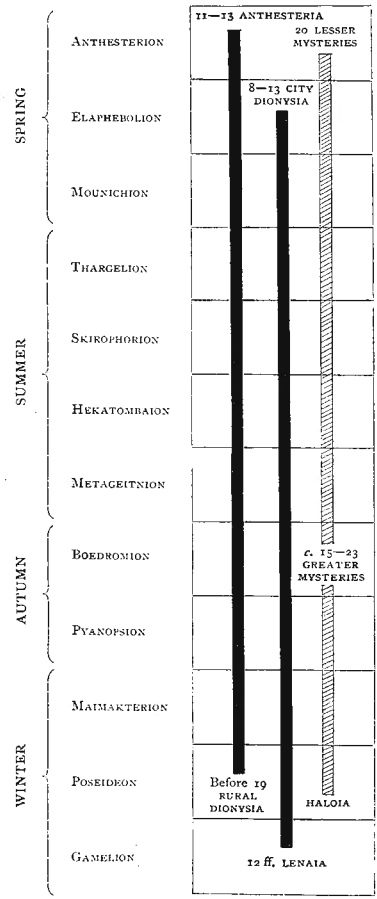

Fig. 511.

als Halbmonate zu verstehen sind: in jedem Monate (μήν) durchläuft der Mond ja zweimal alle Lichtphasen, wenn auch in verschiedener Richtung. In Wahrheit wurde die Trieteris in jedem Mittwinter gefeiert, beim Beginne eines dritten Halbjahres.'

the passion of the god[1]. Presumably, then, in Attike, where the intercalary month was always a second Poseideon, the *trieterís* involved a ritual representation of Dionysos' death in the month following the first Poseideon. But the *trieterís* was at a very early date, probably in 'Minoan' times[2], found to be inadequate. For, given alternate years of 354 and 384 days, every two years the error would amount to about $7\frac{1}{2}$ days, and every eight years to about 30 days, in fact to a whole month. Hence, says Geminos, the first attempt to rectify the error took the form of an *oktaeterís*, in which three (not four) months were intercalated in the third, fifth, and eighth years of the cycle[3]. This arrangement brought the lunar year into approximate accordance with the solar year. But it laboured under a serious disadvantage. Once in every period of eight years the intercalary month was dropped, and with it would go the trieteric rites of Dionysos. Perhaps it was to guard against this disaster, perhaps also to avoid the confusion arising from the performance of trieteric rites every third, fifth, and eighth years, that the Athenians made the rites annual and assigned them to Gamelion, the month following Poseideon. We can thus account for the celebration of the Rural Dionysia (*i.e.* the old annual festival) and the Lenaia (*i.e.* the old trieteric rites) in successive months. The date of the City Dionysia would be fixed by that of the Lenaia, the significant interval of ten lunar months being carefully observed[4].

In sundry other festivals of the Attic year, all of them mystic in character and all belonging by rights to Demeter and Kore, Dionysos as a god of kindred function played a subordinate part. He appears to have gained some footing at Agra or Agrai, for the Lesser Mysteries there are described by a late author as 'a representation of Dionysos' story[5].' He certainly intruded, under the name of Iakchos, into the Greater Mysteries at Eleusis[6]. And

[2] See Gruppe *Gr. Myth. Rel.* p. 957 n. 1. The evidence is discussed more fully by Dr Frazer in his *Golden Bough*[2]: The Dying God pp. 58—92 and by me in the *Class. Rev.* 1903 xvii. 411 and in *Folk-Lore* 1904 xv. 394—412.

[3] Gemin. *elem. astr.* 8. 27 ff.

[4] Dr Farnell's contention (*supra* p. 682 n. 2), that it was Peisistratos who introduced the cult of Dionysos *Eleuthereús* and organised the City Dionysia as his festival, allows us to suppose that Peisistratos only re-organised a previously existing Dionysiac celebration. I incline to think that this was the case and that the essential feature of the pre-Peisistratic *fête* was the performance of the dithyramb (*supra* p. 681 f.).

[5] Steph. Byz. *s.vv.* Ἄγρα καὶ Ἄγραι, χωρίον...ἐν ᾧ τὰ μικρὰ μυστήρια ἐπιτελεῖται, μίμημα τῶν περὶ τὸν Διόνυσον.

[6] Gruppe *Gr. Myth. Rel.* p. 54 n. 11 ff., p. 1167 f., p. 1435 n. 2, E. Pottier in Daremberg—Saglio *Dict. Ant.* iii. 369 ff., and especially Farnell *Cults of Gk. States* iii. 146—153.

he was recognised at least as an adventitious deity in the mystic rites of the Haloia[1]. These festivals fell in Anthesterion, Boedromion, and Poseideon. It is therefore tempting to see in them some traces of a Dionysiac cycle. Accordingly A. Mommsen has surmised that at the Lesser Mysteries on or about Anthesterion 20 Zeus begat Iakchos by Semele; that Semele bore Iakchos as a seven-months' child, who at the Greater Mysteries on Boedromion 20 was taken to Eleusis and there incorporated with Zeus; and finally that at the Haloia in Poseideon Zeus himself gave birth to Dionysos[2]. But this reconstruction is a mere fancy-flight, which goes far beyond ascertained facts and may be safely relegated to the limbo of improbable conjectures[3].

The arrangement of the Dionysiac year that I have been advocating might be supported by a consideration of analogous festivals in Italy[4]. But it will be more in point to observe that

[1] Schol. Loukian. *dial. mer.* 7. 4 p. 279, 24 ff. Rabe, Bekker *anecd.* i. 384, 31 ff.

[2] Mommsen *Feste d. Stadt Athen* p. 23 f.

[3] Mommsen *loc. cit.* even attempts to combine all the Attic festivals of Dionysos, with the solitary exception of the City Dionysia (which he believes to have been originally Apolline!), in a consistent Dionysiac *Jahreskreis*. It is a pity that a scholar who has done such good service in the collection of materials should waste his time by building them into a fantastic whole.

[4] We must not here be drawn into a discussion of the Roman calendar. But in passing we may note that the Liberalia of March 17 and the Saturnalia of December 17, separated by the same interval of nine solar or ten lunar months, appear to be the old Italian equivalents of the Greek festivals examined above.

Of the Liberalia little is known (W. Warde Fowler *The Roman Festivals* London 1899 p. 54 ff.). The aged priestesses of Liber crowned with ivy, who sat about the streets with cakes and a brazier sacrificing on behalf of their customers (Varr. *de ling. Lat.* 6. 14, Ov. *fast.* 3. 725 ff.), recall the *Geraiai* of the Anthesteria (*supra* p. 684); and in many parts of Italy, including Rome, Liber was served with phallic rites *pro eventibus seminum* (Aug. *de civ. Dei* 7. 21, cp. 4. 11, 6. 9, 7. 2, 7. 3, 7. 16: see further G. Wissowa in Roscher *Lex. Myth.* ii. 2021 ff. and in his *Rel. Kult. Röm.*[2] pp. 120, 298 f., who regards Liber as a creative or procreative god developed out of Iupiter *Liber* and later identified with the Greek Dionysos). T. Mommsen *Römische Geschichte*[7] Berlin 1881 i. 162 took the Liberalia to be 'das Fest des Kindersegens.'

The Saturnalia too stood in obvious relation to *semina*. In view of the fact that our own Christmas has been to a large extent grafted upon this festival (see *e.g.* C. A. Miles *Christmas in Ritual and Tradition Christian and Pagan* London 1912 pp. 20 ff., 113, 165 ff., 180, 359), we may reasonably conjecture that it once involved a ritual birth. Dr Frazer (*Golden Bough*[3]: The Magic Art ii. 311) has also detected in it traces of a ritual marriage and (*ib.* p. 310 ff.) of a ritual death. The human victim originally slain at the Saturnalia (to Dr Frazer's evidence we may perhaps add Plaut. *Amph.* 4. 2. 15 ff. *AM. Tun' me mactes, carnufex? nisi formam dii hodie meam perduint, Faxo, ut bubulis coriis onustus sis Saturni hostia.* | *Ita ego te certò cruce et cruciatu mactabo. exi foras Mastigia.* The passage is, owing to the loss of a quaternion, absent from our MSS. It is usually supposed that the gap was filled up by Hermolaus Barbarus in the fifteenth century: see J. L. Ussing *ad loc.* But the sentences quoted, which describe the victim of Saturn as scourged and crucified, involve a very curious anticipation of modern discoveries, and even if written by Hermolaus Barbarus may well have been drawn from

the suggested origin of tragedy in the Lenaean rite[1] is borne out by the modern carnival-plays of northern Greece. These plays, which have been carefully described of late by Messrs G. F. Abbott[2], R. M. Dawkins[3], J. C. Lawson[4], and A. J. B. Wace[5], mostly occur in the winter at Epiphany or the New Year or both, though in the Pelion district they are performed on May-day. Mr Wace[6] summarises what is known of them:

'It seems clear on comparing the accounts of the different festivals that though they are celebrated over a wide area, and at different seasons of the year, the same idea is present in all. In every instance there is a death and resurrection. In nearly all cases one of the two principal characters is disguised in skins, or at least a skin mask. In the songs sung at Epiphany in Thessaly, and those sung on Mayday there are several common elements. Also the mere fact that licensed chicken stealing is a feature of the festival in Thrace and Thessaly seems to point to a similar tradition. Is it then possible out of the different versions to reconstruct the main plot of the drama?.....we may imagine the full original of the drama to have been somewhat as follows. The old woman first appears nursing her baby in her arms (Viza and Léchovo), and this child is, in some way or other, peculiar (Viza). He grows up quickly and demands a bride (Viza, and on Pelion the old man is sometimes called the old woman's son). A bride is found for him, and the wedding is celebrated (at Lechovo a priest is one of the characters), but during the wedding festivities he quarrels with one of his companions who attempts to molest the bride, and is killed. He is then lamented by his bride, and miraculously restored to life. The interrupted festivities are resumed, and the marriage is consummated. It is worth noting for those who seek for the origins of Greek tragedy that this simple drama recounting, like an ancient trilogy, the life history of its hero ends with a satyric display that could be paralleled by the satyric drama that followed a trilogy. Also, in view of the survivals of Dionysos worship seen in these festivals, it should be noted that they seem to occur only in North Greece (Thessaly, Epirus, Macedonia, and Thrace), which was, after all, the reputed home of Dionysos worship.'

some source inaccessible to us) was on this showing the Italian counterpart of the child dismembered and eaten by the Thracian chiefs (*supra* p. 654 ff.). A Roman parallel to that gruesome rite has been already cited (*supra* p. 656 n. 2), *viz.* the *sparagmós* of Romulus whose fragments were buried by the senators (to fertilise the soil?); and Frazer *op. cit.* ii. 313 remarks that July 7, the day on which Romulus disappeared, was a festival, the Nonae Caprotinae, somewhat resembling the Saturnalia.

[6] A. J. B. Wace in the *Ann. Brit. Sch. Ath.* 1909—1910 xvi. 250 f.

A divine babe who grows up with phenomenal speed and seeks a divine consort, a murderous attack made upon him by others who would occupy his place and win his bride, a miraculous restoration of the dead to a new life—these are precisely the elements that we detected in the Zagreus-cult of the Cretans[1], in the Orphic mystery of the Thracians[2], and in the Lenaean rite of the Athenians[3]. We cannot doubt that in Crete and Thrace and Athens alike we have to do with variations on a common theme, the annual birth, death, and resurrection of Dionysos, the son of the sky-father by the earth-mother.

The name of the mother and the treatment of the child varies from place to place. In Crete, where this religion appears as a development of the old Anatolian worship, the parent remains Rhea and the babe acquires the name Zagreus[4]. In Thraco-Phrygian belief, as represented by Sabazian and Orphic myths, the earth-goddess was dualised into Demeter and Kore, by whom Zeus begat the horned infant Dionysos[5]. At Athens the mother keeps her northern name of Semele, and her child is Iakchos or Dionysos[6]. Again, among the Thracians, the originators and rightful owners of this cult, the part of Dionysos was played by a child actually dismembered and eaten[7]. In Crete the human victim was replaced by a bull, the cannibal feast by a bovine omophagy[8]. At Athens civilisation would not permit even this attenuated orgy: the slaughter became dramatic make-belief, and the omophagy a banquet for the successful poet and his *troupe*[8]. The Athenians of the fourth century, sitting on cushions in their theatre to witness a triumph of the tragedian's art, had travelled far indeed from the primitive simplicity of that *mímesis*, in which the celebrants had identified themselves with the god to become the consorts of the goddess and so share in her all-pervading life.

(*i*) The Satyric Drama.

Yet even in the fourth century one touch of primitive life remained in piquant contrast with surrounding refinement. I refer to the Satyric drama. Here Prof. G. Murray has made a very interesting suggestion, which it concerns us either to accept or

[8] At the trieteric rites of Dionysos Semele had *εὐίερόν τε τράπεζαν ἰδὲ μυστήριά θ' ἁγνά* (Orph. *h. Sem.* 44. 9). In Hesych. *Σεμέλη· τράπεζα. παρὰ δὲ Φρυνίχῳ ἑορτή* O. Jessen would read *Σεμέλης τράπεζα· παρὰ Φρυνίχῳ ἑορτή* (Roscher *Lex. Myth.* iv. 668).

to reject. 'The Satyr-play,' he says[1], 'coming at the end of the tetralogy, represented the joyous arrival of the Reliving Dionysus and his rout of attendant daimones at the end of the Sacer Ludus.'

The question of the Satyr-play is so bound up with that of the Satyrs themselves that one is practically forced to begin by asking—Who were the Satyrs? Were they the horse-like or the goat-like creatures of the Attic vase-painters? After a full and, I hope, impartial survey of the facts[2] I am of opinion that by rights the horse-creatures were *Silenoí* and the goat-creatures *Sátyroi*, but that as early as the middle of the fifth century, and perhaps earlier, the goat-type proper to the *Sátyroi* had been, at least for dramatic purposes, more or less contaminated with the horse-type proper to the *Silenoí*[3].

On the *kratḗr* of Klitias and Ergotimos (*c.* 600—550 B.C.) three ithyphallic creatures with equine legs, tails, and ears are inscribed *Silenoí*[4]. On a *kýlix* signed by the same Ergotimos, now at Berlin, an ithyphallic being with human legs and feet, but equine tail and ear, is again inscribed *Silenós*[5]. On a fragmentary black-figured *kýlix* from the Persic *débris* at Athens are the remains of a shaggy personage inscribed *Silenós*, but whether he is equine or otherwise does not appear[6]. Red-figured vases tell the same story. A *kýlix* at Munich shows an ithyphallic figure with equine tail named *Silenós*[7]. A gilded *aryballos* at Berlin calls another

[1] G. Murray in Harrison *Themis* p. 343.

[2] For a fair summary of the evidence, both literary and monumental, see E. Kuhnert's article in Roscher *Lex. Myth.* iv. 444—531. The learned author reaches, as I hold, the wrong conclusion, but he is scrupulously just to his opponents.

[3] S. Reinach in an able essay on 'Marsyas' in his *Cultes, Mythes et Religions* Paris 1912 iv. 29—44 argues that the *Silenoí* were originally asses, and that their type became equine in Greece through confusion with that of the Centaurs. Miss Harrison, who first drew my attention to Reinach's view, adds (May 22, 1913): 'I suspect that the mules and asses turned into horses in horse-bearing Thessaly.'

Reinach may well be right in supposing that the *Silenoí* were asinine before they became equine. But on the Attic vases, with which we are here concerned, the transformation was already complete: the *Silenoí* are regularly depicted with the traits, not of asses, nor even of mules, but of horses pure and simple.

Satyric mask of terra cotta from Anthedon.

See page 697 n. 5.

nude figure with equine tail and pointed ear *Silenós*[1]. A *stámnos* in the British Museum (*c.* 440—400 B.C.) gives the name *Silenós* to a nude figure with pointed ear: in this case the horse-tail is absent, because Silenos has his hands bound behind him and the hanging cords produce the effect of a tail; other exactly similar figures on the same vase are tailed like a horse[2]. An *amphora* with volutes in the Jatta collection has again a figure with equine tail and ear inscribed *Silenós*[3]. In view of these vases we may safely conclude that the type of *Silenoí* known to Attic painters in the sixth and fifth centuries B.C. was equine, not hircine[4].

But beside these horse-creatures Attic vases of the fifth century represent goat-creatures, who are in no case inscribed. The most obvious name to give them is *Sátyroi*, because the Satyrs of the Hellenistic and Roman age had undoubtedly the horns, ears, tail, and tufted hair of goats[5]. In the absence, however, of a definite inscription, an argument can be drawn from the nature of the scenes in which these goatish beings appear. P. Hartwig[6] and K. Wernicke[7] have between them made out a list of fifteen

[1] Furtwängler *Vasensamml. Berlin* ii. 690 ff. no. 2471, *id. Samml. Sabouroff* Vasen p. 4 ff. pl. 55, Kretschmer *op. cit.* p. 132, C. Fränkel *op. cit.* pp. 72, 98 f., A. Legrand in Daremberg—Saglio *Dict. Ant.* iii. 1489 fig. 4772.

[3] H. Heydemann *Satyr- und Bakchennamen* (*Winckelmannsfest-Progr. Halle* 1880) p. 3 ff. with pl., L. Deubner in Roscher *Lex. Myth.* iii. 2117 f. fig. 8, F. Hauser in Furtwängler—Reichhold *Gr. Vasenmalerei* ii. 328 f. fig. 107, C. Fränkel *op. cit.* pp. 72, 98 f. (ΣΙΛΗΝΟΣ).

[4] Miss Harrison has pointed out to me an interesting possibility. O. Lagercrantz 'Zur Herkunft des Wortes Silen' in the *Sertum Philologicum Carolo Ferdinando Johansson oblatum* Göteborg 1910 pp. 117—121 refers σιλανός, σιληνός to a root σίλ- (Indo-Europaean **k̑ēl-*), whence Thraco-Phrygian **σῖλᾱ*, 'Brunst, Geile, Mutwille der Hengste,' and **σῖλάνος*. He finds a nearly related word in κήλων, 'a stallion' (used of horses, of asses, and of Pan: see Stephanus *Thes. Gr. Ling.* iv. 1516 B—C), and further cp. κηρύλος (for **κηλυλος*: Boisacq *Dict. étym. de la Langue Gr.* p. 451 'ingénieux, mais douteux'), κιλίας (better κηλίας), σιλαποροδῆσαι, σιληποροδεῖν, modern Greek τσιλιπουρδῶ, τσιλιπούρδισμα. But P. Kretschmer in *Glotta* 1910 ii. 398, *ib.* 1913 iv. 351 ff. prefers to derive Σιληνός from the Thracian *ζῖλᾱ*, 'wine.' *Viderint philologi.*

[5] E. Kuhnert in Roscher *Lex. Myth.* iv. 488 ff., 516 ff.

I take this opportunity of publishing (pl. xxxvii) a fine votive mask of terra cotta, said to have been found near a spring at Anthedon and now in my possession. It measures 8½ inches in height, and has three holes for suspension. The eyes and nostrils are pierced; but the mouth is not. The face has the snub nose, the ears, the horns, and even the *noneolae* of a goat. It is wearing both a head-band and an ivy-wreath. In short, it has all the characteristics of a Satyric *choreutés*. Mr H. B. Walters, on grounds of style, refers it to the Hellenistic period.

[6] P. Hartwig in the *Röm. Mitth.* 1897 xii. 89 ff.

[7] K. Wernicke in *Hermes* 1897 xxxii. 290 ff. and in Roscher *Lex. Myth.* iii. 1410 f.

fifth-century vases on which goat-figures occur[1]. They are seen

[1] (1) Red-figured *guttus* from Nola (J. de Witte *Description des antiquités et objets d'art qui composent le cabinet de feu M. le chevalier E. Durand* Paris 1836 no. 142) =goat-headed figure skipping on all fours.

(2) Red-figured *guttus* from Nola (J. J. Dubois *Description des antiques faisant partie des collections de M. le comte de Pourtalès-Gorgier* Paris 1841 no. 384, *Catalogue des objets d'art...qui composent la collection de feu M. le comte de Pourtalès-Gorgier* Paris 1865 no. 399) =goat-headed figure skipping on all fours.

(3) Late black-figured *oinochóe* with white ground at Munich (Jahn *Vasensamml. München* p. 214 no. 682 wrongly described) =goat with bearded human head skipping on all fours: with him dances a bearded Silenos.

(4) Red-figured *skýphos* of *c.* 440 B.C. from Certosa at Bologna (Pellegrini *Cat. vas. gr. dipint. Bologna* p. 216 no. 491, E. Brizio in the *Bull. d. Inst.* 1872 p. 112 no. 86, H. Heydemann *Winckelmannsfest-Progr. Halle* 1879 p. 63 no. 150, P. Hartwig in the *Röm. Mitth.* 1897 xii. 92 f. fig. 2) =obv. human figure with goat's head, tail, and legs dancing with a goat that stands on its hind legs; rev. goat with human arms and hands skipping on all fours to compete with an actual goat. The design has been much restored.

(5) Fragment of a red-figured *skýphos* of *c.* 450 B.C. now in the possession of F. Hauser at Stuttgart (P. Hartwig in the *Röm. Mitth.* 1897 xii. 91 fig. 1) =human figure with goat's head and tail dancing.

(6) Red-figured *askós* of *c.* 450 B.C. in the British Museum (*Brit. Mus. Cat. Vases* iii. 358 no. E 735) =obv. human figure with goat's horns and tail misusing a dog; rev. Silenos reclining.

(7) Red-figured jug of *c.* 450 B.C. now in the possession of Commendatore Galeozzo at Santa Maria di Capua (P. Hartwig in the *Röm. Mitth.* 1897 xii. 92) =human figure with goat's feet and beast's ears striding forwards, his hands crossed at his back; round his head is twisted a curious skin, and behind him is a basket.

(8) Red-figured *kratér* of *c.* 440 B.C. in the Albertinum at Dresden (P. Herrmann in the *Jahrb. d. kais. deutsch. arch. Inst.* 1892 vii Arch. Anz. p. 166 f., P. Hartwig in the *Röm. Mitth.* 1897 xii. 92, Müller—Wieseler—Wernicke *Ant. Denkm.* ii. 2. 226 f. pl. 19, 1, Harrison *Proleg. Gk. Rel.*[2] p. 277 f. fig. 67) =obv. three human figures (ΣΙΜΟΣ, ΠΑΝΔΡ?, and ....ΟΣ) with goat's horns, tail, and feet capering round Hermes (ΕΡΜΕΣ), who holds a forked stick, and Pherephatta (ΦΕΡΕΦΑΤΤΑ), who rises from a grotto; rev. three draped figures.

(9) Red-figured *skýphos* of *c.* 440 B.C. in the Albertinum at Dresden (P. Hartwig in the *Röm. Mitth.* 1897 xii. 93 n. 1, K. Wernicke in *Hermes* 1897 xxxii. 298) =similar goat-figure on either side of the vase, one with equine tail.

(10) Red-figured *skýphos* of *c.* 450 B.C. from Vico Equense in the Bourguignon collection at Naples (W. Fröhner in the *Ann. d. Inst.* 1884 lvi. 205 ff. pl. M, Reinach *Rép. Vases* i. 348, 1 f., C. Robert *Archaeologische Maerchen aus alter und neuer Zeit* Berlin 1886 p. 194 f. fig., P. Hartwig in the *Röm. Mitth.* 1897 xii. 91 f.) =obv. two human figures with goat's head and tail capering, while between them a goddess rises from the ground; rev. two Silenoi with horse's ears and tail dancing on either side of a Maenad.

(11) Red-figured *kratér* of *c.* 450 B.C. from Falerii, now at Berlin (L. Bloch in Roscher *Lex. Myth.* ii. 1378, P. Hartwig in the *Ath. Mitth.* 1896 xxi. 384 n. 2 and in the *Röm. Mitth.* 1897 xii. 89 ff. pl. 4—5) =obv. (*a*) a goddess with diadem and *himátion* rising from the ground, surrounded by four dancing figures with the horns, ears, and tails of goats, (*b*) a lion and a bull; rev. (*a*) Hermes erect, *caduceus* in hand surrounded by four dancing goat-figures of the same sort.

(12) Red-figured *kratér* of *c.* 450 B.C. from Altemura in the British Museum (pl. xxxviii, *Brit. Mus. Cat. Vases* iii. 285 f. no. E 467, A. H. Smith in the *Journ. Hell. Stud.* 1890 xi. 278 ff. pls. 11 f., P. Hartwig in the *Röm. Mitth.* 1897 xii. 92) =obv.

capering or dancing, for the most part alone[1], but sometimes paired with a goat[2] or with a horse-tailed *Silenós*[3]. Twice they dance round Hermes[4]; once, round a goddess rising from the ground[5]. Twice they cut their capers about a pair of deities—Hermes, who holds a forked stick or a *caduceus*, and Pherephatta, who emerges from a grotto or more simply from the ground[6]. Now these situations recall certain scenes in the carnival-plays of modern Greece, which we have already compared with the Lenaean performance[7]. In fact, it is possible to interpret the vases with reference to that performance. We might, for example, suppose some such sequence as the following:—

Scene i: Hermes, lyre in hand, sits on a rock awaiting the *ánodos* of the earth-goddess.

Scene ii: the earth-goddess rises from an artificial cavern.

Scene iii: she hands over her child to Hermes, who acts as its foster-father.

Further, if the Lenaean drama was, as we have contended, the true parent of Attic tragedy, it was presumably followed by a Satyric display[8]. And it may therefore fairly be argued that

(*a*) the decking of Pandora, (*b*) four human figures dancing round a flute-player; each dancer wears a snub-nosed mask (?) with goat's horns and ears, a black waist-band to which is attached an erect *phallós* and a goat's tail, and shoes (?) in the form of goat's feet; rev. (*a*) girls dancing round a flute-player in the presence of a *choregós*, (*b*) a group of four horse-tailed Silenoi, Maenad, etc. playing at ball. Height of vase 1 ft $7\frac{3}{8}$ ins.

(13) Red-figured *kratér* of late Attic style, *c.* end of fifth century B.C., now at Gotha (*Mon. d. Inst.* iv pl. 34, E. Braun in the *Ann. d. Inst.* 1846 xviii. 238 ff., Lenormant—de Witte *Él. mon. cér.* ii. 156, iii. 255 f. pl. 90, Reinach *Rép. Vases* i. 129, 2, P. Hartwig in the *Röm. Mitth.* 1897 xii. 93) = obv. Hermes (ΕΡΜΗΣ) seated on a rock with an ivy-wreath on his head and a lyre in his hand: round him dance three human figures wearing head-bands and ivy-wreaths; they have the horns, ears, tails, shaggy thighs, and feet of goats; rev. three draped figures.

(14) Red-figured *kratér* found at Chiusi in 1854 (*Arch. Zeit.* 1855 xiii. Anz. p. 6*) = Hermes surrounded by goat-footed figures with inscriptions.

(15) Black-figured *kýlix* from Tanagra, not earlier than *c.* 450 B.C., now in the collection of Kyros Simos at Thebes (G. Körte in E. Bethe *Prolegomena zur Geschichte des Theaters im Alterthum* Leipzig 1896 p. 339, P. Hartwig in the *Röm. Mitth.* 1897 xii. 91) = ithyphallic dancer with the horns and face of a goat, but the tail of a horse, holding an *amphora*.

Nos. (1), (2), and (14) of this list are known only from the records here cited.

[1] *Supra* p. 698 n. 1 nos. (1), (2), (5), (7), (9), (15).

[2] *Supra* p. 698 n. 1 no. (4).

[3] *Supra* p. 698 n. 1 no. (3): cp. the reverse of nos. (10) and (12).

[4] *Supra* p. 698 n. 1 nos. (13) and (14).

[5] *Supra* p. 698 n. 1 no. (10).

[6] *Supra* p. 698 n. 1 nos. (8) and (11).

[7] *Supra* p. 694 f.

[8] This is not definitely recorded (A. E. Haigh *The Attic Theatre*[3] rev. by A. W. Pickard-Cambridge Oxford 1907 p. 25); but our records are very incomplete.

in the goatish figures of the vases we should recognise the Satyrs of the primitive Satyr-play.

This conclusion is not at variance with fifth-century representations of more advanced Satyric plays. Of such the earliest specimen (*c.* 450 B.C.) is perhaps the *kratér* from Altemura, now in the British Museum (pl. xxxviii)[1], which shows a goat-chorus dancing round a flute-player[2]. It is by no accident that in juxtaposition with the goat-dancers the vase-painter has placed the decking of Pandora, herself but another form of the earth-goddess, 'Giver of All[3].' Of the same date, or but little later, is a group of vases including a *kratér* at Deepdene (pl. xxxix, 1)[4], a *dêmos* at Athens[5], and sundry fragments at Bonn[6], which presuppose a larger and better original, possibly a fresco by Polygnotos,

[1] *Supra* p. 698 n. 1 no. (12).

[2] Pratinas of Phlious, who *prôtos egraphe Satúrous* (Souid. *s.v.* Pratinas), in a scathing lyrical fragment (1 Bergk[4], 1 Hiller) *ap.* Athen. 617 B—F derides the introduction of flute-music into the rites of Dionysos.

[3] See *e.g.* P. Weizsäcker in Roscher *Lex. Myth.* iii. 1520 ff.

[4] I am indebted to my friend Mr E. M. W. Tillyard, Fellow of Jesus College, Cambridge, for the photograph of this vase, hitherto unpublished, and for the following description of it:

'*Attic Bell-Krater.* Height ·27m. The preservation is perfect except for two small chips in the rim. The shape is early, the body being broad and heavy, the base tapering little and the foot being a plain disc. Above, on a higher plane than the body of the vase, is a myrtle-wreath pattern; below, is a band of double maeanders in threes, divided by saltire-squares. At the handle-bases are egg-and-dot patterns.

On the obverse is a dramatic scene with three figures. On the right is a small stool-like platform on which stands a silen in the attitude known as the *oklasma*. He seems to wear a black loin-cloth, of which only part is visible and above it a band with a mock erect *phallos* and a large horse's tail. This, of course, shows that he is represented as an actor, but the face, beard, pointed ears and hair seem to be natural and not, as one would expect, to form a mask. This confusion of mimic and real silen is probably a mere slip on the artist's part. On the left stands Dionysus [or, more probably, a *choregós* A. B. C.] dressed in a long, sleeved chiton and himation above. He is bearded, wears a fillet in his hair and holds a small-headed thyrsus in his right hand. In the middle stands a bearded man fronting us and with his head turned towards Dionysus. He wears a short, girded chiton. In his right hand he holds a small,

-shaped object [perhaps a double flute with *phorbeiá* attached. A. B. C.].

The reverse shows three *Manteljünglinge*, one of whom holds a strigil.

The vase, now in the Hope Collection and hitherto unpublished, would date from about the middle of the fifth century. The composition is very harmonious and the style, though not strong, is skilful and easy.'

[5] Nicole *Cat. Vases d'Athènes Suppl.* p. 226 f. no. 1055 pl. 17 ('Répétition d'un drame satyrique?'), M. Bieber in the *Ath. Mitth.* 1911 xxxvi. 269 ff. pls. 13, 1 f., 14, 4 f.

[6] M. Bieber in the *Ath. Mitth.* 1911 xxxvi. 272 ff. pls. 13, 3, 14, 1—3.

representing preparations for a Satyr-play[1]. In this group the Satyrs, both on and off the stage, have equine tails like the *Silenoi*[2], but hairy loin-cloths which may be meant for stylised goat-skins[3]. Later again, but descended from the same original, are a famous *kratér* at Naples painted *c.* 400 B.C.[4] and a contemporary *kratér* at Deepdene (pl. xxxix, 2)[5]. Here too the

[1] M. Bieber *loc. cit.* was the first to detect that the vase at Athens and its replicas at Bonn are but 'ein ziemlich gedankenloses Excerpt aus einer grösseren und besseren Vorlage.' We may venture, on the strength of the Naples *kratér* (*infra* n. 4), to conjecture that this original was a fresco by Polygnotos, whose fondness for figures arranged at different levels is notorious (see *e.g.* H. B. Walters *History of Ancient Pottery* London 1905 i. 441 ff.).

[2] *Supra* p. 696 f. A. Furtwängler *Winckelmannsfest-Progr. Berlin* xl. 25 (= *Kleine Schriften* München 1912 i. 207) cites Ktesias *frag.* 57 (p. 86 f. Müller) *ap.* Phot. *bibl.* p. 45 a 20 ff. cod. Mon. 287 *ἐν δὲ τῇ αὐτῇ* Ἰνδικῇ *εἰς τὸν μυχὸν τῆς πελαίας* (*πελαγίας* Hœschel) *νήσου φασὶ τοὺς ἐνοικοῦντας κἀκεῖ οὐρὰς ἔχειν μεγίστας, ὁποίας διαγράφουσι τῶν Σατύρων*, cp. Ptol. 8. 3 *ταύτας οἱ κατέχοντες οὐρὰς ἔχειν λέγονται, ὁποίας διαγράφουσι τὰς τῶν Σατύρων.*

[3] The 'Radornament' (Bieber) on the loin-cloth is perhaps a conventional rendering of a patchy skin.

[4] Heydemann *Vasensamml. Neapel* p. 546 ff. no. 3240, J. de Witte in the *Ann. d. Inst.* 1841 xiii. 303 ff., *Mon. d. Inst.* iii pl. 31, B. Arnold in Baumeister *Denkm.* i. 385, 388 ff. pl. 5 fig. 422, Reinach *Rép. Vases* i. 114, E. Kuhnert in Roscher *Lex. Myth.* iv. 496 ff. fig. 13.

[5] Tischbein *Hamilton Vases* i. 122 f. pl. 39, Reinach *Rép. Vases* ii. 288, 5. I have again to thank Mr E. M. W. Tillyard for the accompanying photograph and notes:

'*Lucanian Bell-Krater.* Height ·325m. Well-preserved except that the varnish is beginning slightly to flake off. The clay is of a rich, salmon-pink colour and the varnish deep black and rather metallic in appearance. The shape shows the middle development of the bell-krater, being neither broad nor elongated. Above is a laurel-wreath pattern of the usual type with small and carefully drawn leaves. Below is a band of double maeanders in pairs divided by saltire-squares. At each handle-base is a reserved band with black tongues painted on it.

The obverse shows three young comic actors. They all wear close-fitting leathern loin-cloths, into which are fixed large *phalloi*. The actor on the right being in profile, it is possible to see that he also wears a small tail, whether of a horse or a goat it is a little difficult to say. On the side of each loin-cloth is a little ornament like a four-spoked wheel. All three actors have masks. The one on the right wears his, and, with his hands clapped to the small of his back and his right leg kicked back, strikes a comic attitude. The other two stand in easy attitudes, holding their masks in their hand. On the right, on the ground, is a tympanum, seen obliquely. On the reverse are three *Manteljünglinge*.

The vase is of Lucanian fabric and dates from about the end of the fifth century. In style it is considerably under Attic influence and is descended directly from the class of early South Italian vases which Furtwängler thought might have come from the Attic colonies in Italy and which Hauser later proved to be connected with Heraclea[1]. The drawing is very easy and careful.

The vase belonged to the second Hamilton Collection and has been already published by Tischbein[2]. The present reproduction is from a new photograph. The vase is now in the Hope Collection.

[1] FRH II. p. 264.

[2] I. pl. 39. Reproduced on a small scale in Wieseler *Theatergebäude* pl. VI. 3.'

Satyrs have shortish horse-tails. But those on the Naples vase are in most cases wearing a shaggy skin, presumably a goat-skin, round their loins; and those on the Deepdene vase have their waist-bands patterned in such a way as to suggest a fringed or shaggy edge.

In short, the evidence of the vases—agreeing, as it does, with one or two literary allusions[1]—leads me to follow in the steps of Furtwängler[2], Körte[3], Hartwig[4], Wernicke[5], and to conclude that the *Sátyroi* before contamination with the *Silenoí* were conceived at Athens as goat-like dancers[6], who greeted the uprising of the chthonian goddess, mother of Dionysos.

[1] Aisch. *Prometheus Pyrkaeus frag.* 207 Nauck² *ap.* Plout. *de utilit. ex inimic. percip.* 2 *τοῦ δὲ Σατύρου τὸ πῦρ, ὡς πρῶτον ὤφθη, βουλομένου φιλῆσαι καὶ περιβαλεῖν, ὁ Προμηθεύς "τράγος γένειον ἆρα πενθήσεις σύ γε,"* Eustath. *in Il.* p. 415, 6 ff. *καὶ τὸ "τράγος γένειον ἆρα (leg. ἆρα) πενθήσεις σύ γε" ἀντὶ τοῦ· ὦ τράγε, πάνυ στερήσῃ γενείου, εἰ τὴν φλόγα φιλήσεις,* Epiphan. *ancor.* 106 (i. 208, 29 ff. Dindorf) *ἄλλος δὲ (sc. Ζεύς) ὁ τραγῳδός, ὁ καὶ τὴν χεῖρα αὐτοῦ καύσας· τάχα δὲ θεὸς ὢν ἐπελάθετο ὅτι δάκνει τὸ πῦρ καὶ οὐκ εἶχε τὴν πρόγνωσιν τοῦ λέγοντος τράγῳ τῷ Σατύρῳ, εὑρόντι πρότερον (ὁρῶντι πρῶτον* Meineke) *τὸ πῦρ καὶ προσελθόντι φιλῆσαι, "μὴ ἅψῃ, τράγε· ἀψάμενος γάρ μου ἐμπρήσεις τὰ γένεια."*

Soph. *Ichneutae* col. xiv, 15 f. (*The Oxyrhynchus Papyri* London 1912 ix. 59 no. 1174) *νέος γὰρ ὢν ἀνὴρ | π[ώγ]ωνι θάλλων ὡς τράγος κν<ή>κῳ χλιδᾷς.*

Eur. *Cycl.* 76 ff. XO. (of Satyrs)...*ἐγὼ δ' ὁ σὸς πρόπολος θητεύω | ... | δοῦλος ἀλαίνων ξὺν τῇδε τράγου | χλαίνᾳ μελέᾳ.*

None of these passages affords conclusive proof that the Satyrs were hircine, since the first might be explained as a case of abbreviated comparison (see P. Shorey in *Class. Philol.* 1909 iv. 433 ff.), the second is a simile, and the third implies that the goat-skin was a cheap country garb (see W. Ridgeway *The Origin of Tragedy* Cambridge 1910 p. 87). But all alike gain considerably in point, if we may assume that the Satyrs were essentially goat-like.

[5] K. Wernicke in *Hermes* 1897 xxxii. 290 ff. and in Roscher *Lex. Myth.* iii. 1409 ff.

[6] E. Reisch 'Zur Vorgeschichte der attischen Tragödie' in the *Festschrift Theodor Gomperz* Wien 1902 p. 451 ff. and E. Kuhnert in Roscher *Lex. Myth.* iv. 524 ff. have attempted to show that these goat-creatures were *Pânes*, not *Sátyroi*. In answer to their arguments I would reply: (*a*) We have no reason to think that the Athenians of the fifth century believed in a plurality of *Pânes* and personated them in public religious dances. Aisch. *Glaucus frag.* 35 Nauck² *ap.* schol. Eur. *Rhes.* 36 *Αἰσχύλος δὲ δύο Πᾶνας τὸν μὲν Διὸς δὲ καὶ (Διὸς Ἀρκάδος* Vater, *οὗ εἶναι Ἀρκάδα* Nauck) *δίδυμον, τὸν δὲ Κρόνου* and schol. Theokr. 4. 62 *τοὺς Σατύρους πλείους φησίν, ὡς καὶ τοὺς Σιληνοὺς καὶ Πᾶνας, ὡς Αἰσχύλος μέν ἐν Ὑλαύκῳ, Σοφοκλῆς δὲ ἐν Ἀνδρομέδᾳ* proves that Aischylos recognised two *Pânes*: Soph. *Andromeda frag.* 132 Nauck² *ap.* schol. Theokr. *loc. cit.* merely proves that Sophokles mentioned two or more *Silenoí*. Other passages, *e.g.* Aristoph. *eccl.* 1069, Plat. *legg.* 815 c, are of later date than the fifth century. (*b*) If the goat-figures on the vases listed *supra* p. 698 n. 1 were *Pânes*, they would rather have been associated with Nymphs (Plat. *legg.* 815 c, Paus. 8. 37. 2) and equipped with the *sýrinx* (*e.g. Brit. Mus. Cat. Vases* iii. 180 f. no. E 228 pl. 9, Heydemann *Vasensamml. Neapel* p. 19 ff. no. 690, p. 495 ff. no. 3218, cp. H. Schrader in the *Ath. Mitth.* 1896 xxi. 275 ff.).

See page 701 f.

At the same time it remains possible, indeed probable, that these goat-dances were not *ab origine* connected with Dionysos, but had existed from time immemorial as a popular custom in south Europe. On August 12, 1908, Monsieur P. Bourrinet found in the Abri Mège, a Magdalenian rock-shelter at Teyjat (Dordogne)[1], a well-preserved 'bâton de commandement' of stag's-horn, on which were engraved various animal forms—the head of a hind, three snakes, a large horse followed by the forepart of a little horse, three swans, and lastly three 'diablotins' (fig. 512)[2]. These remarkable figures represent men disguised

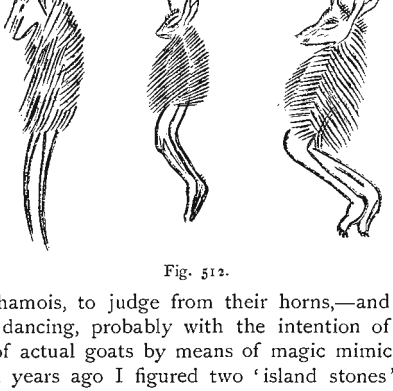

Fig. 512.

as goats—chamois, to judge from their horns,—and engaged in jumping or dancing, probably with the intention of multiplying the supply of actual goats by means of magic mimicry[3].

Nineteen years ago I figured two 'island stones' from Crete and one from Athens, on which human beings are seen dressed in the skins of goats (figs. 513, 515, 516)[4]. I pointed out then

[1] L. Capitan, H. Breuil, P. Bourrinet, and D. Peyrony 'L'abri Mège' in the *Revue de l'École d'Anthropologie de Paris* 1906 xvi. 196—212 with 9 figs.

[4] See the *Journ. Hell. Stud.* 1894 xiv. 150 ff.

Fig. 513 is a lenticular seal of serpentine from Crete in the Pauvert de la Chapelle collection (O. Rossbach in the *Ann. d. Inst.* 1885 lvii. 193 pl. GH, 6, Collignon *Hist. de la Sculpt. gr.* i. 57 fig. 34, *Journ. Hell. Stud.* 1894 xiv. 150 fig. 20, Furtwängler *Ant.*

that, according to Hesychios[1], the Bacchants wore goat-skins, and I suggested that the ritual thus found in the cult of Dionysos was very possibly a relic of a more wide-spread practice. Today I can add another (fig. 514)[2] to the series of seal-stones portraying human goats and venture on a closer determination of their meaning. I suppose them to show 'Minoan' dances, the object of which was to promote fertility—originally the fertility of the local fauna—by means of imitative magic and so to safeguard the food-supply of the population.

Fig. 513.

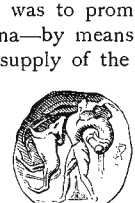

Fig. 514.

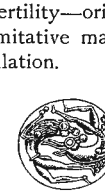

Fig. 515.

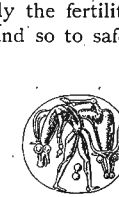

Fig. 516.

Given the existence of such old-world dances within the Greek area, it is reasonable to surmise that they might attach themselves to the cult of any fertility-power—Hermes, Demeter, Dionysos, or the like[3]. Further, if in a certain district the said power was

Gemmen i pl. 2, 40, ii. 12f.)=a man wearing the *protomé* of a wild goat with three pellets in the field, one of which is rayed like a star.

Fig. 515 is a lenticular seal of cornelian, found at Athens in 1884 and now in the collection of Sir Arthur Evans (*Journ. Hell. Stud.* 1894 xiv. 116 fig. 11)=two human figures, one wearing the forepart of a goat, the other that of a lion.

Fig. 516 is a lenticular seal of green porphyry from Crete now in the British Museum (*Brit. Mus. Cat. Gems* p. 44 no. 76 pl. A, A. [2] Fig. 514 is a lenticular seal of green porphyry in the Story Maskelyne collection (Furtwängler *Ant. Gemmen* i pl. 6, 6, ii. 26, Milani *Stud. e mat. di arch. e num.* 1902 ii. 69 fig. 193)=a human goat with a hound running beside him and three linear signs in the field, viz. ⅄ on the left, ⅄ on the right, and ⅄ beneath.

[3] Winter *Ant. Terrakotten* iii. 1. 220 figs. 1 (=my fig. 517), 2, 3, 4, 7 (=my fig. 519), 9 (=my fig. 518) has classified under six types a number of archaic terra-cotta statuettes, mostly found in central Greece (the Theban Kabeirion, Tanagra, Halai, etc.), which represent an ithyphallic goat-man with hircine or human legs and a *cornu copiae* in his hand. P. Baur, who in the *Am. Journ. Arch.* 1905 ix. 157—165 pl. 5 (=my fig. 520) adds yet another type to the series, proposes the name of Tityros for them all. But O. Kern in *Hermes* 1913 xlviii. 318f. distinguishes *Τίτυροι* as 'Schafbocksdämonen' from *Σάτυροι* as 'Ziegenbocksdämonen,' citing Serv. *in* Verg. *ecl.* 1 prooem. (*supra* p. 401 n. 7), schol. Bernens. *ecl.* 1. 1 p. 749 Hagen tityrus lingua Laconica villosus aries appellatur, Prob. *in* Verg. *ecl.* p. 349 Lion hircus Libyca (*leg.* Laconica) lingua tityrus appellatur, and a small bronze group of ram-headed male dancers from Methydrion now in the National

believed to take shape as a goat, his cult would almost inevitably be amalgamated with the aboriginal goat-dances. Now we have in point of fact found the Satyrs or goatish dancers of the fifth-century vases sometimes cutting capers by themselves, but sometimes also associated with Hermes, Pherephatta, and the equine followers of Dionysos[1], in short with a whole posse of fertility-powers. Moreover, we have seen Dionysos himself worshipped as *Ériphos* in Lakonike[2], as *Eriphios* at Metapontum[3]; and we have had reason to conjecture that his Thraco-Phrygian devotees identified themselves with him and hence took the name of *ériphoi*[4]. Finally, we have observed that Thespis the reputed founder of Greek 'tragedy' came from Ikaria, where men danced round a *trágos*[5]. These facts suggest that the tragic chorus in pre-literary days consisted of men dressed as *trágoi* in order to personate a goat-Dionysos. They must have sung then, as in northern Greece they still sing[6], of an annual birth, death, and resurrection. It is not therefore to be wondered at, if such a performance attracted to itself and absorbed into itself those primitive goat-dances that had subsisted in south Europe from palaeolithic times. The tragic chorus thereby acquired a Satyric supplement. Tragedy led up to the Satyr-play. And the revel-rout may well have served, as Prof. Murray acutely divined[7], to represent the joyous arrival of the re-born god.

Museum at Athens (F. Hiller von Gaertringen and H. Lattermann in the *Abh. d. berl. Akad.* 1911 Phil.-hist. Classe p. 41 pl. 13, 3 *a*, *b*). Probably in Boiotia the goat-dances were absorbed into the cult of the Kabeiros just as at Athens they were absorbed into that of Dionysos.

(κ) Zeus, Dionysos, and the Goat.

The Attic festivals with their amazing output of tragedy and comedy tended to obscure the early Thraco-Phrygian relations of Zeus, Dionysos, and the goat. But it would be a mistake to suppose that those relations were wholly forgotten. For example, at the Phrygian Laodikeia, a town once called Diospolis[1],

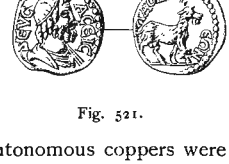

Fig. 521.

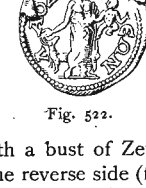

Fig. 522.

quasi-autonomous coppers were issued with a bust of Zeus *Aseís*[2] on the obverse and sometimes a goat on the reverse side (fig. 521)[3], or again with a youthful head of Demos on the obverse and Zeus *Aseís* carrying the infant Dionysos with a goat beside him on the reverse (fig. 522)[4].

A fragmentary *kýlix* of red-figured technique, painted in the style of Hieron and found on the Akropolis at Athens (fig. 523)[5],

[1] Plin. *nat. hist.* 5. 105.

[2] This cult-title has been usually identified with the name of the Syrian and Arabian god Azizos (O. Jessen in Pauly—Wissowa *Real-Enc.* ii. 1531, Sir W. M. Ramsay *The Cities and Bishoprics of Phrygia* Oxford 1895 i. 33), who along with Monimos was worshipped at Edessa as a supporter of Helios (Ioul. *or.* 4. 150 C, 154 A), the pair being probably conceived as morning- and evening-star (F. Cumont in Pauly—Wissowa *Real-Enc.* ii. 2644, H. Steuding in Roscher *Lex. Myth.* i. 743, W. Drexler *ib.* ii. 3202, R. Dussaud in the *Rev. Arch.* 1903 i. 128—133, 1904 i. 208 n. 3=*id. Notes de mythologie syrienne* Paris 1903 pp. 9—14, 1905 p. 75 n. 3). If so, the epithet is Semitic ('*asīz*, 'the Strong'). But P. Carolidis *Bemerkungen zu den alten kleinasiatischen Sprachen und Mythen* Strassburg 1913 p. 32 f. proposes to refer it to an Armenian *aiz*, 'Luft, dann Geist, Dämon und Gott.' Both explanations are highly precarious.

[3] *Brit. Mus. Cat. Coins* Phrygia pp. lxxxi, 300 pl. 36, 11 ΣЄVC ΑCЄIC and ΛΑΟΔΙ [Κ]ЄΩΝ, Imhoof-Blumer *Monn. gr.* p. 407 no. 128, Head *Hist. num.*[2] p. 679.

[4] *Brit. Mus. Cat. Coins* Phrygia pp. lxxxi, 298 pl. 36, 5 ΔΗΜΟC and Λ ΑΟΔΙ Κ ЄΩΝ, Eckhel *Doctr. num. vet.*[2] iii. 158 f., Rasche *Lex. num.* Suppl. iii. 263, Imhoof-Blumer *Monn. gr.* p. 407 no. 129 pl. G, 30. The same reverse is found on a coin struck by Iulia Domna (*id. ib.* p. 407 no. 131), and with the head of Zeus turned to the left, on a coin of Otacilia (*Brit. Mus. Cat. Coins* Phrygia p. 323 no. 258, Imhoof-Blumer *Monn. gr.* p. 407 no. 132 pl. G, 31). Cp. also a coin of L. Aelius Caesar with reverse showing Zeus *Aseís*, who stands to the left and extends his right hand over the head of a goat (*Brit. Mus. Cat. Coins* Phrygia p. 311 no. 201 ΑCЄIC ΛΑΟΔΙΚЄΩΝ, Imhoof-Blumer *Monn. gr.* p. 407 no. 130).

[5] First published in the *Jahrb. d. kais. deutsch. arch. Inst.* 1891 vi. 43 pl. 1 by

represents a procession of deities conducted by Hermes towards an altar, beside which stand two women, one with an *oinochóe* and a flower, the other with a basket. Beyond the altar are trees, denoting a sacred grove. Foremost in the procession marches

Fig. 523.

Zeus carrying the child Dionysos; and we notice that the pediment of the altar is occupied by figures of a goat and two kids. A. Frickenhaus argues that this vase must be brought into connexion with others, which, as he endeavours to prove, illustrate the ritual of the Lenaia[1]. Be that as it may[2], we have here clearly the old association of Zeus, Dionysos, and the goat[3].

But it is to the theatre itself that we naturally turn for the last traces of this lingering connexion. Nor are we disappointed.

B. Graef, who after adding further fragments allowed A. Frickenhaus *Lenäenvasen* (*Winckelmannsfest-Progr. Berlin* lxxii) Berlin 1912 p. 21 f. with fig. (=my fig. 523) to publish the principal group in its reconstituted form and so to anticipate the final publication in Graef *Ant. Vasen Athen.*

[1] *Supra* p. 671 f.

[2] A *hydria* of severe style at Paris (De Ridder *Cat. Vases de la Bibl. Nat.* ii. 331 f. no. 440, Inghirami *Vas. fitt.* iv. 115 pl. 384, Luynes *Descr. de vases peints* p. 16 f. pl. 28=my fig. 524, F. Creuzer *Symbolik und Mythologie*[3] Leipzig and Darmstadt 1842 iv. 218 pl. 2, B. Graef in the *Jahrb. d. kais. deutsch. arch. Inst.* 1891 vi. 46 f. with fig., F. Lenormant in Daremberg—Saglio *Dict. Ant.* i. 603 fig. 680, Overbeck *Gr. Kunstmyth.* Zeus Atlas pl. 1, 19, Reinach *Rép. Vases* ii. 260, 1) again shows Zeus (ΠΕΛΣ ?) bearing the child Dionysos (ΔΙΟΝ[Υ]ΣΟΣ) towards two women. The first sits on a folding-stool beside a pillar, with a spray of ivy in her left hand, a *stephánē* on her head, and above her perhaps the word καλός (certainly not Τάδες). The second stands with a sceptre in her right hand and an ivy-wreath on her head. It is open to us to see in these two women the Maenads of Frickenhaus' 'Lenaean' vases, and to suppose that the cult-pillar and its table-altar have been modified into the pillar and stool of a *gynaikonîtis*.

[3] It was Miss Harrison who, with her customary kindness, pointed out to me the importance of this vase as a link in my argument.

The stage of Phaidros (*s.* iii or iv A.D.) is still decorated with four marble reliefs, which came from an earlier stage (probably of Neronian date) and illustrated appropriately enough the life-history of Dionysos. Existing publications of them[1] are so inadequate that I have had fresh drawings made from photographs, and have ventured to add on a transparent overleaf a restoration of the missing parts in accordance with what I hold to have been the sculptor's design (see pocket at end of vol. i).

Fig. 524.

The first slab (pl. xl, 1) shows Zeus seated on a rock, as befits a sky-god[2] the consort of an earth-goddess[3]. He has a *himátion* wrapped about his knees, and his right hand doubtless held a sceptre[4]. Before him stands Hermes carrying the new-born

[1] F. Matz in the *Ann. d. Inst.* 1870 xlii. 97—106, *Mon. d. Inst.* ix pl. 16 (careless); L. Julius in the *Zeitschrift für bildende Kunst* 1878 xiii. 236 ff., J. R. Wheeler in *Papers of the American School of Classical Studies at Athens* 1882—1883 i. 136—142 with a heliotype pl., Harrison *Myth. Mon. Anc. Ath.* p. 281 ff. figs. 22—25, Frazer *Pausanias* ii. 222 f., 226 f., v. 505 f., E. A. Gardner *Ancient Athens* London 1902 p. 450 f. with fig. on p. 453, M. L. [2] *Supra* p. 124 ff.

[3] Cp. the type of the *hieròs gámos* on Mt. Ide (*infra* ch. iii § 1 (a) iii).

[4] So *e.g.* on two reliefs in the Louvre ((1) Clarac *Mus. de Sculpt.* pl. 200 fig. 26, Reinach *Rép. Stat.* i. 88 no. 3, Overbeck *Gall. her. Bildw.* i. 390 Atlas pl. 16, 12, *id. Gr. Kunstmyth.* Zeus pp. 171, 176 ff. Atlas pl. 3, 15, Friederichs—Wolters *Gipsabgüsse* p. 743 f. no. 1875; (2) T. Panofka in the *Ann. d. Inst.* 1829 i. 298 ff., *Mon. d. Inst.*

Dionysos. And the scene is enclosed by two Kouretes ready to clash their shields and so avert mischief from the babe.

The second slab (pl. xl, 2) commemorates the god's entrance into Attike. He stands, a comely youth dressed in *chitón*, panther-skin, *himátion*, and *kóthornoi*, beside his own altar beneath a spreading vine. His left hand held a *thýrsos*, his right hand probably a *phiále*. Approaching the altar is Ikarios, who drags a goat for sacrifice with one hand and dangles a grape-bunch in the other. The old Attic hero is attended by his hound Maira and followed by his daughter Erigone, who carries a tray of cakes and fruit. Her figure is balanced by that of a Satyr with panther-skin and crook, standing on tip-toe in the pose known as *aposkopeíon*.

On the third slab (pl. xl, 3) we have, if I am not mistaken[1], a scene of great interest—the marriage of Dionysos and the *Basílinna* or 'Queen' of Athens[2]. A young man of large but somewhat soft and effeminate build, easily characterised as Dionysos by means of attributes, stands beside a young woman draped in a Doric *péplos*, who pulls forward an ample veil with a gesture familiar to us as that of a bride. To the right of the youthful pair is a broad matronal figure, who bears a *cornu copiae* in her left hand and most likely held a sceptre in her right. She

pl. 12, 1, Clarac *Mus. de Sculpt.* pl. 123 fig. 104, Reinach *Rép. Stat.* i. 22 no. 2, Overbeck *Gr. Kunstmyth.* Zeus pp. 171, 177 f., 576 f.).

[1] F. Matz *loc. cit.*, followed in the main by J. R. Wheeler *loc. cit.*, held that the third slab represents, from left to right, Hestia, Theseus, Eirene; the fourth slab, Eirene, Theseus, Hestia, Dionysos. Eirene and Hestia stood together in the Prytaneion (Paus. 1. 18. 3), and might perhaps have symbolised the public and private happiness of the citizens; but the Greeks never hit upon a distinctive art-type for Hestia (A. Preuner in Roscher *Lex. Myth.* i. 2653), and the younger goddess of the third slab is obviously conceived as a bride.

J. N. Svoronos *loc. cit.* thinks that the two slabs show Ptolemy Philometor Soter ii and his family paying homage to Dionysos, and that the figures, from right to left, should be identified as follows: (1) his mother Kleopatra ii with sceptre; (2) Ptolemy Philometor Soter ii with club; (3) his wife, name unknown, with sceptre and *cornu copiae*; (4) his favourite daughter Berenike iii with sceptre and *cornu copiae*; (5) his young son Ptolemy king of Kypros; (6) his other daughter Kleopatra Tryphaina; (7) his youngest son Ptolemy Auletes, whose figure may have been cut away either on political grounds or because he had irreverently assumed the title Dionysos (Loukian. *de calumn.* 16). This very ingenious hypothesis rests on the assumption that the reliefs came from a *thyméle* erected in the *orchéstra* of the theatre, for the performance of such competitions as had been previously held in the Odeion burnt by Aristion (85 B.C.), at the expense of Ptolemy Philometor Soter ii—a king who is known to have conferred many benefits upon the Athenians (Paus. 1. 8. 6 ff.). But the existence of such a *thyméle*, in spite of Svoronos' long and learned advocacy, is still highly problematic.

[2] *Supra* p. 686. An Attic *oinochóe* of fifth-century style, now in the British Museum, has another rendering of the same scene (Farnell *Cults of Gk. States* v. 260).

has long since been recognised as Tyche[1], that late successor of the old-world mother-goddess[2]. To the left a whole figure has been carefully chiselled away from the background. Since that part of the base on which it stood has been removed along with it, we may surmise that it was carried off as being a piece of exceptional beauty, to be set up again in some rich man's house. And since the marks on the back-wall indicate a slender male figure with something raised on the spectator's left, I have restored it as Eros with wings[3]. Tyche carrying the horn of Amaltheia was paired with a winged Eros at Aigeira[4]; and coins of the town struck by Plautilla prove that the former stood grasping a sceptre in her right hand, while the latter with crossed legs held a long torch or staff pointing upwards in both hands[5]. Together they would be appropriate witnesses of the ritual marriage.

Not less interesting is the fourth slab (pl. xl, 4), on which we see Dionysos finally installed in his own theatre. He sits in an attitude of easy dignity on a gorgeous marble throne, recalling that of the priest who personated him in the front row of the *auditorium*. The background shows the broken surface of the Akropolis-rock, and above its edge rise the eight columns of the Parthenon's *façade*. It is probable that a *thýrsos* or sceptre once rested against the god's left shoulder. Of the three figures before him two are already known to us. His bride, the 'Queen,' still fingering her veil, perhaps held out a wreath towards him. Tyche is present, as before, with *cornu copiae* and sceptre. And between them stands a short but sturdy figure with *himátion* and club—Theseus, the embodiment of the Athenian people assembled in the theatre to pay homage to Dionysos on his throne.

The Greek genius even in its decline knew how to build old materials into new and significant shapes. This series of reliefs ostensibly illustrates the infancy, the advent, the marriage, and the installation of Dionysos. But the art-types employed are redolent of old associations. Thus the Kouretes take our thoughts

[1] J. R. Wheeler *loc. cit.* p. 141.

[2] *Supra* p. 136 n. 6, cp. p. 597 n. 4, *infra* ch. i § 8 (a).

[3] It is tempting to conjecture that this was the very statue to which a famous but of course apocryphal story attached: Athen. 591 A *καὶ Πραξιτέλης δὲ ὁ ἀγαλματοποιὸς ἐρῶν αὐτῆς* (*sc.* Phryne) *τὴν Κνιδίαν Ἀφροδίτην ἀπ' αὐτῆς ἐπλάσατο, καὶ ἐν τῷ τοῦ Ἔρωτος βάσει τῇ ὑπὸ τὴν σκηνὴν τοῦ θεάτρου ἐνέγραψε· Πραξιτέλης ὃν ἔπασχε διηκρίβωσεν ἔρωτα, | ἐξ ἰδίης ἕλκων ἀρχέτυπον κραδίης, | Φρύνῃ μισθὸν ἐμεῖο διδοὺς ἐμέ· φίλτρα δὲ βάλλω | οὐκέτ' ὀϊστεύων, ἀλλ' ἀτενιζόμενος* (cp. *Anth. Plan.* 204 Simonides !). See, however, W. Klein *Praxiteles* Leipzig 1898 p. 219 ff.

[4] Paus. 7. 26. 8. See further Gruppe *Gr. Myth. Rel.* p. 1086 n. 3 *med.*

[5] Imhoof-Blumer and P. Gardner *Num. Comm. Paus.* ii. 91 pl. S, 8 f., Frazer *Pausanias* iv. 179 fig. 24.

back to Crete and remind us that Dionysos himself was but a rebirth of Zeus[1]. Ikarios' goat recalls the ancient custom of dancing round a he-goat at Ikaria[2]; and the presence of the Satyr suggests the aboriginal goat-dances of south Europe[3]. Similarly the marriage[4] and the enthronement[5] of the young god are reminiscent of half-forgotten sanctities. In short, the whole frieze might serve as an epitome of the development that we have been studying throughout the last seven sections.

We cannot here pursue Roman parallels. But a passing allusion must be made to the cult of Vediovis, the youthful Iupiter[6]. Among the few things known for certain about this god is the statement of Gellius[7] that in his temple between the Arx and the Capitolium the cult-statue held arrows and in consequence was often dubbed Apollo; further, that the ritual involved the sacrifice of a she-goat as if it were a human being[8]; and lastly, that the effigy of this animal stood beside that of the god. All this suggests comparison with Dionysos, *e.g.* with the Tenedian Dionysos *Anthroporrhaístes*, to whom a calf dressed in buskins was sacrificed, presumably in lieu of a human victim[9]. The Dionysiac character of Vediovis seems to have struck the Romans themselves, if we may argue from certain republican coins, which

[4] *Supra* pp. 649 n. 7, 650, 686, 694 f. [5] *Supra* pp. 153, 398, 646 f., 650, 661.

[6] Ov. *fast.* 3. 437 Iuppiter est iuvenis: iuvenalis aspice voltus, 445 ff. nunc vocor ad nomen: vegrandia farra colonae | quae male creverunt, vescaque parva vocant; | vis ea si verbi est, cur non ego Vediovis aedem | aedem non magni suspicer esse Iovis? Paul. ex Fest. p. 379 Müller, p. 519 Lindsay *vesculi* male curati et graciles homines. *ve* enim syllabam rei parvae praeponebant, unde *Vediovem* parvum Iovem et *vegrandem* fabam minutam dicebant.

[7] Gell. 5. 12. 11 f. simulacrum igitur dei Vediovis, quod est in aede, de qua supra (5. 12. 2) dixi, sagittas tenet, quae sunt videlicet partae ad nocendum. quapropter eum deum plerumque Apollinem esse dixerunt; immolaturque ritu humano capra, eiusque animalis figmentum iuxta simulacrum stat. Cp. Ov. *fast.* 3. 438 ff. aspice deinde, manu fulmina nulla tenet. | fulmina post ausos caelum adfectare Gigantes | sumpta Iovi. primo tempore inermis erat (this is, I think, compatible with the supposition that the statue really held a thunderbolt, which was mistaken for a mere bundle of arrows—harmless, of course, without their bow)...stat quoque capra simul: Nymphae pavisse feruntur | Cretides; infanti lac dedit illa Iovi.

[8] The expression *ritu humano* (*supra* n. 7) is thus understood by Frazer *Golden Bough*[2] ii. 168, *ib.*[3]: Spirits of Corn and Wild i. 33—rightly, as I conceive.

[9] *Supra* p. 659 f. Cp. also the case of Embaros, who, after promising to sacrifice his daughter to Artemis on condition that his family should become hereditary priests of the goddess, concealed the maiden in the temple and sacrificed a she-goat dressed in her garments instead (Pausanias the lexicographer *ap.* Eustath. *in Il.* p. 331. 25 ff., *Append. prov.* 2. 54, Souid. *s.v.* Ἐμβαρός εἰμι: see further O. Höfer in Roscher *Lex. Myth.* ii. 3226 f., J. Escher-Bürkli in Pauly—Wissowa *Real-Enc.* v. 2482, and on the substitution of goats for human victims Frazer *Golden Bough*[3]: The Dying God p. 166 n. 1, *ib.*[3]: Spirits of Corn and Wild i. 249).

are commonly believed to represent that deity[1]. *Denarii* issued by L. Caesius *c.* 91 B.C. have as their obverse type the head and shoulders of a young god, who is brandishing a thunderbolt of three tines (fig. 525)[2]. A bolt of this form might be popularly viewed as a bundle of arrows; and a youthful archer would inevitably be taken for Apollo[3]. *Denarii* of C. Licinius Macer *c.* 85 B.C. repeat the type[4]. About the same date other and more obviously Apolline renderings of the head are found on coins of M'. Fonteius (figs. 526[5], 527[6]). That this too was

Fig. 525.

Fig. 526.

Fig. 527.

intended for a young head of Iupiter is clear from the thunderbolt added beneath it. But the god wears a bay-wreath, not a mere fillet; and that trait, if original, would give a further reason for the confusion of Vediovis with Apollo[7]. We cannot,

[1] This is the opinion expressed by E. Babelon, P. Gardner, H. Grueber, and numismatists in general. It is called in question by H. Jordan in the *Commentationes philologicae in honorem Theodori Mommseni* Berolini 1877 p. 365, Preller—Jordan *Röm. Myth.*[3] i. 264 n. 3, H. Jordan *Topographie der Stadt Rom im Alterthum* Berlin 1885 i. 2. 116 n. 118, A. Klügmann in the *Arch. Zeit.* 1878 xxxvi. 106 f.

[2] Babelon *Monn. rép. rom.* i. 281 f. fig., *Brit. Mus. Cat. Rom. Coins* Rep. ii. 290 pl. 94, 10, Overbeck *Gr. Kunstmyth.* Zeus p. 200 Münztaf. 3, 4. I figure a specimen in my collection. The reverse has the two Lares *Praestites* seated on a rock with a dog between them (P. Gardner in W. Warde Fowler *The Roman Festivals* London 1899 p. 351 f., cp. p. 101 n. 1).

[3] The monogram is not, however, a ligature of ΑΡ for *Apollo* (T. Mommsen *Histoire de la monnaie romaine* Paris 1870 ii. 370, Babelon *loc. cit.*), but a compendium of the word *Roma* (G. B. Zannoni *Reale Galleria di Firenze illustrata* Florence 1817 iv. 3. 176, Overbeck *Gr. Kunstmyth.* Zeus p. 200, A. Klügmann *loc. cit.*, H. Montagu in the *Num. Chron.* Third Series 1895 xv. 162, P. Gardner *loc. cit.*, H. Grueber in the *Brit. Mus. Cat. Rom. Coins* Rep. i. 322 n. 2).

[4] Babelon *Monn. rép. rom.* ii. 132 f. fig., *Brit. Mus. Cat. Rom. Coins* Rep. i. 320 pl. 38, 8. The reverse has Minerva in a galloping *quadriga*.

[6] Babelon *Monn. rép. rom.* i. 505 ff. nos. 9 f. figs., cp. nos. 12 f. figs., *Brit. Mus. Cat. Rom. Coins* Rep. i. 322 f. pl. 38, 11 f., cp. p. 323 pl. 38, 14 and fig. I illustrate a specimen in my collection.

[7] Yet another reason for the mistake was the goat at Vediovis' side. On the relations of the animal to the Greek Apollon see L. Stephani in the *Compte-rendu St. Pét.* 1869

however, put much faith in the accuracy of the die-sinker; for he varies loose locks (fig. 526) with archaistic ringlets (fig. 527). The reverse of Fonteius' coins shows Cupid riding on a goat[1]. This subject, which is fairly frequent in Hellenistic art[2], seems to have arisen within the Dionysiac circle[3]. The *thýrsos* beneath the goat likewise confirms our impression that the Romans, under the all-pervading influence of Greece, had come to regard Vediovis as a sort of Dionysos. The former was to Iupiter what the latter was to Zeus.

Fig. 528.

Indeed few facts in the religious history of the Mediterranean peoples are more striking than the vitality displayed by this belief in the re-born Zeus or Dionysos. A bronze medallion of Antoninus Pius (fig. 528)[4] has the infant god riding his goat to an altar, which stands beneath a tree and is adorned with festoons and an eagle in relief. A coin of Gallienus in base silver[5] and coins of his son Saloninus in

p. 100 ff., Gruppe *Gr. Myth. Rel.* p. 833 n. 1, p. 1243 n. 2, p. 1246 n. 5, Farnell *Cults of Gk. States* iv. 254 f., 309.

I take this opportunity of figuring a well-preserved specimen, now in my collection, of the Laconian tetradrachm with obv. head of King Areus? (309—265 B.C.), rev. the cult-statue of Apollon at Amyklai (fig. 529): cp. Head *Coins of the Ancients* p. 79 pl. 43, 27, Imhoof-Blumer and P. Gardner *Num. Comm. Paus.* ii. 59 pl. N, 16, *Brit. Mus. Cat. Coins* Peloponnesus p. 121 pl. 24, 1, P. Gardner *Types of Gk. Coins* p. 178 pl. 15, 28, Overbeck *Gr. Kunstmyth.* Apollon pp. 6—8 Münztaf. 1, 14—16, K. Wernicke in Pauly—Wissowa *Real-Enc.* ii. 43, *Montagu Sale Catalogue* 1896 i. 55 no. 414 pl. 6 = 1897 ii. 30 no. 215 pl. 3, Head *Hist. num.*[2] p. 434 fig. 238.

Fig. 529.

[1] Not 'Le Génie ailé d'Apollon Vejovis' (Babelon), nor 'der Genius des Vejovis' (Overbeck), nor even 'Infant winged Genius' (Grueber), but just a commonplace Cupid.

[2] To the examples collected by L. Stephani in the *Compte-rendu St. Pét.* 1863 p. 155 n. 3, *ib.* 1869 p. 88 n. 6, cp. *ib.* 1873 p. 84 n. 1, add a second relief in the Louvre (Clarac *Mus. de Sculpt.* pl. 192 fig. 162 = Reinach *Rép. Stat.* i. 80 no. 1) and a wall-painting in the house of the Vettii at Pompeii (Herrmann *Denkm. d. Malerei* pl. 35 Text p. 46 Erotes fighting on goat-back).

[4] Gruter *Inscr. ant. tot. orb. Rom.* iii. 1075 no. 1 with pl. after Boissard *Antiqq.* iv. 138 ('in via Appia, non procul ab Hippodromo castrensi') BONAE·SPEI | AVG·VOT | PP TR, Preller—Jordan *Röm. Myth.*[3] ii. 254 n. 2, cp. Wissowa *Rel. Kult. Röm.*[2] p. 330 n. 1. I have not reproduced the plate, as Boissard's illustrations are notoriously unreliable.

[5] Cp. also a coin of Gallienus in base silver, which shows the infant seated on a goat with the legend LAETIT·TEMP (Cohen *Monn. emp. rom.*[2] v. 384 no. 421).

[6] The case is somewhat different with Hadrian's favourite Antinoos, who was represented most frequently as a Dionysos (see *e.g.* C. v. Levezow *Ueber den Antinous dargestellt in den Kunstdenkmälern des Alterthums* Berlin 1808 pls. 7, 8, 9, 10 and the list of statues, busts, and coins by K. Wernicke in Pauly—Wissowa *Real-Enc.* i. 2441).

child's head wreathed in vine-leaves and grapes (fig. 532) are referred by H. Cohen[1] to M. Annius Verus, the infant son of M. Aurelius and the younger Faustina[2]. This little fellow died in 169 A.D. after an operation at Praeneste, when only seven years of age. His death occurred during the celebration of the games of Iupiter Optimus Maximus. The emperor would not interrupt them, but had statues decreed to the boy, a golden bust of him carried in procession at the *ludi Circenses*, and his name inserted in the chant of the Salii[3]. With him, or with some other young hopeful of the imperial house, we may connect a remarkable bust of *rosso antico*, now at Berlin (fig. 533, 1—3)[4]. It is the portrait of a child represented as the young Dionysos wearing a garland of ivy and ivy-berries blended with vine-leaves and grapes. Attached to the child's occiput there is the head of a calf—an interesting reminder that, despite all the associations of Greek tragedy[5], Dionysos was still regarded from time to time as no goat but a bull[6].

Fig. 532.

[1] Cohen *Monn. emp. rom.*[2] viii. 270 no. 31 'Buste d'un enfant à droite, couronné de pampre et les épaules couvertes de raisins. (Annius Vérus?),' cp. *ib.* no. 30 'Buste d'enfant à droite voilé et couronné de roseaux. (Annius Vérus?).' I figure a specimen in my collection.

[2] On other coins of M. Annius Verus see Eckhel *Doctr. num. vet.*[2] vii. 82—87. The brothers Commodus and Verus were identified with the Kabeiroi of Syros, and their heads appear on coins inscribed ΚΑΒΙΡΩΝ·CYPIΩN (*id. ib.*, cp. *Brit. Mus. Cat. Coins* Crete etc. p. 125 f. pl. 28. 7 f., *Hunter Cat. Coins* ii. 211, Head *Hist. num.*[2] p. 492).

[1] Farnell *Cults of Gk. States* i. 101.

the victims slain for him were, as a rule, either rams[1] or more often oxen[2]. We are not here concerned to detail the sacrificial rites, but merely to ask why these beasts rather than others[3] were chosen for the sacrifice. It is of course easy to reply that rams and oxen were the costliest victims that a pastoral or cattle-breeding people could offer. No doubt that was a consideration which, at least in classical times, partly determined the choice[4]. Nevertheless our prolonged investigation into the ram-cults and bull-cults of antiquity has led us to conclude that the ultimate reason why both ram and bull were associated with sky-gods in general and with Zeus in particular lay in the fact that these animals possessed to an exceptional degree *Zeugungskraft* or fertilising force[5]. It would therefore probably be truer to say that bulls and rams were sacrificed to Zeus because, according to the belief of early days, the gift of so much virility increased his power to fertilise and bless. If so, it would appear that the

[5] *Supra* pp. 429 f., 634 f.

primitive conception of the Hellenic Zeus was closely analogous to that of the Vedic Dyaus[1].

[1] A. A. Macdonell *Vedic Mythology* Strassburg 1897 p. 22 says of Dyaus: 'The only essential feature of the personification in the RV. is in fact his paternity. In a few passages Dyaus is called a bull (1. 160[2]: 5. 36[6]) that bellows (5. 58[6]). Here we have a touch of theriomorphism inasmuch as he is conceived as a roaring animal that fertilizes the earth.' My friend Prof. E. J. Rapson has most kindly supplied me (October 12, 1907) with the following translation of, and commentary on, the passages in question:—

'Rig-Veda 1. 160. 3. "To Heaven and Earth."

Sa vāmaṁ pātraḥ pitroḥ pavitravān
punāti dhīro bhuvanāni māyayā
dhenuṁ ca pṛśniṁ vṛṣabhaṁ suretasaṁ
viśvāhā śukraṁ payo asya dukṣata.

"The swift-comer, the son of these two parents, the purifier,
the wise one, purifieth (or enlighteneth) the worlds through his power;
From the speckled cow and from the bull rich in seed
he milketh ever his gleaming fluid."

Dyaus, the Heaven, is the bull rich in seed: and Pṛthivī, the Earth, is the speckled cow. The son of Heaven and Earth is the Sun-god. The gleaming fluid is the rain.

R.V. v. 36. 5. "To Indra."

Vṛṣā tvā vṛṣaṇaṁ vardhatu Dyaur
vṛṣā vṛṣābhyāṁ vahase haribhyām.
Sa no vṛṣā vṛṣarathaḥ suśipra
vṛṣakrato vṛṣā vajrin bhare dhaḥ.

"May the bull, the Heaven, cherish thee, the bull:
As a bull thou drivest with thy two mighty (bull-like) horses.
Do thou the bull, with bulls in thy chariot, O fair-lipped one,
O thou who hast the strength of a bull, do thou, O god of the thunderbolt, as a bull
give us (booty) in the battle."

There is a constant play here on the two meanings of *vṛṣan* = (1) a mighty one, (2) a bull; and it is difficult to know which meaning to select in each case. I have translated it by "bull" in every case, except in reference to the two horses, where it must mean "mighty" or "like a bull."

R.V. v. 58. 6. "To the Maruts."

Yat prāyāviṣṭa pṛṣatībhir aśvair
vidyunmadbhir, Maruto, rathebhiḥ,
kṣodanta āpo, ripate vanāny,
Arosriyo vṛṣabhaḥ krandatu Dyauḥ.

"When ye go forth with speckled deer for your steeds,
in chariots with strong wheels, O ye Maruts,
the waters raise themselves, the floods well forth;
Then let the Heaven, the tawny bull, thunder."

The words for "bull," viz. *vṛṣan* and *vṛṣabha*, are probably derived from the root *vṛṣ* = "to water," from which the ordinary word for "rain" *varṣā* comes. A secondary meaning is "to impregnate," and this is the meaning which underlies that of *vṛṣan*, which always has the idea of "male." The word is so constantly used when the idea of masculine strength is intended, that it is not easy to know when, as applied to deities, it has or has not the further specific idea of "bull." It is applied to gods, in this more general sense, almost indiscriminately to Agni, Indra, the Maruts and to Soma for example.

I should scarcely have thought that Dyaus was ever conceived by the Vedic poets as

(h) The Sun as a Bronze Man.

i. Talos in Crete.

We pass next from the theriomorphic to the anthropomorphic conception of the sun. The transition is best seen in the case of the Cretan Talos. His name, according to Hesychios, denoted 'the Sun'[1]; and he was commonly described as a bronze man[2]. Apollodoros, however, to whom we owe the most detailed account of him, writes: 'He was a man of bronze, but others describe him as a bull[3].' Talos, therefore, 'the Sun,' being regarded sometimes as a bull, more often as a man, fittingly illustrates the aforesaid transition of ideas.

Talos belonged to the bronze generation[4], or was given by Hephaistos to Minos[5], or was made by Hephaistos and given by Zeus to Europe[6]. He had a single vein extending from his neck to his ankles: the vein was closed at its end by a bronze nail thrust through it[7]. Thrice a day this bronze man ran round the island of Crete as its guardian[8]. When the Argonauts wished to put in there, Talos observed them and flung stones at them[9]. But he was slain by the guile of Medeia, who drove him mad, some said, by her potions, while others maintained that she promised to make him immortal and then pulled out his nail so that all the ichor flowed forth from him and he died. A

a bull. All that these passages seem to indicate is that the Heaven impregnates the earth with its rain like a bull, and that it thunders like a bull roaring.

I cannot find any other passages in which Dyaus is likened to a bull. I should have thought that the simile was applied much more often to many other deities.

So far as I know, neither Dyaus nor any other Vedic divinity is ever represented as a ram.' [E. J. R.]

[1] Hesych. Ταλῶς· ὁ ἥλιος.

[2] Spenser in *The Faery Queen* naturally makes Sir Artegall's Talus an 'iron man' armed with an 'iron flail.'

[3] Apollod. 1. 9. 26 ὃς ἦν χαλκοῦς ἀνήρ, οἱ δὲ ταῦρον αὐτὸν λέγουσιν. So R. Wagner prints the passage: A. Westermann and the older editors prefer Ταῦρον as a proper name.

[4] Apollod. 1. 9. 26, Ap. Rhod. 4. 1639 f. with schol. *ad loc.*, Zenob. 5. 85.

[5] Apollod. 1. 9. 26, Simonid. *ap.* schol. Plat. *rep.* 337 A, Zenob. 5. 85.

[6] Schol. *Od.* 20. 302, Eustath. *in Od.* p. 1893, 9, Ap. Rhod. 4. 1641.

[7] Apollod. 1. 9. 26, Zenob. 5. 85. Ap. Rhod. 4. 1643 ff. makes it an artery (*σύριγξ αἱματόεσσα*) closed by a fine skin or membrane (*ὑμήν*).

[8] Apollod. 1. 9. 26, Zenob. 5. 85. Plat. *Minos* 320 C, in a rationalising passage, makes Talos go the round of the Cretan villages thrice a year with Minos' laws inscribed on tablets of bronze.

[9] Apollod. 1. 9. 26 (*τοῖς λίθοις*), Ap. Rhod. 4. 1637 (*πέτρας*), 1656 (*πετράων*), 1675 f. (*βαρείας...λάιγγας*).

third version said that he was shot in the ankle by Poias and thus came by his death[1].

Silver coins of Phaistos, struck in the fourth century B.C., exhibit Talos as a youthful winged figure striding towards the left; he hurls one stone with his right hand and holds another ready in his left: the reverse type is that of a charging bull (fig. 534)[2]. Third-century bronze coins of the same town show Talos in a similar attitude hurrying to the right (fig. 535)[3]: the reverse here has a hound on the scent, probably the golden hound of Crete[4]. The resemblance of the stone-throwing Talos on coins

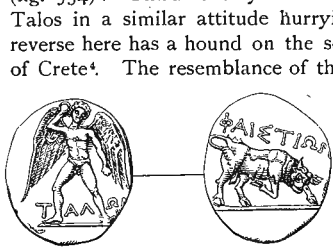

Fig. 534.

Fig. 535.

Fig. 536.

of Phaistos to the stone-throwing Minotaur on coins of Knossos (fig. 536)[5] is noticeable: the stones in either case may represent

[1] Apollod. 1. 9. 26, Zenob. 5. 85. According to Ap. Rhod. 4. 1651 ff., Medeia fixed her evil glance on Talos, who in trying to raise his heavy stones struck his ankle with a projecting fragment of rock. Thereupon his ichor ran out like so much molten lead, and he fell. Cp. Agatharchid. *de mari Erythr.* 1. 7 (*Geogr. Gr. min.* i. 115 Müller) *ap.* Phot. *bibl.* p. 443 b 24 f. *τὴν δὲ ζωὴν μόνον τῶν ἐμψύχων τοῦτον ἐν τῷ σφυρῷ κεκτῆσθαι.*

[2] J. N. Svoronos *Numismatique de la Crète ancienne* Macon 1890 i. 264 pl. 24, 24, *Brit. Mus. Cat. Coins* Crete etc. p. 64 pl. 15, 11, *Hunter Cat. Coins* ii. 194 pl. 42, 15, P. Gardner *Types of Gk. Coins* p. 163 f. pl. 9, 9, Head *Coins of the Ancients* p. 47 pl. 23, 40. The legend at the feet of Talos in the specimen figured is Τ ΑΛ Ω(Ν). The Hunterian specimen extends the left hand without a stone, and reads ΝΩ Λ ΑΤ.

[3] J. N. Svoronos *op. cit.* i. 264 f. pl. 24, 25 f., *Brit. Mus. Cat. Coins* Crete etc. p. 64 pl. 16, 6, Hunter *Cat. Coins* ii. 194. Fig. 535 is from a specimen in my collection.

[4] A golden hound was set by Rhea to guard the goat that nurtured the infant Zeus in Crete. Zeus afterwards made the goat immortal, and its image is still to be seen among the stars. The hound he caused to guard the holy place (*τὸ ἱερόν*) in Crete. Pandareos, son of Merope, stole it, brought it to Sipylos, and gave it to Tantalos, son of Zeus and Plouto, to keep. After a time Pandareos returned to Sipylos and claimed the hound; but Tantalos denied that he had received it. Zeus punished Pandareos for his theft by turning him into a stone where he stood, Tantalos for his perjury by hurling him down and placing Sipylos above his head (Ant. Lib. 36). Variants are collected and discussed by W. H. Roscher in his *Lex. Myth.* iii. 1502 ff. See also P. Perdrizet in the *Bull. Corr. Hell.* 1899 xxiii. 584 ff. and Miss J. E. Harrison in her *Proleg. Gk. Rel.*[2] p. 299 f., who illustrate the myth from a black-figured *pyxis* at Athens. Probably the golden hound was a theriomorphic epiphany akin to the golden lamb of Atreus (*supra* p. 405 ff.), the golden ram of Athamas (*supra* p. 414 ff.), the dazzling bull of Minos (*supra* p. 467 ff.).

Kratér from Ruvo in the collection of Talos.

See page 721.

[From Furtwängler-Reichhold *Griechische Vasenmalerei*, by permission of Messrs F. Bruckmann A.-G., Munich.]

suns, or stars[1], and such may have been the original significance of the stone-throwing Kyklops of the eastern[2] and western islands[3], though other interpretations are equally possible and perhaps more probable.

A magnificent *kratér* with volute-handles, found in the nekropolis of Ruvo and now in the Jatta collection, represents the death of Talos (pl. xli)[4]. This vase is of special interest to the mythologist, because it appears to depict a form of the story not otherwise preserved to us[5]. The Argonauts have reached the Cretan coast. Zetes and Kalaïs are seen still on board their vessel. But a landing-ladder is put out from her stern across the water, which is suggested by a dolphin. A young hero, shrinking back in alarm from the central scene, springs up the ladder. On shore Kastor and Polydeukes with their horses have already pursued and caught Talos[6]. Polydeukes grasps him, still attempting to run, within the circle of Medeia's magic spells. Medeia herself stands by, fixing her victim with her evil eye, while she holds a basket full of potent herbs and mutters her fatal formula. Talos, overcome despite himself, falls backwards in a swoon. The nymph Krete flees in terror at the death of her watcher. Above her, in the background, appear Poseidon and Amphitrite as patrons of Argonautic prowess.

ii. Talos in Sardinia.

Two different versions of the Talos-myth are attributed to Simonides. On the one hand, he is said to have stated that Talos before coming to Crete had dwelt in Sardinia, where he had destroyed many persons, that they grinned when they died, and that this was the origin of the expression a 'sardonic smile[7].' On the other hand, Simonides is reported to have affirmed that, when the Sardinians tried to cross the sea to Minos, Talos, being wrought of bronze by Hephaistos, sprang into a fire, clasped them to his breast, and slew them gaping[8]. Both versions agree in connecting Talos with the Sardinians.

The matter was sufficiently sensational to appeal to the imagination of the later Greeks, and further information is forthcoming.

[1] See W. Drexler in Roscher *Lex. Myth.* ii. 2751 n., and cp. *supra* pp. 493 ff., 524.

[5] See O. Jessen in Pauly—Wissowa *Real-Enc.* ii. 784.
[6] Talos, unlike the other figures in this exceedingly skilful composition, is painted white, the modelling of his body being indicated in a thin brown varnish. The artist has thus sought to mark him out from the rest as the man of bronze.
[7] Zenob. 5. 85. [8] Souid. *s.v.* Σαρδάνιος γέλως, cp. schol. Plat. *rep.* 337 A.

Demon the antiquarian *c.* 300 B.C. stated in a work *On Proverbs* that the Sardinians, being settlers from Carthage, on certain days sacrificed to Kronos not only the handsomest of their captives but also such of their own elders as were above seventy years of age, and that the victims were expected to welcome their fate and even to laugh, tears being regarded as base and cowardly[1]. Timaios the Sicilian historian, a contemporary of Demon, informs us that the Sardinians, when their parents grow old, bring them to the burial-ground, seat them on the edge of pits dug for the purpose, and push them over, every man beating his own father with a stick of cleft wood; further, that the old folk went to their death with cheerfulness and laughter—a fact which occasioned the Greek *dictum*[2]. Lastly, Kleitarchos, who is probably to be identified with Kleitarchos of Aigina, author of a famous geographical Lexicon (first century A.D. or earlier)[3], has yet another explanation of the proverb to offer. He states that the Phoenicians in general and the Carthaginians in particular worshipped Kronos. If they desired to obtain of him some great favour, they vowed to present him with one of their children. A bronze statue of the god stood with its hands held out over a bronze furnace. In the embrace of this statue the child perished miserably. The flame licked its body, shrivelled its limbs, and distorted its mouth into a ghastly semblance of a smile[4].

The foregoing accounts show that the Cretan sun-god Talos was by some authorities at least identified with the Phoenician Kronos[5], a form of the Semitic deity El[6]. The identification was perhaps facilitated by another point of resemblance. Talos was sometimes regarded as a bull[7]; and his likeness to the Minotaur[8] suggests that in process of time he had become bull-headed, a god half theriomorphic, half anthropomorphic. But the

Phoenician deity too, according to Rabbinic authors[1], had a bovine head[2]. Identification was almost inevitable. Indeed, the two gods may have been strictly analogous.

Excavations now in progress beneath the ancient church of Santa Anastasia in southern Sardinia are said to have disclosed a large subterranean temple with a spring locally known as the 'Fount of Pains,' sacred images, and mural decorations. 'These indicate the worship of an earth goddess, and the prevalence of bull worship, as there is a ponderous statue in basalt of a male divinity with a bull head[3].' Was this the Sardinian Talos?

iii. Talos and the Bronze-founder's Art.

It is tempting to explain certain traits in the myth of Talos along rationalistic lines. The single vein running from his neck to his ankles and closed by a bronze nail thrust through it[4] vividly recalls the *cire perdue* method of hollow-casting in bronze, a process which was invented at a remote period and lasted throughout the whole history of Greek art[5]. A rough model in clay or plaster,

[1] M. Mayer in Roscher *Lex. Myth.* ii. 1505 f. draws attention to the old Rabbinic descriptions of Moloch, adduced by J. Selden *De dis Syris syntagmata ii* Londini 1617 p. 78 ff. and T. Godwin *Moses and Aaron*: etc.[9] London 1667 p. 144 ff., *e.g.* Selden *op. cit.* p. 78 f. 'Doctissimi Pauli Fagij verba de Moloch, in Chaldæam paraphrasin Leuitici scripta, & ex Ebræorum etiam monimentis sumpta, adiungam. *Fuit autem* Moloch *Imago concaua habens septem conclauia. vnum aperiebant similæ offerendæ: aliud Turturibus: tertium Oui: Quartum Arieti: Quintum Vitulo: Sextum Boui: Qui verò volebat offerre filium huic aperiebatur septimum cubiculum, et facies huius idoli erat vt facies vituli. Manus planè dispositæ ad recipiendum ab astantibus. et saltabant interim quo pueri* (leg. *puer*) *in idolo succenso igne cremabatur, percutientes tympana ne pueri eiulatus audiretur.* Habuit hæc ille ex libro Ialkut cuius autor R. Simeon. Sed ex ære conflatam imaginem esse ait R. Salomon ad Ieremiæ VII.'

F. X. Kortleitner *De polytheismo universo* Oeniponte 1908 p. 221 n. 3 quotes from the Midrash Echa rabbathi on *Lam.* i. 9: 'Molochi imago non constituta erat intra urbem Hierosolymorum, quemadmodum idola alia, sed extra urbem. Imago fuit in intimo septem cavearum; facies eius fuit instar vituli et manus protensae, quemadmodum qui aliquid accepturus est palmam protendit. Incendebant eam; sacerdotes (ככמרין) infantem sumebant et manibus Molochi imponebant, ubi animam efflabat.' *Id. ib.* p. 222 n. 3, p. 225 ε, p. 227 f β compares similar descriptions from other Rabbinic sources.

[2] Cp. Cypriote statuettes with bovine heads (L. P. di Cesnola *Cyprus: its ancient cities, tombs, and temples* London 1877 p. 51 fig., Perrot—Chipiez *Hist. de l'Art* iii. 606 fig. 414 = Ohnefalsch-Richter *Kypros* pp. 243, 423 pl. 94, 22).

[3] So the correspondent of the *Daily Chronicle* for Sept. 10, 1913, writing from Milan on Sept. 9. He also mentions 'the uncovering at Ortu Commidu, alongside some ancient copper mines, of a great prehistoric foundry with all the furnaces for smelting, and moulds for casting, just as they were abandoned...in the transition period between the ages of stone and of bronze.' I am indebted for this newspaper-cutting to the kind offices of Mr F. M. Cornford and Miss Harrison.

[5] H. Blümner *Technologie und Terminologie der Gewerbe und Künste bei Griechen und Römern* Leipzig 1887 iv. 285 ff., 325 ff., *id.* in Pauly—Wissowa *Real-Enc.* vi. 607 ff.,

carefully coated with wax, was worked over by the sculptor till it satisfied him in every detail. The whole was next covered with a thin slip of finely powdered pottery. This was followed by other layers of increasing thickness and coarseness, which together formed the outer mould. The shapeless mass was then exposed to a furnace or lowered into a pit with a fire at the bottom. The wax, thus melted, ran out through triangular holes left in the exterior. Bronze rods half an inch square in section had been stuck through the wax into the core and allowed to project like pins in a pin-cushion. These now held the outer and inner moulds apart. Into the intervening space molten bronze was poured through a hole in each foot of the statue, thereby taking the place of the wax driven out by the heat. Ultimately, when the figure had cooled, the outer mould was chipped away, the ends of the bronze rods cut smooth, the core extracted through the soles of the feet, and the whole surface touched up with minute accuracy. In this technical process the hollow from head to heel, pierced with its bronze pins, was—one may suspect—the fact underlying the fiction of Talos' vein[1]. Perhaps, too, the fiery pit into which the mould was lowered explains Simonides' statement that Talos sprang into a fire[2].

iv. Talos at Athens.

The Athenian myth of Talos likewise connected him with various advances in the mechanical arts. It was he who invented the compasses[3] and the potter's wheel[4]. And we may note in

Daremberg—Saglio *Dict. Ant.* i. 1019 n. 17, Forrer *Reallex.* p. 115, H. B. Walters in the *Brit. Mus. Cat. Bronzes* p. xxxi ff.

[1] For an example of nail-driving as an artistic, if not a mythological, *motif* cp. a Graeco-Phoenician *stámnos* from Tamassos (*c. s.* ix B.C.) in the British Museum (*Brit. Mus. Cat. Vases* i. 2. 140 f. no. C 736 pl. 5), which at the time of its discovery in 1885 showed more completely than it does now a scene that has been interpreted as Perseus slaying the Gorgon (H. B. Walters in the *Brit. Mus. Cat. Vases loc. cit.* after S. Reinach in the *Rev. Arch.* 1887 i. 76 ff. with figs., ii. 89 ff. = *Chroniques d'Orient* i. 294 ff., 360 ff., cp. C. Clermont-Ganneau *Recueil d'Archéologie orientale* Paris 1888 i. 172—175 'Pégase et ΠΗΓΝΥΜΙ') or less probably as Herakles and Iolaos killing the Hydra (Ohnefalsch-Richter *Kypros* pp. 36 f., 62 ff., 445 figs. 37 f., 71, 75 pl. 137, 6).

[2] *Supra* p. 721.

[3] Diod. 4. 76, Ov. *met.* 8. 247 ff., Hyg. *fab.* 274, Serv. *in* Verg. *georg.* 1. 143, Serv. *in* Verg. *Aen.* 6. 14, Sidon. *epist.* 4. 3. 5.

[4] Diod. 4. 76. Kritias *ap.* Athen. 28 c states that Athens first discovered pottery, 'the offspring of wheel and earth and oven.' Others ascribed the invention of the wheel to Hyperbios of Corinth (Plin. *nat. hist.* 7. 198, schol. Pind. *Ol.* 13. 27) or Anacharsis the Scythian (Plin. *nat. hist.* 7. 198, Diog. Laert. 1. 105, Souid. *s.v.* 'Ανάχαρσις). The potter's wheel had reached Crete by the 'Early Minoan ii' period (see *e.g.* E. Reisinger *Kretische Vasenmalerei vom Kamares- bis zum Palast-stil* Leipzig—Berlin 1912 p. 2 f.). It is mentioned first in *Il.* 18. 600 f.

passing that a contrivance for describing a circle or a machine consisting in a rotatory disk was naturally attributed to one who, as the Sun[1], was himself at once circular and discoidal. Indeed, if we may trust an obscure passage in Servius, Talos was actually called by some *Circinus* or 'Compass[2].' Less obvious is his recorded discovery of the saw. Latin authors state that he copied the back-bone of a fish[3]. But the Greeks declared that he got the idea from the jaw of a snake[4]. Be that as it may, the Athenian Talos stood in some relation to the snake. For Daidalos, his mother's brother, jealous of a younger rival, pushed him over the edge of the Akropolis, and later, when asked whom he was burying, replied 'A snake[5].' Possibly, too, though this is the merest conjecture, his relation to the snake is responsible for the fact that he was often called *Kálos*, not *Tálos*[6]. The change,

[1] *Supra* p. 719.

[2] Interp. Serv. *in* Verg. *Aen.* 6. 14 ab illo et usum serrae de osse interiore piscis et circinum propter nomen suum ‹inventum›. nam aliquibus Circinus putatus est appellatus, vel ut quidam organum inventum tradunt. We have already compared Talos son of Daidalos' sister with Daidalion the 'hawk' (*supra* p. 342 f.). I would suggest that Talos too according to one version of his story was transformed into a hawk (*kírkos*, cp. modern Greek *κιρκινέζι* 'kestrel') and that this was the reason why certain persons attributed to him the invention of the compasses (*circinus*). As to the saw, ancient Babylonian art likewise shows the sun-god with saw in hand (I. Löw in *Or. Lit.* 1912 xv. 305 f., *Am. Journ. Arch.* 1913 xvii. 534).

[3] Ov. *met.* 8. 244 ff., Hyg. *fab.* 274, Serv. *in* Verg. *Aen.* 6. 14, Isid. *orig.* 19. 19. 9.

[4] Apollod. 3. 15. 9, Diod. 4. 76, Tzetz. *chil.* 1. 494 ff.

[5] Diod. 4. 76 *ἔφησεν ὄφιν καταχωννύειν*. The words involve a joke: *καταχωννύω* is 'I bury beneath a mound of earth,' but *καταχωνεύω* is 'I pour molten metal into a mould,' a phrase appropriate to the *cire perdue* process described above; hence Daidalos' remark would suggest, not only 'I am burying a snake,' but also 'I am hollow-casting a snake,' 'I am applying to Talos the treatment that is peculiarly his own.' Diod. *ib.* says *τὸν παῖδα ἐδολοφόνησε*, cp. Hellanik. *frag.* 82 (*Frag. hist. Gr.* i. 56 Müller) *ap.* schol. Eur. *Or.* 1648 *ἀδελφιδοῦν τὸν Τάλων ἀποκτείναντος δολόεντι θανάτῳ*. Apollod. 3. 15. 9 *ἀπὸ τῆς ἀκροπόλεως βαλὼν τὸν τῆς ἀδελφῆς* [Πέρδικος] *υἱὸν Τάλω* (so Tzetz. *chil.* 1. 492 f., Ov. *met.* 8. 250 f., Serv. *in* Verg. *georg.* 1. 143) is more precise. Hyg. *fab.* 39 *summo tecto deiecit* is not incompatible with the usual account. Schol. Galean. Ov. *Ibis* 498 (R. Ellis *P. Ovidii Nasonis Ibis* Oxford 1881 p. 86) *praecipitavit in mari* is a more substantial variant, cp. the death of Aigeus (K. Wernicke in Pauly—Wissowa *Real-Enc.* i. 954 and D. G. Roberts in the *Journ. Hell. Stud.* 1912 xxxii. 105 ff.).

The supposed representation of Daidalos and the dead Talos in a Pompeian wall-painting (Helbig *Wandgem. Camp.* p. 359 f. no. 1480, E. Gerhard in the *Arch. Zeit.* 1850 viii. 177 ff. pl. 17, 1) is explained away by C. Robert in Pauly—Wissowa *Real-Enc.* iv. 2006.

[6] Schol. Soph. *O. C.* 1320 *τὸν Ταλαοῦ δν ἔνιοι διὰ τοῦ κ Καλαὸν προσαγορεύουσι καθάπερ Ἀρίσταρχος ὁ Τεγεάτης καὶ Φιλοκλῆς ἱστοροῦσι, συγγραφέων δὲ Ἑκαταῖος ὁ Μιλήσιος* (Aristarch. *frag.* 5 Nauck², Philokl. *frag.* 3 Nauck², Hekat. *frag.* 361[a] (*Frag. hist. Gr.* iv. 627 Müller)). The form Kálos is used by Paus. 1. 21. 4, 1. 26. 4, Souid. *s.v.* Πέρδικος *ἱερόν*, Phot. *lex. s.v.* Πέρδικος *ἱερόν* (MS. Καλός), Apostol. 14. 17 (MSS. Κάλλως), perhaps also by Hellanik. *frag.* 82 (*Frag. hist. Gr.* iii. 375 Müller) *ap.* schol. Eur. *Or.* 1648, where the reading of codd. A. M. *μετὰ δὲ τὴν Δαιδάλου δίκην καλοσοφίας* (*T*: *κάλλος σοφίας*) *περιαγομένου ἀδελφιδοῦν ἀποκτείναντος* was corrected by R. Holland

which is contrary to the known laws of phonetics, must be due to folk-etymology of some sort. Now in northern India a snake is, for superstitious reasons, habitually called a 'string' or a 'rope': for example, if a snake bites you, you should not mention its name, but remark 'A rope has touched me'![1] If, therefore, Talos was in any sense a snake, he might be euphemistically called *kálos*, a 'rope.'

Latin authors narrate that, when Daidalos flung his nephew to the ground, the youth was in mid air changed by Athena into a partridge[2]. In fact, they commonly call him *Perdix*, or 'Partridge,' not Talos[3]. The name was applied to him by the Greeks as early as the fifth century B.C.; for it occurs in a play of Sophokles[4]. According to a version preserved by the Greek lexicographers, Perdix was the mother of Talos or Kalos, who, when he was killed, hanged herself and was honoured at Athens with a sanctuary beside the Akropolis[5]. Since the grave of Talos[6] or Kalos was on the way from the theatre to the Akropolis[7], it is likely that the sanctuary and the grave were close together[8]. The myth of Talos transformed by Athena into a partridge was probably popular in Periclean Athens. For a curious historical echo of it has been detected by L. Mercklin[9].

Die Sage von Daidalos und Ikaros (Abh. zu dem Ber. der Thomas-schule) Leipzig 1902 p. 21 into Κάλω *σοφίας πέρι ἀγωνιζόμενον* and by O. Höfer in Roscher *Lex. Myth.* iii. 1947 into Κάλω *σοφίᾳ περιγενόμενον*. Cp. Lact. Plac. *narr. fab.* 8. 3 Perdix Calai filius Atheniensis.

[9] L. Mercklin 'Die Talos-Sage und das sardonische Lachen' in the *Mémoires de l'académie des sciences de St. Pétersbourg, Mémoires des savants étrangers* 1854 vii. 74 f.

During the erection of the Propylaia on the Akropolis the best of the workmen missed his footing and fell. When Perikles was discouraged by this accident, Athena appeared to him in a dream and prescribed a remedy, by means of which Perikles speedily cured the man. He commemorated the event by erecting on the Akropolis a bronze statue of *Hygieia* Athena, or 'Health' Athena, by the side of an already existing altar. So much we learn from Plutarch[1]. Pliny completes the story, though with material differences throughout. A favourite slave of Perikles—he says—was building a temple on the Akropolis, when he fell from the top of the pediment. Athena showed herself to Perikles in a dream and prescribed the herb *perdicium*, the 'partridge-plant,' which in honour of herself was thenceforward known as *parthenium*, the 'Virgin's-plant.' Pliny adds that the portrait of this same slave was cast in bronze and served for the famous statue of the *splanchnóptes* or 'entrail-roaster[2].' Whatever the details of the occurrence may have been, it seems clear that the prescription of the 'partridge-plant' was due to a reminiscence of Talos' transformation into a partridge[3].

But why this connection between Talos and a partridge? On bird-metamorphoses in general I have elsewhere said my say[4]. Here it must suffice to observe that the partridge in particular was notorious for its generative propensities[5]. Hence it was regarded as sacred to Aphrodite[6]. And the same reason will

[1] Plout. *v. Per.* 13. This statue can hardly be identified with that by the Athenian sculptor Pyrrhos, the base of which with its inscription (*Corp. inscr. Att.* i no. 335 = Dittenberger *Syll. inscr. Gr.*[2] no. 585) is still to be seen on the Akropolis immediately adjoining the S.E. angle-column of the Propylaia: see Frazer *Pausanias* ii. 277 ff., W. Judeich *op. cit.* p. 220 ff.

[2] Plin. *nat. hist.* 22. 43 f. The statue of the *splanchnóptes* was by Styppax of Kypros (Plin. *nat. hist.* 34. 81): on existing copies see M. Mayer in the *Jahrb. d. kais. deutsch. arch. Inst.* 1893 viii. 218 ff. figs. 1—3 and pl. 4, and A. von Salis in the *Ath. Mitth.* 1906 xxxi. 352 ff. pl. 22.

[3] Ov. *met.* 8. 236 ff. states that as a partridge he watched from a branching oak-tree Daidalos burying his son Ikaros. In 237 garrula ramosa prospexit ab ilice perdix (so the MSS.) editors have taken offence at the notion of a partridge up a tree. An anonymous grammarian of the seventh century A.D. or later quotes the line thus: garrula limoso prospicit elice perdix (H. Keil *Grammatici Latini* Lipsiae 1868 v. 587). Hence R. Merkel prints *limoso...elice*, A. E. Housman cj. *lamoso...elice*. But see P. Burmann *ad loc.*

[4] *Folk-Lore* 1904 xv. 385 ff.

account for its association with Talos, who, as being the Sun[1], was essentially a fertilising power.

A remarkable variant of the Perdix story is preserved by the Latin mythographers[2]. Perdix, the inventor of the saw, fell in love with his own mother Polykaste and pined away because of her. Fenestella, who wrote his *Annals* in the reign of Tiberius, commented on this myth[3]. According to him, Perdix was a hunter, who tired of the chase, especially as he observed that his young comrades Aktaion, Adonis, and Hippolytos all came to a bad end. He therefore abandoned his life as a hunter and devoted himself to agriculture. Hence he was said to have loved his mother, *i.e.* Mother Earth, and to have pined away, *i.e.* to have worn himself thin over her. Her name *Polykaste* might be spelled *Polykarpe* and rendered the 'Very Fruitful One.' As for the saw, that denoted the harsh tongue with which he abused his former occupation. Fenestella's rationalism is of course absurd. Nevertheless his account appears to contain elements that are far older than the rise of rationalism. Perdix, who loved Polykaste, variously identified with Mother Earth[4] or the Mother of the gods[5] or Diana[6]—Perdix, who is expressly compared with Aktaion, Adonis, and Hippolytos, an ill-fated trio—Perdix, who dreaded the dangers of a woodland life, is a figure ominously like the human favourite or partner of more than one ancient goddess. His love for Polykaste was, as Claudian says, inspired by herself[7]. And there is perhaps a special significance in the fact that her lover bore the name of a bird, of that bird which was 'the plaything of the daughter of Zeus and Leto[8].'

v. Talos identified with Zeus.

Talos the 'Sun'[9] was in Crete identified with Zeus. A Hesychian gloss explains the epithet *Talaiós* to mean 'Zeus

[1] *Supra* p. 719.

[9] *Supra* p. 719.

in Crete[1].' And that this gloss is trustworthy appears from more than one Cretan inscription. The inhabitants of Dreros in eastern Crete swore by a series of deities including Zeus *Tallaîos* and Helios to oppose the inhabitants of Lyttos[2]. At Olous too, a town close to Dreros, there was a sanctuary of Zeus *Tallaîos*, where a decree inviting Knossos to arbitrate between Lato and Olous was set up[3], as was also a decree in honour of a certain physician from the island of Kasos, who had helped the Olontians in time of plague[4]. Coins of Olous, struck in the latter part of

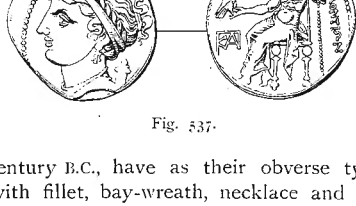

Fig. 537.

the fourth century B.C., have as their obverse type a head of Britomartis with fillet, bay-wreath, necklace and quiver, and as their reverse Zeus enthroned with an eagle on his right hand, a sceptre in his left (fig. 537)[5]. Perhaps the same deity was worshipped on Mount Ide; for a versified inscription, found near Retimo at the foot of the mountain, records a dedication to

[1] Hesych. Ταλαιός· ὁ Ζεὺς ἐν Κρήτῃ.

Hermes 'established on the Tallaian heights[1],' and we know that the mountain as a whole was famous for its cult of Zeus[2].

As in Crete, so in Lakonia, Talos the sun-god came to be identified with Zeus. Mount *Taletón*, the culminating peak of Mount Taygeton[3], was sacred to the Sun, and amongst the sacrifices there offered to him were horses[4]. It would appear, therefore, that the Laconians too had a sun-god akin to Talos. But Zeus, whose worship spread by degrees over most of the mountain-tops of Greece[5], naturally usurped the position of this ancient deity. A Spartan inscription links together Zeus *Taletítas* with Auxesia and Damoia[6]. These were goddesses of fertility[7], and Zeus *Taletítas* was presumably coupled with them as being himself a fertilising force[8].

§ 7. *Zeus in relation to the Moon.*

(a) Direct identifications of Zeus with the Moon.

We have next to enquire whether Zeus as god of the bright sky stood in any special relation to the second of the celestial luminaries. Direct identification, indeed, of Zeus with the moon is hardly to be looked for on Greek soil; for the Greeks, at least in historical times[9], consistently regarded the moon as feminine. It is only in quasi-Greek districts that Zeus appears as a

[1] *Corp. inscr. Gr.* ii no. 2569 = Cougny *Anth. Pal. Append.* i. 237 οὔρεσι Ταλλαίοισιν (Ταλλείοισιν Gruter) ἱδρυμένε κ.τ.λ.

[7] F. Dümmler in Pauly—Wissowa *Real-Enc.* ii. 2616 ff.

[8] *Supra* p. 291. H. Usener *Götternamen* Bonn 1896 p. 130 f. regarded Zeus Ταλλαῖος, Ταλειτίτας, as gods corresponding with the goddesses Θαλλώ, Θαλία, and ingeniously compared the Zeus Θαλῆς of Aquileia (*Inscr. Gr. Sic. It.* no. 2337 an altar found at Aquileia in 1830 Διὶ Θαλῆ | Τι Ἰούλιος | Μαμερτῖνος | ἀνέθηκεν). For the interchange of T and Θ he referred to H. L. Ahrens *De dialecto Dorica* Gottingae 1843 p. 83 (Hesych. τίριος· θέρους. Κρῆτες) and quoted Πύτιος, Ποίτιος, for Πύθιος (E. Boisacq *Les dialectes doriens* Paris 1891 p. 92, who adds αὔϊτιν for αὔθις in Collitz—Bechtel *Gr. Dial. Inschr.* iii. 2. 261 ff. no. 4991 iv 3 f.).

[9] H. Usener *Götternamen* Bonn 1896 p. 36 conjectures that the Greeks originally regarded the moon as masculine, not feminine, as Μήν, not Μήνη, and that the early conception survived in the Phrygian moon-god Μήν (on whom see W. Drexler's exhaustive article in Roscher *Lex. Myth.* ii. 2687—2770). This, in view of the fact that the moon is masculine in the Celtic, Germanic, Slavonic, Old Indian, and Zend languages, appears to me not improbable.

moon-god[1]. Thus silver tetradrachms of Antiochos viii Grypos, king of Syria, struck between 121 and 96 B.C., have as their reverse

Fig. 538.

Fig. 539.

type Zeus standing erect within a laurel-wreath: he holds a long sceptre in his left hand, an eight-rayed star, possibly meant for the planet Iupiter, in his right; and on or over his head is the crescent moon (figs. 538, 539)[2].

Fig. 540.

[1] E. Siecke *Drachenkämpfe* Leipzig 1907 pp. 28—42 attempts to show that Zeus was originally a moon-god: but his arguments (the birth of Zeus on various mountains; his grave in Crete; his epithets Πανόπτης, Ἀστέριος, Χρυσάωρ, Ἐπόψιος, Λύκαιος; his connexion with the double-axe, 'horns of consecration,' eagle, goat, ram; his fight with the Titans; his temporary defeat by Typhoeus, etc.) are far from convincing.

[2] *Brit. Mus. Cat. Coins* Seleucid Kings of Syria p. 88 f. pl. 24, 1, *Hunter Cat.*

When Zeus appears in conjunction with the god Men, as in a relief from Maionia (fig. 540)[1], he is to be regarded as a solar rather than a lunar deity[2].

(b) Zeus paired with Selene (*Pandîa* ?).

Again, Zeus was paired with Selene, the Greek moon-goddess, as the father of Nemea[3], while Dionysos, according to some authorities, was an offspring of the same union[4]. As early as the seventh century B.C. Alkman described certain flowers or plants,

> Which the Dew, daughter of Zeus
> And of Selana nurtureth[5].

A late Homeric hymn to Selene tells how—

> With her once Kronos' son in love lay locked,
> And she conceiving bare the maid Pandeie
> Of form conspicuous mid the immortal gods[6].

Hyginus too records the same genealogy[7]; and Photios states that the Attic festival Pandia derived its name either from Pandia the daughter of Selene or from Pandion the eponym of the tribe Pandionis, adding that it was held for Zeus[8]. It seems probable that, as W. H. Roscher conjectured[9], Pandia was originally an epithet of Selene rather than her daughter[10]; but that the festival Pandia was *ab initio* connected with this Selene *Pandîa* is far from clear.

[10] Ulpian *in* Dem. *in Mid.* 8 Πάνδια δὲ οἱ μὲν Διὸς ἑορτὴν ἐνόμισαν· οἱ δὲ Πανδίαν τὴν Σελήνην νομίζουσιν κ.τ.λ., schol. Dem. *in Mid.* 8 Πάνδια καὶ Πάντια, ἡ Σελήνη, κ.τ.λ. Maximus περὶ καταρχῶν 22, 146, 208, 281 uses the expression πανδία Σελήνη, *ib.* 403 πανδία Σεληναίη, and *ib.* 123, 294, 327, 393 even πανδία alone of the moon. Orph. *frag.* 11, 8 Abel has πανδία Σεληναίη.

The festival itself was held on or about Elaphebolion 14, and appears to have formed the concluding act of the City Dionysia[1]. Its name is an extension of *Dîa*[2] comparable, as Pollux saw, with *Panathénaia*, *Paniónia*, *Panaitólia*, *Pamboiótia*[3]. Mommsen[4] and Gruppe[5] suppose with much probability that the Pandia was celebrated at the time of the full moon. Now this was the time when, according to Greek belief, dew fell thickest; and dew, as we shall prove further on, was one means by which the sky-father impregnated the earth-mother[6]. Hence I venture to infer that the Pandia stood for the union of Zeus with Semele, whose name gave rise to frequent confusion with Selene[7]. On this showing the City Dionysia began with dithyrambs, which commemorated the union of Zeus with Semele[8], and ended with the Pandia, which brought that union to effect. Ten lunar months later, at the Lenaia, Dionysos son of Zeus by Semele was born[9].

(c) Zeus paired with Io, Pasiphae, Europe.

When Zeus came to be paired with Selene, we may fairly assume that it was as a sun-god with a moon-goddess[10]. The same conception has been thought to underlie several of the love-tales told about him and already in part discussed by us. Scholars ancient and modern have regarded Io as the moon[11]. And, if so, her lover might well be the sun. Pasiphae and her bull almost certainly represented moon and sun in some sense[12]. Europe, borne off from Phoinike to Crete by Zeus, apparently by Zeus *Astérios*[13], is another case in point. For Zeus *Astérios* seems

[1] Dem. *in Mid.* 8 f., Harpokr. and Souid. *s.v.* Πάνδεια. See further Mommsen *Feste d. Stadt Athen* pp. 432 f., 441, 445, 448, G. E. Marindin in Smith—Wayte—Marindin *Dict. Ant.* ii. 333, E. Cahen in Daremberg—Saglio *Dict. Ant.* iv. 313.

[2] E. Cahen *loc. cit.* Another extension of Δῖα is to be seen in Διάσια: the simple form occurs as the name of a festival in Teos (*supra* p. 423 n. 2).

[3] Poll. 6. 163. We need not suppose with E. Pfuhl *De Atheniensium pompis sacris* Berolini 1900 p. 30 n. 188 (after U. von Wilamowitz-Moellendorff *Aus Kydathen* Berlin 1880 p. 133) that the *Pándia* implies an early unification of several Zeus-cults. The prefix may be due to false analogy, *Pándia* signifying no more than a glorified *Dîa*.

[11] *Supra* p. 454 ff. [12] *Supra* pp. 521 ff., 543 ff. [13] *Supra* p. 545 ff.

to have been—as C. Robert[1], M. Mayer[2], and W. H. Roscher[3] surmised—not merely a star-god but also a sun-god[4].

I must, however, insist even at the risk of some repetition that not one of these myths affords any valid proof that Zeus was *ab origine* a sun-god, consort of a moon-goddess. We cannot assert that Io was from the outset lunar[5]. Pasiphae may have been[6]: but it is probable that her bull, though solar, was not originally Zeus[7]. Finally, Europe as the moon[8] and Zeus *Astérios* as the sun[9] were Phoenician rather than Hellenic divinities.

(d) Zeus paired with Antiope.

In the Homeric *Nekyia*[10] Odysseus interviews the shades of fourteen famous heroines, the list being probably the work of an interpolator who belonged to the Hesiodic school[11]. We are concerned with but one of his characters—

> Antiope,
> Asopos' daughter, who in truth did boast
> That she had lain even in the arms of Zeus.
> Two sons she bare him, Zethos and Amphion,
> Who founded first Thebes of the seven gates
> And walled the same, since not without a wall
> Could they, though stout of heart, hold wide-wayed Thebes[12].

In Euripides' *Antiope* Amphion says to his mother:

> Nay, I cannot think
> That Zeus in secret copying the shape
> Of an evil-doer so drew nigh thy couch
> As might a man[13].

But Hermes as *deus ex machina* declares:

> Thou who didst tell her that it was a man,
> Not Zeus, who wooed and won her—howsoe'er
> She might deny it—what couldst thou have said
> More hateful to the heart of Zeus himself,
> Dishonouring thus the very bride of Zeus?[1]

The story was localised in Boiotia[2] and took on a Dionysiac colouring, Antiope being represented as a Maenad[3] and Zeus as a Satyr[4]. It is not, however, till Roman times that Zeus is

Fig. 541.

K. Wernicke in Pauly—Wissowa *Real-Enc.* i. 2497 holds that of the various monuments, which have been supposed to represent Zeus as a Satyr with Antiope, two only have been rightly so interpreted, *viz.* an Etruscan mirror of late style in the British Museum (*Brit. Mus. Cat. Bronzes* p. 116 no. 697 = Gerhard *Etr. Spiegel* iii. 83 f. pl. 81, 2) and a scene from the great mosaic on the Piazza della Vittoria at Palermo

actually said to have played the Satyr. The language of Euripides suggests rather that he courted Antiope in the shape of an ordinary man. A variant tradition, which emphasises the analogy between Europe and Antiope, makes the latter, like the former, wooed by Zeus in the form of a bull[1]. The bull-connexion reappears in a curious local custom recorded by Pausanias[2]. When the sun was in the sign of Taurus, the Thebans used to mount guard over the tomb of Zethos and Amphion; for if the men of Tithorea in Phokis could at that time steal some of the earth from the said tomb and place it on the tomb of Antiope, then the district of Tithorea would be fertile, that of Thebes barren. The belief was based on the following passage in the oracles of Bakis:

> But whensoe'er to Zethos and Amphion
> One of Tithorea's men upon the ground
> Shall pour a soothing gift of drink and prayer,
> What time the Bull is warmed by the great sun's might,
> Then verily beware of no small bane
> That comes upon the city; for the fruits
> Dwindle within it, when men take of the earth
> And to the tomb of Phokos bear the same.

The tomb of Phokos comes in as something of a surprise. We are expecting the tomb of Antiope. So Pausanias hastens to explain:

'The wife of Lykos (Dirke) honoured Dionysos above all the gods. Therefore, when she suffered what tradition says she suffered (being bound to a bull by Zethos and Amphion and thus dragged to death), Dionysos was wroth with Antiope. Are not the gods jealous of excessive vengeance? Antiope, men say, went mad and bereft of her wits wandered through Hellas till Phokos, son of Ornytion, son of Sisyphos, fell in with her, healed and married her. Hence Antiope and Phokos share the same grave[3].'

(J. Overbeck in the *Ber. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1873 pp. 98, 105 pl. 2). But the Etruscan mirror is, both by H. B. Walters and by E. Gerhard (*locc. citt.*), interpreted of Zeus with Semele: it represents Zeus with a crown of lilies (*supra* p. 622 f.) on his head and a thunderbolt in his left hand embracing a winged female figure in the presence of a tailed Satyr with two flutes. The mosaic, which may be dated *c.* 100 A.D., shows (fig. 541) Antiope as a Bacchant with *thýrsos* and timbrel advancing towards the left, while Zeus as an ithyphallic Satyr with *lagobólon* and fawn-skin (?) follows her from the right. Finally it may be noted that a painting by Correggio in the Louvre (no. 1118) gives Zeus as a young Satyr discovering Antiope asleep with Eros beside her (H. Schulze *Das weibliche Schönheitsideal in der Malerei* Jena 1912 p. 243 fig. 108, Reinach *Rép. Peintures* iii. 754).

[1] Lact. Plac. *in* Stat. *Theb.* 7. 189 (Antiope) a Lyco expulsa per Dircen a Iove in taurum verso compressa est, unde Zethus et Amphion feruntur progeniti.

[2] Paus. 9. 17. 4 ff., cp. Steph. Byz. *s.v.* Τιθοραία, who wrongly places the grave of Zethos and Amphion at Tithorea: on its real position see Frazer *Pausanias* v. 57.

[3] Paus. 9. 17. 6. At a place in Daulis called Tronis there was a shrine of the hero

Note that the constellation Taurus is here connected with Antiope as it was connected with Europe[1]. Moreover, the analogy subsisting between Europe and Antiope is strengthened rather than weakened by the marriage of the heroine with the local chief: Phokos, the eponym of Phokis, is to Antiope what Asterion, the Cretan king, was to Europe[2].

At Sikyon the story of Antiope was told in a different way[3]. Antiope, daughter of Nykteus the regent of Thebes, or, as rumour had it, daughter of the river Asopos, was famous for her beauty. Epopeus, son of Aloeus and grandson of Helios[4], who had come from Thessaly and succeeded Korax as king of Aigialeia (later called Sikyon), was enamoured of Antiope and carried her off. Thereupon the Thebans sallied out to fight him. In the fight both Nykteus and Epopeus were wounded, but Epopeus won. Nykteus was carried back to Thebes, and on his death-bed entrusted the regency to his brother Lykos. Epopeus also died of his hurt, and was succeeded by Lamedon, who surrendered Antiope. As she went to Thebes by way of Eleutherai, she gave birth by the road-side—an incident commemorated by the old epic poet Asios:

> Antiope the daughter of Asopos,
> Deep-eddying stream, bare Zethos and Amphion
> The god-like, having met in wedlock's bond
> Zeus and Epopeus shepherd of the folk[5].

The statement that Epopeus, king of Sikyon, and Zeus had the same wife is very noteworthy and, when compared with similar cases, points to the belief that the king was an embodiment of Zeus[6]. If so, his name was appropriate. *Epopeús*, 'He who sees all,' is but another form[7] of the cult-titles *Epóptes*[8], *Epópsios*[9], *Epopetés*[10] borne by Zeus.

Founder (*ἡρῷον ἥρω Ἀρχηγέτου*), who was variously identified with Xanthippos, a famous warrior, and with Phokos, son of Ornytion, son of Sisyphos. The Phokians daily honoured him: they brought victims, poured the blood through a hole into the grave, and consumed the flesh on the spot (Paus. 10. 4. 10).

[10] Hesych. *Ἐπωπετής· Ζεὺς παρὰ Ἀθηναίοις.*

Antiope's tomb at Tithorea was honoured when the sun was in the sign of Taurus[1]. Her partner at Sikyon was Epopeus, grandson of Helios[2]. Late authorities made her a priestess of Helios[3]. Antiope, therefore, stood in some relation to the sun. At Corinth that relation was much more clearly recognised. For Eumelos in his *Korinthiaka* (*c.* 740 B.C.) represented Antiope, not as wife of Helios' grandson, but as wife of Helios himself and by him mother of Aloeus and Aietes[4]. Diophanes too, better known as Diophantos, in his *Pontic History* (*s.* iii B.C.)[5] made Antiope the mother of Aietes[6], and therefore presumably the wife of Helios. Now if Antiope as early as the eighth century B.C. was the wife of the Sun, it is reasonable to conjecture that she was a moon-goddess. *Antiópe*, as O. Gruppe observes[7], is 'a highly suitable appellation for the full moon, which at its rising exactly faces the sun.' For *Antiópe* means 'She who looks over against, or faces' another; and Nonnos, for example, speaks of—

> Phaethon balancing the full-faced (*antôpis*) Moon[8].

W. H. Roscher[9], who regards Antiope as a 'moon-heroine' or 'hypostasis of the moon-goddess,' draws attention to her rape by Epopeus[10], to her vaunted beauty[11], to the names of her father *Nykteús*, the 'Nocturnal,' and his brother *Lýkos*, the 'Light[12],' to

[12] *Supra* p. 65. S. Eitrem 'Die göttlichen Zwillinge bei den Griechen' in the *Skrifter udgivne af Videnskabsselskabet i Christiania* 1902 ii Historisk-filosofisk Klasse Christiania 1903 no. 2 argues that in the original form of the myth the twins Amphion and Zethos carried off Antiope and her sister Dirke from a second pair of twins, Lykos (Lykourgos, Epopeus) and Nykteus. The myth would thus be parallel to that of the rape

her connexion with Orion[1], and to her sons Amphion and Zethos, the Theban Dioskouroi, whom he believes to be the morning-star and the evening-star respectively[2]. This last point is of very doubtful validity[3]. Nevertheless the analogy of Kastor and Polydeukes[4] predisposes us to think that Amphion and Zethos may have stood in some relation to stars. And, if so, we obtain another illustration of the old-world idea that the stars are the offspring of a union between the sun and the moon[5].

(e) Zeus and his Lunar Consorts.

On a review of the foregoing evidence it appears that Zeus, who consorted with Selene at Nemea, was elsewhere paired with a variety of heroines—Antiope, Europe, Io—who sooner or later acquired lunar characteristics. That the moon should be called by half a dozen different names in Greece, is by no means surprising—witness its numerous appellations among the peasants of modern France[6] and Germany[7]. Observe, too, that the Greek names for the moon—Pasiphae, Pandia (?), and the like—were of local, not universal, significance. Athens spoke of Pandia; Argos and Euboia, of Io; Knossos and Thalamai, of Pasiphae. Nor was there, except perhaps with Antiope and Europe in Phokis and Boiotia, any overlapping of lunar names.

What has been said will suffice to establish a further and a more important contention. The combination of a solar Zeus with a lunar consort is restricted to certain well-defined areas. It occurs in Crete and in the eastern half of central Greece, but hardly anywhere in the rest of the Greek area. This may be taken to show that Zeus was not essentially the husband of a lunar bride. His association with her savours rather of non-Hellenic influence.

One other feature of these myths deserves to be mentioned. There is in them a decided tendency towards representing Zeus as a bull and his partner as a cow. The bull Zeus mates with the cow Io[8]. Poseidon or Zeus sent, or, as later writers put it,

of the Leukippides by the sons of Aphareus and the Dioskouroi (Gruppe *Myth. Lit.* 1908 p. 394 f.).

[8] *Supra* p. 438 ff.

Zeus *was* the bull that had connexion with Pasiphae in her cow[1]. Zeus sent, or, according to the usual version, Zeus *was* the bull that bore Europe away to Crete[2]; and she in her turn appears at Thebes as a cow marked on either flank with a white full moon[3]. Lastly, Antiope is said by the scholiast on Statius to have been driven out by Lykos owing to the designs of Dirke, and then to have been won by Zeus, who had transformed himself into a bull for the occasion[4]: there was thus a certain poetic justice about the vengeance that Antiope's sons wreaked upon Dirke, when they bound her to a bull[5]. It can hardly be doubted that these bull-and-cow myths hang together with the conception of the sun as a bull and the horned moon as a cow.

§ 8. *Zeus in relation to the Stars.*

Zeus as god of the bright sky was brought into various relations with the stars also, though these minor manifestations of his brightness did not often find definite expression in cult, literature, or art.

(a) Zeus *Astérios*, Zeus *Seirén*, Zeus *Oromásdes*.

Late authors attest the Gortynian cult of Zeus *Astérios*[6], whose title may have meant originally 'god of all the Celestial Lights'[7], but in the Hellenistic age would doubtless be understood as 'god of the Stars' only[8], perhaps with special reference to the constellation Helike[9].

Other indications connect Zeus with Seirios. Once, when the dog-star was scorching the island of Keos, Aristaios is said to have made a great altar for Zeus *Ikmaîos* and to have sacrificed on the mountains to Seirios and to Zeus[10]. The combination perhaps gave rise to a separate conception. Antimachos of Kolophon (*c.* 400 B.C.) 'called Zeus *Seirén* on account of the star[11].'

[2] *Supra* pp. 524 ff., 544.

[3] If I am right in my surmise *supra* p. 539 ff.

[4] *Supra* p. 736 n. 1.

[5] *Supra* p. 736. The tauriform Zeus perhaps acted as his own executioner.

[6] *Supra* p. 545 ff. K. Wernicke in Pauly—Wissowa *Real-Enc.* ii. 1786 argues from the existence of the hypostases Asterion and Asterios that the cult of Zeus *Astérios* was early. But see *supra* p. 547.

[11] Antim. *frag.* 94 Kinkel *ap. et. mag.* p. 710, 30 f. ὁ δὲ Ἀντίμαχος σείρινα (Σειρῆνα

Small copper coins of Kypros dating from the Ptolemaic period have as their obverse type a laureate head of Zeus, as their reverse Zeus standing with corn-ears in his right hand, a sceptre in his left, and a large star above his head (fig. 542)[1]. In view of other Cypriote coppers, which connect the star with Aphrodite and her dove[2], we may venture to identify it with the planet Venus rather than with the planet Iupiter[3].

Fig. 542.

Finally, stars played an important part in the cult of Zeus *Oromásdes*, the Hellenised Auramazda[4], who was represented, like Men[5]

vir doctus in *Classical Journal* vii. 234, Σείριον cj. Schellenberg) *τὸν Δία ἔφη διὰ τὸ ἄστρον*, cp. Eustath. *in Od.* p. 1709, 55 f. *ἐν δὲ ῥητορικῷ λεξικῷ εὕρηται καὶ ταῦτα· Σειρῆνες, τὰ ἄστρα.* See also U. von Wilamowitz-Möllendorff *Timotheos die Perser* Leipzig 1903 p. 44 and D. Mülder in *Philologus* 1906 lxv. 217 f. cited by O. Höfer in Roscher *Lex. Myth.* iv. 601. *Supra* p. 299 n. 2.

[2] *Brit. Mus. Cat. Coins* Cyprus p. lxxviii pl. 22, 8 and pl. 24, 16.

[3] In the case of tetradrachms struck by Antiochos viii Grypos (*supra* p. 731 figs. 538, 539) I interpreted the star held by the god as the planet Iupiter. But the moon is so constantly associated with the evening-star in oriental art that it is at least equally possible to regard the star in question as the planet Venus.

[4] *Supra* p. 10 n. 1. As to the name Auramazda my friend the Rev. Prof. J. H. Moulton in his *Early Religious Poetry of Persia* Cambridge 1911 p. 73 n. writes: 'Hommel's discovery of the name *Assara Mazas* in an Assyrian record of the middle of the second millenium B.C. takes the divine name back to the Aryan period, or to Iranian antiquity prior to the change of *s* to *h*....The Boghazkeui *Indra* and *Nâsatia* might be Indo-Aryan, but *Mazas* cannot. It seems probable therefore that Mazdâh was a cult epithet of a great *Ahura*—some would say the Vedic Varuṇa—long before Zarathushtra.' *Id. ib.* p. 56:...'Having thus discarded conceptions of Deity which failed to satisfy his spiritual sense, Zarathushtra proclaimed his own conceptions in their stead. One inherited name for God was good enough for him. *Ahura* in the Gâthâs already means "Lord," its etymological meaning "spiritual" having apparently died out before the division of the Aryans. Who or what was "the Lord"? His relation to Nature is wholly in accord with the Bible itself. "Who covereth Himself with light as with a garment" is almost a quotation from the Gâthâs. But his own nature is something higher yet. He is "the Wise" (*Mazdâh*), which seems specially to denote the "knowledge of good and evil," the unerring instinct that can distinguish between Truth and Falsehood, which for the Prophet were the most vital aspects of good and evil.' *Id. ib.* p. 57 f.: 'The elements of the combination Ahura Mazdâh in the Gâthâs are declined as separate words, arranged indifferently, and either word may be used alone. "The Wise Lord" will probably represent it to us better than "Ahura Mazdâh." It soon became fixed as a proper name. By the time of the great Darius, the first Zarathushtrian King of Persia (it would seem), the name has become a single word, Auramazda, with flexion only at the end.' See further J. H. Moulton *Early Zoroastrianism* London 1913 pp. 30 ff., 61, 90 ff., 106 ff., 422 ff., *alib.*

It is reasonable to suppose that the Hesychian gloss *Μαζεύς· ὁ Ζεὺς παρὰ Φρυξί* preserves in a Grecised form the cult-title *Mazdâh*.

or Attis[1] or Mithras (?)[2], wearing a stellate tiara. We are unusually well informed about this deity, thanks to the systematic exploration of the Nemroud Dagh, an outlying spur of Mount Tauros in the region of the upper Euphrates. Here in 1881 the engineer K. Sester discovered a remarkable tumulus, which in 1882 and 1883 was investigated by two expeditionary parties, that of the Germans (O. Puchstein, K. Humann, F. von Luschan)[3] and that of the Turks (Hamdy Bey, Osgan Effendi)[4]. Their results may be briefly resumed.

Antiochos i of Kommagene (69—38 B.C. or later), who in his inscriptions announces himself as 'The great King Antiochos, the Just God Made Manifest, Friend of the Romans and Friend of the Greeks[5],' resolved to be buried on the highest mountain-peak of his domain. On the summit of the Nemroud Dagh, at an altitude

Wace Yorke in the *Journ. Hell. Stud.* 1898 xviii. 312 f. no. 14, 1 ff. Samosata (=Dittenberger *op. cit.* no. 404, 1 ff.): Βασιλεὺς μέγας Ἀντίοχος Θεὸς Δίκαιος Ἐπιφανὴς Φιλορωμαῖος καὶ Φιλέλλην, cp. Lebas—Waddington *Asie Mineure* iii no. 136 *d*, 1 ff. Ephesos (=Dittenberger *op. cit.* no. 405, 1 ff.) Βασιλέα Ἀντίοχον Θεὸν | Δίκαιον Ἐπιφανῆ Φιλορωμαῖον | καὶ Φιλέλληνα, and the slight variant in Humann—Puchstein *op. cit.* p. 311 1 ff. (=Dittenberger *op. cit.* no. 400, 1 ff.) [Βασιλ]εὺς μέ[γας] | [Ἀντίοχ]ος Θεὸς Δ[ίκαιος] | [Ἐπιφα]νὴς Φι[λέλλην] | [καὶ Φιλορωμαῖος].

Since a dedication Θεῷ Δικαίῳ Μίθρᾳ has come to light at *Kilissé Hissar*, *i.e.* Tyana in Kappadokia (J. H. Mordtmann in the *Ath. Mitth.* 1885 x. 12 citing Rizo Καππαδοκικά 113), O. Puchstein in Humann—Puchstein *op. cit.* p. 341 f. suggests that the divine titles of Antiochos were a popular designation of Mithras. But F. Cumont in Pauly—Wissowa, *Real-Enc.* v. 564 shows that the cult-epithets Ὅσιος καὶ Δίκαιος, Ὅσιος Δίκαιος, or Ὅσιος

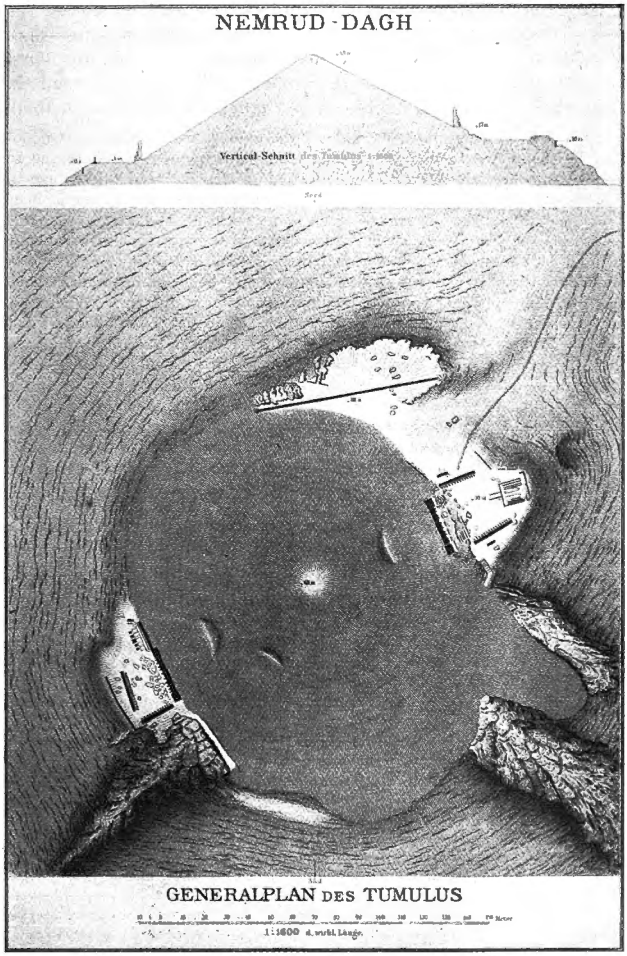

Fig. 543.

alone, were used throughout Asia Minor etc. of a variety of gods and goddesses. And, as we shall see, Antiochos claimed to be a human counterpart of Zeus *Oromásdes* rather than of Mithras.

of between 6800 and 7100 ft[1], a prodigious cairn of stones was piled containing *c.* 264,750 cubic metres of material (fig. 543). Various attempts to penetrate the vast mass and rifle the dead king's chamber have been made in modern times and have failed[2]. Antiochos set forth his intentions in a pompous inscription:

'When I had determined to construct the foundations of this sacred monument beyond the reach of time's wasting hand, hard by the heavenly throne, to the end that here the body of my outward form, having lived till old age in felicity and sent forth a soul beloved of the gods to the heavenly throne of Zeus *Oromásdes*, might sleep for endless ages, then of a truth I chose to make this spot the sacred seat of all gods in common, that so not only this heroic company of mine ancestors which thou seest might be established by my care, but also the divine shapes of manifest deities sanctified on a holy summit, and that they might have this place as a witness by no means bereft of my piety. Wherefore, as thou seest, I have established these godlike effigies of Zeus *Oromásdes* and Apollon Mithras Helios Hermes and Artagnes Herakles Ares and mine all-nurturing country Kommagene. Moreover, made of the self-same stone-work with gods that answer prayer and throned together with them, I have set up the fashion of mine own form, and have caused the ancient honour of great deities to become coeval with a new Tyche, thereby preserving a just representation of the immortal mind which has many a time been seen to manifest itself in my support and to lend me friendly help in the carrying out of my royal projects[3].' Etc., etc.

The concluding sentences of this passage refer to the fact that east and west of the cairn were two terraces, each of which had a similar series of five seated statues—ungainly colossal figures, built up of limestone blocks to a height of some 26 ft. Hamdy Bey, who saw the tumulus half-covered with snow, compares its clumsy guardians with a set of snow-men[4]. The central statue, somewhat larger than its neighbours, was that of Zeus *Oromásdes* in Commagenian costume with a short bundle of rods, the Persian *baresman*

[1] Humann—Puchstein *op. cit.* p. 236. [2] *Eid. ib.* p. 240 f.

[3] Humann—Puchstein *op. cit.* p. 272 f. i b 13 ff. (=Dittenberger *Orient. Gr. inscr. sel.* no. 383, 36 ff.) *ἐπεὶ δὲ ἱεροθεσίου τοῦδε κρη|πεῖδα ἀπόρθητον χρόνου λύμαις | οὐρανίων ἄγχιστα θρόνων κατασ|τήσασθαι προνοήθην, ἐν ᾧι μα|καριστὸν ἄχρι [γ]ήρως ὑπάρξαν σῶμα | μορφῆς ἐμῆς πρὸς οὐρανίους Διὸς | Ὡρομάσδου θρόνους θεοφιλῆ ψυχὴν | πρὸπέμψαν εἰς τὸν ἄπειρον αἰῶνα κοι|μήσεται· τότε δὴ καὶ τόνδε· χῶρον | ἱερὸν ἁπάντων κοινὸν ἀναδεῖξαι | θεῶν ἐνθρόνισμα προειλάμην, ὅπως | μὴ μόνον ἐμῶν προγόνων οὗτος ὃν ὁρᾷς | ἡρῷ(ο)ς λόχος ἐμαῖς ἐπιμελείαις ὑπάρ|χῃ καθιδρυμένος, ἀλλὰ καὶ | δαιμόνων ἐπιφανῶν θεῖος τύπος ἐν | ἁγίωι λόφωι καθοσιωθείς, μηδὲ τὸν|δε τὸν τόπον ὀρφανὸν εὐ|μῆς εὐσεβείας ἔχῃ μ[ά]ρτυρα. διόπερ | ὡς ὁρᾷς Διός τε Ὡρομάσδου καὶ Ἀπόλ|λωνος Μίθρου Ἡλίου Ἑρμοῦ καὶ Ἀρτάγνου Ἡρακλέους Ἄρεως ἐμῆς τε πατρίδος παντρόφου Κομμαγηνῆς θεοπρε|πῆ ταῦτα ἀγάλματα καθιδρυσάμην | ἀπό τε λιθείας μᾶς δαίμοσιν ἐπηκόοις | σύνθρονον χαρακτῆρα μορφῆς ἐμῆς | συνανέθηκα καὶ Τύχης νέας ἡλικιῶ|τιν ἀρχαίαν θεῶν μεγάλων τιμὴν ἐποι|ησάμην, μίμημα δίκαιον φυλάσ|σων ἀθανάτου φροντίδος, ἣ πολλά|κις ἐμοὶ παρασταῖσα ἐπιφανὴς εἰς βοή|θειαν ἀγώνων βασιλικῶν εὐμενὴς | ἐφορᾶτο.* κ.τ.λ. J. H. Moulton *Early Zoroastrianism* London 1913 p. 107 f. detects in these last clauses a clear reference to the Fravashi or 'double' of Persian belief.

[4] Humann—Puchstein *op. cit.* pp. 252—259, 293—298 pls. 23—31, Hamdy Bey—Osgan Effendi *op. cit.* pp. 15—19 pls. 12, 12[1], 14—19, 19[1], 20—22.

or *barsom*[1], in his left hand and a high tiara on his head: this tiara in front and behind had a vertical stripe on which round disks were worked in low relief, while about its edge was a diadem adorned with a row of upright winged thunderbolts (fig. 544)[2]. On the right of Zeus sat Kommagene, conceived as a Tyche with a *kálathos* and a corn-wreath on her head, a horn of plenty in her left hand, and a bunch of corn-ears, grapes, pomegranates and a pear-shaped fruit in her right[3]. On the left of Zeus was

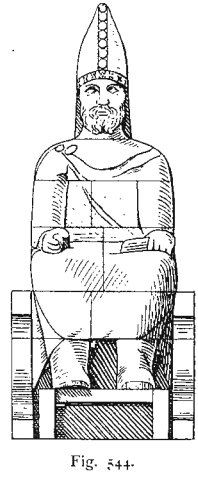

Fig. 544.

[1] J. H. Moulton *Early Religious Poetry of Persia* Cambridge 1911 p. 127: 'The barsom (*baresman*) is a Magian ritual instrument, a bundle of twigs held before the face: cf. Ezekiel viii. 17. It adapts the name of an Aryan institution of a very different kind, the Indian *barhis*, or carpet of grass on which the sacrifice was laid.' *Id. Early Zoroastrianism* London 1913 pp. 68 f., 189 ff., 198 f., 408 f. See further O. M. Dalton *The Treasure of the Oxus* etc. London 1905 p. 46 f.: 'the *bareçman* or *barsom*, a small bundle of rods supposed to be composed of branches of the date, pomegranate, and tamarisk, the gathering of which Ormuzd describes to Zarathustra in the nineteenth chapter of the Vendidad[3]. ([3][A.] Hovelacque, [*L'Avesta, Zoroastre et le Mazdéisme* Paris 1880], p. 425; M. Dieulafoy, [*L'Acropole de*] *Suse* [Paris 1893], p. 393 n. 4; *see* also note to no. 48.) It was the constant accompaniment of almost every ritual act, and in his daily prayers before the sacred fire, as Strabo noted of the Magi in Cappadocia, the priest always held it in his hand[4]. ([4]Ῥάβδων μυρικίνων λεπτῶν δέσμην κατέχοντες, Strabo, xv. 733; [J. G.] Rhode, [*Die heilige Sage und das gesammte Religions-System der alten Baktrer, Meder, Perser* etc. Frankfort 1820], p. 509.) The texts do not seem to imply that the rods were used for purposes of divination, but there is some authority for believing that this was at one time the case....The bundle of rods seems to be shown in the hands of the two statuettes nos. 1 and 2 [p. 75 f. pls. 2 and 12], the second of which may well represent a magus of high rank; a number of the figures upon the gold plaques (*see* plates xiii and xiv) also hold it, and attention may be called to the fact that the object held by the deity in the Sassanian rock sculpture, fig. 42, has some resemblance to a bundle of rods.' A Graeco-Persian relief of *c.* 425—400 B.C., found near Daskyleion, shows two priests in Persian dress with covered mouth and nose and uplifted *barsom* (?), offering a ram's head and a bull's head on a pyre (?) of slender sticks (T. Macridy in the *Bull. Corr. Hell.* 1913 xxxvii. 348 ff. fig. 4 pl. 8).

[2] Fig. 544 shows the seated Zeus of the east terrace (Humann—Puchstein *op. cit.* p. 255 f. pls. 25—27 and 29, 5 f., Hamdy Bey—Osgan Effendi *op. cit.* p. 15 f. pls. 12 and 15) completed with the help of the head from its counterpart of the west terrace (Humann—Puchstein *op. cit.* p. 296 f. pl. 31, 3, Hamdy Bey—Osgan Effendi *op. cit.* p. 19 pl. 19).

[3] Kommagene is the one figure whose head, though not quite in the original position, still rests upon its shoulders. She, in common with many another Asiatic Tyche (*supra* p. 136 n. 6, cp. p. 597 n. 4 and p. 710), may be regarded as a late modification of the ancient mountain-mother, who after all had the longest, if not the best, claim to be honoured on such a site. Hence Antiochos (*supra* p. 744) was careful to describe himself

a beardless effigy of Antiochos, in pose and costume closely resembling Zeus, except that the diadem round his tiara was decorated with alternate disks and lozenges in relief. Beyond Kommagene was Apollon Mithras Helios Hermes[1]; beyond Antiochos was Artagnes Herakles Ares[2]. Both these deities bore a general likeness to Zeus; but, whereas Apollon held the bundle of rods, Artagnes carried a short club leaning against his shoulder. The series was terminated at either end by statues of an eagle and a lion standing on a common base. On the backs of the thrones was the long inscription, part of which has been cited above, including a preamble to explain the purpose of the whole precinct and a law to regulate its cult[3].

Over against the statues of the east terrace were the remains of a large rectangular altar, once decorated with sculpture, and two long bases or walls, north and south of the terrace, in which *stêlai*

as the new Tyche, whose cult was thenceforth to be associated with that of the older divinities (see Humann—Puchstein *op. cit.* p. 339 n. 1).

[1] Apollon Mithras Helios is presumably a solar deity. His further identification with Hermes may be attributed to the fact that the planet Mercury was connected by the Persians with Mithras, by the Greeks either with Apollon or with Hermes (Humann—Puchstein *op. cit.* p. 335 n. 4). Note also that the *rôle* of ψυχοπομπός was played alike by Mithras and by Hermes (F. Cumont in Roscher *Lex. Myth.* ii. 3055, Dittenberger *Orient. Gr. inscr. sel.* no. 383 n. 20).

[2] Artagnes is the Avestan *Verethraghna*, the genius of 'Victory' (on whose name see J. H. Moulton *Early Religious Poetry of Persia* Cambridge 1911 pp. 39 f., 146), as was observed by P. de Lagarde in the *Nachr. d. kön. Gesellsch. d. Wiss. Göttingen* Phil.-hist. Classe 1886 p. 148 ff. (Humann—Puchstein *op. cit.* p. 282 n. 1). The identification with Herakles and Ares may be due to the fact that the planet Mars, which the Persians connect with the god *Bahrâm* (=the earlier *Verethraghna*), was by the Greeks assigned sometimes to Herakles, sometimes to Ares (Humann—Puchstein *op. cit.* p. 335 n. 4, Dittenberger *Orient. Gr. inscr. sel.* no. 383 n. 21). Further, Artagnes was perhaps represented as Herakles in Mithraic art (F. Cumont *Textes et monuments figurés relatifs aux mystères de Mithra* Bruxelles 1896 i. 143 and in Pauly—Wissowa *Real-Enc.* Suppl. i. 144) and on coins of Hooerkes (*Brit. Mus. Cat. Coins* Greek and Scythic Kings p. 138 pl. 27, 15 ΗΡΑΓΙΑΟ, p. 154 pl. 29, 1 ΗΡΑΚΛΟ (?), Humann—Puchstein *op. cit.* p. 282 n. 1), and as Ares by Strab. 727 *ὄνον τε θύουσι* (*sc.* οἱ Καρμάνιοι) *τῷ Ἄρει, ὄνπερ σέβονται θεῶν μόνον, καὶ εἰσι πολεμισταί.*

[3] Humann—Puchstein *op. cit.* p. 259 ff., Hamdy Bey—Osgan Effendi *op. cit.* p. 11 ff., Dittenberger *Orient. Gr. inscr. sel.* no. 383. The principal enactments are that the birthday of Antiochos, *viz.* the 16th of Audnaios (a Macedonian month answering to the Athenian Poseideon), and his coronation day, *viz.* the 10th of Loïos (the Macedonian equivalent of the Athenian Hekatombaion), are to be observed throughout the kingdom as festivals in honour of his divine guardians; that the corresponding days, *viz.* the 16th and the 10th, of each month shall be honoured by the priests; that on all these occasions the priest of the gods and heroes is to wear Persian attire, to crown all (*sc.* the gods and heroes) with golden crowns, and to offer on the altar of the latter frankincense and perfumes, while he honours the former with rich sacrifices; that, moreover, he is to furnish the holy tables with fitting viands and jars of wine, and so to entertain citizens and strangers alike, reserving a special portion for himself and allowing every guest to take his share and consume it where he will. Etc., etc.

Fig. 545.

representing the ancestors of Antiochos had been set up, each with its own small altar before it[1].

The west terrace also had two base-walls for the erection of similar *stélai*. These were placed along its western and southern sides[2]. The line of the seated statues was here continued northwards by means of a third base-wall, the reliefs of which were fairly preserved. They represented, from left to right, the following figures—Antiochos receiving a bunch of grapes, apples, corn etc. from Kommagene, Antiochos greeted by Apollon Mithras Helios Hermes, Antiochos greeted by Zeus *Oromásdes*, Antiochos greeted by Artagnes Herakles Ares, the horoscope of Antiochos in the form of a star-spangled lion. Of these five reliefs the first four bore dedicatory inscriptions on their backs, the last was inscribed in front. The whole series was flanked by an eagle and a lion at either end, arranged as in the case of the seated *colossi*[3].

The central and largest relief (fig. 545)[4] portrays Zeus *Oromásdes* in Commagenian dress giving the right hand of fellowship to Antiochos, who is similarly attired. The god sits on a gorgeous throne, decorated above with a pair of eagles, on either side with oak-leaves and acorns, below with Chimaira-heads and leonine claws. He holds a sceptre in his left hand. His tiara has a pearled edge and a diadem with upright winged thunderbolts on it: it is

[4] Humann—Puchstein *op. cit.* pp. 324—327 pl. 39, 1 and 1 a (=my figs. 545, 546), Hamdy Bey—Osgan Effendi *op. cit.* p. 23 f. pl. 27 f., F. Cumont *Textes et monuments figurés relatifs aux mystères de Mithra* Bruxelles 1896 ii. 187 f. fig. 11 and in Roscher *Lex. Myth.* iii. 1054 f. fig. 2, R. Eisler *Weltenmantel und Himmelszelt* München 1910 i. 64 fig. 12, Reinach *Rép. Reliefs* i. 195, 3. The slab has a maximum height of 3.04^{m}, and is 2.17^{m} broad and 0.28^{m} thick (exclusive of the relief). When first discovered by O. Puchstein, it was lying on its face with stones heaped upon it. He copied the inscription on its back and replaced the stones. Hamdy Bey dug it up again and, since it lay with the foot-end still resting on the base-wall, tilted it over on its head. The result is that it now lies upside down exposed to the weather. Worse than that, the lower part of the relief has broken off, and the two parts do not accurately fit together. A fragment (fig. 546) found by a Turk in 1884 and brought by him to F. von Luschan is now at Berlin: it shows part of the diadem together with the left brow of Zeus: height 0.22^{m}. The inscription chiselled on the back of the slab is: **Βασιλεὺς μέγας Ἀντίοχος Θεὸς Δίκαιος | Ἐπιφ[α]νὴς [Φ]ιλορωμαῖος καὶ Φιλέλλην, | ὁ ἐγ βασιλέω[ν] Μιθραδάτου Καλλινίκου | καὶ βασιλί[σσ]ης Λαοδίκης Θεᾶς Φιλαδέλφου, | Δία Ὡρομάσδη** (Humann—Puchstein *op. cit.* p. 325, Dittenberger *Orient. Gr. inscr. sel.* no. 384).

Fig. 546.

also plentifully sprinkled with six-rayed stars, among which is visible another winged bolt. His foot-gear, leg-coverings, etc. show the oak-pattern. Altogether he is a skilful blend of the

Fig. 547.

Commagenian and the Greek. Puchstein rightly observes that Antiochos is decked, wherever possible, with the symbols of Zeus. His crown-topped tiara[1] displays a large winged bolt between

[1] Cp. the head-dress of Antiochos i of Kommagene on bronze coins struck by him (fig. 550, cp. *Brit. Mus. Cat. Coins* Galatia, etc. pp. xliv f., 105 pl. 14, 8, *Hunter Cat. Coins* iii. 120, Head *Hist. num.*[2] p. 775) with that of Tigranes, king of Armenia, on his silver and copper moneys (*Brit. Mus. Cat. Coins* Seleucid Kings of Syria p. 103 ff.

Fig. 548.

Fig. 549.

Fig. 550.

pl. 27, 5 ff. (fig. 548 = pl. 27, 6), *Hunter Cat. Coins* iii. 1 ff. pl. 63, 1 ff., Head *Hist. num.*[2] p. 772 f. fig. 342, G. F. Hill *Historical Greek Coins* London 1906 p. 163 ff., pl. 13, 96). Figs. 549, 550 are from specimens in the Leake collection = W. M. Leake *Numismata Hellenica* London 1856 Kings and Dynasts p. 38.

oak-leaves. His diadem, the upper edge of his coat-of-mail, his shoulder-clasps, all have the same design of thunderbolts. Tiara-flaps, girdle, dagger-sheath, and shoes are embellished with oak-leaves and acorns. Lastly the short-sleeved jerkin is covered with stars set in a kind of network or trellis. Clearly the king wished to be regarded as the human embodiment of Zeus *Oromásdes*, 'the Just God Made Manifest.'

Antiochos' horoscope (fig. 547)[1] shows a lion with the crescent moon beneath his neck and nineteen stars so disposed about him as to correspond closely with the pseudo-Eratosthenes' account of the constellation Leo[2]. These stars have eight rays apiece. Distinct from them are three larger stars above the lion's back, which are sixteen-rayed and inscribed 'the Fiery Star of Herakles,' 'the Gleaming Star of Apollon,' 'the Brilliant Star of Zeus.' The whole slab, therefore, indicates a conjunction of the planets Mars, Mercury, and Iupiter in the sign of the Lion. Now apart from Kommagene, who on this site probably represents the ancient mountain-mother[3], Zeus, Apollon, and Herakles are the only deities recognised by Antiochos. It is therefore practically certain either that the king's choice of gods was determined by his own horoscope or that the king's horoscope was cast in accordance with his choice of gods. The former hypothesis is at least as likely as the latter. Prof. Tietjen of Berlin had elaborate calculations made by P. Lehmann, which pointed to July 17, 98 B.C., as the day most in accordance with the astronomical data[4]. Since the king's birthday was on Audnaios 16, *i.e.* in December or January, Puchstein concludes that the horoscope was cast for the conception, not for the nativity of Antiochos, whom he takes to have been a seven months' child born at the beginning of the year 97 B.C.[5] U. Wilcken suggests that the horoscope had reference rather to the king's accession on Loïos 10, which may well be equated with July 17, 98 B.C.[6]

[1] Humann—Puchstein *op. cit.* pp. 329—336 pl. 40 (=my fig. 547), Hamdy Bey—Osgan Effendi *op. cit.* p. 21 f. pl. 24, Reinach *Rép. Reliefs* i. 196. The slab measures $1{\cdot}75^{m}$ in height, $2{\cdot}40^{m}$ in breadth, $0{\cdot}47^{m}$ in thickness. It is inscribed: Πυρόεις Ἡρακλ[έους], Στίλβων Ἀπόλλωνος, Φαέθων Διός (Humann—Puchstein *op. cit.* p. 329).

[2] Pseudo-Eratosth. *catast.* 12 ἔχει δὲ ἀστέρας ἐπὶ τῆς κεφαλῆς γ', ἐπὶ τοῦ στήθους <α', ὑπὸ τὸ στῆθος>β', ἐπὶ τοῦ δεξιοῦ ποδὸς λαμπρὸν α', ἐπὶ μέσης<τῆς κοιλίας>α', ὑπὸ τὴν κοιλίαν α', ἐπὶ τοῦ ἰσχίου α', ἐπὶ τοῦ ὀπισθίου γόνατος α', ἐπὶ ποδὸς ἄκρου λαμπρὸν α', ἐπὶ τοῦ τραχήλου β', ἐπὶ τῆς ῥάχεως γ', ἐπὶ μέσης τῆς κέρκου α', ἐπ' ἄκρας λαμπρὸν α', [ἐπὶ τῆς κοιλίας α']· <τοὺς πάντας ιθ'>. [5] Humann—Puchstein *op. cit.* p. 333 f.

[6] U. Wilcken in Pauly—Wissowa *Real-Enc.* i. 2487 f.

In any case it is obvious that astrology played no small part in the Commagenian cult of Zeus *Oromásdes*.

(b) Zeus as god of the Starry Sky.

Zeus is occasionally, but not often, brought into connexion with the stars in ancient literature and art.

He is more than once conceived by Euripides as dwelling in the starry sky. The Satyrs associate him with the stars and Orion[1]. Menoikeus swears 'by Zeus and all his stars[2]'—a phrase that impressed Plutarch[3]. Kreousa's handmaidens sing of the night-procession from Athens to Eleusis on Boedromion 20—

> What time the star-eyed sky of Zeus himself
> Joins in the dance[4].

Achaios went one step further, perhaps we should say one step further back, and spoke of 'Zeus the starry-eyed[5].' Finally, Nonnos tells how Zeus stooped from heaven to earth for the sake of Semele:

> Then Zeus of the air quitted his starry home
> For Semele's side[6].

But it will be observed that these are all poetic fancies with little or no support in actual cult.

When Propertius describes the temple of Zeus at Olympia as 'imitating the sky[7],' he is in all probability alluding to a coffered ceiling[8] with gilt stars on a blue ground[9]—a device common to

[1] Eur. *Cycl.* 211 ff. (*supra* p. 6 n. 4).

With regard to the inner ceiling in the temple of Zeus at Olympia W. Dörpfeld in *Olympia* ii. 11 writes: 'Wie die aus Holz bestehende Decke im Einzelnen gebildet war, lässt sich nicht bestimmen; in den Ergänzungen [pls. 11, 2, 12] sind deshalb einfache Balken und eine glatte Verschalung angenommen.'

[9] H. Thédenat in Daremberg—Saglio *Dict. Ant.* iii. 903, A. Marquand *Greek Architecture* New York 1909 p. 236 ('The recessed cofferings were ornamented in various

Greek with Egyptian art[1]. If so, we may suppose that the decoration of the roof was deliberately chosen to mark the celestial character of the god.

A notable coin-type of imperial date shows Zeus as cosmic lord surrounded by the signs of the zodiac. Several varieties of the type are found. Thus a magnificent copper coin of Nikaia in Bithynia, struck by Antoninus Pius and now in the Paris cabinet, has (fig. 551)[2] Zeus enthroned with sceptre and thunderbolt between

Fig. 551.

Fig. 552.

the chariots of the Sun and of the Moon; at his feet on either side are two reclining figures, Gaia with corn-ears and a horn of plenty, Thalassa with a stern-ornament and a rudder: round the whole is the zodiac, its twelve signs all clearly expressed. Even more ambitious is a copper coin of Perinthos in Thrace, struck by Severus Alexander and now in the British Museum (fig. 552)[3]. Within a dotted circle sits Zeus with sceptre, *phiále*, and eagle. In the field above him Helios drives a team of four horses, Selene a team of two bulls, the former accompanied by the crescent of the latter, the latter by the star of the former. Beneath Zeus are Gaia

ways. The Theseion affords a simple example. The soffits of the coffers each present a single star, painted probably in gold against a blue ground, and hence called *οὐρανός*, or *οὐρανίσκος*....The Parthenon and the Propylaia show doubly recessed coffers....Some of the plates of cofferings from the Propylaia still show stars' etc.), A. H. Smith in the *Brit. Mus. Cat. Sculpture* ii. 84 ('When found the lower side of the lacunar stone [of the Mausoleum] was painted bright blue.' Cp. Durm *Baukunst d. Gr.*[3] p. 330 fig. 316). The coffering of the Erechtheion is restored in gold and colours by Durm *ib.*[2] p. 261 pl. opposite p. 252 (*ib.*[3] p. 341 pl. opposite p. 316 worse).

[1] See J. Pennethorne *The Geometry and Optics of Ancient Architecture* London and Edinburgh 1878 p. 173 f. pt. 5 pl. 3 (a comparative series of Egyptian tomb-ceilings from Thebes and of Greek temple-ceilings from the 'Theseum' and Erechtheion, fully coloured and gilded).

and Thalassa recumbent: Gaia holds a *cornu copiae*; Thalassa wears a head-dress of crab's-claws and is equipped with a rudder and a prow. The whole design is enclosed by the zodiac, as before. An autonomous bronze coin of Sardeis, described by Eckhel[1], had Zeus with Nike in his hand enthroned amid the signs of the zodiac. An imperial coin of Tios or Tion in Bithynia, mentioned by B. V. Head[2], again shows Zeus with the zodiac. On a bronze coin of Amastris in Paphlagonia, struck by Iulia Maesa, Zeus and Hera, both holding sceptres, stand facing each other within the same border (fig. 553)[3]. Two bronze coins of Alexandreia, struck by Antoninus Pius in 145 A.D.[4], play further variations on the same theme: one of them duplicates the zodiacal belt and places in the centre jugate busts of Sarapis wearing his *kálathos* and Isis wearing her disk and horns[5]; the other substitutes for the inner zodiac a circular band adorned with busts of Kronos, Helios, Selene, Ares, Hermes, Zeus, Aphrodite—the deities representing the days of the week—and gives as the central figure Sarapis wearing his *kálathos*[6]. It will be observed that all the coins on

Fig. 553.

which Zeus is ringed with the zodiac belong to the period 138—235 A.D. and to towns that fall within, or border on, the north-west corner of Asia Minor. Hence we may ascribe them to the far-reaching influence of Mithraism, which constantly employed the zodiac as the framework of its ritual reliefs[1]. Oromasdes, as F. Cumont points out[2], travelled in connexion with the Mithraic mysteries from east to west, and is seen on Mithraic monuments as a Roman Iupiter with thunderbolt, sceptre, and eagle. Not improbably the coins in question intercept his progress and give us a glimpse of him as a Greek Zeus. After all, Zeus, Iupiter, and Oromasdes were essentially kindred figures, whose art-types were readily blended.

(c) Zeus in Astronomy and Astrology.

Astrology has been defined by A. Bouché-Leclercq as a method of divination using astronomy as its means[3]. Accepting this definition, we may agree with E. Riess that the Greeks were first definitely influenced by Babylonian and Egyptian astrology towards the end of the fourth century B.C.[4], though O. Gruppe has rightly insisted that astrological notions of a sort are to be found in Greece long before the age of Alexander the Great—astro-meteorology already bulks big in Hesiod, and even astrology in the strict sense of the term is presupposed by Greek mystic teaching of the sixth century B.C. and by sundry passages of Herakleitos, Euripides, and Herodotos[5].

In the course of the third and following centuries B.C. the Greeks partly borrowed and partly developed a very complete series of constellations. Each of these had its own myth or myths and was, more often than not, said to have been placed in the sky by Zeus. Thus the *Katasterismoi* ascribed to Eratosthenes of Alexandreia (*c.* 275—195 B.C.) enumerates some thirty-three

[5] Gruppe *Gr. Myth. Rel.* p. 1588 ff., *id. Myth. Lit.* 1908 p. 211.

constellations as the work of particular Greek deities: of this number Poseidon made one[1], Apollon[2] Artemis[3] Dionysos[4] and Hermes[5] two apiece, Hera two[6] and the Milky Way[7], Athena four[8]; but no less than seventeen are said to have been created by Zeus[9], who was further intimately connected with the myths of at least seven others[10].

If it be asked why Zeus rather than any other deity arranged the constellations, we must again take into account oriental leading. Babylonian astrology assigned the several planets to different divinities thus[11]:

Planet.	*Divinity.*
Iupiter.	Marduk.
Venus.	Ištar.
Mercury.	Nabu.
Saturn.	Ninib.
Mars.	Nergal.

The Greeks of the fourth century followed suit and exchanged their old descriptive names of the planets for those of various gods corresponding more or less closely with the Babylonian series.

[1] Delphin.

[2] Sagitta, Hydra with its Corvus and Crater.

[3] Ursa Minor (pseudo-Eratosth. *catast.* 2), Equos (*id. ib.* 18, but Hyg. *poet. astr.* 2. 18 refers it to Iupiter).

[4] Corona, Asini.

[5] Deltoton, Lepus.

[6] Serpens (pseudo-Eratosth. *catast.* 3. but Hyg. *poet. astr.* 2. 3 refers it also to Minerva), Cancer. Hyg. *poet. astr.* 2. 16 refers Aquila (=the Coan king Merops) to Iuno.

[7] *Supra* p. 624.

[8] Cepheus, Andromeda, Perseus, Argo.

[10] Ursa Minor (= Phoinike, a companion of Artemis loved by Zeus; or Kynosoura, an Idaean nymph, nurse of Zeus; or Helike, a Cretan nurse of Zeus), Virgo (=Dike, daughter of Zeus and Themis; or Demeter, or Isis, or Atargatis, or Tyche), Deltoton (=Δ the initial of Διός), Pliades (of whom Elektra, Maia, and Taygete were loved by Zeus: according to Hyg. *poet. astr.* 2. 21, Iupiter placed them all among the stars), Aquarius (=Ganymedes, the cup-bearer of Zeus), Aquila (the sacred bird of Zeus: according to Aglaosthenes *Naxiaca frag.* 2 (*supra* p. 164 n. 4), Zeus placed it among the stars), Ara (the altar at which the gods took their oath, when Zeus attacked Kronos).

[11] P. Jensen *Die Kosmologie der Babylonier* Strassburg 1890 p. 134 ff., A. Bouché-Leclercq *L'astrologie grecque* Paris 1899 p. 40 ff., M. Jastrow *Aspects of Religious Belief and Practice in Babylonia and Assyria* New York and London 1911 p. 217 ff., *id. Die Religion Babyloniens und Assyriens* Giessen 1912 ii. 1. 444 ff. and the literature cited *ib.* i. 1. 426 n. 2 f., 427 n. 1 f., especially F. X. Kugler *Sternkunde und Sterndienst in Babel* i (Entwicklung der Babylonischen Planetenkunde von ihren Anfängen bis auf Christus) Münster in Westfalen 1907.

The earlier Babylonian order is Iupiter, Venus, Saturn, Mercury, Mars: the later (*c.* 400 B.C.) is Iupiter, Venus, Mercury, Saturn, Mars (Kugler *op. cit.* i. 13).

Aristotle in his work *On the Universe* draws up a list, which gives both the earlier and the later names arranged in the Greek order[1]:

Planet.	*Earlier name.*	*Later name.*
Saturn.	*Phaínon* (the 'Shining').	Kronos.
Iupiter.	*Phaéthon* (the 'Brilliant').	Zeus.
Mars.	*Pyróeis* (the 'Fiery').	Herakles or Ares.
Mercury.	*Stílbon* (the 'Gleaming').	Hermes or Apollon.
Venus.	*Phosphóros* (the 'Light-bringer').	Aphrodite or Hera.

The Babylonians assigned Iupiter to their chief deity Marduk, not because Iupiter appeared to them as the largest of the planets[2] (that would rather have been Saturn), but because his bright golden disk shone so steadily and was visible for so long in the sky[3]. The fifth tablet of the creation-epic represents Marduk, under the name of Nibiru, as exercising a control over all the stars and especially as ordering the constellations:

> 'He established the stations for the great gods.
> The stars, their likeness, he set up as constellations[4].'

Further, Marduk as the paramount god of the Babylonian pantheon had taken over from Enlil of Nippur the title *Bêl* or 'Lord[5].' Hence the Greeks, equating him with their own supreme deity, spoke of him as Zeus *Bêlos*[6]. And the Romans attributed the

invention of astrology to Iupiter *Belus*[1]. Late writers found it easy to drop the cult-title and to credit the Greek Zeus or the Roman Iupiter rather than their oriental counterpart with the ordering of the universe. Aristeides the rhetorician (117—*c.* 180 A.D.) describes the courses of moon and stars as the 'arrangement of Zeus[2].' And Martianus Capella (*c.* 400 A.D.) puts into the mouth of Harmonia the following hymn addressed to Iupiter as ruler of the starry sky[3]:

> Thee, Iupiter, in my star-sounding song,
> Thee first I name and worship. For through thee
> The sacred revolution of the sky
> Is wont to wheel again in order due
> The jewelled constellations. Thou Almighty
> Beneath thy sceptred diadem dost bind
> And sway thy kingdom, Sire of every god,
> While the great universe rolls on, rolls ever,
> Thanks to the mind fed by thy starry force.
> As sparks on tinder that will burst aflame,
> The scattered stars declare thy handiwork.
> Phoebus proclaims thee, while with task divine
> His rays renew the purple dawn for men
> And give their glory to the ambrosial day.
> Cynthia, queen of night, month after month
> Waxes with horns of gold. Beneath thine eye
> Through fires that light the Wain the Serpent shines
> And drives apart the Bears of Arcady.
> So the hard Earth soft-wrapped in circling Air
> Rests on its axis, and by either pole
> Rules and is ruled; so Nereus knows the bounds
> Of ocean, so for food laps upper Fire,
> That all things thrive with no discordant strife
> And, parted, love the everlasting league,
> Fearing the chaos that might break their peace.
> Thou, King of Heaven, thou, Father, Best of all,
> Who in thy love dost clasp the stars together,
> And to thy children givest perpetual life,
> All hail—my lute uplifts its lay to thee
> For whom full-sounding songs sound yet again.

[3] Mart. Cap. 911 f.

Centuries later Ioannes Tzetzes speaks of 'Zeus the astrologer-king[1]' or even of 'Zeus the star-gazer[2],' assuming in his Euhemeristic way that the sky-god must have been not only a king[3] but also a diviner of repute. It is curious to reflect that, just as Zeus at his first beginning appeared in the guise of a human magician[4], so Zeus at his latter end relapsed to the level of a human astrologer. Old age for him, as for us, meant second infancy.

For astrological purposes the planets were classified as good (Iupiter, Venus) or bad (Saturn, Mars) or both (Mercury). We hear also of stars that are diurnal (the Sun, Saturn, Iupiter) or nocturnal (the Moon, Mars, Venus) or both (Mercury). There was a distinction, too, between stars that are masculine (the Sun, Saturn, Iupiter, Mars) or feminine (the Moon, Venus) or both (Mercury). But these and other such subtleties[5]—though for long ages they were regarded as matters of moment by a public that believed in horoscopes, and though in some cases they have left a permanent trace upon the language of modern almanacs—we need pursue no further. They belong to the history of sidereal divination in general rather than to that of a particular divinity[6]. I shall therefore content myself with quoting Bouché-Leclercq's summary[7] of

[1] Tzetz. *chil.* 2. 159 (Herakles the reputed son of Amphitryon) *τῇ δ' ἀληθείᾳ τοῦ Διός, ἄνακτος, ἀστρολόγου* (cp. *ib.* 168 *ὁ μάγος βασιλεὺς ἐκεῖνος ἀστρολόγος*), 2. 696 ff. *τοῦ Πολυδεύκους δ' ὁ πατὴρ ὁ Ζεὺς ὁ ἀστρολόγος | τοῖς ἄστροις κατηστέρισε τοὺς παῖδας τεθνηκότας | καὶ τοὺς Διδύμους κέκληκεν Κάστορα, Πολυδεύκην*, *alleg. [6] The clearest outlook over the whole subject is still that given by A. Bouché-Leclercq *Histoire de la divination dans l'antiquité* Paris 1879 i. 205—257, *id.* in Daremberg—Saglio *Dict. Ant.* ii. 302—305, and especially *id. L'astrologie grecque* Paris 1899 *passim.* A great mass of fresh material is listed and in part published in the *Catalogus codicum astrologicorum Graecorum* Brussels 1898— by D. Bassi, F. Boll, F. Cumont, W. Kroll, E. Martini, and A. Olivieri. This is turned to good account by F. Boll *Sphaera* (Neue griechische Texte und Untersuchungen zur Geschichte der Sternbilder) Leipzig 1903, *id. Die Lebensalter* (extr. from the *Neue Jahrb. f. klass. Alterth., Gesch. u. deutsch. Lit.* xxxi) Leipzig and Berlin 1913. On recent astrological research in general see the well-informed survey of Gruppe *Myth. Lit.* 1908 pp. 206—215.

[7] A Bouché-Leclercq *L'astrologie grecque* Paris 1899 p. 97 f.

the powers ascribed by astrologers to the planet 𝑙[1], *i.e.* the Greek *Phaéthon* or *Zeús*, the Roman *Iupiter*:—

'The brilliant planet that bears the name of Jupiter has received from astrologers as many praises—and the same—as Zeus himself, "father of gods and men," received from his worshippers. Jupiter is a star naturally benevolent and beneficent, a pleasant contrast to the Babylonian Marduk. If his influence alone were dominant, earth would be a paradise: Firmicus holds that men would be actually immortal[2]. Ptolemy expresses this psychological character in physical terms: he emphasises the essentially temperate nature of the planet, which is at once hot and moist, the former to a greater degree than the latter, and so constitutes a just mean between the frosts of Saturn and the fires of Mars. Moreover, he attributes to Jupiter the peculiar characteristic of arousing "winds that fertilise[3]." Whence came these vapours and moist blasts? Ptolemy does not explain; probably he did not know. It may be that Jupiter inherited these attributes from Marduk. In the fourth tablet of the Chaldean cosmogony we read how Marduk, when he went to fight with Tiamat, let loose a fearful tempest, "the four winds, the seven winds that he engenders." Further on Marduk is called "the god of the good wind[4]." As god of the atmosphere, of rain and storm, the Graeco-Latin Jupiter would be readily assimilated to such a deity[5]. In the winds "that fertilise" we have the isolated relic of a once wide-spread superstition. We shall see later that the astrologers attributed to the three superior planets and to Venus an orientation of their own corresponding with the four cardinal points. The north devolved upon Jupiter. And it was the north wind, Boreas, which was credited with such procreative virtue that female animals sometimes found themselves spontaneously impregnated by it[6].

[1] This symbol is usually explained as the first letter of the name *Zeús*, or (with more probability) as a form of thunderbolt (*id. ib.* p. xix).

[2] Firmic., ii, 13. 6 Kroll. Jupiter is a solar divinity, the Egyptian Ὀσίριδος ἀστήρ Ach. Tat., *Isag.*, 17). Astrologers assign Cancer as his ὕψωμα, Capricornus as his ταπείνωμα, an arrangement which would suit the Sun (see, below, ch. vii).

[3] Διὰ δὲ τὸ μᾶλλον εἶναι θερμαντικός, γονίμων πνευμάτων γίνεται ποιητικός (Ptol., *Tetrab.*, i, 4). Heat was supposed to produce by way of reaction the northern or etesian winds, which blew after the dog-days. At the time when he wrote his Φάσεις (*ap.* Wachsmuth pp. 199—276 ed. 2), and was not as yet an astrologer, Ptolemy attributed heat to Venus, moisture to Jupiter, and moist winds to Mercury (*ibid.*, p. 209). He changed his labels.

[4] Jensen, *Kosmologie*, pp. 283 and 295.

[5] The astrological Jupiter is γλυκέων ὑδάτων χορηγός (Anon., *In Tetrab.*, p. 70) and lodges in Pisces.

[6] Boreas impregnating mares (Hom. *Iliad.*, xx, 223 ff.); Zephyr fertilising Lusitanian mares—a thing reported as *res incredibilis, sed vera* by Varro (*R. rust.*, ii, 1, 19), Pliny [*nat. hist.* 8. 166] and Columella [*de re rust.* 6. 27]; the alleged non-existence of male vultures, the females being regularly fecundated ἐκ τοῦ πνεύματος (Euseb., *Pr. Ev.*, iii, 12, 3) [see further the references collected by Gruppe *Gr. Myth. Rel.* p. 442 n. 3 and E. S. Hartland *Primitive Paternity* London 1909 pp. 22 f., 35, 149 f.]: all these claimed to be facts so well-attested that Lactantius, with a shocking lack of taste, used them as an argument to explain the Incarnation of Jesus Christ: *Quodsi animalia quaedam vento et aura concipere solere omnibus notum est, cur quisquam mirum putet cum Spiritu Dei, cui facile est quidquid velit, gravatam esse virginem dicimus?* (Lactant. *Inst. Div.*, iv, 12). According to Proclus (in *Anal. Sacr.*, v, 2, p. 176 Pitra), Boreas produced males, Notus

However that may be, Ptolemy assigns to Jupiter the epithet that best defines his kind of influence by describing it as "temperate" (*εὔκρατον ἔχει τὸ ποιητικὸν τῆς δυνάμεως*)[1].'

(d) Zeus transformed into a Star.

A tradition fathered upon Clement of Rome[2] and cited also by Tzetzes[3] says that Zeus transformed himself into a star, when he begot Kastor and Polydeukes. We are reminded of the passage in the *Iliad*, which tells how Zeus sent Athena like a meteorite from heaven to earth:

> And even as crook-witted Kronos' son
> Sendeth a star—a sign to mariners
> Or some broad host of men—a brilliant star,
> Wherefrom springs many a spark, like unto that
> Pallas Athene darted down to earth[4].

This may be no more than a simile. But in the *Hymn to the Pythian Apollon* we have a case of actual metamorphosis. Apollon, having reached Krisa on board a vessel manned by Cretans from Knossos, leapt ashore—

> Like to a star at midday, and therefrom
> Flew many a spark, and lo the light reached heaven[5].

It is, then, possible that the tradition with regard to Zeus was not merely a late invention. Nevertheless it is reasonable to suppose, with O. Gruppe[6], that it was motived by the frequent association of the Dioskouroi with stars.

(e) The Dioskouroi as Stars.

On the original significance of the Dioskouroi this is not the place to dilate[7]. My concern is merely with their epiphany as stars.

females. See, below (ch. vii), Jupiter's "winds that fertilise" invoked to fix his *ὕψωμα* in Cancer.

[1] This is the traditional refrain: *Sub Jove temperies et nunquam turbidus aer* (Lucan., *Phars.*, x, 207). The meteorological influence of Jupiter tempering the cold in winter, the heat in summer—*rabidos et temperat aestus* (German., *Arat. Progn.*, iv, 11). Before the time of Ptolemy Pliny had written of Jupiter's position between Mars and Saturn *interjectum ambobus ex utroque temperari Jovem salutaremque fieri* (Plin., ii, § 34), and Pliny was copying Cicero (above, p. 95, 2 [Cic. *de nat. deor.* 2. 119, cp. Vitr. 9. 1. 16]). All this seemed reasonable enough, and no further evidence was demanded.

[2] Clem. Rom. *hom.* 5. 13 (ii. 184 Migne) *Νεμέσει τῇ τοῦ Θεστίου, τῇ καὶ Λήδᾳ νομισθείσῃ, κύκνος ἢ χὴν γενόμενος* (*sc.* ὁ Ζεύς) *Ἑλένην ἐτεκνώσατο, καὶ αὖθις, ἀστὴρ γενόμενος, Κάστορα καὶ Πολυδεύκην ἐξέφηνεν.*

[3] Tzetz. *in* Lyk. *Al.* 88 <*ἐν*> *ἄλλοις δέ τισιν εὗρον ἱστορικοῖς ὅτι ὁ Ζεὺς ἄστρῳ* (*ἀστέρι* codicum classis ii) *εἰκασθεὶς καὶ μιγεὶς Λήδᾳ Κάστορα καὶ Πολυδεύκην γεννᾷ, ὕστερον δὲ οὕτως, ὡς ἔφημεν, τὴν Ἑλένην.*

[7] Neither am I the right man to do so. My learned and brilliant friend Dr J. Rendel

And here it will be best to quote the available evidence before considering the various interpretations that have been put upon it.

i. The dedication of Stars after the battles of Salamis and Aigos Potamos.

In the battle of Salamis (480 B.C.) the Æginetans distinguished themselves above the rest of the Greeks for their bravery[1]. The Delphic Apollon therefore demanded of them a special thank-offering for the victory, and they erected at the corner of his temple three golden stars on a bronze mast[2]. H. Pomtow in his plan of the Pythian precinct places the mast with its three stars close to the south-east angle of the temple-platform[3]. Herodotos, our sole informant, says nothing about the Dioskouroi; nor do we know that they were specially worshipped in Aigina. But an analogous incident, which occurred three quarters of a century later, brings them well to the fore. After the battle of Aigos Potamos (405 B.C.) the victorious Spartan general Lysandros set up at Delphoi a magnificent trophy made from the spoils of the vanquished Athenians. It included a great assemblage of bronze statues, which in time became covered with a patina of exquisite blue, and visitors commented on the appropriateness of the colour[4]. Pausanias gives a list of the thirty seven statues[5], and important remains of the oblong chamber in which they stood, together with their inscribed bases, have been discovered by the French excavators near to the principal entrance of the sanctuary on the right hand side of the Sacred Way[6]. Pausanias' list of the statues in

Harris has for years past made the subject peculiarly his own, and his contributions towards the elucidation of divine twins in general and the Dioskouroi in particular (*The Dioscuri in the Christian Legends* London 1903 pp. 1—64, *The Cult of the Heavenly Twins* Cambridge 1906 pp. 1—160 with 7 pls., 'Sons of Thunder' in the *Expositor* 1907 pp. 146—152, 'Some Points in the Cult of the Heavenly Twins' in the *Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 175 f., 'The Cult of the Heavenly Twins' in *The Contemporary Review* 1909 xcv. 50—61, *Boanerges* Cambridge 1913 pp. 1—424) have aroused a wide-spread interest in the subject: see the comments of Gruppe *Myth. Lit.* 1908 pp. 57 f., 314 ff., 481 f., 563 f.

question is headed by the Dioskouroi: then follow Zeus, Apollon, Artemis, Poseidon, Lysandros crowned by Poseidon, the seer Agias, Hermon the helmsman of Lysandros; behind these is ranked a series of twenty eight captains from various states, who helped Lysandros to win the day. The artists of the statues are duly recorded, the Dioskouroi being the work of Antiphanes the Argive. Plutarch, who knew Delphoi well, mentions along with these statues the 'golden stars of the Dioskouroi, which disappeared before the battle of Leuktra[1].' He further states that, according to some persons, when Lysandros' ship was sailing out of the harbour to attack the Athenians, the Dioskouroi were seen shining as stars on the steering paddles; and that, according to others, the meteor that fell at Aigos Potamos was a sign of this slaughter[2]. H. Pomtow concludes that at Delphoi the 'golden stars of the Dioskouroi' were in all probability attached to the heads of the twin-deities[3]. Cicero says that shortly before the fight at Leuktra (371 B.C.) these stars 'fell down and were not found[4]'—an omen, doubtless, of the overthrow of Sparta at the hands of Thebes. Now, in view of the express connexion between the stars dedicated by Lysandros and the appearance of the Dioskouroi on the admiral's vessel, it can hardly be questioned that the stars erected on a mast by the Æginetans were likewise symbolic of help received from the Dioskouroi at the battle of Salamis[5].

[1] Plout. *v. Lys.* 18.

[2] Plout. *v. Lys.* 12. So Cic. *de div.* 1. 75. On the meteor see the *marm. Par. ep.* 57 p. 17 Jacoby, Aristot. *meteor.* 1. 7. 344 b 31 ff., Diog. Laert. 2. 10, Philostr. *v. Apoll.* 1. 2, Tzetz. *chil.* 2. 892 ff., Plin. *nat. hist.* 2. 149, Amm. Marc. 22. 16. 22.

[3] H. Pomtow in the *Ath. Mitth.* 1906 xxxi. 563. A bronze statuette of one of the Dioskouroi, found at Paramythia and now in the British Museum, has a hole in its cap, probably for the insertion of a star (*Brit. Mus. Cat. Bronzes* p. 37 no. 277 pl. 6, 3). But see *infra* p. 764 n. 6.

[4] Cic. *de div.* 1. 75. It is noteworthy that the great inscription recording the accounts of the *ναοποιοί* at Delphoi mentions among other items of expenditure under the archonship of Peithagoras (342 B.C.) the sum paid to a certain Kephalon 'for the model of the wooden star' (Dittenberger *Syll. inscr. Gr.*[2] no. 140, 111 f. = Michel *Recueil d'Inscr. gr.* no. 591, 111 f. = Collitz—Bechtel *Gr. Dial.-Inschr.* ii. 652 ff. no. 2502, 111 f. τοῦ ξ]υλ[ί]νου ἀστέρος τοῦ παραδεί[γματος στατῆρες τέτορες, δ[ρα]χ[μ]ά). But this may have been, as É. Bourguet and W. Dittenberger *ad loc.* suppose, a piece of architectural decoration: cp. *supra* p. 751 f.

[5] My friend Dr W. H. D. Rouse in his *Greek Votive Offerings* Cambridge 1902 p. 135 n. 1 complains that this hypothesis does not account for the fact that there were

ii. The Dioskouroi as Stars in Hellenic Literature.

Literary allusions fully bear out this conception of the Dioskouroi as helpful deities, whose signs bring relief to the storm-tossed mariner[1]. The Homeric *Hymn to the Dioskouroi*, which Mr E. E. Sikes dates 'at least as early as the fourth or third century B.C.,' gives a fine description of a storm at sea[2]—

> when the winds of winter
> Hurry across the rough deep, and on ship-board
> Men cry aloud to the sons of mighty Zeus
> With white lambs, climbing up the after-deck,
> Which the great wind and wave of the sea plunge deep
> Into the brine, till on a sudden they come,
> Darting on brown wings through the upper air,
> And straightway stay the blasts of labouring winds
> And lay the white surf smooth upon the main—
> Fair signs of trouble over[3]: those that see them
> Rejoice at heart and cease from sorry toil.

The Dioskouroi here, quite exceptionally, appear as birds[4], or at least as brown-winged forms. On Etruscan mirrors also they are occasionally winged[5]. To Euripides they were star-like deities, dwelling among the stars, and hastening thence to the rescue of the voyager. In the *Helene* (412 B.C.) Teukros says of them:

> In fashion made as stars men name them Gods[6].

And a chorus of Greek maidens in the same play invokes their blessing upon Helene's home-coming:

> And ye, in your chariot o'er highways of sky
> O haste from the far land
> Where, Tyndareus' scions, your homes are on high
> Mid the flashings of starland:

three stars, nor yet for their erection on a *mast*. But the third star may have been Apollon (*supra* p. 760) or, more probably, Helene (*infra* pp. 764, 769); and the mast is obviously appropriate to a memorial of a sea-fight, especially if the Dioskouroi and Helene were believed to appear as stars on the mast of the ship (*infra* p. 771 ff.).

[1] For a full collection of passages see K. Jaisle *Die Dioskuren als Retter zur See bei Griechen und Römern und ihr Fortleben in christlichen Legenden* Tübingen 1907 pp. 1—73, reviewed by R. Wünsch in the *Archiv f. Rel.* 1911 xiv. 554.

[2] *H. Diosk.* 7 ff. The passage is imitated by Theokr. 22. 8 ff.

[3] I follow the emendation of Prof. J. B. Bury, who corrects *ναύταις σήματα καλὰ πόνου σφίσιν†· οἱ δὲ ἰδόντες* into *σήματα καλὰ πόνων ἀπονόσφισιν· οἱ δὲ ἰδόντες* (*Class. Rev.* 1899 xiii. 183).

[4] On the contention of S. Reinach in the *Rev. Arch.* 1901 ii. 35—50 = *id. Cultes, Mythes et Religions* Paris 1906 ii. 42—57 that 'les Dioscures, comme Apollon et Kyknos, sont des hommes-cygnes' (sons of Zeus transformed into a swan and Leda, *i.e.* the Phrygian *Lada*, 'a woman'; born from an egg; later conceived as *λευκοπώλω* with egg-shell *piloi*; etc.) see Gruppe *Myth. Lit.* 1908 p. 480. J. Rendel Harris *Boanerges* Cambridge 1913 p. 17 ff. would connect the Twins with a variety of 'thunder-birds.'

[5] E. Bethe in Pauly—Wissowa *Real-Enc.* v. 1109.

[6] Eur. *Hel.* 140 *ἄστροις σφ' ὁμοιωθέντε φάσ' εἶναι θεώ*, trans. A. S. Way.

Ye who dwell in the halls of the Heavenly Home,
Be nigh her, safe guiding
Helen where seas heave, surges comb,
As o'er waves green-glimmering, crested with foam,
Her galley is riding[1].

Similarly in Euripides' *Elektra* (413 B.C.) the women of Argos salute Klytaimestra as follows:

Hail, Queen of the Argive land!
All hail, O Tyndareus' daughter!
Hail, sister of Zeus' sons, heroes twain
In the glittering heavens mid stars who stand,
And their proud right this, to deliver from bane
Men tossed on the storm-vext water[2].

In the *Orestes* (408 B.C.) Helene shares their prerogative:

For, as Zeus' daughter, deathless must she live,
And shall by Kastor and Polydeukes sit
In folds of air, the mariners' saviour she[3].

iii. The Dioskouroi with Stars in Hellenistic Art.

The art-type of the Dioskouroi, with their heads surmounted by a couple of stars, though common enough in Hellenistic times (fig. 554)[4], especially on coins (fig. 555)[5], has not as yet been discovered on monuments of the strictly Hellenic period[6]. Diodoros, who drew his information from the *Argonautika* or *Argonautai* of

[1] Eur. *Hel.* 1495 ff. trans. A. S. Way. The poet adds *ναύταις εὐαεῖς ἀνέμων | πέμποντες Διόθεν πνοάς*, which marks their connexion with Zeus.

[2] Eur. *El.* 988 ff. trans. A. S. Way. Cp. Eur. *ib.* 1241 f., 1347 ff., *Hel.* 1633 ff., *frag. adesp.* 133 Bergk[4] (= Pind. *frag.* 140[c] Schroeder) *ap.* Plout. *non posse suav. vivi sec. Epic.* 23, *de def. or.* 30.

[3] Eur. *Or.* 1635 ff. trans. A. S. Way. Cp. Eur. *ib.* 1683 ff., Isokr. *Helene* 61.

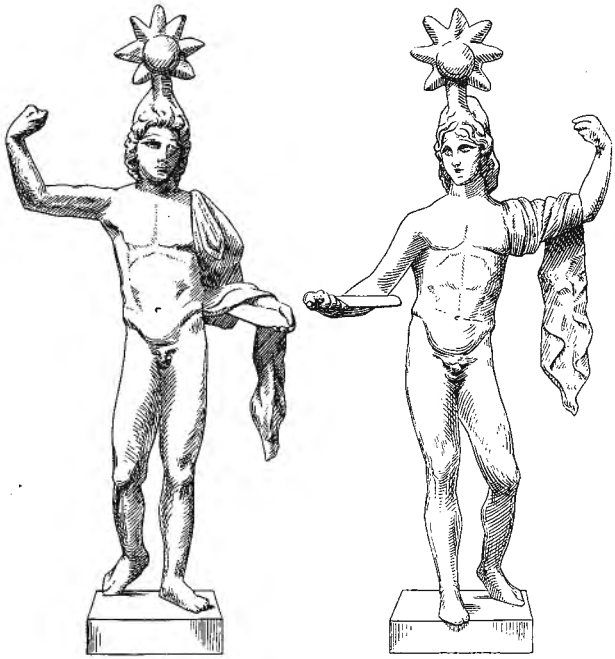
[4] Fig. 554 *a*, *b* representing a pair of bronze statuettes (heights 5⅛ and 5⅞ inches) at Arolsen (R. Gaedechens *Die Antiken des Fürstlich Waldeckischen Museums zu Arolsen* Arolsen 1862 nos. 173, 174) is drawn from casts in the Cambridge collection. The lowered hands hold sheathed swords; the raised arms doubtless leant upon lances. The right foot of fig. 554 *b* is restored. For variations on the same theme see *e.g.* Reinach *Rép. Stat.* i. 487 no. 2, ii. 109 nos. 3, 6, 7, 10, iv. 59 no. 5, *id. Rép. Reliefs* ii. 344 no. 1, iii. 248 no. 5. Cp. *supra* p. 35 fig. 8.

[5] The type dates from the third century B.C. (A. Furtwängler in Roscher *Lex. Myth.* i. 1176 f.). I figure by way of example a silver coin of the Bruttii after Garrucci *Mon. It. ant.* p. 183 pl. 124, 12.

[6] A. Furtwängler *loc. cit.* i. 1171 f. This makes it doubtful whether we can admit H. Pomtow's surmise that the statues of the Dioskouroi at Delphoi by Antiphanes of Argos (soon after 405 B.C.) had stars on their heads (*supra* p. 762).

Polyain. 2. 31. 4 states that Aristomenes the Messenian and a friend once tricked the Lacedaemonians by appearing suddenly in the guise of the Dioskouroi, mounted on white horses and wearing golden stars on their heads (cp. 1. 41. 1, 6. 1. 3, Frontin. *strat.* 1. 11, 8. 9, cited by K. Jaisle *op. cit.* p. 16 n. 6). But little confidence can be placed in the historical accuracy of this trick, and none in its details.

Dionysios Skytobrachion (*s.* ii B.C.)[1], relates that, when the Argonauts were overtaken by a terrible storm, Orpheus prayed to the gods of Samothrace, that straightway the wind ceased, and that,



a *b*

Fig. 554.

to the amazement of all, two stars fell upon the heads of the Dioskouroi; wherefore storm-tossed mariners ever afterwards prayed to the gods of Samothrace and interpreted the presence of the

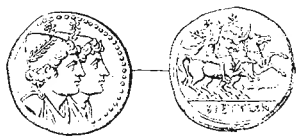


Fig. 555.

[1] E. Schwartz in Pauly—Wissowa *Real-Enc.* v. 929.

stars as an epiphany of the Dioskouroi[1]. This late tale with its confusion of the Samothracian Kabeiroi[2] and the Dioskouroi need not detain us. It may be pure invention on the part of Dionysios, whose credit was none of the best[3]. But in any case the conception of the Dioskouroi with stars hovering over their heads was a natural development from the earlier conception of the Dioskouroi as stars themselves[4]: the progress of anthropomorphism, everywhere dominant in Greek religion, could have led to no other issue.

In passing I would draw attention to a little-noticed series of Etruscan mirrors (*s.* iii—ii B.C.), on which the Dioskouroi are associated with a star or stars. The simplest variety of the type (fig. 556)[5] shows them as two youths facing one another with a star between them. Each is clad in Phrygian cap, short *chitón*, and belt, has one arm only visible and that resting on his hip, and stands beside his shield, which is grounded. Their attitude of arrested motion suggests an original group by Polykleitos or some other sculptor of the Argive school. Further examples unite the twins by means of one? (fig. 557)[6], two (fig. 558)[7], or three (fig. 559)[8] cross-bars, sometimes omitting star or shields or both. These designs recall the *dókana* or 'beams' of the Dioskouroi as described by Plutarch[9] and figured on Spartan reliefs[10]. And, whatever may

[1] Diod. 4. 43, cp. 4. 48.

[6] *Id. ib.* iii. 35 f. pl. 46, 2 (Bologna, two specimens). Gerhard supposes that the connexion here consists of two bars touching each other.

[7] *Id. ib.* iii. 35 f. pl. 46, 3 (from the Thorwaldsen collection).

[8] *Id. ib.* iii. 35 f. pl. 46, 6 (Berlin).

[9] Plout. *de frat. am.* 1 τὰ παλαιὰ τῶν Διοσκούρων ἀφιδρύματα οἱ Σπαρτιᾶται δόκανα καλοῦσιν· ἔστι δὲ δύο ξύλα παράλληλα δυσὶ πλαγίοις ἐπεζευγμένα, καὶ δοκεῖ τῷ φιλαδέλφῳ τῶν θεῶν οἰκεῖον εἶναι τοῦ ἀναθήματος τὸ κοινὸν καὶ ἀδιαίρετον, cp. Eustath. *in Il.* p. 1125, 59 ff. παράγωγον δὲ δοκοῦ καὶ τὰ παρὰ τοῖς παλαιοῖς δόκανα, ὧν χρῆσις καὶ παρὰ Ιλουτάρχῳ (Favorin. *lex.* p. 524, 9 f.). ἦσαν δὲ αὐτὰ Διοσκούρων ἀφιδρύματα, ὡς ἐκεῖνος καὶ ἱστορεῖ καὶ ἐκφράζει, *et. mag.* p. 282, 5 ff. (copied by Zonar. *lex. s.v.* δόκανα, interp. Souid. *s.v.* δόκανα, and Favorin. *lex.* p. 523, 23 f.) δόκανα· τάφοι τινὲς ἐν Λακεδαιμονίᾳ, παρὰ τὸ δέξασθαι τὰς (leg. τοὺς) Τυνδαρίδας, φαντασίαν ἐχούσας (leg. ἔχοντες) τάφων ἀνεῳγμένων. ἢ παρὰ τὸ δοκεῖν, δόκανον. The curious statement that the δόκανα looked like opened tombs perhaps refers to the juxtaposed *amphorae* of the Dioskouroi, which sometimes have snakes coiled about them and might suggest graves of the 'Dipylon' type.

[10] M. N. Tod and A. J. B. Wace *A Catalogue of the Sparta Museum* Oxford 1906 p. 113 f. fig. 14 and p. 193 no. 588.

For gems possibly representing the δόκανα see (1) Furtwängler *Geschnitt. Steine*

be the ultimate explanation of the *dókana*[1], it seems probable that we have here a humanised form of them in which the side-posts

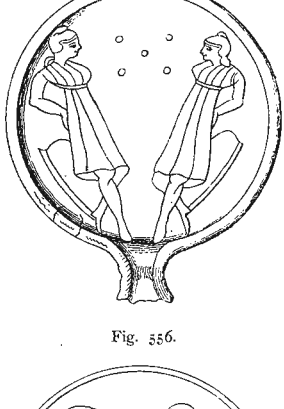

Fig. 556.

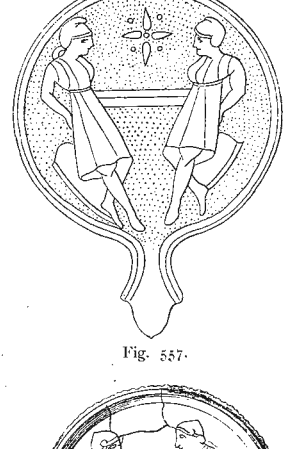

Fig. 557.

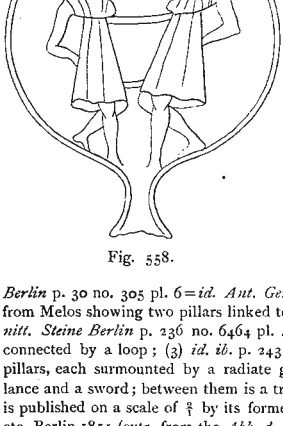

Fig. 558.

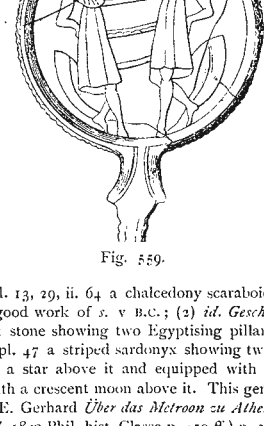

Fig. 559.

Berlin p. 30 no. 305 pl. 6=*id. Ant. Gemmen* i pl. 13, 29, ii. 64 a chalcedony scaraboid from Melos showing two pillars linked together—good work of *s.* v B.C.; (2) *id. Geschnitt. Steine Berlin* p. 236 no. 6464 pl. 45 a black stone showing two Egyptising pillars connected by a loop; (3) *id. ib.* p. 243 no. 6617 pl. 47 a striped sardonyx showing two pillars, each surmounted by a radiate globe with a star above it and equipped with a lance and a sword; between them is a tripod (?) with a crescent moon above it. This gem is published on a scale of ⅔ by its former owner E. Gerhard *Über das Metroon zu Athen* etc. Berlin 1851 (extr. from the *Abh. d. berl. Akad. 1849* Phil.-hist. Classe p. 459 ff.) p. 32 no. 7 pl. 2.

[1] As an object of religious significance this structure of two side-posts with a connecting bar or (for stability's sake) two connecting bars, themselves sometimes connected by

have become anthropomorphic[1], the connecting bar or bars being retained and perhaps accepted in lieu of the missing arms.

Another variety complicates the scene by adding a central pillar. This pillar tapers upwards (fig. 560)[2] or downwards (fig. 561)[3], or takes the shape of a lotus-column (fig. 562)[4] or even of a tree topped by a bird? (fig. 563)[5]. The heads of the heroes may be connected by a regular pediment (figs. 561, 563); and the star between them may be accompanied by two other stars (fig. 563).

several vertical ties, is found over a wide area from west to east. It is akin to some forms of the gateway which in the wall-paintings of Pompeii turns a tree into a temple (*e.g.* Boetticher *Baumkultus* pp. 155 f., 541, 543, figs. 36, 56, 58, 59, etc.: cp. Schrader *Reallex.* pp. 855—863), to the *tigillum sororium* at Rome (H. Jordan—C. Hülsen *Topographie der Stadt Rom in Alterthum* Berlin 1907 i. 3. 322 n. 2, O. Richter *Topographie der Stadt Rom*[2] München 1901 p. 311), and to the *iugum* under which conquered troops were made to pass (*Class. Rev.* 1904 xviii. 369). It resembles, as Miss Harrison has observed (M. N. Tod and A. J. B. Wace *A Catalogue of the Sparta Museum* Oxford 1906 p. 193 n. 1), the *façade* of the temple of the Paphian Aphrodite on coins of Kypros etc. (E. A. Gardner in the *Journ. Hell. Stud.* 1888 ix. 210—215, G. F. Hill in the *Brit. Mus. Cat. Coins* Cyprus p. cxxvii). Further, it is very like a Buddhist tomb at Bangkok (J. Fergusson *Rude Stone Monuments* London 1872 p. 413 f. fig. 177) and the carved *toran* or portal of many an Indian tope (J. Fergusson *History of Indian and Eastern Architecture* rev. by J. Burgess and R. Phené Spiers London 1910 i. 62 ff. figs. 12 and 38). Closer still is its analogy to the *p'ai-lou* or memorial gateways of China (*id. ib.* i. 118 f., ii. 456, 472 ff. figs. 501, 502, 503) and the countless *torii* of Japan (R. A. Cram *Impressions of Japanese Architecture* London 1906 pp. 88, 109 f. pl. 18, F. Hadland Davis *Myths & Legends of Japan* London 1912 p. 225 ff.). The possible connexion of these types is a theme deserving of serious investigation, but not one to be undertaken in a footnote.

My friend Prof. H. A. Giles has most kindly supplied me with a note (Sept. 26, 1913) on the *p'ai-lou*, which may at least serve as a suggestive contribution to the subject:

'*P'ai-fang* and *P'ai-lou* are popular names for the honorific gates put up by the Chinese in honour of chaste wives, filial children, and others. The former is simple in style, consisting of uprights and horizontals; the latter is more ornate, with a roofing turned up at the corners. Neither term is given in the Concordance to Literature (*P'ei wên yün fu*).

'It seems to have been customary, since about B.C. 1000, for the suzerain in feudal times, and for the Emperor in later days, to reward distinguished men and women by the bestowal of some mark of favour, such as a banner, which would be exhibited at the gate of the town or village where the recipient was born. Stone animals are also mentioned; *e.g.* the horse, lion, and elephant. In every case, it was the local gateway which was embellished, the idea being that the fellow-townsmen of the distinguished person should each share in the honour accorded. I can find no record of the date at which isolated gates were first set up, nor any clue to their meaning or symbolism; but it seems very probable that the modern honorific gate is nothing more than the old village gate which was so long associated with the honour that it came eventually to stand for the honour itself.'

[1] The resultant type of the Dioskouroi was, I suspect, not uninfluenced by that of the Kouretes, who—though their origin was very different—were likewise represented as flanking-figures with shields.

[2] Gerhard *Etr. Spiegel* iii. 35 f. pl. 46, 4 (Gerhard's collection).

[3] *Id. ib.* iii. 37 ff. pl. 47, 6 (Naples).

[4] *Id. ib.* iii. 36 f. pl. 46, 9 (London).

[5] *Id. ib.* iii. 36 f. pl. 46, 8 (Paris).

Now several Spartan reliefs of the second century B.C. show the Dioskouroi standing on either side of a pillar-like female figure[1], which has been interpreted as an archaic image of Helene[2]. It is

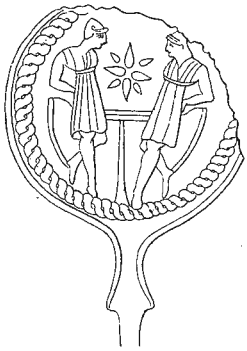

Fig. 560.

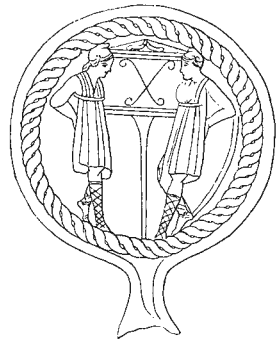

Fig. 561.

Fig. 562.

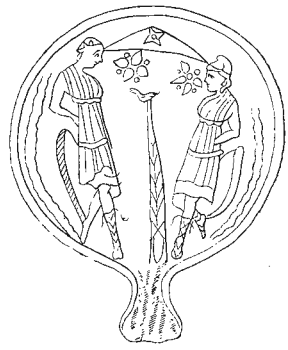

Fig. 563.

therefore probable that the pillar on our mirrors too is the aniconic form of the same goddess, whose star is here seen flanked by her brothers.

[1] A. Conze and A. Michaelis in the *Ann. d. Inst.* 1861 xxxiii. 39 f. pl. D, 1 and 2, A. Furtwängler in Roscher *Lex. Myth.* i. 1167 fig., M. N. Tod and A. J. B. Wace *A Catalogue of the Sparta Museum* Oxford 1906 p. 158 nos. 201—203 figs. 38 f.

[2] A. Conze and A. Michaelis *loc. cit.*, A. Furtwängler *loc. cit.*

The lotus[1] and tree not improbably point to a fertility-cult; and on an isolated mirror (fig. 564)[2] the twins have a thunderbolt[3] (?) between them, and their *amphorae* are modified into vessels from which a stream of water descends to a lotus-bloom below.

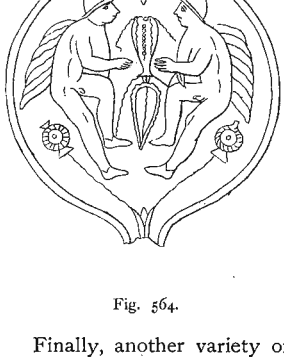

Fig. 564.

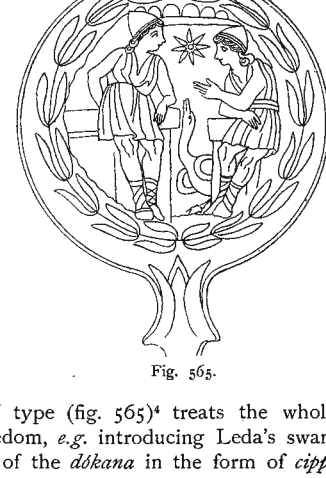

Fig. 565.

Finally, another variety of type (fig. 565)[4] treats the whole group with much greater freedom, *e.g.* introducing Leda's swan, but still retains the side-posts of the *dókana* in the form of *cippi* and, grotesquely enough, joins head to head by a decorated architrave.

iv. The Dioskouroi identified with the Heavenly Twins in Hellenistic Literature.

But we have yet to ask, what were the stars with which the Dioskouroi are associated?

Eratosthenes, or the pseudo-Eratosthenes, identified them with the celestial Twins[5], as did other writers of a late date[6]. Recently

[1] A lotus-bud is the central ornament of the *δόκανα* as figured on a Spartan relief in M. N. Tod and A. J. B. Wace *op. cit.* p. 193 no. 588 fig. 68.

[2] Gerhard *Etr. Spiegel* iii. 36 f. pl. 46, 7 (Gerhard's collection).

[3] The *Τυνδαρίδαι* are sons of *Τυνδάρεως*, the 'Shatterer' (*infra* p. 780 n. 5), an obvious source of thunder and lightning.

[4] Gerhard *Etr. Spiegel* iii. 39 ff. pl. 48, 2 (Naples?), cp. *ib.* pl. 48, 1 (Rome, Museo Gregoriano?).

[5] Pseudo-Eratosth. *catast.* 10.

[6] Hyg. *poet. astr.* 2. 22, cp. Ov. *fast.* 5. 693 ff., Serv. *in* Verg. *Aen.* 6. 121.

this view has been championed by O. Gruppe, who holds that the Dioskouroi were originally none other than the Heavenly Twins[1] and seeks support for his view in the fact that Assyrian mythology gave to the same constellation the name *tuamu rabuti* or 'the Great Twins[2].' But, as Dr J. Rendel Harris makes clear, many features of the Kastor and Polydeukes tradition are of vastly greater antiquity than the zodiac: 'we are at an earlier date in human history than star-gazing and star-naming[3].'

v. The Dioskouroi identified with various Stars by modern writers.

F. G. Welcker, comparing the Aśvins of the *Veda* and analogous pairs of twins found in other Indo-Europaean mythologies, argued that the Dioskouroi were personifications of the morning-star and the evening-star regarded as two, not one[4]. A. Jeremias[5] and H. Winckler[6] would equate them with the sun and moon; O. Gilbert, with day and night[7]. E. Bethe holds that they were not a definite pair of stars, but any stars that shone out through a rift in the storm and seemed to promise safety to the mariners in their distress[8]. But these conjectures are devoid of ancient support and must therefore remain at best purely conjectural.

vi. The Dioskouroi identified with Saint Elmo's Fire in Hellenistic Literature.

In the Hellenistic age, and probably long before that[9], the stars of the Dioskouroi and of their sister Helene were identified with the electrical discharges ('corposants') that play about the spars of ships in stormy weather[10]. This phenomenon is known to have

[9] Cp. the stars dedicated at Delphoi after the battles of Salamis and Aigos Potamos (*supra* p. 761 f.).

[10] I have been unable to procure an actual photograph of these electrical lights. But F. T. Bullen's article on 'St Elmo's Fires' in *Marvels of the Universe*, published by Hutchinson and Co., London, pt. 2 p. 63 f. (a reference supplied to me by my nephew Mr E. N. Cook) has an illustration by A. Twidle showing two such lights on a mast-head

attracted the attention of the Greeks as early as the sixth century B.C.; for Xenophanes (*c.* 576—480) offered a physical explanation of it[1]. It is first expressly referred to the Dioskouroi by Seneca the philosopher, who says:

'In a big storm stars as it were are wont to appear sitting on the sail. Men believe that then in their peril they are being succoured by the divine power of Pollux and Castor. They therefore take heart again, for it is already clear to them that the storm is weakening and the winds dropping: otherwise the fires would be borne about and not stationary[2].'

Many other authors of the imperial age mention the stars of the Dioskouroi as appearing on the rigging of ships at sea[3]. Occasionally the apparition was ascribed to a different source: Polemon, like Diodoros[4], seems to have spoken of the Kabeiroi in this connexion[5], and Arrian says that off the island of Achilles in the Euxine sea Achilles was seen on the mast or on the tip of the yard in place of the Dioskouroi[6].

vii. The Stars of the Dioskouroi and of Helene as a good or bad omen.

Different opinions were entertained with regard to the propitious or unpropitious nature of these signs. Euripides treated Kastor, Polydeukes, and Helene as alike beneficent powers[7]. But a gradual change seems to have come over classical beliefs in this respect.

and a yard-arm. Mr Bullen says: 'St. Elmo's Fire...often covers like a halo the head of a seaman engaged in work aloft, and I myself have several times seen it streaming from my fingers when holding them up for the purpose. I cannot help confessing to a curious feeling of the uncanny on witnessing this phenomenon....Only appearing on the blackest of nights, moving from point to point without apparently passing through the intermediate space, unaffected by fiercest wind or heaviest rain, and insusceptible of being touched or moved, St Elmo's Fires form what is probably the most mysterious and lovely of all the wonderful phenomena belonging to the ocean.' Sir J. J. Thomson informs me (Sept. 22, 1913) that one night in stormy weather he saw St Elmo's fires glimmering on the topmost points of King's College Chapel, Cambridge.

[7] *Supra* p. 763 f.

A distinction was first drawn between the Dioskouroi and Helene. According to Sosibios (*c.* 250 B.C.), the epiphany of Helene was an evil omen[1]—a view perhaps based on a real[2] or fancied etymology of her name[3]. The same thing is said by Solinus (*c.* 250 A.D.)[4]. Pliny[5] and the scholiast on Statius[6] speak of the stars of Pollux and Castor as favourable signs, but describe the star of Helena in terms which point rather—as T. H. Martin showed[7]—to ball-lightning. Pliny writes:

'On mariners' yard-arms and other parts of ships such stars settle with an audible sound, changing their position like birds from perch to perch[8]. When they come one at a time, they are dangerous, indeed they sink ships and, if they fall to the lower parts of the hull, they set it on fire. But twin stars are a good sign and announce a prosperous voyage. It is said that at their approach the dread and threatening star called Helena is put to flight: hence this exhibition of divine power is ascribed to Pollux and Castor, and men invoke them at sea.'

The scholiast on Statius gives much the same account of the matter, adding that the star of Helena is known as Urania, that it makes a hole in the mast, that it bores through the ship's bottom, and that even bronze is melted by its heat. By degrees the Dioskouroi themselves took on the sinister character of their sister. Artemidoros of Ephesos (*c.* 160 A.D.) reflects the transition, when in his *Oneirokritika* he observes:

'The Dioskouroi are a presage of storm to men on a voyage. To men

[1] Sosibios *frag.* 16 (*Frag. hist. Gr.* ii. 628 Müller) *ap.* schol. Eur. *Or.* 1637.

[2] 'Ελένη, as was shown by F. Solmsen *Untersuchungen zur griechischen Laut- und Verslehre* Strassburg 1901 pp. 196, 248 f., is probably to be connected with ἐλάνη, ἐλένη, 'a torch' (Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] p. 135 f., Boisacq *Dict. étym. de la Langue Gr.* p. 237).

[4] Solin. 1. 57.

[5] Plin. *nat. hist.* 2. 101.

[6] Lact. Plac. *in* Stat. *Theb.* 7. 792. The distinction is made by Statius himself (*Theb.* 7. 791 ff., *silv.* 3. 2. 8 ff.).

[7] T. H. Martin *loc. cit.* p. 173.

[8] Lyd. *de ostent.* 5 λιγυρόν τι σύριγμα προσηχοῦντες καὶ ὀρνέων δίκην εἰς τόπον ἐκ τόπου τῆς νεὼς μεθιστάμενοι. This may explain the winged Dioskouroi of the Homeric hymn and of Etruscan art (*supra* p. 763). R. Basset in *Mélusine* 1884—85 ii. 189 writes: 'D'après Mas'oudi (*Prairies d'or*, éd. Barbier de Meynard, t. i, ch. xvi, p. 344—345), en temps d'orage, on aperçoit en haut du mât, un objet qui a la forme d'un oiseau lumineux et qui jette une clarté si vive qu'on ne peut le fixer. Dès qu'on l'aperçoit, la mer se calme, cet objet disparaît sans qu'on sache ce qu'il est devenu. Le fait fut attesté à Mas'oudi par des marchands de Basrah, de l'Oman et de Siraf. Dans la Méditerranée, on appelait cet objet *Es sari* (le voyageur de nuit), dans la mer de Chine *Ed douli*.' In the north-east of Scotland these electrical discharges are known as 'Corbie's aunt' (the Rev. W. Gregor in the *Folklore Journal* 1883 p. 396, cp. *The Folk-lore of the North-East of Scotland* London 1881 p. 137), presumably a popular distortion of the name 'corposant.'

ashore they are a sign of tumult, law-suits, war, or grievous disease. But at the last they let men go scatheless from all dangers, and such as are already involved in any of these alarms they speedily deliver. For the gods are saviours, but saviours of those that have previously been in some fear or peril[1].'

Porphyrion notes that in his day (the third century A.D.) sailors regarded the stars of Castor and Pollux as commonly hostile to ships[2]. Fulgentius the mythographer (*c.* 480—550 A.D.), after moralising in his tasteless way about Iupiter and Leda, continues:

'But Castor and Pollux stand for perdition, wherefore at sea too they spoke of the signs of the Castores, which create danger[3].'

In modern times the process of degradation has gone further still. Mr G. F. Abbott in his *Macedonian Folklore* remarks that the electric phenomena once ascribed to the Dioskouroi 'are by the modern Greek mariners called [*Telónia*][4] or "Devils" and treated as such: the sailors look upon them as presages of disaster and try to frighten them away by dint of exorcisms and loud noises—an instance of beneficent pagan deities degraded to the rank of malignant demons[5].' The name *Telónia* has had a curious history[6]. N. G. Polites states that it meant originally demons acting as publicans or custom-house officials and so hindering souls from a free entrance into heaven. The same authority informs us that these *Telónia* are believed to snap the mast and sink the ship: hence, directly they appear, the sailors have recourse to prayers, burn incense, recite incantations from the *Key of Solomon*, discharge fire-arms, pull the tails of pigs, in short do anything and everything calculated to scare away the dreaded powers[7].

viii. Saint Elmo's Fire.

Throughout the Mediterranean and the western coasts of Europe the same phenomenon is viewed sometimes as a good, sometimes as an evil sign[8]. It is commonly called the 'fire of Saint Elmo'—a name which has many variants[9] and has been

[9] These are collected in *Mélusine* 1884—85 ii. 112 f. (cp. *ib.* 112 ff., 138 ff., 189, 255 f., 382): *e.g.* Italian *fuoco di Sant' Elmo, luce di Santo Ermo, Sant' Ermo*, Sardinian *fogu de S. Elmu*, Genoese *fêugo de Sant' Emo*, French *feu Saint-Elme*, sailors' French *feu Saint-Erme*, Provençal *fué Sant Eoumé, fio de Sant Eùme, lume Sant Eùme*, Bouches-du-

explained in more ways than one. Apart from the inevitable 'Semitic guess[1],' modern scholars have sought to derive it from *elmo*, the Italian form of the German *Helm*[2], or from *Hermes*[3], or even from *Helena*[4]. Others again advocate a connexion with Saint *Erasmus*[5], a mediaeval patron of mariners, and K. Jaisle has succeeded in citing the intermediate forms *Santeramo*, *Santeremo*, *Santermo*[6]. Finally, Dr J. Rendel Harris argues that 'St Erasmo ...is a modification of St Remo, i.e. of the Roman Twin[7].' Probably the last word in this interesting controversy has not yet been written. Be that as it may, Saint Elmo's fire is also attributed to Saint Nicolas[8], Saint Clara[9], etc. And, just as ancient Italian sailors referred one star to Helena, two to Castor and Pollux, so modern French sailors ascribe two to Saint Elme and Saint Nicolas, three or four to the added presence of Sainte Anne or Sainte Barbe[10].

It appears, therefore, that for nearly two thousand years the stars of the Dioskouroi and of Helene have been identified with these ominous electrical phenomena. To me it seems probable that from the first they bore the same meaning. If Zeus was the god of the bright sky, such atmospheric illuminations might well be referred to his children. I am, however, very far from thinking that we have reached the ultimate significance of the Dioskouroi when we have succeeded in connecting their stars with the fire of Saint Elmo. It would be truer to say that we have been reading the last and in some respects the least interesting chapter of a lengthy story. The contents of the previous chapters must be sought in the keen-witted works of my friend Dr Rendel Harris[11].

§ 9. *General Conclusions with regard to Zeus as god of the Bright Sky.*

Having advanced thus far in our main enquiry we must pause to take our bearings afresh. A brief survey of the ground already traversed will enable us to apprehend better the position that we have reached, and will fittingly close the first stage of our journey.

Zeus, whose name means 'the Bright One,' was originally conceived in zoïstic fashion as the bright sky itself—a conception that has left its mark on the language and literature of ancient Greece[1].

The change from the zoïstic to the anthropomorphic Zeus was occasioned, not by any despair of magic, but rather by a naïve attempt to express heaven in terms of earth. The divine sky, as supreme weather-maker, was represented under the guise of an ordinary human magician or weather-ruling king[2]. This transition, which had been accomplished well before the end of the second millenium B.C., meant that Zeus was no longer worshipped as the sky but as the sky-god. Yet his earlier character can still be surmised from the cult-titles and art-types of a more sophisticated age. Behind Zeus *Aithérios* and Zeus *Aíthrios*, if not also behind Zeus *Amários*, Zeus *Díos*, and Zeus *Lýkaios*, we detect the old-world cult of the day-light sky[3]. Again, when Hellenistic artists portray Zeus with a blue *nimbus* round his head[4], a blue globe at his feet[5], a blue mantle wrapped about his loins[6], what are these attributes, taken together, but an indication that the god so portrayed was once the blue sky and the blue sky only?

As god of the bright or burning sky, Zeus dwelt in *aithér*, the most exalted portion of the celestial vault[7]. And, since high mountains were supposed to rise above the lower zone of *aér* and to penetrate the upper zone of *aithér*, mountain-tops were regarded as in a peculiar sense the abode of Zeus[8]. His mountain-cults can be classified in a roughly chronological series according as they involved a mere altar, or an altar with a statue of the god, or an altar with a statue enclosed in a temple[9]. Further, the mountain that dominated the district was often looked upon as his throne—a prerogative that he appears to have inherited from Hittite predecessors[10]. Mythology associated Zeus with the mountain in a variety of ways. There he had been born[11]. There he consorted

with his partner, the mountain-goddess[1]. There, in one famous case, he lay buried[2]. And, when paganism, outwardly at least, succumbed to Christianity, Zeus the mountain-god was superseded by Elias the mountain-saint[3].

Apart from the luminous dome of heaven, there are in normal circumstances three definite manifestations of the burning sky. To the mind of the Greek, sun, moon, and stars were made of the same fiery stuff as the *aithér* itself[4]. Zeus, therefore, must needs stand in relations of peculiar intimacy towards these special exhibitions of his own brightness. This was probably the consideration that, to the more thoughtful portion of the community, justified the *rapprochement*, which from a very early period in the history of Greece began to contaminate the pure worship of Zeus with a whole medley of solar, lunar, and stellar elements. In various districts of the Mediterranean area the sun was popularly viewed as an eye[5], a wheel[6], a bird[7], a ram[8], a bull[9], a bronze man[10], or what not? But each of these manifold and in part barbaric notions was sooner or later absorbed into the all-comprehensive cult of the Greek sky-god. Again, here and there the moon as Selene[11], as Io[12], as Pasiphae[13], as Europe[14], as Antiope[15], was paired with Zeus—a pairing which implies that he was credited with solar powers. For this batch of myths non-Hellenic influence is even more largely responsible. Lastly, Zeus figures on occasion as ruler of the starry sky[16]. The Greeks, mediately or immediately following the lead of the Babylonians, assigned to him as their foremost god an important *rôle* in their astronomy and astrology[17]. They also associated, perhaps as early as the fifth century before our era, his adoptive sons the Dioskouroi with the electric stars now known as Saint Elmo's fire[18].

In short, Zeus was brought into close connexion with any and every celestial luminary. But, though this is undoubtedly the case, it must be steadily borne in mind that genuine Hellenic religion never identified Zeus with sun or moon or star. If an

inscription records the cult of Zeus Helios[1], if a coin represents Zeus with the moon on his head[2], if a myth tells of Zeus transforming himself into a star[3], we may be reasonably sure that inscription, coin, and myth alike belong to the Hellenistic age, when—as Cicero puts it[4]—a Greek border was woven on to the barbarian robe.

To disentangle the complex threads of syncretism is seldom an easy task; and here I cannot hope to have attained more than a limited measure of success. Still, it seemed worth while to attempt the analysis of such far-reaching cults as those of Zeus *Ámmon*[5], Zeus *Sabázios*[6], Iupiter *Heliopolitanus*[7], Iupiter *Dolichenus*[8],—cults which swept across the ancient world from north to south, from east to west.

Zeus *Ámmon* was found to be a Graeco-Libyan god, originally worshipped in the Oasis with rites similar to those of Zeus *Náios* at Dodona[9], but later fused firstly with the Theban Âmen-Râ[10] and secondly with the Punic Ba'al-ḥammân[11]. Zeus *Sabázios* proved to be a Phrygian deity[12] closely resembling the Orphic Zeus, the parallelism of Phrygian and Orphic cults being explained by the fact that both alike were offshoots of the old Thraco-Phrygian religion[13]. Further, since the Graeco-Libyan Zeus *Ámmon* and the Thraco-Phrygian Zeus *Sabázios* were ram-gods of identical character, it appeared probable that ultimately the former was akin to the latter; and it was conjectured that sundry traces of the same remote original might be seen scattered up and down in the cults and myths of classical Greece and Italy[14].

Iupiter *Heliopolitanus* was the Roman name of Zeus *Ádados*, the great god worshipped at *Ba'albek* or Heliopolis[15]. Zeus *Ádados* in turn was essentially a Grecised (and subsequently Egyptised) form of the Syrian Adad, who both at Heliopolis and at Hierapolis had not improbably succeeded to the position once occupied by the Hittite father-god Tešub[16]. The cult-image of Zeus at Heliopolis stood with a bull on either hand[17]. That of Zeus at Hierapolis is described as 'sitting upon bulls' and figured with two bulls as

the supporters of its throne[1]. Obviously the Heliopolitan and the Hierapolitan gods were near relatives; and kindred deities flanked by a pair of recumbent bulls occur on the coinage of other Syrian towns[2]. Again, Zeus *Dolichaîos*, better known as Iupiter *Dolichenus*, the god of Doliche in Kommagene[3], appears to have borrowed the bull on which he habitually stands from Tešub, who on Hittite monuments has a bull either at his side or beneath his feet[4]. On this showing it is possible, and even probable, that both Iupiter *Heliopolitanus* and Iupiter *Dolichenus* have preserved to us essential features of the Hittite father-god.

The discussion of the foregoing cults served to bring out a certain analogy subsisting between the ram and the bull in Levantine religion[5]. These two beasts had been treated from time immemorial as embodiments of procreative power, the former by a pastoral, the latter by a cattle-breeding population. As such they were associated *in primis* with the fertilising sky-god[6]; and I have suggested that the victims sacrificed to Zeus were commonly either oxen or rams just because these animals more than others[7] were charged with *Zeugungskraft* and would therefore be thought to increase the power of the god to fertilise and bless[8].

Indeed, it may be claimed that throughout the present volume this conception of Zeus as a procreative god has come gradually into greater prominence. From first to last he was worshipped as a Father: and the invocation *Zeû páter*, familiar to us from the Homeric poems, became stereotyped on Italian soil as the name *Iupiter*[9].

Two other results of general significance have emerged from the mass of detail considered in this book. Zeus as sky-father is in essential relation to an earth-mother. Her name varies from place to place and from time to time. Sometimes she is a mountain-goddess with little or no disguise—Mousa[10], Koryphe, Aitne, Kyllene, Taygete, or the like[11]. Sometimes she is an earth-goddess that has developed into a vegetation-goddess—Demeter,

[1] *Supra* pp. 583 f., 586.

[4] *Supra* pp. 604—606, 639—644.
[5] *Supra* p. 430.
[6] *Supra* pp. 428—430, 633—635.
[7] Yet in Crete (*supra* pp. 401, 501) and in Karia etc. (*supra* p. 717 n. 3) Zeus was associated with the goat, as was Dionysos in Lakonike, at Metapontum, etc. (*supra* pp. 674 f., 705)—doubtless for the same reason.
[8] *Supra* p. 716 ff.
[9] *Supra* p. 14. Geographically intermediate between the Greek Ζεὺς πατήρ and the Latin *Diespiter* is the Stymphaean Δειπάτυρος (*supra* p. 681 n. 4).
[10] *Supra* pp. 104—106.
[11] *Supra* pp. 154—157.

it may be, or Persephone[1], or Nemesis[2]. Sometimes she has lapsed from the position of an earth-goddess or a vegetation-goddess into that of a heroine—Semele[3], or Europe[4]. But everywhere and always, either patent or latent, the earth-mother is there as the necessary correlative and consort of the sky-father.

Finally, the union of the sky-father with the earth-mother did not remain unfruitful. In the Dorian states the twin sons of *Tyndáreos*, the 'Shatterer[5],' were aptly affiliated to Zeus, and at least as early as the seventh century B.C.[6] were renamed the Dioskouroi[7]. But in the region occupied by the ancient Thraco-Phrygian stock Zeus begat a son in his own image, Dionysos the god of animal and vegetable life[8], whose worship little by little spread through the whole of Greece and everywhere inspired fresh triumphs of religion, literature, and art. Not once, nor twice, but many times in our survey of the Mediterranean lands—in the Archipelago[9], at Kyrene[10], in Magna Graecia[11], in Crete[12], at *Ba'albek*[13], and elsewhere—we have had occasion to notice the younger god side by side with the older god, of whom he was in a sense the second self.

The sky-god, the earth-goddess, and their offspring the life of the world are thus already before us; but as yet in imperfect outline. The more definite and detailed account of their interrelations we must reserve for another volume.

ADDENDA

Page 10 note 1: on the Persian sky-god. Prof. J. H. Moulton pursues the topic in his recent and masterly work *Early Zoroastrianism* London 1913 p. 391 n. 3. I quote the following: 'There is now a full discussion of the point in Bartholomae, *Zum Air Wb*, 172—4, starting from a note in Hesychius, Δῖαν· μεγάλην ἢ ἐνδοξον· τὸν οὐρανὸν Πέρσαι. Clearly, if the old lexicographer was thinking of Herodotus he had some reason for dissociating Δία there (and Διί) from Ζεύς, for he selects the accusative of the fem. adj. δῖα, common in Homer. Now *Διᾶν would represent the acc. of O.P. **Dyauš* almost exactly. May we not conjecture that Hesychius had evidence prompting him to desert the obvious Ζεύς in Herodotus, even though Διί just before would not fit δῖα? We have strong reason for expecting to find *Dyauš* in Persia, since he belongs to the Vedic pantheon, though his cult is evidently dying. Bartholomae cites Διαΐξις, the name of a Persian noble in Æschylus, *Persæ*, 977. It is either **divai·χšiš*, "ruling in the sky," or **divai·šiš*, "dwelling in the sky." (I think *divai* and *dyavi* may be alternative forms of the locative, related like χθονί and χαμαί, with Skt *divi*=Διΐ as a mixture.) Bartholomae suggests that the Thracian sage Ζάμολξις had a Scythian (and so Iranian) name, *zamar·χšiš*, "qui regnat in terra." (Since the cognate Thracian had the required λ in the name for Earth, witnessed by Σεμέλη, we need not perhaps make Zamolxis a foreigner in Thrace.) But what were those Persian aristocrats thinking of when they named their infant, on either etymology? Can we explain *qui regnat in cælo* by the doctrine of the Fravashi? If the heavenly counterpart had royal rank, the rank of the earthly double should correspond, and match the parents' ambition.'

Page 37 note 1: on the great altar of Zeus at Olympia. See now L. Weniger 'Der Hochaltar des Zeus in Olympia' in the *Neue Jahrb. f. klass. Altertum* 1913 xxxi. 241—260 with 3 figs.

Page 45: on the type of Iupiter *Capitolinus* in the temple rebuilt by Titus and Domitian. Two bronze medallions of Hadrian, published by Gnecchi *Medagl. Rom.* iii. 20 nos. 98 f. pl. 146, 6 (=my fig. 566) and 5, have as reverse type the three Capitoline deities. Behind Iupiter is Victory, wrongly described by Gnecchi as an eagle, holding a wreath.

Fig. 566.

Page 45: on Iupiter *Capitolinus* with globe in right hand, sceptre in left. In the Ἐφ. Ἀρχ. 1912 p. 263 f. figs. 1, 1′ K. K. Phylaktou publishes a rock-crystal from Kypros engraved with a Iupiter of this type: Victory flies towards him, an eagle is perched on his footstool, and a star fills the space behind his throne. Mr Phylaktou's interpretation (Iulius Caesar as a bearded Zeus *Olympios* with the *Iulium sidus*) is improbable.

Page 48 fig. 21 sarcophagus-relief in the Capitoline Museum. See now Reinach *Rép. Reliefs* iii. 206 no. 1 and the *Mus. Capit. Cat. Sculpt.* p. 264 Stanza dei Filosofi no. 109 pl. 62. The latter characterises the relief as 'Rough Roman work' and, like the former, suggests Hebe as a possible name for the shield-bearing figure. I adhere to my view that she is more probably Victory.

Page 58 note 1: on Iupiter *Purpurio*. Cp. *Corp. inscr. Lat.* xiv no. 3469 (*alla chiesa di S. Giovanni di Agosta, prossimo alla fonte*) Iovi opt. [max. Purpuri]|oni Iunoni Mine[rvae]| C. Servilius etc., where *Purpurioni* was a suggestion of Mommsen.

Page 80 note 4: on were-wolves. To the bibliography add now Elliott O'Donnell *Werwolves* London (1913) pp. 1—292.

Page 92 f.: on a *kýlix* representing Zeus *Lýkaios*. My friend Mr P. N. Ure informed me some time since that the Museum at Taranto possesses a 'Laconian' *kýlix* closely resembling that in the Louvre (*supra* p. 93 fig. 65). On a recent visit to Taranto he kindly examined the cup on my behalf and reports (March 18, 1914) that it was found at *Bascino di Carriuagio fuori la città* along with a Corinthian *aryballos*, and that its design is practically the same as that of the Louvre *kýlix*, the only noteworthy differences being: (*a*) Zeus faces to left; the ornamentation of his clothes is simpler; his seat appears to be a chair rather than an altar; and he has no footstool. (*b*) The bird is somewhat larger and flies to right. (*c*) The field is plain, without rosettes.

Page 109: on Axieros, Axiokersa, Axiokersos. W. H. Buckler and D. M. Robinson in the *Am. Journ. Arch.* 1913 xvii. 367 propose a new derivation of these names: ''Αξιόκερσος (="snake-ram"; from *anghw*, snake, and the root of *κέρας*, horn)...and 'Αξίερος (="snake sheep," from *anghw* and the root of *εἶρος* or *ῥέρος* wool-).' Their suggestion is highly precarious.

Page 147 f.: on the pillar-throne at Phalasarna. In the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1907 pp. 589—598 with 3 figs. S. Ronzevalle publishes a small limestone throne of Hellenistic date, found near Tyre. The supports of the throne are two winged sphinxes, Egyptian in character. The seat is treated as an Egyptian cornice, below which is carved a symbolic vegetable design in Egypto-Assyrian style. Projecting from the front side of the throne-back are two round-topped *stêlai*, which bear two figures facing each other in low relief, *viz.* a goddess and a beardless dedicant, with very similar costume (tunic, sleeved mantle?), attribute (sceptre), and gesture (benediction and greeting?). The plinth is inscribed

לרבתי לעשתרת איש בנו הקרב
איש לי אנך עבראבסת בן בדבעל

Ronzevalle renders: '*A ma dame, Astarté, ici figurée, a été consacrée ma propre effigie, à moi, Abdoubast, fils de Bodba'al.*' My friend Mr N. McLean would prefer to translate: 'To my lady Ashtoreth who is within (? the throne) has been offered that which is mine—I Abdubast son of Bodbaal.' Ronzevalle notes the obvious attempt on the part of the royal or priestly worshipper to assimilate himself as far as possible to the goddess, whose throne he shares.

Page 177 note 0: on Saint George as Zeus *Georgós*. That Zeus *Georgós* was superseded by Saint George at Lydda (Diospolis) is maintained also by E. Krause *Die Trojaburgen Nordeuropas* Glogau 1893 p. 206 f.

Page 178 note 0: on Saint George as dragon-slayer. To the bibliography add now J. B. Aufhauser *Das Drachenwunder des heiligen Georg* (Byzantinisches Archiv v) Leipzig and Berlin 1911 pp. 1—254 with 19 figs., Géza Róheim *Drachen und Drachenkämpfer* (Erweiterter Separat-Abdruck aus "Jung-Ungarn," Jahrgang 1911) Berlin 1912 pp. 1—56, N. Page 216 fig. 159 red-figured *kýlix* at Berlin. L. Malten in the *Jahrb. d. kais. deutsch. arch. Inst.* 1912 xxvii. 254 fig. 11 (on p. 257) publishes a photograph of this vase, but does not deal at length with its interpretation (Dionysos? Hephaistos? Triptolemos?).

Page 223: on Triptolemos with the plough. In the Roman villa at Brading, Isle of Wight, a mosaic on the floor of room no. 12 shows in one of its panels Demeter presenting corn-ears to Triptolemos: she is clad in *chitôn* and *himation*, and holds sceptre in left, corn in right hand; he has a *chlamýs* over his shoulders and grasps a plough with his left hand. See further *Transactions of the Royal Institute of British Architects* 1880—81 p. 138 f. with pl.

Kýlix at Taranto: Zeus *Lýkaios*.

See page 782.

[From a photograph kindly supplied by Mr Q. Quagliati, Director of the Museum at Taranto.]

Page 227 fig. 166 relief from Gharfin. R. Dussaud *Notes de mythologie syrienne* Paris 1905 p. 153 f. fig. 36 regards this as a representation of Adonis-Esmun identified with Triptolemos.

Page 232 ff. : on a coin of Gaza (?). Mr G. F. Hill in the *Brit. Mus. Cat. Coins* Palestine pp. lxxxvi ff. 181 pl. 19, 29 describes the series to which this coin belongs as 'Philisto-Arabian.'

Page 240 f.: on the hawk as a solar bird. A fragment of a hawk found at Apollonia (*Arsûf*) with a disk round its neck inscribed ΙΟΥΛΙΑΝΟϹ (C. Clermont-Ganneau *Mission en Palestine et en Phénicie* p. 134 no. 121 pl. 2, H) is taken by R. Dussaud to be an emblem of the emperor Julian as sun-god (R. Dussaud in the *Mission dans les régions désertes de la Syrie moyenne* p. 478 n. 1 and in the *Rev. Arch.* 1903 i. 351).

Page 241: on the hawk as sacred to solar deities in Egypt. See now T. Hopfner *Der Tierkult der alten Ägypter nach den griechisch-römischen Berichten und den wichtigeren Denkmälern* (*Denkschr. d. Akad. Wien* 1913 ii Abh.) Wien 1913 pp. 107—113.

Page 259 note 3: on *iynx*-wheels in temples. The vase cited as illustrating the temple of Hera at Thebes (?) is explained by F. Hauser in the *Jahresh. d. oest. arch. Inst.* 1913 xv. 169 fig. 108 as representing the Locrian maidens in the temple of Athena at Ilion.

Page 285 note 1: on the magical disk from Pergamon. R. Ganschinietz in the *Archiv f. Rel.* 1914 xvii. 346 f. cites parallels.

Page 296 fig. 219 a Thraco-Macedonian coin. J. N. Svoronos in the *Journ. Intern. d'Arch. Num.* 1913 xv. 201 ff. figs. 1—13 attributes this coin to the Paiones and, like P. Gardner, interprets its type as the sun-god carrying his disk: 'On peut donc conclure que l'inexplicable symbole n'est rien d'autre que le Soleil, *solis rota*, le *στρέφων κύκλος, κόσμου τὸ περίδρομον ὄμμα, χρυσέας ἡμέρας βλέφαρον, πανόπτης κύκλος* Ἡλίου, *Διὸς ὀφθαλμὸς* mundi oculus (Comparez les monnaies de Skione où le symbole ⊙ prend la forme complète d'un œil, [Babelon pl. LII, 4]) etc. et servait à indiquer au public que les pièces qui le portaient sortaient des ateliers péoniens renommés pour leur excellent métal et que leur pureté métallique était sous la garantie et surveillance du *Διὸς ὀφθαλμός*. En outre ce signe conservait son caractère sacré qui se rapportait au grand dieu de ce peuple, le Soleil. Celui-ci avait son culte central sur le sommet du Pangée même, source de la richesse des Péoniens. C'est là...qu'on a frappé la pièce...au type de la figure qui représente probablement le Soleil même portant son disque.'

Page 299 note 6: on *ὁ καλούμενος αὐλός, ἡ ἀρχὴ τοῦ λειτουργοῦντος ἀνέμου*. R. Eisler *Weltenmantel und Himmelszelt* München 1910 ii. 365 n. 2 explains this *αὐλός* by reference to Anaximander *Frags.* 21 Diels (*τὸν ἥλιον*) *κύκλου εἶναι...ἁρματείῳ τροχῷ παραπλήσιον, τὴν ἀψῖδα ἔχοντα κοίλην, πλήρη πυρός, κατά τι μέρος ἐκφαίνουσαν διὰ στομίου τὸ πῦρ ὥσπερ διὰ πρηστῆρος αὐλοῦ*, 11 Diels *τὰ δὲ ἄστρα...κύκλον πυρός,...περιληφθέντα δ' ὑπὸ ἀέρος. ἐκπνοὰς δ' ὑπάρξαι πόρους τινὰς αὐλώδεις, καθ' οὓς φαίνεται τὰ ἄστρα*. Eisler takes both the so-called *Mithrasliturgie* and the teaching of Anaximander to be dependent upon Persian ideas.

Page 310 f.: on Aristophanes' speech in Plato's *Symposium*. K. Ziegler 'Menschen- und Weltenwerden' in the *Neue Jahrb. f. klass. Altertum* 1913 xxxi. 529—573 traces the views of the Platonic Aristophanes to a contamination of Empedoclean ideas with an Orphic, and ultimately Babylonian, anthropogony.

Page 338 note 2: on the Persian chariot of Zeus. Cp. the Zoroastrian account in Dion Chrys. *or.* 36 p. 92 ff. *Ἕτερος δὲ μῦθος ἐν ἀπορρήτοις τελεταῖς ὑπὸ Μάγων ἀνδρῶν ᾄδεται θαυμαζόμενος, οἳ τὸν θεὸν τοῦτον (*sc. *τὸν Δία*) *ὑμνοῦσιν ὡς τέλειόν τε καὶ πρῶτον ἡνίοχον τοῦ τελειοτάτου ἅρματος. τὸ γὰρ Ἡλίου ἅρμα νεώτερόν φασιν εἶναι πρὸς ἐκεῖνο κρινόμενον, φανερὸν δὲ τοῖς πολλοῖς, ἅτε προδήλου γιγνομένης τῆς φορᾶς. θέσιν κοινῆς φήμης τυγχάνειν, ὡς ἔοικεν, ὑπὸ πρώτων σχεδόν τι τῶν ποιητῶν, ἀνατολὰς καὶ δύσεις ἑκάστοτε λεγόντων, καὶ κατὰ ταῦτα πάντων ἐξηγουμένων ζευγνυμένους τε τοὺς ἵππους καὶ τὸν Ἥλιον αὐτὸν ἐπιβαίνοντα τοῦ δίφρου. τὸ δὲ ἰσχυρὸν καὶ τέλειον ἅρμα τοῦ Διὸς οὐδεὶς ἂρα ὑμνησεν ἀξίως τῶν τῇδε, οὔτε Ὅμηρος, οὔτε Ἡσίοδος, ἀλλὰ Ζωροάστρης, καὶ Μάγων παῖδες ᾄδουσι παρ' ἐκείνου μαθόντες· ὃν Πέρσαι λέγουσιν ἐρωτι σοφίας καὶ δικαιοσύνης ἀποχωρήσαντα τῶν ἄλλων καθ' αὑτὸν ἐν ὄρει τινὶ ζῆν· ἔπειτα ἀφῆναι τὸ ὄρος, πυρὸς ἄνωθεν πολλοῦ κατασκήψαντος, συνεχῶς τε καίεσθαι. τὸν οὖν βασιλέα σὺν τοῖς ἐλλογιμωτάτοις Περσῶν ἀφικνεῖσθαι πλησίον, βουλόμενον εὔξασθαι τῷ θεῷ· καὶ τὸν ἄνδρα ἐξελθεῖν ἐκ τοῦ πυρὸς ἀπαθῆ, φανέντα δὲ αὐτοῖς ἴλεων θαρρεῖν κελεῦσαι καὶ θῦσαι θυσίας τινάς, ὡς ἥκοντος εἰς τὸν τόπον τοῦ θεοῦ. συγγενέσθαι τε μετὰ ταῦτα οὐχ ἅπασιν, ἀλλὰ τοῖς ἄριστα πρὸς ἀλήθειαν πεφυκόσι καὶ τοῦ θεοῦ ξυνιέναι δυναμένοις, οὓς Πέρσαι Μάγους ἑκάλεσαν, ἐπισταμένους θεραπεύειν τὸ δαιμόνιον·*

οὐχ, ὡς Ἕλληνες, ἀγνοίᾳ τοῦ ὀνόματος, οὕτως ὀνομάζουσιν αὐτοὺς γόητας. ἐκεῖνοι δὲ τά τε ἄλλα δρῶσι κατὰ λόγους ἱεροὺς καὶ δὴ τῷ Διὶ τρέφουσιν ἅρμα Νισαίων ἵππων· οἱ δέ εἰσι κάλλιστοι καὶ μέγιστοι τῶν κατὰ τὴν Ἀσίαν· τῷ δέ γε Ἡλίῳ ἕνα ἵππον. κ.τ.λ.

Page 360: on snakes in Egyptian religion. See now T. Hopfner *Der Tierkult der alten Ägypter nach den griechisch-römischen Berichten und den wichtigeren Denkmälern* (*Denkschr. d. Akad. Wien* 1913 ii Abh.) Wien 1913 pp. 136—149.

Page 379 note 7: on recent journeys to the Oasis of Siwah. To the bibliography add now J. C. Ewald Falls *Siwah, Die Oase des Sonnengottes in der libyschen Wüste* Mainz, Kirchheim 1910 (noted by A. Wiedemann in the *Archiv f. Rel.* 1914 xvii. 206 f.) and J. C. Ewald Falls (*Kaufmann expedition*) *Three Years in the Libyan Desert* trans. E. Lee London 1913 pp. 262—290 ('With the Viceroy to the Oasis of Amon—an historic progress through the desert in the steps of Alexander the Great'). Falls figures *Ain Mûsa, Umma beida*, a sculptured lion from the *Amméneion* now in the Frankfurt Museum, etc.

Page 396 note 1: on the snake as phallic. See now E. Küster *Die Schlange in der griechischen Kunst und Religion* Giessen 1913 p. 84, p. 99 n. 6, p. 149 ff.

Page 418 note 1: on the ram as figure-head of Phrixos' ship. So also schol. Plat. *Menex.* 243 A.

Page 430 ff.: on the bull and the sun in Egypt. See now T. Hopfner *Der Tierkult der alten Ägypter nach den griechisch-römischen Berichten und den wichtigeren Denkmälern* (*Denkschr. d. Akad. Wien* 1913 ii Abh.) Wien 1913 p. 68 ff. (pp. 76—86 Der Apis, p. 86 f. Der Mnevis, p. 88 Der Bakis, p. 88 f. Der Onuphis).

Page 442: on priests and priestesses with animal names. E. Neustadt *De Jove Cretico* Berlin 1906: 'Theraea...exstat inscriptio (J. G. XII 3, 418) de qua Hiller v. Gaertringen haec adnotat: "Prope ecclesiam *Χριστός* appellatam versus occidentem quinque sellae sive araе ex ipsa rupe exsculptae sunt. Praeter eas duo foramina stelis recipiendis idonea ibi incisa sunt." Ibi inscriptum est: ΤΣ ΔΑΜΑΤΡ[Ο]Σ [ΚΑΙ (?)] Κ[Ο]Ρ[ΑΣ]. "Ante Τ nulla litterarum vestigia vidi. Quamobrem supplementum *[ἱερε]ύς* reiciendum esse censeo." Ac profecto hic quodlibet supplementum ad irritum cadit; primum enim utique de *ἱέρεια* tantum agi potest; deinde id quod homines prava coniectura inferre volunt exhibetur: *ὗς* enim Cereris certo non aliter intellegi debet quam *πῶλοι* Cereris, *ἄρκτοι* Dianae, *βόες* Bacchi,' etc. But in *Inscr. Gr. ins.* iii Suppl. no. 418 F. Hiller von Gaertringen says: '*[ἱερε]ύς* reposui *Thera* I 200, ubi imago est photographica (*S G D I* 4758).' F. Blass in Collitz-Bechtel *Gr. Dial.-Inschr.* iii. 2. 176 no. 4758 prints ΤΣ Δάματρ[ο]ς ..K.P... and comments: '*Τς Δάματρος* [*καὶ*] Κ[ό]ρ[*ας* HvG.; doch sei für *καὶ* der Raum eigentlich zu klein. Vor ΤΣ habe er keine Spuren von Schrift bemerkt; also nicht [*ἱερε*]*ύς*. Doch *ἱερεύς* nach Thera 1. 200 (wo Abbildung).'

Page 482 note 1: on the *κεράτινος βωμός* of Delos. F. Courby 'L'autel de cornes à Délos' in the *Mélanges Holleaux* Paris 1913 pp. 59—68 would identify this altar with the apsidal monument in the western part of the precinct of Apollon. But??

Page 501 f.: on a bell-*krater* representing Herakles in Olympos. This vase should have been described as Campanian, not Athenian.

Page 504: on a coin of Nysa showing a bull carried by six youths. Variants are listed by Rasche *Lex. Num.* v. 1641 f. and by K. Regling in W. v. Diest *Nysa ad Maeandrum* (*Jahrb. d. kais. deutsch. arch. Inst.* Ergänzungsheft x) Berlin 1913 p. 86 f. nos. 152—154 pl. 13, 153, who says of the British Mnseum specimen: 'Der Mann mit dem Strick irrig flute-player genannt.'

Page 508 ff.: on the evolution of the horned altar. My suggestion that the horned altars of the Mediterranean area presuppose bull-shrines is to some extent confirmed by W. H. Ward *The Seal Cylinders of Western Asia* Washington 1910 pp. 307—310. Mr Ward in a chapter of great originality and acumen shows that a series of coarsely-cut haematite cylinders, probably of Syro-Hittite origin and referable to a period of *c.* 1500 B.C., represents an altar in the form of a bull. In some cases a flame is kindled on its back (fig. 567), in others a bird is perched upon it (fig. 568), in others again two human arms project from the quadruped's body (fig. 569). Mr Ward compares the image of Moloch, which had the arms of a man but the head of a calf (*supra* p. 723 n. 1). And it may be added that we have already seen reason to assume 'at various Hittite centres the cult of a life-sized bull, of which copies on a smaller scale were multiplied' (*supra* p. 641).

Page 585: on the snake-entwined statues at Hierapolis. P. Gauckler in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1909 pp. 117 ff., 434 ff., 617 ff. illustrates these statues by a remarkable statuette of gilded bronze (*ib.* p. 425 fig. 1) found lying in the cavity of a triangular altar, which forms the centre-piece of an octagonal chapel in the fourth-century Syrian sanctuary on the Ianiculum. The statuette shows a deity (Atargatis?) cased like a mummy and encircled by the seven coils of a crested snake. Seven hen's-eggs deposited between the coils recall the myth of the Syrian Venus (*supra* p. 584 n.) and incline Gauckler to think 'que la statuette...représente la Nativité d'*Atargatis*.'

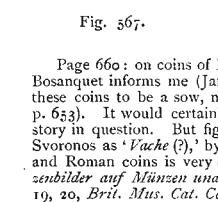

Fig. 567.

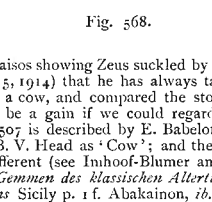

Fig. 568.

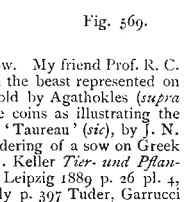

Fig. 569.

Page 660: on coins of Praisos showing Zeus suckled by a cow. My friend Prof. R. C. Bosanquet informs me (Jan. 5, 1914) that he has always taken the beast represented on these coins to be a sow, not a cow, and compared the story told by Agathokles (*supra* p. 653). It would certainly be a gain if we could regard the coins as illustrating the story in question. But fig. 507 is described by E. Babelon as 'Taureau' (*sic*), by J. N. Svoronos as '*Vache* (?),' by B. V. Head as 'Cow'; and the rendering of a sow on Greek and Roman coins is very different (see Imhoof-Blumer and O. Keller *Tier- und Pflanzenbilder auf Münzen und Gemmen des klassischen Altertums* Leipzig 1889 p. 26 pl. 4, 19, 20, *Brit. Mus. Cat. Coins* Sicily p. 1 f. Abakainon, *ib.* Italy p. 397 Tuder, Garrucci *Mon. It. ant.* p. 11 pl. 22, 1 *b*, p. 58 pl. 75, 16, Babelon *Monn. rép. rom.* ii. 471, Morell. *Thes. Num. Imp. Rom.* ii. 298 pl. 10, 31). As to fig. 508, H. Weber says 'Cow (?) or mare,' and Prof. Bosanquet admits that it looks 'more like a mare'; but B. V. Head is content to describe this too as a 'Cow.'

Page 676 f.: on the Orphic *formula ἔριφος ἐς γάλ' ἔπεσον*. Dr L. R. Farnell in *The Year's Work in Class. Stud. 1913* p. 135 draws attention to an article by Delatte in the *Musée Belge* 1913 p. 125, who 'proposes a new and attractive explanation of the cryptic formula *ἔριφος ἐς γάλ' ἔπεσον*, as meaning "I entered earthly life as a Dionysos-Kid," milk being in Orphic-Pythagorean myth the object of desire which lured souls into birth, and which was used by magicians to evoke souls (he quotes Plut., *De gen. Socr.*, c. 16; Porph., *Antr. Nymph.*, 28; *Papyr. Berlin.*, 1. 20).'

Page 676 f.: on the ritual use of milk among the Thraco-Phrygians. C. Avezou and C. Picard in the *Bull. Corr. Hell.* 1913 xxxvii. 97 ff. publish a quadrangular altar of white marble (height 1.02^{m}) from the neighbourhood of Thessalonike. On the left side is carved a *pedum*, on the right a *caduceus*. In front, between two *antae*, is the following inscription (*s.* iii A.D.?): ..... | .....ὁ ἀρχιμαγ[ει]ρευς καὶ ἀρχινε|ωκόρος καὶ πατὴρ | σπηλλέου καὶ Αὐρ. | Σωσίπατρα ἡ γαλα|κτηφόρος, κισταφο|ρήσασα <ν> ἔτη Χ | τὸν βωμὸν ἐκ τῶν | ἰδίων ἀνέθηκαν. | εὐτυχῶς. The precise nature of the cult in question is doubtful.

Page 677: on the bath of boiling milk as a means of ritual rebirth. Mr F. M. Cornford in his recent book *The Origin of Attic Comedy* London 1914 (a contribution of capital importance to our understanding of Greek drama) discusses the examples of rejuvenation in Aristophanes' plays and infers (p. 89) 'that these stories reflect a rite of regeneration or resurrection, which has an established place in the cycle of Dionysiac ritual.' He justly observes (p. 90) that my hypothesis 'is strengthened by the instance of Demos in the *Knights*, who renews his youth in the Sausage-seller's cauldron and emerges as a new King and (as the parallel cases allow us to add) a new God, ready for his marriage.' Mr Cornford has also kindly brought to my notice a valuable article by E. Maass in the *Neue Jahrb. f. klass. Altertum* 1913 xxxi. 627 ff. on the *Trophoi* of Aischylos, in which Medeia was represented as boiling the attendants of Dionysos, both male and female, in order to make them young again (Aisch. *frag.* 50 Nauck^{2} *ap.* schol. Eur. *Med.* argum. and schol. Aristoph. *eq.* 1321). *A propos* of Medeia's rejuvenating cauldron Maass writes

(p. 633): 'Das Bad in siedender Milch, das von einem Zauberpferde kühl geblasen wird, belegt R. Koehler aus Sizilien, der Walachei und anderswoher in den Anmerkungen zu L. Gonzenbachs "Sizilianischen Märchen" Nr. 83 II 256...und in den "Kleinen Schriften" I 468 (Zigeunermärchen).'

Page 681: on Dionysos as conceived at the City Dionysia and born at the Lenaia. I am indebted to Mr F. M. Cornford (Dec. 3, 1913) for a possible parallel in Roman religion. Ov. *fast.* 5. 229 ff. tells the story of the conception of Mars under the date May 2; and March 1, ten months later, is noted as the birthday of Mars in the calendar of Philocalus. If we may assume that the Roman year originally consisted of lunar months (cp. Censorin. *de die nat.* 20. 4), the interval becomes significant. But this is a somewhat doubtful assumption. See W. Warde Fowler *The Roman Festivals* London 1899 p. 1 ff. and also p. 36 ff.

APPENDIXES

ARATOS *phaenomena* 1—18.

PREFACE

THE first volume of this treatise dealt with Zeus as god of the Bright Sky and traced his evolution in that capacity from early Hellenic to late Hellenistic times. It included therefore both the pre-classical change from Zeus the animate Sky to Zeus the anthropomorphic Sky-god and the post-classical connexion of the latter with Sun, Moon, and Stars. But, apart from incidental allusions, it devoted little space to the common classical conception of Zeus as god of Thunder and Lightning. To investigate this is the main purpose of my second volume. It will, I trust, be followed some day by a third (already planned and partly written), in which the relations of Zeus to other phaenomena—Clouds and Rain, Wind and Dew, Earthquakes and Meteorites—will find their appropriate place. I shall hope to conclude at long last with a general survey of the Sky-god and his cult as constituting one factor in the great fabric of Greek civilisation, indeed as in some sense a contribution to Christianity itself.

Meantime the subject of Zeus as god of Thunder and Lightning cannot be adequately discussed without taking into account a number of allied topics—the *Diosemía* or ominous 'Zeus-sign'; the *Dióbletos* or 'Zeus-struck' man; the 'road of Zeus' from earth to heaven; the sky-pillars of Greece and Italy; the central shrine of Delphoi, where Zeus was successively associated with Dionysos and Apollon; again, Kronos the 'Minoan' storm-god to whom Zeus was affiliated; the double axe inherited by Zeus from his predecessor; the origin, development, and decline of his own peculiar weapon the thunderbolt. With all of these themes I have attempted *pro meis viribus* to cope. But reviewers and others that may wish to get a quick insight into the contents of the present volume would do well to begin by reading pp. 840–858, in which I have tried to summarise the principal results of my investigation. They must, however, bear in mind that a summary statement proves nothing. Proof can be had only by a patient consideration of the evidence presented in the text and notes, which will, I hope, be found reasonably complete.

The footnotes, I admit, are heavy, perhaps too heavy for modern dyspeptic digestions, and I shall expect to have quoted against me the usual tags—'a thin stream of text' etc. and 'what's

worth putting into a book at all is worth putting into the body of it.' But in self-defence I may plead that I have made the footnotes serve three distinct purposes. First and foremost, I have used them for documentation. As a rule, I have been content with bare references, which I have, of course, always verified by actual perusal. But, where the precise wording of the authority, whether ancient or modern, was of importance, I have not scrupled to give it in full. I have also, with hardly an exception, cited all Greek and Latin inscriptions, these being less readily accessible to the general reader than the literary texts. Secondly, I have sometimes relegated to the notes extra details which, though themselves of interest, seemed more or less irrelevant to my immediate theme. I have repeatedly found such excrescences of ritual or myth to possess a significance unsuspected at first and only later appreciated when the other half of the indenture had been brought to light. In fact I have come to hold that in deciphering religious records irregular edges should not be hastily trimmed off. One should rather cherish a healthy distrust of over-neat hypotheses and explanations that leave nothing to be explained. Life is seldom so simple and symmetric as our interpretation of it. Thirdly, I use my notes deliberately for the mention or discussion of side-issues and subsidiary points, provided that these arise directly out of the text. I shall no doubt be told that I am pursuing hares. But hares, after all, may be caught and are worth the catching. Their pursuit is to be regretted only if it hinders the main march of the argument—only, that is, if the chase crosses the text. The footnote saves the situation.

Naturally, if these side-issues are too long, they must be handled in Appendixes. The Second Part of Volume II contains a dozen such, of which four belong by rights to Volume I, *viz.* **A** 'Kairos,' **B** 'The Mountain-Cults of Zeus,' **E** 'The Kyklops in Folk-Tales,' **F** 'The Dioskouroi and Helene in modern Folk-Tales.' Appendix **C** 'Korinthos son of Zeus' and Appendix **D** 'The Wheel as a Cointype' have been again omitted through lack of space. The remaining eight Appendixes are properly attached to Volume II, *viz.* **G** 'Orphic Theogonies and the Cosmogonic Eros,' **H** 'Zeus *Ktésios*,' **I** 'Zeus *Agamémnon*,' **J** 'Zeus *Amphiáraos*,' **K** 'Zeus *Trephónios* or *Trophónios*,' **L** 'Zeus *Asklepiós*, **M** 'Zeus *Meilíchios*,' **N** 'Zeus *Philios*.' Seven out of the eight discuss specialised forms of Zeus to which allusion is made in the text. Another case of the sort, Appendix **O** 'Zeus *Olýmpios*,' will be more conveniently postponed to Volume III.

The episodical character of the book with its sections and subsections is due, at least in part, to the circumstances in which it has been composed. I have throughout been in full work as College Lecturer in Classics and University Reader in Classical Archaeology, responsible therefore for a good deal of teaching, examining, and organisation. Such a life, however congenial, tends to produce a certain mental attitude, the habit of thinking in compartments. Term-time leaves but scanty scraps of leisure for research, and the mind is more or less jaded when vacation is reached. Under such conditions anything like sustained flight or long-continued effort becomes doubly difficult. And I do not doubt that a better book on the same subject will some day be written by a man with larger leisure and clearer outlook.

But I do not wish to leave the impression that I have found the writing of *Zeus* irksome or unduly fatiguing. On the contrary, it has been a perpetual delight to come back and back again to a central theme, which so obviously serves to illuminate a dozen departments of classical study and in turn receives much illumination from them. A task of this kind, though it can never be other than a financial failure, carries with it its own reward.

Not the least pleasurable part of the undertaking has been my growing sense of indebtedness to many friends. Some, alas, I can no longer thank as I should wish to do for their inspiration and their help. Of those whose names appeared in the Preface to Volume I six have since died. James Hope Moulton, a greater man even than Cambridge knew him to be, lived a life of self-sacrifice and in April 1917 died a heroic death—or rather, as he himself phrased it in those dark days, *εἰς τὴν λαμπρὰν ἀπῆλθεν*: I count myself lucky to be able to include a passing reference to his name. C. H. W. Johns, learned and lovable to the last, was taken from us in August 1920: I shall not soon forget how, shortly before the end, he sat propped in his study-chair and bidding me hold up the big folio—for his own arm was half-paralysed—read aloud to me a cuneiform text (p. 482 f.) and furnished it there and then with an ample commentary out of the depths of his knowledge. Otto Gruppe too is gone—a grave loss to learning—leaving as one of his latest writings a brief but masterly paper on 'Die Anfänge des Zeuskultus' (*Neue Jahrb. f. klass. Altertum* 1918 xli—xlii. 289—302). E. Babelon, J. R. McClean, A. Wright—the list lengthens. But it is a list which, happily, is balanced and more than balanced by an increasing number of scholars able and

willing to devote themselves to the serious study of ancient religion on one or another of its many sides. To not a few of them I am much beholden.

The bulk of my proofs has been read by Miss J. E. Harrison, and the whole of them by Dr J. Rendel Harris. Both are workers with books of their own half-written; and I appreciate the generous spirit in which they have hindered themselves to help me.

For matters outside my competence I have been able to cite the expert opinion of others. Chinese parallels to Greek mythology have been furnished by Prof. H. A. Giles; Japanese parallels, by my friend Mr. H. G. Brand, long resident in Tokyo, and again by his friend Prof. Takeo Wada of Kyoto University. Mesopotamian texts have been explained to me, not only by the late Dr C. H. W. Johns, but also by my friend and former pupil Mr Sidney Smith, Assistant in the Assyriological department of the British Museum. On several points of Egyptology I have consulted Mr F. W. Green, Honorary Keeper of the Egyptian Antiquities in the Fitzwilliam Museum, Cambridge, and Mr F. Ll. Griffith, Reader in Egyptology at Oxford. For Phoenician names I have applied to my neighbour Mr N. McLean, University Lecturer in Aramaic, and to my colleague the Rev. Dr R. H. Kennett, Regius Professor of Hebrew; for Lydian names, to Mr W. H. Buckler, editor of the inscriptions found at Sardeis. On a few details of Indian cult I have been aided by Prof. E. J. Rapson and by Mr H. B. Thompson of Queens' College, Cambridge. In dealing with Celtic and Germanic deities I have been guided on occasion by Prof. H. M. Chadwick, while references to Icelandic sagas were collected for me by Miss N. Kershaw (now Mrs Chadwick). An important note on the Anglo-Saxon rune ᛦ (*ear* or *tir*) was sent me by Mr B. Dickins of Edinburgh University.

For Greek and Latin etymologies I have time after time used as a touchstone the wise judgment of my friend and colleague Dr P. Giles, Reader in Comparative Philology to the University of Cambridge. Mr J. Whatmough, a former pupil of us both, now Lecturer in Classics at Bangor, has revised my restoration of a ritual text in old Latin, the well-known but little-understood hymn of the Salii. Questions of Thracian and Illyrian phonetics have been considered for me by Mr B. F. C. Atkinson of Magdalene College, Cambridge, whose results, reached along the lines of strict philological method, have opened up a new vista of possibilities to the historian of early Greek religion. Here and there my

inadequate knowledge of Byzantine authors has been eked out by the wider experience of Prof. J. B. Bury; and in regard to the dialects of modern Greece Prof. R. M. Dawkins has more than once given me an authoritative decision.

Where the argument has trenched upon the domain of Science I have met with equal kindness and cooperation. An astronomical note was penned for me by my old college-friend Prof. E. T. Whittaker, late Astronomer Royal of Ireland. Mr C. T. R. Wilson, Jacksonian Professor of Natural Philosophy, has supplied me with interesting information on a point of electrical meteorology. Dr L. A. Borradaile, University Lecturer in Zoology, has brought his special knowledge of crustaceans to bear on the crabs of Agrigentum and Tenedos. Dr A. C. Haddon, Reader in Ethnology, with whom—since we go the same road—I am often privileged to discuss anthropological issues, has helped me over several problems of folk-lore and primitive art. The Abbé Breuil cleared up for me the long-standing puzzle of concentric cup-marks; and Mr M. C. Burkitt, Honorary Keeper of the Stone Implements in the Museum of Archaeology and of Ethnology, noted for me sundry specimens of engraved neolithic celts.

One or two friends have undertaken special investigations on my behalf. Mr C. T. Seltman visited Delphoi and reported on the *omphalós* discovered there in 1913 by Monsieur F. Courby. Mr T. W. I. Bullock of Queens' College, when travelling in Spain, saw the Museum authorities at Madrid and consulted them as to the character of the tablet from Tarragona. Miss E. M. Douglas (Mrs Van Buren) went from Rome to Nemi and interviewed the peasants with regard to local traditions of Diana's tree, while Prof. P. J. Harding pursued the same quest in libraries at home and abroad.

Others have favoured me with the narrative of their own journeyings and discoveries. Mr T. Fyfe describes in detail the little church on the summit of Mt Ide in Crete and the night that he spent there at a height of 8060 ft above sea-level. Mr C. W. Blegen contributes an interesting account of the finds that he made in 1923–1924 on Mt Hymettos, where he was able to locate with much probability the votive deposit of Zeus *Ómbrios*. Mr R. Campbell Thompson sketches from personal observation the present condition of Eridu.

Particular criticisms and suggestions have been communicated by a large number of scholars including Mr C. D. Bicknell

Prof. R. C. Bosanquet, Mr F. M. Cornford, Mr G. G. Coulton, Prof. R. M. Dawkins, Sir J. G. Frazer, Dr J. Rendel Harris, Miss J. E. Harrison, Mr E. S. Hartland, Dr G. F. Hill, Prof. R. H. Kennett, Miss M. E. H. Lloyd, the Rev. H. E. Maddox, Mr A. D. Nock, Prof. A. C. Pearson, Mr T. Davies Pryce, Dr G. H. Rendall, Miss H. Richardson, Mr E. J. Seltman, Mr C. T. Seltman, and Mr C. M. Sleeman. I have been able to profit by them all.

For illustrations too I am under heavy obligation to others. Prof. R. M. Dawkins allowed me to publish for the first time a highly important seal-stone from Melos, now in his possession. Mr C. D. Bicknell gave similar permission in the case of a gem belonging to the Lewis Collection at Corpus Christi College, Cambridge. Mr A. H. Smith furnished casts of several gems in the British Museum. Mr B. Staes, by sending a cast of the inscribed serpentine celt in the Central Museum at Athens, enabled me to produce the first really accurate rendering of that famous object.

Mr S. C. Cockerell of the Fitzwilliam Museum has provided me with numerous casts of coins in the McClean and Leake Collections. Mr G. Macdonald supplied the cast of a rarity in the Hunterian Collection at Glasgow. But, above all, my numismatic friends at the British Museum, in particular Dr G. F. Hill and Mr E. S. G. Robinson, have for years past sent me a steady stream of well made casts, which—as the following text will abundantly prove—have served to throw valuable light on the Zeus-cults of the ancient world. The Keeper of the coins and his Assistants have also spared time to discuss with me many of the types. They have repeatedly verified points at my request, and in other ways have helped forward my project. To give but one instance, they reserved for me the right to publish the type of Zeus *Spálaxos*, which I had detected on a unique coin of Aphrodisias. In marshalling the evidence of coin-types I owe much also to the keen eyes and exact knowledge of my friend and former pupil Mr C. T. Seltman. He has procured for me rare specimens from foreign collectors or, where originals were not to be had, has obtained at least impressions of the coins that I needed. Moreover, he was the first to read the title of Zeus *Akraîos* on a *statér* of Praisos and—a matter of greater moment—the first to determine the true sequence and significance of the Zeus-types at Olympia.

A fine photograph of the profile of Zeus on Mt Juktas, taken by Mr A. Trevor-Battye, was sent me by Mr C. R. Haines. Photo-

graphs of statues and reliefs in marble or stone were supplied by Mr A. H. Smith of the British Museum, Mr S. C. Cockerell of the Fitzwilliam Museum, Mr L. D. Caskey of the Boston Museum of Fine Arts, and the Director of the Musée Lapidaire at Lyons. Mr W. H. Buckler with great generosity allowed me to publish a new and very interesting *stéle* of Zeus *Sabázios*, since presented by him to our national collection. Miss J. E. Harrison, on quitting Cambridge for Paris, put at my disposal her whole assemblage of photographs representing Greek votive reliefs and other religious monuments. Mr A. Munro, Fellow and Lecturer of Queens' College, photographed for me an unpublished relief on the Palatine. Mr R. B. Fleming, Mr W. H. Hayles, and Mr W. Tams did me the like service in various collections and galleries.

The Director of the French School at Athens was good enough to furnish me with three excellent photographs of the Delphic *omphalós*, here figured for the first time on English soil. And the Society for the Promotion of Hellenic Studies supplied me with a photograph of the cistern-mosaic on Mt Kynthos.

Photographs of bronzes were kindly provided by Prof. P. N. Ure of University College, Reading, Mr K. Kourouniotes of the National Museum, Athens, and Miss G. M. A. Richter of the Metropolitan Museum of Art, New York. Others were taken for me in London by Mr W. H. Hayles and Mr R. B. Fleming, at Cambridge by the photographer to the University Press.

Photographs of vases etc. in the British Museum were taken by Mr C. O. Waterhouse and Mr R. B. Fleming, in the Louvre by Monsieur A. Giraudon, in the Fitzwilliam Museum and in the Lewis Collection by Mr W. H. Hayles.

Careful drawings of the Jupiter-column at Saverne, accompanied by minutely accurate measurements and a descriptive text, were sent me by Prof. L. Bachmeyer, Director of the local Museum.

Permission to reproduce various photographs, plates, or figures was kindly granted by Messrs F. Boissonnas of Geneva, F. Bruckmann and Co. of Munich, Kouchakji Frères of New York, and by Prof. C. Blinkenberg of Copenhagen, Sir A. J. Evans, Sir W. M. Ramsay, Mr C. Torr, Mr H. B. Walters.

But I have yet to acknowledge help from other sources, without which the success of my venture would have been seriously imperilled. Miss E. T. Talbot of Saint Rhadegund's House, Cambridge,—the artist who executed more than half the figures of Volume I—has again devoted her well-trained talent to the

illustration of Volume II. During the past ten years she has produced no fewer than 626 designs, all carried out with the utmost care under my immediate supervision. They include line-drawings or sketches in black and white of 75 sculptures, 26 bronzes, 12 objects in gold, silver, ivory, etc., 12 vases, 7 frescoes, 14 maps, plans, diagrams, etc., 41 engraved gems, and 439 coins. In addition to this great output Miss Talbot has made a tentative reconstruction of all the figures in the east pediment of the Parthenon (pl. xxxiii) together with coloured drawings of the central slab from its eastern frieze (pl. xliv), of Pheidias' chryselephantine Athena (pl. xlv), and of the same sculptor's chryselephantine Zeus (pl. xlvi). The evidence that may be adduced in support of these restorations is held over to appear in Volume III.

Slips for the two Indexes, which between them contain upwards of 30,000 entries and took well over a year to write, have again been arranged for me by my wife, to whose unfailing sympathy and encouragement this book owes more than its author can easily put into words. Towards the end, when the task began to try her eyes, she was assisted by Miss Michi Saito.

In the complicated business of turning out proofs, paged proofs, revises, and clean sheets, not to mention zincotypes, half-tone blocks, collotypes, and lithographic plates, the Printer to the University and the Staff of the Pitt Press have for more than a decade done all that was humanly possible to produce a satisfactory result. To them no less than to others that I have named I ought to be grateful, and I am.

In conclusion, I have once more to thank the Syndics of the University Press for the large-mindedness which led them to undertake the publication of an unremunerative work at a time when the cost of paper and printing was almost prohibitive. With much forbearance they twice extended my tether, and finally agreed to defray the expenses of a thousand pages for Volume II. In these days of enforced economy such generous treatment would be hard to parallel. If I have failed to reduce my subject within their liberal limits, that is due, not—I trust—to mere prolixity or diffuseness of style, but to the natural abundance of a great and vital theme.

ARTHUR BERNARD COOK.

19 CRANMER ROAD, CAMBRIDGE.
22 July 1925.

CONTENTS OF VOLUME II

PART I. CHAPTER II

ZEUS AS GOD OF THE WEATHER

PAGES

§ 1. **Zeus lightens, thunders, rains, etc.** . . . . . 1—4

§ 2. **The *Diosemía* or 'Zeus-sign'** . . . . . 4—10

§ 3. **Zeus and the Lightning** . . . . . 11—826

(*a*) Lightning as a flame from the Burning Sky 11

i. Zeus *Keraunós* 11

ii. Zeus *Kataibátes* 13

(*α*) The altars of Zeus *Kataibátes* 15

(*β*) The *ábata* of Zeus *Kataibátes* 21

(*γ*) The *Dióbletos* or 'Zeus-struck' man in Elysium . . 22

(*δ*) Death by Lightning as euthanasia 23

(*ε*) The Tarentine cult of Zeus *Kataibátes* 29

(*ζ*) Zeus *Kraitaibátes* 32

(*η*) Survivals of the foregoing beliefs 32

iii. Zeus and the Sky-Pillar 36

(*a*) The Elysian Way 36

(*β*) The Sky-Pillar in Italy 45

(*γ*) The Sky-Pillar in the 'Minoan' area 47

(*δ*) The *Irminsûl* 50

(*ε*) Iupiter-Columns 57

(*ζ*) The Column of Mayence 93

(*η*) Commemorative Columns 100

(*θ*) The Trophy 108

(*ι*) The Pillar of Light and the Soul-Ladder 114

(*κ*) The Sky-Pillar in Sardinia 140

(*λ*) Diana-Pillars 143

(*μ*) *Agyieús*-Pillars 160

(*ν*) *Omphalós* and Pillar 166

(*ξ*) The Delphic *Omphalós* 169

(*ο*) The Delphic Tripod 193

(*π*) The *Pythía* as Bride of Apollon 207

(*ρ*) The *Pythía* and the Caldron of Apotheosis . . . 210

(*σ*) Dionysos and the Caldron of Apotheosis 218

(*τ*) Pythagoras as Apollon reborn 221

(*υ*) Zeus at Delphoi 231

(*φ*) Dionysos at Delphoi 233

(*χ*) Dionysos displaced by Apollon at Delphoi . . . 243

(*ψ*) The stratification of Delphic Cults 266

PAGES

iv. Zeus and Dionysos 267
(*a*) P. Kretschmer's hypothesis 271
(*β*) Criticism of P. Kretschmer's hypothesis 274
(*γ*) *Díos* and *Díos Nŷsos* 277
(*δ*) *Pápas* and *Áttis* 292
(*ε*) The Mother-goddess and her *páredros* 294
(*ζ*) Attis in relation to Christianity 303
(*η*) Attis in relation to the Dioskouroi 307
(*θ*) The *Kábeiroi* or *Megáloi Theoí* 313

v. The double Zeus 316
(*a*) Zeus *Didymaîos* 316
(*β*) Zeus duplicated on a gem 318
(*γ*) Zeus *Tetráotos* 322
(*δ*) The Celtic Janiform god 323

LIST OF PLATES IN VOLUME II

PLATE		*to face page*
I	*Amphora* from Nola, now in the British Museum: Zeus in pursuit of Semele	24 f.
II	*Kratér* in the Louvre: Zeus in pursuit of Semele	24
III	The Jupiter-Column of Saverne	76
IV	The Sculptured Column of Mayence	92 f.
V	*Amphora* from Capua, now in the British Museum: Orpheus attacked by Thracian women	122 f.
VI	Polychrome *hydría* from Kyrenaike, now in the British Museum: scene of mystic incense-gathering (?)	124
VII *a, b*	Two *arýballoi* from Apollonia in Thrace, representing scenes of mystic incense-gathering (?)	124
VIII	Mural painting in Chaldon Church, Surrey: the Ladder of Salvation	138
IX *a—c*	Three views of the inscribed *omphalós* found by F. Courby beneath the inner chapel of the Delphic temple	174 f.
X	Relief from Phaleron: Xenokrateia and her boy supplicate Kephisos and the deities associated with him	182 f.
XI	*a* Altar as represented on a coin of the Cretan community *b* Small bronze altar resembling that on the Cretan coin	193
XII	The Chigi base at Dresden, representing: (*a*) The rape of the Delphic tripod by Herakles (*b*) The dedication of a columnar tripod by the *Pythía* and the *neokóros* (*c*) The dedication of a torch by a priest and priestess	198 f.
XIII	*Hydría* in the Fitzwilliam Museum, Cambridge: the Peliades about to carry out the instructions of Medeia	212
XIV	*Hydría* from Vulci, now in the British Museum: Medeia renews the youth of Iason	212
XV	Silver *simpulum* from Cullera, representing Zeus as a swan with Leda, as a man with Semele, as Artemis with Kallisto, as an eagle with Ganymedes, etc.	229
XVI	Polychrome *pelíke* from Jüz Oba: Zeus takes counsel with Themis	258
XVII	*Kratér* from Jüz Oba: Apollon visits Dionysos at Delphoi	262
XVIII	*Kratér* in the British Museum: Apollon honoured by the followers of Dionysos at Delphoi	263
XIX	*Stéle* obtained by W. H. Buckler in Constantinople: Zeus *Sabázios* on horseback, with altar, *kratér*, and leafless tree, in which are eagle and snake, surmounted by votive inscription	282

PLATE		*to face page*
XX	Bifrontal head (Ianus ?) in the Palazzo Spada at Rome	327
XXI	Janiform *aryballos*, combining male and female Dionysiac heads	390
XXII, 1—3	Janiform bust from Nemi, probably representing Hippolytos-Virbius decked with leaves of the *quercus robur* as consort of Diana	392 f.
XXIII, 1—3	Janiform bust in the Capitoline Museum, probably representing Hippolytos-Virbius decked with leaves of the *quercus ilex* as consort of Diana	392 f.
XXIV	Etruscan mirror: the Dioskouroi with Leda (?) and Helene (?) between them	432
XXV	*Hydria* from Kyrenaike, now in the British Museum: Apollon, riding on a swan, returns to Delphoi	460
XXVI	Map showing the Western and Eastern Routes of the Hyperborean Offerings in relation to early Trade-Routes for Amber	498
XXVII, *a—d*	The painted limestone *sarcophagus* from Hagia Triada near Phaistos	516 f.
XXVIII	Marble head of Zeus *Labrayndos* (?), found at Mylasa and now in the Boston Museum of Fine Arts	597
XXIX	Etruscan mirror: the birth of Athena	709
XXX	Ionian (Cean ?) *amphora* from Caere, now in the Louvre: Zeus, in the Gigantomachia, fighting Agasthenes, Ephialtes, and Hyperbios	712
XXXI	Bronze statuette of Zeus in the Uffizi at Florence	746
XXXII, 1	Silver statuette from Mâcon, now in the British Museum: Zeus standing with a she-goat (Amaltheia ?) at his side	
2	Silver-gilt statuette from Mâcon, now in the British Museum: Zeus enthroned	746
XXXIII	The Eastern Pediment of the Parthenon (Restored)	*in pocket at end of Volume II*
XXXIV	Bronze statuette found in Hungary, now in the British Museum: Zeus enthroned with a sceptre in his right hand and a thunderbolt in his left	756
XXXV	Marble statuette of Zeus in the Musée Lapidaire at Lyons	759
XXXVI	Silver coins struck by the temple-mints at Olympia, showing various types of Thunderbolt	780
XXXVII	Terra-cotta group from Gnathia, now in the British Museum: Zeus in a four-horse chariot	831
XXXVIII	The main design on a *krater* from Canusium, now in the Museum at Naples: the doom of Dareios	852 f.
XXXIX	Marble *stele* from Panormos near Kyzikos, now in the British Museum, with dedication to Zeus *Hypsistos* and votive reliefs representing Zeus, Artemis (?), Apollon and a banquet	881
XL	The summit of Mount Olympos	905
XLI	The Olympieion at Syracuse	915

PLATE		*to face page*
XLII	*Amphora* from Vulci, now in the British Museum: Laïos, Keleos, Kerberos, and Aigolios stung by bees in the Dictaean Cave.	929
XLIII	Mount Juktas, as seen from the west, showing the profile of the 'Pursuer' (Διώκτας)	939
XLIV	The central slab from the Eastern Frieze of the Parthenon, representing the ritual Apotheosis of the King and Queen at Athens:	
	(1) The relief as extant in the British Museum	
	(2) The relief with flat coloration and metal accessories restored	1134 f.
XLV	Pheidias' gold-and-ivory statue of Athena *Parthénos*, restored from monumental and literary sources	*in pocket at end of Volume II*
XLVI	Pheidias' gold-and-ivory statue of Zeus *Olýmpios*, restored from literary and monumental sources . .	*in pocket at end of Volume II*
XLVII, *a*, *b*	The Chalice of Antioch	1198 f.

The design on the cover is from a bell-*kratér* at Palermo (no. 2557: Overbeck *Gall. her. Bildw.* i. 527 f. pl. 22, 10, *id. Gr. Kunstmyth.* Zeus p. 28, b. Atlas pl. 1, 13), which represents Heos and Thetis supplicating Zeus and has recently been attributed to the 'Oreithyia painter' (J. D. Beazley *Attische Vasenmaler des rotfigurigen Stils* Tübingen 1925 p. 293 no. 3). I am indebted for the necessary photograph to the courtesy of Profs G. M. Columba and E. Gábrici.

ABBREVIATIONS

This List of Abbreviations has been drawn up in accordance with two principles. On the one hand, the names of Authors have not been shortened, save by the omission of their initials. On the other hand, the titles of Books and Periodicals have been cut down, but not—it is hoped—beyond the limits of recognizability.

The customary abbreviations of classical writers and their works (for which see Vol. I p. xiv) are not here included.

Abh. d. bayer. Akad. Philos.-philol. Classe = *Abhandlungen der philosophisch-philologischen Klasse der königlich bayerischen Akademie der Wissenschaften* München 1835— .

CHAPTER II

ZEUS AS GOD OF THE WEATHER.

§ 1. *Zeus lightens, thunders, rains, etc.*

IN the first volume of this work I endeavoured to show that Zeus, the Greek sky-god, was originally just the bright or day-light sky conceived as alive and operant; that already in Homeric times he had passed from the zoïstic to the anthropomorphic stage, being regarded as a divine king who dwelt in the azure brilliance of the upper air; and that subsequently he came to be associated with other manifestations of celestial light in the various solar, lunar, and stellar cults of the Hellenistic world.

Zeus, then, was primarily god of the bright sky. But the sky is not always bright. As the rustic Korydon remarks in an idyll of Theokritos:

> Ay, Zeus is sometimes fair and sometimes foul[1].

Hence the Greeks naturally extended the notion of Zeus as god of the bright sky to cover that of Zeus as weather-god in general. The poets from Homer downwards used such expressions as 'Zeus lightens[2],' 'Zeus thunders[3],' 'Zeus rains[4],' 'Zeus snows[5],' 'Zeus sends the hail[6].' The man in the street, with a reticence perhaps born of superstitious caution[7], preferred to say 'God rains,' 'God

[1] Theokr. 4. 43 *χὠ Ζεὺς ἄλλοκα μὲν πέλει αἴθριος, ἄλλοκα δ' ὗει.*

[2] *E.g. Il.* 9. 236 f. *Ζεὺς δέ σφι Κρονίδης ἐνδέξια σήματα φαίνων | ἀστράπτει.*

[3] *E.g. Od.* 14. 305 *Ζεὺς δ' ἄμυδις βρόντησε καὶ ἔμβαλε νηὶ κεραυνόν.*

[4] *E.g. Il.* 12. 25 f. *ὗε δ' ἄρα Ζεὺς | συνεχές*, Hes. *o.d.* 415 f. *μετοπωρινὸν ὀμβρήσαντος Ζηνὸς ἐρισθενέος.*

[5] *E.g.* Babr. 45. 1 *ἔνιφεν ὁ Ζεύς.*

[6] *E.g.* Eur. *Tro.* 78 f. *καὶ Ζεὺς μὲν ὄμβρον καὶ χάλαζαν ἄσπετον | πέμψει δνοφώδη τ' αἰθέρος φυσήματα.*

Phrases of the type *Ζεὺς...ὄμβρον...πέμψει* are further removed from primitive zoïsm than phrases of the type *Ζεὺς...ὗει.* Transitional in character are such lines as *Ζεὺς δ' ἄμυδις βρόντησε καὶ ἔμβαλε νηὶ κεραυνόν*, of which the second half is more anthropographic than the first.

[7] Frazer *Golden Bough*[3]: Taboo pp. 318—391 discusses avoidance of names and *ib.* p. 387 ff. collects examples of 'Names of Gods tabooed.' See also F. C. Conybeare 'The Use of Sacred Names' in *Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 358—361.

snows,' or 'He lightens,' 'He thunders[1],' but—if pressed for an explanation—would ascribe these actions to Zeus[2].

It was, therefore, a shock to old-fashioned piety, when philosophers and sophists insisted that such phaenomena were brought about by purely physical causes. A certain memorable scene in *The Clouds* of Aristophanes[3] represents Strepsiades, a member of the old school, as being instructed in the new learning by Sokrates:

Str. What! d'you mean that Zeus is not god, Zeus in heaven, on whom we call?
Socr. Zeus, d'you say? now don't talk drivel; Zeus does not exist at all.
Str. What! Who makes the rain then? tell me that, and I shall be content.
Socr. Why the Clouds: I'll prove it to you by convincing argument.
Have you ever seen rain falling, when the clouds weren't passing by?
If it's Zeus who rains, he ought to do it from a cloudless sky.
Str. That's a clever point, I grant you, neatly used to back your case.
Yet I thought once Zeus passed water through a sieve, when rain took place.
But who is it then that thunders, when I cower and hide my face?
Socr. Why, the rolling clouds make thunder.
Str. What d'you mean? that's blasphemy.
Socr. When they're teeming full of water and are forced across the sky,
Big with rain and bulging downwards, moving at a fearful rate,
Charging each against the next, they burst and crash with all their weight.
Str. But who is it drives them onwards? do you think it's Zeus, or not?
Socr. No, the atmospheric vortex.
Str. Vortex! yes, I quite forgot:
Zeus does not exist, but Vortex rules instead of him to-day.

Philosophers and would-be philosophers left the man in the street pretty much as they found him. His simple creed might be, and was, exploded scores of times; but he continued to believe in it, just because his father and his grandfather and his great-grandfather had done the same before him. He never took kindly to Vortex[4], and still talked in his unreasoning way of Zeus. If we

[1] Examples are given *infra* p. 3 n. 7.

[2] Apollon. Dysk. *de constr. or.* p. 101, 16 ff. *à propos* of ἀστράπτει and the like says ἡ τοιαύτη ἐνέργεια τῷ Διὶ ἀναπέμπεται, cp. *et. mag.* p. 211, 57 ff. οὐδὲ γὰρ βρέχω ἐγώ, οὐδὲ βρέχεις σύ, ἀλλὰ βρέχει καὶ χιονίζει καὶ ἀστράπτει ὁ θεός... ὅταν δὲ ἐρωτηματικῶς εἴπῃ βρέχει; ἢ βροντᾷ; διατί οὐ προστίθησι καὶ τὸ ἐπαγόμενον; διότι εἷς ἐστιν ὁ ταῦτα ποιῶν, τουτέστιν ὁ θεός.

[3] Aristoph. *nub.* 366 ff. I quote the excellent rendering by A. D. Godley and C. Bailey (Oxford 1905), supplementing it by the addition of line 373.

[4] Mr F. M. Cornford, however, points out to me that the vortex-theory of the philosophers had at least some foundation in popular belief—witness the ancient and very remarkable tablet from Tarragona (*infra* Append. G). Aristophanes' words (*nub.* 380 f. ΣΩ. ἥκιστ', ἀλλ' αἰθέριος δῖνος. ΣΤ. Δῖνος; τουτί μ' ἐλελήθει, | ὁ Ζεὺς οὐκ ὤν, ἀλλ' ἀντ' αὐτοῦ Δῖνος νυνὶ βασιλεύων) are meant to suggest not only δῖνη or δίνησις, cosmic rotation, but also the name of Zeus (schol. *ad loc.* ἐγγύθεν ἔλαβεν ἀπὸ τοῦ Διὸς τὸ ὄνομα), with a sly hit at δῖνος, a round-bellied bowl (cp. *nub.* 1468 ff. ΣΤ. ναὶ ναὶ καταιδέσθητι πατρῷον

wish to know the sort of thing that was said by common-place folk at Athens in the fourth and third centuries B.C., we turn, for example, to the extant scraps of Middle and New Comedy. Somebody in the *Atthis* of Alexis describes—

> How just at first Zeus quietly clouds over,
> Then more and more so[1].

Somebody else in a fragment by Menandros says:

> I watch Zeus
> Pelting with rain[2].

The *Characters* of Theophrastos tell the same tale. The garrulous man, full of truisms and trivialities, observes that 'if Zeus would send rain, the crops would be better[3].' The grumbler is 'annoyed with Zeus, not for not raining, but for raining too late[4].' The coward on a voyage 'pops up his head and asks the steersman if he is half-way across, and how the weather strikes him[5].' Only, where we translate 'the weather,' the Greek has literally 'the things of the god,' that is, of Zeus[6].

Phrases such as 'He rains,' 'He snows,' 'He is stormy,' 'He grows dark' alternate with the more explicit 'God rains,' 'God snows,' 'God is stormy,' 'God grows dark' throughout the whole range of Greek literature[7]. Nor did the incoming of Christianity banish these reverential expressions. The name of Zeus was indeed suppressed[8], but the name of God remained and is still to be heard in this connexion. Thus, instead of the usual phrase 'day breaks[9],' a modern Greek folk-song in G. F. Abbott's collection has:

> God brings on day-break[10].

Δία. | ΦΕ. *ἰδού γε Δία πατρῷον· ὡς ἀρχαῖος εἶ.* | *Ζεὺς γάρ τις ἔστιν;* ΣΤ. *ἔστιν.* ΦΕ. *οὐκ ἔστ', οὔκ, ἐπεὶ* | *Δίνος βασιλεύει τὸν Δί' ἐξελήλακώς.* | ΣΤ. *οὐκ ἐξελήλακ', ἀλλ' ἐγὼ τοῦτ'* | *ᾠόμην* | *διὰ τουτονὶ τὸν δῶνον. οἴμοι δείλαιος,* | *ὅτε καὶ σὲ χυτρεοῦν ὄντα θεὸν ἡγησάμην.* The last line should not be cut out: it is quite justified by other pot-Zeuses, the *Δίες Κτήσιοι* of Append. H).

[9] *ξημερώνει.*

[10] G. F. Abbott *Songs of Modern Greece* Cambridge 1900 Part 2 1. 21 *καὶ 'ξημερώνει ὁ θεός τ' ἡμέρα'.*

People say not only 'it rains[1]' but 'God rains[2].' And in a love-distich from Crete cited by A. Passow the lover invokes 'the Lord ...who sends the cloudy weather and the thunder and the rain[3]'—a manifest survival, as B. Schmidt points out[4], of Zeus the weather-god of pre-Christian days. Other locutions of the kind are collected by N. G. Polites[5] and reviewed by J. C. Lawson, who concludes: 'Such expressions as these are in daily use among the Greek peasantry: and nothing could reveal more frankly the purely pagan and anthropomorphic conception of God which everywhere prevails. The God of Christendom is indistinguishable from the Zeus of Homer[6].'

§ 2. *The* Diosemía *or 'Zeus-sign.'*

If Zeus was originally none other than the animate sky, we can well understand that any sudden change in his aspect must have meant much to his worshippers. Homer speaks of thunder[7] and lightning[8], Hesiod of a blood-red rain[9], as the *sémata* or 'signs' of Zeus. And the title *Semaléos,* under which Zeus was worshipped on Mount Parnes[10], probably implies that omens were there drawn from the state of the weather[11].

Of kindred import is the term *Diosemía*[12], a 'Zeus-sign,' which may have arisen before Zeus became a fully anthropomorphic deity. It is used from the fifth century B.C. onwards to denote anything in the nature of an atmospheric disturbance—for example, a sudden

[12] *Διοσημία* is the best attested form: see Stephanus *Thes. Gr. Ling.* ii. 1540 A—C *s.vv. Διοσημασία, Διοσημεία, Διοσημεῖον, Διοσημία.*

storm[1]. But its scope was gradually widened to include meteorological phaenomena of all sorts[2], until in the sixth century A.D. Ioannes Laurentius the Lydian could reckon as subdivisions of it solar and lunar eclipses, comets, shooting stars, lightning, thunder, thunderbolts, aerial portents, earthquakes, and conflagrations![3]

The Athenians, we are told, paid special attention to Zeus-signs[4], which were expounded to them by official Interpreters[5]. When a sign occurred, the public assembly at once broke up[6] and the law-courts ceased to sit[7]. Thus in 420 B.C. the Athenians were on the point of making an alliance with the Argives and their confederates. 'But,' says Thoukydides, 'before the final vote was taken an earthquake happened, and the assembly was adjourned[8].' Aristophanes in his *Women in Parliament* mentions as plausible reasons for not carrying out a decree:

> An earthquake might befall,
> Lightning might strike, a weasel cross the street,
> And then they'ld stop at once, you dunder-head![9]

The Chorus of Clouds in the play named after them take credit to themselves for saving the Athenians from undue haste:

> We who more than all immortals benefit your state and you,
> We alone have no libation, ne'er receive an offering due:
> Yet we save you: when to senseless expeditions you're inclined,
> Then we send you rain and thunder, so that you may change your mind[10].

The allusion in the last line is presumably to the postponement of public business occasioned by a Zeus-sign. That is certainly the case in a passage of the *Acharnians*, where Dikaiopolis waxes indignant with the Thracians:

[1] Aristoph. *Ach.* 171 (*infra* p. 6) with schol. *ad loc.* (=Souid. *s.v.* Διοσημεία) Διοσημία δέ ἐστιν ὁ παρὰ καιρὸν χειμών.

[2] The *phaenomena* of Aratos is followed by a sequel (lines 733—1154), which deals with weather-signs in general and in the later MSS. is entitled Διοσημίαι or πρόγνωσις. This sequel utilised the same source as the treatise περὶ σημείων wrongly attributed to Theophrastos and was itself translated into Latin verse by Cicero under the heading *prognostica* (W. Christ *Geschichte der griechischen Litteratur*[5] München 1911 ii. 1. 124 f.: see further G. Knaack in Pauly-Wissowa *Real-Enc.* ii. 395, 397).

[3] Lyd. *de ostent.* 4. Here, as *ib.* 15[b], 16, 16[a], C. Wachsmuth prints διοσημεία, but *ib.* 47 διοσημασία.

[4] Schol. Rav. Aristoph. *Ach.* 171 (=Souid. *s.v.* Διοσημεία) παρεφυλάττοντο οἱ Ἀθηναῖοι τὰς Διοσημίας, καὶ διέλυον τὰς ἐκκλησίας Διοσημίας γενομένης < ? > ἢ ἄλλο τι μέλλοντες ἀνύειν.

[5] Poll. 8. 124 ἀνίσταται δὲ τὰ δικαστήρια, εἰ γένοιτο Διοσημία· ἐξηγηταὶ δ' ἐκαλοῦντο οἱ τὰ περὶ τῶν Διοσημιῶν καὶ τὰ τῶν ἄλλων ἱερῶν διδάσκοντες. Similarly the Romans κατὰ τὰς ἐν τοῖς κεραυνοῖς Διοσημείας τούτοις (*sc.* the Etruscans) ἐξηγηταῖς χρῶνται (Diod. 5. 40).

[8] Thouk. 5. 45, cp. Plout. *v. Nic.* 10.

[9] Aristoph. *eccl.* 791 ff.

[10] Aristoph. *nub.* 577 ff.

Magistrates, can you stand it? And am I
In my own country by barbarian hands
To be thus handled? No, to pay the Thracians
There shall be no assembly. See, there is
A Zeus-sign—I distinctly felt a rain-drop[1].

Hereupon the herald without further enquiry terminates the sitting:

Thracians, begone: come back in two days' time.
The magistrates hereby adjourn the assembly[2].

The *Diosemía* doubtless afforded fair sport to the comedian; but to the majority of his fellow-countrymen, as also to the Romans[3], it was no laughing-matter. 'When armies gather for battle,' says Dion Chrysostomos, 'and a sudden Zeus-sign appears or an earthquake takes place, men straightway turn back and abandon hostilities, since the gods are against their fighting[4].' The suddenness of the sign appears to have been an essential feature[5]. If foreseen, it was robbed of its terrors—witness an anecdote told by Polyainos the Macedonian:

Leonidas was about to join battle, when he noticed storm-clouds collecting and remarked to the generals that they must not be surprised if it lightened and thundered—that was bound to happen in the dog-days. So, when numerous Zeus-signs occurred, Leonidas' men being forewarned held on their way with no fears for the future, but the enemy in dire dismay were cowed by the danger and consequently beaten[6].

Another name for the meteorological omen was *echesamía*, a 'stop-sign,' and this is defined by Hesychios as 'a summer drizzle

[1] Aristoph. *Ach.* 167 ff.

[2] Aristoph. *Ach.* 172 f.

[3] Appian. *de bell. civ.* 1. 30 *ὁ δὲ πολιτικὸς ὄχλος ἐβόα ὡς γενομένης ἐν ἐκκλησίᾳ βροντῆς, ὅθεν οὐ θέμις ἐστὶ Ῥωμαίοις οὐδὲν ἔτι κυροῦν... ...ὅτι οὐκ ἔστι νόμος ὁ πρὸς βίαν τε καὶ βροντῆς ὠνομασμένης κεκυρωμένος παρὰ τὰ πάτρια*, Dion Cass. 38. 13 *τῆς γὰρ μαντείας τῆς δημοσίας ἐκ τε τοῦ οὐρανοῦ καὶ ἐξ ἄλλων τινῶν, ὥσπερ εἶπον, ποιουμένης, τὸ μέγιστον κῦρος ἡ ἐκ τοῦ οὐρανοῦ εἶχεν, οὕτως ὥστε τὰ μὲν ἄλλα οἰωνίσματα πολλὰ καὶ καθ' ἑκάστην πρᾶξιν, ἐκεῖνο δὲ ἑσάπαξ ἐπὶ πάσῃ τῇ ἡμέρᾳ γίγνεσθαι. τοῦτό τε οὖν ἰδιώτατον ἐν αὐτῷ ἦν, καὶ ὅτι ἐπὶ μὲν τῶν ἄλλων ἁπάντων ἢ ἐπέρπε πραχθῆναί τινα, καὶ ἐγίγνετο μηδενὸς ἔτι καθ' ἕκαστον οἰωνίσματος ἐπαγομένου, ἢ ἐκώλυε, καὶ ἀνεχειρίζετό τι, τὰς δὲ δὴ τοῦ δήμου διαψηφίσεις πάντως ἐπῖσχεν, καὶ ἦν πρὸς αὐτὰς ἀεὶ Διοσημία, εἴτε ἐναίσιον εἴτε ἐξαίσιον ἐγένετο* (cp. *ib.* 38. 29, 39. 35, 39. 39, 40. 17).

[4] Dion Chrys. *or.* 38 p. 138 Reiske *καὶ ὅταν συνερχομένων εἰς μάχην στρατῶν ἢ Διοσημία φανῇ αἰφνίδιος ἢ τῆς γῆς γένηται σεισμός, ἀποστρέφονται εὐθὺς οἱ ἄνθρωποι καὶ ἀποχωροῦσιν ἀπ' ἀλλήλων ὡς τῶν θεῶν οὐ βουλομένων αὐτοὺς μάχεσθαι.*

[5] This is implied by *Od.* 20. 112 ff. *Ζεῦ πάτερ,... | ἢ μεγάλ' ἐβρόντησας ἀπ' οὐρανοῦ ἀστερόεντος, | οὐδέ ποθι νέφος ἐστί· τέρας νύ τεῳ τόδε φαίνεις.* Similarly Servius regards a bolt from the blue as an omen, but a bolt from the clouds as a natural phaenomenon (Serv. *in* Verg. *Aen.* 7. 141, 9. 630).

[6] Polyain. 1. 32. 2. J. Melber 'Über die Quellen und den Wert der Strategemensammlung Polyäns' in the *Jahrb. f. class. Philol.* Suppl. 1885 xiv. 437 argues that the Leonidas of Polyain. 1. 32. 2 f. was not the hero of Thermopylai mentioned in Polyain. 1. 32. 1, but another Spartan general of the same name.

or thunder-clap[1].' Gossiping history is full of such inhibitions. An example or two will suffice. Stabrobates, the Indian king opposed to Semiramis, is said to have been immobilised 'when Zeus-signs befell him, intimating—so the seers declared—that he must not cross the river[2].' Agis and his army actually gave up the invasion of Attike in 426 B.C. because of a series of earthquakes[3] and that of Elis in 399 for a like reason[4]. In 388 or 387 Agesipolis marched against Argos, when another earthquake happened and his soldiers, recalling the action of Agis in 399, were for retiring. Agesipolis made excuses and pushed on; but, when further a thunderbolt fell in his camp, even he had enough of it and beat a retreat[5]. Galba on quitting his house, early in 69 A.D., to nominate Piso Licinianus as his successor encountered, according to Plutarch, 'great Zeus-signs': his speech in the camp was accompanied by incessant thunder and lightning, rain and darkness; obviously heaven did not approve of his choice[6].

Finally, a word may be added about the interpretation of Zeus-signs. The instances quoted above show that assemblies, law-courts, and armies viewed such signs with alarm and on their occurrence were apt to drop the business in hand. This after all was natural enough. In civil or military crises, when a superstitious public would be on the look out for omens, a sudden deluge of rain might well act as a deterrent, and a growl of thunder be taken to portend something sinister. What seems really remarkable is that side by side with this common-sense, or at least common-place, attitude an earlier view of a very different sort held its ground, a view which

[1] Hesych. *s.v.* *ἐχεσαμία· ὅτε θέρους ὄντος ψακάζει ἢ βροντή* (so cod.: M. Musurus *ψεκάζει ἢ βροντήσῃ*, H. Stephanus *ψεκάσῃ, ἢ βροντήσῃ*, J. Alberti *ψεκάζει, ἢ βροντήσει*, M. Schmidt *ψακάζῃ, ἢ βροντήσῃ*. I would rather retain the reading *ὅτε θέρους ὄντος ψακάζει, ἢ βροντή*. In any case cp. Aristoph. *nub.* 579 f. *ἢν γὰρ ᾖ τις ἔξοδος | μηδενὶ ξὺν νῷ, τότ' ἢ βροντῶμεν ἢ ψακάζομεν*).

'Εχεσαμία appears to be a Doric and perhaps Pythagorean (?) term, formed on the false analogy of *ἐκεχειρία*: cp. *ἐχεγλωττία, ἐχεμυθία, ἐχερρημοσύνη*—three words for 'silence,' of which the first (Loukian. *Lexiph.* 9) possibly, the second (Plout. *de curios.* 9, Iambl. *v. Pyth.* 32, 68, 104, 188, 226, cp. 94) and third (Iambl. *v. Pyth.* 246) certainly, were current in the school of Pythagoras (cp. O. Casel *De philosophorum Graecorum silentio mystico* Giessen 1919 pp. 30 ff., 52 ff.). That philosopher is expressly said to have discussed *Διοσημίαι* (Porph. *v. Pyth.* 25, Iambl. *v. Pyth.* 62). Hesych. *Διοσημεῖον· τεράστιον σημεῖον* is restored by M. Schmidt as the Doric (*Διοσαμία*)· *Διὸς σημεῖον. τεράστιον σημεῖον* to suit the *ordo verborum*.

[2] Diod. 2. 19. Philostr. *v. Apoll.* 2. 33 p. 75 Kayser states that, when the Egyptian Herakles and Dionysos invaded India, the sages (Brachmanes) dwelling between the Hyphasis and the Ganges *Διοσημίαις τε καὶ σκηπτοῖς βάλλοντες ἀποκρούονται σφᾶς ἱεροὶ καὶ θεοφιλεῖς ὄντες... ἐπεὶ δ' αὐτοὶ προσῆσαν, πρηστῆρες αὐτοὺς ἀπεώσαντο καὶ βρονταὶ κάτω στρεφόμεναι καὶ ἐμπίπτουσαι τοῖς ὅπλοις, κ.τ.λ.*

[3] Thouk. 3. 89, cp. *ib.* 87.

[4] Xen. *Hell.* 3. 2. 24.

[5] Xen. *Hell.* 4. 7. 4 ff., cp. Paus. 3. 5. 8.

[6] Plout. *v. Galb.* 23, cp. Tac. *hist.* 1. 18.

regarded the Zeus-sign as positive not negative, hortatory rather than minatory. We have reason to think that in the far past Greek magicians and kings claimed to be weather-makers. Salmoneus with his thunders is the stock example. That primitive belief did not pass away without leaving sundry traces of itself in the national literature. Among these I would reckon the encouraging thunder-peals[1] and lightning-flashes[2] vouchsafed to epic heroes. The kings of Troy traced their lineage through Dardanos back to Zeus, for whom they had special reverence[3], and more than one scion of the royal family appears to have been an adept at eliciting Zeus-signs. Ilos the grandfather of Priamos prayed Zeus for a sign and found next morning the Zeus-fallen Palladion lying before his tent[4]. Priamos asked Zeus for an omen of his favour, and Zeus sent a black eagle in response to his prayer[5]. Hektor too relied on Zeus and his lightning-signs[6]—indeed he himself bore the same title as Zeus, for Sappho spoke of Zeus as *Héktor*[7]. Again, when Odysseus prayed Zeus for a portent, forthwith there came thunder from a cloudless sky[8]. Similarly in an ode of Bakchylides[9] Minos, to prove that he is the son of Zeus, prays:

> Zeus my father, great and strong, hearken, if in very truth
> Phoinike's white-armed maid bare me to thee,
> Now send thou forth from heaven a swift
> Flash of streaming fire,
> A sign for all to know.

Whereupon—

> Zeus great and strong heard that immoderate prayer
> And planted honour infinite for Minos,
> Willing for his dear son
> To make it seen of all,
> Ay, sent the lightning.

Such scenes imply an underlying belief that the divine king could evoke a thunderstorm at will[10]. In early days this would have been done, not by a prayer to Zeus, but by mimetic means: nor would

the operator have been content to be called the son of Zeus; he would have passed for Zeus himself. The epic tradition survived into later times. To be struck by lightning was no small honour[1]; to be slain by it meant apotheosis[2]. Euthymos the boxer had a statue in his native town, the Italian Lokroi, and another at Olympia: both were struck by lightning on the same day—a fact which stamped the worship of the living man with the approval of Zeus[3]. Even to a dead man's tomb lightning added the lustre of divinity. According to Plutarch,—

> Aristotle declares that the honours paid to Lykourgos in Lakedaimon were less than he deserved. And yet those honours were very great; for he has a sanctuary there, and men sacrifice to him yearly as to a god. It is also said that, when his remains were brought home, his tomb was struck by a thunderbolt—a thing that has happened to hardly any other famous personage except Euripides, who died later and was buried near Arethousa in Makedonia. Indeed, lovers of Euripides quote as strong evidence of his merit the fact that he alone after death met with the same fate as the greatest favourite of heaven, the holiest character of the past[4].

Bianor the Bithynian (*c.* 17 A.D.), not content with this, makes the lightning strike his poet's grave three times over:

> In Macedonian dust thou liest low,
> But burnt by Zeus o' the Bolt hast done with clay.
> Thrice flashed his sky, Euripides, and so
> The tomb's tale of mortality purged away[5].

Among the Romans too the fall of lightning was diversely interpreted, being sometimes at least regarded as a presage of good[6]. When a statue of Horatius Cocles in the Comitium was struck, Etruscan *haruspices* bade move it to a lower position, where it would never be shone upon by the sun. But for this they were denounced and put to death. The statue was promoted to a higher place in the Area Volcani, and prosperity resulted for Rome[7]. In 172 B.C. the Columna Rostrata, erected on the Capitol to commemorate the sea-fight of 255 B.C., was shattered by a lightning-flash at night. The *decemviri* ordered a lustration of the city, a

public service of humiliation and prayer, and the sacrifice of larger victims both on the Capitol and on the promontory of Minerva in Campania; they further directed that games lasting ten days be celebrated as soon as possible for Iupiter *Optimus Maximus*. But the *haruspices* declared that the presage was a happy one, portending increase of territory and destruction of enemies[1]. Shortly before the death of Augustus, his statue on the Capitol was struck by lightning, and the word *Caesar* on its base lost the initial *C*. The seers concluded that he would live but *C*, *i.e.* a hundred, days longer and then become an *aesar*, *i.e.* the Etruscan term for a god[2]. One of the omens that marked out Antoninus Pius for the throne was the following: 'a thunderbolt fell from a clear sky on his house and did no damage[3].' Another omen of more doubtful character heralded the rise of the elder Maximinus: his lance was split by a thunderbolt, which bisected even the iron blade. The *haruspices* inferred that two emperors called by the same name would spring from his house, but would not reign for long[4]. At Interamna the cenotaphs of the emperor Tacitus and his brother Florianus were surmounted by two marble portraits thirty feet in height. These statues were shivered and scattered by lightning. Thereupon the *haruspices* predicted that a thousand years later a member of the imperial house should conquer the whole of the known world and, after resigning supreme power to the senate, die at the age of a hundred and twenty without leaving an heir behind him[5].

Thus the Zeus-sign retained its significance, good as well as bad, throughout the classical period of Greece and Rome. Julian, writing to Libanios, can still say: 'From Litarba I went to Berroia, and Zeus showed nothing but propitious signs, exhibiting his *Diosemía* for all to behold. There I stopped for a day, saw the *akrópolis*, and sacrificed a white bull to Zeus in kingly fashion[6].'

In dealing with Zeus as god of the weather it will be convenient to consider separately the evidence that connects him with lightning, thunder, earthquakes, clouds, wind, dew, and rain.

§ 3. *Zeus and the Lightning.*

(a) Lightning as a flame from the Burning Sky.

At the very moment when the sky was darkest Zeus vindicated his character as 'the Bright One.' The brilliant flash that glittered for an instant against the lowering storm sufficiently proved his presence and his power.

The Homeric poems use the same set of words to describe *aithér*, sun, moon, stars, lightning, fire. From which fact it has been fairly inferred that in popular belief lightning was made of the same material as *aithér*, etc.—was, indeed, but a flame from the flaming sky[1]. Here, as elsewhere, popular belief seems to have left its impress on philosophy; for Anaxagoras regarded lightning as a veritable streak of *aithér*, a fragment of the burning sky that had fallen into the lower stratum of *aér* or cloudy air[2], and the physicist Milon distinguished two species of lightning, diurnal and nocturnal, holding that the former was due to the action of the sun, the latter to that of the stars, upon water[3]. Nay more, the very word *astrapé*, the ordinary Greek term for 'lightning,' itself bears witness to the conviction that the electric flash was akin to all other *ástra*, sun, moon, stars, or Saint Elmo's fire[4].

Another name for the lightning was *keraunós*, the 'destroyer[5].' This is usually translated by the word 'thunderbolt,' but must not be taken to denote a solid missile of any sort. It means nothing more than the bright white flash in its destructive capacity.

i. Zeus *Keraunós.*

Now, if the lightning-flash was part and parcel of the *aithér* or burning sky, it was part and parcel of Zeus. For Zeus in his early

[4] Plat. *Crat.* 409 c τὰ δ' ἄστρα ἔοικε τῆς ἀστραπῆς ἐπωνυμίαν ἔχειν κ.τ.λ., *et. mag.* p. 159, 57 ff., *et. Gud.* p. 86, 32 ff., Eustath. *in Il.* p. 786, 15 f. Modern philologists accept the connexion: L. Meyer *Handb. d. gr. Etym.* i. 179 ἀστερ- and ἀστεροπή, 180 ἀστράπτειν, Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] pp. 59 f. ἀστήρ and ἀστραπή, Boisacq *Dict. étym. de la Langue Gr.* p. 92 ἀστράπη (*sic*). See further Plin. *nat. hist.* 2. 82 and 191.

[5] Κεραυνός is connected with κεραΐζειν, 'to destroy,' by L. Meyer *op. cit.* ii. 362, Prellwitz *op. cit.* pp. 19, 217, Boisacq *op. cit.* pp. 435, 440. These authorities cp. Sanskrit *çáru-ḥ*, 'dart'; Gothic *hairus*, Old Norse *hiǫrr*, Old Saxon *heru-*, 'sword'; Middle Irish acc. pl. *coire*, 'swords,'—which forms presuppose an Indo-European **k̂eru-s*, 'flint dagger' (?), but do not warrant the inference that the Greeks originally identified the lightning-flash with the thunder-stone (on which see *infra* § 3 (c)).

zoïstic stage *was* the burning sky[1]. Hence Herakleitos had common opinion behind him, when he called his elemental Fire both Zeus and *Keraunós*[2]. The same identification of Zeus with *Keraunós* accounts for an Orphic hymn, which consists of a prayer to Zeus that he will expend his fury on the sea or on mountain-summits and leave mankind in peace, but is headed by the title *Keraunoû*, 'of Keraunos[3].' The equation of Zeus with *Keraunós* is implied also, as H. Weil remarked[4], in the fragment of a Hesiodic *Theogony* which tells how Zeus swallowed Metis—'fearing lest she bear a second offspring stronger than Keraunos[5].' The logic of the passage and the parallel myth of Thetis[6] lead us to expect 'stronger than himself.' But, since the strength of Zeus is chiefly exhibited in the lightning-flash, the poet substitutes the latter for the former. Further evidence of Zeus *Keraunós* came to light in 1868, when P. Foucart found at Mantineia a rough block of limestone inscribed as follows in lettering of the fifth century B.C. (fig. 1)[7]:

Of Zeus Keraunós.

Fig. 1.

The stone appears to have marked some spot struck by lightning.

Such a spot would thenceforward be sacred to the fiery sky conceived as flashing downwards; in other words, it would be sacred to Zeus in the character of *Keraunós*[1].

ii. Zeus *Kataibátes*.

Hardly more advanced is the conception of Zeus that underlies his title *Kataibátes*, 'He who descends.' As far back as the close of the seventeenth century this title began to arouse the interest of scholars. E. Holthenus in a letter to J. G. Grævius declared that it had nothing to do with thunderbolts, but denoted Jupiter who 'descended' from heaven to enquire into the truth of worldly things, to punish sinners, and to benefit mankind. This hasty conjecture provoked a reply from P. Burmannus the elder, who in

[1] H. Usener in his *Götternamen* Bonn 1896—one of the greatest modern works on classical religion—argued that Indo-European gods have passed through three stages of development, *viz.* (1) as 'Momentary gods' (*Augenblicksgötter*), (2) as 'Departmental gods' (*Sondergötter*), (3) as 'Personal gods' (*persönliche Götter*). The first stage is represented by such individual and temporary divinities as the εἰρεσιώνη of the Athenian harvester or the spear by which the Arcadian Parthenopaios used to swear: the second, by such specific and limited divinities as those of the Roman *indigitamenta* (Varro's *di certi*) or of ancient Lithuanian cult: the third, by the great personal deities of Greece and Italy. Usener (*ib.* p. 286 ff. and more fully in the *Rhein. Mus.* 1905 lx. 1—30 = *Kleine Schriften* Leipzig and Berlin 1913 iv. 471—497) contends that Keraunos was first an *Augenblicksgott*, then a *Sondergott*, and lastly an attribute of a *persönlicher Gott*, *i.e.* that, to begin with, any and every lightning-flash was regarded as a divinity, that next men advanced to the more general conception of one lightning-god, and that finally he was absorbed into the larger personality of Zeus. The three stages in the evolution of Keraunos would thus be marked by the terms κεραυνοί, Κεραυνός, and Zeus Κεραύνιος.

With a general criticism of Usener's far-reaching theory I am not here concerned (for its validity in the Greek area see L. R. Farnell 'The place of the *Sonder-Götter* in Greek Polytheism' in *Anthropological Essays presented to Edward Burnett Tylor* Oxford 1907 pp. 81—100, and in the Italian area G. Wissowa 'Echte und falsche *Sondergötter* in der römischen Religion' in his *Gesammelte Abhandlungen zur römischen Religions- und Stadtgeschichte* München 1904 pp. 304—326), but with its special applicability to the case of Zeus Κεραυνός. Usener (*Rhein. Mus.* 1905 lx. 16 = *Kleine Schriften* Leipzig and Berlin 1913 iv. 484) holds that the very expression Zeus Κεραυνός involves an inner contradiction, since it unites the last with the first stage of his evolutionary sequence: Zeus had before the days of Homer developed into a *persönlicher Gott*, the hurler of the lightning; and, if he is here combined with an *Augenblicksgott*, the particular lightning-flash, we can only explain the combination by saying that side by side with the later development of a *persönlicher Gott* the earlier conception of an *Augenblicksgott* has persisted, clinging with amazing tenacity to the actual custom of considering a spot struck by lightning as the abode of a divinity. I confess, I find it easier to suppose—though the supposition is expressly deprecated by Usener—that in this remarkable inscription not only *Keraunós* but Zeus too is still in the zoïstic stage. If even in the philosophy of a Herakleitos Zeus as the fiery sky was equated with *Keraunós*, *à fortiori* might we look to find that combination of primitive ideas in the memorial of an Arcadian rite. On this showing there is no inner inconsistency in the title Zeus Κεραυνός; and we are of course still free to accept Usener's great theory as to the evolution of Indo-European gods.

a learned treatise cited most of the evidence both literary and monumental, and triumphantly demonstrated the essential connexion of the title *Kataibátes* with the lightning-cults of the ancient world[1].

The question has, however, been reopened of late by O. Gruppe, who propounds a wholly fresh solution of the problem[2]. *Kataibátes*—we are to suppose—was originally the name of an ancient deity dwelling in the depths of the earth and invoked by those who desired to conjure up rainy or stormy weather: hence he came to be compared with Zeus the lightning-god, and was ultimately regarded as himself the hurler of the thunderbolt. In other words, a subterranean *Kataibátes* preceded the celestial Zeus *Kataibátes*. In support of this suggestion, Gruppe points out that a Cilician inscription of the second century A.D. mentions 'the god *Kataibátes* and Persephone' together[3]; that in Rhodes and at Athens, according to a scholiast on Aristophanes, Hermes was not only *Chthónios* but also *Kataibátes*[4]; that the same epithet is applied to the river Acheron[5]; and that *katabásion* was a word used of an underground cavern or chasm at Eleusis[6], Lebadeia[7], Aigialos[8], Hierapolis in Phrygia[9], etc.[10] Indeed, it cannot be denied that the title *Kataibátes* would be perfectly appropriate to any deity who descended into the underworld. Nevertheless, it will be observed that the only direct evidence for *Kataibátes* as a separate chthonian divinity is a Cilician inscription of Roman date, whereas the lightning-flash of Zeus is called *kataibátes* by Aischylos as early as 467–458 B.C.[11] Zeus *Kataibátes* himself appears in Greek literature

[1] The letter of E. Holthenus (Trajecti ad Rhenum, pridie Id. Maj. MDC XCIX) is reprinted from the *Bibliotheca novorum librorum* 1699 p. 344 in the second edition of P. Burmannus *Vectigalia populi Romani et* Ζεὺς Καταιβάτης Leidae 1734 p. 217 ff. Holthenus had relied on Ov. *met.* 1. 211 ff., *ib.* 230 f., *fast.* 3. 327 ff.

from 421 B.C. onwards[1], and is by the universal testimony of the grammarians and lexicographers the god 'who makes to descend' the thunderbolts[2]. This indeed is not quite exact as a rendering of his title, which should rather be the god 'who descends' himself in the form of a thunderbolt; but it sufficiently indicates that the epithet denoted the fall of the lightning-flash from sky to earth.

(*a*) The altars of Zeus *Kataibátes*.

Zeus *Kataibátes* did not often acquire civic importance. But in Syria, where the cult of the thunderbolt played a large part[3], he rose to the rank of a state-deity. Imperial coppers of Kyrrhos show Zeus enthroned on a rock[4] with thunderbolt and sceptre, and the legend expressly designates him 'Zeus *Kataibátes* of the Cyrrhestians' (fig. 3)[5]. Frequently an eagle is added at his feet (fig. 4)[6].

Sometimes the god is seated in his temple (figs. 5, 6)[1]. But

Fig. 3.

Fig. 4.

Fig. 5.

Fig. 6.

usually the cult was a more modest affair. Thus on the top of the hill Perianti in Melos there is a rough rock-cut altar simply

[1] *Brit. Mus. Cat. Coins* Galatia, etc. p. 137 Philippus Senior, p. 137 pl. 17, 6 Philippus Iunior (=my fig. 5), *Hunter Cat. Coins* iii. 135 Philippus Iunior, Anson *Num. Gr.* v. 65 no. 430 pl. 10 Philippus Iunior, Eckhel *Doctr. num. vet.*[2] iii. 260 f., Rasche *Lex. Num.* ii. 1168 f. Caracalla, Philippus Senior, Philippus Iunior, Suppl. ii. 350 f. Elagabalos, Philippus Senior, Philippus Iunior, Overbeck *Gr. Kunstmyth.* Zeus p. 214 f. Münztaf. 3, 17, Head *Hist. num.*[2] p. 777.

The legend ΔΙΟC ΚΑ ΤЄΒ ΑΤΟΥ ΚΥΡΗCΤΩΝ involves two peculiarities in spelling. The former, Κατεβάτης for Καταβάτης, is very frequent from the time of Trajan onward: some specimens struck by Philippus Senior even shorten the title to Κτεβάτης (*Brit. Mus. Cat. Coins* Galatia, etc. p. 137 no. 32 ΔΙΟCΚΤЄ ΒΑ ΤΟΥ ΚΥΡΗCΤΩΝ) —I figure a sample in my collection (fig. 6). The latter, Κυρηστῶν for Κυρρηστῶν, is common on coins struck by the Philippi, and regular in ecclesiastical and Byzantine writers (Smith *Dict. Geogr.* i. 737).

The running ram above the temple was regarded by W. Wroth as 'a mint-symbol, corresponding to the Capricorn at Zeugma, and (perhaps) to the Pegasos at Samosata' (*Brit. Mus. Cat. Coins* Galatia, etc. pp. 1 f., 137 n.*). The closest parallel, however, is the running ram above the temple of Tyche at Antiocheia on the Orontes (*ib.* p. 222 pl. 25, 12, p. 229 pl. 26, 4 f.), which 'has been explained by K. O. Müller [*Antiquitates Antiochenae* Gottingae 1839 p. 25] as a sign of the zodiac, indicating the period of the year at which the foundation of the city took place' (W. Wroth *ib.* p. lix citing J. de Witte in the *Rev. Num.* 1844 p. 11). Possibly the ram, when placed above a building, should rather be taken to represent an *akrotérion*, comparable *e.g.* with the eagle on coins of Seleukeia Pieria (Append. B Syria) or with the more ambitious groups on coins of Berytos (*Brit. Mus. Cat. Coins* Phoenicia p. 77 f. pl. 10, 4 and 6, p. 81 ff. pl. 10, 9—11, Anson *Num. Gr.* v. 54 f. nos. 361, 363 pl. 8). If so, it is probable (cp. *supra* i. 292 ff. for solar *akrotéria*, i. 346 ff., 428 ff. for solar ram) that this ram was a prophylactic sun-sign. Overbeck *Gr. Kunstmyth.* Zeus p. 215 hazards the very precarious suggestion that it was 'das Symbol der Wolke, aber der fruchtbaren, lichten Wolke.'

inscribed with the Doric name of Zeus *Kataibátas* (fig. 7)[1]. A rock that crops out from the Three Churches field in the same locality is probably another open air altar and bears the remains of a similar inscription[2]. Sir Cecil Smith remarks: 'The exposed and prominent position of these two rocks is appropriate to the divinity "that descends in thunder and lightning[3]."' Again, an oblong stone

Fig. 7.

Fig. 8.

altar found below the *Agora* at Thera is inscribed with the same words (fig. 8)[4], which—as M. P. Nilsson points out—need not be taken to denote that the spot had actually been struck by lightning, but may have served a merely prophylactic or prudential purpose[5].

A marble block from *Koutiphari* near Thalamai in Lakonike com-

[4] *Inscr. Gr. ins.* iii Suppl. no. 1360 with fig. (=my fig. 8), F. Hiller von Gaertringen *Die Insel Thera* Berlin 1904 iii. 174 fig. 171 Διὸς Κα|ταιβάτα.

[5] M. P. Nilsson in the *Rhein. Mus.* 1908 lxiii. 315 ('sein Altar diente so zu sagen als Blitzableiter').

memorates Zeus *Kabátas*, a pre-Doric[1] form of *Katabátas*, and adds some details as to his ritual (fig. 9)[2]. The lettering is that of the early fifth century B.C., and the dedicator, a certain Gaisylos[3], prescribes that once in four years an offering of meal (?)[4] be made to the god. The period of this private sacrifice was probably regulated by the great public *pentaeterís* of Zeus *Olýmpios*[5]. The meal(?) may imply the chthonian[6] nature of a deity, who with his fructifying stroke penetrated the dark womb of earth.

[1] So F. Solmsen 'Vordorisches in Lakonien' in the *Rhein. Mus.* 1907 lxii. 329—338, comparing Alkm. *frag.* 38. 2 Bergk[4] (56. 2 Hiller—Crusius) *καβαίνων*, Hesych. *s.v. κάβασι· κατάβηθι. Λάκωνες*, and the like.

[2] Petrides in Πανδώρα 1868 xviii. 338, E. S. Forster in the *Ann. Brit. Sch. Ath.* 1903—1904 x. 171 f., *Inscr. Gr. Arc. Lac. Mess.* i no. 1316 pl. 1. Cp. Nilsson *Gr. Feste* p. 473 and in the *Rhein. Mus.* 1908 lxiii. 313—316, F. Solmsen *ib.* 1907 lxii. 329—338. I figure the inscription as published by E. S. Forster *loc. cit.*, amending lines 4 and 5 and completing line 6 by the help of the facsimile in *Inscr. Gr. Arc. Lac. Mess.* i pl. 1. Forster subsequently informed Nilsson (*Gr. Feste* p. 473) that the *τ* of *πέμπτωι* in line 2 was not missing, but inserted on a smaller scale. W. Kolbe, however, states (*Inscr. Gr. Arc. Lac. Mess.* i. 245): 'Neque vero ullum vestigium in ectypo claro agnosci potest.' On this showing the text runs: Διὸς Καβάτα. | *πέμπ<τ>ωι* | *ἔτει* | *θόην* | [*ἀ*]*λήιον.* | Γαι*ρύλω*. | Γαι*ρύλω*.

[3] The reading Γαι*ρύλω* is that of W. Kolbe, who cp. Plout. *v. Dion.* 49 Γαισύλῳ τῷ Σπαρτιάτῃ. E. S. Forster in a letter to M. P. Nilsson (*Gr. Feste* p. 473) had conjectured Γαιβόλο[ι] as a second epithet of Zeus: but this, as F. Solmsen (*Rhein. Mus.* 1907 lxii. 330) remarks, would at least have been Γαιαβόλοι. R. Meister in the *Ber. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1905 p. 281 n. 1 suggested Γαιαf*όχοι* on the strength of Roehl *Inscr. Gr. ant.* no. 79, 9=Roberts *Gk. Epigr.* i. 262 ff. no. 264, 9=Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 10 f. no. 4416, 9=Michel *Recueil d'Inscr. gr.* no. 946, 9=M. N. Tod and A. J. B. Wace *A Catalogue of the Sparta Museum* Oxford 1906 p. 64 f. no. 440, 9 *ἐν* Γαιαf*όχω*. M. P. Nilsson in the *Rhein. Mus.* 1908 lxiii. 314 abandons the search for a cult-title and proposes γαιᾶχο[ν], 'der Ackerbesitzer' (cp. Roehl *Inscr. Gr. ant.* no. 79, 3 Πολιάχοι), which, as W. Kolbe points out, suits neither the space nor the letters on the stone.

[4] M. P. Nilsson's [*ἀ*]λήιον, cp. Hesych. ἀλήσιον· *πᾶν τὸ ἀληλεσμένον* (*Rhein. Mus.* 1908 lxiii. 314 f.), is much better than E. S. Forster's [*ἐ*]λήιον for *ἰλήσιον, 'a propitiatory offering' (?) (*Ann. Brit. Sch. Ath.* 1903—1904 x. 172), which would necessarily appear as [*ἀι*]λήιον, cp. *Olympia* v. 367 ff. no. 252=Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 5 f. no. 4405=Roberts *Gk. Epigr.* i. 261 f. no. 261 *ἱληf*ώ[*ς*] (F. Solmsen in the *Rhein. Mus.* 1907 lxii. 330).

[5] M. P. Nilsson in the *Rhein. Mus.* 1908 lxiii. 315.

[6] P. Stengel *Opferbräuche der Griechen* Leipzig and Berlin 1910 pp. 13—16 ('Οὐλαί'), 17—33 ('Opferblut und Opfergerste') shows that the Homeric custom of strewing barley-grains (*οὐλαί, οὐλόχυται*) on the ground before sacrifice originated in an offering to Ge as producer of vegetable life and in post-Homeric times acquired a cathartic meaning (cp. P. Stengel 'Οὐλαί' in *Hermes* 1894 xxix. 627—629, H. von Fritze 'Οὐλαί' *ib.* 1897 xxxii. 235—250, H. von Prott in the *Jahresbericht über die Fortschritte der classischen Altertumswissenschaft* 1900 cii. 82 f., L. Ziehen 'Οὐλόχυται' in *Hermes* 1902 xxxvii. 391—400).

The use of ground barley-grains or meal was presumably of later origin (so Theophr. *ap.* Porph. *de abst.* 2. 6, cp. Plout. *quaestt. Gr.* 6, schol. *Il.* 2. 410, Eustath. *in Il.* p. 132, 22 ff., Souid. *s.v. οὐλοθυτεῖν*—cited by P. Stengel), but of similar significance. Odysseus is bidden by Kirke to dig a hole in the earth and to pour drink-offerings for the dead *ἐπὶ*

The cult of Zeus *Kataibátes* was by no means confined to the Dorians. In Paros at the northern foot of Mount Kynados close to

δ' ἄλφιτα λευκὰ παλύνειν (*Od.* 10. 520, cp. Eustath. *in Od.* p. 1668, 28 ff.). Initiates into the mysteries were sprinkled with meal (Aristoph. *nub.* 258 ff. with schol. *ad loc.*). The καγηφόροι had their heads whitened with it (Hermipp. *dei frag.* 2 (*Frag. com. Gr.* ii. 389 f. Meineke) *ap.* schol. Aristoph. *av.* 1551, cp. Aristoph. *eccl.* 730 ff.). So had the three mantic Semnai of Parnassos (*h. Herm.* 552 ff.: see Mr E. E. Sikes *ad loc.* and his Append. iii). We hear also of ἀλευρομάντεις, ἀλφιτομάντεις, ἀλφιτοσκόποι, κριθομάντεις (A. Bouché-Leclercq *Histoire de la divination dans l'antiquité* Paris 1879 i. 182 and in Daremberg—Saglio *Dict. Ant.* ii. 299, E. Riess in Pauly—Wissowa *Real-Enc.* i. 1374, 1637, W. R. Halliday *Greek Divination* London 1913 p. 185, and for mediaeval relics of the art W. H. D. Rouse in *Folk-Lore* 1899 x. 552). In Kos on the first day of the month Panamos (=Boedromion 1) meal was burnt for Hestia Ταμία (W. R. Paton—E. L. Hicks *The Inscriptions of Cos* Oxford 1891 p. 285 f. no. 401, 8 ff. part of a *stele* of blue marble from Kephalos [.....Πα]νάμου νευμηνίᾳ· 'Α|[.....] καὶ 'Ιστίᾳ Ταμίᾳ πλ(α)|[κοῦντα (?), ἀλφί]των ἡμίεκτον κα[ὶ]|[.... ταῦτα θύε]ται ἐπὶ τᾶς ἰστίας, Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 1. 403 no. 3731, 8 ff. C. T. Newton *The Collection of Ancient Greek Inscriptions in the British Museum* Oxford 1883 ii. 104 f. no. 338, 8 ff. read [κριθέ]ων (?) for [ἀλφί]των in line 10). Meal is burnt by the Coan (?) Simaitha as a means of recalling her truant lover (Theokr. 2. 18 ff. ἄλφιτά τοι πρῶτον πυρὶ τάκεται· ἀλλ' ἐπίπασσε, | Θεστυλί... | πάσσ' ἄμα καὶ λέγε ταῦτα· 'τὰ Δέλφιδος ὀστία πάσσω,' cp. schol. vet. Theokr. 2. 18a Wendel p. 275, 7 f. εἰώθασιν αἱ φαρμακίδες κεχρῆσθαι ἀλεύροις, 18b Wendel p. 275, 9 f. ὡς τῶν μαγευουσῶν ἄλφιτα θυουσῶν. ταῦτα δὲ καὶ θυλήματα ἔλεγον). It is also repeatedly mentioned by the magical *papyri* as an ingredient in binding charms (C. Wessely *Griechische Zauberpapyrus von Paris und London* Wien 1888 p. 85 f. pap. Par. 2583, 2586 (both in an ἐπάναγκος λόγος), 2647 (in ἐχθρόν τι θυμίασμα), *id. Neue griechische Zauberpapyri* Wien 1893 p. 38 Brit. Mus. pap. 121. 548=F. G. Kenyon *Greek Papyri in the British Museum* London 1893 i. 101 no. 121, 539 κατανάγκης ἄλευρα (where κατανάγκη is the plant so named), C. Wessely *Griechische Zauberpapyrus von Paris und London* Wien 1888 p. 112 Brit. Mus. pap. 46. 386=F. G. Kenyon *Greek Papyri in the British Museum* London 1893 i. 77 no. 46, 372 (in a charm for procuring an oracular dream), cp. C. Leemans *Papyri Graeci Musei Antiquarii Publici Lugduni-Batavi* Leyden 1885 ii. 221 pap. X pag. 6, 29 f. τρίβουσι χρυσὸν καὶ | μόλιβον λιπίτα (leg. λεπίδα) ὡς ἄλευρα (in a recipe for gilding bronze)). The sacrificial use of meal is further attested by the Pythagorean dictum in D. Erasmus *adagia* chil. 1 cent. 1 (ed. Parisiis 1571 p. 20) ne sacrificato sine farina μὴ θύειν ἄτερ ἀλφίτων=Plout. *v. Num.* 14.

For Latin evidence see *e.g.* Plaut. *Amph.* 2. 2. 107 f. te prodigiali Iovi | aut mola salsa hodie aut ture conprecatam oportuit, Cic. *de div.* 2. 37 caput est in iecore, cor in extis: iam abscedet, simul ac molam et vinum insperseris, Verg. *ecl.* 8. 82 sparge molam, *Aen.* 2. 132 f. mihi sacra parari, | et salsae fruges, 4. 517 ff. ipsa mola manibusque piis altaria iuxta, | ... | testatur moritura deos, 5. 744 f. the church named *Panagias Koimesis* is a broken base, the upper surface of which is holed and inscribed :

ΔΙΟΣ
ΚΑΤΑΙΒΑΤΕΩ

'Of Zeus *Kataibátes*.'

Near by lies the *stéle*, which originally fitted into the hole[1]. At Athens too Zeus *Kataibátes* was worshipped[2]. A square base or altar of Hymettian marble, built into a later fabric outside the precinct of Zeus *Olýmpios* to the north, had the same inscription as the altars already mentioned : to judge from the shape of the letters, it was erected in the first century B.C.[3] It is known also that Zeus *Kataibátes* had an altar in or near the Akademeia, where he bore the further title of *Mórios*[4]. Finally, the cult of this deity is pre-

instituit deos fruge colere et mola salsa supplicare atque, ut auctor est Hemina (*frag.* 12 in *Hist. supposed by the fact that the spot where Demetrios Poliorketes, the would-be Zeus[1], first set foot on Athenian soil was consecrated to him as Demetrios *Kataibátes*[2].

(β) The *ábata* of Zeus *Kataibátes*.

The ground adjoining such altars was sometimes treated as an *ábaton* or holy place 'not to be trodden' by profane feet. At Olympia near the great altar of ashes was 'an altar of *Kataibátes* Zeus protected on all sides by a fence[3].' Built into the ruins of a Turkish house to the north of the north-eastern corner of the Parthenon was a broken slab of Pentelic marble, which proves the existence of a lightning-*ábaton* on the Akropolis at Athens[4]: its inscription, which appears to date from the latter part of the fourth century B.C., runs as follows:

'Holy ground of Zeus *Kataibátes*[5].'

An almost identical inscription was discovered on a fragment of marble south of the Akropolis in or near the Asklepieion[6]. There can be no doubt that these *ábata* were simply places that had been struck by lightning and were therefore regarded as the habitation of Zeus *Kataibátes*. The *Etymologicum Magnum* says that *enelýsia* or spots struck by lightning were dedicated to Zeus *Kataibátes* and spoken of as *ádyta* or *ábata*[7]. Pollux similarly states that *enelýsia*

[1] *Folk-Lore* 1904 xv. 302 f., *supra* i. 58.

[2] Plout. *v. Demetr.* 10 καὶ τὸν τόπον, ὅπου πρῶτον ἀπέβη τοῦ ἅρματος, καθιερώσαντες καὶ βωμὸν ἐπιθέντες Δημητρίου Καταιβάτου προσηγόρευσαν, Clem. Al. *protr.* 4. 54. 6 p. 42, 24 ff. Stählin καὶ ἔνθα μὲν ἀπέβη τοῦ ἵππου Ἀθήναζε εἰσιών, Καταιβάτου ἱερόν ἐστι Δημητρίου, βωμοὶ δὲ πανταχοῦ.

[3] Paus. 5. 14. 10 τοῦ δὲ Καταιβάτου Διὸς προβέβληται μὲν πανταχόθεν πρὸ τοῦ βωμοῦ φράγμα, ἔστι δὲ πρὸς τῷ βωμῷ τῷ ἀπὸ τῆς τέφρας τῷ μεγάλῳ. On this passage see W. Dörpfeld in *Olympia* i. 84 (altar no. 31).

[4] A. Lolling in the Δελτ. Ἀρχ. 1890 p. 144 f. suggested that the precinct to which this stone belonged might be brought into connexion with the statue of Ge praying Zeus to rain upon her (Paus. 1. 24. 3) and the rock-cut inscription of Ge Καρποφόρος (*Corp. inscr. Att.* iii. 1 no. 166). W. Judeich *Topographie von Athen* München 1905 p. 255 is content to say: 'Mit Wahrscheinlichkeit dürfen wir auf der Burg...ein Heiligtum des Zeus Kataibates vermuten.'

[7] *Et. mag.* p. 341, 5 ff. ἐνηλύσια· εὐκίνητα. καὶ ἤλυσιν· τὴν ἔλευσιν (we should perhaps read εὐκίνητα, παρὰ τὴν ἤλυσιν τὴν ἔλευσιν). Αἰσχύλος ἐν Ἀργείοις· Καπανεύς μου (μοι F.) καταλείπεται λοιποῖς ἀκέραυνος ἀρούρων (ἀρόρων D.F.P., ἄρθρων M. Schmidt) ἐπηλυσίων (ἐνηλυσίων Stanley) ἀπέλιπεν (A. Nauck prints as Aisch. *frag.* 17 Καπανεύς μοι κατα-

were places on to which a bolt from the sky had dashed down or descended, that the Zeus of the bolt was called *Kataibátes*, and that such places were fenced round and left untouched[1]. Artemidoros adds that altars were erected there and sacrifices offered[2].

(γ) The *Dióbletos* or Zeus-struck man in Elysium.

Spots where Zeus had descended in the form of lightning were known, not only as *enelýsia*, but also as *elýsia*[3]. Fenced about from the foot of common mortals and reserved for Zeus himself, they were both in name and in nature so many 'Elysian fields[4].' Consequently a man struck by lightning was literally *enelýsios*, 'in Elysium[5].' To modern ears it sounds a grim jest to talk of Elysium in such a case. But, after all, the attitude of the ancients was thoroughly consistent. Zeus fell as a lightning-flash. The man on whom he fell was therefore *Dióbletos* or *Dioblés*, 'struck by Zeus[6].' And the divinity thus conveyed to him made him immortal, or at least imperishable—witness Plutarch:

We all know well enough that the bodies of those who are struck by lightning do not decay. Many persons neither burn them nor bury them, but just fence them round and leave them, so that their corpses are seen in a state of perpetual

λείπεται | λοιποῖς ἀκέραυνος ἄρθρων | ἐπηλυσίων ἀπέλιπεν, but notes 'locus corruptissimus'). *οἱ δὲ τὰ κατασκηφθέντα. οὕτως εἰς τὸ Ῥητορικόν. εἰς δὲ τοὺς Ἐτυμολόγους εὕρον·...ἐνηλύσια· ἐνηλύσια λέγεται εἰς ἃ κεραυνὸς εἰσβέβηκεν· ἃ καὶ ἀνατίθεται Διὶ Καταιβάτῃ, καὶ λέγεται ἄδυτα καὶ ἄβατα.* Cp. Hesych. *s.v. ἐνηλύσια· τὰ κατασκηφθέντα χωρία <ἐνη* (add. M. Musurus) > *λύσια λέγονται· ἔνιοι δὲ εὐκίνητα, παρὰ τὴν <ἥλυσιν τὴν* (add. M. Schmidt) > *ἔλευσιν· ἄλλοι δὲ τὰς ἐν τοῖς ἀβάτοις χωρίοις ἀφιδρυμένας νύμφας.*

[1] Poll. 9. 41 *τὰ μέντοι ἐνηλύσια οὕτως ὠνομάζετο εἰς ἃ κατασκήψειε βέλος ἐξ οὐρανοῦ, ὃ καὶ ἐνσκῆψαι καὶ ἐγκατασκῆψαι καὶ κατελθεῖν ἔλεγον, καὶ τὸν Δία τὸν ἐπ' αὐτῷ Καταιβάτην. περιειρχθέντα δὲ τὰ ἐνηλύσια ἄψαυστα ἀνεῖτο.* The expression *τὸν Δία τὸν ἐπ' αὐτῷ* denotes strictly 'the Zeus set over it' (the bolt).

[2] Artemid. *oneirocr.* 2. 9 *ὁ κεραυνὸς τὰ μὲν ἄσημα τῶν χωρίων ἐπίσημα ποιεῖ διὰ τοὺς ἐνιδρυμένους βωμοὺς καὶ τὰς ἐν αὐτοῖς γινομένας θυσίας, τὰ δὲ πολιτελῆ χωρία ἔρημα καὶ ἄβατα ποιεῖ, οὐδεὶς γὰρ ἐν αὐτοῖς ἐνδιατρίβειν ἔτι θέλει.*

[3] Hesych. *s.v. ἠλύσιον·...ἄλλοι κεκεραυνωμένον χωρίον ἢ πεδίον· τὰ δὲ τοιαῦτά εἰσιν ἄβατα, καλεῖται δὲ καὶ ἐνηλύσια· Πολέμων δὲ Ἀθηναίους φησὶ καὶ ἄλλοι τινὲς τὸ κατασκαφὲν χωρίον ἢ ἱερόν* (regarding *καὶ ἄλλοι τινές* as a gloss on *Πολέμων*, *κατασκαφέν* with L. Küster as a blunder for *κατασκηφθέν*, and *ἢ ἱερόν* as a gloss on *χωρίον*, we may emend *Πολέμων δὲ Ἀθηναίους φησὶ τὸ κατασκηφθὲν χωρίον ἠλύσιον καλεῖν*) = Souid. *s.v. ἠλύσιον* = Phot. *lex. s.v. ἠλύσιον*, cp. *et. mag.* p. 428, 30 ff. See further G. Bernhardy on Souid. *loc. cit.* and C. Müller on Polemon *frag.* 93 (*Frag. hist. Gr.* iii. 146) = *frag.* 5 (*Frag. gr. Kultschr.* p. 89 Tresp).

[4] The lexicographers cited in the preceding note state that *Ἠλύσιον* is, according to some, *κεκεραυνωμένον χωρίον ἢ πεδίον*. Eudok. *viol.* 438 in her account of the Elysian plain repeats the statement: *οἱ δὲ τὸ κεκεραυνωμένων χωρίον ἢ πεδίον*. L. Meyer *Handb. d. gr. Etym.* i. 640 is not averse from connecting *Ἠλύσιον*, 'Elysium,' with *ἠλύσιον*, 'a spot struck by lightning.'

[5] Hesych. *s.v. ἐνηλύσιος· ἐμβρόντητος. κεραυνόβλητος.*

[6] Stephanus *Thes. Gr. Ling.* ii. 1508 c *s.vv.* Διοβλής, Διόβλητος, Διόβολος.

incorruption... I imagine too that the divine substance [sulphur] gets its name from the likeness of its smell to the fiery and pungent smell rubbed out of things hit by lightning; and it seems to me that this is why even dogs and birds abstain from the bodies of those who have been struck by Zeus[1].

Others inform us that victims of lightning were buried on the spot where they fell[2]. Artemidoros says that a man so struck down, even if poor, became suddenly famous. If a slave, he had fine clothing put upon him, as though he were freed, and men approached him as one honoured by Zeus. Nay more, every man struck by lightning was treated as a god[3].

(δ) Death by lightning as euthanasia.

In this connexion it should be observed that various myths represent death by lightning as a kind of euthanasia[4]. Kapaneus, when struck, becomes 'a sacred corpse[5]' and receives 'a sacred tomb[6].' His pyre is described as 'Zeus' treasury[7]'—a remarkable phrase, to which H. Usener has justly drawn attention[8]. When Herakles' pyre had been kindled, thunderbolts fell from the sky and consumed it: his friends, finding no bones, concluded that he had gone from men to join the gods, and thereupon worshipped him as a hero[9]. Asklepios was struck by a thunderbolt from Zeus, and

subsequently apotheosised[1]. Erechtheus, slain by Zeus with a thunderbolt at the request of Poseidon[2], was venerated as a god in the Erechtheion at Athens. Romulus likewise was caught up to heaven in a thunderstorm, and afterwards appeared to Proculus Iulius in more than mortal beauty and announced that he had become the god Quirinus[3]. And sundry kings, who posed as Zeus or Iupiter during their life-time, are said to have met their death by a thunderbolt launched from the hands of the offended deity[4]—a moralising statement which has probably obscured the real significance of their fate[5].

Semele too was blasted by lightning (pl. i and figs. 10—12)[6].

the Museo Civico at Bologna (Pellegrini *Cat. vas. gr. dipint. Bologna* pp. 154, 156 no. 313 A. Zannoni *Gli scavi della Certosa di Bologna* Bologna 1876 p. 165 pl. 39, 1, 2 (=my fig. 11), 3 (=my fig. 12), 4 and pl. 40, 4, H. Heydemann *Dionysos' Geburt* p. 8 n. 20, O. Jessen *loc. cit.* iv. 676): (*a*) Zeus, with olive-wreath and *chlamýs*, strides to right,

The critical moment in her myth is variously reported by the mythographers. According to Apollodoros[1], Semele begged Zeus to appear to her in the same form in which he had wooed Hera. Thereupon Zeus came to her chamber on a chariot with lightnings and thunders, and hurled a bolt. Semele in terror gave untimely birth to Dionysos and died. Other accounts say nothing about the chariot: Semele could not support the sight of Zeus the god of thunder and lightning, and was killed by it[2]. Others, again, are more precise. Semele was burnt[3], or actually struck by a thunderbolt and

brandishing a thunderbolt in his right hand and grasping a sceptre in his left. Semele flees to right, looking back, her right hand extended towards Zeus in an attitude of supplication, her left holding a flower. Behind Zeus a female companion of Semele, likewise holding a flower, escapes to left. (*b*) Two other companions of Semele hasten, from left and right, to announce the event to her father, Kadmos. (4) A *kratér* (lid lost) in the Louvre (G 412), past the climax of the fine style (460—440 B.C.) and largely repainted (H. Heydemann *Dionysos' Geburt* p. 8 n. 21): (*a*) Zeus, with bay-wreath and *chlamýs*, strides to right, brandishing a thunderbolt in his right hand and grasping a sceptre in his left. Semele flees to right, looking back; she lifts her *chitón* with her right hand and raises her left towards her shoulder. Behind Zeus a female companion of Semele escapes to left. Before Semele stands her white-haired father, his right hand raised in astonishment, his left holding a staff. (*b*) Four men and women conversing.

The type attested by these vases begins as a mere combination of the early striding Zeus (*supra* i. 84 ff. figs. 52—54) with the early running maiden. The eagle of Zeus is omitted, and his left hand either holds a sceptre (*infra* § 3 (c) iv (*a*)) or grasps the shoulder of Semele. Next, under the influence of flower-plucking scenes (Europe, Thaleia, etc.), Semele is given a flower, while a comrade likewise holding a flower forms a suitable pendant. Finally, the group is amplified by the introduction of Kadmos and other figures, either on the reverse or on the obverse of the vase.

Vases that represent Zeus pursuing the female with lowered bolt cannot be assumed to depict the Semele-episode; for the bolt may be a mere attribute. *E.g.* an *amphora* formerly in the possession of the Neapolitan dealer Barone (J. de Witte 'Jupiter et Sémélé' in the *Rev. Arch.* 1862 ii. 29 f. fig. Zeus, with *chlamýs* worn shawl-wise, holding a thunderbolt in his lowered right hand, a sceptre in his left, pursues towards the right a running female, who looks back with gestures of alarm), a large *hydría* from Vulci now at Paris (De Ridder *Cat. Vases de la Bibl. Nat.* ii. 331 no. 439 confused description, P. Milliet—A. Giraudon *Vases peints du Cabinet des Médailles & Antiques* (*Bibliothèque Nationale*) Paris 1891 vi^e^ classe, xi^e^ série ii pl. 75 = my fig. 13 Zeus, with myrtle (?)-wreath and *chlamýs* worn shawl-wise, holding a thunderbolt in his lowered left hand, advances towards the left and seizes with outstretched right hand a running female, who looks back with gestures of alarm and supplication), and other vases noted by H. Heydemann *Dionysos' Geburt* p. 7 n. 18.

The brown paste at Berlin usually cited in this connexion (G. Winckelmann *Monumenti antichi inediti*[2] Roma 1821 ii. 1. 2 f. pl. 1, T. Panofka *Dionysos und die Thyaden* (extr. from the *Abh. d. berl. Akad. 1852* Phil.-hist. Classe p. 377 ff.) Berlin 1853 p. 36 ff. pl. 3, 4, Müller—Wieseler *Denkm. d. alt. Kunst* ii. 24 pl. 3, 46^a^, C. W. King *Antique Gems and Rings* London 1872 i. 483 fig. = Sir John Sandys *The Bacchae of Euripides*[3] Cambridge 1892 pp. cxxxii f., 1 fig., etc.) represents neither Zeus nor Semele: see Furtwängler *Geschnitt. Steine Berlin* p. 227 no. 6219 pl. 42, *id. Ant. Gemmen* i. pl. 36, 20, ii. 175, iii. 416 n. 2.

[1] Apollod. 3. 4. 3.

slain[1]. The earliest definite version of the occurrence is in the *Bakchai* of Euripides, who speaks of—

> Semele brought to bed by the lightning-fire[2]

and further of—

> The flame of Zeus-fire living yet[3].

These expressions may be taken to imply the more primitive idea that Zeus descended upon Semele in the form of a lightning-flash. And such seems to be the conception of Philostratos also. For, in describing a picture of Semele's death, he notes the personified figures of stern-looking Thunder and Lightning with flashing eyes, and adds that fire was dashing down from the sky upon the palace, but makes no mention of Zeus beyond saying that 'A cloud of fire compassed Thebes about and burst upon the roof of Kadmos, when Zeus went courting Semele[4].' Nonnos too in his high-flown style makes Semele beseech her lover:

> Oh, I would clasp the flame I love, and joy
> To feel the flash, to finger thunderbolts[5].

The same author goes on to tell how Zeus took the bride whom he had burnt to dwell with him in heaven:

> Yea, with pure gleaming fire she laved afresh
> Her form and won Olympos' endless life[6].

As Pindar had phrased it, nearly a thousand years before,—

> She lives among the Olympians, slain by the roar
> Of lightning, long-haired Semele,
> And Pallas loves her ever,
> And Zeus the sire too, and his ivied son[7].

Semele was in fact a typical *Diobletos*. The Naxians declared that Zeus 'struck Semele with a thunderbolt before she brought forth her child, in order that being born, not of a mortal mother, but of two immortal parents, he might be immortal from his birth[8].' Charax of Pergamon, a historian of the second or third century A.D., is even more explicit: 'When the thunderbolt fell and she gave birth, she

disappeared, but the babe survived. So, as is said in the case of *Dióbletoi*, people supposed that she had met with a divine fate and called her Thyone. Her child, having been saved from the fire, was most divine: Kadmos looked after him and gave him the family name of the Egyptian Dionysos[1].'

(ε) The Tarentine cult of Zeus *Kataibátes*.

A remarkable example of the cult of Zeus *Kataibátes* is that of Tarentum[2]. Klearchos, a pupil of Aristotle, states[3] that the Tarentines, having overthrown Karbina, a city of the Iapyges, and exposed the boys, girls, and young women of the place to the grossest outrages, were visited by the vengeance of heaven. All who had offended at Karbina were struck by lightning. The Tarentines therefore erected in front of their doors a number of pillars corresponding to the number of the men who failed to return from the expedition into Iapygia[4]. These pillars were still to be seen before each house in Tarentum; and, when the season of their destruction comes round, the Tarentines, instead of lamenting the dead or pouring the customary libations, offered sacrifices on the pillars to Zeus *Kataibátes*. Here it is fairly obvious that death by lightning is regarded not as a disaster, but as an honour: funeral lamentations and libations were out of place. But who—we ask further—was the god that conferred this doubtful honour? The Tarentines certainly called him Zeus *Kataibátes*. Yet the form of his worship, a pillar-cult, is not elsewhere attested for Zeus *Kataibátes*. It points rather in the direction of Crete. One would like to know what the Iapyges themselves said about it. Most fortunately Athenaios, to whom we owe the excerpt from Klearchos, goes on to tell us more concerning the Iapyges[5]. Probably he is

[3] Klearch. *frag.* 9 (*Frag. hist. Gr.* ii. 306 f. Müller) *ap.* Athen. 522 D ff.

[4] Athen. 522 F καὶ μέχρι καὶ νῦν ἐν Τάραντι ἑκάστη τῶν οἰκιῶν, οὓς οὐχ ὑπεδέξαντο τῶν εἰς Ἰαπυγίαν ἐκπεμφθέντων, τοσαύτας ἔχει στήλας πρὸ τῶν θυρῶν· ἐφ' αἷς καθ' ὃν ἀπώλοντο χρόνον οὔτ' οἰκτίζονται τοὺς ἀποιχομένους οὔτε τὰς νομίμους χέονται χοάς, ἀλλὰ θύουσι Διὶ Καταιβάτῃ. For cod. A οὓς οὐχ ὑπεδέξαντο J. Schweighaeuser, after Musurus, reads ὅσους ὑπεδέξαντο, and W. Dindorf οὓς ὑπεδέξαντο. This would mean that every man not killed set up a pillar on which to do sacrifice to the god. But M. P. Nilsson in the *Rhein. Mus.* 1908 lxiii. 315 justly defends the reading of cod. A on the ground that the bodies of men struck by lightning would be left on the spot and not brought back home (*supra* p. 22 f.).

[5] Athen. 522 F—523 B.

again borrowing his information from Klearchos, who was one of his prime sources.

'This race of the Iapyges,' he continues, 'is derived from Crete. Cretans came to look for Glaukos and settled down here. Their descendants, forgetting the orderly life of the Cretans, reached such a pitch of luxury, and subsequently of insolence, that they were the first to paint their faces, to get front locks and side locks of false hair, to wear flowered robes, and to deem work and labour a disgrace. Ordinary citizens made their houses more magnificent than the temples; while the principal men of the Iapyges, treating the deity with insult, destroyed the statues of the gods out of the temples and bade them give place to their betters. Wherefore they were struck by fire and bronze from the sky, and the fame of it was spread abroad; for bolts from heaven forged of bronze were long to be seen[1]. And to this very day all their descendants live shaven to the skin and wearing the garb of mourners, in want of all the luxuries that were theirs before.'

Now Iapyx the eponym of the Iapyges was commonly said to have been the son of Daidalos[2]; and there is a consistent tradition to the effect that, when Minos was killed at Kamikos in Sikania, the Cretans after an ineffectual attempt to take the town were driven by stress of weather to land in Iapygia, where they built Hyria and became the Iapyges Messapioi[3]. In view of this traditional connexion between the Iapyges and the Cretans of the Minoan age, it is interesting to find Athenaios giving a description of the Iapyges which with curious exactitude suits the 'Minoans.' Their painted faces[4], their artificial front locks[5] and side locks[6], their flowered robes[7], the magnificence of their houses as contrasted with their shrines[8], are all points of resemblance. Last but not least, the 'bolts from heaven forged of bronze' must surely be

[1] The text is *διόπερ ἐξ οὐρανοῦ βαλλόμενοι πυρὶ καὶ χαλκῷ ταύτην διέδοσαν τὴν φήμην· ἐμφανῆ γὰρ ἦν μέχρι πόρρω κεχαλκευμένα τῶν ἐξ οὐρανοῦ βελῶν* (so codd. A.B.P.: *βολῶν* codd. V.L.).

identified with the bronze double-axes of 'Minoan' worship[1]. If this identification be well founded, it furnishes an important clue to the nature of the deity represented by the Cretan axes. The deity in question was, at least in Hellenic Tarentum, regarded as Zeus *Kataibátes*, the god that fell from heaven in the form of a thunderbolt[2].

Tarentum, we gather, was originally an Iapygian settlement later Hellenised by a Lacedaemonian colony[3]. It is therefore of interest to recall the fact that from Thalamai (*Koutiphari*) in south-western Lakonike, where the oracle of Pasiphaa[4] bespeaks the influence of Crete, came the fifth-century inscription recording the apparently chthonian ritual of Zeus *Kabátas*[5].

In view of H. Usener's[6] contention that *téras* ('borer'?) meant the lightning, and that Zeus *Terástios* of Gythion[7] was a lightning-god, it seems possible[8] that *Táras* the eponymous hero of Tarentum

[1] Sir A. J. Evans in the *Ann. Brit. Sch. Ath.* 1900—1901 vii. 52 ff. fig. 15, *id. ib.* 1901—1902 viii. 101 ff. figs. 57 ff.

Another point of comparison might be found in the fact that the Messapians, like the 'Minoans,' were great dancers. According to Nikandros *ap.* Ant. Lib. 31, it was said in the country of the Messapians that the nymphs known as *Epimelídes* were seen dancing by the so-called Holy Rocks, that the sons of the Messapians left their flocks and challenged them to a contest of dancing, that the nymphs won, that the lads were changed into trees beside the sanctuary of the nymphs, and that a sound as of mourning is still heard by night from the wood of the 'Nymphs and Lads.'

[8] The fact that Taras appears as a *quasi*-Poseidon (see *e.g.* Buslepp in Roscher *Lex. Myth.* v. 93 ff.) is not fatal to this hypothesis, if Poseidon was originally but a specialised form of Zeus (i. 717 n. 2, *infra* § 3 (c) i (η)) and his trident a thunder-weapon (*infra* § 3 (c) iv (γ)).

had a name of kindred significance[1], involving Doric *ă* for *ĕ*[2]. We might compare the *Tarentum* or *Terentum* ('Hole'?) in the Campus Martius at Rome[3]. On the other hand, such Celtic deities as *Taranis*, *Taranu-cnus*, Iupiter *Taranucus*[4] are perhaps best related to Anglo-Saxon *Thunor*, Norse *Thor*, etc.—witness the alternative form Iupiter *Tanarus*[5].

(ζ) Zeus *Kratalbátes*.

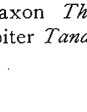

Fig. 14.

A relief found at the village of *Katsígkri* near Nauplia represents Zeus advancing from left to right. He hurls a thunderbolt with his right arm and stretches out his left, above which is an inscription (fig. 14)[6] reading:

'Of Zeus *Krataibátes*.'

The title thus spelt is unique. It may of course be a mere blunder for *Kataibátes*. But more probably it is an intentional variation of that epithet: whoever erected the monument wished to suggest the potency of the lightning-god[7].

(η) Survivals of the foregoing beliefs.

In Christian times it was believed that the victim of lightning had been struck by the sudden descent of a demon. For example, early in the fifth century Saint Hypatios, presbyter and *hegoúmenos*

of the Rufinian monastery in Bithynia, was said to have cured a certain man, Agathangelos by name, 'who was paralysed by thunder, a demon having come down upon him[1].'

The survival of pagan beliefs is yet clearer in later Greek and Latin versions of Zoroastres' intercourse with heaven. Already in the fourth century B.C. Dinon of Kolophon, author of a great historical work on Persia[2], beguiled by an obvious etymology, had stated that *Zoroástres* was 'one that sacrificed to the stars'; and Hermodoros, probably the Syracusan pupil of Platon[3], was content with the same explanation[4]. Dion Chrysostomos in a speech delivered at Prousa during the year 102—103 A.D.[5] goes into greater detail[6]. Zoroastres—he says—lived the life of a recluse on a certain mountain. Fire came down upon his mountain from above, so that it kindled and continued to burn. Thereupon the king of Persia and his notables drew near, wishing to worship the god. Zoroastres emerged scatheless from the fire, bade the king be of good cheer and offer sacrifices as one that had come to the place where the god was. From that time onward Zoroastres associated only with the Magoi, who could understand the god and knew how to serve the divine. They keep a chariot of Nisaean steeds[7], the finest in all Asia, for Zeus. The popular etymology of *Zoroástres*, combined with the notion that celestial fire descended upon him, was further amplified along the lines of Greek belief. According to the Clementine *Homilies*[8], the Magian Nebrod (Nimrod), wishing to become

(ii. 244 Migne) ἐκ τοῦ γένους τούτου γίνεταί τις κατὰ διαδοχὴν μαγικὰ παρειληφὼς ὀνόματι Νεβρώδ, ὥσπερ γίγας ἐναντία τῷ Θεῷ φρονεῖν ἑλόμενος, ὃν οἱ Ἕλληνες Ζωροάστρην προσηγόρευσαν. οὗτος μετὰ τὸν κατακλυσμὸν βασιλείας ὀρεχθεὶς καὶ μέγας ὢν μάγος τοῦ νῦν βασιλεύοντος κακοῦ τὸν ὡροσκοποῦντα †κόσμον† ἀστέρα (*an leg.* τοῦ νῦν βασιλεύοντος κακοῦ τοῦ κόσμου τὸν ὡροσκοποῦντα ἀστέρα, 'the birth-star of the evil man that now rules the world,' *sc.* of Domitian?) πρὸς τὴν ἐξ αὐτοῦ βασιλείας δύσιν μαγικαῖς

king, by his magic arts forced a certain star to grant him the kingdom. The star did so, but poured out upon him the royal fire[1] in the form of lightning. Nebrod, killed by the lightning, was renamed *Zoroástres* since a 'living stream from the star' had fallen upon him. His contemporaries, supposing that his soul had been fetched by the thunderbolt on account of his friendship with God, buried his remains, built a temple at the grave in Persia, where the fire had fallen, and worshipped the man as a god. Following their example, others in that region buried victims of thunderbolts as friends of God, built temples in their honour, and set up portrait statues of them. The Clementine *Recognitions*[2] give us the same

ἠνάγκαζε τέχναις. ὁ δέ, ἅτε δὴ ἄρχων ὢν καὶ τοῦ βιαζομένου τὴν ἐξουσίαν ἔχων, μετ' ὀργῆς τὸ τῆς βασιλείας προσέχεε πῦρ, ἵνα πρὸς τε τὸν ὁρκισμὸν εὐγνωμονήσῃ καὶ τὸν πρώτως ἀναγκάσαντα τιμωρήσηται. ἐκ ταύτης οὖν τῆς ἐξ οὐρανοῦ χαμαὶ πεσούσης ἀστραπῆς ὁ μάγος ἀναιρεθεὶς Νεβρὼδ ἐκ τοῦ συμβάντος πράγματος Ζωροάστρης μετωνομάσθη διὰ τὸ τὴν τοῦ ἀστέρος κατ' αὐτοῦ ζῶσαν ἐνεχθῆναι ῥοήν. οἱ δὲ ἀνθ' ὧν τότε ἀνθρώπων, ὡς διὰ τὴν εἰς Θεὸν φιλίαν κεραυνῷ μεταπεμφθεῖσαν τὴν ψυχὴν νομίσαντες, τοῦ σώματος τὸ λείψανον κατορύξαντες, τὸν μὲν τάφον ναῷ ἐτίμησαν ἐν Πέρσαις, ἔνθα ἡ τοῦ πυρὸς καταφορὰ γέγονεν, αὐτὸν δὲ ὡς θεὸν ἐθρήσκευσαν. τούτῳ τῷ ὑποδείγματι καὶ οἱ λοιποὶ ἐκείσε τοὺς κεραυνῷ θνήσκοντας ὡς θεοφιλεῖς θάπτοντες ναοῖς τιμῶσιν καὶ τῶν τεθνεώτων ἰδίων μορφῶν ἱστᾶσιν ἀγάλματα.

[2] Rufin. *recognit.* 4. 27 f. ex quibus unus Cham nomine cuidam ex filiis suis qui Mesraim appellabatur, a quo Aegyptiorum et Babyloniorum et Persarum ducitur genus, male compertam magicae artis tradidit disciplinam: hunc gentes quae tunc erant Zoroastrem appellaverunt, admirantes primum magicae artis autorem, cuius nomine etiam libri super hoc plurimi habentur. hic ergo astris multum ac frequenter intentus, et volens apud homines videri deus, velut scintillas quasdam ex stellis producere et hominibus ostentare coepit, quo rudes atque ignari in stuporem miraculi traherentur, cupiensque augere de se huiusmodi opinionem, saepius ista moliebatur usquéquo ab ipso daemone, quem importunius frequentabat, igni succensus concremaretur. sed stulti homines qui tunc erant...

statement in a somewhat earlier form. Mesraim (Mizraim), son of Cham (Ham), was the first to study magic. He gave much attention to the stars and, wishing to be thought a god, pretended to produce sparks from them, till at length he was burnt by the demon, whom he had too often invoked. His contemporaries regarded him as a friend of God, carried up to heaven on a thunderbolt. They therefore built him a tomb, changed his name to *Zoroaster*, the 'Living Star,' and worshipped him as such. Hence many persons still honour victims of lightning with tombs and respect them as being friends of God. Rufinus' account is followed in the sixth century by Saint Gregory of Tours[1]. The *Chronicon Paschale*[2] of the seventh century, together with the Byzantine historians Kedrenos[3] (*c.* 1100 A.D.) and Glykas[4] (*c.* 1120 A.D.), states that Zoroastres the famous Persian astronomer, when about to die, prayed to Orion that he might be destroyed by the fire of heaven, and told the Persians to take up his burnt bones and preserve them, as the retention

in maius eum extollunt. exstructo enim sepulcro ad honorem eius tanquam amicum Dei ac fulminis ad coelum vehiculo sublevatum adorare ausi sunt et quasi vivens astrum colere. hinc enim et nomen post mortem eius Zoroaster, hoc est vivum sidus, appellatum est ab his qui post unam generationem Graecae linguae loquela fuerant repleti. hoc denique exemplo etiam nunc multi eos qui fulmine obierint sepulcris honoratos tanquam amicos Dei colunt.

J. B. Coteler *ad loc.* cites from Fest. p. 245 *a* 23 ff. Müller, p. 285, 3 ff. Lindsay the statement that Q. Fabius Eburnus was called *pullus Iovis* because his hinder parts were struck by lightning (cp. Arnob. *adv. nat.* 4. 26 and De Vit *Onomasticon* iii. 8 *s.v.* 'xiv. Fabius').

Migne) primogenitus vero Cham, Chus. hic fuit totius artis magicae, imbuente diabolo, et primus idololatriae adinventor. hic primus statunnculam adorandam diaboli instigatione constituit : qui et stellas, et ignem de coelo cadere, falsa virtute, hominibus ostendebat. hic ad Persas transiit. hunc Persae vocitavere Zoroastrem, id est viventem stellam. ab hoc etiam ignem adorare consueti ipsum divinitus igne consumptum ut deum colunt.

[2] *Chron. Paschale* i. 67 Dindorf *ἐξ αὐτοῦ οὖν τοῦ γένους ἐγεννήθη καὶ ὁ Ζωρόαστρος* (so cod. V. for *Ζοροάστρης* ed. Paris.) *ὁ ἀστρονόμος Περσῶν ὁ περιβόητος, ὅστις μέλλων τελευτᾶν ηὔχετο ὑπὸ πυρὸς ἀναλωθῆναι οὐρανίου, εἶπὼν τοῖς Πέρσαις ὅτι ἐὰν καύσῃ με τὸ πῦρ, ἐκ τῶν καιομένων μου ὀστέων ἐπάρατε καὶ φυλάξατε, καὶ οὐκ ἐκλείψει τὸ βασίλειον ἐκ τῆς ὑμῶν χώρας ὅσον χρόνον φυλάττετε τὰ ἐμὰ ὀστέα. καὶ εὐξάμενος τὸν Ὠρίωνα ἀπὸ πυρὸς ἀερίου ἀνηλώθη. καὶ ἐποίησαν οἱ Πέρσαι καθὼς εἶπεν αὐτοῖς· καὶ ἔχουσι φυλάττοντες τὸ λείψανον αὐτοῦ τεφρωθὲν ἕως νῦν.*

[3] Kedren. *hist. comp.* 16 B—C (i. 29 f. Bekker) *ἐκ τοῦ γένους οὖν αὐτοῦ καὶ Ζωροάστρης ὁ περιβόητος ἀστρονόμος ἐν Πέρσαις γενόμενος ηὔξατο ὑπὸ πυρὸς ἀερίου κεραυνωθῆναι καὶ ἀναλωθῆναι, ἐντειλάμενος τοῖς Πέρσαις τὰ ὀστᾶ αὐτοῦ μετὰ τὴν καῦσιν ἀναλαβεῖν καὶ φυλάττειν αὐτοὺς* (I. Bekker cj. *αὐτὰ*) *καὶ τιμᾶν· καὶ ἕως οὗ, φησί, σώσεσθε ταῦτα, τὸ βασίλειον τῆς ὑμῶν χώρας οὐκ ἐκλείψει. οὕτως οὖν τούτου πυρὶ οὐρανίῳ τεφρωθέντος τὰ λείψανα αὐτοῦ διὰ τιμῆς εἶχον οἱ Πέρσαι, ἕως τούτου καταφρονήσαντες καὶ τῆς βασιλείας ἐξέπεσον. Infra* § 3 (c) i (χ).

[4] Michael Glykas *ann.* 2 129 C—D (p. 243 f. Bekker) *ἐξ οὗ γένους ἐγένετο καὶ Ζωρόαστρος ὁ περιβόητος Περσῶν ἀστρονόμος, ὃς εἶπε τοῖς Πέρσαις, "ἐὰν καύσῃ με τὸ οὐράνιον πῦρ," τοῦτο γὰρ καὶ ηὔχετο, "λάβετε ἐκ τῶν ὀστέων μου καὶ φυλάσσετε εἰς σύστασιν τῆς βασιλείας ὑμῶν." ὃ δὴ καὶ γέγονεν.*

of sovereignty depended upon their safe-keeping. The lexicographers Souidas[1] in the tenth century and 'Zonaras[2]' in the twelfth repeat the same tale with slight variations.

Even the twentieth century has not wholly outgrown the old-world view. In Makedonia it is thought that, if any one struck by lightning is immediately removed from the spot, where the accident befell him, to a distance of forty paces, he will recover[3]. Why? Because he is no longer within the domain or range of the divine power, no longer in Elysium[4].

iii. Zeus and the Sky-Pillar.

(α) The Elysian Way.

The word *elýsion*, which thus signifies both the spot struck by lightning and the abode of the divinised dead, is presumably related to *elysíe*, a 'way[5].' The term is remarkable, and its applicability is not at once clear. We must suppose that the Greeks recognised a definite 'way' from earth to heaven, along which those honoured by the summons of Zeus might pass. This conception would at least square with certain Pindaric phrases. In a context of Pythagorean[6] import the poet tells how—

> Souls that thrice on either side
> Free from evil can abide
> Travel the road of Zeus to Kronos' tower,
> Where round islands of the blest
> Ocean breezes lull to rest
> And forth there flashes many a golden flower[7].

Again, in an equally arresting fragment Pindar says:

> Themis the wise, the heavenly, afar
> From Ocean's founts on golden car
> Up the dread stair the Fates first bore
> Along the gleaming way to Olympos' height,
> That Zeus the Saviour might
> Have her to wife of yore:
> The mother she of the unerring Hours,
> Gold-frontleted, gay-fruited powers[1].

What was this 'road of Zeus,' this 'gleaming way'? If I am not mistaken[2], it was the broad path of dim and distant splendour that stretches across the abyss of the midnight sky[3]. Our forefathers called it 'Watling Street[4]' or 'London Road[5].' We know it as the 'Milky Way.' And a collection of names for it such as that got together by H. Gaidoz and E. Rolland[6] proves that all the world over it has been regarded as a celestial track. Further, as E. B. Tylor[7] observed, this track is often held to be the road traversed by the gods or the souls of men:

[1] Pind. *frag.* 30 Schroeder *ap.* Clem. Al. *strom.* 5. 14 p. 418, 23 ff. Stählin πρῶτον (sic Hephaist. 15. 11 p. 51, 6 Consbruch, πρῶτα Clem. [7] E. B. Tylor *Primitive Culture*[3] London 1891 i. 359 f.

The Basutos call it the 'Way of the Gods[1]'; the Ojis say it is the 'Way of Spirits,' which souls go up to heaven by[2]. North American tribes know it as 'the Path of the Master of Life,' the 'Path of Spirits,' 'the Road of Souls,' where they travel to the land beyond the grave, and where their camp-fires may be seen blazing as brighter stars[3]. Such savage imaginations of the Milky Way fit with the Lithuanian myth of the 'Road of the Birds,' at whose end the souls of the good, fancied as flitting away at death like birds, dwell free and happy[4].

Classical evidence of the Galaxy conceived as a *Seelenpfad* is not wanting[5]. Ovid speaks of it as a road leading to the palace of Iupiter:

[1] E. Casalis *The Basutos; or, Twenty-three Years in South Africa* London 1861 p. 196 'I have known great boys who hardly dared to look up at the stars, because they imagined that the milky way was a monstrous collection of those transparent beings whose imaginary appearance is so much dreaded*. (*The Basutos call the milky way, "the *way* of the gods.")'

The conception of the Milky Way as an abode of souls survived into post-classical literature and art. Paulinus (353—431 A.D.), bishop of Nola, makes Enoch, Elijah, and other pious souls ascend to heaven *via* the Galaxy: Paulin. Nolan. *carm.* 5. 37 ff. pande

There is a road aloft in the clear heaven,
Milk-white and therefore named the Milky Way.
Here go the gods to the great Thunderer's house
And royal home. To right and left the halls
Of high-born deities fling wide their doors.
The populace in diverse spots may dwell;
But on this front the denizens of heaven
Puissant and proud have pitched their own abode[1].

Ovid's celestial city is doubtless made to the pattern of Rome:

viam, quae me post vincula corporis aegri | in sublime ferat, puri qua lactea caeli | semita ventosae superat vaga nubila lunae | qua proceres abiere pii quaque integer olim | raptus quadriiugo penetrat super aera curru | Elias et solido cum corpore praevius Enoch. And Dracontius of Carthage (end of *s.* V A.D.) would raise the brave man to the sky along the same starry track: Drac. *Romul.* 5. 323 ff. his quartus (so F. Bücheler for *quintus*) adesto | virtutis ratione fide pietate vigore | possessure polos, scandens qua lacteus axis | vertitur, aetherii qua se dat (so F. von Duhn for *sedat* C. Rossberg cj. *candet*) circulus orbis | lunarisque globus qua volvitur axe tepenti | aut certe qua Phoebus agit super astra iugales: | sidera sic capies. poteris sic astra mereri. Cp. Hieron. *epist.* 23. 3 (xxii. 426 Migne) ille (*sc.* the husband of Lea)...nunc desolatus et nudus non in lacteo caeli palatio, ut uxor mentitur infelix, sed in sordentibus tenebris. These are but Christianised versions of a belief that must have been wide-spread in later classical times—witness *e.g.* an elegiac epitaph from Salonae: *Corp. inscr. Lat.* iii Suppl. no. 9631, 2 f.=F. Bücheler *Carmina Latina epigraphica* Lipsiae 1897 ii. 685 f. no. 1438, 17 f. sede beatorum recipit te lacteus orbis | e gremio matris: hoc tua digna fides. The artistic evidence, though considerably later, is not devoid of interest. A twelfth-century manuscript of Germanicus at Madrid (cod. Matrit. A 16), with coloured pictures in the *scholia*, represents the *circulus lacteus* as a hoop held by a half-draped female, who bears aloft a draped female, the divinised soul (G. Thiele *Antike Himmelsbilder* Berlin 1898 p. 147 ff. fig. 64=my fig. 15). The same design with slight variations is found two centuries afterwards in the Vienna manuscript of a Latin prose work on astronomy (cod. Vindob. 2352): the starry circle is here more recognisable, the draped soul on its semi-draped supporter is less so, the apotheosis-type being ill understood (G. Thiele *op. cit.* p. 149 fig. 65=my fig. 16).

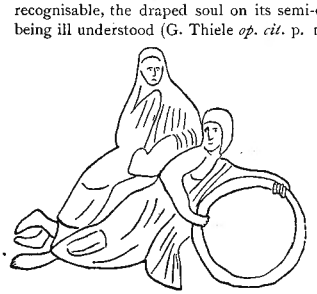

Fig. 15.

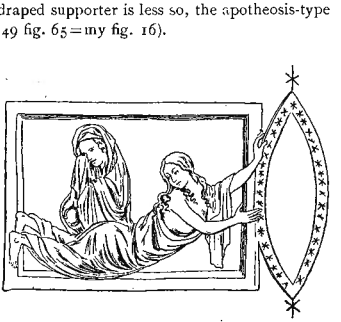

Fig. 16.

[1] Ov. *met.* 1. 168 ff. est via sublimis, caelo manifesta sereno; | lactea nomen habet, candore notabilis ipso. | hac iter est superis ad magni tecta Tonantis | regalemque domum. dextra laevaque deorum | atria nobilium valvis celebrantur apertis. | plebs habitat diversa locis: hac fronte (sic codd. A.N.P.T., *a* (in rasura) *fronte* codd. M.ε.λ., *hac parte* cod. Be.) potentes | caelicolae clarique suos posuere penates.

'this front,' as R. Merkel saw[1], recalls the *frons Palatii*[2]. But the *via sublimis* of the poet's vision was borrowed from an old-world belief held by certain followers of Pythagoras. The Pythagoreans indeed were much exercised about the Milky Way. Most of them took it to be a 'way' of some sort. One group said that it was the track made by a star, which had fallen from its proper position at the time of Phaethon's catastrophe. Others saw in it a burnt path-way marking the sun's original course[3]. Others again deemed it a mere reflection of the solar rays. These opinions are duly recorded by Aristotle[4], Manilius[5], and the doxographer Aëtios[6]. But a view

ignored by them all is of more interest to us. Three writers steeped in neo-Platonic lore, and drawing perhaps from a single source[1], ascribe to Pythagoras himself the belief that the Milky Way is the road by which souls come and go. Porphyrios (*c.* 233—*c.* 304 A.D.), who penned an allegorical treatise *On the Cave of the Nymphs in the Odyssey*, remarks[2]:

Elsewhere he (Homer) speaks of 'the gates of the Sun[3],' meaning Cancer and Capricornus; for these are the limits to which it progresses when descending from north to south and again when ascending from south to north. Capricornus and Cancer are set at either side of the Milky Way, the latter on the north, the former on the south. And 'the folk of dreams' according to Pythagoras[4] are the souls, which—he asserts—are gathered together in the Milky Way, so called from those that are nurtured on milk, when they fall into birth.

Macrobius (*c.* 400 A.D.) in his *Commentary on the Dream of Scipio* says[5]:

The following order is observed in the descent by which the soul of man slips from heaven to the lower regions of this present life. The Milky Way embraces the zodiac by means of the circular contact of its oblique periphery in such a way that it intersects the zodiac at the points where two tropic signs, Capricornus and Cancer, are said to be. These the physicists have called the gates of the Sun, because both prevent it from further advance when such is forbidden by the solstice and turn it back to the pathway of that zone whose bounds it never quits. It is supposed that through these gates souls pass from heaven to earth

in H. Diels *Doxographi Graeci* Berolini 1879 p. 364, 22 ff.) *τῶν Πυθαγορείων οἱ μὲν* (*οἱ μὲν πυθαγόρειοι* cod. P. [4] In Quint. Smyrn. 14. 179 ff. the soul of Achilles appears to his son in a dream and *ib.* 223 ff. *ὣς εἰπὼν ἀπόρουσε θοῇ ἐναλίγκιος αὔρῃ, | αἶψα δ' ἐς Ἠλύσιον πεδίον κίεν, ἧχι τέτυκται | οὐρανοῦ ἐξ ὑπάτοιο καταιβασίη τ' ἀνοδός τε | ἀθανάτοις μακάρεσσιν.* The lines are suggestive of Pythagorean influence.

[5] Macrob. *comm. in somn. Scip.* 1. 12. 1—3. Cp. Favonius Eulogius *disp. de somn. Scip.* p. 1 Holder quod et immortalis esset animi mentisque substantia et bene meritis de re p(ublica) pa<t>ri<a>eque custodibus lactei circuli lucida ac candens habitio (*leg.* habitatio) deberetur.

and again from earth to heaven. One is called the gate of men, the other that of the gods: Cancer is the gate of men, because through it they descend to the lower regions; Capricornus, the gate of the gods, because through it souls return to the seat of their own proper immortality and rejoin the company of the gods. This is what Homer, a poet of divine foresight, intended by his description of the cave in Ithake[1]. Hence too Pythagoras holds that from the Milky Way downwards begins the realm of Dis, since souls that have fallen from it seem already to have left the world above. Milk—he says—is the first food offered to the new-born, because their first movement downwards in the direction of earthly bodies begins at the Milky Way. Wherefore also Scipio, pointing to the Milky Way, observed with regard to the souls of the blessed:

'Hence they start, and hither they return!'

Proklos (410—485 A.D.), after citing from the Pythagorising Platonist Noumenios[2] a somewhat similar account of Capricornus and Cancer as the openings through which souls are sent upwards and downwards, continues[3]:

For Pythagoras in mystic language calls the Milky Way 'Hades' and 'the place of souls,' since there they are crowded together[4]. Whence sundry nations pour a libation of milk to the gods that purify souls, and milk is the first food taken by souls that fall into birth.

This belief in the Milky Way as a soul-road is found in several authors who, without being definitely followers of Pythagoras, are known to have come more or less under the influence of Pythagorean speculation. Thus Parmenides[5] in the preface to his great philosophical poem describes how he was conducted in a chariot 'on the far-famed way of the goddess' (Ananke?) and 'maidens led the way,' to wit the Heliades, who escorted him towards the light through the portals of Night and Day till he reached the home of the goddess[6]. The 'way' in question is not improbably the Milky

Way[1]. Again, Empedotimos of Syracuse[2], who figures as an adherent of Pythagoras[3], held 'that the Milky Way is the road of souls traversing the Hades in heaven[4].' Platon too is presumably Pythagorising, when in a famous passage of the *Phaidros* he tells how god-like souls follow the gods round the great arch of heaven and from its summit behold sights of unspeakable splendour in the region beyond the sky:

Zeus, the great chieftain in heaven, driving a winged car, travels first, arranging and presiding over all things; and after him comes a host of gods and inferior deities, marshalled in eleven divisions, for Hestia stays at home alone in the mansion of the gods; but all the other ruling powers, that have their place in the number of the twelve, march at the head of a troop in the

[1] H. Diels *ad loc.* (*Poetarum philosophorum fragmenta* Berolini 1901 p. 58) says: 'utique Solis orbita videtur intellegenda, quam poeta lucido mentis curru, felicior ille Phaethonte, quotiens libebat escendebat.' The mention of the Heliades does indeed recall Phaethon. But the fall of Phaethon was connected by the Pythagoreans with the Milky Way (*supra* p. 40, *infra* § 3 (a) vi (λ)). F. M. Cornford in his brilliant book *From Religion to Philosophy* London 1912 pp. 214 f., 222 n. 3 inclines to the view put forward by O. Gilbert in the *Archiv für Geschichte der Philosophie* 1907 xx. 25 ff., *viz.* that Parmenides' journey was a descent into the darkness of the Underworld.

Ald.) *οὐρανῷ "Αιδης. καὶ πῶς "Αιδης ὁ οὕτω φωτεινός; καὶ εἰ καθαίρονται ἐκεῖ ψυχαί, δηλονότι μὴ κεκαθαρμέναι ἀνῆλθον.* See also interp. Serv. *in* Verg. *georg.* i. 34 Varro tamen ait se legisse Empedotim (leg. *Empedotimo*, H. A. Lion cj. *Empedocli*) cuidam Syracusano a quadam potestate divina mortalem aspectum detersum, eumque inter cetera tres portas vidisse tresque vias: unam ad signum Scorpionis, qua Hercules ad deos isse diceretur; alteram per limitem, qui est inter Leonem et Cancrum; tertiam esse inter Aquarium et Pisces.

The views of Empedotimos were known to Julian the Apostate from Herakleides of Pontos (Souid. *s.vv.* 'Εμπεδότιμος and 'Ιουλιανός), who wrote a history *περὶ τῶν Πυθαγορείων* (Diog. Laert. 5. 88: see *Frag. hist. Gr.* ii. 197 Müller) and a dialogue *περὶ τῶν ἐν οὐρανῷ* (Daebritz in Pauly—Wissowa *Real-Enc.* viii. 476 f.). The latter, in which Empedotimos played a leading part, was presumably the source of Iamblichos *ap.* Stob. *ecl.* i. 49. 39 p. 378, 11 ff. Wachsmuth *καὶ τούτους 'Ηρακλείδην μὲν τὸν Ποντικὸν ἀφορίζειν περὶ τὸν γαλαξίαν, ἄλλους δὲ καθ' ὅλας τοῦ οὐρανοῦ τὰς σφαίρας, ἀφ' ὧν δὴ δεῦρο κατιέναι τὰς ψυχάς· κ.τ.λ.* But, when Rohde *Psyche*[2] p. 95 n. contends 'dass Empedotimos nur eine Dialogfigur des Heraklides war, und wohl so wenig jemals existirt hat wie Er der Sohn des Armenios oder Thespesios von Soli oder dessen Vorbild Kleonymos von Athen bei Klearch von Soli (*Rhein. Mus.* 32, 335),' he is hardly convincing. See P. Capelle *op. cit.* p. 42 n. 2.

order to which they have been severally appointed. Now there are, it is true, many ravishing views and opening paths within the bounds of heaven, whereon the family of the blessed gods go to and fro, each in performance of his own proper work; and they are followed by all who from time to time possess both will and power; for envy has no place in the celestial choir. But whenever they go to feast and revel, they forthwith journey by an uphill path to the summit of the heavenly vault. Now the chariots of the gods being of equal poise, and obedient to the rein, move easily, but all others with difficulty; for they are burdened by the horse of vicious temper, which sways and sinks them towards the earth, if haply he has received no good training from his charioteer. Whereupon there awaits the soul a crowning pain and agony. For those which we called immortal go outside when they are come to the topmost height, and stand on the outer surface of heaven, and as they stand they are borne round by its revolution, and gaze on the eternal scene. Now of that region beyond the sky no earthly bard has ever yet sung or ever will sing in worthy strains[1].

It can hardly be doubted that the 'uphill path to the summit of the heavenly vault,' a path along which the souls of the blessed go to the fulness of fruition, implies the Pythagorean conception of the Milky Way as an Elysian road.

In the *Republic* the same bright track is compared with 'the undergirders of triremes[2]'; but the figure is complicated by the addition of 'a straight light like a pillar' stretching along the axis of the universe[3],—an idea taken up by the Manichaeans, who spoke of a 'pillar of glory' or a 'pillar of light' filled with souls in process of purification[4]. This pillar has no counterpart in astronomical fact or, for that matter, in astronomical theory. It would, however, be unwise to assume that it was introduced by Platon merely to

[1] Plat. *Phaedr.* 246 B—247 C trans. J. Wright. An echo of this passage may be heard in Loukian. *Dem.* 50 (*infra* § 3 (a) iii (ι)). Cp. also *Anth. Pal.* 7. 97. 1 f. (Diog. Laert.) *οὐ μόνον ἐς Πέρσας ἀνέβη Ξενοφῶν διὰ Κῦρον, | ἀλλ' ἄνοδον ζητῶν ἐς Διὸς ἥτις ἄγοι* with *ib.* 7. 96. 1 (Diog. Laert.) *πῦνέ νυν ἐν Διὸς ὤν, ὦ Σώκρατες· κ.τ.λ.*

[2] Note that the Pythagoreans spoke of a cosmic 'ship' (Philolaos *frag.* 12 Diels *καὶ τὰ μὲν τᾶς σφαίρας σώματα πέντε ἐντί, τὰ ἐν τᾷ σφαίρᾳ πῦρ <καὶ> ὕδωρ καὶ γᾶ καὶ ἀήρ, καὶ ὁ τᾶς σφαίρας ὁλκάς, πέμπτον*): *supra* i. 358 n. 3.

[3] Plat. *rep.* 616 B—C. I follow the interpretation of J. Adam *ad loc.*, who supposes that the curved light was suggested by the Milky Way, but that the straight light symbolised the axis of the universe. He points out that some of the ancients interpreted the straight light of the Milky Way (Prokl. *in* Plat. *remp.* ii. 130, 3 f., 194, 19 ff. Kroll, cp. Cic. *de rep.* 6. 16), while others regarded it as the axis of the universe or a cylinder of aetherial fire surrounding the axis (Theon Smyrn. *περὶ τῶν κατὰ τὸ μαθηματικὸν χρησίμων εἰς τὴν Πλάτωνος ἀνάγνωσιν* p. 143 Hiller, Phot. *lex.* and Souid. *s.v. τεταμένον φῶς εὐθὺ οἷον κίονα*, cp. Prokl. *in* Plat. *remp.* ii. 199, 31 ff. Kroll).

[4] Epiphan. *panar.* 2. 66. 26 (iii. 1. 48, 11 ff. Dindorf) *τῆς οὖν σελήνης μεταδιδούσης τὸν γόμον τῶν ψυχῶν τοῖς αἰῶσι τοῦ πατρός, παραμένουσιν ἐν τῷ στύλῳ τῆς δόξης, ὃς καλεῖται ἀὴρ ὁ τέλειος. ὁ δὲ ἀὴρ οὗτος στῦλός ἐστι φωτός, ἐπειδὴ γέμει ψυχῶν τῶν καθαριζομένων.* In view of J. Adam's elucidation of the Platonic *φῶς εὐθύ, οἷον κίονα* I cannot agree with I. de Beausobre *Histoire de Manichée et du Manicheisme* Amsterdam 1739 ii. 513 'A l'égard de *la Colonne de Gloire*, ou *de Lumière*, elle n'est autre chose, si je ne me trompe, que la Voye Lactée.'

facilitate the transition to his ensuing image—the 'spindle of Ananke.' Rather we may surmise that it was based upon popular belief with ritual usage behind it.

(β) The Sky-Pillar in Italy.

In seeking the antecedents of a Pythagorean or *quasi*-Pythagorean doctrine we turn first to south Italy, where the order planted by Pythagoras took root and flourished. It would not be surprising if somewhere in the neighbourhood of Kroton and Metapontum we came across a definite cult of Zeus conceived as residing in or on a pillar. If I am not mistaken, we find such a cult at Tarentum. For here was a colossal bronze statue of Zeus, made by Lysippos, with a notable pillar beside it[1]. And here too sacrifices were offered on pillars to the lightning-god Zeus *Kataibátes*—a practice which, as we saw, had probably been inherited from 'Minoan' times[2]. Apulian and Campanian vases, also, represent Zeus fulminant on the top of a pillar[3]. Altogether, it looks as though there were in south Italy an old belief that Zeus with his lightnings dwelt on high above an obvious tangible pillar, his vehicle and support.

A similar belief with regard to Iupiter seems to have prevailed at Rome during republican days. In 152 B.C. a column standing before the temple of Iupiter on the Campus was blown down with its gilded statue. The diviners predicted the death of magistrates and priests: whereupon all the magistrates abdicated in a body[4].

[1] *Supra* i. 35 f. This statue, with sides reversed, furnished Theodoros, the designer or copyist of the *tabula Iliaca*, with an interesting scene. In the uppermost register of his composition Thetis pleads before Zeus (*Il.* 1. 498 ff.), who is seated in the same pensive attitude beside a pillar (O. Jahn—A. Michaelis *Griechische Bilderchroniken* Bonn 1873 pp. 12 f., 26 pl. 1, A. Baumeister *Denkm.* i. 717 pl. 13 fig. 775, Stuart Jones *Cat. Sculpt. Mus. Capit. Rome* p. 166 no. 83 pl. 41 (bibliography *ib.* p. 172)). Fig. 17 is from J. N. Svoronos in the *Journ. Intern. d'Arch. Num.* 1912 xiv. 280 f. fig. 25. Svoronos says: "Ὀπισθεν δὲ τοῦ Διὸς τούτου, ἐπ' αὐτῆς τῆς κορυφῆς τοῦ Ὀλύμπου, ὑψοῦται πελώριος κίων φέρων τὸν οὐράνιον θόλον, but C. Robert in the *Arch. Zeit.* 1874 xxxii. 107 expressly warns us that the supposed arch over Zeus is 'nur eine Verletzung des Marmors,' and Stuart Jones prints ΙΕΥΣ, not ΙΟΥ. A fresh inspection of the marble is much to be desired. *Vide* Addenda *in hunc loc.* For Theodoros' utilisation of past models see A. Brüning in the *Jahrb. d. kais. deutsch. arch. Inst.* 1894 ix. 136 ff.

Fig. 17.

[2] *Supra* p. 29 ff.

[3] *Supra* i. 36 ff., 409, 520 n. 2.

[4] Iul. Obs. 18 M. Claudio Marcello L. Valerio Flacco coss. turbinis vi in Campo columna ante aedem Iovis decussa cum signo aurato; cumque aruspices respondissent magistratuum et sacerdotum interitum fore, omnes magistratus se protinus abdicaverunt.

The list of portents for the year 96 B.C. includes an owl killed on the Capitol, many things destroyed by lightning, and gilded statues of Iupiter overthrown with capital (?) and column to boot[1]. A third incident of like character is recorded with somewhat greater detail. It appears that in 65 B.C. an appalling thunderstorm burst over Rome. 'On the Capitol,' says Dion Cassius[2], 'many statues and images were melted by thunderbolts, among others one of Iupiter set on a column, while a likeness of the she-wolf with Remus and Romulus fell from its pedestal.' The diviners, hastily summoned from all parts of Etruria, foretold the end of Rome. At their advice desperate efforts were made to placate the gods. Games were held for ten days, and a larger[3] statue of Iupiter was erected on a yet loftier column with its face turned towards the east. Two years later—for the work progressed slowly—this statue was being placed in position at the moment when Cicero was delivering his third speech against Catiline; and the speaker was quick to profit by the coincidence. Surely the detection and punishment of the great conspiracy were due to Iupiter himself, whose penetrating gaze was even now directed upon the Forum and the Senate House[4].

Pighius cj. *in Capitolio* for *in Campo*. But the change is unnecessary; for there was an ancient hypaethral sanctuary of Iupiter *Fulgur* in the Campus (E. Aust in Roscher *Lex. Myth.* ii. 656, Wissowa *Rel. Kult. Röm.*[2] p. 121 f., H. Kiepert et C. Huelsen *Formae urbis Romae antiquae*[2] Berolini 1912 p. 20). Besides, the temple of Iupiter *Stator* in the Porticus Metelli (H. Jordan—C. Huelsen *Topographie der Stadt Rom im Alterthum* Berlin 1907 i. 3. 538 ff., H. Kiepert et C. Huelsen *op. cit.* p. 22) was perhaps in existence before 147 B.C. (S. B. Platner *The Topography and Monuments of Ancient Rome* Boston 1904 p. 330). It should, however, be noticed that Iul. Obs. 18 does not definitely describe the ruined monument as a statue of Iupiter. J. Scheffer *ad loc.* took it to have been the portrait of some magistrate.

[1] Iul. Obs. 49 Cn. Domitio C. Cassio coss....bubo in Capitolio occisus. fulmine pleraque decussa. signa aurata Iovis cum capite columnaque disiecta. O. Jahn cj. *statua* for *capite*. But O. Rossbach *ad loc.* understands *caput* as the 'capital' of a column, not as the 'head' of a statue. The meaning is not beyond doubt, since (*a*) the plural *signa* accords ill with the singulars *capite, columna*, and (*b*) it is known that two *capita*, in the sense of colossal 'heads,' were dedicated on the Capitol by P. Lentulus (Plin. *nat. hist.* 34. 44).

[2] Dion Cass. 37. 9 *ἐν γὰρ τῷ Καπιτωλίῳ ἀνδριάντες τε πολλοὶ ὑπὸ κεραυνῶν συνεχωνεύθησαν καὶ ἀγάλματα ἄλλα τε καὶ Διὸς ἐπὶ κίονος ἱδρυμένου, εἰκών τέ τις λυκαίνης σύν τε τῷ Ῥώμῳ καὶ σὺν τῷ Ῥωμύλῳ ἱδρυμένη ἔπεσε*, κ.τ.λ. Cp. *id.* 37. 34.

[3] On the principle involved see *Folk-Lore* 1903 xiv. 270 f., *supra* i. 563 f. In 293 B.C. Sp. Carvilius made the breastplates, greaves, and helmets of the vanquished Samnites into a statue of Iupiter, which he set up on the Capitol,—a statue large enough to be visible from the temple of Iupiter *Latiaris* on the Alban Mount. From the filings he made a statue of himself, to stand at the feet of the god (Plin. *nat. hist.* 34. 43: but Liv. 10. 46 does not mention this group).

[4] Cic. *in Cat.* 3. 19 ff. (20 simulacrum Iovis facere maius et in excelso collocare et contra, atque ante fuerat, ad orientem convertere), *de consulatu suo* 2. 33 ff. (60 Iupiter excelsa clarabat sceptra columna) *ap. de div.* 1. 19 ff., 2. 45 f., Quint. *inst. or.* 5. 11. 42 utitur eo Cicero...in contione contra Catilinam, cum signum Iovis columnae impositum

The notion that the sky-god resided in person on the top of a high pillar might presumably be combined with a belief in the Milky Way as a road to his residence. Indeed, a remarkable block of Italian marble, now at Berlin, shows Iupiter enthroned on the summit of a pillar that rises sheer from earth to heaven, while two females ascend the arch of the sky and enter his very presence[1].

(γ) The Sky-Pillar in the 'Minoan' area.

Italy stretches from south-east to north-west. Accordingly the beliefs and practices here noted find their nearest analogues in the 'Minoan' and the early Germanic areas. On the one hand, we have sufficient evidence to be tolerably sure that the 'Minoan' sky-god

Fig. 18.

was associated both with the Milky Way and with a high pillar. The great gold ring from Mykenai (fig. 18)[2] exhibits a deity, armed with

populo ostendit, Iul. Obs. 61 M. Cicerone C. Antonio coss....inter alia relatu<m>, biennio ante in Capitolio lupam Remi et Romuli fulmine ictam, signumque Iovis cum columna disiectum, aruspicum responso in foro repositum (where *in foro* is inexact), Arnob. *adv. nat.* 7. 40 sed neque hoc nostram conscientiam fugit lectum et positum, ictum cum esset Capitolium fulmine multaque in hoc alia, Iovis etiam simulacrum, sublimi quod in culmine stabat, suis esse ab sedibus provolutum. responsum deinde ab haruspicibus editum res saevas (Meursius cj. *scaevas*) tristissimasque portendi ab incendiis, caedibus, ab legum interitu et ab iuris occasu, maxime tamen ab domesticis hostibus atque ab impia coniuratorum manu. sed flecti haec posse (Meursius om. *posse*), immo aliter publicari scelerata non posse consilia, nisi Iuppiter rursus altiore in culmine figeretur, orientalem conversus ad cardinem radiisque oppositus solis. adfuisse dicto fidem: nam subrecto culmine conversoque ad solem signo patuisse res abditas et reserata in maleficia vindicatum.

[1] *Supra* i. 62 fig. 38.

[2] *Supra* i. 623. I reduce to a scale of $\frac{4}{5}$ the careful drawing (scale $\frac{2}{1}$) given by Sir A. J. Evans in the *Journ. Hell. Stud.* 1901 xxi. 108 fig. 4.

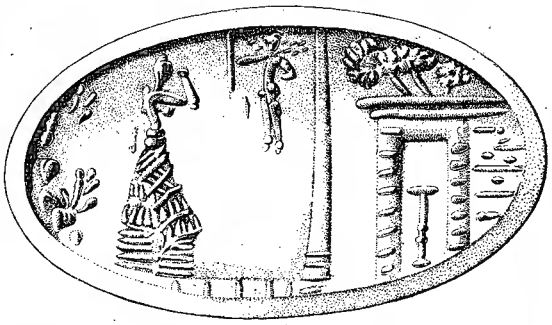

Fig. 19.

shield and spear, and a double axe descending side by side towards the earth-goddess and her maidens from a wavy track, which crosses

Fig. 20.

the sky and probably represents the Milky Way[1]. Another large gold signet from Knossos (fig. 19)[2] shows a god with a spear carried in his right hand and rays of light (?)[3] darting from his shoulders as he descends from a tall tapering pillar towards a female worshipper. That the shield-bearing deity of the first ring is to be identified with the rayed god of the second ring, appears from a third representation on a painted *lárnax* found at Miletos (*Milato*) in Crete (fig. 20)[4], which gives him both shield and rays (?). It can hardly be doubted

[1] Opinions have differed as to the interpretation of this wavy band: see *e.g.* C. Schuchhardt *Schliemann's Excavations* trans. E. Sellers London 1891 p. 277 ('probably...the sea'), Collignon *Hist. de la Sculpt. gr.* i. 46 ('sans doute la mer'), Perrot—Chipiez *Hist. de l'Art* vi. 841 ('peut-être la mer'), Ch. Tsountas—J. I. Manatt *The Mycenaean Age* London 1897 p. 298 ('the cloud-canopy'), Furtwängler *Ant. Gemmen* ii. 10 ('die Andeutung des Himmelsoceans, des Okeanos (oder der Wolken?)'). Milani *Stud. e mat. di arch. e num.* 1899—1901 i. 196 fig. 27 says 'la via lattea,' and Harrison *Themis* p. 168 fig. 36 'Milky Way,'—rightly, as I conceive. It should be noticed that both the goddess and her maidens wear lilies in their hair (*supra* i. 623), and that the

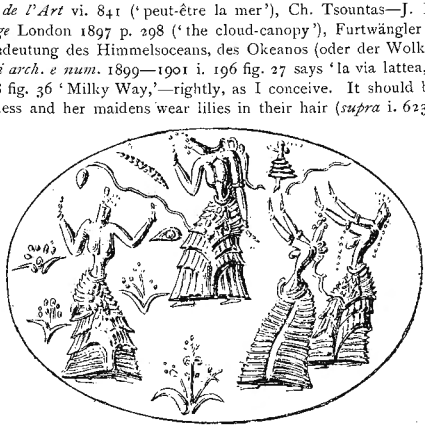

Fig. 21.

milk-white lily was supposed by the later Greeks to have originated from the Milky Way (*supra* i. 624). A somewhat analogous design occurs on a gold ring found in a tomb of the Late 'Minoan' ii period at Isopata in Crete: four females dance in a field of lilies, while a diminutive goddess descends towards them from a wavy line apparently betokening the sky (fig. 21 ($\frac{3}{4}$) after Sir A. J. Evans in *Archaeologia* 1913—1914 lxv. 10 fig. 16). Cp. also another gold ring from a tomb in the lower town at Mykenai, now at Athens (Staïs *Coll. Mycénienne*: *Athènes* p. 71 f. no. 3179 fig., H. Fritze in the *Strena Helbigiana* p. 73 fig. 1, Furtwängler *Ant. Gemmen* i pl. 6, 3, ii. 25 fig., Sir A. J. Evans in the *Journ. Hell. Stud.* 1901 xxi. 176 ff. fig. 53, Harrison *Themis* p. 166 fig. 34).

[2] Procured by Sir A. J. Evans from the site of Knossos and by him published, to a scale of $\frac{1}{1}$, in the *Journ. Hell. Stud.* 1901 xxi. 170 ff. fig. 48.

[3] So Sir A. J. Evans *loc. cit.* But in *Archaeologia* 1906 lix. 100, *ib.* 1913—1914 lxv. 11 he retracts this interpretation, and now suggests that the rapid descent of the divinity is indicated by long locks of hair flying out on either side. In view of the very similar representations of the Babylonian Šamaš (*supra* i. 553 n. 5) I prefer the former explanation.

[4] Found by Sir A. J. Evans in 1899 within a chambered tomb at *Milato* and by him published in the *Journ. Hell. Stud.* 1901 xxi. 174 f. fig. 50.

that the god in question is the 'Minoan' sky-god, who descends in his panoply from the heights of heaven.

(δ) The *Irminsûl*.

On the other hand, the early Germanic sky-god plays a somewhat similar part. His name in Old High German was **Ziu* or **Zio*, in Anglo-Saxon **Tíw*, in Norse *Týr*. But whether these forms are more nearly related to the Greek *Zeús* or to its doublet the Latin *deivos* is a question hotly disputed by philologists[1]. In any case Ziu was a sky-god conceived as a warrior and consequently equated by classical writers with Ares or Mars[2]. 'Other names for Tiu,' says Prof. P. D. Chantepie de la Saussaye[3], 'are perhaps Dings

[1] See *e.g.* K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 270 f.: 'Die urgermanische Form des Namens ahd. **Ziu*, **Zio*, ags. **Tíw*[71] [[71] Die ags. und ahd. Nominative sind nur aus Zusammensetzungen (Wochentagsnamen und Ortsnamen) zu erschliessen.], nord. Týr[72] [[72] Mit Umlaut *í*>*ý* vor tautosyllabischem *w*; vgl. Noreen, Altisl. und altnorw. Grammatik, § 72, 5.] wird verschieden angesetzt, am besten als Wurzelstamm **Tîuz* aus **Tîeus*, idg. **Dieus*, wozu skr. *Dyâus*, gr. Ζεύς, lat. *Ju*(*piter*), *Jovis* als nahe etymologische Verwandte treten. Gegen diesen Ansatz hat sich Bremer[73] [[73] Der germanische Himmelsgott, JF. III, S. 301 f.; vgl. Streitberg zur German. Sprachgeschichte, S. 72; Kögel, LG. I, 1, S. 14; Schrader, Sprachvergleichung und Urgeschichte[3], II, S. 439. Noreen, Abriss der urgerm. Lautlehre, stellt sich S. 176, Anm. 10 auf Bremers Seite, während er S. 28 und aisl. Gramm, § 68, 7, selbst die Gleichsetzung *Dyāuš—Zio* verzeichnet.—Beide Etymologien berühren sich übrigens; denn die zugrunde liegenden Wurzelformen idg. **dieu* und **dei-u-o* scheinen im Ablaut miteinander zu stehen (vgl. Walde, Lat. etym. Wb.[2], S. 230), abgesehen von dem bei der zweiten Form eingetretenen Übergang aus der Klasse der Wurzelnomina in die *a*-Klasse.] mit Entschiedenheit, aber ohne zwingende Gründe gewendet und setzt einen germ. *wa*-Stamm **Tîwaz* an, wozu der nordische Plural *tívar*[74] [[74] Heterosyllabisches *w* bewirkt keinen Umlaut.] „Götter", ind. *dēva*, lit. *dẽvas*, lat. *deus* (aus **deivos*) zu stellen sind.' Similarly my friend the Rev. Prof. J. H. Moulton *Early Zoroastrianism* London 1913 p. 393 n. observes that the argument of O. Bremer ('Der germanische Himmelsgott' in the *Indogermanische Forschungen* 1894 iii. 301 f.) for attaching the Germanic words to *deivos* rather than to *dyēus* did not convince O. Schrader (*Reallex.* p. 670), cp. J. Hastings *Encyclopædia of Religion and Ethics* Edinburgh 1909 ii. 33 n., and that the High German *Zio* is declared by the paramount authority of K. Brugmann *Grundriss der vergleichenden Grammatik der indogermanischen Sprachen*[2] Strassburg 1897 i. 133 f. to suit either origin, but that in the opinion of Prof. H. M. Chadwick (*The Cult of Othin* London 1899 p. 2) the Old English form (*Tīw*-) cannot be traced to anything but *deivos*.

[2] J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 196 ff., E. H. Meyer *Germanische Mythologie* Berlin 1891 p. 220 ff., W. Golther *Handbuch der germanischen Mythologie* Leipzig 1895 p. 200 ff., K. Müllenhoff *Deutsche Altertumskunde* Berlin 1900 iv. 217, 460, 525 f., P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 pp. 106, 243 ff., R. M. Meyer *Altgermanische Religionsgeschichte* Leipzig 1910 p. 180 ff., K. (in *Marti Thingso*[1] and *Dinsdag*[2], Tuesday) and, with more certainty, Er (Erchtag) among the Bavarians[3], and Sahsnot (Anglo-Saxon Seaxneat, *i.e.* swòrd companion) among the Saxons[4]. The Anglo-Saxon rune ᛉ (Ear) is also referred to him[5]. Finally Iring, the

[1] Dessau *Inscr. Lat. sel.* no. 4760 deo | Marti | Thingso | et duabus | Alaisiagis | Bede et Fi|mmilene | et n(uminibus) Aug(ustorum) Ger|m(ani) cives Tu|ihanti | v.s.l.m., cp. no. 4761 deo | Marti et duabus | Alaisiagis et n(uminibus) Aug(ustorum) | Ger(mani) cives Tuihanti | cunei Frisiorum | Ver(....) Ser(....) Alexand|riani votum | solveru[nt] | libent[es m.]. These inscriptions were found in 1883 on two altars at Housesteads, the site of Borcovicium the eighth station on Hadrian's wall. The former altar has on its right side the relief of a female figure, doubtless one of the Alaisiagae. The latter altar has a small *protome* in front and sacrificial implements on the sides. Further, a semicircular top belonging to one of the altars represents Mars as an armed warrior with a swan or goose flanked by two hovering attendants. These altars were dedicated in the reign of Alexander Severus (222—235 A.D.) by Germani from Tuianti, the modern Twenthe. For a full bibliography see K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 366 n. 80.

L. Laistner *Das Rätsel der Sphinx* Berlin 1889 ii. 450 observes: 'Der friesische *Mars Thingsus*, dieser Ζεὺς ἀγοραῖος der Germanen, neben welchem weibliche Gottheiten genannt werden ähnlich wie Dike neben Zeus, ist dargestellt mit einem Schwan, der sich vertraulich an ihn schmiegt und wohl eben diese weibliche Gefolgschaft andeuten soll: Ziu mit dem Schwane und Zeus mit den Schwanfrauen weisen auf eine uralte gemeineuropäische Vorstellung hin (vgl. auch Hoffory, Eddastudien 1, 145 ff.).'

[5] So J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 199 ff., 1888 iv. 1351, E. H. Meyer *Germanische Mythologie* Berlin 1891 p. 221, K. Simrock *Handbuch der Deutschen Mythologie* Bonn 1878 p. 273, W. Golther *Handbuch der germanischen Mythologie* Leipzig 1895 p. 213. Their view is based on the following evidence. (*a*) In the Runic alphabets of cod. Cotton. Otho B 10 (G. Hickes *Linguarum Veterum Septentrionalium Thesaurus grammatico-criticus* Oxoniæ 1705 i. 135, G. Stephens *The Old-Northern Runic Monuments of Scandinavia and England* London—Köbenhavn 1866–67 i. 100 no. 5, L. F. A. Wimmer *Die Runenschrift* Berlin 1887 p. 85) and cod. Cotton. Domitian A 9 (G. Hickes *op. cit.* i. 136, G. Stephens *op. cit.* i. 102 no. 9) the rune ᛉ is called, not only *ear*, but also *tir*. (*b*) In other Anglo-Saxon alphabets ᛉ is used for the

Thuringian hero, who with his sword slays two kings, is, according to some, likewise a form of Tiu[1].' Now the Milky Way was known as *Iringesstrâza* or *Iringes wec*, the 'Street' or 'Road of Iring[2].' If, therefore, Iring is rightly regarded as a form of Ziu, we have here the Germanic parallel to Pindar's 'road of Zeus[3].' That road led up 'to Kronos' tower.' But the counterpart of this mysterious destination is hardly to be found in Germanic myth. It might rather be sought in the Celtic area; for a Welsh name of the Milky Way was *caer Gwydion*, the 'castle of Gwydion[4].' However that may be, Iring is in legend closely associated with Irmenfried, king of the Thuringians[5]; and *Irmin*, the 'Uplifted One[6],' is commonly thought to have been another name or surname of Ziu[7]. It was probably as

letter *z*, and in cod. Cotton. Tiberius D 18 (J. M. Kemble 'On Anglo-Saxon Runes' in *Archæologia* 1840 xxviii. 338 pl. 15, 1 f., G. Stephens *op. cit.* i. 107 no. 24) is called *ziu* But Mr B. Dickins, to whom I applied for a criticism of the whole hypothesis, has shown convincingly that it rests on a complete misconception of the *data*. His remarks, too important to be compressed into a footnote, will be found printed in the Addenda *ad loc.*

M. Meyer *Altgermanische Religionsgeschichte* Leipzig 1910 p. 192 '*Irmin* ist sicher Tiu.' For a critical investigation of the evidence see R. Much 'Der germanische Him-

the sign and symbol of this sky-god that the ancient Saxons worshipped a high pillar named the *Irminsûl*[1]. Thus, when Charles the Great in 772 A.D. destroyed one of their cult-centres near Eresburg in Westphalia, he overthrew a great trunk of timber erected under the open sky and reverenced by the natives as the *Irminsûl*, a world-pillar supporting all things[2]. Again, in 530 A.D. the Saxons had won a great victory over the Thuringians at Scheidungen on the Unstrut. 'And, when morning dawned,' says Widukind[3], 'they set up an eagle at the eastern gate and, erecting an altar of victory, worshipped their

melsgott' in *Abhandlungen zur germanischen Philologie* (*Festgabe für Richard Heinzel*) Halle a. S. 1898 p. 197 ff.

[1] The best collection of evidence is still that of J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 115 ff., 353 ff., 1883 ii. 799 f., 1888 iv. 1312, 1322. Cp. E. H. Meyer *Germanische Mythologie* Berlin 1891 pp. 17, 83, W. Golther *Handbuch der germanischen Mythologie* Leipzig 1895 p. 593 ff., R. Much 'Der germanische Himmelsgott' in *Abhandlungen zur germanischen Philologie* (*Festgabe für Richard Heinzel*) Halle a. S. 1898 p. 203, K. Müllenhoff *Deutsche Altertumskunde* Berlin 1900 iv. 520 ff., P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 pp. 124 f., 360, Forrer *Reallex.* p. 389, R. M. Meyer *Altgermanische Religionsgeschichte* Leipzig 1910 p. 192, K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 p. 339 f.

[2] Rudolph of Fulda *translatio S. Alexandri* 3 (G. H. Pertz *Monumenta Germaniae historica* Hannoverae 1829 ii. 676) Frondosis arboribus fontibusque venerationem exhibebant. Truncum quoque ligni non parvae magnitudinis in altum erectum sub divo colebant, patria eum lingua Irminsul appellantes, quod latine dicitur universalis columna, quasi sustinens omnia. This passage was penned between 863 and March 865 A.D. It may therefore be regarded as containing a comparatively trustworthy tradition of events that had happened less than a century earlier. But we must beware of mistranslating the last two clauses. P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 p. 124 f. renders 'a wooden pillar of unusual size in the open air, worshipped in common, and whose destruction was a national calamity.' This interpretation (though in agreement with that of W. Mannhardt *Wald- und Feldkulte*[2] Berlin 1904 i. 303 ff., who took the *Irminsûl* to be the '*Lebensbaum* der Volksgesammtheit') is certainly wrong. The Latin *universalis columna, quasi sustinens omnia* can mean only that the pillar in question was conceived to be the prop or central support of the universe. This is clearly perceived and, to my thinking, successfully proved by F. Hertlein *Die Juppitergigantensäulen* Stuttgart 1910 p. 73 ff.

[3] Widukind *res gestae Saxonicae* 1. 12 (G. H. Pertz *Monumenta Germaniae historica* Hannoverae 1839 iii. 423 f.) Mane autem facto ad orientalem portam ponunt aquilam, aramque victoriae construentes, secundum errorem paternum sacra sua propria veneratione venerati sunt; nomine Martem, effigie columpnarum imitantes Herculem, loco Solem, quem Graeci appellant Apollinem. Ex hoc apparet aestimationem illorum utcumque probabilem, qui Saxones originem duxisse putant de Graecis, quia Hirmin vel Hermis graece Mars dicitur; quo vocabulo ad laudem vel ad vituperationem usque hodie etiam ignorantes utimur. K. Müllenhoff *Deutsche Altertumskunde* Berlin 1900 iv. 520 ff., following Pertz *ad loc.*, understands *aram...victoriae* as an *Irminsûl* and construes *nomine* (*aras imitantes*) *Martem, effigie columpnarum* (*aras*) *imitantes Herculem, loco* (*aras imitantes*) *Solem*. See *infra* § 3 (a) iii (o). As to Widukind's concluding remark, J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 354 f., 1888 iv. 1388 notes that in Westphalia and Hesse the name Irmin still survives in a variety of popular sayings under the forms *Herm, Herme, Hermen, Hermann*, etc.

divinities with due rites according to the error of their fathers. In name they copied Mars, in effigy of columns Hercules, in site Sol whom the Greeks term Apollo. This renders highly probable the view of those who hold that the Saxons originated from the Greeks, because Mars is called Hirmin, or in Greek Hermis,—a name still used by us, though we know it not, for praise or blame.' The chronicler is a would-be classic, and fond of a rhetorical flourish; but there is little doubt that he means to describe the erection and worship of an *Irminsûl*. Indeed, such pillars were probably of frequent occurrence among the tribes that worshipped Ziu.

It would seem, then, that *Er* and *Irmin* were appellatives of the Germanic sky-god, who was connected in legend with the Milky Way and in cult with a high column viewed as a world-pillar or universal support. In face of these facts I surmise that the myth in Platon's *Republic*, which combined the curved light of the Galaxy and the 'straight light like a pillar,' is not altogether independent of early Germanic belief. I would even risk the conjecture that in the hero of the Platonic myth, *Er* son of *Armenios*, we have the Grecised equivalent of both *Er* and *Irmin*[1].

To this it may be objected that alike in time and in place the Germanic world was too remote from the Hellenic to have influenced Platon. But in both respects, as we shall see later[2], a half-way house can be found, thanks to Orpheus, that marvellous mediator between barbarian and Greek.

Meantime I would point out that the *Irminsûl* or universe-prop implies the primitive notion that the sky stands in need of a visible support. Early man was in fact haunted by a very definite dread that it might collapse on the top of him[3]. The classical authors bear

[1] J. Adam in his note on Plat. *rep.* 614 B Ἠρὸς τοῦ Ἀρμενίου, τὸ γένος Παμφύλου thinks that 'The names point to the East,' but, like other commentators, fails to make out any convincing connexion. No doubt Er was a Hebrew name (Souid. *s.v.* Ἤρ), borne *e.g.* by one of the ancestors of Joseph the husband of the Virgin Mary (Luke 3. 28); and some of the ancients certainly understood Ἠρὸς of Zoroastres (Clem. Al. *strom.* 5. 14 p. 395, 17 ff. Stählin, Prokl. *in* Plat. *remp.* ii. 109, 8 ff. Kroll, cp. Arnob. *adv. nat.* 1. 52), rendering τοῦ Ἀρμενίου either 'the son of Armenios' (Clem. Al. *strom.* 5. 14 p. 395, 20, Prokl. *in* Plat. *remp.* ii. 109, 14, 110, 11 and 20 f. Kroll) or 'the Armenian' (Prokl. *in* Plat. *remp.* ii. 110, 15 ff. Kroll, cp. Arnob. *adv. nat.* 1. 52), or else altering it into τοῦ Ἀρμονίου (cp. Prokl. *in* Plat. *remp.* ii. 110, 11 ff. Kroll) or τοῦ Ἁρμονίου (cp. Plout. *symp.* 9. 5. 2). But, so far as I know, neither the Milky Way nor the 'straight light like a pillar' figured in the teaching of Zoroastres (see, however, *supra* p. 33 ff.).

[2] *Infra* § 3 (a) iii (ι).

[3] I am indebted to my daughter for a reference to the folk-tale of *Henny-Penny* (J. Jacobs *English Fairy Tales* London 1898 pp. 113 ff., 243 f.), which begins: 'One day Henny-penny was picking up corn in the cornyard when—whack!—something hit her upon the head. "Goodness gracious me!" said Henny-penny; "the sky's a-going

witness to the terror which this thought inspired among the peoples of Central Europe. Strabon[1] and Arrian[2] both tell us that in the year 335 B.C. the Celts of the Adriatic, men of great stature and a haughty disposition, sent envoys to sue for the friendship of Alexander. The Macedonian monarch received them in state and asked them what they dreaded most, expecting the obvious answer 'You.' To his chagrin they replied that they had but one fear—lest the sky should some day fall upon them! So he promptly packed them off, with the cutting remark that the Celts were constitutional braggarts. Again, in the year 179 B.C. an army of over thirty thousand stalwart Bastarnians, led by their chief Clondicus, marched against Dardania, but were daunted by a big thunderstorm on Mount Donuca. They declared, says Livy[3], that the gods were routing them and the sky falling upon them.

These wild notions were not confined to the barbarians of Middle Europe. They have at least left traces of themselves in the literature of Italy and Greece, traces which become clearer and more tangible as we follow them back into the past. Horace[4], who has of course outgrown such nonsense, uses it just to round off an effective stanza: even if the sky should come tumbling about him, the well-conducted and resolute Roman would not turn a hair[5]. Terence[6] treats the matter more seriously: wanting a proverb to describe undue timidity, he introduces 'the folk that say "What if the sky were to fall this very moment?"' We gather that there were such folk in the second century B.C., superstitious peasants or the like. But for a fuller expression of their belief we must get back another three or four hundred years. Theognis[7] of Megara in a characteristic passage protests that he loves his friend and hates his foe, adding by way of solemn confirmation: 'Else may the great broad sky of bronze come crashing down upon me, that terror of earth-born men.' I need not labour the point. It is clear that the lower classes in Italy and at least the Megarians in Greece shared with Celts and Bastarnians the paralysing fear that some day the sky itself might fall.

to fall; I must go and tell the king." So she went along and she went along and she went along till she met Cocky-locky. "Where are you going, Henny-penny?" says Cocky-locky. "Oh! I'm going to tell the king the sky's a-falling," says Henny-penny. "May I come with you?" says Cocky-locky. "Certainly," says Henny-penny. So Henny-penny and Cocky-locky went to tell the king the sky was falling.' Etc. See further J. Grimm *Geschichte der deutschen Sprache*[3] Leipzig 1868 i. 322 n. *, *id. Teutonic Mythology* trans. J. S. Stallybrass London 1883 ii. 813 n. 2, 1888 iv. 1541.

[1] Strab. 301 f.
[2] Arrian. 1. 4. 6—8.
[3] Liv. 40. 58.
[4] Hor. *od.* 3. 3. 1 ff.

[7] Theogn. 869 f.

How that belief arose, we can only surmise. It may be that in the dim past, when the ancestors of these tribes developed out of hunters into herdsmen and emerged from the forest on to the open plain, they missed the big tree that seemed to support the sky ('heaven-reaching,' as Homer[1] calls it). And in the absence of that mighty prop there was nothing to guarantee the safety of their roof[2].

Now early man was a practical person. His roof being insecure, he proceeded to shore it up. The *Irminsûl* was primarily a sky-prop, though we may well believe that it came to be viewed as the

[1] *Od.* 5. 239 ἐλάτῃ τ' ἣν οὐρανομήκῃς, cp. Hdt. 2. 138 δένδρεα οὐρανομήκεα, *Anth. Pal.* 4. 1. 49 f. (Meleagros) *οὐρανομάκευς* | *φοίνικος.* 'I remember, I remember, | The fir trees dark and high; | I used to think their slender tops | Were close against the sky' (T. Hood).

[2] Attention may here be drawn to the various accounts of the Kallikantzaroi given by the modern Greeks. These are summarised as follows by J. C. Lawson *Modern Greek Folklore and Ancient Greek Religion* Cambridge 1910 p. 194: 'The Callicantzari appear only during the *δωδεκαήμερον* or "period of twelve days" between Christmas and Epiphany[1]. ([1] Leo Allatius (*De quor. Graec. opinat.* cap. ix.) makes the period a week only, ending on New Year's Day.) The rest of the year they live in the lower world, and occupy themselves in trying to gnaw through or cut down the great tree (or in other accounts the one or more columns) on which the world rests. Each Christmas they have nearly completed their task, when the time comes for their appearance in the upper world, and during their twelve days' absence, the supports of the world are made whole again.' Details will be found in N. G. Polites Παραδόσεις Athens 1904 i. 331 no. 590 from Bourboura in Kynouria (The Lykokatzaraioi come from below the earth. All the time they are hewing away with their axes at the tree which supports the earth (*τὸ δέντρο ποῦ βαστάει τὴ γῆς*). They chop and chop till a tiny piece no bigger than a thread remains uncut, and they say 'Come, let us be off; it will fall of itself.' They return after the Baptism and find the tree entire, absolutely whole. And again they chop, and again they come, and so continually do they busy themselves), i. 347 no. 612 from Naupaktos (...the Pagan Ones begin hewing with their teeth and with axes the three columns which support the world (*τοῖς τρεῖς κολόνναις, ποῦ βαστᾶν τὸν κόσμο*), to hurl them down, that the world may collapse. Etc.), i. 352 no. 621 from Lasta in the deme Mylaon, Gortynia (The earth is supported below by one column, which has four other pillars (*μὰ κολόνα, ποῦ ἔχει τέσσερους ἄλλους στύλους* [*infra* § 3 (*a*) iii (*κ*)]). There the Kolikantzaroi are in bondage for ever and labour at cutting the column to make the earth fall. Etc.), i. 354 no. 622 from Demetsana in Gortynia (The Kallikantzaroi are naked, apart from beards and moustaches, and in size resemble a child of ten, some being a little taller, others a little shorter. They dwell in the Underworld, where there are three wooden columns supporting the whole earth (*ἐκεῖ εἶναι τρεῖς ξύλιναις κολόνναις καὶ κρατοῦν ὅλην τὴν γῆ*). The Kalikantzaraioi want to cut the columns and overthrow the world, and they are perpetually getting to work with their axes and chopping the three columns. Etc.), i. 355 no. 623 from Gralista in the deme Ithome, Karditsa (The Karkantsaloi have their dwelling in Hades, and gnaw with their teeth the pillars which support the sky, that it may fall and crush the earth (*κὶ βουκανοῦν μὶ τὰ δόντια τους τὰ στύλια, ἀπ' βαστοῦν τοὺν οὐρανὸ νὰ μὴν πέσῃ κὶ πλακώσῃ τὴ γῆ*). They gnaw and gnaw and do their utmost to cut the pillars. Etc.). See further N. G. Polites Μελέτη ἐπὶ τοῦ βίου τῶν Νεωτέρων Ἑλλήνων Athens 1871 i. 26 and 69, J. N. Svoronos in the *Journ. Intern. d'Arch. Num.* 1912 xiv. 252 and 280. It will be observed that, whereas most of these versions make the tree (no. 590) or columns (nos. 612, 621, 622) support the earth, one at least (no. 623) makes the pillars support the sky.

vehicle of the sky-god and even to be embellished with his form and features[1].

(ε) Iupiter-Columns.

Far and wide over the territory once occupied by Germanic tribes[2] are remains of isolated columns, dating from the close of the second to the middle of the third century A.D., that is to say, from the period when Rhenic Germany witnessed a Romanised revival of its national cults[3]. These columns, usually termed *Juppitersäulen* or *Gigantensäulen*[4], consist of the following parts. The lowest member, exclusive of the base, is a quadrangular plinth known as the *Viergötterstein*[5], which is adorned by reliefs of four deities—commonly Iuno, Mercurius, Hercules, Minerva (fig. 22)[6]—

[1] A. Olrik 'Irminsul og gudestøtter' in *Maal og minne* 1910 pp. 1—9, summarised in the *Zeitschrift des Vereins für Volkskunde* 1910 xx. 348 ('Die Säulen mit dem Götternagel, die im Hause der altnordischen Häuptlinge neben dem Ehrensitze standen hatten, wie aus einem Vergleiche der altdeutschen Irminsäulen...und der noch im 18. Jahrhundert bei den Finnen verehrten "Weltpfeiler" erhellt, die zweifache Bedeutung einer die Welt tragenden Säule und eines rohgeschnitzten Götterbildes'). On the high-seat pillars of the old Norsemen and on the world-pillars of the Lapps, with their sacred nails, see *infra* § 3 (a) vi (α), § 3 (c) i (γ).

[2] For detailed proof of this limitation see the admirable monograph of F. Hertlein *Die Juppitergigantensäulen* Stuttgart 1910 p. 51 ff.

[3] A. Riese 'Zur Geschichte des Götterkultus im rheinischen Germanien' in the *Westdeutsche Zeitschrift* 1898 xvii. 1 ff. says (p. 13): 'Um die Zeit nach dem Tode des Marc Aurel geschah eine wunderbare Veränderung, die meines Wissens in diesem Sinne noch nicht erwähnt ist: der Romanisierung der Religion folgte eine neue Nationalisierung, und gallische und auch germanische Götter erhalten Votivinschriften.' He goes on to quote inscriptions ranging from 187 A.D. (*Corp. inscr. Lat.* xiii no. 8185 = Dessau *Inscr. Lat. sel.* no. 4743 *deae Hariasae* etc. found at Cologne) to 259—268 A.D. (Cohen *Monn. emp. rom.*[2] vi. 24 ff. no. 88 f. HER·DEVSONIENS, nos. 90—100 HERC·DEVSONIENSI, nos. 115—118 HERCVLI DEVSONIENSI, *ib.* vi. 29 f. no. 129 f. HERCVLI MAGVSANO on coins of Postumus: for these deities see R. Peter in Roscher *Lex. Myth.* i. 3017—3020 and Haug in Pauly—Wissowa *Real-Enc.* viii. 611).

[4] A bibliography of the 'Jupiter-columns' is given *supra* i. 178 n.

[5] Haug 'Die Viergöttersteine' in the *Westdeutsche Zeitschrift* 1891 x. 9—62, 125—161, 295—340, F. Hertlein *Die Juppitergigantensäulen* Stuttgart 1910 pp. 94—164 ('Die Viergöttersteine').

[6] Of 83 plinths decorated with four deities 48 exhibit the series Iuno, Mercurius, Hercules, Minerva (42 from left to right, 6 from right to left), 19 replace Mercurius by another deity (2 by Iupiter with a wheel, 2 hy Mars with a wheel, 2 by Mars without a wheel, 7 hy Apollo, 4 by Volcanus, 2 by Victoria (fig. 22, 3 *b* Kreuznach no. 137 Haug)), 2 replace Minerva (1 by Fortuna (fig. 22, 2 *d* Kreuznach no. 136 Haug), 1 by Mars), 4 replace two deities (1 substituting Fortuna with a wheel and Apollo for Iuno and Mercurius, 1 Victoria and Mars for Mercurius and Minerva (fig. 22, 3 *b* and 3 *d* Kreuznach no. 137 Haug), 1 Apollo and Volcanus for Mercurius and Hercules, 1 Minerva and Mars for Hercules and Minerva), 10 are quite irregular. See the summaries in Hertlein *op. cit.* pp. 111, 127.

Fig. 22, 1 *a—d* (after E. Schmidt in the *Jahrb. d. Vereins v. Alterthumsfreund. im Rheinl.* 1869 xlvii. 92 pl. 14, 3 a, c, d, b) shows the reliefs of a sandstone block, 0·90^{m} high × 0·41^{m} broad and deep, found in 1858 A.D. built into the north-west angle of

or by an inscription and reliefs of three deities—mostly the same series with the omission of Iuno or Mercurius[1]. F. Hertlein has

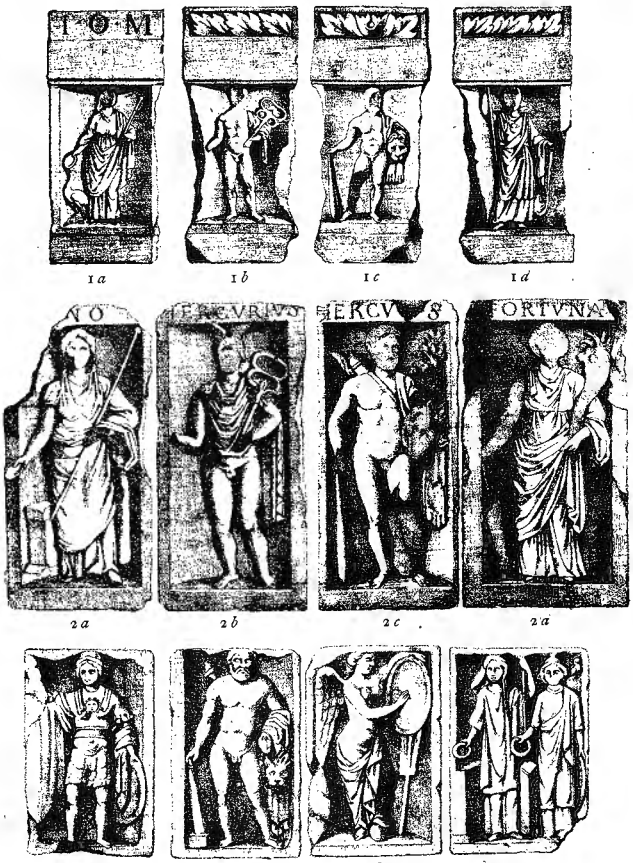

Fig. 22.

gone some way towards proving that these deities represent the

the Roman fort (*Heidenmauer*) near Kreuznach = Haug 'Die Viergöttersteine' in the *Westdeutsche Zeitschrift* 1891 x. 126 no. 135.

[1] Of 19 plinths showing an inscription and three deities, 5 have the series Mercurius, Hercules, Minerva (2 from left to right, 3 from right to left), 3 have Iuno, Hercules,

Seasons, the quartet corresponding with the fourfold division of the Julian calendar, and the trio with the threefold division recognised by the Germani in the time of Tacitus[1]. He supposes that Iuno, who often carries a torch or torches (fig. 23)[2], is the Romanised form of Frija, conceived as the light-bearing goddess of spring[3]; that Mercurius is Wodan, here for some reason obscure

Minerva (from right to left), 1 has Iuno, Mercurius, Minerva (from left to right); 1 has Apollo, Hercules, Minerva (from left to right), 1 has Victoria, Hercules, Minerva (from left to right); 1 has Iuno, Hercules, Victoria (from right to left), 1 has Iuno, Apollo, Victoria (from left to right), 1 has Apollo, Hercules, Diana (from left to right), 1 has Mars, Volcanus, Victoria (from right to left), 1 has Fortuna, Volcanus, Victoria (from left to right), 1 has Mars, Fortuna, Victoria (from left to right), 1 has Fortuna, Luna, Sol (from left to right), 1 has Mars, Victoria, Mercurius (from left to right). Hertlein *op. cit.* p. 134 f. points out that the first three series are merely excerpts from the full quartet Iuno, Mercurius, Hercules, Minerva; that the fourth and fifth series are excerpts from the same quartet with one name varied; and that the remaining groups are less nearly related to the original set.

[1] Tac. *Germ.* 26 hiems et ver et aestas intellectum ac vocabula habent, autumni perinde nomen ac bona ignorantur. On this passage see the sensible and cogent remarks of Hertlein *op. cit.* p. 137 ff.

[2] Fig. 23 is from a block probably found at Orolaunum (*Arlon*), a town of the Treveri = Haug 'Die Viergöttersteine' in the *Westdeutsche Zeitschrift* 1891 x. 146 no. 181 *d* pl. 4, Espérandieu *Bas-reliefs de la Gaule Rom.* v. 355 f. no. 4238.

Fig. 23.

[3] Hertlein *op. cit.* p. 143 ff. argues that the torches of Iuno (*ib.* p. 94 ff.) are presumably a Germanic attribute of the 'Himmelsgöttin, die im Frühjahr das helle Himmelslicht wieder heraufführt,' recalling the *Funkensonntag*, a fire-festival of the German peasantry celebrated on the First Sunday in Lent (W. Mannhardt *Wald- und Feldkulte*[2] Berlin 1904 i. 500 ff., Frazer *Golden Bough*[3]: Balder the Beautiful i. 106 ff.). He thinks too that the fluttering robe sometimes worn by the goddess (Hertlein *op. cit.* pp. 95, 97) betokens horizontal flight such as would suit the partner of the advancing Germanic Iupiter. Lastly, he remarks that the title *Regina* frequently attached to the Iuno of the *Viergöttersteine* (*ib.* p. 81 f.) means much the same as the Norse *Freyja*, the 'Mistress,' who 'ist hauptsächlich die Göttin der im Frühjahr wiedergeborenen Sonne und Natur, die Göttin des lichten Frühlings, der Zeit neuen Sprossens und der Liebe.'

It should, however, be noted, on the one hand that the title *Regina* is not found in the district of the Treveri (*ib.* p. 81), on the other hand that the torch-bearing goddess is particularly frequent in that region (Haug in the *Westdeutsche Zeitschrift* 1891 x. 300 f.). This fact makes it at least possible that in the torch-bearer we should recognise, not Iuno *Regina*, but Iuno *Lucina*, whose worship was widely spread in western Europe

(Apul. *met.* 6. 4 te iam nuptam Tonantis et reginam deorum...quam cunctus oriens Zygiam veneratur et omnis occidens Lucinam appellat). It is probably Iuno *Lucina*, who carries an infant and a torch on a Roman tomb-stone now in the Vatican (H. Brunn in the *Ann. d. Inst.* 1848 xx. 430 ff. pl. N, L. Stephani in the *Compte-rendu St. Pét.* 1859 p. 135, Overbeck *Gr. Kunstmyth.* Hera p. 153 Atlas pl. 10, 24=my fig. 24,

Fig. 24.

W. H. Roscher *Iuno und Hera* (Studien zur vergleichende Mythologie der Griechen und Römer ii) Leipzig 1875 p. 23 f. and in Roscher *Lex. Myth.* ii. 582, 602, J. Vogel *ib.* ii. 611, Amelung *Sculpt. Vatic.* i. 809 f. no. 731 A pl. 86): opposite to her stands the deceased with a table as altar and a pig as victim; in front is the dedication (*Corp. inscr. Lat.* vi no. 24819) between two burning torches linked by a fillet. Iuno *Lucina* certainly appears as a reverse type on Roman imperial coins, sometimes erect, either holding a *patera* and a sceptre (Cohen *Monn. emp. rom.*[2] iii. 147 Faustina Iunior nos. 131 f. rev. IVNONI LVCINAE Iuno standing to left with *patera* and sceptre—gold, no. 133 rev. IVNONI LVCINAE S·C· Iuno, veiled, standing to left with *patera* and sceptre—large bronze; *id. ib.*[2] iii. 384 Crispina no. 24 rev. IVNO LVCINA S·C· Iuno standing to left with *patera* and sceptre, peacock at feet—middle bronze; *id. ib.*[2] v. 146 Otacilia no. 23 rev. IVNO LVCINA Iuno, clad in goat-skin (?), standing to right with *patera* and sceptre—silver), or raising one hand and supporting an infant with the other (*id. ib.*[2] iii. 218 Lucilla no. 38 rev. IVNONI LVCINAE Iuno, veiled, standing to left, raising right hand and holding a swaddled infant —silver, no. 39 rev. IVNONI LVCINAE S·C· the same type—large bronze and middle bronze), or holding one child and flanked by two others (*id. ib.*[2] iii. 147 Faustina Iunior nos. 134 f. rev. IVNONI LVCINAE Iuno standing to left between two children with a third in her arms—gold, no. 136 rev. IVNONI LVCINAE S·C· Iuno standing to left between two girls with a third on her left arm—large bronze, no. 137 rev. the same legend and type—middle bronze); sometimes seated, either flanked by two children with a third on her knee (*id. ib.*[2] iii. 147 Faustina Iunior no. 138 rev. Iuno seated to right between two

children with a third on her knee—middle bronze, broken), or holding in one hand a swaddled infant, in the other a lily or possibly an iris (*id. ib.*² iii. 218 Lucilla no. 36 rev. IVNONI LVCINAE Iuno seated to left holding a flower and a swaddled infant—silver, no. 37 IVNONI LVCINAE S·C· the same type—large bronze; *id. ib.*² iv. 113 Iulia Domna nos. 93 f. rev. IVNONI LVCINAE S·C· Iuno seated to left holding a flower and a swaddled infant—large bronze, no. 95 rev. the same legend and type—middle bronze). These coins date from approximately the same period as the *Juppitersäulen* (*supra* p. 57); and the lily held by Iuno in the last-mentioned type (fig. 25 is from a large bronze of Iulia Domna, after Overbeck *Gr. Kunstmyth.* Hera p. 154 f. Münztaf. 3, 13, who notes that the type recurs on coins of Iulia Mamaea, [Cornelia Supera,] and Salonina inscribed IVNO AVGVSTAE, [IVNONI AVG,] and IVNO AVG respectively—see Cohen *Monn. emp. rom.*² iv. 493 nos. 32—34, [v. 296 no. 3,] v. 502 no. 55) recalls the myth of the Milky Way (*supra* i. 624, ii. 49 n. 1). Further, Iuno *Lucina* might well be regarded as the goddess of spring, for her chief festival at Rome was on March 1, when spring began (Ov. *fast.* 3. 235 ff.: see W. H. Roscher *Iuno und Hera* (Studien zur vergleichende Mythologie der Griechen und Römer ii) Leipzig 1875 p. 22 n. 25 and in Roscher *Lex. Myth.* ii. 584, 603, W. Warde Fowler *The Roman Festivals* London 1899 p. 38, Wissowa *Rel. Kult. Röm.*² p. 184 f.). Finally, Iuno *Lucina* was a 'light'-goddess (Mart. Cap. 149 sive te Lucinam quod lucem nascentibus tribuas ac Lucetiam convenit nuncupare) and as such would be fittingly brought into connexion with the Germanic Iupiter: cp. the collocation in *Corp. inscr. Lat.* vi no. 357 = Dessau *Inscr. Lat. sel.* no. 3101 (a bronze plate of Roman origin, part of which is extant at Bologna, the remainder being known from an earlier transcript) [Iunon]e Loucinai | [Diovis c]astud facitud, L. Savignoni and R. Mengarelli in the *Not. Scavi* 1903 p. 255 ff. = C. Hülsen in the *Röm. Mitth.* 1903 xviii. 338 f. (a bronze plate found at Norba in Latium and now in the Museo delle Terme at Rome) P. Rutilius M. f. | Iunonei Loucina | dedit meretod | Diovos castud. The second of these inscriptions proves that in the first we should not translate 'To Iuno *Lucina*, wife of Iupiter' (so Th. Mommsen in the *Corp. inscr. Lat.* vi no. 357 and H. Dessau *loc. cit.*), nor even 'property of Iupiter' (so A. von Domaszewski *Abhandlungen zur römischen Religion* Leipzig and Berlin 1909 p. 108), but rather join *Diovis* with *castud* (Wissowa *Rel. Kult. Röm.*² p. 181 n. 3). Still, both inscriptions warrant us in supposing that Iuno *Lucina* might reasonably appear in the *entourage* of Iupiter.

Fig. 25.

One detail remains to be cleared up. The object held by the Iuno of fig. 23 in her right hand has been variously explained. Haug in the *Westdeutsche Zeitschrift* 1891 x. 146, 302 is content to cite the opinion of A. de Wiltheim *Luciliburgensia Romana* ed. A. Neyen Luxemburg 1842 p. 192 that we have here Iuno *Pronuba* (G. F. Prat in his *Histoire d'Arlon* Arlon 1873 says Iuno *Cinxia*) with her girdle: on these forms of the marriage-Iuno see W. H. Roscher *Iuno und Hera* (Studien zur vergleichende Mythologie der Griechen und Römer ii) Leipzig 1875 p. 67 and in Roscher *Lex. Myth.* ii. 589, E. Aust in Pauly—Wissowa *Real-Enc.* iii. 2563, Wissowa *Rel. Kult. Röm.*² p. 186 with n. 1 and in his *Gesammelte Abhandlungen zur römischen Religions- und Stadtgeschichte* München 1904 p. 320. If the attribute in question were anything of the sort, I should prefer to regard it as the necklace of Frija (J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 306 ff., K. Müllenhoff 'Frija und der Halsbandmythus' in the *Zeitschrift für deutsches Alterthum* 1886 xxx. 217—260, R. M. Meyer *Altgermanische Religionsgeschichte* Leipzig 1910 p. 215). But F. Hertlein *Die Juppitergigantensäulen* Stuttgart 1910 p. 97 has made out a good case for viewing it as merely another variety of torch, and *ib.* p. 144 n. 2 suggests that the goddess is engaged in a ritual *Fackelschwingen* comparable with that of the modern *Funkensonntag* or *jour des brandons* (cp. *supra* i. 286, 648, 650 with n. 4). Espérandieu *Bas-reliefs de la Gaule Rom.* v. 355 f. no. 4238 'peut-être deux serpents.'

to us figuring as the god of summer[1]; that the bearded Hercules

[1] **Wōðanaz* (Old Saxon *Wōdan*, Old High German *wuotan*), **Wōðenaz* (Old English *Wōden*, Old Norse *Óðinn*), who gradually superseded the old sky-god Ziu (K. Müllenhoff *Deutsche Altertumskunde* Berlin 1900 iv. 213), was himself also in all probability a sky-god, very possibly a by-form of Ziu (E. Mogk in the *Grundriss der germanischen Philologie*[2] Herausgegeben von H. Paul Strassburg 1900 iii. 332 f.). He looks down on the earth at daybreak through a window in the eastern sky (J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 134 f. cites Paulus Diaconus *hist. Langobard.* i. 8 (L. Bethmann—G. Waitz *Monumenta Germaniae historica* Scriptores rerum Langobardicarum et Italicarum saec. vi—ix Hannoverae 1878 p. 52) Refert hoc loco antiquitas ridiculam fabulam: quod accedentes Wandali ad Godan victoriam de Winnilis postulaverint, illeque responderit, se illis victoriam daturum quos primum oriente sole conspexisset. Tunc accessisse Gambara ad Fream, uxorem Godan, et Winnilis victoriam postulasse, Freaque consilium dedisse, ut Winnilorum mulieres solutos crines erga faciem ad barbae similitudinem conponerent maneque primo cum viris adessent seseque Godan videndas pariter e regione, qua ille per fenestram orientem versus erat solitus aspicere, conlocarent. Atque ita factum fuisse. Quas cum Godan oriente sole conspiceret, dixisse: 'Qui sunt isti longibarbi?' Tunc Frea subiunxisse, ut quibus nomen tribuerat victoriam condonaret. Sicque Winnilis Godan victoriam concessisse). He has a throne named *Hlidhskjalf*, from which he can survey the whole world and hear all that goes on among men (J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 135 f., E. H. Meyer *Germanische Mythologie* Berlin 1891 pp. 190, 234, 251, W. Golther *Handbuch der germanischen Mythologie* Leipzig 1895 pp. 324, 518, P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 pp. 233, 286, 346, E. Mogk in the *Grundriss der germanischen Philologie*[2] Herausgegeben von H. Paul Strassburg 1900 iii. 321, 345, 370, cp. J. Bolte—G. Polívka *Anmerkungen zu den Kinder- u. Hausmärchen der Brüder Grimm* Leipzig 1913 i. 345). Further, it is at least possible that the one eye ascribed to him stands for the sun (F. Magnusen *Edda rhythmica* Hauniae 1828 iii. 540 n.****, E. H. Meyer *Germanische Mythologie* Berlin 1891 pp. 93 f., 231 f., 245, P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 p. 233, R. M. Meyer *Altgermanische Religionsgeschichte* Leipzig 1910 pp. 229—232, *supra* i. 321 n. 3, cp. i. 320 f., 323, 462); and some have given a like explanation of his gold ring *Draupnir*, the 'Dripper,' from which every ninth night dripped eight other rings of equal weight (W. Golther *Handbuch der germanischen Mythologie* Leipzig 1895 p. 312, K. Müllenhoff *Deutsche Altertumskunde* Berlin 1900 iv. 642 f., P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 p. 233), and of the gold helmet that he wore in his contest with the Fenris-wolf (E. Mogk in the *Grundriss der germanischen Philologie*[2] Herausgegeben von H. Paul Strassburg 1900 iii. 345, cp. E. H. Meyer *Germanische Mythologie* Berlin 1891 p. 231). It is not, however, likely that such solar attributes would have led to Wodan being regarded as the god of summer. I would rather explain this aspect of his complex character by the fact that among the Scandinavians the great sacrifice, which year by year took place at the beginning of summer, was probably associated with him (H. M. Chadwick *The Cult of Othin* London 1899 p. 5 f.).

Wodan still survives in popular imagination as leader of the Wild Hunt (*die wilde Jagd*) or the Furious Host (*das wütende Heer*). On windy nights in spring, or autumn, or winter he sweeps across the sky with a howling company at his heels—the souls of the dead (E. H. Meyer *Germanische Mythologie* Berlin 1891 p. 235 ff., P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 pp. 216 f., 225 f., E. Mogk in the *Grundriss der germanischen Philologie*[2] Herausgegeben von H. Paul Strassburg 1900 iii. 333 ff., R. M. Meyer *Altgermanische Religionsgeschichte* Leipzig 1910 p. 81 f., K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 261 ff.). In some districts he heads the rout, not on foot or on horseback, but driving a chariot or coach (E. H. Meyer *Germanische Mythologie* Berlin 1891 p. 239). And, when we observe that the Milky Way is believed to be the path traversed by the Furious Host and is called in

with his club is Donar as the stormy god of autumn[1]; and that consequence the *Heerstrasse*, *Helweg*, *Wôgenpat*, etc. (*id. ib.* p. 241, cp. p. 238), it becomes probable that Platon's myth of the soul-procession following the chariot of Zeus along the Milky Way (*supra* p. 43 f.) presupposes a popular belief akin to that of the Furious Host. If so, the earliest allusion to *das wütende Heer* is not after all the *feralis exercitus* of Tac. *Germ.* 43, but the στρατιὰ θεῶν τε καὶ δαιμόνων of Plat. *Phaedr.* 246 E. See further K. Dilthey 'Die Artemis des Apelles und die wilde Jagd' in the *Rhein. Mus.* 1870 xxv. 321 ff., P. Sartori 'Das wilde Heer' in the *Zeitschrift des Vereins für Volkskunde* 1894 iv. 289—292, L. Weniger 'Feralis exercitus' in the *Archiv f. Rel.* 1906 ix. 201—247 ('Das schwarze Heer der Harier'), 1907 x. 61—81 and 229—256 ('Das weisse Heer der Phoker') with L. R. Farnell in *The Year's Work in Class. Stud.* 1907 p. 63.

On the common equation of Wodan with Mercurius see J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 119 ff., E. H. Meyer *Germanische Mythologie* Berlin 1891 p. 229 f., W. Golther *Handbuch der germanischen Mythologie* Leipzig 1895 p. 295 n. 2, K. Müllenhoff *Deutsche Altertumskunde* Berlin 1900 iv. 212 f., P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 pp. 103, 221 f., E. Mogk in the *Grundriss der germanischen Philologie*[2] Herausgegeben von H. Paul Strassburg 1900 iii. 331, R. M. Meyer *Altgermanische Religionsgeschichte* Leipzig 1910 p. 226, K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 259, 356 ff.

[1] The Germanic god **þunaraz* bore a name derived from the Indo-Europaean root **(s)ten-*, 'to growl, to roar' (Walde *Lat. etym. Wörterb.* p. 630 f. *s.v.* 'tono'), which occurs in Norse as *þórr* (for **þonraz*), on the larger *fibula* from Nordendorf in Bavaria as *þonar* (R. Henning *Die deutschen Runendenkmäler* Strassburg 1889 p. 102, G. Stephens *The Old-Northern Runic Monuments of Scandinavia and England* ed. S. O. M. Söderberg London 1901 iv. 9), in a Saxon baptismal vow as *Thuner* (K. Müllenhoff—W. Scherer *Denkmäler deutscher Poesie und Prosa aus dem viii—xii Jahrhundert*[3] Berlin 1892 i. 198, ii. 316 ff. no. LI), in Old English as *Thunor* (cp. J. M. Kemble *The Saxons in England*[2] London 1876 i. 346 ff.), and in Germanic designations for the fifth day of the week (Old High German *Donarestac*, Old Frisian *Thunresdey*, Anglo-Saxon *Thunresdæg*, Norse *þórsdagr*). These names, as J. Grimm long ago pointed out (J. Grimm 'Über die Namen des Donners' in his *Kleinere Schriften* Berlin 1865 ii. 410 ff. and in his *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 166), stand in obvious relation to the Germanic words for 'thunder' (Old High German *donar*, Middle High German *doner*, Anglo-Saxon *þunor*). Since, however, the name of a natural phenomenon raised to the rank of a personal deity tends to drop out of common parlance (H. Usener *Götternamen* Bonn 1896 p. 316 f.), it has been conjectured that the living words *Donner*, *thunder*, etc. have come from the name of the god, not *vice versa* (K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 275 n. 86). In any case Donar was essentially a thunder-god. Not impossibly he, like Wodan (*supra* p. 62 n. 1), was a by-form differentiated from the early Germanic sky-god Ziu (so E. Mogk in the *Grundriss der germanischen Philologie*[2] Herausgegeben von H. Paul Strassburg 1900 iii. 354).

In common with many another storm-god Donar was also a fertilising power (E. Mogk in Hoops *Reallex.* i. 481, K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 278 f.): cp. Thor, who fructifies the bride (E. H. Meyer *Germanische Mythologie* Berlin 1891 p. 212 f., W. Golther *Handbuch der germanischen Mythologie* Leipzig 1895 p. 251 f.), brings to life again his team of goats that have been cooked in a cauldron (W. Golther *ib.* p. 276), etc. Such a divinity, storm-god and fertility-god in one, might well serve as the Germanic representative of autumn.

As regards the *interpretatio Romana*, Donar was at first perhaps equated with Volcanus (Caes. *de bell. Gall.* 6. 21, cp. H. Rueckert *Culturgeschichte des deutschen Volkes in der Zeit des Uebergangs aus dem Heidenthum in das Christenthum* Leipzig 1853 i. 126), then with Hercules (Tac. *Germ.* 3, 9, 34 (?), *ann.* 2. 12, cp. E. H. Meyer *Germanische Mythologie* Berlin 1891 pp. 202, 211, P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 pp. 103 ff., 235, 239 n. 3, E. Mogk in the *Grundriss*

der germanischen Philologie[2] Herausgegeben von H. Paul Strassburg 1900 iii. 355 and in Hoops *Reallex.* i. 480, R. M. Meyer *Altgermanische Religionsgeschichte* Leipzig 1910 p. 282, K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 274 ff., 363 ff.), and finally from *s.* vi onwards with Iupiter (J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 189 ff., 1888 iv. 1345 f., E. H. Meyer *Germanische Mythologie* Berlin 1891 pp. 20, 48, 51, 202, 205 f., 217, P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 p. 235, E. Mogk in the *Grundriss der germanischen Philologie*[2] Herausgegeben von H. Paul Strassburg 1900 iii. 354 f. and in Hoops *Reallex.* i. 480, R. M. Meyer *Altgermanische Religionsgeschichte* Leipzig 1910 p. 282, K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 275, cp. 278).

The Germani identified their Donar with Hercules primarily because of his strength. Thus, when going into battle, they sang of Hercules as 'primum...omnium virorum fortium' (Tac. *Germ.* 3). The Batavi in particular worshipped Hercules *Magusanus* (*Corp. inscr. Lat.* vi no. 31162 = Dessau *Inscr. Lat. sel.* no. 2188 cp. no. 4628 n. 1 (Rome, dedicated by *cives Batavi sive Thraces adlecti ex provincia Germania inferiori* on Sept. 29, 219 A.D.) Herculi Magusano | etc.; *Corp. inscr. Lat.* xiii no. 8705 = Dessau *Inscr. Lat. sel.* no. 4629 (Betuwe in Holland) Herculi Ma|gusano et | Haevae etc.; *Corp. inscr. Lat.* xiii no. 8771 (Rummel, North Brabant, dedicated by the *summus magistratus civitatis Batavorum*) Magusa|no Hercul[i] | etc.; *Corp. inscr. Lat.* xiii no. 8777 (Westkapelle in the island of Walcheren, Zeeland) Herculi | Magusano | etc.; *Corp. inscr. Lat.* xiii no. 8010 (Bonn) Herculi | Magusano | etc.; *Corp. inscr. Lat.* xiii no. 8492 = Dessau *Inscr. Lat. sel.* no. 4630 (near Deutz)---|[Herc]uli Magusan[o]|[? Matron]is Abirenibu[s]| [Sil]vano et Genio [loc.] | [Dia]ne Mahal[inis] | [Vic]torie Mercu[rio] | [cete]risque dis dea[bus] | [om]nibus etc.; *Corp. inscr. Lat.* xiii no. 8610 (Xanten) Herculi Mag[usano]| etc.; *Corp. inscr. Lat.* vii no. 1090 = Dessau *Inscr. Lat. sel.* no. 4628 (Mumerills, near Falkirk, on the Antonine Wall, dedicated by a *duplicarius alae Tungrorum*) Herculi | Magusan|[o] etc.; but hardly *Corp. inscr. Lat.* xiii no. 4141 (near Trèves) M[a](c)usa etc. See further *supra* p. 57 n. 3, F. Kauffmann 'Hercules Magusanus' in H. Paul—W. Braune *Beiträge zur Geschichte der deutschen Sprache und Literatur* Halle a/S 1891 xv. 553—562, R. Peter in Roscher *Lex. Myth.* i. 3018—3020, M. Schönfeld *Wörterbuch der altgermanischen Personen- und Völkernamen* Heidelberg 1911 p. 158, K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 363—365), whose cult-title, denoting 'the Strong,' survived in the mediaeval *Mahusenhem* (now *Muyswinkel*) near Durstede (R. Peter in Roscher *Lex. Myth.* i. 3019 f., Haug in Pauly—Wissowa *Real-Enc.* viii. 611) and is comparable with the name of Thor's son *Magni* (E. Mogk in the *Grundriss der germanischen Philologie*[2] Herausgegeben von H. Paul Strassburg 1900 iii. 355, P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 p. 239 with n. 3, K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 364 f.). Hercules on the *Viergöttersteine* is regularly bearded (F. Hertlein *Die Juppitergigantensäulen* Stuttgart 1910 p. 146), and an inscription found at Brohl in 1840 A.D. records the cult of Hercules *Barbatus* (Orelli---Henzen *Inscr. Lat. sel.* no. 5726 = Dessau *Inscr. Lat. sel.* no. 3460 Herculi | barbato | etc.): Thor too in the best extant representation of him, a relief on a granite baptismal basin from the old church at Ottrava in Wester Göthland, Sweden (G. Stephens *Thunor the Thunderer, carved on a Scandinavian font of about the year 1000* London 1878 p. 24 f. with fig. on p. 15 = my fig. 26), has a pointed beard. Again, Hercules, like Donar, was armed with a primitive weapon: the club of the former was a rough equivalent for the hammer of the latter. Hence these attributes were interchangeable. On the one hand, Saxo Grammaticus *hist. Dan.* 3 p. 73, 29 ff. Holder describes Thor as armed with a club (J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 180, E. H. Meyer *Germanische Mythologie* Berlin 1891 p. 204, E. Mogk in the *Grundriss der germanischen Philologie*[2] Herausgegeben von H. Paul Strassburg 1900 iii. 357, R. M. Meyer *Altgermanische Religionsgeschichte* Leipzig 1910 p. 283). On the other hand, we hear of a Hercules *Maliator* (*Corp. inscr. Lat.* xiii no. 6619 = Dessau *Inscr. Lat. sel.* no. 4627 (Obernburg in Bavaria) Herculi | Maliator(i)), whose title presumably denotes 'the Hammer-god' (so K. Zangemeister in the *Neue*

Minerva is Holda, the patroness of spinning, as a winter-goddess[1].

Fig. 26.

Heidelberger Jahrbücher 1895 v. 55, followed by Dessau *loc. cit.*, Boehm in Pauly—Wissowa *Real-Enc.* viii. 597, Haug *ib.* viii. 610, E. Mogk in Hoops *Reallex.* i. 481, though C. Christ in the *Jahrb. d. Vereins v. Alterthumsfreund. im Rheinl.* 1878 lxii. 49, followed by K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 365, would read *Herculi* | *malliator(es)* cp. *Corp. inscr. Lat.* vi nos. 43 f. = Dessau *Inscr. [1] The Germanic goddess *Hluθena* or *Hludana*, known to us from inscriptions (*Corp. inscr. Lat.* xiii no. 7944 = Dessau *Inscr. Lat. sel.* no. 4745 (near Iversheim) in h(onorem) [d(omus) d(ivinae)] | Hluθenae sa[crum] | pro salute im[p. Caes. M. Aur.] | [S]everi Alexa[ndri pii] | fel(icis) invicti [Aug. et Iul.] | Mamae(a)e ma[tris Aug. n(ostri)] | vexillat(io) leg(ionis) [i M(inerviae) Sev(erianae) Alex(andrianae)] | [p(oni?)] fac(i)ent(ium?) in c[ustodia?], *Corp. inscr. Lat.* xiii no. 8611 = Orelli *Inscr. Lat. sel.* no. 2014 (Birten near Xanten) deae | Hludanae | sacrum | C. Tiberius | Verus, *Corp. inscr. Lat.* xiii no. 8661 (the Monterberg near Calcar) deae Hlu|θenae cen|--, *Corp. inscr. Lat.* xiii no. 8723 (Holtedoorn near Nijmwegen) [H]lud(anae) sac(rum) | [···]ammi[·] | [··]cund[··]|[·]i leg(ionis) xxx[·] | v. s. l. [m.] | [L]aterano [cos?], *Corp. inscr. Lat.* xiii no. 8830 = Dessau *Inscr. Lat. sel.* no. 1461 (Beetgum near Leeuwarden in Friesland) deae Hludanae | conductores | piscatus, mancipe | Q. Valerio Secu[ndo, v. s. l. m.), of which one—that from

Holtedoorn—is probably dated 197 A.D. and another—that from Iversheim—falls between 222 and 235 A.D., has been plausibly identified with the Old Norse *Hlóðyn*, the mother of Thor (J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 256 f., 266 n. 2, F. Kauffmann 'Dea Hluðana' in H. Paul—W. Braune *Beiträge zur Geschichte der deutschen Sprache und Literatur* Halle a/S 1894 xviii. 134—157, E. Mogk in the *Grundriss der germanischen Philologie*[2] Herausgegeben von H. Paul Strassburg 1900 iii. 358 f., 370, R. M. Meyer *Altgermanische Religionsgeschichte* Leipzig 1910 p. 307. The connexion is denied by E. H. Meyer *Germanische Mythologie* Berlin 1891 p. 203, P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 p. 105, and others. M. Schönfeld *Wörterbuch der altgermanischen Personen- und Völkernamen* Heidelberg 1911 p. 140 f. concludes: 'Fraglich is die von Kauffmann und Mogk angenommene Identität mit an. *Hlóðyn* (*Hlǫðana* mit *lu* aus *l* gegenüber *Hlóðyn* mit der Dehnstufe *lō*?).' But K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 381 sums up: 'Immer noch ist trotz allen dagegen geäusserten Bedenken ihre Zusammengehörigkeit mit der nordischen *Hlódyn* am wahrscheinlichsten, wodurch allerdings nicht viel gewonnen ist, da Hlódyn selbst sehr wenig klar ist'). Further, both *Hluðena* or *Hludana* and *Hlóðyn* have been related (J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 266 n. 2, K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 381—383. *E contra* E. H. Meyer *Germanische Mythologie* Berlin 1891 p. 203, P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 p. 105) to the *Holden*, *i.e.* the 'Good Folk,' the sprites, and their representative Frau *Holda* (*Hulda*, *Holle*, *Hulle*, *Holl*), a goddess who—like Wodan (*supra* p. 62 n. 1)—belongs to the Furious Host (J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 265 ff., 1883 ii. 456, 487, 596, 883, 1883 iii. 933 ff., 946 ff., 1055, 1888 iv. 1367, *alib.*, E. H. Meyer *Germanische Mythologie* Berlin 1891 pp. 21, 74, 242 ff., 247 f., 266, 272 ff., 282 ff., *alib.*, E. Mogk in the *Grundriss der germanischen Philologie*[2] Herausgegeben von H. Paul Strassburg 1900 iii. 278 ff., P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 p. 273 f., R. M. Meyer *Altgermanische Religionsgeschichte* Leipzig 1910 p. 114 f., K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 381—383). In Middle Dutch Frau Holda is called *Vereldе* (for *Ver Elde* = *Frau Hilde* or *Frau Hulde*) and gives her name to the Milky Way (*Vroneldenstraet* = *Frauen Hilde* or *Hulde Strasse*: see J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1882 i. 285).

In the nursery-tales and popular superstitions of Germany Frau Holda plays a considerable part. When it snows, she is making her bed and the feathers fly—a notion as old as Hdt. 4. 7, 4. 31 (J. Grimm *op. cit.* i. 262 f.), cp. J. C. F. Bähr *ad loc.* Such a goddess might well be selected to typify the winter.

Holda would be Romanised as Minerva because both alike patronised spinning. On the one hand, '*Holla* is set before us as a *spinning*-wife; the cultivation of flax is assigned to her. [Was *Hludana* worshipped by the Frisian *conductores piscatus* as helping them to make their fishing-nets? A. B. C.] Industrious maids she presents with *spindles*, and spins their reels full for them over night; a slothful spinner's distaff she *sets on fire*, or *soils* it.' Etc. (J. Grimm *op. cit.* i. 269 f.) On the other hand, Minerva, who at Rome in republican times had figured mainly as a mistress of arts and crafts, under the empire became more and more specialised into a goddess of spinning and weaving (Tertull. *de pallio* 3 p. 929 Oehler, Arnob. *adv. nat.* 3. 21, 5. 45, Serv. *in* Verg. *Aen.* 5. 284, 7. 805—cited by G. Wissowa in Roscher *Lex. Myth.* ii. 2988 and G. Fougères in Daremberg—Saglio *Dict. Ant.* iii. 1929) presumably through assimilation to Athena (see especially Ov. *fast.* 3. 815 ff.), the Greek patroness of distaff and loom (Gruppe *Gr. Myth. Rel.* p. 1215 n. 13, cp. *ib.* p. 1184 n. 7, p. 1212 n. 1).

At this point it is of interest to remember that in the Platonic myth the 'straight light like a pillar' becomes, as we read on, the 'spindle of Ananke' (*supra* p. 44 f.). Had Platon a Germanic source, not only for the former, but also for the latter? In China too the Milky Way is associated with a Weaving Damsel, whose shuttle is the star *α* Lyrae (*infra* § 3 (a) vi (λ)).

This hypothesis, though not definitely established[1], is *a priori* probable enough, and may be at least provisionally accepted.

Among the deviations from the normal type of *Viergötterstein* perhaps the most interesting are those furnished by a group of plinths found mainly in the north-western portion of the Gallo-Germanic area[2]. Here the encroachment of Wodan (Mercurius) upon Ziu (Iupiter) has led to the duplication or differentiation of Frija, who appears not only as Ziu's consort (Iuno) but also as Wodan's consort (Venus), and in this latter capacity is associated with Wodan or even supersedes him in the series. Thus we get:

Normal Type[3].	Messancy[4].	Les Fontaines[5].	Mont Heilpert[6].	Brumath[7].
1 Iuno.	Iuno.	Iuno.	Iuno.	Iuno.
2 Mercurius.	Venus + Mercurius.	Venus.	Venus.	Venus.
3 Hercules.	Apollo.	Diana (?) + Mercurius.	Hercules.	Hercules.
4 Minerva.	Minerva.	——	——	——

The plinth discovered at Les Fontaines, between Maubeuge and Avesnes, in 1725 A.D. and now preserved at Brussels (fig. 27)[8] merits closer inspection. Of the first side only the left half (fig. 27 *a*) is extant; but this suffices to show a draped female standing beneath a canopy with a veil over her head and shoulder, a peacock perched on her arm, and a *patera* held in her right hand above a small flaming altar or *turibulum*[9]. Clearly she is Iuno. The second side (fig. 27 *b*) has an undraped female standing beneath a similar canopy: her hair is knotted in a *chignon*; her raised right hand and lowered left draw back a fringed mantle; her feet are

[1] Haug in Pauly—Wissowa *Real-Enc.* viii. 611. The foregoing notes should do something to dispel Haug's misgivings.

[2] On this group see especially F. Hertlein *Die Iuppitergigantensäulen* Stuttgart 1910 p. 153.

[3] *Supra* p. 377[1].

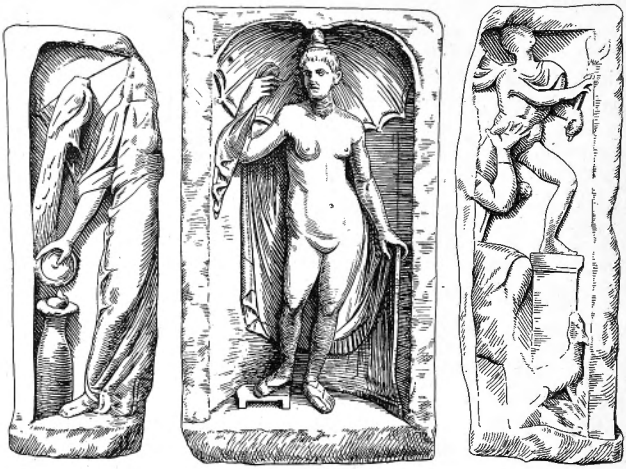
[7] Haug *op. cit.* 1891 x. 37 f. no. 67, Hertlein *op. cit.* pp. 103, 105, 153.

[8] F. Cumont *Catalogue des sculptures & inscriptions antiques (monuments lapidaires) des Musées Royaux du Cinquantenaire*[2] Bruxelles 1913 p. 210 ff. no. 173: height 0·98[m], breadth 0·53[m], depth 0·28[m].

[9] F. Cumont *loc. cit.* says: 'Elle abaisse la main, vers une urne allongée ou une aiguière (*praefericulum*), dans laquelle elle paraît verser le contenu d'une patère.' But analogous representations of Iuno on other *Viergöttersteine* make it certain that Haug *op. cit.* 1891 x. 135 rightly recognised 'ein brennendes Altärchen.'

shod in sandals, and one of them rests upon a footstool[1]. She is



(*a*) (*b*) (*c*)

Fig. 27.

Venus; and the canopy common to her with Iuno suggests that she is but another form of the same celestial goddess[2]—very

[1] Perhaps a simplification of the tortoise, on which her foot rests in a *Viergötterstein*-relief from Lamerey (Haug *op. cit.* 1891 x. 158 cp. 315). Pheidias made a chryselephantine Aphrodite Οὐρανία at Elis with one foot set on a tortoise (Paus. 6. 25. 1, Plout. *de Is. et Os.* 76, *coniug. praecept.* 32: see further Frazer *Pausanias* iv. 105, Farnell *Cults of Gk. States* ii. 681 ff., Gruppe *Gr. Myth. Rel.* pp. 150, 197 n. 2, 1333 n. 11, 1349 n. 3 f., O. Keller *Die antike Tierwelt* Leipzig 1913 ii. 250, A. Frickenhaus in the *Jahrb. d. kais. deutsch. arch. Inst.* 1913 xxviii. 363 ff. fig. 7 f.).

[2] Venus *Caelestis*, who in name at least was the Roman counterpart of Aphrodite Οὐρανία (Preller—Robert *Gr. Myth.* i. 354—357 and Index p. 942, Gruppe *Gr. Myth. Rel.* pp. 1363—1365 and Index p. 1701), is known to us from inscriptions (*Corp. inscr. Lat.* v no. 8137 f. Pola, *ib.* vi no. 780 Rome, *ib.* ix no. 2562 = Dessau *Inscr. Lat. sel.* no. 3169 Bovianum Undecimanorum, *Corp. inscr. Lat.* x no. 1596 = Dessau *Inscr. Lat. sel.* no. 4271 Puteoli) and coins ((*a*) Agrippina Iunior: Rasche *Lex. Num.* x. 887 VENVS CAELESTIS, cp. *ib.* 889 f. (*b*) Iulia Domna: Rasche *Lex. Num.* x. 887 VENVS CAELESTIS, cp. *ib.* 890. (*c*) Elagabalos: Cohen *Monn. emp. rom.*[2] iv. 351 no. 286 VENVS CAEL. (*d*) Aquilia Severa: Cohen *Monn. emp. rom.*[2] iv. 381 f. no. 10 VENVS CAELESTIS. (*e*) Iulia Soaemias: Cohen *Monn. emp. rom.*[2] iv. 388 f. nos. 8—20 VENVS CAELESTIS. (*f*) Alexander Severus: Rasche *Lex. Num.* x. 889 VENVS CAELESTIS, cp. *ib.* 890 f. (*g*) Magnia Urbica: Cohen *Monn. emp. rom.*[2] vi. 407 no. 9 VENVS CELEST. These coins show the goddess standing, or sitting, with an apple in one hand, a sceptre in the other, and sometimes a star in the field, or a child at her feet); and it is noteworthy that the title *Caelestis* was borne by Iuno also (*Corp. inscr. Lat.* iii Suppl. no. 10407 = Dessau *Inscr. Lat. sel.* no. 3109 Aquincum, *Corp. inscr. Lat.* viii no. 1424 Thibursicum Bure, Mart. Cap. 58). Both

possibly it symbolises the sky itself. On the third side (fig. 27 *c*)[1] there is a design of exceptional, indeed of unique, character. A draped female sitting with uplifted hand occupies the foreground. Her sleeveless arm and the hound at her feet make it probable that she is Diana, goddess of the chase[2]. Her gesture and the upward glance of the hound direct attention to a singular figure in the background—Mercurius, who rushes from left to right with upturned face and wind-blown *chlamýs*, both hands grasping a *caduceus* and one foot planted on the top of a pillar[3]. Now Mercurius, as we have seen, stands for Wodan; and Wodan was the leader of the Wild Hunt or Furious Host, which on windy nights in autumn might be heard sweeping along the Milky Way[4]. I should therefore conjecture that this relief gives us an autumnal scene, the huntress Diana and the Wild Huntsman himself.

Above the *Viergötterstein*, at least in the case of large and important columns, came the *Wochengötterstein*—a block, usually octagonal or cylindrical, more rarely quadrangular hexagonal or heptagonal, which was decorated with the deities representing the days of the week[5]. These deities, arranged in a series from left to

Venus *Caelestis* and Iuno *Caelestis* were forms of the Carthaginian goddess Tanit, whose worship spread far and wide over the Roman world (see De Vit *Onomasticon* i. 29, iii. 722, F. Cumont in Pauly—Wissowa *Real-Enc.* iii. 1247—1250, A. von Domaszewski *Abhandlungen zur römischen Religion* Leipzig and Berlin 1909 pp. 148—150, W. W. Baudissin *Adonis und Esmun* Leipzig 1911 p. 268 ff., Wissowa *Rel. Kult. Röm.*[2] pp. 373—375): they must not hastily be connected with Iupiter *Caelestis* (*Corp. inscr. Lat.* iii no. 1948 Salonae, *ib.* iii Suppl. no. 8668 = Dessau *Inscr. Lat. sel.* no. 3041 Salonae, *Corp. inscr. Lat.* x no. 4852 Venafrum) or with other deities bearing the same cult-epithet (Wissowa *Rel. Kult. Röm.*[2] p. 374 n. 7).

[1] A drawing of this plinth made for B. de Montfaucon and preserved in the Bibliothèque Nationale (nouv. fonds lat., 11917, f° 12, cp. f° 11) shows the third scene as it appeared when its details were somewhat fresher and sharper than now. Accordingly I have used the drawing to supplement the photograph of the scene. F. Cumont *Catalogue des sculptures & inscriptions antiques* (*monuments lapidaires*) *des Musées Royaux du Cinquantenaire*[2] Bruxelles 1913 p. 212 publishes the two side by side.

[2] For Diana in sleeveless attire accompanied by her hound see Haug 'Die Viergöttersteine' in the *Westdeutsche Zeitschrift* 1891 x. 315 f.

[3] Mercurius as a runner appears in Roman paintings (*e.g.* Helbig *Wandgem. Camp.* p. 7 no. 15, p. 8 no. 18 = *Real Museo Borbonico* Napoli 1830 vi pl. 2 = Daremberg—Saglio *Dict. Ant.* iii. 1819 fig. 4960), gems (*e.g.* Furtwängler *Geschnitt. Steine Berlin* p. 126 no. 2736 pl. 24, cp. L. Stephani in the *Compte-rendu St. Pét.* 1861 p. 17 n. 3), and bronzes (*e.g.* Babelon—Blanchet *Cat. Bronzes de la Bibl. Nat.* p. 158 no. 359 fig.). A statue of this sort (cp. the famous Mercury by Giovanni da Bologna in the Bargello at Florence) mounted on a high pedestal has presumably furnished the sculptor of our relief with a classical type for his Germanic theme.

[4] *Supra* p. 62 n. 1.

[5] See L. Lersch 'Der planetarische Götterkreis' in the *Jahrb. d. Vereins z. Alterthumsfreund. im Rheinl.* 1844 iv. 147—176, 1844 v.—vi. 299—314, 1846 viii. 145—152, J. de Witte 'Les divinités des sept jours de la semaine' in the *Gaz. Arch.* 1877 iii. 50—57,

right or right to left, were Saturnus, Sol, Luna, Mars, Mercurius, Iupiter, Venus (fig. 28)[1]. If for reasons of architectural symmetry

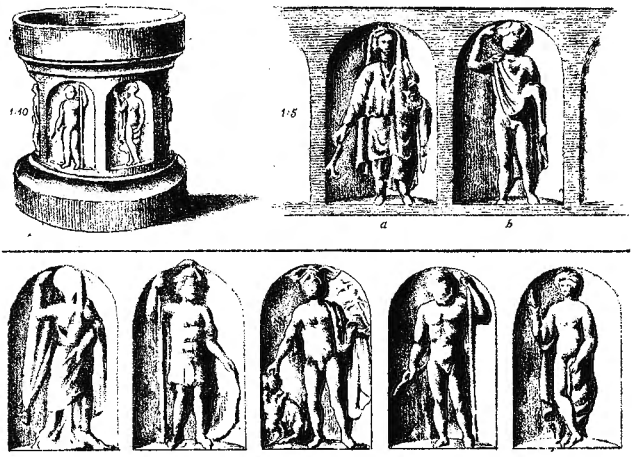


Fig. 28.

the block so adorned was octagonal, its eighth side might be

77—85, *ib.* 1879 v. 1—6, F. Hettner 'Juppitersäulen' in the *Westdeutsche Zeitschrift* 1885 iv. 365 ff., especially pp. 383—385, S. Reinach in Daremberg—Saglio *Dict. Ant.* ii. 171—173, Haug 'Die Wochengöttersteine' in the *Westdeutsche Zeitschrift* 1890 ix. 17—53, E. Maass *Die Tagesgötter in Rom und den Provinzen aus der Kultur des Niederganges der antiken Welt* Berlin 1902 pp. 169—236, W. H. Roscher in his *Lex. Myth.* iii. 2535, 2538, F. Hertlein *Die Juppitergigantensäulen* Stuttgart 1910 pp. 82—84. The clearest introduction to the subject together with the fullest collection of material will be found in Haug's article, which is a model of concise and accurate investigation.

[1] This sandstone drum (height 0·51^{m}, diameter 0·44^{m}) stood formerly in the Templars' Church at Neckarelz, its upper surface having been hollowed out to contain a copper basin for holy water. In 1873 it passed into the collection of the *Altertumsverein* at Mannheim. It is described and figured by Haug in the *Westdeutsche Zeitschrift* 1890 ix. 29 f. pl. 1, 1 (=my fig. 28), cp. Reinach *Rép. Reliefs* ii. 68 nos. 1—3. Of the individual deities (*a*) Saturnus wears hose, sleeved garment with girdle, and veil; in his right hand he holds the *hárpe*, in his left a bull's head (? cp. Daremberg—Saglio *Dict. Ant.* ii. 172 fig. 2403, *supra* i. 298 n. 7): (*b*) Sol, wearing *chlamýs*, raises his right hand towards his flowing locks: (*c*) Luna, in *chitôn*, *himátion*, and tasselled veil, likewise raises her right hand towards her head: (*d*) Mars, clad in tunic and cuirass, has a helmet on his head, a spear in his right hand and a shield in his left: (*e*) Mercurius wears a winged cap (?) and a *chlamýs* over his left shoulder; his left hand holds the *caduceus*, his right hand a purse; and beside him crouches a misshapen goat: (*f*) Iupiter, quite naked, has a thunderbolt in his right hand, a long sceptre in his left: (*g*) Venus stands with crossed legs, her left hand pressing against her garment, her right uplifting a mirror.

occupied either by an inscription[1] or by some additional divinity naturally associated with the week-days—a Genius or Bonus Eventus[2], a Fortuna or Felicitas[3] or Victoria[4].

The *Viergötterstein* and the *Wochengötterstein* together formed a double plinth, from which rose the actual shaft of the column. This might on occasion be left smooth (fig. 29)[5], but was normally covered with a scale-pattern (fig. 30)[6], and sometimes adorned with vine-leaves etc. (fig. 31)[7]. F. Hertlein points out that such deco-

[1] Haug in the *Westdeutsche Zeitschrift* 1890 ix. 33 no. 12 Castel near Mayence (IN • H • D • D • =in honorem domus divinae), *id. ib.* 1890 ix. 34 f. no. 15 Havange in Lorraine (I • O • M), F. Hertlein *Die Juppitergigantensäulen* Stuttgart 1910 p. 83 Mainz (*Corp. inscr. Lat.* xiii no. 6728 *a* latter part of inscription alone extant).

[2] Haug in the *Westdeutsche Zeitschrift* 1890 ix. 28 no. 4 Metzingen, *id. ib.* 1890 ix. 35 no. 17 Agnin (Isère).

[3] Haug in the *Westdeutsche Zeitschrift* 1890 ix. 33 f. no. 13 Heddernheim (?).

[4] F. Hertlein *Die Juppitergigantensäulen* Stuttgart 1910 p. 82 n. 2 Merten in Lorraine.

[5] Fig. 29 is a column, 15·50^{m} high, found at Merten near Saarlouis in 1878 and now preserved in the Museum at Metz (for bibliography see F. Hertlein *Die Juppitergigantensäulen* Stuttgart 1910 p. 13 f. and Espérandieu *Bas-reliefs de la Gaule Rom.* v. 452 ff. no. 4425 with six photographic cuts. Add Durm *Baukunst d. Röm.*[2] p. 742 ff. fig. 817). The restoration by E. Arnold published in the *Jahrb. d. Vereins v. Alterthumsfreund. im Rheinl.* 1878 lxiv. 94—99 pl. 7 is far from accurate, and the same may be said of that by O. A. Hoffmann in the *Gesellschaft für Lothringische Geschichte und Altertumskunde*: *Jahrbuch* 1889 i. 14 ff. Much better is that by A. Prost in the *Rev. Arch.* 1879 i. 1—20 pl. 1 f. and in the *Bulletin de la Société Nationale des Antiquaires de France* 1879 p. 64 (*Mémoires de la Société Nationale des Antiquaires de France* Série IV Tome X), or that by Tornow in the *Deutsche Bauzeitung* 1879 no. 53 (reproduced by F. X. Kraus in *Kunst und Altertum in Elsass-Lothringen* 1886—1889 iii. 2. 316—325 fig. 87). My own restoration is based on that of Prost, from which however it varies in the character of its steps, in the arrangement of its reliefs, and in the reconstruction of its equestrian group.

Remains of other smooth 'Jupiter-columns' have come to light at Hägen near Saverne in the Wasserwald, at Butterstadt near Hanau, and at Trèves (Hertlein *op. cit.* p. 84).

[6] Fig. 30 is a column, 5·44^{m} high, found in 1884 in a fountain within the Roman walls at Heddernheim together with an altar to Iupiter and a smaller column topped by a figure of Iupiter enthroned. The whole group is now in the Historical Museum at Frankfurt: see O. Donner-von Richter and A. Riese *Heddernheimer Ausgrabungen* Frankfurt am Main 1885 (an Stelle des Neujahrs-Blattes des Vereins für Geschichte und Alterthumskunde für 1885 und 1886) pp. 1—20, whose pl. 1, 1 I reproduce. Note that the *Wochengötterstein* is in the case of this column replaced by a *Sechsgötterstein*, on which see Haug in the *Westdeutsche Zeitschrift* 1890 ix. 48 f. no. 4 Heddernheim.

[7] Fig. 31 is a sandstone column, some 3·50^{m} high, found in 1838 at Neuenheim near Heidelberg, along with a *Viergötterstein* (Haug in the *Westdeutsche Zeitschrift* 1891 x. 26 no. 40 Neuenheim) and a fragmentary Mithraic figure (F. Cumont *Textes et monuments figurés relatifs aux mystères de Mithra* Bruxelles 1896 ii. 508 fig. 461), and now preserved in the Museum at Karlsruhe. The shaft is embellished with vine-leaves and birds perched among them: the four small heads of its capital are apparently female (F. Hertlein *Die Juppitergigantensäulen* Stuttgart 1910 p. 89). F. Cumont, whose illustration (*op. cit.* ii. 508 f. fig. 462) is here copied, supposes that the *Viergötterstein* mentioned above formed the base of this shaft. But F. Hertlein (*op. cit.* pp. 84, 89, 93) states that their respective dimensions are unsuitable.

Fig. 32 is a drum of white limestone, 0·84^{m} high, found in 1726 at Les Fontaines,

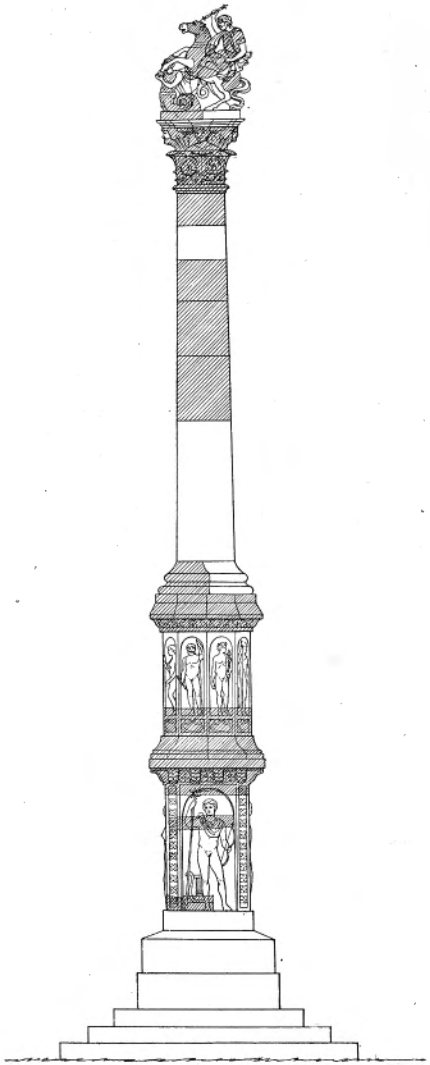

Fig. 29.

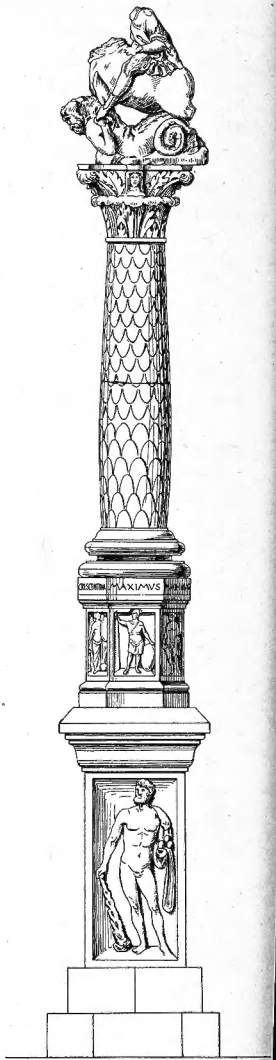

Fig. 30.

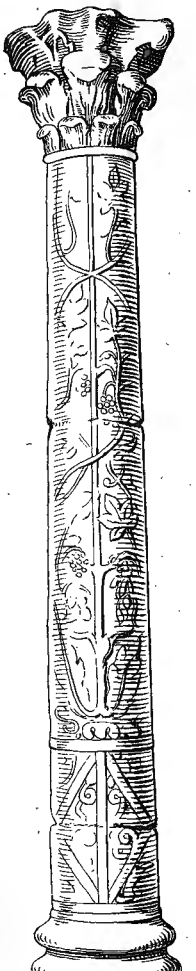

Fig. 31.

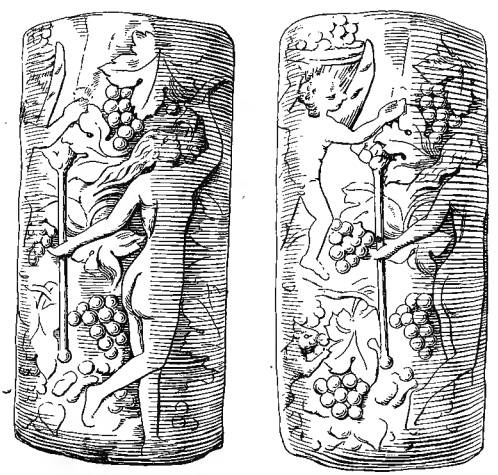


a *b*

Fig. 32.

ration was suggestive of a tree-stem[1] and thus served to bring the hard stone of the Roman monument between Maubeuge and Avesnes, and now at Brussels (F. Cumont *Catalogue des sculptures & inscriptions antiques (monuments lapidaires) des Musées Royaux du Cinquantenaire*[2] Bruxelles 1913 p. 213 ff. no. 173, Espérandieu *Bas-reliefs de la Gaule Rom.* v. 192 f. no. 3985). The surface is covered with a tangle of vine-leaves. Against these is seen a nude Bacchant, who bounds along with streaming hair: she holds a *thýrsos* in her left hand, and with her right pours the contents of a horn or *rhytón* into her mouth. Behind her flies a winged Cupid, who with his right hand steadies a basket of grapes on his head, and in his left carries some indistinct object: beneath his feet is a small quadruped (rabbit?) nibbling a grape-bunch. When first discovered, this relief was in better condition and showed other animals half-hidden in the vine-shoots. F. Cumont thinks it certain that the drum and the *Viergötterstein* found on the same site (*supra* p. 67 ff. fig. 27) belong to one monument, and F. Hertlein (*op. cit.* p. 84) regards the combination as possible.

On the vine-leaf column as a Syrian *motif* that made its way throughout the Mediterranean area see S. Gsell in the *Atti del II Congr. di arch. crist.* p. 203 ff., C. M. Kaufmann *Handbuch der christlichen Archäologie*[2] Paderborn 1913 p. 483 f.

[1] Durm *Baukunst d. Röm.*[2] p. 388 f. fig. 426, cp. M. Meurer *Vergleichende Formenlehre des Ornamentes und der Pflanze* Dresden 1909 p. 572 ff.

nearer to its prototype—the wooden trunk of the old Germanic *Irminsûl*[1].

The shaft was surmounted by a capital displaying four small heads or busts (fig. 33)[2], which have been interpreted by O. Donner-von Richter[3] and F. Hertlein[4] as the four divisions of the day—

Fig. 33.

Matutinus, Meridies, Vespera, Nox. Since these divisions correspond with the main points of the compass, the series runs from right to left. Nox always, and Meridies usually, is represented full-face, whereas Vespera and Matutinus are more often shown in profile.

On the top of the column thus constituted was a sculptural group of peculiar aspect—a galloping rider supported on the shoulders and hands of a figure that bent or lay beneath him[5]. The rider has normally the face of a bearded Iupiter and the costume of a Roman general (fig. 34)[6], very seldom a beardless

[1] F. Hertlein *Die Juppitergigantensäulen* Stuttgart 1910 p. 84.

[2] Fig. 33 shows the heads on the capital of the column found in 1884 at Heddernheim (*supra* p. 71 n. 6) as published by O. Donner-von Richter and A. Riese *Heddernheimer Ausgrabungen* Frankfurt am Main 1885 (an Stelle des Neujahrs-Blattes des Vereins für Geschichte und Alterthumskunde für 1885 und 1886) pl. 1, 1—M.

[3] O. Donner-von Richter and A. Riese *op. cit.* p. 12.

[4] F. Hertlein *Die Juppitergigantensäulen* Stuttgart 1910 pp. 87—93 gives a careful summary of the evidence, and succeeds in establishing his interpretation as against previous hypotheses. F. X. Kraus in the *Jahrb. d. Vereins v. Alterthumsfreund. im Rheinl.* 1878 lxiv. 99 and A. Hammeran in the *Korrespondenzblatt der Westdeutschen Zeitschrift* 1885 iv. 3 had regarded the heads as allegorical representations of the four seasons. E. aus'm Weerth in the *Jahrb. d. Vereins v. Alterthumsfreund. im Rheinl.* 1878 lxiv. 99 n. 1 had suggested that they might be the four ages of man. Haug in the *Fundberichte aus Schwaben* 1907 xv. 82 had been content to view them as merely decorative.

[5] By far the best account of this group is that given in F. Hertlein *Die Juppitergigantensäulen* Stuttgart 1910 pp. 1—27 ('Verzeichnis der Gruppen des Gigantenreiters (oder Gigantenfahrers)'), 28—50 ('Gesamtbeschreibung der Gruppe und Folgerung aus der Darstellung'), 51—69 ('Ursprung der Gruppe aus germanischen Vorstellungen'), 70—86 ('Die Juppitergigantensäule eine Irminsäule'), though we shall see reason to traverse his conclusion with regard to the significance of the reclining figure (*infra* p. 82).

[6] Group in Jura-limestone (height without base 0·86^{m}), found at Ehrang in 1890 and now in the Museum at Trèves (F. Hettner in the *Korrespondenzblatt der Westdeutschen Zeitschrift* 1891 x. 72 f. with fig., *id. Die römischen Steindenkmäler des Provinzialmuseums*

barbaric head and native dress (fig. 35)[1]. Once he appears as driver

Fig. 34.

Fig. 35.

of a dashing two-horse chariot, the likeness to Iupiter being pronounced (fig. 36)[2]. By way of offensive armour the rider brandishes

zu Trier Trier 1893 p. 23 f. no. 32 with fig. = my fig. 34, Reinach *Rép. Stat.* ii. 529 no. 5, F. Hertlein *op. cit.* pp. 21 f., 30 n. 1, 33 f., 35, 43, 45, Espérandieu *Bas-reliefs de la Gaule Rom.* vi. 424 f. no. 5246 with two photographic cuts). The rider wears *tunica*, *lorica*, *paludamentum*: his left hand held the reins, his right was raised. The crouching figure grins with open mouth: his left hand held the left forefoot of the horse; his right probably grasped a club (a suitable fragment was found), on which rested the right hoof of the horse.

[1] Group in yellowish grey sandstone (maximum height 0·78^{m}), found at Ehrang in 1890 and now in the Museum at Trèves (F. Hettner in the *Korrespondenzblatt der Westdeutschen Zeitschrift* 1891 x. 73 f. with fig., *id. Die römischen Steindenkmäler des Provinzialmuseums zu Trier* Trier 1893 p. 21 f. no. 31 with fig. = my fig. 35, Reinach *Rép. Stat.* ii. 528 no. 5, F. Hertlein *op. cit.* pp. 21, 30 with n. 1, 32, 34, 35, 42, 43, Espérandieu *Bas-reliefs de la Gaule Rom.* vi. 412 ff. no. 5233 with photographic cuts). The rider wears a close-fitting jacket, which has a seam on the right side and reaches to his hips (edge visible in good light); whether it was sleeved or not is uncertain. His belt has a round disk at the back. His left hand held the reins; his right, connected with his head by a clumsy support, probably held a thunderbolt, not a spear (see F. Hertlein *op. cit.* p. 32). The horse has a saddle with pommels, back, saddle-cloth, etc. The crouching figure, a young and beardless male, bears the weight on his hunched shoulders. This group was found together with a *Viergötterstein* and other fragments in the same sandstone of a 'Jupiter-column' (F. Hettner in the *Korrespondenzblatt der Westdeutschen Zeitschrift* 1891 x. 75 ff., *id. Die römischen Steindenkmäler des Provinzialmuseums zu Trier* Trier 1893 p. 18 ff. nos. 27—30, Haug in the *Westdeutsche Zeitschrift* 1891 x. 136 no. 159 Ehrang, F. Hertlein *op. cit.* pp. 21, 94, 95), to which—despite the obvious difference in style—it may have belonged.

[2] Group in stone (plinth 0·65^{m} long, 0·45^{m} broad, 0·09^{m} thick; driver 1·05^{m} high), found at Weissenhof near Besigheim in 1897 and now in the Lapidarium at Stuttgart (G. Sixt in the *Westdeutsche Zeitschrift* 1897 xvi. 293—296 with two figs. of which the

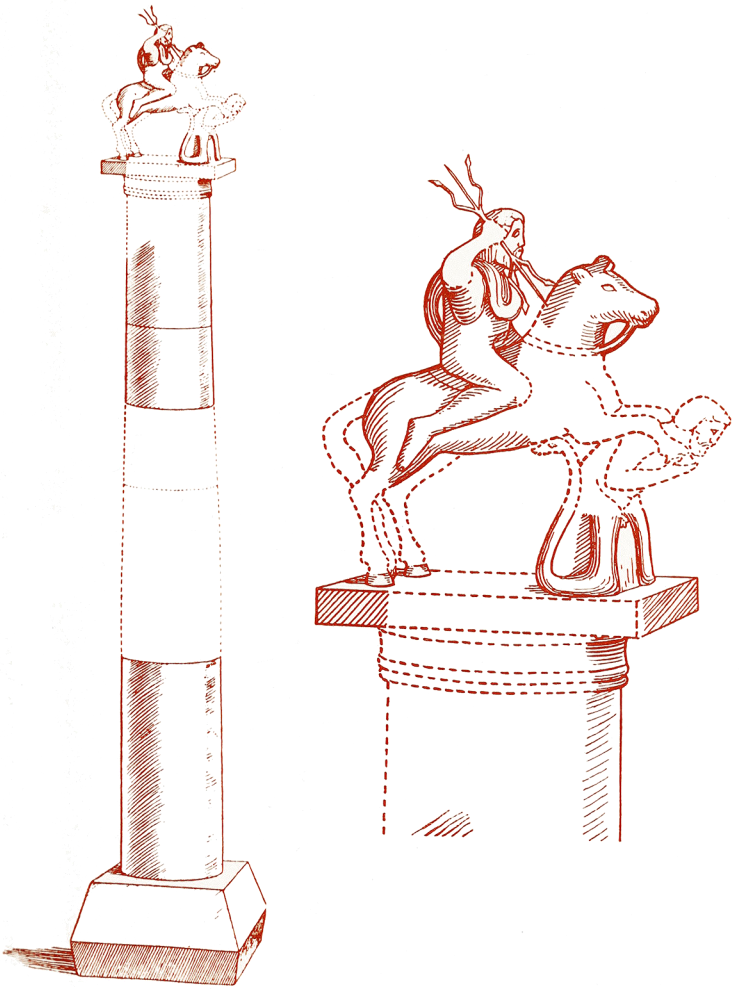
either a thunderbolt (pl. iii)[1] or a spear (fig. 37)[2]: in one case he

Fig. 36.

second = my fig. 36, F. Haug und G. Sixt *Die römischen Inschriften und Bildwerke Württembergs*, im Auftrag des württ. Geschichts- und Altertumsvereins herausgegeben Stuttgart 1900 no. 343 with the same two figs., F. Hertlein *op. cit.* pp. 3 f., 29, 30 with n. 1, 35, 37, 43, 46, 65 with the second fig. as title-vignette). Iupiter, wearing *himátion* only, which is fastened by a brooch on his right shoulder and leaves the left shoulder bare, stands erect in a small chariot: his left hand originally held the reins, his right was somewhat drawn back and raised. The two horses, harnessed under a yoke, gallop onwards, their forefeet supported on the shoulders and hands of a beardless male figure with serpentiform legs.

[1] Group in red Vosges sandstone (original height *c.* 0·70^{m} to 0·80^{m}), found in 1908 in the inner court of a *villa rustica* in the Wasserwald six kilometres S.W. of Saverne and now in the Museum of that town (A. Fuchs in the *Anzeiger für elsässische Altertumskunde* 1909 i. 32 with fig., *id.* in the *Elsässische Monatsschrift für Geschichte und Volkskunde* 1911 ii. 472—480, *id. Die Kultur der keltischen Vogesensiedelungen* Zabern i. E. 1914 pp. 120—124 with pl. 23, 1 (base and shaft), pl. 24, 1, 2, pl. 25, 1, 2 (four views of rider), E. Wendling *Die keltisch-römischen Steindenkmäler des Zaberner Museums* Zabern 1912 nos. 62 and 63, F. Hertlein *op. cit.* pp. 9, 30 n. 1, 31, 37, 43). With it was the rest of the monument, *viz.* a plain base, a smooth turned shaft (*supra* p. 71 n. 5), and a simple capital. The rider, whose head resembles that of Iupiter, wears nothing but a cloak: he grasps in his raised right hand an iron thunderbolt (length 0·45^{m}) with tines. The horse, equipped with a saddle-cloth, was supported by the usual kneeling figure. I am indebted to Prof. L. Bachmeyer, Director of the Museum at Saverne, for a minutely accurate description of the whole monument together with tracings of its several parts and a coloured restoration of the group (followed in my pl. iii).

[2] Group in stone (present height 0·54^{m}, length 0·72^{m}), found at Diedelkopf near Kusel



The Jupiter-Column of Saverne.

See page 76 n. 1.

has a sword also slung on his left side[1]; and he sometimes[2] carries a four-spoked wheel, thrusting his left hand between two of its

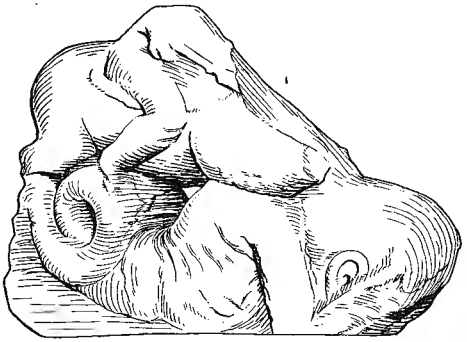


Fig. 37.

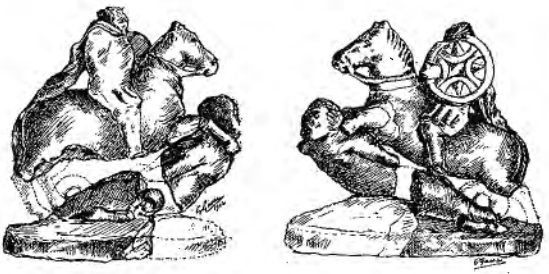

Fig. 38.

(E. Wagner in the *Westdeutsche Zeitschrift* 1882 i. 39, F. Hertlein *op. cit.* pp. 17, 31, 38, 43, 44, 46, 49 fig.=my fig. 37). The rider wore a smooth *tunica* or jerkin, and in his right hand carried a spear, the end of which is visible against his horse. The crouching figure has large staring eyes and no beard: leaning on elbows and chin, he supported the horse's hoofs with his hands.

[1] So in the group found at Butterstadt near Hanau (F. Hertlein *op. cit.* pp. 5, 33).

[2] F. Hertlein *op. cit.* p. 33 'Das merkwürdigste Attribut des Reiters ist entschieden das vierspeichige *Rad*. Es hat sich mehreremal gefunden, an weit entfernten Orten, in Butterstadt bei Hanau [*ib.* p. 5], in Les Ronchers, Départ. Meuse [*ib.* p. 26], in Meaux, Départ. Seine et Marne [*ib.* p. 27], und wohl auch an dem Bruchstück von Zabern IV [*ib.* p. 9]... Wir werden dem Rad wieder begegnen auf Viergöttersteinen [*ib.* pp. 109 with n. 3, 148 Niederwürzbach, Amt Zweibrücken; Dunzweiler, Amt Homburg; Theley, Kreis Ottweiler].' On the reliefs from Niederwürzbach and Dunzweiler see Haug in the *Westdeutsche Zeitschrift* 1891 x. 48 f. nos. 94, 95. I figure that from Theley (*supra* i. 289 n. 1 wrongly called 'an altar') after F. Hettner *Die römischen Steindenkmäler des*

spokes as he reaches forward to grasp the reins (figs. 38[1], 39[2]). The

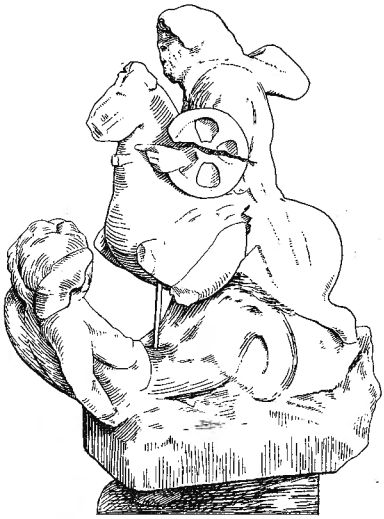

Fig. 39.

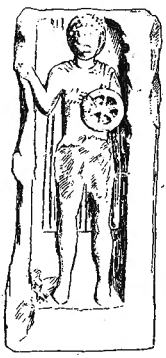

Fig. 40.

Provinzialmuseums zu Trier Trier 1893 p. 29 ff. no. 40 (plinth of red sandstone, height 0·84^{m}, breadth of side here shown 0·36^{m}: Iupiter with wreath and *chlamýs*, holding sceptre (?) in right hand, six-spoked wheel in left; a small bird beside his right foot). F. Hertlein *op. cit.* p. 109 n. 3 prefers to call this deity Mars (the head is beardless, the alleged wreath a 'Lockenkranz,' the *chlamýs* a *sagum*).

[1] Group in stone (original height not more than 0·50^{m}) from Meaux (Seine-et-Marne) presumably found with a fragment of scale-patterned column (G. Gassies 'Cavalier et anguipède sur un monument de Meaux' in the *Revue des études anciennes* 1902 iv. 287—297 with figs. 1—3, of which fig. 1 f. = my fig. 38, Reinach *Rép. Stat.* iii. 270 no. 2, F. Hertlein *op. cit.* pp. 27, 29, 33, 34, 43, 60, Espérandieu *Bas-reliefs de la Gaule Rom.* iv. 258 f. no. 3207 with photographic cuts). The rider, whose head and right arm are missing, wears a wide tunic, a fluttering cloak, and hose: he passes his left hand through a rosette-like wheel to hold the reins. The horse has neither saddle nor saddle-cloth. The reclining figure is beardless, but male.

[2] Group from a column (*c.* 4·50^{m} high) found at Butterstadt near Hanau and now in the Museum des Geschichtsvereins at Hanau (W. Küster in the *Westdeutsche Zeitschrift* 1901 xx. 325 f. with fig. = my fig. 39, G. Gassies in the *Revue des études anciennes* 1902 iv. 290 fig. 3, Reinach *Rép. Stat.* iii. 151 no. 7, F. Hertlein *op. cit* pp. 5 f., 30 n. 1, 33, 34, 39 f., 43, 60). The rider, a Iupiter in type, wears *tunica* and *paludamentum*: his right arm was drawn back and raised; his left passes through a four-spoked wheel to hold the reins. The second figure, beardless but male, lies on his back and turns his face towards the left side of the rider: his right hand is pressed against the ground; his left probably held the right hoof of the horse on his left shoulder, the left hoof of the horse resting on his right shoulder.

crouching or reclining figure commonly[1] turns his back towards the rider, whose horse he supports on his shoulders or hands (fig. 42)[2] or

Fig. 41.

even on his head. He is bearded or unbearded, but always male[3]; his legs end in snakes with snaky heads of their own; and he

[1] F. Hertlein *op. cit.* p. 39 f. notes the exceptions—Heddernheim 1884 (*ib.* p. 6, *supra* p. 71 n. 6), Butterstadt (*ib.* p. 5 f., *supra* p. 78 n. 2), Higny (*ib.* p. 25), Arlon (*ib.* p. 23), Hommert (*ib.* p. 11). The last-named group is unusually complete (height $1{\cdot}15^{m}$, breadth $0{\cdot}51^{m}$). It was found in the forest of Hommert and is now in the Nancy Museum (L. Wiener *Catalogue du Musée historique Lorrain*[2] Nancy 1895 p. 33 no. 243, F. Hertlein *op. cit.* pp. 11, 30 n. 1, 31, 33, 34, 35, 40, 42, Espérandieu *Bas-reliefs de la Gaule Rom.* vi. 24 f. no. 4557 with photographic cut). I reproduce the engraving given by P. Morey in the *Mémoires de l'Académie de Stanilas* 1867 p. 143 ff. with pl. facing p. 135, fig. A = my fig. 41. The rider is bearded and, except for his clumsy-looking cloak, nude. The right forefoot of the horse seems to have pawed the air; the left is broken off short. The other figure, half sitting up in a very awkward attitude, turns his face towards the left side of the rider, whose feet he touches with both hands.

[2] Group in stone (height $0{\cdot}67^{m}$, length of plinth $0{\cdot}34^{m}$) found at Pforzheim in 1869 and now at Karlsruhe (E. Wagner in the *Westdeutsche Zeitschrift* 1882 i. 36 ff. pl. 1, 2 = my fig. 42, Reinach *Rép. Stat.* ii. 529 no. 2, F. Hertlein *op. cit.* pp. 4, 29, 37 f., 42, 46). The galloping rider wears *tunica*, *lorica* with belt, and *paludamentum*. The giant is bearded, and supports both forefeet of the horse on his hands.

[3] This is convincingly shown by F. Hertlein *op. cit.* p. 42 ff.

sometimes has as his attribute a club[1] or a pair of clubs (fig. 43)[2].

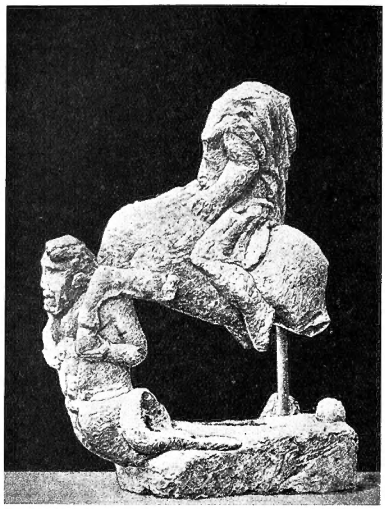

Fig. 42.

It has frequently been supposed that he is a vanquished foe trampled under foot by the victor[3]. But careful examination shows that this

[1] Thus *e.g.* the group found at Ladenburg in 1865 and now in the Museum at Mannheim (J. B. Stark in the *Jahrb. d. Vereins v. Alterthumsfreund. im Rheinl.* 1868 xliv. 27 pl. 2b, figs. 1a, b, c and 2, Reinach *Rép. Stat.* ii. 529 no 3, F. Hertlein *op. cit.* pp. 5, 30 n. 1, 43, 46 f., 85 n. 1) represents the lower figure as holding a club with his right hand. Cp. *supra* p. 74 n. 6.

[2] Group in stone (height 0·66^{m}, length of plinth 0·44^{m}) found at Pforzheim in 1872 and now at Karlsruhe (E. Wagner in the *Westdeutsche Zeitschrift* 1882 i. 36 ff. pl. 1, 1 = my fig. 43, Reinach *Rép. Stat.* ii. 528 no. 6, F. Hertlein *op. cit.* pp. 4, 30 n. 1, 32, 34, 36 f., 43 f., 46, 52). The rider, whose head resembles that of Iupiter, wears a smooth leathern jerkin with a girdle and a cloak. The figure beneath him, beardless but male, crouches on his knees and grasps two clubs, upon which the front hoofs of the horse are supported. Similarly in a group (height 0·37^{m}, length 0·40^{m}) found at Dalheim (F. Hertlein *op. cit.* pp. 22, 34, 38, 43) he shoulders two clubs, which support the forefeet of the horse; and in the stone group (height 0·56^{m}) found at Schierstein in 1889 and now at Wiesbaden (G. A. Müller *Die Reitergruppe auf den römisch-germanischen Giganten-Säulen* Strassburg and Bühl 1894 p. 12 f. pl. 2, 3—5, Reinach *Rép. Stat.* ii. 814 no. 1, F. Köpp *Die Römer in Deutschland* Bielefeld 1905 p. 140 f. fig., Forrer *Reallex.* p. 390 fig. 283, F. Hertlein *op. cit.* pp. 7, 30 n. 1, 33, 34, 35, 38, 43, 44, 46, 60, 85 n. 1, 133) he grips a pair of clubs, on one of which rests the horse's right forefoot.

[3] Hence *supra* i. 178 n. I spoke of 'a warlike Iupiter on horse-back spearing a serpent-legged giant.' I was wrong.

is not so. The *motif* throughout is that of support, not active resistence[1]. The god and the giant are allies now, whatever they may have been once.

This curious group has beyond doubt preserved to us in Romanised form the contents of a long-standing local belief. And F. Hertlein deserves all credit for recognising that the rider, who

Fig. 43.

has the guise of a warlike Iupiter, is none other than the old Germanic Ziu[2]. As a sky-god Ziu would control both sunshine and storm. The sun appears as the rider's wheel[3], if not as his radiate crown[4]; the lightning, as his brandished bolt or lance[5].

[1] F. Hertlein *op. cit.* p. 28 ff. proves conclusively, as I now think, that the type in question implies support rather than continued hostility. He notes that the rider pays no attention to the giant, that the horse never tramples on the giant's back or front, that the giant makes no effort to attack the rider, etc. But of course it remains open to us to suppose that the giant, formerly an enemy, has been reduced to serve as a footstool.

[2] F. Hertlein *op. cit.* p. 70 ff.

[3] *Supra* p. 77 f. Cp. *supra* i. 197 ff. ('The Sun as a Wheel') and i. 882 (Index ii *s.v.* 'Sun').

[4] F. Hertlein *op. cit.* pp. 31, 73 maintains that several of the riders were fitted with a '*Strahlenkranz*.' But the evidence adduced by him is insufficient to prove his point. A dowel-hole on the head of rider or horse more probably implies a metal spike to keep birds from settling.

[5] *Supra* p. 76. Cp. *infra* § 3 (c) ii ('The Spear of Zeus').

So far, then, we can accept Hertlein's view. But when, following A. Riese[1], he contends that the prone or prostrate giant represents the earth[2], he seems to be deserting the principle of interpretation that he has himself propounded. For the Germanic earth-power would have been a goddess (Nerthus[3] or the like) rather than a god. Besides, she would surely have been figured below, not above, the Romanised *Irminsûl*—a pillar that *ex hypothesi* linked earth with heaven. I should therefore prefer to explain the giant along other lines. The provincial sculptor, bound to express himself in

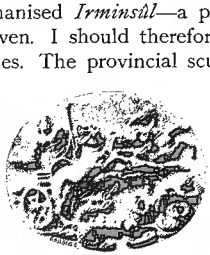

Fig. 44.

Fig. 45.

the art-speech of Rome, would naturally draw his design for a warlike Iupiter from the Graeco-Roman type of the Gigantomachy. Hence his Iupiter as rider or driver with uplifted bolt. Hence too his giant always with serpentine legs[4], sometimes with a club[5], and in one case with a second giant beside him[6]. Further, when this pictorial composition, suitable enough for relief-work or intaglio or painting on the flat, was translated into sculpture in the round,

[1] A. Riese in the *Gesellschaft für lothringische Geschichte und Altertumskunde: Jahrbuch* 1900 xii. 324 ff.

[2] F. Hertlein *op. cit.* p. 47 f.

[3] Tac. *Germ.* 40. For recent opinion with regard to Nerthus see W. Mannhardt *Wald- und Feldkulte*[2] Berlin 1904 i. 567—602, M. Ihm in Roscher *Lex. Myth.* iii. 274—277, E. Mogk in the *Grundriss der germanischen Philologie*[2] Herausgegeben von H. Paul Strassburg 1900 iii. 367—369, R. M. Meyer *Altgermanische Religionsgeschichte* Leipzig 1910 pp. 204—209, K. Helm *Altgermanische Religionsgeschichte* Heidelberg 1913 i. 311—321.

[4] This feature of the Gigantes is discussed by E. Kuhnert in Roscher *Lex. Myth.* i. 1670 ff., M. Mayer *Die Giganten und Titanen* Berlin 1887 pp. 274—282 ('Typhoeus; Schlangenfüssler'), cp. *ib.* pp. 216, 223 with n. 167, A. von Salis *Der Altar von Pergamon* Berlin 1912 p. 67 f., E. Küster *Die Schlange in der griechischen Kunst und Religion* Giessen 1913 pp. 95—97.

[5] *Supra* p. 80.

[6] A group from Pfalz (?) now in the Museum at Mayence (F. Hertlein *op. cit.* pp. 18, 40 f., 42 f., 45) has a pair of giants, one bearded, the other beardless. This exceptional arrangement, like the occasional duplication of the giant's club (*supra* p. 80 n. 2), might be referred to a mere feeling for symmetry (as is perhaps the case with some of the doublets cited by E. Gerhard *Zwei Minerven* (*Winckelmannsfest-Progr. Berlin* viii) Berlin 1848, Overbeck *Gr. Kunstmyth.* Zeus p. 257 n.c), but is more probably to be explained as a reminiscence of the Gigantomachy.

the pose taken by the defeated combatant was modified to form the necessary support for the galloping horse. Thus owing to a definite structural requirement[1] the vanquished giant of Graeco-Roman art (figs. 44[2], 45[3], 46[4]) became the subservient giant of the 'Jupiter-column.'

An exceptional group from Grand in the canton of Neufchâteau shows an even quainter perversion of a classical type (fig. 48)[5]. For here the god on horseback, with a thunder-drum (?)[6] beneath him,

[1] It is, however, possible that, where the giant is represented as a half-length figure bent or bowed beneath the sky-god's feet, there has been some contamination with the type of Caelus (*supra* i. 59 ff.).

[2] A sardonyx cameo at Naples (Müller—Wieseler *Denkm. d. alt. Kunst* ii. 18 pl. 3, 34, Müller—Wieseler—Wernicke *Ant. Denkm.* i. 78 f. pl. 8, 3, E. Babelon in Daremberg—Saglio *Dict. Ant.* ii. 1475 fig. 3513, *id. La gravure en pierres fines* Paris 1894 p. 130 ff. fig. 102, Overbeck *Gr. Kunstmyth.* Zeus p. 391 Gemmentaf. 5, 2, A. Furtwängler in the *Jahrb. d. kais. deutsch. arch. Inst.* 1888 iii. 215 f. pl. 8, 19 = *id. Kleine Schriften* München 1913 ii. 207 f. pl. 26, 19, *id. Ant. Gemmen* i. pl. 57, 2 = my fig. 44, ii. 259, iii. 158) signed by ΑΟΗΝΙΩΝ, a gem-engraver who probably worked at Pergamon for the court of Eumenes ii. Zeus in a chariot drawn by four horses drives over two serpent-legged giants. He brandishes a thunderbolt in his right hand, while he holds the reins and a sceptre in his left. Of the giants one is dead, the other still full of fight swings a torch in his right hand.

[3] A green paste at Berlin (Furtwängler *Geschnitt. Steine Berlin* p. 335 no. 9452, Müller—Wieseler *Denkm. d. alt. Kunst* ii. 52 pl. 7, 78a = my fig. 45, L. Stephani in the *Compte-rendu St. Pét.* 1865 p. 173, Overbeck *Gr. Kunstmyth.* Poseidon p. 333 Gemmentaf. 3, 1, M. Mayer *Die Giganten und Titanen* Berlin 1887 p. 394 ff. fig. 3, p. 405) represents a god on horseback attacking a giant with snaky legs. It is usual to dub this group Poseidon and Polybotes on the strength of Paus. 1. 2. 4. But the weapon in the god's hand is more like a thunderbolt than a 'spear.' I should therefore regard him as Zeus, despite the rarity of the equestrian type (*supra* i. 19). It should be noted that Furtwängler *loc. cit.* includes this paste among the 'Bei Winckelmann und Tölken irrthümlich als antik verzeichnete moderne Glaspasten der Stoschischen Sammlung, zumeist nach antiken Steinen.'

[4] An *oinochóe* of *s.* iii. B.C. from Canusium published by H. Heydemann in the *Winckelmannsfest-Progr. Halle* i. pl. 1 = my fig. 46 (cp. E. Kuhnert in Roscher *Lex. Myth.* i. 1662, M. Mayer *Die Giganten und Titanen* Berlin 1887 p. 392 ff. fig. 1, H. Steinmetz in the *Jahrb. d. kais. deutsch. arch. Inst.* 1910 xxv. 36) shows Zeus fulminant in a four-horse chariot, with Hermes as charioteer, pursuing across the sea a giant, who heaves up a rock in both hands: above the horses of Zeus are four stars; above the giant, the head of a wind-god breathing out a mighty blast.

[5] A group in common stone (height 1·60[m]), found in 1895 inside an ancient cistern at Champ-Marguerite near Grand and now in the Museum at Nancy (G. Save—A. Schuler 'Le groupe équestre de Grand au Musée lorrain' in the *Mémoires de la Société d'archéologie lorraine* 1899 xlix. 5—34 with figs., F. Hertlein *op. cit.* p. 23, Espérandieu *Basreliefs de la Gaule Rom.* vi. 202 ff. with photographic cuts of which the first two = my fig. 47). The rider wears bay-wreath, *lorica*, and *paludamentum*. His uplifted right hand held a weapon. The forefeet of his horse are supported on the wings of a nude male figure, who bears a lightning-flash—an obvious modification of Victory with a fillet.

[6] Cp. *e.g.* Reinach *Bronzes Figurés* p. 156 no. 176 fig., p. 175 f. fig. (= Reinach *Rép. Stat.* ii. 21 no. 6), p. 176 fig., Harrison *Themis* p. 114 f. fig. 21, Frazer *Golden Bough*[3]: The Magic Art i. 248, ii. 183. *Supra* i. 650.

is preceded by a nude male figure, who flies through the air with

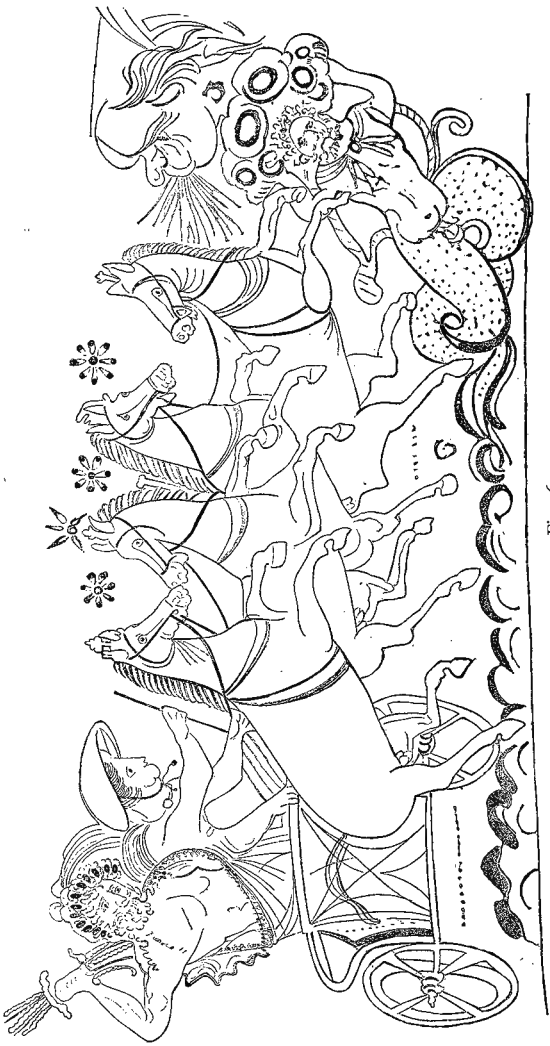

Fig. 46.

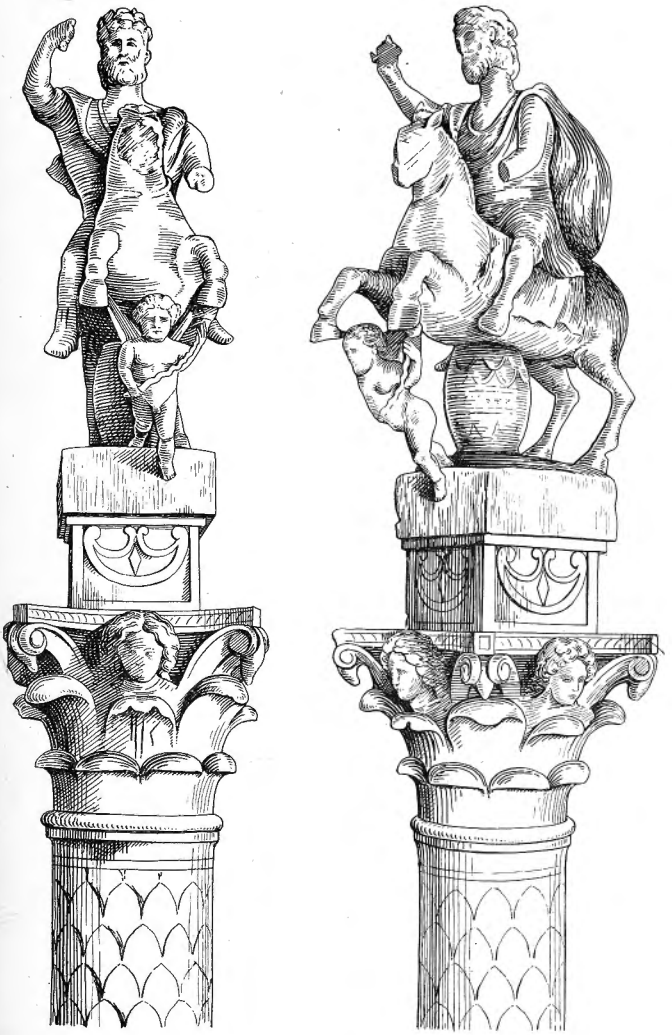

Fig. 47.

a flash of lightning held across his body. As he steps out from the top of the column, he looks like an incredibly clumsy caricature of Paionios' Victory.

Equally *bizarre* is a group from Luxovium (*Luxeuil*) in Germania Superior (fig. 48)[1]. This shows the rider-god thrusting his right

a *b*

Fig. 48.

hand between the spokes[2] of a wheel and resting his left on the shoulder of a partially draped female figure, who appears to be floating through the air at his side. The giant is reduced to a mere head supporting the left forefoot of the horse. The precise significance of the group is uncertain. It is possible that the god and his attendant should be identified with Luxovius and Brixia, mentioned together in an inscription from *Luxeuil*[3]. But in any case the rider must be regarded as a form of the Celtic Iupiter, who is represented by statuettes in white clay from Moulins (Allier) as a bearded god in military garb holding a wheel in his right hand

[1] A. C. P. de Tubières Comte de Caylus *Recueil d'antiquités égyptiennes, étrusques, grecques, romaines et gauloises* Paris 1759 iii. 367 f. pl. 99, 3 (=my fig. 48), Reinach *Rép. Stat.* ii. 532 nos. 3 and 6. Found at Luxeuil in 1755. Local stone. Height 5 ft.

[2] Caylus says: 'une roue à sept rayes.'

Preserver[1],' in another 'to Iupiter Best and Greatest and to all the other gods and goddesses immortal[2].' Thus with simple time-honoured phrases the tribes of Rhenic Germany attested their belief that heaven, the abode of the sky-god, rested on a world-pillar. Their ancestors, could we have questioned them, would probably have held the same opinion in a slightly different form, speaking not of a pillar but of a tree—a notion that still lingers in the cottage-homes of their descendants[3].

Finally, since the holy tree of a primitive cult is apt to be associated with a holy well[4], F. Hertlein rightly draws attention to the fact that a noticeable proportion of these 'Jupiter-columns' has been discovered in Roman wells or beside a spring or river[5].

Sébillot *Le Folk-lore de France* 1906 iii. 439) and Germany (*Grimm's Household Tales* trans. M. Hunt London 1901 ii. 107 f. no. 112, *ib.* ii. 413, cp. *ib.* ii. 506—508).

[4] *Supra* i. 76 f., 368 f., 526 n. 4.

[5] F. Hertlein *op. cit.* p. 85 f., following up an observation by F. Hettner in the *Westdeutsche Zeitschrift* 1885 iv. 387.

Another variety of 'Jupiter-column,' found over a wider area[1] and dating, it would seem, from a somewhat earlier period[2], was surmounted merely by a seated or standing figure of the sky-god[3]. These columns were characterised by much sculptural decoration[4]. Their square plinth was regularly a *Viergötterstein* carved with deities: indeed, it seems probable that the practice of thus adorning the plinth began with the makers of the earlier columns and spread from them to the makers of the rider-and-giant series, who improved upon the earlier plan by restricting the deities in question to representatives of the seasons, soon afterwards adding the heads or busts on the capital to denote the divisions of the day, and at the same time or but little later introducing the *Wochengötterstein* as a secondary plinth[5]. The shaft of the earlier columns might be left smooth (fig. 51)[6], but was often patterned with scales etc.[7], and sometimes also embellished with the figures of deities, *e.g.* Mercurius, Minerva, Iuno (fig. 52)[8] or Hercules, Minerva, Iuno in

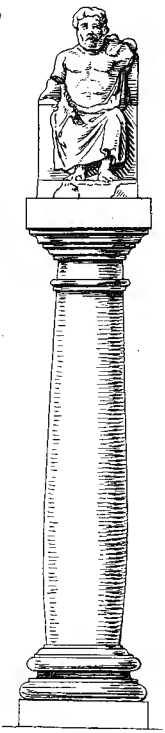

Fig. 51.

[1] F. Hertlein *op. cit.* p. 51: 'derartige Säulen mit stehendem oder thronendem Juppiter finden sich häufig ausserhalb des Gebietes der Gigantengruppen und an der Peripherie derselben, wo diese sehr selten sind, wie in der Kölner Gegend' (cp. *ib.* pp. 53, 158).

[2] *Id. ib.* p. 159.

[3] Hence F. Hertlein *op. cit. passim* would distinguish them as '*Juppitersäulen*' from the '*Juppitergigantensäulen*' already discussed. This convenient nomenclature is more possible in German than in English.

[4] F. Hertlein *op. cit.* p. 157.

[5] *Id. ib.* pp. 159—161.

[6] So in the case of the smaller column from Heddernheim (O. Donner-von Richter and A. Riese *Heddernheimer Ausgrabungen* Frankfurt am Main 1885 (an Stelle des Neujahrs-Blattes des Vereins für Geschichte und Alterthumskunde für 1885 und 1886) pl. 1, 2 f. = my fig. 51, F. Hertlein *op. cit.* pp. 6, 158, *supra* p. 71 n. 6), which has a total height of 2·30^{m} and is accompanied by an altar 0·625^{m} high inscribed *I(ovi) O(ptimo) M(aximo)*.

[7] F. Hertlein *op. cit.* p. 158, cp. *ib.* p. 84.

[8] *Id. ib.* p. 157 f. I figure the limestone altar, column, and statue found in 1880 at Mayence among the ruins of a large Roman building and now in the Mayence Museum (J. Keller in the *Jahrb. d. Vereins v. Alterthumsfreund. im Rheinl.* 1881 lxx. 1 ff. pl. 1, F. Hettner in the *Westdeutsche Zeitschrift* 1885 iv. 370 f., Körber in the *Mainzer Zeitschrift* 1906 i. 62 fig., F. Hertlein *op. cit.* p. 157 f.). The altar (height 0·50^{m}, length and breadth 0·315^{m}) is inscribed *I(ovi) O(ptimo) M(aximo)* | *M.P.P.* | *v.s.l.l.m.* The column (upper diameter 0·18^{m}, height *c.* 1·60^{m}), once mounted on a plinth, is decorated

a

Fig. 52.

ascending order (fig. 53)[1]. The column as a whole was dedicated 'to Iupiter Best and Greatest,' but not—so far as we know—to Iuno in combination with him[2].

The earlier, like the later, variety of 'Jupiter-column' had a long history behind it, being in all probability itself descended from the Germanic *Irminsûl*. The one example of which any trace subsists in our own country stood at Durocornovium (*Cirencester*). Here a small sandstone plinth has come to light

with a scale-pattern and three superposed figures of Mercurius, Minerva, Iuno. The statue, to judge from its dimensions, stood upon the capital of the column, not—as Keller supposed—on the altar. Hertlein notes that the column of Klein-Bouslar near Erkelenz (*Westdeutsche Zeitschrift* 1907 xxvi. 321) exhibits the same three deities in the same order. See further F. Hettner in the *Westdeutsche Zeitschrift* 1885 iv. 386.

[1] S. Reinach in the *Rev. arch.* 1913 i. 27 fig. 2 'Colonne de Müllfort.'

[2] F. Hertlein *op. cit.* p. 158, cp. *ib.* p. 81.

inscribed with careful lettering of Diocletian's age (284—305 A.D.). In front is a dedication 'To Iupiter Best and Greatest. L. Septimius..., an equestrian, governor of the first province of Britain, restored this by the agency of C. Iust....' To left and right are two very indifferent verses:

The statue and the column here in ancient days adored
Britannia Prima's ruler Septimius restored[1].

Fig. 53.

The object of Septimius' pious and politic care was certainly a 'Jupiter-column' of some sort. And, if the road connecting Calleva (*Silchester*) with Durocornovium (*Cirencester*) was really, as E. Hübner supposed, an Ermine Street[2], it may fairly be assumed that the column had taken the place of an older *Irminsûl*. Nor need we be deterred from regarding the 'Jupiter-column' as a Romanised *Irminsûl* by the fact that deities were carved upon its shaft. The *Irminsûl* near Eresburg[3] was itself described by a Saxon poet, who wrote in the reign of Arnulf, as a thing 'of beauty[4].' And a similar sacred post at Austa

[1] E. Hübner in the *Korrespondenzblatt der Westdeutschen Zeitschrift* 1891 x. 254 f. reads the dedication as follows: *I(ovi) O(ptimo) [M(aximo)] | L. Sept(imius...) | v(ir) p(erfectissimus) pr(aeses) [prov(inciae) Brit(anniae) pr(imae)] | rest[ituit] | c(urante) Iust[ino...]* and the hexameters thus: *[Sig]num et | [er]ectam | [p]risca re|[li]gione co[lu]mnam || Septimius | renovat, | primae | provinciae | rector.* F. Bücheler *Carmina Latina epigraphica* Lipsiae 1895 i. 135 no. 277 prefers: *I(ovi) O(ptimo) [M(aximo)] | L. Sept(imius...) | v(ir) p(erfectissimus) pr(aeses) [prov(inciae) Brit(anniae) primae] | rest[ituit curam agente] | C. Iust...* and *[Sig]num et | [der]ectam | [p]risca re|gione co|[lu]mnam || Septimius | renovat | primae | provinciae | rector.* F. Haverfield in the *English Historical Review* for July 1896 figures the plinth and (followed by E. Conybeare *Roman Britain* London 1903 p. 225 n. 1) reads the hexameters in the inverse order. Cp. also *Ephem. epigr.* ix. 517 f. no. 997, F. Haverfield *The Romanization of Roman Britain*[3] Oxford 1915 p. 70 n. 1.

[2] See the map appended to *Corp. inscr. Lat.* vii. Cp. T. Codrington *Roman Roads in Britain* London 1903 p. 29 f. 'Higden, following another of King Belinus's roads in Geoffrey of Monmouth's account, says that Erming Street tends from west to east, beginning at St. David's, and goes to Southampton, that is, roughly parallel to Watling Street, and extending from sea to sea. There can be little doubt that he referred to the line of Roman roads through Gloucester, Cirencester, Cricklade, to near Wanborough, and then south by Marlborough to Winchester and Bitterne near Southampton, a route which in Gloucestershire and North Wiltshire still bears the name of the Ermin Way.'

[3] *Supra* p. 53.

[4] Poeta Saxo *annalium de gestis Caroli Magni imperatoris* lib. i anno 772 v. 45 ff. (G. H. Pertz *Monumenta Germaniae historica* Hannoverae 1826 i. 228) Gens eadem coluit simulacrum, quod vocitabant | Irminsul, cuius factura similis (sic cod.: *similis factura* corr. Leibnitius) columne (*factura simulque columna* cj. Reineccius) | Non operis parvi fuerat pariterque decoris.

(*le Bourg d'Augst* near *Eu*) in Neustria mentioned in an eighth-century *Life of Walaricus, Abbot of Leuconaus*, who died *c.* 622 A.D.[1], was 'figured with diverse images[2].' Such examples lend some support to the statement of Simon Grunau[3] that in the great evergreen

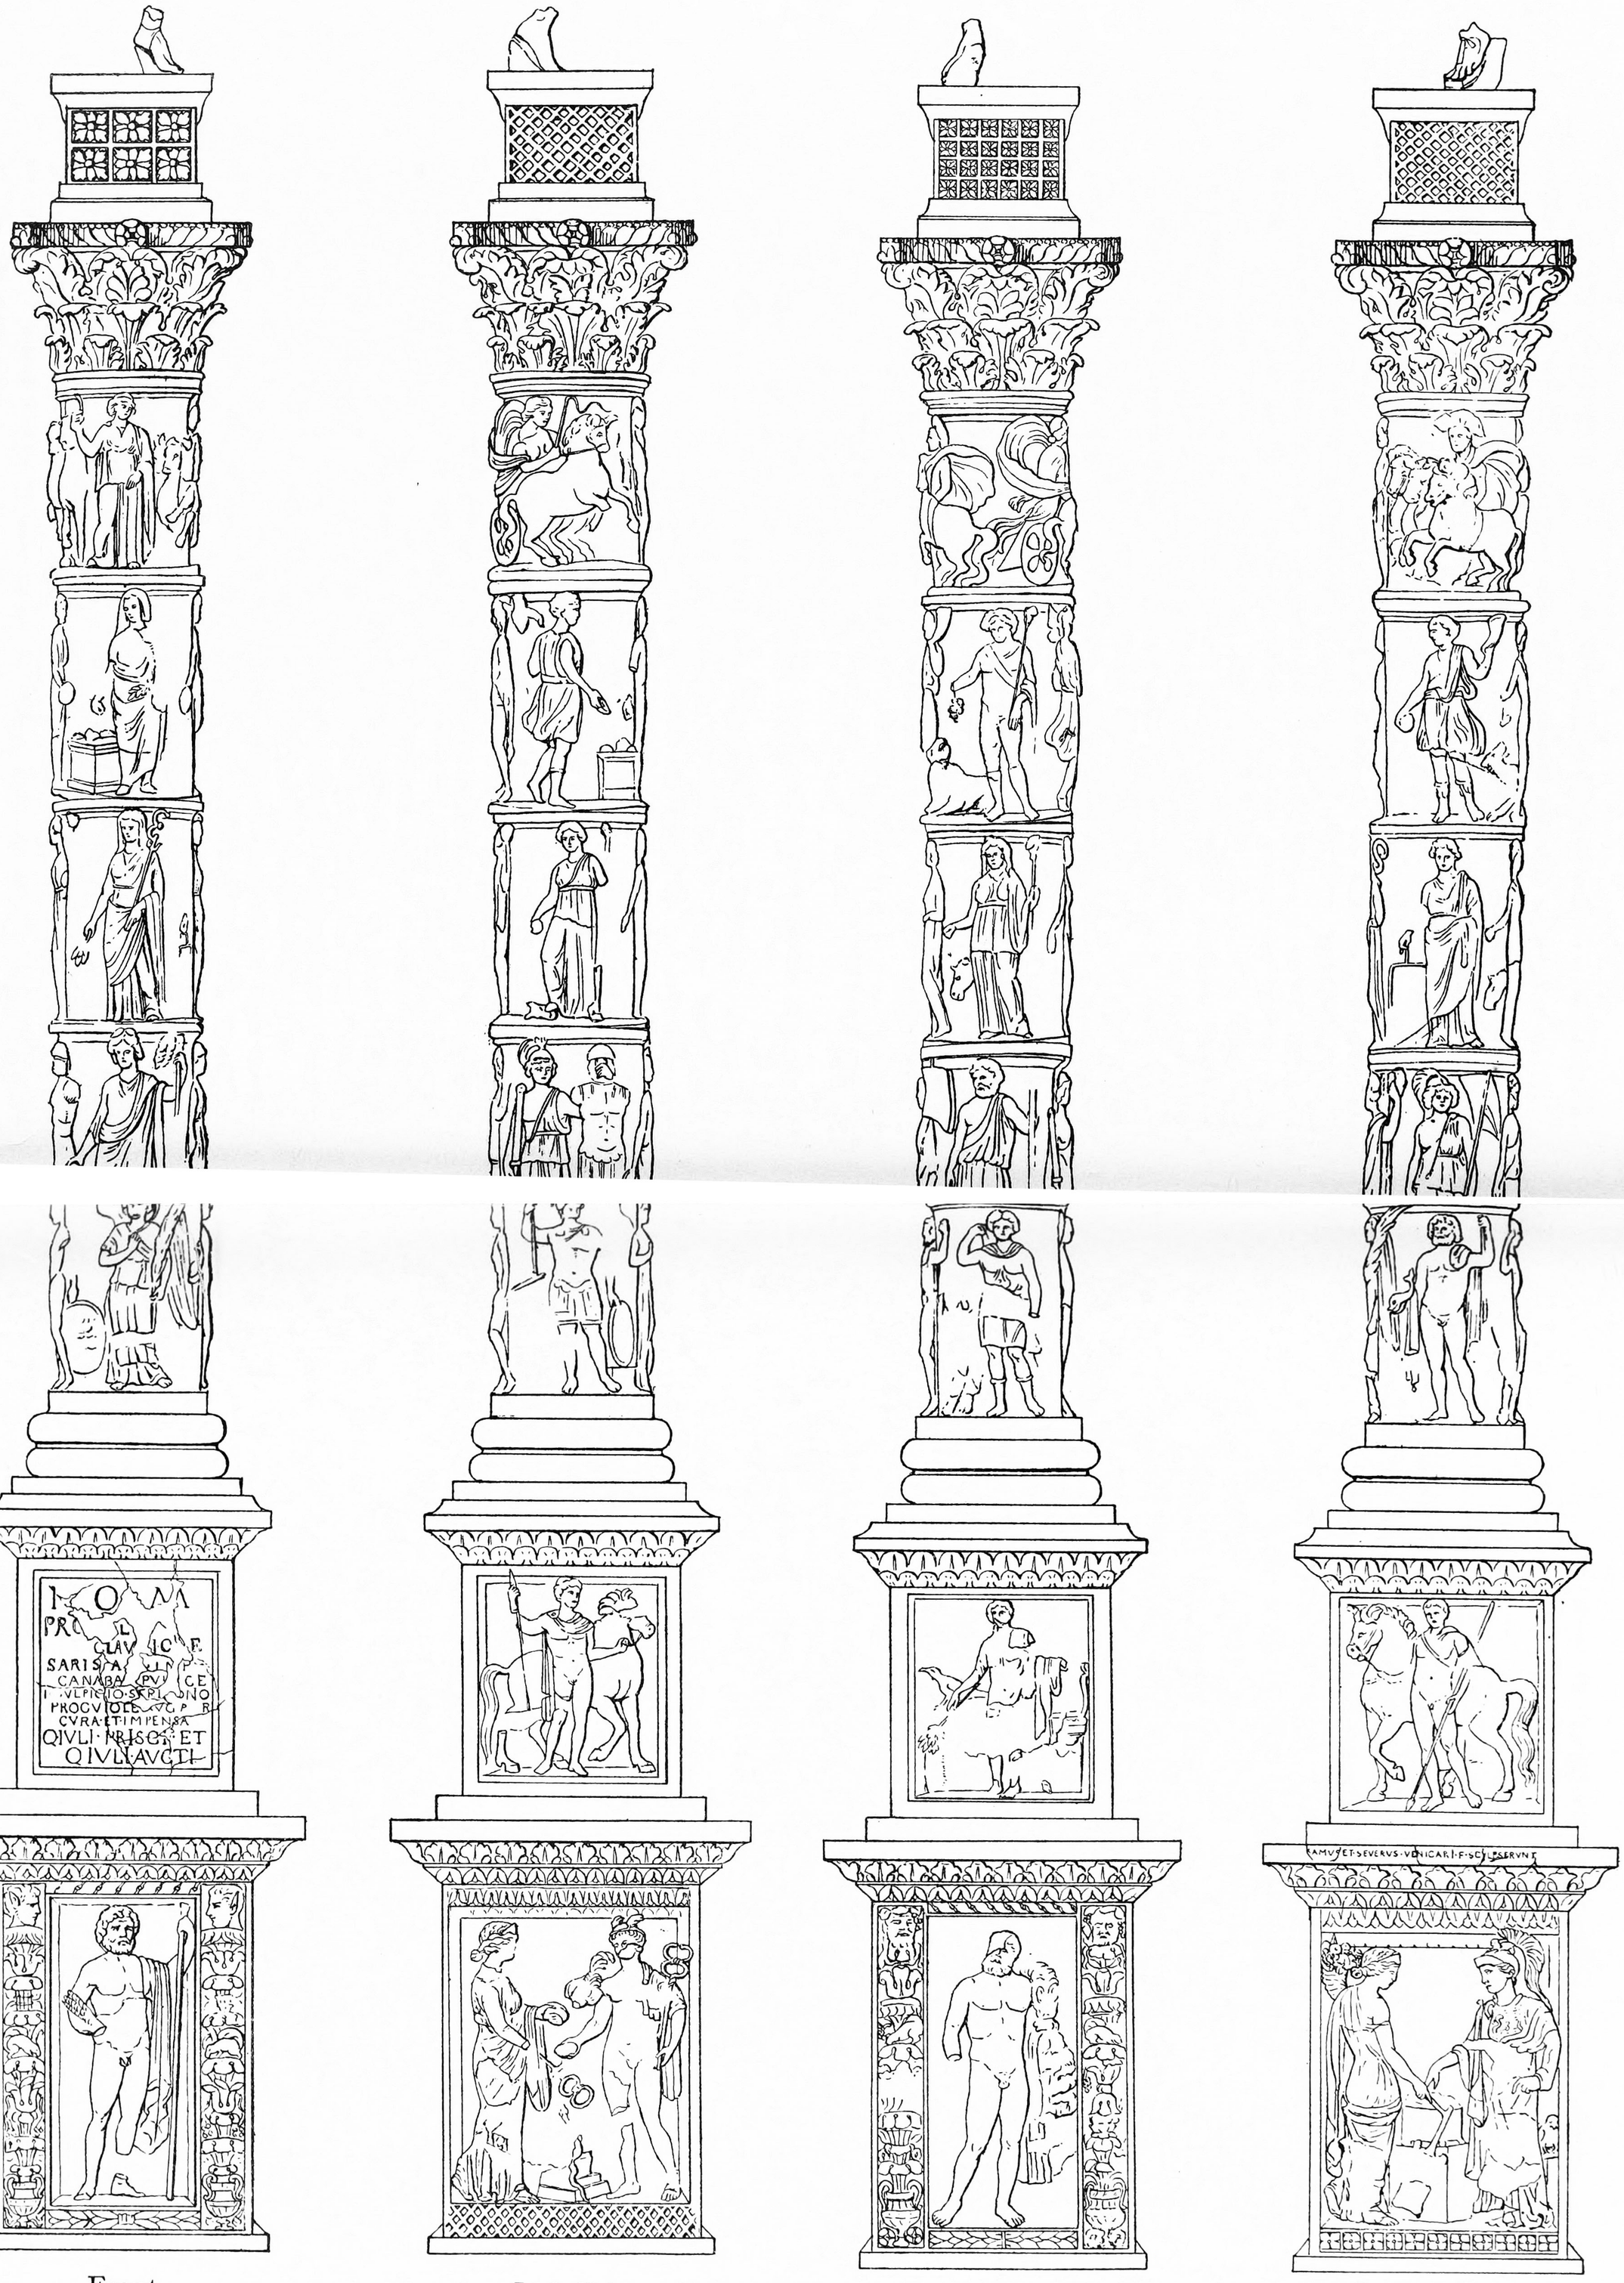
[1] S. A. Bennett in Smith—Wace *Dict. Chr. Biogr.* iv. 1169.

[2] *Acta Sanctorum* edd. Bolland. Aprilis i. 21 (Ragimbertus Abbas *v. S. Walarici* 16) Et juxta ripam ipsius fluminis stipes erat magnus, diversis imaginibus figuratus, atque ibi in terram magna virtute immissus, qui nimio cultu, more Gentilium, à rusticis colebatur. Cumque hoc Confessor Domini vidisset, confestim zelo Dei accensus, ad puerum dixit: Fili mi, impinge hunc in ruinam cadendum. Qui nihil hæsitans nec moratus, manu hunc tantummodo contigit; & pondus immensum, quod vix multitudo hominum magna vi posset evellere vel securibus incidere, à tactu unius obedientis monachi, quasi madidus & putrefactus, nimio fragore & magno impetu subito ad terram cecidit, atque in semetipsum totus confractus apparuit. Et hic quidem rusticis, habitantibus in loco, non parvum tam mœrorem quam & stuporem omnibus præbuit: sed undique illis certatim concurrentibus cum armis & fustibus, indigne hoc ferentes invicem, ut quasi injuriam Dei sui vindicarent, cum in eum unanimiter magno furore erupissent, & extensis brachiis colaphos ictusque suos in aëre suspendissent; ille, ut erat semper animo intrepidus atque robustus, fertur eis illud dixisse: Si Dominus hoc permittit, nullus ei resistere valebit. At illi è contrario perterriti, ab intentione animi sui statim divino nutu repressi, ab eo recesserunt. Sed his ita dimissis, cœpit Sacerdos divino spiritu afflatus eos instruere, ut relictis idolis omnipotenti Deo deservirent. Et in ipso eodemque loco postea in honorem B. Walarici basilicam construxerunt, juxta fontem aliquem, ex quo fertur ipse se lavisse; ubi plurima beneficia recta fide petentibus à Domino præstantur.

It will be observed that this post, like the 'Jupiter-columns' (*supra* p. 88), was set up beside a spring and not far from a river.

[3] S. Grunau *Preussische Chronik* ed. M. Perlbach Leipzig 1876 i. 78 (Tractat. ii cap. 5 sect. 2 'Vonn der gelegenheit der eichenn, inn welchin do worenn die götthe.') 'Die grosse dicke und mechtige hohe eiche, in welcher der teuffel sein gespenst hette und die bilde der abgötte ynne woren, halt ich ausz vorplendungk des teufels, war stetis grün, winter und sommer, und war obene weit und breit so dicke von lobe, damit kein regen dardurch kunt fallen, und umb und umb woren hubsche tuchir vorgezogen ein schrit aber 3 von der eichen wol 7 elen hoch, do mocht niemandt eingehen ag der kirwaito und die obirsten waidolotten, sonder so imandes quam, sie die tuchir wegk zogen. Und die eiche war (*wol* cod. A) gleich in 3 teil geteilet, in iglichem wie in eim gemachten fenster stundt ein abgott und hett vor sich sein cleinott. Die eine seite hilt das bilde Perkuno inne, wies oben ist gesagt wurden, und sein cleinott war, domit man stetis feuir hette von eichenem holtze tag und nacht, und so is von vorseumnis ausginge, is koste dem zugeeigenten waidlotten den hals, auff man brandte die oppherungk. Dy andre seite hilt ynne das bildt Potrumppi und het vor sein cleinot eine slange, und die wardt in einem grosen toppe irnert mit milch von den waydolottinnen und stetis mit garwen des getreides bedeckt. Das dritte bilde Patolli hilt inne die dritten seitte, und sein cleinott war ein todten kopff vonn eim menschin, pferde und ku, und diesen zu zeiten in iren festen in eim toppe unslitt brandten zur erungk. Umb und umb in ihren gezelten wonten die wadolotten (leg. *wadolotten*).'

Simon Grunau's good faith has been doubted or denied, especially in regard to these three images (M. Toeppen *Geschichte der Preussischen Historiographie von P. v. Dusburg bis auf K. Schütz* Berlin 1853 pp. 122—201, H. Usener *Götternamen* Bonn 1896 p. 83). But he lived as an itinerant Dominican friar early in the sixteenth century in that part of Prussia, which had been ceded to Poland (Frazer *Golden Bough*[3]: The Magic Art ii. 366 n. 2); and such a man would have had excellent opportunities of becoming acquainted with the old heathen customs of the district.



Front | Left Side | Back | Right Side

The sculptured column of Mayence.

The key to the deities represented is given on page 96.

See page 93 ff. *with Addenda* ad loc.

oak at Romove[1] were images of the three Lithuanian gods Perkúnas, Potrympus, and Pikùlas[2].

(ζ) The Column of Mayence.

Perhaps the earliest, certainly the finest, example of the figured variety is the 'Jupiter-column' found within the *territorium* of the Roman camp at Mogontiacum (*Mayence*) in 1905 and now preserved in the Mayence Museum (pl. iv)[3]. From a double plinth (2·98m high) rose a base, shaft, and capital (together 5·60m high) supporting a pedestal (0·62m high), on which stood a bronze statue of Iupiter. The front of the upper plinth was inscribed: 'To Iupiter Best and Greatest on behalf of the emperor Nero Claudius Caesar Augustus (this monument was dedicated) by the public action of the Canabarii[4], when L. Sulpicius Scribonius Proculus imperial legate was propraetor[5], through the agency and at the charges of Q. Iulius Priscus and Q. Iulius Auctus[6].' The sculptors, who decorated the column, added their names on the cornice of the lower plinth: 'Samus and Severus, sons of Venicarus, did the carving[7].' This lower plinth was in effect a *Viergötterstein*. It

[1] On the oak at Romove see further W. J. A. von Tettau und J. D. H. Temme *Die Volkssagen Ostpreussens, Litthauens und Westpreussens* Berlin 1837 pp. 19—22, 35—38, J. [7] A. von Domaszewski in the *Archiv f. Rel.* 1906 ix. 304 = Dessau *Inscr. Lat. sel.* no. 9235 *Samus et Severus Venicari f(ilii) sculpserunt.*

exhibits the seasonal (?) series[1] from right to left with sundry slight modifications—Iupiter replacing Iuno as patron of the opening year[2], Mercurius being provided with a partner, possibly Maia (?)[3],

[1] Iuno (=Frija) as goddess of spring, Mercurius (=Wodan) as god of summer, Hercules (=Donar) as god of autumn, Minerva (=Holda) as goddess of winter. See *supra* p. 58 ff.

[2] Iupiter heads the climatic series because he was 'the Author of Good Weather' (*Corp. inscr. Lat.* xiii no. 6=Orelli—Henzen *Inscr. Lat. sel.* no. 5615=Dessau *Inscr. Lat. sel.* no. 3060 a marble altar from Lescure (Ariège) inscribed *I. o. m.* | *auctori* | *bonarum* | *Tempes*|*tatium*, | *Val. Iustus* between a *patera* carved to the left and a *guttus* to the right, cp. *Corp. inscr. Lat.* viii no. 2609=Orelli *Inscr. Lat. sel.* no. 1271=Dessau *Inscr. Lat. sel.* no. 3061 an altar found near Lambaesis *Iovi o. m.* | *Tempestatium* | *divinarum* | *potenti*, | *leg. III Aug.* | *dedicante* | *Q. Fabio Catullino* | *leg. Aug. pr. pr.* together with a twin altar *Corp. inscr. Lat.* viii no. 2610=Orelli *loc. cit.*=Dessau *loc. cit. Ventis* | *bonarum* | *Tempes*|*tatium* | *potentibus* | *leg. III Aug.* | *dedicante* | *Q. Fabio Catullino* | *leg. Aug. pr. pr.*). Similarly Zeus, the author of days and years (*supra* i. 16 n. 3, 187 n. 8), is associated with the Horai as powers of the 'year' (L. Meyer *Handb. d. gr. Etym.* i. 653 f., Schrader *Reallex.* p. 395, Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] p. 523) throughout the whole of their long development (on which see J. H. Krause *Musen Grazien Horen und Nymphen* Halle 1871 pp. 109—127, P. Herrmann *De Horarum apud veteres figuris* Berlin 1887, Preller—Robert *Gr. Myth.* i. 477—480, A. Rapp in Roscher *Lex. Myth.* i. 2712—2741, J. A. Hild in Daremberg—Saglio *Dict. Ant.* iii. 249—256, Gruppe *Gr. Myth. Rel.* pp. 382 n. 1, 1063 n. 3, Jolles in Pauly—Wissowa *Real-Enc.* viii. 2300—2313). Thus the Διὸς ὧραι of Homer (*Od.* 24. 344 with Eustath. *in Od.* p. 1964, 28, cp. Pind. *Ol.* 4. 1 ff. ἐλατὴρ ὑπέρτατε βρον|τᾶς ἀκαμαντόποδος | Ζεῦ· τεαὶ γὰρ Ὧραι κ.τ.λ. with scholl. *ad loc.*) become in Hesiod and later writers the daughters of Zeus by Themis (Hes. *theog.* 901 ff., cp. *o. d.* 256; Pind. *frag.* 30 Schroeder=*supra* p. 37 n. 1, cp. *Ol.* 13. 6 ff.; Orph. *h. Hor.* 43. 1 ff.; Apollod. 1. 3. 1; Hyg. *fab. praef.* p. 12, 6 Schmidt and *fab.* 183; Cornut. *theol.* 29 p. 57, 6 ff. Lang; Rufin. *recognit.* 10. 21; Eudok. *viol.* 1019), or at least the daughters (Diod. 5. 72, Paus. 5. 11. 7) or attendants of Zeus (Nonn. *Dion.* 8. 5, 8. 33, cp. 7. 106 f.). Hence they figured as decorative details on the throne of Zeus at Olympia (Paus. 5. 11. 7) and at Megara (Paus. 1. 40. 4).

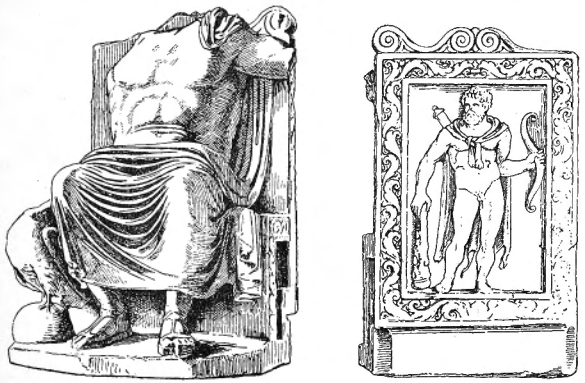
But, apart from the general connexion of Iupiter with the Tempestates or Zeus with the Horai, there seems to have been a special reason why this deity was chosen as the representative of spring, *viz.* a May-festival of Iupiter in the Gallo-Germanic area (E. Maass in the *Jahresh. d. oest. arch. Inst.* 1907 x. 108 ff. cites Eligius, bishop of Noyon (640—648 A.D.), *de rectitudine catholicae conversationis* (xl. 1172 Migne) Nullus diem Iovis absque sanctis festivitatibus nec in Maio nec in ullo tempore in otio observet).

[3] Mercurius, clad in *chlamýs*, winged *pétasos* and sandals, holds a *caduceus* in his left hand and offers a purse with his right, while a cock—his frequent attribute—hovers above it. His companion, in *chitón* and *himátion*, holds out towards him a winged *pétasos* in her left hand, a *caduceus* in her right. Beneath the latter is a stepped omphaloid stone, round which a snake is coiled. K. Körber and A. von Domaszewski suppose that this goddess is Rosmerta, the Gallic partner of Mercurius (on whom see the excellent article by M. Ihm in Roscher *Lex. Myth.* iv. 209—225). E. Maass in the *Jahresh. d. oest. arch. Inst.* 1907 x. 87—90 wants to call her Emporia as goddess of the local mart: but his arguments are unconvincing. A. Oxé in the *Mainzer Zeitschrift* 1912 vii. 28 ff., followed by E. Strong in the *Rev. arch.* 1913 ij. 324, makes her out to be Salus, the Romanized Hygieia, whose presence was required by the *pro salute Neronis* of the inscription (*supra* p. 93 n. 6). J. Zingerle in the *Jahresh. d. oest. arch. Inst.* 1907 x. 338 n. 29, M. Ihm in Roscher *Lex. Myth.* iv. 220 ff., S. Reinach in the *Rev. arch.* 1913 i. 25 revert to the name Rosmerta. Reinach *ib.* 1913 ii. 333 f. further identifies Rosmerta with Maia as the mother of Mercurius.

and Minerva bringing the year to a prosperous close with Fortuna conceived as her second self[1]. The front and back of the lower plinth show Iupiter and Hercules[2] standing between acanthus-pilasters, which are adorned with flowers, grapes, squirrels, etc. and topped by four male heads or masks—two Satyroi with pointed ears on the side of Iupiter, two Silenoi wreathed with ivy and vine on that of Hercules[3]. The upper plinth displays Apollo flanked by

[1] Minerva, wearing sleeved *chitón*, *himátion*, *aigís*, and helmet with reclining griffin as crest-support, drops a pinch of incense from her right hand into a small brazier set upon a stone base: her owl is visible beneath her left hand. Fortuna, draped in a sleeveless *chitón*, which has slipped from her right shoulder, and a *himátion*, has a *stephánе* in her hair, holds the tiller of a steering-paddle in her right hand, and carries a goat's horn as *cornu copiae* over her left shoulder.

F. Hertlein *Die Juppitergigantensäulen* Stuttgart 1910 p. 156 notes that Fortuna appears as representative of the winter on *Viergöttersteine* from Kreuznach (*ib.* pp. 109, 126, 131) and Heinzenhausen (*ib.* pp. 109, 122, 126). Moreover, he is able to cite an altar



a *b*

Fig. 54.

found at Mayence in 1832, which is dedicated [*I.*] *o. m.* | [*Iu*]*noni Reginae* | [*For*]*tunae Minervae* | ... (*Corp. inscr. Lat.* xiii no. 6728): this implies a close association, though hardly an actual identification, of Fortuna with Minerva (cp. *Corp. inscr. Lat.* ix no. 4674 Reate *Iovi o. m. Minervae Fortunae Herculi*).

[2] For Iupiter and Hercules as obverse and reverse of the same monument cp. a limestone figure found in 1885 on the Petersberg near Trèves (F. Hettner *Die römischen Steindenkmäler des Provinzialmuseums zu Trier* Trier 1893 p. 12 f. no. 21 fig. = my fig. 54). Iupiter in *himátion* and sandals, with his eagle on a globe beside him, is seated on a throne, the back of which forms a floral frame filled by a standing Hercules with lion-skin and club, bow and quiver. It was perhaps felt that Hercules was the heroic counterpart of Iupiter: Donar at least was equated first with the former and then with the latter (*supra* p. 63 n. 1). A Gallic Iupiter approximating in type to Hercules has been figured *supra* i. 288 fig. 208.

[3] These Dionysiac heads together with the vegetable and animal decoration of the pilasters recall the vine-leaf shafts of Neuenheim and Les Fontaines (*supra* p. 71 n. 7).

Castor and Pollux, all three being sons of Iupiter who in various ways inherited their father's light-giving prerogative. The shaft of the column is covered with five zones of deities arranged as in the following table:

	FRONT	LEFT SIDE	BACK	RIGHT SIDE
SHAFT OF THE COLUMN	IVNO *Regina*	Luna		Sol
	Genius Neronis	Lar	Bacchus	Lar
	Pax	Iuno *Sancta*	VESTA	VENVS
	CERES	Honos	VOLCANVS	Virtus
	Victoria	MARS	DIANA	NEPTVNVS
UPPER PLINTH	Inscription	Castor	APOLLO	Pollux
LOWER PLINTH	IVPITER	MERCVRIVS and Maia(?)	Hercules	MINERVA and Fortuna

Immediately below the bronze statue of Iupiter Best and Greatest is his consort Iuno the Queen[1], standing sceptre in hand between the chariots of Sol and Luna. Next in order of dignity comes Nero, to whom the second drum is devoted. As a Genius[2] with portrait features, veiled and sacrificing, he is flanked by the imperial Lares. He is further brought into connexion with Bacchus, possibly as being himself a *Néos Diónysos*[3]. To interpret the three

[1] *Supra* p. 87 n. 3. Numerous inscriptions found at Mayence associate Iupiter *Optimus Maximus* with Iuno *Regina* (*Corp. inscr. Lat.* xiii nos. 6713—6728).

[2] Local inscriptions repeatedly link the names of Iupiter *Optimus Maximus* or Iuno *Regina* or both with that of the Genius (*Corp. inscr. Lat.* xiii nos. 6696 Iunoni Reg. et | Genio loci, 6710 I. o. m. et Genio, 6711 I. o. m. | et Genio | beneme|renti, 6712 I. o. m. | et Genio loci, 6726 I. o. m. [Iun. Reg.] | et Ge[nio], 6730 I. o. m. | Sucaelo et | Gen. loci), whose cult survived in the Gallo-Germanic region till the seventh century (see E. Maass in the *Jahresh. d. oest. arch. Inst.* 1907 x. 109 f.).

[3] So Mrs Strong in the *Rev. Arch.* 1913 ii. 327: 'Nor does it seem fanciful to suppose that *Liber* appears on the same drum as Nero, in compliment to the Emperor not averse doubtless to seeing himself alluded to as the *néos Διόνυσος*.' This title was actually assumed by Mithradates vi Eupator, king of Pontos 120—63 B.C. (Poseidonios *frag.* 41 (*Frag. hist. Gr.* iii. 266 ff. Müller) *ap.* Athen. 212 D, cp. Cic. *pro Flacco* 60, Dittenberger *Orient. Gr. inscr. sel.* no. 370, 1, W. Wroth in the *Brit. Mus. Cat. Coins* Pontus, etc. p. xxv, G. F. Hill *Historical Greek Coins* London 1906 p. 162 f.), Ptolemy xiii Auletes, king of Egypt 80—51 B.C. (Dittenberger *Orient. Gr. inscr. sel.* no. 186, 8 f., no. 187, 2, no. 191, 1 f., no. 193, 9, no. 741, 1 f. with notes on no. 182, 1, B. P. Grenfell and A. S. Hunt *The Oxyrhynchus Papyri* London 1899 ii. 139 f. no. 236 *b*, 1, B. P. Grenfell—A. S. Hunt —D. G. Hogarth *Fayûm Towns and their Papyri* London 1900 p. 304 no. 236, Porphyrios

lower drums aright, we must view them from the front, bearing in

ap. Euseb. *chron.* i. 22. 6 (p. 120 ed. A. Mai—]. Zohrab), cp. Loukian. *de calumn.* 16, *supra* i. 709 n. 1), M. Antonius the *triumvir* (Vell. Pat. 2. 82. 4, cp. Sokrates of Rhodes *frag.* 1 (*Frag. hist. Gr.* iii. 326 Müller) *ap.* Athen. 148 c, Eustath. *in Il.* p. 776, 30 f.), Caligula (Philon *de legat. ad Cai.* 12, Athen. 148 d, Eustath. *in Il.* p. 776, 29 f.), and probably Hadrian (E. L. Hicks *The Collection of Ancient Greek Inscriptions in the British Museum* Oxford 1890 iii. 2. 161 no. 600, 46). Demetrios Poliorketes too had posed as Dionysos (Plout. *v. Demetr.* 2), as had Antiochos vi, son of Alexandros i Balas (*Brit. Mus. Cat. Coins* Seleucid Kings of Syria p. 63 ff. pl. 19, 1—3, 5—14, *Hunter Cat. Coins* iii. 72 ff. pl. 68, 2—10, Head *Hist. num.*[2] p. 766 f. fig. 337); and in later times Antinoos (*supra* i. 714 n. 6, cp. *Brit. Mus. Cat. Coins* Lycaonia, etc. pp. lxxxix, 189 ΝΕΩΙΑΚΧΩ on a copper of Tarsos) and various scions of the imperial house (*supra* i. 714 f.) were represented as Dionysos incarnate. That Nero claimed to be Dionysos is not, I think, recorded by any ancient authority: but his worship, like that of other emperors (see W. Quandt *De Baccho ab Alexandri aetate in Asia Minore culto* Halis Saxonum 1913 p. 275), might be associated with the worship of Dionysos (*e.g. Corp. inscr. Att.* iii. 1 no. 158 [Διονύσῳ Ἐλ]ευθερικὶ καὶ [Νέρωνι] Κλαυδίῳ Καίσαρι Σε[βαστῷ Γερμανικῷ κ.τ.λ.]), and he takes on occasion the *rôle* of Zeus *Eleuthérios* (fig. 55 is a copper of Sikyon (this attribution was first made by F. Imhoof-Blumer in the *Revue suisse de numismatique* 1896 vi. 240, 1897 vii. 40, cp. R. Münsterberg in the *Num. Zeitschr.* 1911 iv. 122) from my collection: obv. mind that, just as Iuno *Regina* stands between Sol and Luna, or the Genius Neronis between the Lares, so each figure beneath Nero is flanked by two appropriate supporters. Read downwards the column will speak for itself: Iupiter, Iuno, Nero, Pax[1], Ceres[2], Victoria. The mere names convey their message: 'Under the blessing of Iupiter and Iuno, Nero has brought Peace and Plenty in the train of Victory.' The side-figures emphasise and enhance this gracious announcement. Peace with olive-branch and *caduceus* is attended by the civic virtues of Sanctity and Love, who appear in august yet popular form as Iuno *Sancta*[3] and Venus

[1] This identification is made by Mrs Strong in the *Rev. Arch.* 1913 ii. 324. Others had conjectured Maia (A. von Domaszewski), Rosmerta (S. Reinach), Libera? (A. Oxé), Felicitas (Quilling).

[2] So named by K. Körber, Quilling, and E. Neeb. A. von Domaszewski, A. Oxé, and S. Reinach call this figure Pax. Mrs Strong in the *Rev. Arch.* 1913 ii. 326 proposes the name Tellus on the ground that Ceres must be recognised elsewhere. But that ground, as we shall see (*infra* n. 3), is fallacious.

[3] A. von Domaszewski fancies that this goddess is Persephone. A. Oxé dubs her Gallia Aquitanica, the province being famous for its trade in leather! Quilling no less absurdly conjectures a *Parca Itala* standing on the head of a *vitulus*! S. Reinach in the *Rev. Arch.* 1913 i. 29 says Ceres because (*a*) room must be found for Ceres somewhere, (*b*) she holds an object which may be a double torch, (*c*) a statuette in the British Museum, figured by S. Lysons *An account of Roman Antiquities discovered at Woodchester in the county of Gloucester* London 1797 p. 10 pls. 38 and 39 (Diana *Lucifera*), represents Ceres with her foot on the head of an ox. But (*a*) Ceres is more probably the goddess with corn-ears (*supra* n. 2), (*b*) Reinach's Ceres is holding no torch, but a sceptre in her left hand, a *patera* in her right (see Mrs Strong in the *Rev. Arch.* 1913 ii. 323 n. 1), (*c*) the marble statuette from Woodchester was labelled Luna by Sir A. W. Franks, presumably because the

Verticordia[1], the former with sceptre and *patera* setting her foot on a cow's head, the latter holding the scales of justice. Plenty, typified by Ceres with *patera* and corn-topped sceptre, is companioned by a pair of more martial virtues—Honour grasping a sheathed sword and a suit of captured armour, Prowess proudly displaying her banner[2]. Below these in turn is Victory, who having won her triumphs by land and sea stands with her palm-branch midway between Mars and Neptunus. The back of the column was designed with equal care. Diana figures next to her brother Apollo. Above her come two other deities closely associated in Gallic inscriptions[3]—Volcanus and Vesta[4]. Volcanus is aptly placed between

flame of a torch is visible against her right shoulder. But it is more likely that she is Iuno *Sancta*, the consort of Iupiter *Dolichenus* (*supra* i. 610 f.). The fragment of a triangular bronze plate, originally gilded, which was found at Aalen, shows this goddess standing on her cow (*supra* i. 619, O. von Sarwey—E. Fabricius *Der obergermanisch-raetische Limes des Roemerreiches* Lieferung xxiii no. 66 Heidelberg 1904 p. 15 f. with fig.).

[1] K. Körber saw in this figure Iustitia; A. von Domaszewski, Aequitas. A. Oxé took her to be Gallia Lugudunensis, the scales symbolising her trade and her mint. Quilling surmised a *Parca Gallica* for the same reason. S. Reinach in the *Rev. Arch.* 1913 i. 29 f. first showed that she is Venus *Verticordia* by comparing the *denarii* of the *gens Cordia*, on which Venus appears as here with a sceptre in her left hand and the scales in her right (Babelon *Monn. rép. rom.* i. 383 nos. 1 f. fig., *Brit. Mus. Cat. Rom. Coins* Rep. i. 523 f. pl. 51, 11 f.). Scales are an attribute that has come to Venus as mistress of hearts from the great mythological type of the ψυχοστασία (on which see O. Crusius in Roscher *Lex. Myth.* ii. 1143 f., R. Holland *ib.* ii. 2674 ff., O. Waser *ib.* iii. 3224 ff., F. Studniczka in the *Jahrb. d. kais. deutsch. arch. Inst.* 1911 xxvi. 131 ff.), itself based ultimately on a religious conception of the Otherworld (Gruppe *Gr. Myth. Rel.* pp. 681 n. 6, 863, Sir G. Maspero *The Dawn of Civilization*[4] London 1901 p. 190 f., A. Erman *A Handbook of Egyptian Religion* trans. A. S. Griffith London 1907 pp. 102, 230, A. Jeremias *Handbuch der altorientalischen Geisteskultur* Leipzig 1913 p. 113 f.). It is, however, probable that in imperial times Venus with the scales was regarded as a goddess meting out just measures like Aequitas or Iustitia or Moneta, who on Roman coins often have scales and *cornu copiae*, sceptre and *patera*, etc. (Aequitas: E. Aust in Pauly—Wissowa *Real-Enc.* i. 604 f., Rasche *Lex. Num.* i. 135 ff., Suppl. i. 282 ff. Iustitia: Stevenson—Smith—Madden *Dict. Rom. Coins* p. 499, Rasche *Lex. Num.* iv. 1243 ff., Suppl. iii. 287 f. Moneta: H. W. Stoll and W. Drexler in Roscher *Lex. Myth.* ii. 3200 f., Stevenson—Smith—Madden *Dict. Rom. Coins* p. 560 f., Rasche *Lex. Num.* v. 786—832). So, after all, K. Körber and A. von Domaszewski were not far wrong.

[2] The only dissentient is Quilling, who holds that these figures stand for *Roma deleta* and *Roma restituta*—a queer notion.

[3] *Corp. inscr. Lat.* xiii no. 1676 Lyon, an *epistylium* dedicated *Marti Vestae Volkano*, no. 2940 = Dessau *Inscr. Lat. sel.* no. 7050 Sens, the site of Agedincum Senonum, a *stylobates* dedicated by the same persons to *Mart. Volk. et deae sancti[s]s. Vestae.* On Vesta as paired with Volcanus see further Wissowa *Rel. Kult. Röm.*[2] p. 231.

[4] A. von Domaszewski makes this goddess Demeter to suit his neighbouring Persephone. A. Oxé completes his *tres Galliae* by interpreting her as Gallia Belgica, famous for its horse-breeding, chariot-making, etc.; Quilling, his *tres Parcae* by inventing a *Parca Germana* to serve as one of the Norns with her horse! There was more to be said (*pace* Mrs Strong) for the Epona of K. Körber. But I do not doubt that S. Reinach was right to insist in the *Rev. Arch.* 1913 i. 29 that the disputed figure is simply Vesta with her ass (on which see G. Wissowa *Gesammelte Abhandlungen zur römischen Religions-*

Honour and Prowess, for whom he forges the weapons of war. And Vesta is next to Venus, whose scales commemorate the penalty meted out to unfaithful Vestals[1]. Moreover, it will be observed that the back of this column is no less eloquent than the front. Vesta, Volcanus, Diana, Apollo—what are these but domestic and elemental fire, moonshine and sunshine, fit denizens for a veritable 'pillar of light'? Indeed, S. Reinach[2] points out that on the column as a whole all the twelve deities recognised by Ennius[3] find a place, dominated by the flashing figure of the sky-god. Our thoughts travel back to Platon, in whose cosmic scheme 'Zeus, the great chieftain in heaven,' followed by 'a host of gods and inferior deities,' comes 'by an uphill path to the summit of the heavenly vault,' thereby arriving at the apex of that 'straight light like a pillar' which stretches along the axis of the universe[4].

(η) Commemorative Columns.

The earlier type of 'Jupiter-column' was not without its influence on the great commemorative pillars of Rome and Constantinople. These masterpieces of columnar art were indeed no longer dedicated to the sky-god. But it must be remembered that latterly the emperor had stepped into the sky-god's shoes[5]. Trajan[6] and

und Stadtgeschichte München 1904 p. 67 ff., *id. Rel. Kult. Röm.*[2] p. 158, W. Warde Fowler *The Roman Festivals* London 1911 p. 148, *Journ. Hell. Stud.* 1894 xiv. 92).

[3] Ennius *frag.* 79 Baehrens *ap.* Ap. *de deo Socr.* 2 and Mart. Cap. 42 Iuno Vesta Minerva Ceres Diana Venus Mars | Mercurius Iovis Neptunus Volcanus Apollo.

A. von Domaszewski 'Die Iuppitersäule in Mainz' in the *Archiv f. Rel.* 1906 ix. 303—311 supposes that the column of Mogontiacum was a copy of one at Massilia erected between 17 and 12 B.C. He would recognise on it the twelve deities of the Massiliotes, *viz.* Zeus, Athena, Herakles, Hera, Apollon, Poseidon, Artemis, Ares, Hephaistos, Demeter, Persephone, Dionysos. This whimsical idea is brushed aside by E. Maass in the *Jahresh. d. oest. arch. Inst.* 1907 x. 85 and need not detain us.

Lat. sel.* no. 5503 from Perusia *diuo Antonino | Pio |... ... optimo maximoq. princ.*, cp. *Corp. inscr. Lat.* v no. 532 i 10=Wilmanns *Ex. inscr. Lat.* no. 693, 10=Dessau *Inscr. Lat. sel.* no. 6680 i 10 from Tergeste *apu(d) optimum principem Antoninum Aug. Pium*).

Fig. 57.

Copper coins of Tarsos represent Antoninus Pius enthroned as Zeus: he wears a *himation* wrapped about his legs and holds a wreath-bearing Nike in his right hand, a sceptre in his left (fig. 57=*Brit. Mus. Cat. Coins* Lycaonia, etc. p. 190 no. 160, cp. Rasche *Lex. Num.* ix. 580). Bronze medallions of Antoninus Pius have obv. DIVVS ANTONINVS head of

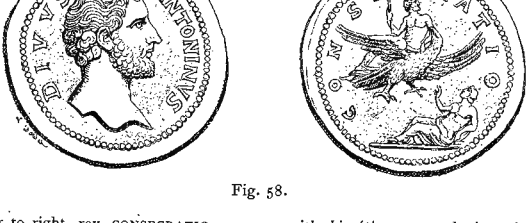

Fig. 58.

emperor to right, rev. CONSECRATIO emperor, with *himation* wrapped about legs and sceptre in right hand, borne aloft on the back of an eagle away from a reclining male figure

(Gnecchi *Medagl. Rom.* ii. 10 no. 6 pl. 43, 5, Fröhner *Méd. emp. rom.* p. 73 f. fig. (=my fig. 58), Cohen *Monn. emp. rom.*[2] ii. 287 no. 153 fig., Stevenson—Smith—Madden *Dict. Rom. Coins* p. 248 fig.): it seems probable that here too the divinised emperor is assimilated to the sky-god (Fröhner *loc. cit.*), though this is certainly not proved by the presence of the eagle as carrier; indeed the late *motif* of Zeus seated or recumbent on an eagle, which occurs on coins of Alexandreia (*Brit. Mus. Cat. Coins* Alexandria p. 48 no. 397 and 398 (=my fig. 59) Trajan pl. 1, *Hunter Cat. Coins* iii. 433 no. 241 Trajan, Overbeck *Gr. Kunstmyth.* Zeus pp. 264, 602 Münztaf. 3, 30; *Brit. Mus. Cat. H. Hayles), p. 203 no. 1357: see further Overbeck *Gr. Kunstmyth.* Zeus pp. 263—266, Müller—Wieseler—Wernicke *Ant. Denkm.* i. 45 f. pl. 4, 6), is itself presumably derived from the *consecratio*-type (K. Sittl *Der Adler und die Weltkugel als Attribute des Zeus* (Besonderer Abdruck aus dem vierzehnten Supplementbande der Jahrbücher für classische Philologie) Leipzig 1884 p. 37 f., L. Deubner 'Die Apotheose des Antoninus Pius' in the *Röm. Mitth.* 1912 xxvii. 1—20 figs. 1—4. See further an interesting chapter in F. Cumont *Études Syriennes* Paris

1917 pp. 35—118 ('L'aigle funéraire d'Hiérapolis et l'apothéose des empereurs')). The reverse design of the medallions of Antoninus Pius is best explained by comparison with the southern or principal relief on the marble base of his column, now in the apse of the Giardino della Pigna at the Vatican (Amelung *Sculpt. Vatic.* i. 883 ff. no. 223 pls. 116 (=my fig. 65)—118, W. Helbig *Führer durch die öffentlichen Sammlungen*

Fig. 64.

klassischer Altertümer in Rom[3] Leipzig 1912 i. 74 f. no. 123, Mrs A. Strong *Roman Sculpture from Augustus to Constantine* London 1907 p. 270 ff. pl. 82, Reinach *Rép. Reliefs* i. 291 f.). This relief represents the Dea Roma seated on the right, the personified Campus Martius reclining on the left: the former uplifts her right hand in greeting, the latter clasps with his left the obelisk of Augustus (Plin. *nat. hist.* 36. 72); between them is a pile of weapons. Soaring up into the air is a youthful *genius*, who in his left hand bears a globe marked with zodiac (Pisces, Aries, Taurus), moon, and stars, and a snake resting upon it. Above his broad wings are seen the half-length figures of Antoninus Pius with eagle-sceptre and Faustina Senior with veil, crown, and sceptre. Flanked by a pair of eagles, the emperor and his wife are probably conceived as the new rivals of Iupiter and Iuno (R. Foerster *Die Hochzeit des Zeus und der Hera* (*Winckelmannsfest-Progr. Breslau* 1867) p. 34 n. 5).

In the Hope collection at Deepdene was a fine statue of Zeus, erect with an eagle beside him, in Thasian marble, transformed into Antoninus Pius by the addition of a modern head and neck (A. Michaelis *Ancient Marbles in Great Britain* trans. C. A. M. Fennell Cambridge 1882 p. 282 no. 5, *Hope Sale Catalogue* London 1917 p. 42 no. 253).

the titles of Iupiter. Marcus Aurelius[1], too wise to ape divinity, was

Fig. 65.

[1] Bronze medallions struck in the year 168 A.D. have as their reverse type a colossal Iupiter, with thunderbolt and sceptre, protecting beneath his spread cloak the diminutive figures of Marcus Aurelius and Lucius Verus (Gnecchi *Medagl. Rom.* ii. 33 no. 52 f. pl. 63, 3 f., Fröhner *Méd. emp. rom.* p. 91 f. figs., *Brit. Mus. Cat. Medallions* p. 14 no. 10 pl. 21, 1, Cohen *Monn. emp. rom.*[2] iii. 87 no. 886 f. fig.): cp. *supra* i. 276 n. 5 fig. 201.

recognised at least as the *protégé* of Iupiter and the imitator of Zeus. Even the late Roman emperors inherited the same tradition and viewed themselves as the viceroys of Iupiter *Capitolinus*[1]. Hence the comparison of the Germanic with the classical column is not far-fetched or unreal. The smooth variety of the former supporting the figure of Iupiter *Optimus Maximus*[2] may fairly be regarded as analogous to the column of Antoninus Pius[3], a plain granite shaft, on which stood the divinised emperor, *optimus maximusque princeps*[4], holding —if coins can be trusted—the eagle and sceptre (figs. 66—67)[5] of

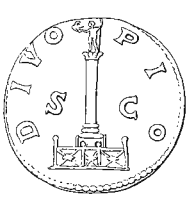

Fig. 66. Fig. 67.

Iupiter. Again, monuments like that of Mogontiacum[6] showed the possibilities of columnar relief and furnished a starting-point for yet more ambitious efforts, the columns of Trajan (figs. 68—69)[7] and

Ioul. *symp.* 333 B ff. describes Marcus Aurelius as an imitator of the gods, who acted κατὰ μίμησιν τοῦ μεγίστου Διός (334 D) and was fain to follow the lead of both Zeus and Kronos (335 D). He too is *optimus* (*Corp. inscr. Lat.* xiv no. 4003 = Orelli *Inscr. Lat. sel.* no. 3364 = Dessau *Inscr. Lat. sel.* no. 6225 Ficulea) and *maximus* (*Corp. inscr. of decoration were by a stroke of genius transformed into a continuous spiral[4], and the *columna cochlis* was thus enabled to set forth in stately sequence or effective episode the deeds by which the immortal had won his immortality.

'Their subject triumphed up from man to God.'

This marble column was erected by Theodosios i in 386 A.D. to commemorate his successful campaign against the Scythians, *i.e.* the Greuthungi, whom he drove out of Thrace. It stood in the seventh region of Constantinople, on the third hill, which went by the name of Tauros. It supported a statue of Theodosios, which was overthrown in 480 A.D. by an earthquake and replaced in 506 A.D. by a colossal bronze figure of Anastasios. This in turn was probably destroyed in 512 A.D., the summit of the column thenceforward being left vacant. The column itself was demolished by the Sultan Bajazet ii (1481–1512 A.D.), because it hindered the construction of his magnificent Baths. Drawings of its spiral relief-band, made by an Italian artist (Gentile Bellini?), were published by C. F. Menestrier *Description de la belle et grande Colonne historiée, dressée à l'honneur de l'Empereur Théodose, dessinée par G. Bellin* Paris 1702 with 16 pls., *id. Columna Theodosiana* s.l. (Venice?) s.a. (1765?) with 18 pls., A. Banduri *Imperium Orientale sive Antiquitates Constantinopolitanæ* Parisiis 1711 ii. 506 ff. pls. 1—18, and in reduced form by Reinach *Rép. Reliefs* i. 103—111.

Unger *Quellen der byzantinischen Kunstgeschichte* Wien 1878 i. 179 ff. nos. 434—447, J. Strzygowski 'Die Säule des Arkadius in Konstantinopel' in the *Jahrb. d. kais. deutsch. arch. Inst.* 1893 viii. 230—249, A. Geffroy 'La colonne d'Arcadius à Constantinople d'après un dessin inédit' in the *Mon. Piot* 1895 ii. 99—130, T. Reinach 'Colonne d'Arcadius' in the *Rev. Ét. Gr.* 1896 ix. 78—82, O. M. Dalton *Byzantine Art and Archaeology* Oxford 1911 pp. 123, 144. This column, a pendant to that of Theodosios i, stood in the twelfth region, on the seventh hill, which was called Xerolophos. It was begun by Arkadios in 403 A.D. and finished by his son Theodosios ii, who in 421 A.D. placed a statue of Arkadios on its summit. The column was repeatedly damaged by lightning or earthquakes, and in 740 A.D. its statue fell. After the earthquake of 1719 A.D. the Turks decided to pull down the shaft; but its square base, much defaced by fire and neglect, still stands. The *rotulus* in all probability represented the war of 400 A.D. against the rebel Goth Gaïnas. The upper portion of the relief, drawn by Melchior Lorich (1557—1559 A.D.), was brought to light by A. Michaelis in the *Jahrb. d. kais. deutsch. arch. Inst.* 1892 vii. 91 f.; and a view of the whole column, drawn perhaps for M. de Nointel the French ambassador at Constantinople (1670 A.D.), was published by A. Geffroy in the *Mon. Piot* 1895 ii. 99—130 pls. 10—13: cp. Reinach *Rép. Reliefs* i. 106 ff.

[4] I do not, of course, mean to imply that this was the first application of the spiral *motif* to architecture. Such decoration had long since had a wide vogue: see V. Chapot *La colonne torse et la décoration en hélice dans l'art antique* Paris 1907 pp. 1—176 with 210 figs. But this appears to be our earliest example of a spiral relief being used on a large scale to represent human figures in continuous action.

Here in truth was the 'uphill path' of ancient faith[1] convincingly filled with modern meaning. In the case of the Trajanic column—the first of its kind and the pattern for posterity—this celestial track led up and up to a plinth shaped like a hemisphere, on the top of which stood the figure of the divinised emperor (fig. 70[2]). His position recalls that of the immortals in the *Phaidros*, who 'go outside when they are come to the topmost height, and stand on the outer surface of heaven[3],' there to witness sights of unspeakable splendour. What the effect of this great pillar must have been on the popular mind, it is not hard to guess:

Fig. 70.

> They climbed the steep ascent of heaven
> Through peril, toil and pain.
> O God, to us may grace be given
> To follow in their train.

(θ) The Trophy.

But if the Germanic *Irminsûl* contributed something to the monumental art of Rome, it had points of contact also with the religious life of Greece. 'Jupiter-columns' were found as far south as the confines of Thrace. C. Jullian[4] quotes a passage of Valerius Flaccus, in which they are ascribed to the Coralli, a blonde[5] Sarmatian[6] tribe settled at the foot of Mount Haimos[7]. The poet is describing the hosts led by Perses against his brother Aietes:

> Next Phalces drives his bronze cloud o'er the plain
> With echoing cries, and the Corallians all
> Uplift their banners, who for ensigns bear
> Barbaric wheels and boars of jaggy back

[7] Strab. 318.

And pillars lopped to be Jove's effigies.
Not theirs to fire the fray with bellowing horn :
True home-bred chiefs and prowess old they chant,
Till praise o' the past begets new valiancy[1].

The name *Phalces* means a 'beam[2],' being in fact the same word as our 'balk' of timber[3]. If we may assume that this name was traditional[4], it points perhaps to the existence of a pillar-cult among the Coralli[5]. However that may be, the 'pillars lopped to be Jove's effigies' were doubtless tree-trunks shorn of their boughs and viewed as vehicles of the sky-god. As such they had their parallel in the trophy-stand common throughout the classical area (figs. 71[6], 72[7], etc.[8]), a trimmed oak-trunk which likewise could be called the image of Zeus[9]. Moreover, just as the *Irminsûl* developed into the richly-carved column of Mogontiacum, so the rude trophy-log gave rise to such monuments as

[2] Poll. 1. 85 τὸ δὲ τῇ στείρᾳ προσηλούμενον φάλκης, ἐφ' οὗ ἡ δευτέρα τρόπις.

[3] Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] p. 481 cp. p. 480 *s.v.* φάλαγξ and p. 491 *s.v.* φλία, F. Kluge *Etymologisches Wörterbuch der deutschen Sprache*[6] Strassburg 1899 p. 28 *s.v.*

'Balken,' J. H. Murray *A New English Dictionary on Historical Principles* Oxford 1888 i. 636 *s.v.* 'Balk, baulk.'

[4] The same name was borne by a leader of the Trojans (*Il.* 13. 791, 14. 513) and by a son of the Argive Temenos (on whom see H. W. Stoll in Roscher *Lex. Myth.* iii. 2243).

[5] R. Meringer 'Zum verehrten Pflock' in *Wörter und Sachen* 1909 i. 199—204 thinks it possible that *Phol*, a Germanic deity mentioned in the second Merseburg charm, who has been identified with a variety of unpromising persons (*e.g.* Balder, Apollo, and even the Apostle Paul: see P. D. Chantepie de la Saussaye *The Religion of the Teutons* Boston and London 1902 p. 126 ff., E. Mogk in the *Grundriss der germanischen Philologie*[2] Herausgegeben von H. Paul Strassburg 1900 iii. 324), was a sacred post comparable with such divinities as Iupiter *Tigillus* (Aug. *de civ. Dei* 7. 11 dixerunt eum (*sc.* Iovem)... Tigillum...quod tamquam tigillus mundum contineret ac sustineret etc.), his name being related to the Latus *palus*, 'Pfahl.' Meringer's suggestion is attractive, but not altogether free from phonetic difficulties.

[6] The trophy is very frequent as a design on Greek and Roman coins: see the classified list in Rasche *Lex. Num.* x. 201—255, and, for illustrations, Anson *Num. Gr.* ii. 106 ff. nos. 1152—1220 pl. 23 f. I give three typical examples.

Fig. 71 is a silver tetradrachm struck at Syracuse by Agathokles *c.* 310—304 B.C. (*Brit. Mus. Cat. Coins* Sicily p. 195 f. fig., *Hunter Cat. Coins* i. 238 pl. 17, 16, G. F. Hill *Historical Roman Coins* London 1909 p. 100 f. pl. 11, 58): obv. female head wearing oak-leaves and jewellery; behind ⊥II; rev. trophy of Gallic arms (tunic, horned helmet, shield, *kárnyx*); on the right, an axe adorned with an animal's head; across the field CAE SAR.

[9] The best collection of evidence with regard to trophies is that by A. Reinach in Daremberg—Saglio *Dict. Ant.* v. 497—518: see also Boetticher *Baumkultus* pp. 71 ff., 209, 231 figs. 55, 63, P. Wagler *Die Eiche in alter und neuer Zeit* Berlin 1891 ii. 20 ff., and some remarks of mine in the *Class. Rev.* 1904 xviii 364 f., 372 n. 19, *Folk-Lore* 1904 xv. 373 n. 25, *ib.* 1905 xvi. 319 f.

The Greek trophy was dedicated to Zeus Τροπαῖος (Soph. *Ant.* 141 ff. ἑπτὰ λοχαγοὶ γὰρ ἐφ' ἑπτὰ πύλαις | ταχθέντες ἴσοι πρὸς ἴσους ἔλιπον | Ζηνὶ Τροπαίῳ πάγχαλκα τέλη, *Corp. inscr. Gr.* i no. 173, 1 f. = Cougny *Anth. Pal. Append.* 2. 39*a* Athens [*εἰ*] τοιῶνδ' ἀνδρῶν εἴη πόλις, οὔποτ' ἂν αὐ[τῆς] | | [*ἐ*]χθροὶ στήσαιεν Ζηνὶ τροπαῖον ἔδος, *et. mag.* p. 768, 51 ff. Τροπαῖα (*sic*). ἡ "Ηρα, διὰ τὸ τὰ τρόπαια...μὴ μόνον Διὶ ἀνατίθεσθαι ἀλλὰ καὶ τῇ "Ηρᾳ, Tzetz. *in* Lyk. *Al.* 1328 Τροπαίας δὲ τῆς "Ηρας, παρ' ὅσον καὶ αὐτῇ οἱ νικῶντες ὥσπερ τῷ Διὶ τρόπαιον ἀνετίθεσαν), who was worshipped by the Dorians at Sparta (Paus. 3. 12. 9 τοῦ δὲ Τροπαίου Διὸς τὸ ἱερὸν ἐποίησαν οἱ Δωριεῖς πολέμῳ τούς τε ἄλλους Ἀχαιούς, οἱ γῆν τὴν Λακωνικὴν τηνικαῦτα εἶχον, καὶ τοὺς Ἀμυκλαιεῖς κρατήσαντες), by the Athenians at Salamis (*Corp. inscr. Att.* ii. 1 no. 467, 27 f. = Dittenberger *Syll. inscr. Gr.*[3] no. 521, 27 f. = Michel *Recueil d'Inscr. gr.* no. 610, 27 f. an ephebic decree of 100/99 B.C. προαναπλεύσαντες δὲ καὶ ἐπὶ τρόπαιον ὃυσὶ πλοίοις ἔθυσαν τῷ Διὶ τῷ Τρο|παίῳ, cp. *Corp. inscr. Att.* ii. 1 no. 469, 17 f., *ib.* ii. 1 no. 471, 28 f., where the same *formula* is used), and by the Pergamenes (M. Fränkel *Die Inschriften von Pergamon* Berlin 1895 i. 136 f. no. 237, 1 ff. = Dittenberger *Orient.*

that of La Turbie near Monaco (fig. 74)[1] or that of Adamklissi

Gr. inscr. sel. no. 300, 1 ff. on the lintel of a door, found in a Byzantine wall on the south side of the Agora, inscribed in lettering of the second century B.C. ['Α]πολλόδωρος 'Αρτέμωνος, Διονύσιος Νουμηνίου, 'Αριστόβουλος 'Ηρακλείδου | [νο]μοφύλακες Διὶ Τροπαίωι καὶ τῶι δήμωι τό τε θύρωμα καὶ τὰς παραστάδας | [κ]αὶ τὴν ἐν [τῶ]ι νομοφυλακίωι ἐπισκευὴν καὶ τὰς παραθυρ[ίδας], Fränkel *op. cit.* i. 160 ff. no. 247 ii, 2 ff. κατ[ὰ] ψήφισμα ἐπὶ Πύρρου τοῦ 'Αθη|νοδώρου διὰ τὴν γενομένην ὑπὸ | τοῦ Διὸς τοῦ Τροπαίου ἐπιφάνειαν) : he was also invoked as giver of victory on the Attic stage (Soph. *Trach.* 303 ὦ Ζεῦ Τροπαῖε, Eur. *Heracl.* 867 ὦ Ζεῦ Τροπαῖε, *El.* 671 ὦ Ζεῦ Πατρῷε καὶ Τροπαῖ' ἐχθρῶν ἐμῶν). Cp. Schöll—Studemund *anecd.* i. 265 no. 97 τροπαίου, 267 no. 92 τροπαίου.

Similarly the Greeks recognised Zeus Τροπαιοῦχος (Aristot. *de mundo* 7. 401 a 22 f. καὶ στράτιος καὶ τροπαιοῦχος cp. Poll. 1. 23 f. θεοὶ...στράτιοι, τροπαιοῦχοι, Cornut. *theol.* 9 p. 9, 16 f. Lang καὶ τροπαιοῦχον...αὐτὸν (*sc.* τὸν Δία) προσαγορεύουσιν), who was worshipped at Attaleia in Pamphylia (*Corp. inscr. Gr.* iii Add. no. 4340 *f*, 5 ff. Γαΐου Αἰκιννίου, Φλαμ[ένος,] | ἐπάρχου τεχνε[ιτῶν καὶ ἱερέως διὰ βίου Διὸς Τροπαιούχου, *ib.* iii Add. no. 4340 *g*, 4 ff. a second base bearing the same honorary inscription of early Roman date) and probably elsewhere—since Othryades the Spartan after the fight with the Argives at Thyrea is said to have dedicated his trophy (fig. 73 from an engraved cornelian of Augustan date, in my wife's possession, to a scale of $\frac{2}{1}$: see also Furtwängler *Ant. Gemmen* i pl. 23, 1, 5, 8—14, ii. 112 f.) to Zeus under this title (Plout. *parall. Gr. et Rom.* 3 τρόπαιον στήσας ἐκ τοῦ ἰδίου αἵματος ἐπέγραψε Διὶ Τροπαιούχῳ) and since Ζεὺς Τροπαιοῦχος was a possible equivalent for *Iupiter Feretrius* (Dion. Hal. *ant. Rom.* 2. 34 τὸν δὲ Δία τὸν Φερέτριον, ᾧ τὰ ὅπλα ὁ Ῥωμύλος ἀνέθηκεν, εἴτε βούλεταί τις Τροπαιοῦχον, εἴτε Σκυλοφόρον καλεῖν, ὡς ἀξιοῦσί τινες, εἴθ', ὅτι πάντων ὑπερέχει καὶ πᾶσαν ἐν κύκλῳ περιείληφε τὴν τῶν ὄντων φύσιν τε καὶ κίνησιν, Ὑπερφερέτην, οὐχ ἁμαρτήσεται τῆς ἀληθείας).

Fig. 73.

In the *res gestae divi Augusti* 19 p. 22 f. Diehl *aedés in Capitolio Iovis Feretrí et Iovis Tonantis* is rendered ναοὺς ἐν Καπιτωλίῳ Διὸς Τροπαιοφόρου καὶ Διὸς Βροντησίου.

Just as the lopped pillars of the Coralli were called *Iovis simulacra* (*supra* p. 109 n. 1) or the high oak of the Celts ἄγαλμα Διός (Max. Tyr. *diss.* 8. 8 Dübner Κελτοὶ σέβουσι μὲν Δία, ἄγαλμα δὲ Διὸς Κελτικὸν ὑψηλὴ δρῦς, on which see *Folk-Lore* 1906 xvii. 53), so the trophy is regarded by Euripides as the actual image of Zeus (Eur. *Heracl.* 936 f. Ἄλλος μὲν οὖν ὅ τ' ἐσθλὸς 'Ιόλεως βρέτας | Διὸς Τροπαίου καλλίνικον ἵστασαν, *Phoen.* 1250 f. Πολύνεικες, ἐν σοὶ Ζηνὸς ὀρθῶσαι βρέτας | τροπαῖον, 1472 f. ὡς δ' ἐνικῶμεν μάχῃ, οἱ μὲν Διὸς τροπαῖον ἵστασαν βρέτας, cp. *suppl.* 647 f. πῶς γὰρ τροπαῖα Ζηνὸς Αἰγέως τόκος | ἔστησεν οἵ τε συμμετασχόντες δορός;). But it is far from clear that this was the original intention (see W. H. D. Rouse *Greek Votive Offerings* Cambridge 1902 p. 99, *Class. Rev.* 1904 xviii. 365, A. Reinach in Daremberg—Saglio *Dict. Ant.* v. 497 f.).

[1] O. Benndorf *La trophée d'Auguste près de Monaco* (*La Turbie*) Paris 1904, Durm *Baukunst d. Röm.*[2] p. 733 f. fig. 803, J. C. Formigé 'Le trophée de la Turbie' in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1910 pp. 76—87 with 3 figs., C. J. Formigé 'Le trophée d'Auguste' *ib.* 1910 pp. 509—516 with 11 figs. and 2 pls., F. Lübker *Reallexikon des klassischen Altertums*[8] Leipzig-Berlin 1914 p. 50, A. Reinach in Daremberg—Saglio *Dict. Ant.* v. 512 fig. 7122. The *tropaeum Alpium* (Plin. *nat. hist.* 3. 136) or τρόπαια Σεβαστοῦ (Ptol. 3. 1. 2, whence *Torbía, Turbía, Turbie*) commemorated the submission of 46 Alpine tribes. This great trophy was erected in 7/6 B.C. on the summit of La Corniche (454[m] above Monaco), marking at once the highest point of the pass over the Maritime Alps and the frontier between Italy and Gaul (G. Parthey—M. Pinder *Itinerarium Antonini Augusti et Hierosolymitanum* Berolini 1848 p. 141=p. 296, 3 f. Wesseling). On a paved platform (38[m] square), bordered by boundary stones (12 a side), stood a plinth (27[m] square, 5[m] high) supporting a rotunda (18[m] in diameter, *c.* 13[m] high) surrounded by 24 Doric columns (8.80[m] high) with a stepped stylobate (3[m] high) and

(fig. 75)[8] with their wealth of architectural and sculptural decoration.

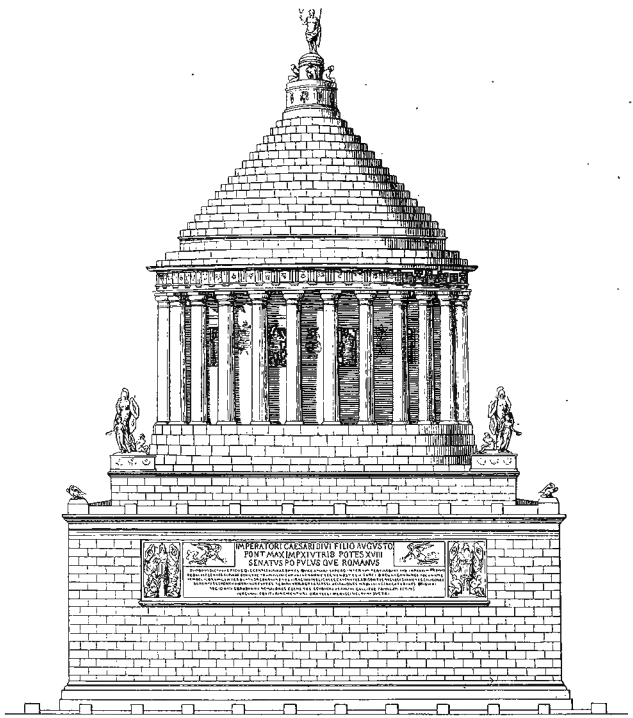

Fig. 74.

entablature (2[m] high). From this rose a pyramid of steps topped by a colossal trophy. The total height was some 46[m]. The metopes of the rotunda showed garlanded *bucrania* alternating with military or naval spoils. And on the east face of the plinth was an inscription (quoted in full by Plin. *nat. hist.* 3. 136 f.: fragments in *Corp. inscr. Lat.* v no. 7817) flanked by Victories and Gallic trophies in relief.

(*i*) The Pillar of Light and the Soul-Ladder.

So, then, the *Irminsûl*, the pillar of the sky-god *Er* or *Irmin*[1] was a familiar sight to dwellers on the Thracian frontier. And Platon—it will be remembered—conceives of *Er* son of *Armenios* as standing on 'a straight light like a pillar[2].' I have already ventured to connect the Germanic cult with the Greek myth[3]: I would now add the conjecture that the link between Germany and Greece was Thrace, and that the myth in question reached Platon through Orphic channels. If so, we might look to find either among the Thracians or among the Orphists some trace at least of the 'light like a pillar' and of the allied belief in a soul-path leading up to the summit of the heavenly vault. In point of fact there is evidence of both.

In Krastonia we hear of 'a sanctuary of Dionysos, large and fine, where during the festival and sacrifice, if the god is about to cause a good year, there appears a great gleam of fire seen by all in the precinct, if a bad season, the light dôes not appear but darkness covers the place as on ordinary nights[4].' It would seem that in this Thracian[5] cult the presence of the god was betokened by a great

figs. 805—807, Reinach *Rép. Reliefs* i. 428—442, F. Lübker *Reallexikon des klassischen Altertums*[8] Leipzig-Berlin 1914 p. 9, A. Reinach in Daremberg—Saglio *Dict. Ant.* v. 513 f. fig. 7123. The *tropaeum Trajani* (the name is certified by inscriptions for the neighbouring town, which was presumably called after this famous monument) stands in the Roumanian district of Dobroudja not far from the site of Tomis (*Kostendje*), on the coins of which it appears in a simplified form (Rasche *Lex. Num.* ix. 1394 a 'third brass' of Trajan with rev. ΤΟΜΙΤΩΝ 'tropaeum in cippo,' Head *Hist. num.*[2] p. 276 'Trophy between captives,' F. Imhoof-Blumer *Die antiken Münzen Nord-Griechenlands* i Dacien und Moesien von B. Pick und K. Regling Berlin 1910 ii. 635, 680 f. nos. 2600 pl. 7. 1, 2601—2603). It was erected probably in 103 A.D. by Trajan, and it was dedicated to Mars *Ultor* possibly on the spot where in 87 A.D. Cornelius Fuscus had been defeated and slain by the Dacians (C. G. Brandis in Pauly—Wissowa *Real-Enc.* iv. 1966). From a circular stepped base rises a cylindrical drum (20^{m} in diameter, 8^{m} high) formerly adorned with triglyphs and 50 sculptured metopes, a frieze of arms, and a projecting cornice, which supported a crenelated parapet. The 50 battlements have reliefs representing barbarian prisoners with lions as gargoyles between them. Higher up comes a truncated cone, once covered with scale-like tiles and topped by a hexagonal plinth (8^{m} high), on which rested a huge trophy (8^{m} high) facing east with a barbarian standing before it and two female captives seated to right and left of it. The dedication (*Corp. inscr. Lat.* iii no. 12467) was on the eastern side of the hexagon.

[4] Aristot. *mir. ausc.* 122 ἔστι δὲ καὶ ἄλλο αὐτόθι (*sc.* ἐν τῇ Κραστωνίᾳ παρὰ τὴν Βισαλτῶν χώραν) ἱερὸν Διονύσου μέγα καὶ καλόν, ἐν ᾧ τῆς ἑορτῆς καὶ τῆς θυσίας οὔσης λέγεται, ὅταν μὲν ὁ θεὸς εὐετηρίαν μέλλῃ ποιεῖν, ἐπιφαίνεσθαι μέγα σέλας πυρός, καὶ τοῦτο πάντας ὁρᾶν τοὺς περὶ τὸ τέμενος διατρίβοντας, ὅταν δ' ἀκαρπίαν, μὴ φαίνεσθαι τοῦτο τὸ φῶς, ἀλλὰ σκότος ἐπέχειν τὸν τόπον ὥσπερ καὶ τὰς ἄλλας νύκτας.

[5] Steph. Byz. *s.v.* Κρῆστων· πόλις Θρᾴκης (cp. *ib. s.v.* Γρηστωνία· χώρα Θρᾴκης πρὸς τῇ Μακεδονίᾳ), Tzetz. *in* Lyk. *Al.* 937 Κρηστών<η> πόλις Θρᾴκης. Κρηστώνη δὲ ἡ Θρᾴκη

blaze or shaft of light. Similarly in the *Bakchai* of Euripides the voice of Dionysos is heard from the upper air addressing his Maenads:

> So spake he, and between the heaven and earth
> Set up a standing light of holy fire[1].

This Dionysiac pillar of light is presumably a genuine Thracian touch. Again, Thrasyboulos in his nocturnal march from Phyle to Mounychia (403 B.C.) was guided by a pillar of fire and, where it vanished, built an altar to *Phosphóros*, the 'Light-bearing' goddess[2]. Since at Mounychia his troops occupied the precincts of Artemis and of the Thracian Bendis[3], it is very possible that here too Thracian influence was at work.

In view of the kinship between Thracians and Phrygians it should be noticed that the pillar of fire reappears in a Phrygian miracle. The pagans of Laodikeia, wishing to flood the prayer-house and holy well of Saint Michael, made a new bed for the neighbouring streams Kouphos and Lykokapros. Thereupon, in answer to the prayers of the hermit Archippos, the archangel manifested himself, with a crash of thunder, in the form of a fiery pillar stretching from earth to heaven. Extending his right hand he split a gigantic rock, and bade the waters flow through the cleft of Chonai with renewed powers of healing[4].

ἀπὸ πόλεως μιᾶς οὕτω καλουμένης. On Thracian tribes in this district see O. Hoffmann *Die Makedonen, ihre Sprache und ihr Volkstum* Göttingen 1906 p. 117.

[4] M. Bonnet *narratio de miraculo a Michaele Archangelo Chonis patrato* adjecto Symeonis Metaphrastae de eadem re libello in the *Analecta Bollandiana* Paris-Bruxelles

A similar manifestation is recorded in the life of Saint Sabas (Dec. 5), founder of the famous monastery near Jerusalem, who one night saw a pillar of fire connecting earth with heaven and found beneath it a cave well suited to serve as a church[1]. Sabas was a Cappadocian by birth; and it is perhaps more than a coincidence that another Cappadocian, Saint Basil the Great, appeared in a vision to Saint Ephraem the Syrian as a column of fire reaching to the sky[2]. Accordingly Saint Basil (June 14) is sometimes represented in art with a column of fire near by and a dove at his head[3], Saint Ephraem (Jan. 28 or Feb. 1 and July 9) with a pillar of light before him[4]. In the case of Celtic and Saxon saints the said pillar is almost a commonplace. When Saint Bridget of Kildare (Feb. 1) received the veil from Bishop Maccail at Usny Hill, Westmeath, a flame shaped like a column appeared above her[5]. So too when Saint Brioc of Brittany (May 1), son of an Irish father by a Saxon mother, was being ordained, a column of fire rose to the roof above his head[6]: he is sometimes figured with this attribute[7]. A column of fire likewise appeared on the head of Saint Cuthbert (March 20), while he was abbot of Melrose[8]. A pillar of light was seen shining over the thicket, where the body of Saint Kenelm (July 17 and

Dec. 13), the little king of Mercia, lay hidden[1]. A column of light protected the church at Deventer, beneath which was the grave of Saint Lebuinus (Nov. 12)[2]. A column of light gleamed above Saint Livinus of Ghent (Nov. 12) at his baptism in Ireland[3]. A column of fire was beheld by Saint Keyne of Wales (Oct. 8), when she lay dying in her cell[4]. Etc. etc. Hagiography, like history, tends to repetition.

As to the soul-path, an Orphic poem in praise of the cosmic Zeus speaks of the sky as his face, the clustering stars as his golden locks, the sun and moon as his eyes[5], and in the midst of this pantheistic extravaganza declares :

> Two golden bull's-horns stretch on either side--
> The east and west, roads of the heavenly gods[6].

The poet is describing the Galaxy from an Orphic view-point. Quintus Smyrnaeus too, when he makes the ghost of Achilles appear by night to his son and demand the sacrifice of Polyxene, ends with an Orphic or Pythagorean flourish :

> Then like a waft of wind he leapt away,
> So reached the Elysian plain, where there is wrought
> Ascent and descent from the heaven's height
> For blest immortals[7].

The same notion, complicated by a reminiscence of the *Phaidros*[8], marks the close of Lucian's *Demosthenes* :

'Enough ; the man has gone his way, to live the life they tell of in the Isles of the heroic Blest, or to walk the paths that, if tales be true, the heaven-bound

[3] *Inscr. Gr. Sic. It.* no. 641 i, 2 f. Εὐκλῆς Εὐβουλεύς τε καὶ ἀ|θάνατοι θεοὶ ἄλλοι, cp. *ib.* ii, 3 f. Εὔκλε καὶ Εὐβουλεῦ καὶ θεοὶ δαίμο[ν]|ε(ς) ἄλλοι, iii, 2 ff. (E)ὔκλεια κα(ὶ) Εὐ|βο(υ)λεῦ καὶ θεοὶ ὅσοι δ(αί)μο|νες ἄλλο(ι). Εὐκλῆς or Εὔκλος is a euphemistic name for Hades (Hesych. εὐκλής· ὁ αἰδης. καὶ ὀνομαστός. καὶ εὐειδής (sic cod. εὐκλείης· ὁ αἰδήμων Musurus: M. Schmidt *ad loc.* cj. that there is a confusion in the text between εὐκλής· ὁ Ἄιδης, 'bene obseratus,' and εὐκλεής. F. Bücheler in the *Rhein. Mus.* 1881 xxxvi. 333 restores Εὐκλῆς· Ἄιδης)) like Εὐβουλεύς, Εὐειδής, Εὐχαίτης etc. (Rohde *Psyche*[2] p. 206 f., O. Jessen in Pauly—Wissowa *Real-Enc.* vi. 862, 880, 1053, *infra* Append. M). It probably occurs on a bronze tablet from Agnone, now in the British Museum, as part of a lengthy Oscan inscription: *Evklúí statíf...Evklúí Pateref statíf...Evklúí..., i.e.* 'Euclo statua... Euclo Patri statua...Euclo...' (see J. Zvetaieff *Sylloge inscriptionum Oscarum* Petropoli 1878 p. 6 ff. no. 9 pl. 2, *id. Inscriptiones Italiae Inferioris dialecticae* Mosquae 1886 p. 32 ff. no. 87, R. S. Conway *The Italic Dialects* Cambridge 1897 i. 191 ff. Oscan no. 175, C. D. Buck *A Grammar of Oscan and Umbrian* Boston, U.S.A. 1904 p. 254 ff. Oscan no. 45). Conway *op. cit.* ii. 619 and Buck *op. cit.* pp. 20, 46 treat *Evklúí* as Εὐκόλῳ, an epithet of Hermes at Metapontum (Hesych. *s.v.* Εὔκολος, *Anth. Pal.* 9. 72. 1 Antipatros: O. Jessen in Pauly—Wissowa *Real-Enc.* vi. 1055 f.). But Εὔκολος as epithet of a chthonian power (Aristoph. *ran.* 82 ὁ δ' εὔκολος μὲν ἐνθάδ', Εὔκολος δ' ἐκεῖ involves a pun) may be only the last term of the series Εὐκλεής, Εὐκλῆς, Εὔκλος, Εὔκ(ο)λος. This is seen by J. H. Wieten *op. cit.* p. 31 ff., though I should not agree with his contention that the whole series was *ab initio* an appellative of Hermes. Cp. Zeus Εὔκλειος (Bakchyl. 1. 6 ff. [Δ]ιὸς Εὐκλείου δὲ ἕ[κ]α|τι βαθύζωνον κόραν | [Δ]εξιθέαν δάμασεν *sc.* Minos), Εὔκλεια or Artemis Εὔκλεια (O. Jessen in Pauly—Wissowa *Real-Enc.* vi. 996 ff.), the festival Εὔκλεια (Nilsson *Gr. Feste* p. 237 f.), and the month Εὔκλειος (E. Bischoff 'De fastis Graecorum antiquioribus' in the *Leipziger Studien zur classischen Philologie* Leipzig 1884 vii. 372 ff., W. Dittenberger in Pauly—Wissowa *Real-Enc.* vi. 1052 f.).

[4] H. W. Stoll in Roscher *Lex. Myth.* i. 1397, S. Reinach in Daremberg—Saglio

be itself one of the same happy kindred, brought low by 'Fate and star-flung Thunderbolt[1].' In the oldest and most accurate of the tablets, which is inscribed with fourth-century characters and composed throughout in the dialect of Thourioi, the speaker goes on to say :

I have flown out of the sorrowful weary Round ;
I have entered with quick feet upon the lovely Crown[2].

Dict. Ant. ii. 849 f., O. Jessen in Pauly—Wissowa *Real-Enc.* vi. 861—869. *Supra* i. 212, 221 (?). Cp. Zeus Εὐβουλεύς (*supra* i. 669 n. 2, 717 n. 3, *infra* § 3 (a) iii (ψ)). It is not improbable that here, as in Orph. *h. Phers.* 29. 8, *h. Dion.* 30. 6, *h. trièt.* 52. 4, the name Εὐβουλεύς, properly belonging to the nether Zeus, is transferred to his son Dionysos (J. H. Wieten *op. cit.* p. 27 ff.). The Queen with Eukles and Eubouleus would thus make up the triad Mother + Father + Son.

[1] *Inscr. Gr. Sic. It.* no. 641 i, 5 ff. ἀλ(λ)ά με Μο(ῖ)ρα ἑδάμασ(σ)ε | καὶ ἀθάνατοι θεοὶ ἄλλοι καὶ ἀσ|τεροβλῆτα κεραυνόν, cp. *ib.* ii, 7 f. εἵτε με Μο(ῖ)ρα ἑδαμάσατο | εἵτε ἀστεροπῆτι κ(ε)ραυνῶν, iii, 8 ff. ε(ἴ)τ(ε) με Μοῖρα (ἐδάμασσε) | ε(ἴ)τ' (ἀστ)εροπῆτι κη κερα|υνό (*sic*). The best solution of the textual problem is still that of G. Kaibel who in i, 6 would bracket καὶ ἀθάνατοι θεοὶ ἄλλοι as interpolated from i, 2 f., and in i, 7 would emend κεραυνόν to κερανός, arguing that the original poet meant ἀστεροβλῆτα as an epic nominative, but that a stupid transcriber took it to be an accusative and consequently altered κεραυνός to κεραυνόν. With this I should agree, only bargaining that we write Κεραυνός with a capital letter, since an Orphic hymn identifies *Keraunós* with Zeus (*supra* p. 12). Thus the 'star-flung (rather than 'star-flinging') Thunderbolt' is Zeus in his destructive capacity—the bright brand that flashes downwards from the Milky Way and hurls the guilty soul, like a fallen angel, out of heaven.

A. Dieterich *de hymnis Orphicis* Marpurgi Cattorum 1891 p. 31 (=*Kleine Schriften* Leipzig and Berlin 1911 p. 92) omits the superfluous καὶ ἀθάνατοι θεοὶ ἄλλοι and reads i, 6 f. ἀστεροβλῆτα κεραυνῶν, ii, 8 and iii, 9 f. ἀστεροπῆτα κεραυνῶν. O. Hoffmann too in Collitz—Bechtel *Gr. Dial.-Inschr.* ii. 161 f. no. 1654 prints <καὶ ἀθάνατοι θεοὶ ἄλλοι> καὶ ἀσ|τεροβλῆτα κεραυν(ῶ)ν. On this showing κεραυνῶν is the participle of κεραυνόω, and ἀστεροβλῆτα has to mean 'Blitzschleuderer' or 'der mit dem Sonnenstich treffende'—a choice of evils. J. H. Wieten *op. cit.* p. 94 ff. decides for the first horn of the dilemma (ἀστεροβλῆτα=*ἀστεροποβλῆτα by haplology). G. Murray in Harrison *Prolegs. Gk. Rel.*[2] p. 670 makes the interesting suggestion that ἀλλά με Μοῖρ' ἑδάμασσε καὶ ἀθάνατοι θεοὶ ἄλλοι | .....καὶ ἀστεροβλῆτα κεραυνόν may be a liturgical abbreviation for some fuller form of words. Certainly it would be possible to fill the gap with <σκήψαντες βροντήν τε> or the like, perhaps a much longer phrase. But on the whole I am inclined to think, with Kaibel, Dieterich, and Hoffmann, that καὶ ἀθάνατοι θεοὶ ἄλλοι is a mere interpolation from the second line of the poem. The writer of the first tablet seems to have similarly duplicated his sixth line (*infra* n. 2), while the writer of the third tablet has the self-correction κη κερα|υνό. L. Radermacher in the *Rhein. Mus.* 1912 lxvii. 474 ff. admits ἀστεροβλῆτα as a nominative=*ἀστεροβλήτης, and supposes that *ἀστεροποβλήτης became *ἀστεροβλήτης through confusion with ἀστεροπήτης : he doubts whether ἀστεροβλῆτα can be taken in a passive sense. But stars are as much in point as lightnings; and a poet familiar with Διοβλής, Λιθοβλής, Διόβλητος, Λιθόβλητος as passives would not hesitate to make ἀστεροβλῆτα passive too. Less and less probable are the conjectures of F. Bücheler in the *Rhein. Mus.* 1881 xxxvi. 334 κατ' ἀστεροβλῆτα κεραυνόν, D. Comparetti *Laminette Orfiche edite ed illustrate* Firenze 1910 p. 23 f. εἴτ' ἐμὲ Μοῖρα ἑδάμασσ' αὖον στεροπή τε κεραυνοῦ (even if helped out by Gruppe's στεροπῆτι κεραυνῷ).

[2] *Inscr. Gr. Sic. It.* no. 641 i, 7 ff. κύκλου | δ' ἐξέπταν βαρυπενθέος ἀργα|λέοιο, ἱμερτοῦ δ' ἐπέβαν στεφά|νου ποσὶ καρπαλίμοισι, Δεσσπο|ίνας δὲ ὑπὸ κόλπον ἔδυν χθονί|ας βασιλείας, ἱμερτοῦ δ' ἀπέβαν | στε(φ)άνου ποσὶ καρπα(λ)ίμοι|σι. The verse ἱμερτοῦ δ' ἀπέβαν κ.τ.λ.

The lines may be paraphrased: I have escaped from the dreary cycle of life's changes[1]; I have set foot on the Milky Way[2]. In a word, I have regained my lost paradise, and am henceforward a god in heaven, not a man on earth. The astonishing beauty of this profession must not, however, blind us to its crude material aspect. Such *formulae* presuppose a definite ritual[3]; and it may be asked

reads like a careless repetition of the verse *ἱμερτοῦ δ' ἐπέβαν κ.τ.λ.*; and such it presumably is, though the verb may have been changed to suggest that the soul now returning to the Milky Way had originally come from it.

[1] For this use of *κύκλος* cp. Diog. Laert. 8. 14 *πρῶτόν τέ φασι τοῦτον* (*sc.* Pythagoras) *ἀποφῆναι τὴν ψυχὴν κύκλον ἀνάγκης ἀμείβουσαν ἄλλοτ' ἄλλοις ἐνδεῖσθαι ζῴοις*, Emped. *frag.* 17, 12 f. Wachsmuth *Ομηρος δὲ τὴν ἐν κύκλῳ περίοδον καὶ περιφορὰν παλιγγενεσίας Κίρκην προσηγόρευκεν.*

[2] The use of the word *στέφανος* to denote the Galaxy resembles Parmenides' use of *στεφάνη* (Aët. 2. 7. 1 *ap.* Stob. *ecl.* 1. 22. 1[a] p. 195, 4 ff. Wachsmuth: see O. Gilbert *Die meteorologischen Theorien des griechischen Altertums* Leipzig 1907 pp. 96 n. 1, 102 n. 1, 103 n. 1, and 684 n. 3). A. Dieterich *de hymnis Orphicis* Marpurgi Cattorum 1891 p. 34 f. (= *Kleine Schriften* Leipzig and Berlin 1911 p. 95) goes off on a wrong tack. Miss J. E. Harrison in her *Proleg. Gk. Rel.*[2] p. 592 f. gets nearer to the truth.

[3] This is seen by Miss J. E. Harrison *Proleg. Gk. Rel.*[2] p. 588 ff., who—perhaps wisely—refrains from attempting to determine the precise nature of the rites involved. J. H. Wieten *op. cit.* p. 97 ff. is more venturesome. On the strength (none too strong) of Psell. *τίνα περὶ δαιμόνων δοξάζουσιν Ἕλληνες;* (printed in Psell. *de operatione daemonum* ed. J. F. Boissonade Norimbergae 1838 p. 36 ff.) p. 41 f. *πυρὰ δὲ πολλὰ κύκλῳ τινὶ περιγράφοντες ἐξάλλονται τῆς φλογός. ἦν δὲ καὶ τοῦτο τῆς παλαιᾶς βακχείας, ἵνα μὴ λέγω μανίας, μερίς...ὁ δέ γε κύκλος κατοχῆς ἔχει δύναμιν* (quoted by Miss Harrison) and of Dion Chrys. *or.* 12 p. 388 Reiske *ἔτι δέ, εἰ* (*sc.* *περιχορεύοιεν αὐτὸν*) *καθάπερ εἰώθασιν ἐν τῷ καλουμένῳ θρονισμῷ καθίσαντες τοὺς μουνμένους οἱ τελοῦντες κύκλῳ περιχορεύειν* he suggests that the initiate at Thourioi was placed in a circle of fires or surrounded by torch-bearing dancers and expected to leap over the fiery ring. He further contends (*ib.* p. 100 ff.) that, having leapt out of the ring, the initiate next stepped quickly into a garland lying on the ground. Hence the golden garlands in the Bacchic procession of Ptolemy ii Philadelphos (Kallixenos of Rhodes *frag.* 2 (*Frag. hist. Gr.* iii. 64 Müller) *ap.* Athen. 202 D); and hence too the Pythagorean symbol 41 Mullach *στέφανον μὴ τίλλειν* (Porph. *v. Pyth.* 42). But the part of Ptolemy's show here adduced was subsequent to the Bacchic procession

—How, exactly, did the Orphist 'enter upon the lovely Crown'? We have seen reason to believe that, with a view to apotheosis[1], he had 'fallen as a kid into milk[2].' Now Attic vase-paintings of the fifth century B.C. represent the Thracian women that slew Orpheus as tattooed with various symbols including a small goat and a ladder (fig. 76)[3]. And Attic vases of the late fifth or the fourth

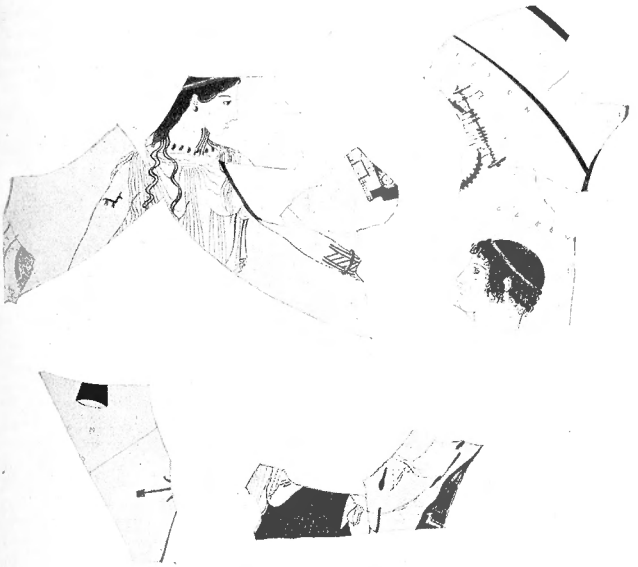

Fig. 76.

(see Athen. 202 A *καὶ μετὰ ταῦτα Διὸς ἦγετο πομπὴ καὶ ἄλλων παμπόλλων θεῶν, κ.τ.λ.*), and Wieten's interpretation of the Pythagorean precept is confessedly different from that of Porph. *loc. cit.* Neither objection is necessarily fatal, but the whole hypothesis is frail.

[1] M. Radin 'Apotheosis' in the *Class. Rev.* 1916 xxx. 44—46 acutely remarks that 'the term [*ἀποθέωσις*] was intended to denote not merely the elevation of a mortal to divinity [*ἐκθέωσις*], but to assert of such an elevation that it was a movement in the Orphic cycle, a *restitutio in pristinum statum*.'

[2] *Supra* i. 675 ff.

[3] (1) A fragmentary *kýlix* with white ground, found in 1888 on the Akropolis at Athens (J. E. Harrison 'Some fragments of a vase presumably by Euphronios' in the *Journ. Hell. Stud.* 1888 ix. 143—146 pl. 6, part of which = my fig. 76, G. C. Richards *ib.* 1894 xiv. 381 f., W. Klein *Die griechischen Vasen mit Lieblingsinschriften* Leipzig 1898 p. 154 f., O. Gruppe in Roscher *Lex. Myth.* iii. 1184 fig. 9, Furtwängler—Reichhold

Gr. Vasenmalerei i. 284, Perrot—Chipiez *Hist. de l'Art* x. 707 ff. fig. 387 f.), has for interior design Orpheus (ΟΡΦΕΥς) attacked by a Thracian woman. He sinks, bleeding, to the ground, supported no doubt by his left hand, and defending himself with the lyre uplifted in his right. His assailant holds in her right hand a double axe (missing portion subsequently found—*Journ. Hell. Stud.* 1894 xiv. 381), beneath which appears a *kalós*-name (probably ΓλαυκΟΝ) and an uncertain object (? handle of large spit: Miss Harrison aptly cp. *Mon. d. Inst.* ix pl. 30). She grasps the singer's arm with her left hand, and sets her foot against his thigh. She has three tattoo-marks—a small goat (not a stag; the legs are too short for that) on her right upper arm, a ladder beneath the bracelet on her left wrist, and four vertical strokes on her neck. The vase may be dated *c.* 470—460 B.C.

(2) Pl. v, a 'Nolan' *amphora* from Capua, now in the British Museum (*Brit. Mus. Cat. Vases* iii. 218 no. E 301), shows a similar scene painted in the style of Douris. The Thracian woman in *a*, but not in *b*, has a check-pattern on the front of her neck, the inside of her right forearm, and the instep of each foot. The photographs here reproduced are by Mr R. B. Fleming.

(3) A 'Nolan' *amphora* from the Durand collection, now in the Louvre (Pottier *Cat. Vases du Louvre* iii. 1109 no. G 436, T. Panofka in the *Ann. d. Inst.* 1829 i. 265 ff., *Mon. d. Inst.* i pl. 5, 2, Reinach *Rép. Vases* i. 63, 4, O. Gruppe in Roscher *Lex. Myth.* iii. 1185), represents the same scene. The Thracian woman has a pattern of ivy-leaves (?) down either arm.

(4) A 'Nolan' *amphora* at Munich (Jahn *Vasensamml. München* p. 126 f. no. 383, A. Flasch in the *Ann. d. Inst.* 1871 xliii. 127, O. Gruppe in Roscher *Lex. Myth.* iii. 1188) has the same design, the woman's arms being decorated with a >>>-pattern (? ivy-leaves).

(5) A red-figured *stámnos* from the Campana collection, now in the Louvre (Pottier *Cat. Vases du Louvre* iii. 1103 no. G. 416, A. Flâsch in the *Ann. d. Inst.* 1871 xliii. 126 ff., *Mon. d. Inst.* ix pl. 30, Reinach *Rép. Vases* i. 186, O. Gruppe in Roscher *Lex. Myth.* iii. 1184 ff. fig. 10), amplifies the scene by adding five other Thracian women. Four out of the six are tattooed, one with a series of short strokes on either arm, another with short strokes on the neck and on the one arm visible, a third with short strokes on the neck and a long line on either arm, a fourth with two vertical lines on the neck.

(6) A red-figured *kelébe* at Munich (Jahn *Vasensamml. München* p. 241 no. 777, A. Flasch in the *Ann. d. Inst.* 1871 xliii. 127, O. Gruppe in Roscher *Lex. Myth.* iii. 1188) has obv. a Thracian woman, with sword in right haud, sheath in left, whose arms and legs are painted with zig-zag patterns; on either upper arm is a stag ('*Hirsch*' Jahn), on the knee a star with a stag ('Hirsch' Jahn) beneath it: rev. a Thracian woman running with outstretched arms; her arms and legs are again patterned with zig-zags. Orpheus does not appear.

These vases together with some others, on which the women are not tattooed, presuppose—as O. Gruppe in Roscher *Lex. Myth.* iii. 1184—1188 points out—'eine gemeinsame Vorlage.' Possibly the original was an unrecorded fresco by Polygnotos (not the Orpheus-scene in the Cnidian *Lésche* at Delphoi: *supra* i. 537), who as a Thasian by birth would be familiar with the customs of Thrace.

For monumental evidence of tattooing in palaeolithic times see J. Déchelette *Manuel d'archéologie préhistorique* Paris 1908 i. 203 ff. and Index p. 730, in neolithic times *id. ib.* i. 565 ff. and Index p. 730. Bronze-age examples include a marble idol from Seriphos, the face of which is painted with transverse rows of red dots across forehead, cheeks, and chin (C. Blinkenberg 'Antiquités prémycéniennes' in the *Mémoires de la Société royale des Antiquaires du Nord* Copenhague 1896 p. 48 fig. 13, J. Déchelette *op. cit.* i. 597 fig. 1), a marble head from Amorgos with lines of red on forehead, nose, and cheeks (P. Wolters 'Marmorkopf aus Amorgos' in the *Ath. Mitth.* 1891 xvi. 46—58, Perrot—Chipiez *Hist. de l'Art* vi. 742 f. fig. 336), a white limestone idol from the neighbourhood of Sparta with quadruple chevrons incised on its right upper-arm and quadruple squares on its left upper-arm (P. Wolters in the *Ath. Mitth.* 1891 xvi. 52 f. fig. 1, Perrot—Chipiez *Hist.*

a

b

Amphora from Capua, now in the British Museum: Orpheus attacked by Thracian women.

See page 122 *n.* 0 (2).

de l'Art vi. 741 ff. fig. 334), a female (?) head in painted plaster from Mykenai with a rosette of red dots on forehead, chin, and either cheek (Ch. Tsountas 'Κεφαλὴ ἐκ Μυκηνῶν' in the 'Εφ. 'Αρχ. 1902 pp. 1—10 pl. 1). Even in the iron age similar practices persisted: the Louvre possesses an archaic terra cotta, said to have been found in Greece, which represents a nude standing female with incised circles of dots round her breasts, round her navel, and on her thighs (E. Pottier in the *Rev. Arch.* 1899 i. 10 fig. 7), and an archaic terra cotta from Boiotia, which shows a draped standing female with a circular black patch on either cheek (Collignon *Hist. de la Sculpt. gr.* i. 109 fig. 55). A *kylix* of Ionic style from Vulci, now at Berlin, has a running Maenad with a small circular red patch on her cheek (J. Endt *Beiträge zur Jonischen Vasenmalerei* Prag 1899 p. 35 fig. 15, J. Boehlau 'Die Jonischen Augenschalen' in the *Ath. Mitth.* 1900 xxv. 50 ff. fig. 10 'ein unverkennbares rotes Schönheitspflästerchen'!). The black-brown figures represented on Tanagra-ware (S. Wide 'Eine lokale Gattung boiotischer Gefässe' in the *Ath. Mitth.* 1901 xxvi. 143—156 pl. 8) have sometimes, if not always, a group of three dots in thinned-out colour on either cheek (*Brit. Mus. Cat. Vases* iii. 385 no. E 813 pl. 21, 1, *ib.* iii. 385 no. E 814 pl. 21, 2 f.: but see Wide *loc. cit.* p. 146 no. 3 = Collignon—Couve *Cat. Vases d'Athènes* p. 350 no. 1119, p. 146 f. no. 4, pp. 147 f. 150 ff. pl. 8 = Collignon—Couve *op. cit.* p. 350 no. 1120). On a terra-cotta antefix from Thasos (C. Fredrich in the *Ath. Mitth.* 1908 xxxiii. 245 f. pl. 10 *Gorgóneion* with floral design on forehead, rosette on nose, etc.) and on various classes of black-figured ware prophylactic faces show tattoo-marks (*e.g.* De Ridder *Cat. Vases de la Bibl. Nat.* i. 90 f. no. 182 fig. 9 Ionic vase-lid—*Gorgóneion* with four dots on forehead, *id. ib.* i. 219 ff. no. 322 fig. 39 Attic *kylix*—*Gorgóneion* with large round black spot on forehead, *id. ib.* i. 216 ff. no. 321 fig. 38 Attic *kylix*—interior, *Gorgóneion* with row of dots on forehead; exterior, eyes forming part of face with four dots on forehead).

Literature attests the custom of tattooing for Thracians (Hdt. 5. 6, Klearchos *frag.* 8 (*Frag. hist. Gr.* ii. 306 Müller) *ap.* Athen. 524 D—E, Phanokles *ap.* Stob. *flor.* 64. 14 (ed. Gaisford ii. 419), Cic. *de off.* 2. 25, Strab. 315, Plout. *de sera num. vind.* 12, Dion Chrys. *or.* 14 p. 442 Reiske, Artemid. *oneirocr.* 1. 8, Eustath. *in Il.* p. 933, 7, *id. in* Dionys. *per.* 322, anon. Pythag. *diss.* 2 *de honesto et turpi* (T. Gale *Opuscula mythologica, ethica et physica* Cantabrigiæ 1671 p. 56 = *Opuscula mythologica physica & ethica* Amstelædami 1688 p. 712 f.) and for Agathyrsi (Verg. *Aen.* 4. 146, Mela 2. 10, Solin. 15. 3, Amm. Marc. 31. 2. 14, interp. Serv. *in* Verg. *Aen.* 4. 146, cp. Plin. *nat. hist.* 4. 88), Daci (Plin. *nat. hist.* 7. 50, 22. 2), Geloni (Verg. *georg.* 2. 115 with Serv. *ad loc.*, Claud. *in Rufin.* 1. 313), Getai (Artemid. *oneirocr.* 1. 8, cp. Dionysophanes *ap.* Porph. *v. Pyth.* 14 f.), Harii (Tac. *Germ.* 43), Iapodes (Strab. 315), Illyrioi (Strab. 315), Sarmatai (Plin. *nat. hist.* 22. 2, Sext. *Pyrrhon. hypot.* 3. 24 p. 286 f. Fabricius), as also for Britanni (Caes. *de bell. Gall.* 5. 14, Mela 3. 51, Plin. *nat. hist.* 22. 2, Herodian. 3. 14. 7, cp. Solin. 22. 12), Picti (Claud. *de bello Getico* 416 ff., Isid. *orig.* 19. 23. 7), Scoti (Isid. *orig.* 9. 2. 103), Kylikranes (Polemon *frag.* 56 (*Frag. hist. Gr.* iii. 133 Müller) *ap.* Athen. 462 A and Hesych. *s.v.* Κυλικράνων), Mossynoikoi (Xen. *an.* 5. 4. 32), Aithiopes (Sext. *Pyrrhon. hypot.* 1. 14 p. 66 Fabricius, cp. *ib.* 3. 24 p. 287, Lyd. *de mens.* 4. 53 p. 110, 16 ff. Wünsch and Sir W. M. Flinders Petrie *Kahun, Gurob, and Hawara* London 1890 p. 30, *id. Illahun, Kahun and Gurob* London 1891 p. 9 pl. 13, 20), Assyrioi (Loukian. *de dea Syr.* 59: *supra* i. 593 no. 0). Mithraic 'soldiers' were marked on the forehead (Tertull. *de praescr. haeret.* 40, cp. Greg. Naz. *adv. Iulian.* 1. 70 (xxxv. 592 Migne))—a practice compared by G. Anrich *Das antike Mysterienwesen in seinem Einfluss auf das Christentum* Göttingen 1894 p. 123 f., not only with the Roman custom of marking military recruits (Veget. *epit. rei milit.* 1. 8, 2. 5, Aetios of Amida 8. 12, T. Ruinart *Acta martyrum* Ratisbonae 1859 p. 341 *acta Maximiliani*), but also with such usages as those of Kybele-worshippers (Prudent. *peristeph.* 10. 1076 ff.) and other devotees (Philon *de monarch.* 1. 8), the followers of the Gnostic Marcus (Eiren. *c. haeres.* 1. 20. 4 = Hippol. *ref. haeres.* 7. 32 p. 404 Duncker—Schneidewin), and even the Christian σφραγίς ('baptism') (Herakleon *frag.* 49 Brooke *ap.* Clem. Al. *ecl. proph.* 25. 1 p. 143, 22 ff. Stählin). See further J. Rhodius on Scribonius Largus *composit. med.* 231 (ed. Patav. 1655 p. 308 ff.), Schrader

century repeatedly introduce a ladder into scenes of mystic incense-gathering (?)[1], such as that on a fine polychrome *hydría* from Kyrenaike, now in the British Museum (pl. vi)[2], or those on a couple of *aryballoi* from Apollonia in Thrace, which passed from the Van Branteghem collection to the Hermitage and Berlin respectively (pl. vii)[3]. It is therefore permissible to conjecture that the Orphic initiate actually mounted a ladder in order to ensure his entrance upon the Elysian soul-path[4].

Reallex. p. 851 f., H. Hepding *Attis seine Mythen und sein Kult* Gieszen 1903 p. 163 n. 2, W. Dennison in the *Am. Journ. Arch.* 1905 ix. 37, and the monograph of W. Jöst *Tätowiren, Narbenzeichnen, und Körperbemalen* Berlin 1887 pp. 43 f., 102 f.

[1] See the materials collected by F. Wieseler *Commentatio de scala symbolo apud Graecos aliosque populos veteres* Gottingae 1863 pp. 3—17. The list of vase-paintings *ib.* p. 3 f. must, however, be used with caution, since Wieseler appears to have included certain representations of a musical instrument resembling a dulcimer in shape (G. Nicole in Daremberg—Saglio *Dict. Ant.* iv. 1108 f.). The subject has been handled with more discretion by Furtwängler—Reichhold *Gr. Vasenmalerei* ii. 98 f. pl. 78, 1 ('eine festliche, von Aphrodite und Eros vorgenommene *Weihrauchernte*') and by G. Nicole *Meidias et le style fleuri dans la céramique attique* Genève 1908 Append. ii 'Sur le motif de l'échelle dans les scènes de gynécée' with fig. 43 and pl. 8, 1—6, pl. 9 ('une récolte mystique de l'encens, fête religieuse accompagnée de mélodies et de danses sacrées'). Not improbably the gatherer mounted the ladder to symbolise the celestial nature of the harvesting.

[2] *Brit. Mus. Cat. Vases* iii. 186 no. E 241, G. Nicole *Meidias et le style fleuri dans la céramique attique* Genève 1908 p. 150 fig. 43. My pl. vi is from a photograph taken by Mr C. O. Waterhouse. In the centre is a long ladder, and beside it a tall plant with berries (gilded) in clusters of three. Aphrodite (?), bare to the waist, descends the ladder and scatters something into a two-handled vase held by a woman (drapery blue)—hardly Adonis, as Furtwängler *op. cit.* ii. 99 asserts. On the right another woman closely wrapped in a *himátion* (pink), which passes over her mouth, dances to the flutes of a hovering Eros (wings gilded). Further to the right is a second dancing woman, who plays the castanets. On the left are a third dancing woman, a woman playing the flutes, and a small bearded Pan, with goat's legs and horns (gilded ?), also dancing. Height 15½ ins.

[3] W. Froehner *Collection van Branteghem* Bruxelles 1892 nos. 98 and 99 pl. 31—34 (=my pl. vii), G. Nicole *op. cit.* p. 150 f. pl. 8, 5 and 6. Variations of the same scene, marked by the presence of a *thymiatérion*, which on a polychrome *alábastron* from Naukratis (E. A. Gardner—F. Ll. Griffith *Naukratis* Part ii London 1888 p. 28 pl. 16, 20, *Brit. Mus. Cat. Vases* iii. 355 no. E 721, G. Nicole *op. cit.* p. 150 ff. pl. 8, 1) is held by Eros as he descends the ladder.

[4] In an elegiac epitaph from *Doxato* near Philippoi the soul that has entered the Elysian fields is brought into connexion with the tattooed mystics of Dionysos (L. Heuzey—H. Daumet *Mission Archéologique de Macédoine* Paris 1876 Texte p. 128 ff. no. 61, *Corp. inscr. Lat.* iii no. 686, 11 ff., F. Bücheler *Carmina Latina epigraphica* Lipsiae 1897 ii. 577 ff. no. 1233, 11 ff. [tu placidus, dum nos cr]uciamur volnere victi, | et reparatus item vivis in Elysiis. | sic placitum est divis a[e]terna vivere form[a] | qui bene de supero [n]umine sit meritus : | quae tibi castifico promisit munera cursu | olim iussa deo simplicitas facilis. | nunc seu te Bromio signatae mystidis aise | florigero in prato congregi in Satyrum | sive canistriferae poscunt sibi Naides aequ[e] | qui ducibus taedis agmina festa trahas, | sis quodcumque, puer, quo te tua protulit aetas, | dum modo [- - - -]. The meaning of *mystidis aise* is doubtful. Bücheler *ad loc.* takes *mystidis* to be for *mystides*, adding 'an nomen pueri hic fuit ut *Aesi*?' F. C. Wick in *Studi italiani di filologia classica* 1909 xvii. 198 f. (a reference for which I am indebted to Mr A. D. Nock of

Two *aryballoi* from Apollonia in Thrace, representing scenes of mystic incense-gathering (?).

See page 124 *n.* 3.

In support of that conjecture I may point out, not only that Pindar in a passage already cited speaks of the celestial track as a 'dread stair' or 'ladder[1],' but also that Orphic belief thus falls into line with the beliefs of other peoples. Amulets in the shape of

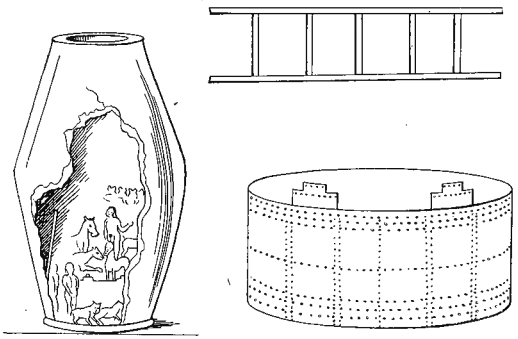

Fig. 77.

little bronze ladders (fig. 77)—a magical means of getting to heaven —have been found in Roman graves[2]. They recall the Egyptian amulet of the ladder, 𓊪, about which E. A. Wallis Budge writes as follows:

'In tombs of the Ancient and Middle Empires small objects of wood and other substances in the form of ladders have often been found, but the signification of them is not always apparent. From the texts inscribed upon the walls of

Trinity College, Cambridge) cj. *Mystides aere* (=sistro). But H. Daumet *op. cit.* p. 130 long since suggested αἴσῃ (=αἴσα), and personally I would rather keep *mystidis aise* as a Latinised equivalent of *μύστιδος αἴσῃ* (cp. *e.g.* Ap. Rhod. 3. 3 *Κύπριδος αἴσαν*). Bücheler retains *congregi in Satyrum* as meaning 'in the company (adj. for subst.) of the Satyrs (gen. plur.).' He had thought of *congregium*, which might be accepted either as an irregular gen. plur. of *congrex*, or as acc. sing. of *congregius*, a new formation on the analogy of *egregius*.

[1] *Supra* p. 37.

[2] A small bronze ladder together with many other amulets was found in 1696 A.D. near Rome within the remains of a bronze *kiste*, itself enclosed in a jar of coarse pottery and protected by a tile (Gerhard *Etr. Spiegel* i. 36—46 pl. 12 f., of which pl. 12, 1, 4, 6=my fig. 77, O. Jahn in the *Ber. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1854 p. 41 n. 44^a pl. 5, 1, p. 48 n. 69^a pl. 4, 5 f., p. 58 n. 116, p. 94 f. pl. 4, 15, S. Seligmann *Der böse Blick und Verwandtes* Berlin 1910 ii. 296, 365 fig. 214); it is now in the Naples Museum (E. Gerhard—T. Panofka *Neapels antike Bildwerke* Stuttgart 1828 p. 231 f. Zimmer v Schrank 8). Two small bronze ladders, found with other amulets and coins of Marcus Aurelius and Constantine the Great in Roman graves at Cologne, are now in the Museum at Bonn (J. Overbeck *Katalog der königl. rheinischen Museums vaterländischer Alterthümer* Bonn 1851 p. 146 Karte no. 8 f., O. Jahn in the *Ber. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1854 p. 41 n. 44^d).

the corridors and chambers of the pyramids of Unas, Teta, Pepi, and other early kings, it is clear that the primitive Egyptians believed that the floor of heaven, which also formed the sky of this world, was made of an immense plate of iron, rectangular in shape, the four corners of which rested upon four pillars which served to mark the cardinal points. On this plate of iron lived the gods and the blessed dead, and it was the aim of every good Egyptian to go there after death. At certain sacred spots the edge of the plate was so near the tops of the mountains that the deceased might easily clamber on to it and so obtain admission into heaven, but at others the distance between it and the earth was so great that he needed help to reach it. There existed a belief that Osiris himself experienced some difficulty of getting up to the iron plate, and that it was only by means of the ladder which his father Rā provided that he at length ascended into heaven. On one side of the ladder stood Rā, and on the other stood Horus[1], the son of Isis, and each god assisted Osiris to mount it. Originally the two guardians of the ladder were Horus the Elder and Set, and there are several references in the early texts to the help which they rendered to the deceased, who was, of course, identified with the god Osiris. But, with a view either of reminding these gods of their supposed duty, or of compelling them to do it, the model of a ladder was often placed on or near the dead body in the tomb, and a special composition was prepared which had the effect of making the ladder become the means of the ascent of the deceased into heaven. Thus in the text written for Pepi[2] the deceased is made to address the ladder in these words: "Homage to thee, O divine Ladder! Homage to thee, O Ladder of Set! Stand thou upright, O divine Ladder! Stand thou upright, O Ladder of Set! Stand thou upright, O Ladder of Horus, whereby Osiris came forth into heaven when he made use of his magical power upon Rā.... For Pepi is thy son, and Pepi is Horus, and thou hast given birth unto Pepi even as thou hast given birth unto the god who is the lord of the Ladder (*i.e.*, Horus); and thou shalt give unto Pepi the Ladder of the god (*i.e.*, Horus), thou shalt give unto him the Ladder of the god Set whereby this Pepi shall come forth into heaven when he shall have made use of his magical power upon Rā...." Elsewhere[3] the gods Khonsu, Sept, etc., are invoked to bring the ladder to Pepi, and the ladder itself is adjured to come with its name, and in another place[4] we read, "Homage to thee, O thou Ladder that supportest the golden vase of the Spirits of Pe and the Spirits of Nekhen, stretch out thy hand to this Pepi, and let him take his seat between the two great gods who are in the place of this Pepi; take him by the hand and lead him towards Sekhet-Hetep (*i.e.*, the Elysian Fields), and let him take his seat among the stars which are in the sky."

In the Theban Recension of the Book of the Dead the importance of the ladder is also seen, for in Chapter CXLIX.[5] the deceased says, "I set up a Ladder among the gods, and I am a divine being among them"; and in Chapter CLIII. he says, "The Osiris Nu shall come forth upon your Ladder which Rā hath made for him, and Horus and Set shall grasp him firmly by the hand." Finally, when the custom of placing a model of the ladder in the tomb fell into disuse, the priests provided for the necessity of the dead by painting a ladder on the papyri that were inscribed with the texts from the Book of the Dead and were buried with them[6,7]

Such beliefs were not without their influence on the receptive and superstitious Greek. P. Aelius Aristeides of Adrianoi in Mysia (129—189 A.D.) was the son of Eudaimon priest of Zeus in that city[1], and apparently succeeded to the office[2], if not to the title of his father[3]. As a life-long invalid he was devoted to the cults of

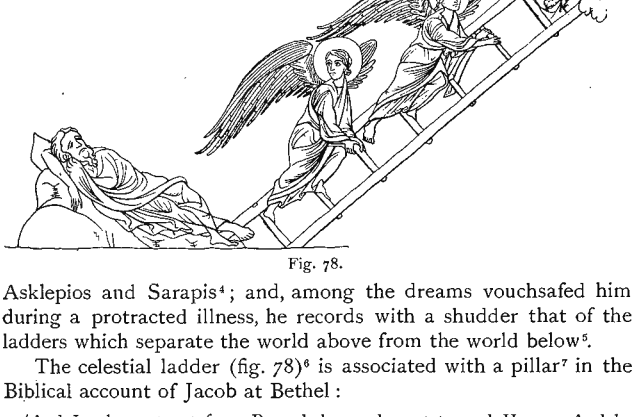

Fig. 78.

Asklepios and Sarapis[4]; and, among the dreams vouchsafed him during a protracted illness, he records with a shudder that of the ladders which separate the world above from the world below[5].

The celestial ladder (fig. 78)[6] is associated with a pillar[7] in the Biblical account of Jacob at Bethel:

'And Jacob went out from Beer-sheba, and went toward Haran. And he

Dindorf) πολὺ δέ τι τούτων φρικωδέστερον εἶχε τὰ χρόνῳ ὕστερον φανθέντα, ἐν οἷς αἵ τε δὴ κλίμακες ἦσαν αἱ τὸ ὑπὲρ γῆς τε καὶ ὑπὸ γῆς ἀφορίζουσαι, καὶ τὸ ἑκατέρωθι κράτος τοῦ θεοῦ, καὶ ἕτερα ἐκπληξιν θαυμαστὴν φέροντα, καὶ οὐδὲ ῥητὰ ἴσως εἰς ἅπαντας, ὥστε ἀσμένῳ μοι φανῆναι σύμβολα τοῦ 'Ασκληπιοῦ. κεφάλαιον δ' ἦν περὶ τῆς τοῦ θεοῦ δυνάμεως ὅτι καὶ χωρὶς ὀχημάτων καὶ χωρὶς σωμάτων ὁ Σάραπις οἷός τ' εἴη κομίζειν ἀνθρώπους ὅπη βούλοιτο. τοιαῦτα ἦν τὰ τῆς τελετῆς· καὶ ἀνέστην οὐ ῥᾴδιος γνωρίσαι καὶ πρὸς τούτοις θυσία τις ἐδηλοῦτο, ὀφειλομένη μὲν Διὶ καὶ πρόρρησιν μένουσα, ἀποδοθεῖσα δὲ ὡς τοῦ Σαράπιδος οὖσα, ἀπεδόθη δὲ καὶ ὡς τῷ Διί, ἔχω δὲ λέγειν κἀν ταῖς ἱεραῖς ἡμέραις, ἃς ἡ πόλις ἡ τῶν 'Αλεξανδρέων ποιεῖ τῷ θεῷ, πολλὰ δὴ πολλάκις αὐτὸν ἐπισημήναντα, καὶ κατ' αὐτὴν ἑκάστην, καὶ προσαγαγούσης ἔτι.

[6] From Herrade de Landsberg *Hortus Deliciarum* edd. A. Straub—G. Keller Strasbourg 1879—1899 p. 11 f. pl. 12, 2 a twelfth-century illustration (*infra* p. 136).

[7] Presumably the *Maṣṣebhoth*, the mark of an ordinary sanctuary.

lighted upon a certain place, and tarried there all night, because the sun was set; and he took one of the stones of the place, and put it under his head, and lay down in that place to sleep. And he dreamed, and behold a ladder set up on the earth, and the top of it reached to heaven: and behold the angels of God ascending and descending on it. And, behold, the LORD stood above it.... And Jacob awaked out of his sleep, and he said, Surely the LORD is in this place; and I knew it not. And he was afraid, and said, How dreadful is this place! this is none other but the house of God, and this is the gate of heaven. And Jacob rose up early in the morning, and took the stone that he had put under his head, and set it up for a pillar, and poured oil upon the top of it. And he called the name of that place Beth-el: but the name of the city was Luz at the first[1].'

Ladder and pillar coalesce in the stepped tower or *zikkurat* of the Babylonians[2], as in the *columna cochlis* of the Romans, to which indeed the spiral tower of Samarra (*s.* ix A.D.)—a direct derivative of the *zikkurat*—bears a marked resemblance[3]. The seven steps of the *zikkurat*—eight, if we reckon in, as Herodotos does[4], the sanctuary on the summit—have undoubtedly a cosmic significance[5],

[2] D. Chwolsohn *Die Ssabier und der Ssabismus* St Petersburg 1856 ii. 610 cites from Makrisi (1364—1441 A.D.) the following statement: 'Unter diesen geistigen Wesen verstehen sie die Engel, von denen sie glauben, dass sie die Leiter der sieben Planeten in deren Himmelskreisen seien,' etc.

[3] A pilaster-relief from the *stûpa* of Bharhut, now at Calcutta, shows 'the great Ladder by which Buddha descended at Sankisa from the Trayastrinsas heavens' as 'a triple flight of solid stone steps, similar in all respects to the single flight of steps which was found at the Western Gateway of the Stûpa' (A. Cunningham *The Stûpa of Bharhut* London 1879 p. 91 ff. pl. 17 railing-pillars of West Gate, middle relief of right side; A. della Seta *Religion & Art* trans. Mrs A. Strong London 1914 p. 306 fig. 167).

sky might be climbable[1],' are connected in many ways with northern Greece[2]. K. O. Müller even regarded them as the mythical leaders of the Thracian colonies[3]. It is therefore noteworthy that Pindar speaks of them as—

Stretching in haste
A ladder to the steep sky[4].

This manœuvre is usually described as a menace to the gods. But it must be remembered that Ephialtes was wooing Hera, and Otos Artemis[5]. Their presumption was that of aspirants to the hand of a goddess.

A curious historic or *quasi*-historic parallel to the enterprise of the Aloadai is that of Kosingas the Thracian chief, who threatened to clamber up a long chain of ladders into heaven and so gain the ear of Hera. The tale is told by Polyainos[6]:

'The Kebrenioi and Sykaiboai are Thracian tribes. Their custom is to have as leaders the priests of Hera. They had a priest and leader named Kosingas. The Thracians would not obey him. Kosingas joined one to another many long wooden ladders, reared them up, and made as if he would climb up into the sky and denounce the Thracian mutiny to Hera. Thereupon the Thracians, stupid unreasoning folk, fearing that their leader would climb up into the sky, besought him and swore that they would hearken to all his commands.'

If such was the attitude of the average untutored Thracian, we begin to see why Pittakos had votive ladders dedicated in the sanctuaries of Mytilene[7]. His father was a Thracian[8] and pre-

[1] *Od.* 11. 316 ἵν' οὐρανὸς ἀμβατὸς εἴη.

[3] K. O. Müller *Orchomenos und die Minyer*[2] Breslau 1844 p. 380.

[4] Pind. *frag.* 162 Schröder *ap.* Cramer *anecd. Oxon.* i. 201, 15 ff. Πίνδαρος ἐπὶ τοῦ Ὤτου καὶ Ἐφιάλτου, 'πίτνοντες (J. G. J. Hermann cj. πιτνάντες) θοὰν | κλίμακα οὐρανὸν ἐς αἰπύν (F. W. Schneidewin cj. κλίμακ' ἐς αἰπὺν οὐρανόν)' · τὴν μεγάλην δηλονότι. Hermann's πιτνάντες is certainly right, cp. Eustath. *in Il.* p. 561, 10=*et. mag.* p. 403, 32 f. Ἐφιάλτης...παρὰ τὸ ἰάλλω, τὸ ἐκτείνω, κ.τ.λ.

In the Underworld Otos and Ephialtes were bound by snakes to a column, facing different ways, and tormented by a horned owl (ὦτος) (Hyg. *fab.* 28, cp. Verg. *cul.* 234 ff.). The column may be that on which the earth rests.

[5] Apollod. 1. 7. 4 ἐμνῶντο δὲ Ἐφιάλτης μὲν Ἥραν, Ὦτος δὲ Ἄρτεμιν, cp. schol. B.D.T. *Il.* 5. 385.

[6] Polyain. 7. 22.

[7] Ail. *var. hist.* 2. 29 Πιττακὸς ἐν Μυτιλήνῃ κατεσκεύασε ἐν τοῖς ἱεροῖς κλίμακας ἐς οὐδεμίαν μὲν χρῆσιν ἐπιτηδείους, αὐτὸ δὲ τοῦτο ἀναθήματα εἶναι, αἰνιττόμενος τὴν ἐκ τῆς τύχης ἄνω καὶ κάτω μετάπτωσιν, τρόπον τινὰ τῶν μὲν εὐτυχούντων ἀνιόντων, κατιόντων δὲ τῶν δυστυχούντων. I doubt whether Aelian fathomed Pittakos' meaning: the ascent and descent in question were, if I mistake not, the ascent of the soul to heaven and its descent to earth *via* the cosmic stair.

We may perhaps detect a refinement upon the same belief in Herakleitos' saying ὁδὸς ἄνω κάτω μία καὶ ὠυτή (Herakl. *frag.* 69 Bywater, 60 Diels), if not also in Diotima's mystic ascent towards ideal beauty (Plat. *symp.* 211C ἀρχόμενον ἀπὸ τῶνδε τῶν καλῶν ἐκείνου ἕνεκα τοῦ καλοῦ ἀεὶ ἐπανιέναι, ὥσπερ ἐπαναβαθμοῖς χρώμενον, κ.τ.λ.).

[8] Douris *frag.* 53 (*Frag. hist. Gr.* ii. 482 Müller) *ap.* Diog. Laert. 1. 74, cp. Souid. *s.v.* Πιττακός.

sumably versed in Orphic lore. Again, we can give a shrewd guess as to the reason why the ladder figures among other amulets on the terra-cotta cake-moulds of Tarentum[1]. That city was a stronghold of the Pythagoreans, who were deeply imbued with Orphism, and it had moreover its own pillar-cult of Zeus *Kataibátes*[2]. Finally, we obtain the answer to an old conundrum. In 1843 J. Millingen published a terra cotta from Italy representing a naked female figure, who sits on the back of a pig with her legs spread apart and a small ladder held upright in her hand (fig. 79)[3]. Millingen rightly identified this personage as Baubo, but failed to detect the true significance of the ladder. Baubo was a goddess worshipped in Paros along with Hera, Demeter *Thesmophóros*, Kore, and Zeus *Eubouleús*: since her name in the Parian inscription[4] follows immediately those of the Ionian triad, she too was in all probability a goddess of chthonian import[5]. According to Asklepiades of Tragilos (*s.* iv. B.C.), she was the wife of the autochthonous Dysaules (whom we may venture to regard as an appellative of Hades[6]) and by him the mother of Protogone and Misa[7]. And Orphic tradition made

[1] (1) Formerly in the possession of Sir W. Temple at Naples (O. Jahn in the *Ber. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1854 pp. 52 f., 95 pl. 5, 3, E. Labatut in Daremberg—Saglio *Dict. Ant.* i. 256 fig. 306, S. Seligmann *Der böse Blick und Verwandtes* Berlin 1910 ii. 166 f., 169 fig. 150). (2) At Naples (G. Minervini 'Poche osservazioni sopra un disco di terracotta, nel Real Museo Borbonico' in the *Bull. Arch. Nap.* 1857 v. 169—172 pl. 6, 2, S. Seligmann *op. cit.* ii. 166 f., 171 fig. 151). (3) and (4) At Oxford (Sir A. J. Evans 'Recent discoveries of Tarentine terra-cottas' in the *Journ. Hell. Stud.* 1886 vii. 44—50 no. 2 = p. 44 ff. fig. 6 and no. 3 = p. 46). Sir A. J. Evans *loc. cit.* was the first to recognize in these circular plates 'Moulds for Sacred Cakes': he thinks it probable that the specimens published by Jahn and Minervini, like those now at Oxford, come from Tarentum. In the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1916 p. 344 F. Cumont adds two other examples—(5) a disk communicated by him to the Academy, and (6) a disk in the Louvre. According to him, they date from *s.* ii or i B.C. and were probably bogus mirrors used for catoptromancy.

[6] Hades is Δυσαύλης, 'He of the sorry Resting Place' (*δυσαυλία*), as lord of the *οἰκία... σμερδαλέ' εὐρώεντα, τά τε στυγέουσι θεοί περ* (*Il.* 20. 64 f.).

[7] Harpokr. *s.v.* Δυσαύλης· ... Ἀσκληπιάδης δ' *ἐν τετάρτῳ* Τραγῳδουμένων (Asklepiades of Tragilos *frag.* 6 (*Frag. hist. Gr.* iii. 302 Müller)) *τὸν* Δυσαύλην *αὐτόχθονα εἶναί φησι, συνοικήσαντα δὲ* Βαυβοῖ *σχεῖν παῖδας* Πρωτονόην (Πρωτογόνην corr. A. Dieterich in *Philo-*

Dysaules the father of Eubouleus and Triptolemos[1]. It is, I think, fairly safe to conclude that Baubo was an Orphic goddess of the

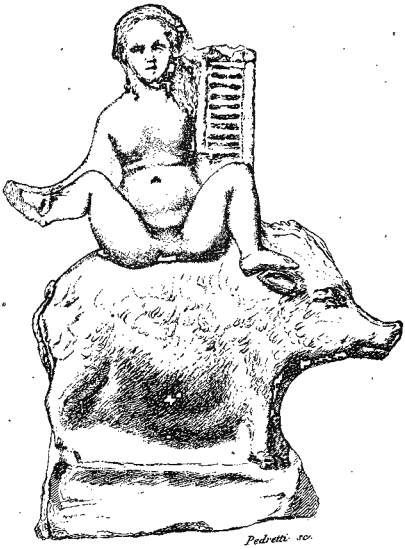

Fig. 79.

Underworld. I suggest that she was the 'Mistress' mentioned in the Orphist's solemn *formula*:

> I have passed beneath the bosom of the Mistress, the Queen of the Underworld[2].

logus 1893 lii. 2 n. 6 = *Kleine Schriften* Leipzig and Berlin 1911 p. 126 n. 3 and L. Bloch in *Philologus* 1893 lii. 577) τε καὶ Νῖσαν (Μῖσαν corr. C. Müller *Frag. hist. Gr.* ii. 339, iii. 302).

[1] Paus. i. 14. 3, cp. *supra* i. 212.

[2] *Supra* i. 650 n. 0, ii. 119 n. 2. Observe that the line Δεσποίνας δ' ὑπὸ κόλπον ἔδυν, Χθονίας Βασιλείας is at least partially paralleled by the phrase Βαυβοῦς ὑπὸ κόλποις in the passage (Clem. Al. *protr.* 2. 21. 1 p. 16, 13 ff. = Orph. *frag.* 215 Abel) so convincingly expounded by H. Diels *loc. cit.*

The Orphic *formula* ultimately influenced the ritual of Eleusis, where Persephone, not Baubo, was chthonian Queen: see Psellos τίνα περὶ δαιμόνων δοξάζουσιν Ἕλληνες; (printed in Psell. *de operatione daemonum* ed. J. F. Boissonade Norimbergae 1838 p. 36 ff.) p. 39 f. τὰ δέ γε μυστήρια τούτων, οἷα αὐτίκα τὰ Ἐλευσίνια, τὸν μυθικὸν ὑποκρίνεται Δία μιγνύμενον τῇ Δηοῖ, ἤγουν τῇ Δήμητρι, καὶ τῇ θυγάτρι ταύτης Περσεφάττῃ, τῇ καὶ Κόρῃ. ἐπειδὴ δὲ ἔμελλον καὶ ἀφροδίσιοι ἐπὶ τῇ μυήσει γίνεσθαι συμπλοκαί, ἀναδύεταί πως ἡ Ἀφροδίτη ἀπό τινων πεπλασμένων μηδέων πελάγιος. εἶτα δὲ γαμήλιος λέγεται ἐπὶ τῇ Κόρῃ ὑμέναιος, καὶ ἐπᾴδουσιν οἱ τελούμενοι· ' ἐκ τυμπάνου ἔφαγον, ἐκ κυμβάλων ἔπιον, ἐκιρνοφόρησα,

Now that *formula* stood next to the profession:

I have entered with quick feet upon the lovely Crown.

It would seem, then, that the initiate posed as the very consort of the chthonian Queen[1]. As such he had every right to mount her ladder, the ladder that led to Elysium. The 'child of Earth and starry Sky[2]' must needs be free of either world.

The soul-ladder appears again in that most pathetic and impressive document *The Passion of Saint Perpetua*[3] (March 7), who was done to death in the arena at Carthage *c.* 203 A.D. When in prison, she prayed, at her brother's request, that the future might be revealed to her, and had by way of answer the following vision:

'I beheld a bronze[4] ladder of wondrous size, reaching even to the sky, and so narrow that only one could mount it at a time. And in the sides of the ladder were fixed all manner of iron implements—swords, lances, hooks, knives—so that any who mounted carelessly or without looking upwards was torn and his flesh caught by the iron implements. And under the very ladder lay a snake of wondrous size, plotting against them that ascended and frightening them from the ascent. Now the first to go up was Saturus, who at the time of our arrest was not there, but later had given himself up on account of us. And he came to the top of the ladder and turned and said to me: "Perpetua, I await thee. But see that yonder snake bite thee not." And I made answer: "He will not hurt me in the name of Jesus Christ." And under the very ladder he put forth his head slowly, as though he feared me, and I, as if I were treading the first step, trod upon his head. And I went up and beheld an immense garden, and in the midst of the garden a white-haired man sitting, clothed like a shepherd, tall, milking his sheep. And standing round about him were many thousands clad in white raiment. And he raised his head and looked upon me and said to me:

ὑπὸ τὸν παστὸν εἰσέδυν.' ὑποκρίνεται δὲ καὶ τὰς τῆς Δηοῦς ὠδῖνας. ἱκετηρίαι γοῦν αὐτίκα Δηοῦς καὶ χολῆς πόσις καὶ καρδιαλγίαι. ἐφ' οἷς καί τι τραγοσκελὲς μίμημα παθαινόμενον περὶ τοῖς διδύμοις, ὅτιπερ ὁ Ζεύς, δίκας ἀποτιννὺς τῆς βίας τῇ Δήμητρι, τράγου ὄρχεις ἀποτεμών, τῷ κόλπῳ ταύτης κατέθετο ὥσπερ δὴ καὶ ἑαυτοῦ. ἐπὶ πᾶσιν αἱ τοῦ Διονύσου τιμαὶ καὶ ἡ κίστις (κύστις codd. A.B.) *καὶ τὰ πολυόμφαλα πόπανα, καὶ οἱ τῷ Σαβαζίῳ τελούμενοι, καὶ οἱ μητριάζοντες (μετρίζοντες* cod. A. G. Gaulminus tentaveratt *μητρίζοντες*), *Κλώδωνες* (so G. Gaulminus for *κληδόνες* codd. A.B.) *τε καὶ Μιμαλλόνες, καί τις ἠχὼν λέβης Θεσπρώτειος, καὶ Δωδωναῖον χαλκεῖον· καὶ Κορύβας ἄλλος, καὶ Κούρης ἕτερος, δαιμόνων μιμήματα. ἐφ' οἷς ἡ Βαυβὼ τοὺς μηροὺς ἀνασυραμένη, καὶ ὁ γυναικεῖος κτείς· οὕτω γὰρ ὀνομάζουσι τὴν αἰδῶ αἰσχυνόμενοι. καὶ οὕτως ἐν αἰσχρῷ τὴν τελετὴν καταλύουσιν.* Cp. throughout *supra* i. 392 ff.

Perpetua* Cambridge 1891 (Latin and Greek texts), A. Pillet *Histoire de Sainte Perpétue et de ses compagnons* Lille—Paris 1885 (Latin texts), cap. 4. I have translated the longer Latin text, which is admittedly the oldest source. J. Armitage Robinson *op. cit.* p. 19 f. prints in parallel columns the Long Latin, the Short Latin, and the Greek Version.

[4] The variants are: *scalam* cod. A. *scalam auream* cod. B. *scalam aeream* cod. C. *κλίμακα χαλκῆν* cod. Harris., cp. *σκάλαν χαλκῆν menol. Basil.* (J. Armitage Robinson *op. cit.* p. 21 f.). A friend of Armitage Robinson cj. *scalam aeriam.*

"I am glad thou hast come, child." And he called me and gave me a mouthful of the curds from his milking. And I received it with joined hands and ate; and all that stood round about said "Amen." And at the sound of their voice I awoke, still eating something sweet. And straightway I told it to my brother, and we understood that it meant suffering and thenceforward began to lose all hope in this life.'

Since the remaining visions of Perpetua seem to contain certain elements of mystical or mythical import[1], it is at least possible that here too we should recognise sundry pre-Christian traits. Orphism is suggested both by the celestial ladder and by the milky diet of the newborn soul[2], if not also by the very name of Satyros.

Perpetua is by no means the only saint associated with a ladder. Saint Sadoth (Feb. 29), who was martyred at Seleukeia on the Tigris in 344 A.D., dreamed that his predecessor Simeon Bar-Saboë stood at the top of a ladder, beckoning him from earth to heaven[3]. Saint Alexis of Rome (? Constantinople) or Edessa, who lived at the end of the fifth century and is commemorated on July 17 (by the Greeks on March 17), is represented with a ladder in his arms[4]. Saint Leonard (Nov. 6), who died as abbot of Limoges in 559 A.D. but is nowadays reckoned the principal saint of Bavaria[5], as patron of prisoners holds by a chain a youth mounting a ladder[6]. Saint John Klimax (March 30), who died in 606 A.D., was abbot of Mount Sinai and reverenced as a second Moses[7]: he got his title from the

[1] *E.g.* in cap. 7 the boy Deinokrates retains his gangrenous wound even after death (cp. the sons of Herakles on the Orphic 'Underworld' vase at Munich: Furtwängler—Reichhold *Gr. Vasenmalerei* i. 50 pl. 10, *supra* i. 222 n. 5) and cannot reach the water that he fain would drink (cp. Tantalos, *supra* i. 205 fig. 148); in cap. 10 Perpetua, stripped for the conflict, becomes a man, is pitted against an Egyptian wrestler and feels as though she were uplifted from the ground, but with joined hands pulls him down and wins the bout (cp. Herakles *v.* Antaios), receiving as her prize a green bough with golden apples on it (cp. Herakles and the apples of the Hesperides).

Ladder of Paradise, a book of thirty chapters in which he described out of his own experience the thirty steps leading upward to perfection[1]; hence he is figured with a ladder[2]. So too is Saint Emmeram of Ratisbon (Sept. 22)[3], but for a very different cause: in 652 A.D. he was bound to a ladder, mutilated, and murdered on a false charge[4]. Saint Bathild the Saxon (Jan. 26 or 27 or 30), who was married to Clovis ii in 649 A.D., shortly before she died had a vision of a ladder set up in front of an altar and of herself, escorted by angels, going up it into heaven[5]: she is represented accordingly[6]. Saint Romuald of Italy (Feb. 7), who lived *c.* 907—1027 A.D., once saw a ladder rising to the sky and his monks ascending it in white habits: he founded a fine church on the spot[7]. Saint Olaf king of Norway (July 29), who fell at Stikklestad in 1030 A.D., is portrayed with a ladder seen by him in a similar dream[8]. Saint Bernard Ptolemy (Aug. 21, 1348 A.D.), founder of the Olivetines at Siena, had—like Saint Romuald—a vision of angels leading white-robed monks up a ladder[9]. And Saint Angela of Merici (May 31, 1540

[3] Herrade de Landsberg *Hortus Deliciarum* edd. A. Straub—G. Keller Strasbourg 1879—1899 p. 43 pl. 56 (=my fig. 81) 'L'échelle des vertus' after C. M. Engelhardt *Herrad von Landsperg, Aebtissin zu Hohenburg, oder St Odilien, im Elsass, im zwölften Jahrhundert, und ihr Werk: Hortus deliciarum* Stuttgart—Tübingen 1818 p. 115 f. pl. 9. The whole design is inscribed: *Hec scala significat ascensum virtutum et religiosum sanctitatis exercitium, quo vite corona adipiscitur. Huic scale primum plurimi innitentes postea diabolicis sagittis vulnerati retrahuntur, et terrenis impedimentis ac concupiscentiis suis illecti et abstracti nequiter incurvantur.* The ladder rises obliquely from earth to heaven. Beneath its lowest step crouches the devil in the form of a dragon. Above its highest step the hand of the Lord holds out the crown of life. Two demons shoot arrows at the climbers and successfully overthrow a knight (*miles*) and his wife (*laica*), a nun (*sanctimonialis*), a clerk (*clericus*), a monk (*monachus*), a recluse (*inclusus*), and a hermit (*heremita*), who all fall downwards towards the objects of their desire. Two angels with sword and shield protect the uppermost figure, that of Virtue (*Virtus, id est caritas*), who advances to take the crown. On one side of the ladder we read: *Draco iste insidiatur scandentibus* and *Hos omnes periculose ab alto cadentes potest Dominus medicina penitentie iterum ad virtutum culmen restituere.* The happier alternative is indicated by the inscriptions: *Septem sunt scale quibus ascenditur ad regnum celorum: prima castitas, secunda mundi contemptio, tertia humilitas, quarta obedientia, quinta patientia, sexta fides, septima caritas de puro corde* and *Hec persona virtutis significat omnes sanctos et electos, qui angelica custodia perducuntur ad celestia premia. Virtus autem hec est caritas. Sola enim virtus caritatis, que ceteras virtutes continet, ad accipiendam celestis premii coronam perveniet.*

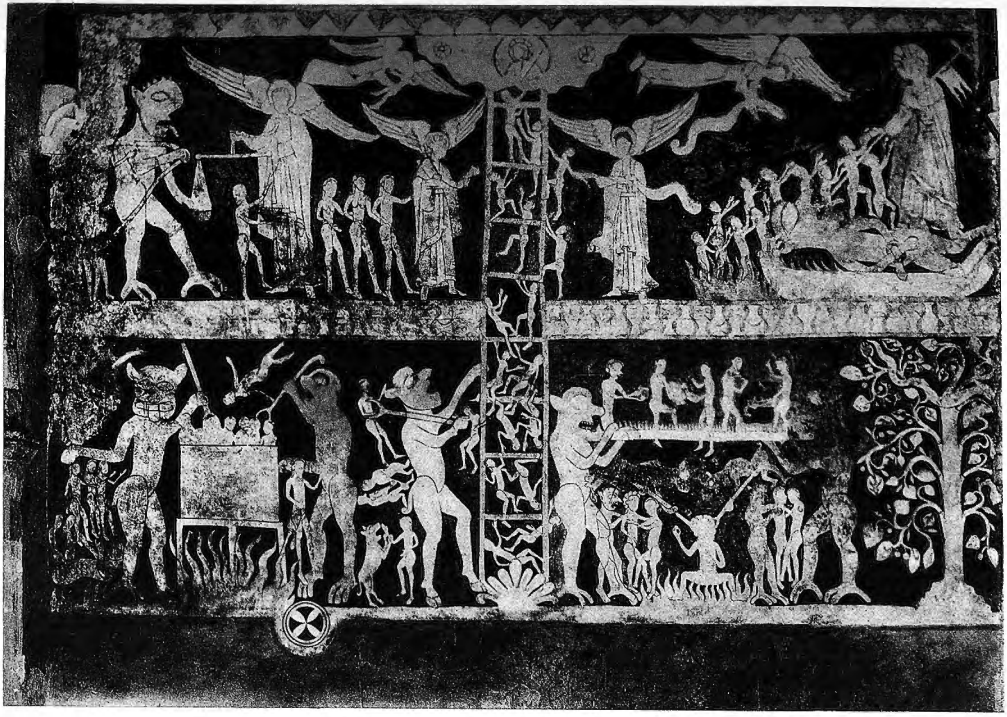
wise a traditional theme among the ecclesiastical painters of the

Surrey Archæological Collections 1871 v. 275—306 with col. pl., Eliza B. Miller in *The Victoria History of the County of Surrey* London 1912 iv. 192 f. with col. frontisp. by P. M. Johnston. Good photographs are obtainable in the form of picture-postcards (=my pl. viii). The colours used in the original are 'red and yellow ochre, a little native cinnabar and white' (Waller). The painting is divided into two registers by a horizontal band or nebuly. The lower register represents the torments of the lost; the upper, the

Greek Church[1]. Dante, when he ascends with Beatrice to the bliss of the saved. The two are connected by a vertical ladder rising towards a half-length figure of Christ in the act of benediction, with the sun on his right, the moon on his left. Below, to the right, is the tree of life with the serpent in it; and on the north wall adjoining it were remains of a large demon, now destroyed. Between the tree and the ladder is a usurer seated in flames and tormented by two demons: he is slung with money-bags, vomits coins, and holds up a piece of gold. The usurer is flanked by two amatory couples, perhaps clerk and concubine, priest and nun, each couple with an attendant spirit prompting to sin. To either side of them two large demons support a bridge of spikes, on which are seen several culprits marked by the emblems of their trades—a blacksmith condemned to forge a horseshoe without anvil, a mason with his pick, a woman with a ball of yarn, another woman with some attribute defaced, and a man with a bowl, probably one who had stolen a tithe of milk and must now carry it over the bridge without spilling. To the left of the ladder is a caldron full of flames, set over a fire and tended by two large demons, who are filling it with parricides and fratricides. On the extreme left the painting is damaged and obscure; but we can make out several souls of dancers, whose feet are gnawed by a recumbent wolf. On the opposite side of the caldron is a figure with pilgrim's staff and purse, but a wine-bottle in his hand: he had sold all to buy strong drink. The figure having her arm bitten by a dog is a warning to ladies against feeding their pets too well. Another large demon, with the cloven hoofs, tail, and ears of a Satyr, shoulders a two-pronged fork and is bent on picking off souls from the ladder. Behind him a woman and a man tumble downwards together: she holds out a gold coin and clasps a large gold-banded horn carried by him—a symbol of lewdness rather than of drunkenness. Above, to the right, is 'the Harrowing of Hell.' Christ advances upon the prostrate form of Satan, whom with cross and banner he thrusts down into the open jaws of Hell, here conceived as a gaping monster. The victor extends his hand to Adam, and liberates a troop of souls from the flames of Purgatory, while an angel, issuing from Heaven with a scroll, announces the fulfilment of prophecy. Two other angels stand on either side of the ladder as guards and guides of the blessed, who ascend towards Christ above them. A couple of souls—Enoch and Elijah—clamber up outside the ladder in an unusual way. Another exceptional case is that of the soul—presumably the penitent thief—carried direct to Paradise by a flying angel. To the left is St Michael weighing souls. Three females—probably the three Marys—pass towards the ladder. A fourth soul supplicates the archangel. Two others, weighed and found wanting, are flung into the gulf below. Lastly, to the left of the upper register, a demon, dragging many souls bound with a rope, tries to depress one scale and so send up the beam. The dedication-cross is on the lower edge of the painting, which measures 17 ft. 2 ins. in length by 11 ft. 2 ins. in height.

[1] The painter's manual by Dionysios Hieromonachos is an important source first published in a French translation by P. Durand *Manuel d'iconographie chrétienne grecque et latine* Paris 1845. The Greek text was first printed by A. Konstantinides, ed. 1 Athens 1853, ed. 2 Athens 1885, and is entitled Ἑρμηνεία | τῶν | ζωγράφων | ὡς πρὸς τὴν | Ἐκκλησιαστικὴν ζωγραφίαν | ὑπὸ | Διονυσίου τοῦ Ἱερομονάχου | καὶ ζωγράφου | Τοῦ ἐκ Φουρνᾶ τῶν Ἀγράφων: (συνγραφεῖσα ἐν Ἄθωνι τῷ 1458). Further bibliography in K. Krumbacher *Geschichte der byzantinischen Litteratur*[2] München 1897 p. 1117. It is now held that Dionysios lived early in the eighteenth century, but drew largely upon an anonymous painter's book of 1566 A.D.: see A. Papadopoulos Kerameus *Denys de Fourna. Manuel d'iconographie chrétienne*, etc. St Petersburg 1900, *id.* Διονυσίου τοῦ ἐκ Φουρνᾶ Ἑρμηνεία τῆς ζωγραφικῆς, etc. St Petersburg 1909, O. M. Dalton *Byzantine Art and Archaeology* Oxford 1911 p. 649. I append the text of the Ἑρμηνεία § 523 p. 242 f. Konstantinides[2]: **Ἡ ψυχοσωτήριος καὶ οὐρανόδρομος κλίμαξ.** Μοναστήριον καὶ ἔξωθεν τῆς πύλης αὐτοῦ πλῆθος μοναχῶν πάσης ἡλικίας· παρ' αὐτῇ δὲ κλίμαξ φθάνουσα μέχρις οὐρανοῦ· καὶ μοναχοὶ ἀνερχόμενοι διὰ τῶν βαθμίδων αὐτῆς· οἱ μὲν πρὸς τὰς ἀρχὰς τῆς κλίμακος ὄντες, οἱ δὲ πρὸς τὰ μέσα, οἱ δὲ πρὸς τὸ τέρμα σχεδόν· καὶ ἄγγελοι παρὰ τοῖς



Mural painting in Chaldon Church, Surrey: the Ladder of Salvation.

See page 136 *n.* 4.

seventh heaven of the planet Saturn, beholds a ladder leading to yet higher heights:

> Within the crystal, which records the name
> (As its remoter circle girds the world)
> Of that loved monarch[1], in whose happy reign
> No ill had power to harm, I saw rear'd up,
> In colour like to sun-illumined gold,
> A ladder, which my ken pursued in vain,
> So lofty was the summit; down whose steps
> I saw the splendours in such multitude
> Descending, every light in heaven, methought,
> Was shed thence[2].

The conception has left faint but unmistakable traces of itself in the trade-marks of early Italian paper-makers (fig. 82)[3]. And its

ἀναβαίνουσι βοηθοῦντες τοῖς μοναχοῖς· ὁ δὲ Κύριος τῆς κλίμακος ἄνω μεταξὺ ἀγγέλων πολυαρίθμων καὶ νεφελῶν λαμβάνει τὸν ἀναβαίνοντα μοναχὸν ἐκ τῶν χειρῶν διὰ τῆς μιᾶς, γηραιὸν ὄντα πάνυ τὴν ἡλικίαν καὶ ἱεροπρεπῆ, διὰ δὲ τῆς ἄλλης ἐπιθέτει ἐπὶ τῆς κορυφῆς τοῦ μοναχοῦ στέφανον ἀνθοφόρον καὶ λίθοις πεποικιλμένον· ἐκ δὲ τοῦ στόματος τοῦ Κυρίου ἐξέρχονται ταῦτα· "Δεῦτε πρός με πάντες οἱ κοπιῶντες καὶ πεφορτισμένοι, κἀγὼ ἀναπαύσω ὑμᾶς." Πρὸς τὰ ἀριστερὰ δὲ τῆς κλίμακος μέρη δαίμονες ἀναβαίνοντες καὶ καταβαίνοντες σύροντες πρὸς ἑαυτοὺς τοὺς μοναχοὺς διὰ τῆς βίας ἐκ τῶν ἐνδυμάτων· τινὰς μὲν τούτων φοβίζουσιν μακρόθεν· τινὰς δὲ ῥίπτουσιν κατακεφαλῆς ἐκ τῆς ἀνωτάτης βαθμίδος· τινὰς δὲ ἐκ τοῦ μέσου, τινὰς δὲ εὐθὺς ἐν τῇ ἀναβάσει, τινὰς δὲ δοκιμάζουσιν ἵνα ῥίψωσι κάτω, ἀλλὰ μὴ δυνάμενοι καταξεσχίζουσιν ἑαυτούς· τινὲς δὲ καί τοι κατὰ κεφαλῆς ὄντες συρόμενοι πρὸς τὰ κάτω παρὰ τῶν δαιμόνων ἀντέχουσιν ὅμως κρατοῦντες τὴν κλίμακα ὅλαις δυνάμεσι διὰ τῶν χειρῶν· ἐγγὺς δὲ τῆς κλίμακος ὁ παμφάγος ᾅδης ὡς δράκων μέγας καὶ φοβερὸς ἔχων ἐντὸς τοῦ στόματος μοναχὸν καταβαίνοντα πρὸς τὰ κάτω. **Ἐπίγραμμα.** *"Βλέπον κλίμακα πρὸς πόλον ἑστραμμένην | Ὀρθῶς νόειμοι ἀρετῶν ἀναβάσεις | Ῥευστοῦ βίου οὖν ἐκφυγὼν ὅσον τάχος | Ἴθι πρὸς αὐτὴν καὶ ἀνελθε ἐμπόνως | Ἔχων δὲ φρουροὺς τοὺς χοροὺς τῶν ἀγγέλων | Δόχους διέλθοις τῶν πονηρῶν δαιμόνων. | Ὅπως ἀνελθὼν εἰς πύλας οὐρανίους | Ἕξεις στέφανον χειρὶ τοῦ Κυρίου."*

[1] Saturn.

[2] Dante *Div. Comm.* Parad. 21. 22 ff. trans. H. F. Cary.

[3] H. Bayley *The Lost Language of Symbolism* London 1912 i. 32 f. figs. 52—55 after C. M. Briquet *Les Filigranes* Dictionnaire historique des Marques du Papier dès leur apparition vers 1282 jusqu'en 1600 Paris etc. 1907 ii. 344 with figs. 5898—5934 (my fig. 82 is from nos. 5900, 5903, 5934, 5921, 5925, 5929, 5933), who says: 'Il n'est pas impossible qu'il y ait un rapport entre le filigr. de l'échelle et les armoiries de la famille della Scala, mais rien ne l'établit jusqu'ici.'

The combination of ladder with cross is noteworthy. Writers of mediaeval *sequentiae* often describe the cross as a ladder (*e.g.* J. Kehrein *Lateinische Sequenzen des Mittelalters* Mainz 1873 p. 67 no. 60, 5 haec est scala peccatorum, p. 73 no. 68, 3 tu nos hinc per modum scalae | ducas ad coelestia, p. 75 no. 73, 2 haec est scala novae legis, p. 76 no. 75, 9 tu scala, p. 331 no. 473 (Notker Balbulus), 1 ff. scalam ad coelos subrectam tormentis cinctam, | cuius ima draco servare cautus invigilat iugiter, ne quis eius vel primum gradum possit insaucius scandere. | cuius ascensus extracto Aethiops gladio vetat exitium minitans. | cuius supremis innixus iuvenis splendidus ramum aureolum retinet. | etc.)—a description readily applicable to the cross with three transverse bars (R. St. J. Tyrwhitt in Smith—Cheetham *Dict. Chr. Ant.* ii. 497). Again, the ladder that appears among other emblems of the Passion (Mrs H. Jenner *Christian Symbolism* London 1910 p. 58) is presumably symbolic as well as realistic.

abiding helpfulness is attested by the popularity of Longfellow's poem *The Ladder of Saint Augustine*[1]. J. M. Neale had the experi-

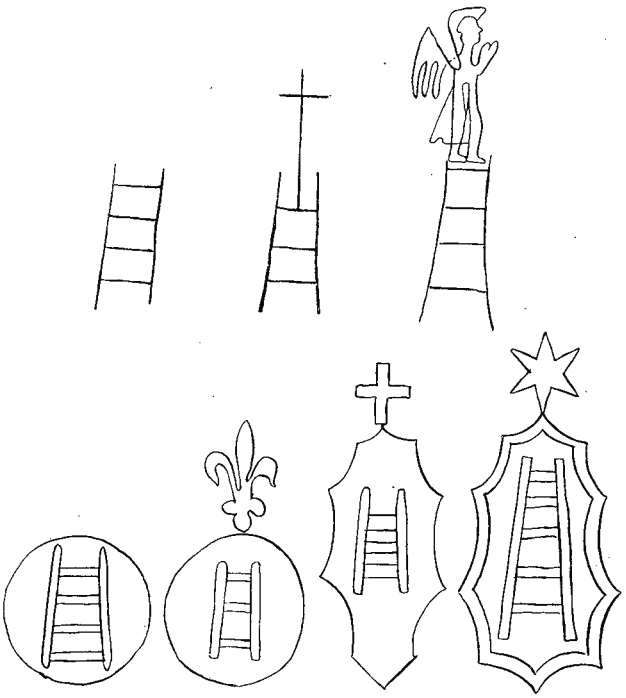


Fig. 82.

ence of centuries at his back, when with regard to life's trials, sorrows, and temptations he put the wistful question:

What are they but the ladder
Set up to heaven on earth?

(κ) The Sky-Pillar in Sardinia.

The invocation prefixed to the Orphic *Hymns* is addressed to a great variety of gods and goddesses including—

[1] H. W. Longfellow ('Cambridge Edition') London 1895 p. 186 f. with note on p. 668: 'The words of St. Augustine are, "De vitiis nostris scalam nobis facimus, si vitia ipsa calcamus."—Sermon III. *De Ascensione.*'

all Winds,
Thunders, and parts of the four-pillared World[1].

But this conception of the sky as resting on four pillars is not incompatible with belief in the soul-ladder: both notions were combined in Egypt[2]. Neither is the four-pillared sky necessarily

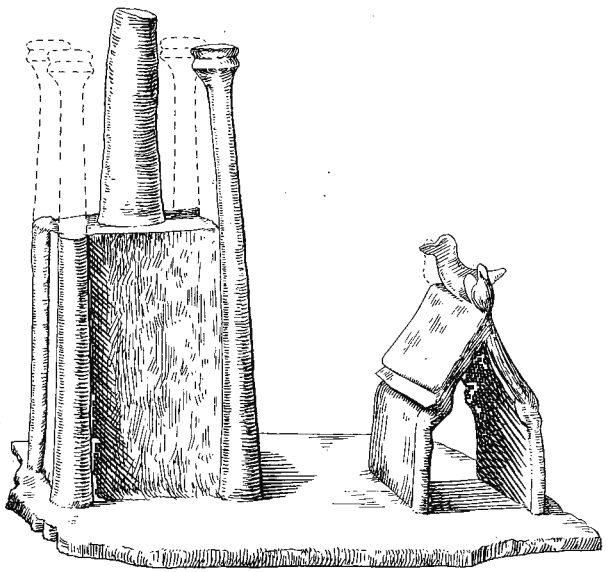

Fig. 83.

inconsistent with one central prop, the *universalis columna*[3]. In the Museum at Cagliari is a bronze from Mandas representing the whole apparatus of an early Sardinian cult (fig. 83)[4]. From a sub-

[1] Orph. *εὐχὴ πρὸς Μουσαῖον* 38 f. *Ἀνέμους τε πρόπαντας καὶ Βροντὰς Κόσμου τε μέρη τετρακίονος αὐδῶ* (so Portus for *αὐλῶν*).

[2] *Supra* p. 125 f. The *Tet*-pillar, with regard to which conjecture has been rife (Sir G. Maspero *The Dawn of Civilization*[4] London 1901 p. 130 n. 6, E. A. Wallis Budge *Egyptian Magic* London 1899 p. 44 ff. 'The Amulet of the Tet'), would—I think—be best explained as an abbreviated group of four columns representing the four supports of the sky (cp. C. J. C. Reuvens *Lettres à M. Letronne* Leide 1830 i. 69 together with W. M. Flinders Petrie *Medum* London 1892 p. 31).

[3] Cp. the modern Greek belief in the earth as supported by one column with four other pillars (*supra* p. 56 n. 2 no. 621).

[4] L. A. Milani 'Sardorum sacra et sacrorum signa' etc. in the *Hilprecht Anniversary Volume* Leipzig—London—Paris—Chicago 1909 p. 312 f. fig. 1, A. Taramelli 'Il tempio

stantial square base, with a column at each angle, rises a central shaft, broken at the summit, which—as A. Taramelli infers from a votive bronze boat found in the same place (fig. 84)[1]—was originally

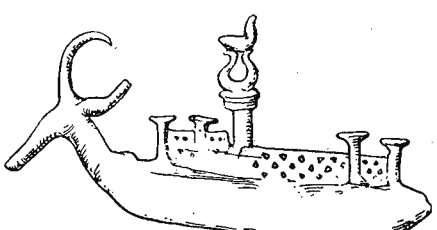

Fig. 84.

topped by bull's horns supporting a dove. Adjoining this structure is a small edifice with a gabled roof, on the ridge of which are the remains of three doves. It seems probable that the quincunx of pillars rising from a solid base was in effect a model of the sky uplifted above the earth[2], that the bird resting on the central shaft

nuragico ed i monumenti primitivi di S. Vittoria di Serri (Cagliari)' in the *Mon. d. Linc.* 1915 xxiii. 390 ff. fig. 93 (=my fig. 83: restorations after Milani *loc. cit.*). As to the date of the *nuraghi* civilisation, 'All we can say is that, although it may have reached its highest development in the bronze age, it certainly flourished in the eneolithic period' (T. E. Peet *The Stone and Bronze Ages in Italy and Sicily* Oxford 1909, p. 236).

[1] A. Taramelli *loc. cit.* p. 390. The boat in question is published by L. A. Milani in the *Hilprecht Anniversary Volume* p. 333 n. 2 fig. 34 (=my fig. 84). It is a two-wicked lamp in the form of a bull-headed boat with a *témenos* on board: an enclosure with four pillars surrounds a taller column, on the capital of which is a pair of horns supporting a bird. Milani and Taramelli both compare the prow of a stag-headed bronze boat from Vetulonia, on which four clustered pillars are surmounted by a single shaft with horns and bird (L. A. Milani *Studi e materiali di archeologia e numismatica* Firenze 1902 ii. 87 fig. 274). Similar too is a seal-impression found by A. J. B. Wace in a well at Mykenai, which represents a pillar topped by ritual horns with a dove between them and flanked by two other doves.

[2] L. A. Milani 'Il tempio nuragico e la civiltà asiatica in Sardegna' in the *Rendiconti d. Lincei* 1909 xviii. 579—592 (cp. *id.* in the *Hilprecht Anniversary Volume* p. 312, A. Taramelli *loc. cit.* p. 389 ff.) compares the pillared base of the Sardinians with the *zikkurat* of the Babylonians. The analogy is remote; but it is certainly thinkable that the solid plinth, like the *zikkurat* (*supra* i. 603), was a conventionalised form of mountain, or at least stood for *terra firma*.

C. Brandenburg 'Reisenotizen aus Sardinien' in the *Zeitschrift für Ethnologie* 1914 xlvi. 643 says: 'Das Objekt ist als "Tempelmodell" bezeichnet; es könnte aber möglicherweise auch ein ex voto sein, etwa das Haus eines Häuptlings mit hölzernem Wachtturm daneben, das zum Dank für die Errettung aus irgendeiner Katastrophe den Göttern geweiht wurde.' My experienced friend Mr T. Ashby agrees with me in thinking this solution of the problem unlikely (July 11, 1920).

was the sky-god in feathered form, and that the birds perched on the neighbouring roof betokened his presence in the sacred building near at hand. Perhaps we may venture a step further and identify this feathered sky-god with Sardopator[1] or Sardus Pater, who appears in a feathered head-dress on the copper coins of the island (fig. 85)[2]. Was it he that sent the winter rains so vital to the life of the Sardinian peasant[3]?

Fig. 85.

(λ) Diana-Pillars.

Similar constructions appear in the landscape-frescoes of Italy and are susceptible of the same interpretation. A remarkable painting in greenish monochrome from Herculaneum, now in the Naples collection (fig. 86)[4], shows a pillar-shrine set by the edge of a lake or river. A short flight of steps leads up to a square plinth, on which stands a pillar with moulded base, club-shaped shaft, and shallow disk-like capital. The shaft is surrounded by several bands and is marked here and there with patches[5] probably denoting votive objects affixed to it[6]. Above the capital the shaft is continued in the form of a tapering finial, round the lower part of which are seen three ornaments (heads of deer?)[7]. The pillar is half-encircled by a wall carrying an Ionic colonnade, which is finished off with a low cornice and a row of vases. Two side-walls, each supporting a

Mau *Geschichte der decorativen Wandmalerei in Pompeji* Berlin 1882 pp. 167 ff., 196 ff. pl. 9, *id.* 'Wandschirm und Bildtraeger in der Wandmalerei' in the *Röm. Mitth.* 1902 xvii. 213 fig. 11, G. Rodenwaldt *Die Komposition der pompejanischen Wand-*

Steps give access to a bridge across a stream, along which three ducks are swimming. Above the bridge is a broad but low marble plinth. Over this trails a fillet. On it are a *bucranium*, a sacrificial bowl from which incense-smoke (?) curls upward, and a goat whose hind legs appear on a detached piece of plaster. From the plinth rises the club-like pillar with its disk. The shaft, yellowish brown in colour, seems to be of timber[1]: to it are attached the heads of several woodland animals—stag, boar, and goat. Below the discoid capital hang pendants (tassels?); and above it project other small accessories (a row of deer-heads?)[2]. The finial, which doubtless topped all, is not preserved. Partially encircling the pillar is a curved wall, over which woollen fillets are slung. The wall is pierced with a series of narrow openings and surmounted by three archaistic statues of females[3], each with a metal spike on her head and a pair of torches in her hands. To the right are several indistinct architectural features, apparently two large smooth pillars on a base. Upon one of these pillars a parrot is perched. And upon the base lies a great golden crown, set with red and green jewels and adorned with a row of deer-heads (?)[4] precisely resembling those of the disk. In the foreground a rude stone altar[5] is burning (?). In the background a huge tree, perhaps meant for a pine, spreads abroad its branches surrounded by the foliage of a dim-lit forest. The whole scene almost certainly depicts a shrine of Diana *Nemorensis* decked with spoils of the chase. It is on record that this goddess was worshipped in the form of 'a log' (*lignum*)[6]. And the ring of deer-heads (?) on the upper part of the pillar recalls the 'crown decorated with stags' worn by Nemesis, the Greek counterpart of Diana *Nemorensis*[7]. Finally, in the great golden crown tricked out

gemälde Berlin 1909 p. 38, M. Rostowzew 'Die hellenistisch-römische Architekturlandschaft' in the *Röm. Mitth.* 1911 xxvi. 6 f. fig. 2 (which I have used to correct Mau's colour-plate). Height $2{\cdot}53^{m}$. Breadth $1{\cdot}44^{m}$. The painting is of the second or 'architectural' style (*c.* 80–10 B.C.).

[1] M. Rostowzew *loc. cit.* regards the pillar as made of bronze: but how then were the heads of the slain beasts fastened to it?

[2] For M. Rostowzew these are '*Greifenköpfe*.' They are not particularly like deer, or griffins either. Cp. the ornaments of the crown surmounting a sacred pillar, flanked by Aphrodite and Hermes, in a wall-painting from Pompeii (B. Quaranta in the *Real Museo Borbonico* Napoli 1824 i. 1—9 pl. 32, Helbig *Wandgem. Camp.* p. 8 no. 20, R. Engelmann *Bilder-Atlas zum Homer* Leipzig 1889 Odyssee p. 4 no. 24 pl. 4).

[3] '*Bronzebilder der Hekate*' (Rostowzew *loc. cit.*).

[4] M. Rostowzew again says '*mit...Greifenköpfen*.'

[5] Cp. Gratt. *cyneg.* 483 ff. (cited *supra* i. 274).

[6] Commod. *instructiones* 1. 19. 2 (cited *supra* i. 281 n. 5).

[7] *Supra* i. 275. If Rostowzew's interpretation of the upstanding ornaments as griffin-heads is correct, we must comfort ourselves with the reflection that the griffin was a more frequent attribute of Nemesis than the stag (*supra* i. 270, 276, 281).

with the same deer-heads (?) we may recognise the trappings of Diana's human consort, the *rex Nemorensis* himself[1]. There is indeed a certain fitness in the fact that a fresco illustrating the Arician cult was chosen for the walls of this *triclinium*. The 'House of Livia' was in all probability[2] acquired from the Hortensii by Augustus, who occupied it for more than forty years[3]. He seems to have reconstructed its back court, and—we are told—after the work was done made the whole house public property, continuing to hold it as *pontifex maximus*[4]. Later, if R. Lanciani[5] is right, it became the house of Germanicus father of Caligula, who—jealous of the long reign of the *rex Nemorensis*—actually hired a cut-throat to dispose of him[6]. Was it our fresco that suggested the freak?

Another fresco (fig. 88)[7], discovered at Pompeii, during the excavations of 1888—1890, on the end wall of a *triclinium* in the fifth region[8], adds further points of interest. In the centre of a rocky, mountainous scene, close to a stream or lake, grows a leafy pine-tree. Beside it is set a club-like pillar tapering downwards and surmounted by a capital of some sort with ornaments (deer-heads?) as before: the pillar is painted in light violet and is twined with

[1] Traces of a similar crown can perhaps be made out to the left of the sceptre in the monochrome painting from Herculaneum (*supra* p. 144 fig. 86). De Visser *De Gr. diis non ref. spec. hum.* p. 56 n. 4 observes that many Roman frescoes attribute a 'corona dentata' to Artemis (*e.g.* Helbig *Wandgem. Camp.* p. 67 nos. 234, 236, 237, p. 68 nos. 240, 247, 248, p. 71 f. no. 253, p. 72 f. no. 256, Sogliano *Pitt. mur. Camp.* p. 28 no. 112, p. 30 f. no. 119, p. 141 f. no. 687, cp. *id. ib.* p. 29 nos. 114 f., A. Mau in the *Röm. Mitth.* 1890 v. 264 f. See further L. Stephani *Nimbus und Strahlenkranz* St Petersburg 1859 p. 123 (extr. from the *Mémoires de l'Académie des Sciences de St.-Pétersbourg.* vi Série. Sciences politiques, histoire, philologie. ix. 483), so that the crown in our fresco might be that of the goddess, not that of her priest. But, if the goddess is represented by the *lignum*, her crown is presumably the disk set upon it.

[2] See G. Pinza in the *Bull. Comm. Arch. Comun. di Roma* 1910 xxxviii. 1 ff. and O. L. Richmond 'The Augustan Palatium' in the *Journ. Rom. Stud.* 1914 iv. 193 ff. Others (*e.g.* O. Richter *Topographie der Stadt Rom*[2] München 1901 pp. 143 f., 160, H. Jordan—C. Huelsen *Topographie der Stadt Rom im Alterthum* Berlin 1907 i. 3. 61) have regarded it as the house of Ti. Claudius Nero, first husband of Livia and father of the emperor Tiberius, who was born on the Palatine (Suet. *Tib.* 5).

[8] *Reg.* v. 2. 10.

broad ribands. Raised on a square plinth at the foot of tree and pillar is the statue, perhaps a herm, of Diana with a *modius* on her head. Her left hand is uplifted and rests on a sceptre; her right is

Fig. 88.

outstretched as if it held a *patera*.. Before her, clad in *chlamýdes* of various hues, stand three men. One holds out towards her a wreath of leaves; his two companions turn their heads away. The hunting

spears that they carry, the pair of hounds attending them, and the stag bounding through a rocky archway in the background, all show that this is the cult of Diana *Nemorensis*. Grattius expressly mentions puppies and wreaths and weapons in his description of her woodland rite[1]. Who the long-robed figure in the lower left-hand corner may be, we cannot say. But it is noteworthy that the pillar-shrine of the goddess is duplicated and even triplicated in the same view. To the right of the pine and rather more in the background rises a second club, narrowing upwards and topped by a disk which apparently carries a tray or *liknon*. To the club are bound a short thick stick (?) and other votive offerings. By it stands the second effigy of Diana, this time an unmistakable herm. She bears again a *modius* on her head, holds on her shoulder a short sceptre (?), and extends her right hand. Club and herm alike are painted in dull violet to express distance. Away to the right a low, broad tripod, white and yellow, is placed on a round, whitish base. Adjoining this are bushes of bay (?); in the background, rocks and trees. On the left, above the arched rock, is seen yet a third club-pillar set on a square step beside an ancient, leafless tree. The painting as a whole may indeed be taken to illustrate no fewer than six stages in the evolution of religious art—the living tree, the dead tree, the club, the pillar, the herm, and the statue on its plinth. Moreover, it should be observed that here, as in the contemporary fresco from Herculaneum[2], the artist is fitting figures originally drawn from the gallery of Greek myth into a frankly Italian framework. Hippolytos, immortalised by Euripides[3] as presenting a garland to his patron goddess Artemis, is thus transformed into the hunter offering his wreath to Diana *Nemorensis* —a subtly appropriate transformation, when we call to mind the belief that Hippolytos came to life again in Diana's grove at Nemi[4].

Fig. 89.

In passing I may note a parallelism of form, and perhaps of function, which would repay further study. The pillar of Diana as represented on the frescoes was a stout post, rising from a stepped base, wound about with a fillet and crowned by a

[4] *Supra* i. 225 n. 4, 282 n. 1, *infra* § 3 (a) v (*v*).

disk, from which pendants were dangling. In short, it was an erection uncommonly like our own May-pole, which I illustrate from a manuscript dated *c.* 1499 A.D. (fig. 89)[1]. The comparison *donne à penser*[2].

The landscape-paintings—not to dwell on the very similar landscape-reliefs (figs. 91, 92)[3]—, when viewed in connexion with the

[1] R. Chambers *The Book of Days* London—Edinburgh 1864 i. 575 : 'In the illuminations which decorate the manuscript "Hours" once used by Anne of Brittany and now preserved in the Bibliothèque Royale at Paris, and which are believed to have been painted about 1499, the month of May is illustrated by figures bearing flower-garlands, and behind them the curious May-pole here copied, which is also decorated by colours on the shaft, and ornamented by garlands arranged on hoops, from which hang small gilded pendents. The pole is planted on a triple grass-covered mound, embanked and strengthened by timber-work.' *Id. ib.* p. 577 notes that in the neighbourhood of Salzburg it is the custom to trick out the May-pole with birds, stags, etc. ('In one instance a stag-hunt is so represented'): the resemblance to the Roman pillar of Diana *Nemorensis* is curiously close.

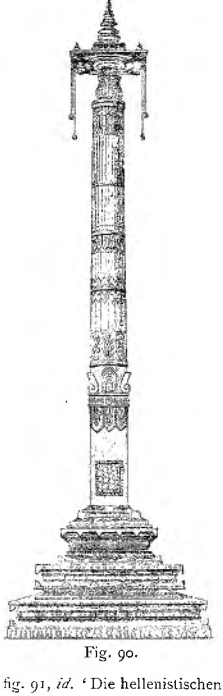

Fig. 90.

[2] *Supra* i. 291, 339 I suggested that the May-pole was topped by an effigy of the sun (globe, wheel, hoop). But these horizontal garlands point rather to an effigy of the sky (*infra* p. 157 f.).

Analogous forms might be traced yet further afield. A sacred column (*stambha*, *lât*) of granite (height 52½ ft) facing a Jain temple at Mudubidery or Morbidry near Mangalore (E. Moor *The Hindu Pantheon* London 1861 pl. 77 (=my fig. 90), *id. The Hindu Pantheon*[2] Madras 1864 p. 368 pl. 44) bears indeed a curious resemblance to the Diana-pillars of ancient Italy. This may, of course, be wholly fortuitous. But it is thinkable that there was some remote connexion between them. For the Jains were apparently known to the later Greeks (Hesych. Γεννοί· οἱ Γυμνοσοφισταί); and the *stambha* or *lât* in its earliest form has *quasi*-classical traits (see J. Fergusson *History of Indian and Eastern Architecture* rev. by J. Burgess and R. Phené Spiers London 1910 i. 54, 56 ff. fig. 5 ff., 346 ff. fig. 202 f., ii. 21 fig. 275, 81 ff. fig. 308). Moreover, the Jains sometimes compared the world with a spindle resting on a half spindle (H. T. Colebrooke *Miscellaneous Essays*[2] London 1873 ii. 198 f., C. Lassen *Indische Alterthumskunde* Leipzig 1861 iv. 771). Hence it is tempting to conjecture that the *stambha* was, at least originally, a world-pillar.

[3] A few examples will suffice: Fig. 91, a marble relief (height *c.* 1·20^{m}, breadth 0·75^{m}) in the Palazzo Colonna at Rome (Matz—Duhn *Ant. Bildw. in Rom* iii 66 f. no. 3576, Montfaucon *Antiquity Explained* trans. D. Humphreys London 1725 Suppl. i. 132 pl. 31 no. 8 with sides reversed, Gerhard *Ant. Bildw.* p. 287 f. pl. 42, 1, *id. Über den Gott Eros* Berlin 1850 p. 34 f. pl. 2, 1, Boetticher *Baumkultus* pp. 158 f., 539 fig. 26, T. Schreiber *Die hellenistischen Reliefbilder* Leipzig 1889 pl. 15 = my fig. 91, *id.* 'Die hellenistischen Reliefbilder und die augusteische Kunst' in the *Jahrb. d.*

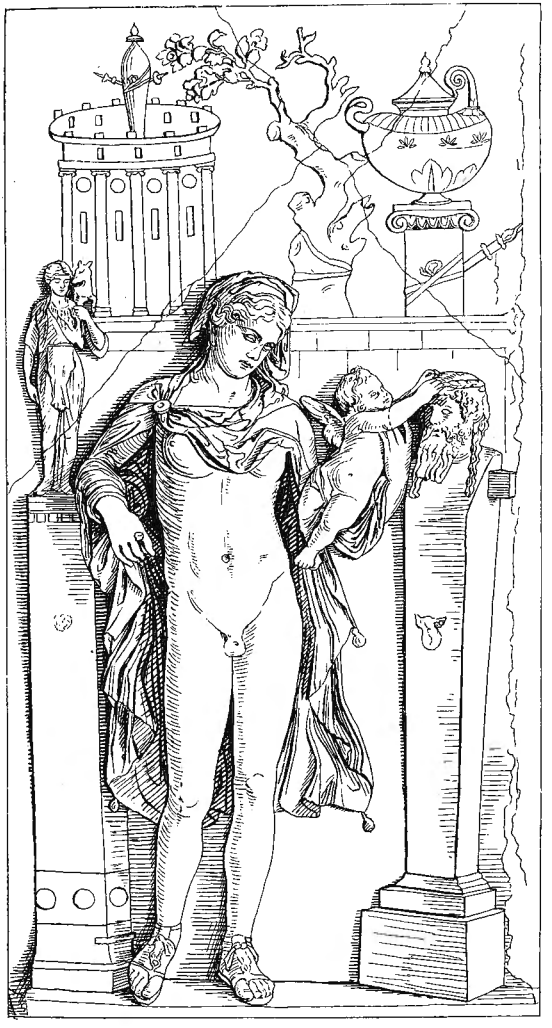

Fig. 91.

Fig. 92.

kais. deutsch. arch. Inst. 1896 xi. 99 n. 56, 100 n. 58, Reinach *Rép. Reliefs* iii. 220 no. 2, M. Rostowzew 'Die hellenistisch-römische Architekturlandschaft' in the *Röm. Mitth.* 1911 xxvi. 105 f.), shows Hermaphroditos nursing the infant Eros, who arranges a wreath on a herm to the right. To the left an archaistic Artemis, wearing a skin and holding a fawn on her shoulder, is mounted on a pilaster. (Restored: Hermaphroditos' nose, right hand, *phallós*; Eros' right fore-arm; the herm's beard and *phallós*; Artemis' head; the fawn's head.) The background represents a precinct-wall, above which we see in the centre an ancient oak with a band twined about its trunk, to the right an Ionic column with a burning torch tied to its shaft and a vase set on its capital, to the left a circular pillar-shrine with Ionic columns, windows, entablature, second row of windows, and battlements, the shrine enclosing a Diana-pillar with two torches bound to it.

Fig. 92, a marble relief (height 0·30^{m}, breadth 0·34^{m}) found at Rome in 1820 and now at Munich (Furtwängler *Glyptothek zu München* p. 370 f. no 455, *id. ib.*^{2} p. 397 no. 455, *id. Ein hundert Tafeln nach den Bildwerken der kgl. Glyptothek zu München* München 1903 pl. 93, 2, J. M. Wagner in the *Ann. d. Inst.* 1836 viii. 47—52, *Mon. d. Inst.* ii pl. 27, Boetticher *Baumkultus* pp. 156 ff., 543 fig. 56, T. Schreiber *Die hellenistischen Reliefbilder* Leipzig 1890 pl. 80, *id.* 'Die hellenistischen Reliefbilder und die augusteische Kunst' in the *Jahrb. d. kais. deutsch. arch. Inst.* 1896 xi. 99 n. 56, 100 n. 58, J. E. Harrison 'Mystica vannus Iacchi' in the *Journ. Hell. Stud.* 1903 xxiii. 297 f. fig. 6, *ead.* 'Note on the mystica vannus Iacchi' in the *Ann. Brit. Sch. Ath.* 1903—1904 x. 147, Reinach *Rép. Reliefs* ii. 82 no. 1, M. Rostowzew 'Die hellenistisch-römische Architekturlandschaft' in the *Röm. Mitth.* 1911 xxvi. 102 f.), portrays a countryman driving a cow to market. He carries a basket and a pole with a dead hare hanging from it; his cow has a couple of sheep slung pannier-wise over its back. (Restored: the countryman's head and right fore-arm, basket, pole with part of hare; the cow's head.) Behind this

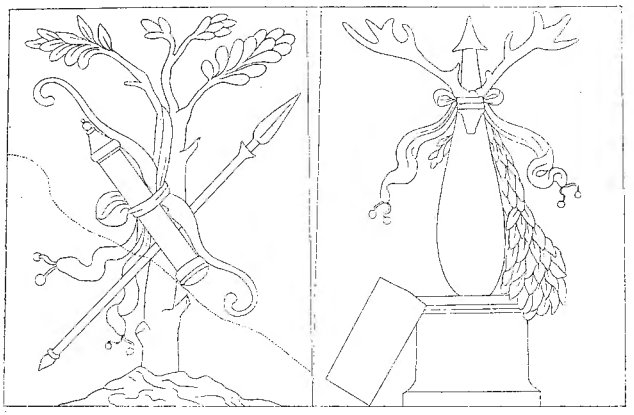

Fig. 93.

group appears a circular pillar-shrine with windows in its wall, which is partially broken down. Through the gap we see a decorative Diana-pillar with disk-like capital, from which two tassels are hanging. A pair of timbrels is set up on the wall, a flaming torch

bronze shrines from Mandas[1], enable us to reach certain tentative conclusions. In the first place, it would seem that the cosmological belief expressed in the cult-monuments of Sardinia was common to Italy also[2]. Italian rustics at the close of the republic were still

bound to the pillar, and a *lêknon* full of fruits including a phalloid gherkin or small cucumber placed upon the disk. Adjoining the pillar-shrine on the right is a gateway, with pine-cone as finial, built over an old oak-tree, the trunk of which disappears behind a wall to the right; on the left, a low wall with narrow openings left in it, a vase set upon it, and a *thýrsos* and two torches leaning against it. The background to the left shows an *aedicula* of Priapos with an arched entry and a windowed side.

Fig. 93, the three-sided base of a *candelabrum* in the Vatican (Gerhard *Ant. Bildw.* p. 322 pl. 83, Boetticher *Baumkultus* p. 77 f. figs. 9 f., E. Saglio in Daremberg—Saglio *Dict. Ant.* i. 413 fig. 499, Helbig *Guide Class. Ant. Rome* i. 259 f. no. 369, *ib.*[3] i. 229 no. 356, Baumeister *Denkm.* i. 297 fig. 313), represents (*a*) a quiver, bow, and hunting-spear hung from the branch of a bay-tree, (*b*) a Diana-pillar with a stag's antlers and a garland bound to it and a votive tablet leaning against it, (*c*) a rustic altar decked with a garland: on the altar are offerings—a pine-cone etc.; against it leans a blazing torch, while a deer bites playfully at the riband hanging from the torch.

Fig. 94, a silver box-lid obtained from the Roman dealer Capranesi by E. Gerhard and now at Berlin (O. Jahn in the *Arch. Zeit.* 1858 xvi. 229 ff. pl. 118, 1 = my fig.), renders in high relief an altar-top with a group of votive or sacred objects lying upon it.

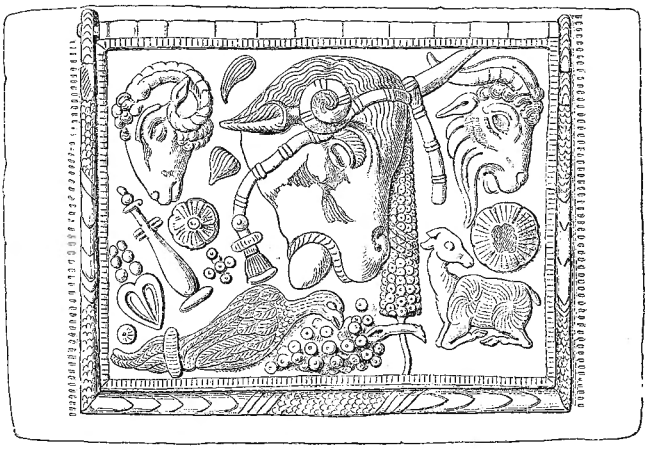

Fig. 94.

These include a filleted ox-head, a sheep's head, a goat's head, a kid with folded legs, a bird with bound wings, a bunch of grapes, an ear of maize, a fig, an almond, etc. Among them is a club-shaped Diana-pillar (Jahn describes it with hesitation as 'eine Spindel') of the sort already familiar to us.

[1] *Supra* p. 141 f.

[2] This may be disputed. Some archaeologists have looked to Egypt, others to Asia Minor or Syria, as the source from which the pillar-worship of Graeco-Roman art was

ΒΕΡΕΝΙΚΗCΒΑCΙΛΙCCΗC

ΑΓΛΑΘΗCΤΥΧΗC

Fig. 95.

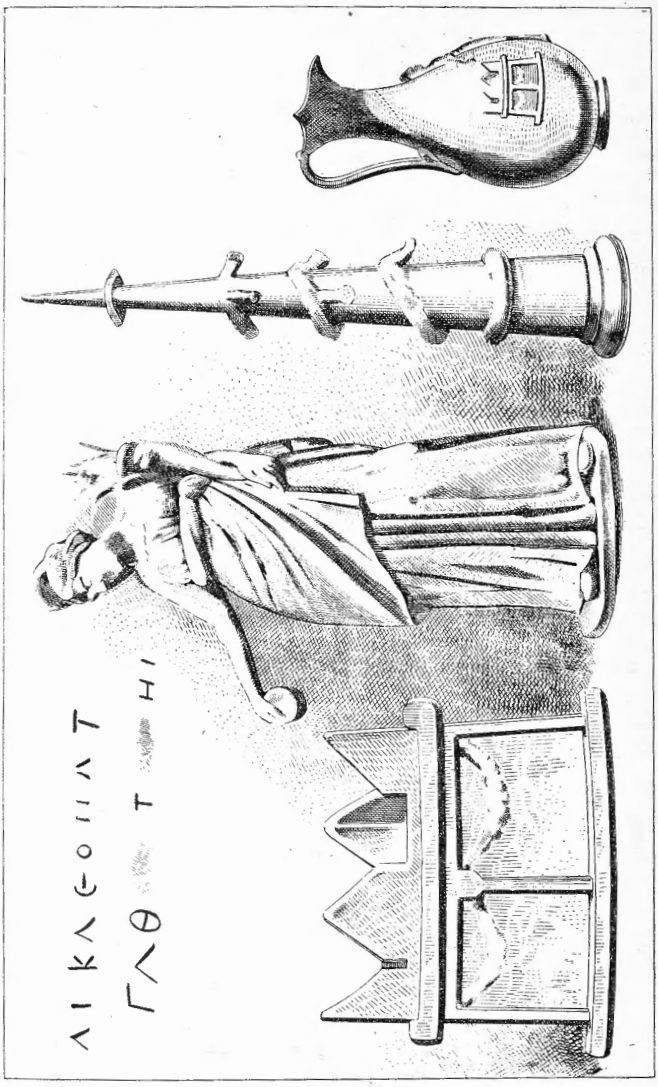

Fig. 96.

making the sky-column on its plinth within a ring of pillars or pilasters pretty much as the Sardinians had done at the beginning of the bronze age, though quite possibly the meaning of the custom had long been forgotten. Secondly, we note that the central shaft or sky-prop was of wood, a sacred log, in short an Italian *Irminsûl*, modified by art into a tapering column of peculiar form[1]. Further, we may suspect (though we can hardly prove the point) that its most peculiar feature, the flat disk serving as capital, had come to be taken for a representation of the round sky resting on the sky-

derived. And arguments more or less specious are not wanting. On the one hand, a very similar pillar, with cylindrical base, discoid capital, and tapering shaft, occurs as part of the relief-decoration on blue porcelain jugs inscribed with the names of Ptolemaic kings and queens (E. Beulé 'Le Vase de la Reine Bérénice' in the *Journal des savants* 1862 pp. 163—172 with pl. = my fig. 95, F. Lenormant 'Le vase de la reine Cléopatre' in the *Rev. Arch.* 1863 i. 259—266 pl. 7 = my fig. 96, T. Schreiber *Die alexandrinische Toreutik* Leipzig 1894 p. 433 n. 47, *id.* 'Die hellenistischen Reliefbilder und die augusteische Kunst' in the *Jahrb. d. kais. deutsch. arch. Inst.* 1896 xi. 100 n. 1, H. B. Walters *History of Ancient Pottery* London 1905 i. 129, and especially E. Breccia in the *Bulletin de la Société Archéologique d'Alexandrie* 1910 xii. 93—98). On the other hand, a sherd of Pergamene relief-ware (not later than *s.* iii B.C.), found at Pergamon and now in the Antiquarium at Berlin, represents a sacred pillar, which resembles that of the Romans even more closely (M. Rostowzew 'Die hellenistisch-römische Architekturlandschaft' in the *Röm. Mitth.* 1911 xxvi. 114—116, 130 pl. 11, 3 = my fig. 97): on a garlanded cylindrical base stands a club-like pillar with disk and finial; propped against the base are a double flute (?), a *bucranium*, and a *lagobólon*, the other end of which seems to rest on a tree-stem; a *sýrinx* is fastened to the pillar by a riband; and Pan leans against it playing on the lyre. But there is much more to be said for the view that in the pillar-worship of Italian art we should recognise a local survival of a cult once common to the whole Mediterranean area (Sir A. J. Evans 'Mycenaean Tree and Pillar Cult and its Mediterranean Relations' in the *Journ. Hell. Stud.* 1901 xxi. 128).

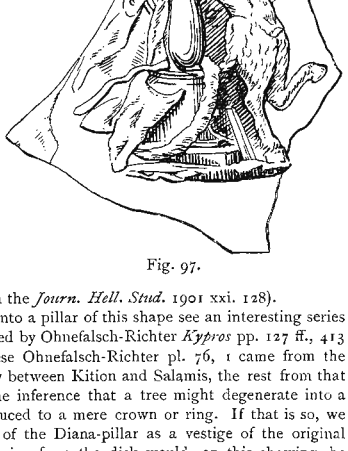

Fig. 97.

[1] For a sacred tree conventionalised into a pillar of this shape see an interesting series of Cypriote terra-cotta *agálmata* published by Ohnefalsch-Richter *Kypros* pp. 127 ff., 413 pl. 76, 8, 1, 6, 10 = my fig. 98. Of these Ohnefalsch-Richter pl. 76, 1 came from the sanctuary of Artemis at *Achna*, half-way between Kition and Salamis, the rest from that of Astarte at Chytroi. They warrant the inference that a tree might degenerate into a tapering baluster, its branches being reduced to a mere crown or ring. If that is so, we may fairly explain the disk-like capital of the Diana-pillar as a vestige of the original branches or foliage. The pendants hanging from the disk would, on this showing, be a reminiscence of offerings etc. suspended from the boughs.

pillar: the pendants that dangle from it are not without analogy in the cosmic notions of other races[1]. Finally, we observe that side by side with these pillar-shrines there persisted the more primitive tree-cult, in which the living tree was enclosed by a gateway consisting of side-posts and lintel (fig. 99)[2] or by some later elabora-

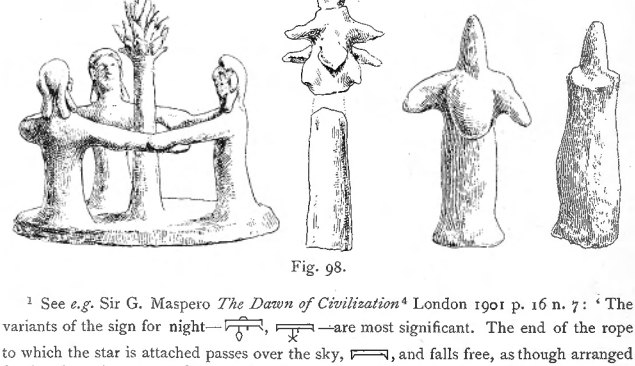

Fig. 98.

[1] See *e.g.* Sir G. Maspero *The Dawn of Civilization*[4] London 1901 p. 16 n. 7: 'The variants of the sign for night—, —are most significant. The end of the rope to which the star is attached passes over the sky, , and falls free, as though arranged for drawing a lamp up and down when lighting or extinguishing it. And furthermore, the name of the stars—*khabsît*—is the same word as that used to designate an ordinary lamp.' Cp. the sun suspended by cords on a Babylonian tablet (*supra* i. 262 ff.). J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1883 ii. 722: 'The Lithuanians beautifully weave shooting stars into the fate-mythus: the *verpeya* (spinneress) begins to spin the thread of the new-born on the sky, and each thread ends in a star; when a man is dying, his thread snaps, and the star turns pale and drops (Narbutt, 1, 71).'

Traces of such beliefs can be found here and there among the Greeks. Thus at the Boeotian Daphnephoria the *kopó* was a staff of olive-wood with a bronze ball at the top to denote the sun, a smaller ball below to denote the moon, a number of little balls hanging from the topmost ball to denote the stars and planets (Nilsson *Gr. Feste* p. 164 f.: I have discussed the rite in *Folk-Lore* 1904 xv. 409 ff., *supra* i. 291 n. 5).

[2] Fig. 99 is a stucco-relief from one of the vaulted rooms of a Roman town-house discovered in 1878 in the garden of the Villa Farnesina (*Mon. d. Inst.* Suppl. pl. 35, J. Lessing—A. Mau *Wand- und Deckenschmuck eines roemischen Hauses aus der Zeit des Augustus* Berlin 1891 p. 14 pl. 15, M. Collignon 'Le styl décoratif à Rome' in the *Revue de l'art ancien et moderne* 1897 i. p. 104 with pl., M. Rostowzew 'Die hellenistisch-römische Architekturlandschaft' in the *Röm. Mitth.* 1911 xxvi. 34 ff. fig. 13 f. (after Anderson's photograph no. 2506 = my fig. 99), H. Bulle *Der schöne Mensch im Altertum*[2] München und Leipzig 1912 p. 601 f. pl. 298, Helbig *Guide Class. Ant. Rome* ii. 220 ff., 233 no. 1059, *ib.*[3] ii. 117 ff. no. 1330). This relief, which is now in the Museo delle Terme, represents a rocky landscape with a stream spanned by a bridge. On the bridge are two women carrying pitchers, of whom the first gives drink to a kneeling beggar (cp. Iuv. 4. 116 ff. with J. E. B. Mayor *ad loc.*). To the left of the bridge a large date-palm (?) stands in a precinct between a couple of two-storied buildings. Over it is a gateway consisting of a pillar and a pilaster with an architrave, on which is set a fluted jar. Adjoining this complex we see a circular walled structure with narrow openings, which is

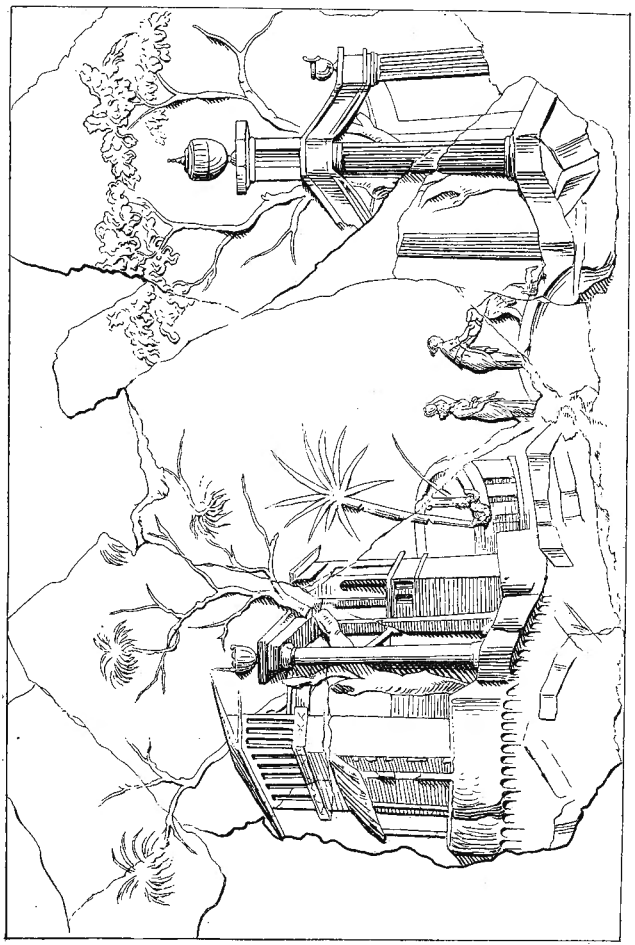

Fig. 99.

decked with garlands and contains a palm-tree and a pillar. To the right of the bridge yet another sacred tree with its pillar and jar rises from an enclosure of peculiar shape (three columns and a back-wall support an architrave, of which two sides are concave, the third convex).

Another good example of the gateway erected over a sacred tree is *Le pitture antiche d'Ercolano* Napoli 1762 iii. 281 ff. pl. 53, H. Roux—M. L. Barré *Herculanum et Pompéi*

tion of the same[1]. From our present position it seems legitimate to conjecture that this gateway or arch at first denoted the sky itself resting on the side-supports. Such a supposition at least helps us to understand the otherwise puzzling representations of the Dioskouroi in Etruscan art. Their *dókana* are seen to be simply the 'beams' of the world—its pillars and ceiling. And they themselves, as figured on Etruscan mirrors, are the humanised side-posts, which naturally enough have between them a tree or a column and above them a starry pediment[2].

(*μ*) *Agyieús*-Pillars.

And here, at the risk of faring worse, we must go further. For it is impossible to separate the Diana-pillars of Italy from the *Agyieús*-pillars of Greece[3], which in form and fashion are their exact counterpart. Grammarians and lexicographers define the term *Agyieús* sometimes as a pointed[4] or conical pillar[5], sometimes

Paris 1870 iii. 2. 13 ff. pl. 5, Boetticher *Baumkultus* pp. 156, 541 fig. 36, W. Helbig in the *Arch. Zeit.* 1866 xxiv. 182 f., *id. Wandgem. Camp.* p. 274 no. 1279. See further M. Rostowzew 'Die hellenistisch-römische Architekturlandschaft' in the *Röm. Mitth.* 1911 xxvi. 41 fig. 18=Sogliano *Pitt. mur. Camp.* p. 141 no. 686, cp. *id. ib.* p. 52 no. 245.

A base or altar in the Villa Albani (G. Zoega *Li bassirilievi antichi di Roma* Roma 1808 ii. 235—238 pl. 98, Reinach *Rép. Reliefs* iii. 132 no. 1, W. Helbig *Führer durch die öffentlichen Sammlungen klassischer Altertümer in Rom*[3] Leipzig 1913 ii. 409 no. 1847) shows (*a*) Apollon, with lyre and *plêktron*, bow-case and quiver, standing beside his bay-tree, which grows through a Corinthian gateway; (*b*) a richly decorated tripod, on the plinth of which is perched a raven; (*c*) a sacrificial ewer and bowl; (*d*) a griffin looking backwards. The scheme of the rustic tree-shrine is applied to the cult of the civilised Apollon in virtue of his sacred bay.

[1] *Supra* p. 152 fig. 92. [2] *Supra* i. 766 ff.

[3] The main facts and fancies relating to these *Agyieús*-monuments are collected by Welcker *Gr. Götterl.* i. 495 ff., E. Saglio in Daremberg—Saglio *Dict. Ant.* i. 168 f., Overbeck *Gr. Kunstmyth.* Apollon p. 3 ff. Münztaf. 1, 1—8, G. Wentzel in Pauly—Wissowa *Real-Enc.* i. 909 f., E. Reisch *ib.* i. 910 ff., K. [5] Souid. *s.v.* ἀγυιαί=Zonar. *lex. s.v.* 'Αγυιᾶς=Favorin. *lex.* p. 28, 31 f. Herodian. i. 240, 21 ff.=Steph. Byz. *s.v.* ἀγυιά, and schol. Aristoph. *vesp.* 875 use the word *ὀβελίσκοι*, which might pass muster as a rough and ready equivalent. Schol. Rav. Aristoph. *thesm.* 489 'Αγυιᾶ· <ὁ> οὕτω καλούμενος 'Απόλλων τετράγωνος was perhaps confusing the *Agyieús* with a herm, cp. Ulpian *in* Dem. *in Mid.* 51 οἱ δὲ ἀγυιάς (leg. 'Αγυιᾶς) φασι τοὺς Ἑρμᾶς though Paus. 8. 32. 4 (*infra* p. 164 n. 7) describes an Apollon *Agyieús* at Megalopolis as having *σχῆμα τετράγωνον* (for which shape in Arkadia see *supra* i. 320 n. 2).

as an altar[1], set up before a doorway. Attempts have been made to distinguish the pillar from the altar[2]; but these are now generally discredited[3] in view of Hesychios' gloss—'*Agyieús*, the pillar-shaped altar that stands before the doors[4].' The association of pillar with doorway recalls the *dókana* of the Dioskouroi as figured on the Etruscan mirrors[5]. And the use of a pillar before the doors for an actual altar can be paralleled from the cult of Zeus *Kataibátes* at Tarentum[6]. Nor are we dependent for our notion of an *Agyieús* merely upon the verbal descriptions of ancient scholars. Those descriptions are precise enough to warrant us in giving the name to the monument represented on coins of northern Greece struck at Apollonia (figs. 100, 101)[7], Orikos (fig. 102)[8], and Olympe (fig. 103)[9]

We must, however, admit that the shape of the *Agyieús* was somewhat variable. Six *loc. cit.* 1894 xix. 340—345 figs. 1—7 holds that a conical limestone pillar at Korkyra inscribed Μῦς *με hιο|ατο* and three blocks still standing on quadrangular plinths beside house-doors at Pompeii (a cone of dark lava in the *Strada dell' Abbondanza* = *reg.* viii. 3. 2, a limestone *omphalós* in the *Strada della Fortuna* = *reg.* vi. 14, a round-topped *stéle* of travertine in the *Strada Stabiana* = *reg.* ix. 3. 3) served as *Agyieús*-stones: but see A. Mau *ib.* p. 344 n. 2. Helladios *ap.* Phot. *bibl.* p. 535 b 34 f. speaks of *βωμὸν...στρογγύλον*—a loose phrase, which would cover a variety of shapes.

fact, the title was usually regarded as his beyond dispute. Nevertheless there were dissentients. A literary tradition attributes the *Agyieús*-pillar to Dionysos, or at least to Dionysos in partnership with Apollon[1]; and a marble *metа* in the Villa Albani (fig. 109)[2]

[5] Paus. 2. 19. 8 *ἐπὶ τούτοις* (*sc.* after the graves of Linos, son of Apollon, and Linos, the poet) *ἐστὶν Ἀπόλλων Ἀγυιεὺς καὶ βωμὸς Ἑστίου Διός, κ.τ.λ.*

[6] Paus. 8. 53. 1 *τῷ δὲ Ἀπόλλωνι οἱ Τεγεᾶται τῷ Ἀγυιεῖ τὰ ἀγάλματα ἐπ' αἰτίᾳ φασὶν ἱδρύσασθαι τοιᾷδε. Ἀπόλλωνα καὶ Ἄρτεμιν ἐπὶ πᾶσαν λέγουσι χώραν τιμωρεῖσθαι τῶν τότε ἀνθρώπων ὅσοι Λητοῦς, ἡνίκα εἶχεν ἐν τῇ γαστρί, πλανωμένης καὶ ἀφικομένης ἐς τὴν γῆν ἐκείνην οὐδένα ἐποιήσαντο αὐτῆς λόγον. ὡς δὲ ἄρα καὶ ἐς τὴν Τεγεατῶν ἐληλυθέναι τοὺς θεούς, ἐνταῦθα υἱὸν Τεγεάτου Σκέφρον προσελθόντα τῷ Ἀπόλλωνι ἐν ἀπορρήτῳ διαλέγεσθαι πρὸς αὐτόν· Λειμὼν δὲ—ἦν δὲ καὶ ὁ Λειμὼν οὗτος Τεγεάτου τῶν παίδων—ὑπονοήσας ἔγκλημα ἔχειν ἐς ἑαυτὸν τὰ ὑπὸ Σκέφρου λεγόμενα, ἀποκτίννυσιν ἐπιδραμὼν τὸν ἀδελφόν. καὶ Λειμῶνα μὲν τοξευθέντα ὑπὸ Ἀρτέμιδος περιῆλθεν αὐτίκα ἡ δίκη τοῦ φόνου· Τεγεάτης δὲ καὶ Μαιρὰ τὸ μὲν παραυτίκα Ἀπόλλωνι καὶ Ἀρτέμιδι θύουσιν, ὕστερον δὲ ἐπιλαβούσης ἀκαρπίας ἰσχυρὰς ἦλθε μάντευμα ἐκ Δελφῶν Σκέφρον θρηνεῖν. καὶ ἄλλα τε ἐν τοῦ Ἀγυιέως τῇ ἑορτῇ δρῶσιν ἐς τιμὴν τοῦ Σκέφρου καὶ ἡ τῆς Ἀρτέμιδος ἱέρεια διώκει τινὰ ἅτε αὐτὴ τὸν Λειμῶνα ἡ Ἄρτεμις.* F. G. Welcker *Kleine Schriften* Bonn 1844 i. 18 f. cp. the mourning for Linos and interprets the names 'Leimon, Feuchtling, und Skephros, Dörrling, deren Mutter Mära ist, die Sirioshitze in weiblicher Form,'—a view revived by Immerwahr *Kult. Myth. Arkad.* p. 62, H. W. Stoll in Roscher *Lex. Myth.* ii. 1933 f., Buslepp *ib.* iv. 991 f., and (with the omission of rash etymologies) by Preller—Robert *Gr. Myth.* i. 464. Nilsson *Gr. Feste* p. 166 f. is inpressed by the fact that the grave of Linos at Argos adjoined an Apollon *Agyieús* and an altar of Zeus *Hyétios* (*supra* n. 5), but points out that Leimon would personify the year's vegetation better than Skephros, unless we cp. the *σταφυλοδρόμοι* of the Karneia (*id. ib.* pp. 121, 126) and hazard the guess 'dass Leimon ein Doppelgänger des Skephros ist, dessen redender Name den Sinn des Gebrauchs verdeutlichen sollte.' Sir J. G. Frazer on Paus. *loc. cit.*, after F. Back *De Graecorum caerimoniis in quibus homines deorum vice fungebantur* Berlin 1883 p. 24 ff. and Immerwahr *Kult. Myth. Arkad.* p. 155, cp. the festival of the Agrionia at Orchomenos in Boiotia (Plout. *quaestt. Gr.* 38) and argues that the Tegean rite 'appears to have been a substitute for human sacrifices offered to make the crops grow.' Sir W. Ridgeway *The Origin of Tragedy with special reference to the Greek Tragedians* Cambridge 1910 p. 37 ff. regards Skephros as a local hero, whose ghost was placated by a 'mimetic performance' held close to his tomb, and thinks that the ceremony 'throws some light on the origin of Tragedy.' The problem is complex, and none of these solutions is wholly satisfactory. Paus. 8. 5. 6 adds *Τεγεάταις δὲ τοῦ Ἀγυιέως τὰ ἀγάλματα τέσσαρά εἰσιν ἀριθμόν, ὑπὸ φυλῆς ἓν ἑκάστης ἱδρυμένον* (*infra* p. 454).

[7] Paus. 8. 32. 4 *εἰσὶ δὲ ὑποκαταβάντι ὀλίγον θεοῖ—παρέχονται δὲ καὶ οὗτοι σχῆμα τετράγωνον* (*supra* p. 160 n. 5), *Ἐργάται δέ ἐστιν αὐτοῖς ἐπίκλησις—Ἀθηνᾶ τε Ἐργάνη καὶ Ἀπόλλων Ἀγυιεύς.*

[8] Kaibel *Epigr. Gr.* no. 786. 1 ff. (= *Corp. inscr. Gr.* ii no. 2661, 1 ff. = Cougny *Anth. Pal. Boeckh and E. Cougny *ad loc.*

[1] Harpokr. *s.vv.* *Ἀγυιᾶς·...Ἀγυιεὺς δέ ἐστι κίων εἰς ὀξὺ λήγων, ὃν ἱστᾶσι πρὸ τῶν θυρῶν. ἰδίους δὲ εἶναί φασιν αὐτοὺς Ἀπόλλωνος, οἱ δὲ Διονύσου, οἱ δὲ ἀμφοῖν* = Souid. *s.v.* *ἀγυιαί* = schol. Ald. Aristoph. *vesp.* 875 = Bekker *anecd.* i. 331, 32 f. (with *Ἡλίου* for *Ἀπόλλωνος*, cp. Cornut. *theol.* 32 p. 69, 9 ff. Lang, schol. Eur. *Phoen.* 631). Harpokration has clearly preserved for us the opinions of various commentators on Dem. *in Mid.* 51 f. (*supra* p. 163 n. 4).

[2] G. Zoega *Li bassirilievi antichi di Roma* Roma 1808 i. 158—161 pl. 34 = my fig. 109,

has been interpreted in that sense. *Agyieús* is found as an epithet of Zeus[1] also; but whether this attribution was based upon existing cults we do not know. The statement of Dieuchidas, the fourth-century historian of Megara[2], that the erection of *Agyieús*-pillars was a specially Dorian custom[3] agrees with the numismatic evi-

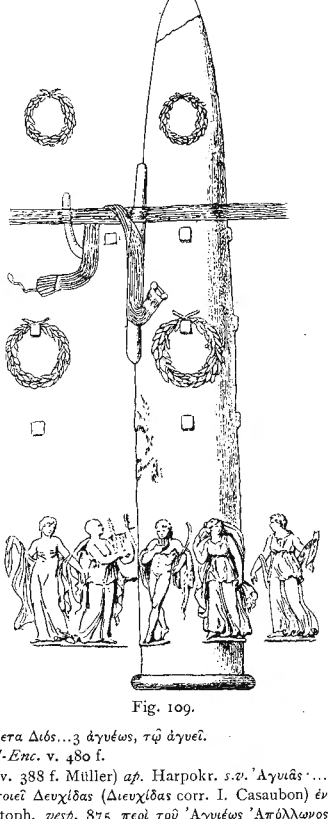

Fig. 109.

T. Panofka *Dionysos und die Thyaden* (extr. from the *Abh. d. berl. Akad.* 1852 Phil.-hist. Classe pp. 381 f., 390 pl. 3, 9) Berlin 1853 pp. 41 f., 50 pl. 3, 9, Helbig *Guide Class. Ant. Rome* ii. 1 f. no. 705, Reinach *Rép. Reliefs* iii. 151 no. 2, J. E. Harrison *Themis* Cambridge 1912 p. 407 f. fig. 120. This marble cone (height 14 ft. 6 ins., diameter 2 ft.) stands on a low circular base (top and bottom restored) and has a series of square projecting *ὦτα*, on four of which hang olive-garlands in relief. Towards the upper end of the cone is carved a band, which serves to attach a *lagoóbolon*, a belt (?), and a club. Near the base are five figures in the neo-Attic style representing Apollon with his lyre, a Satyr with *nebrís* (?), pan-pipes, and *lagobólon*, and three Maenads (T. Panofka, followed by Miss Harrison, takes these persons to be Apollon, Pan, and three Horai; W. Helbig says 'a Satyr and three Bacchantes dancing to the music of a woman playing on a cithara'; G. Zoega is content with 'una danza bacchica,' S. Reinach with 'reliefs bachiques').

Ven.) *τῶν 'Ελλήνων· τούτοις γὰρ ἐπὶ τὰς στρατιὰς φάσματος οἱ Δωριεῖς ἀπομιμούμενοι τὰς ἀγυιὰς ἱστᾶσιν ἔτι καὶ νῦν τῷ 'Απόλλωνι.*" If we may assume that Dieuchidas the Megarian is describing the obelisk of Apollon *Karinós*, which stood in the old gymnasium at Megara (*supra* p. 163 n. 2, *infra* p. 168 n. 1), it becomes possible to re-write this very corrupt passage as follows: *ἐν δὲ τῷ θυρέτρῳ τούτῳ διαμένει καὶ ἔτι καὶ νῦν ἐστιν ὡς 'Αγυιεὺς τῶν Δωριέων <τῶν> οἰκησάντων ἐν τῷ τόπῳ ἀνάθημα. καὶ οὗτος καταμηνύει ὅτι Δωριέων ἐστὶ τὰ τῶν*

dence that they were largely represented in Illyria, since the Dorians were *ab origine* an Illyrian tribe[1]. On the whole it seems probable that we have here to do with an ancient Illyrian pillar-cult[2], strictly comparable with the pillar-cult of Italy. If so, it might be maintained that the *Agyieús*-pillar was essentially a universe-column, and that *Agyieús* himself, 'God of the Way (*agyiá*),' was originally lord of the road from earth to heaven[3]. The term *agyiá* is actually used of the soul-path by Pindar[4]; and the transition from *Agyieús* in this hypothetical sense to *Agyieús* in its ordinary classical meaning presents no difficulty. The 'God of the Way' would naturally become the 'God of the Street,' especially if—as was the case at Tarentum and elsewhere—his pillar stood 'before the doors' of the houses.

(*v*) ***Omphalós*** and Pillar.

It appears, then, that the *Irminsûl* of the north had a counterpart on both sides of the Adriatic, the Diana-pillars of Italy being own cousins to the *Agyieús*-pillars of Greece. But at this point a difficulty arises. How comes it that the Italian pillars were associated with a goddess, the Greek pillars with a god? The answer to this question is to be sought in the belief that the universe-column was a central prop, originally a central tree, rising from earth to sky. Such a prop would be connected primarily with the earth in which it was planted, secondarily with the sky which it

Ἑλλήνων <τοιαῦτα ἀγάλματα>· τούτοις γὰρ ἐπὶ τῆς στρατιᾶς φάσματος <φανέντος> οἱ Δωριεῖς ἀπομιμούμενοι τοὺς Ἀγυιᾶς ἱστᾶσιν ἔτι καὶ νῦν τῷ Ἀπόλλωνι. But??

[1] See Sir W. Ridgeway 'Who were the Dorians?' in *Anthropological Essays presented to Edward Burnett Tylor* Oxford 1907 pp. 295—308, C. H. Hawes 'Some Dorian Descendants?' in the *Ann. Brit. Sch. Ath.* 1909—1910 xvi. 258—280.

[2] Prehistoric tombs in Thessaly have yielded bronze rings, which perhaps attest a similar pillar-cult (N. I. Giannopoulos Θεσσαλικαὶ προελληνικαὶ ἐπιγραφαὶ ἐπὶ βράχων, λίθων, σφραγίδων καὶ ἀγγείων Athens 1908 p. 67 fig. 26 from Homolion, *id.* in the Ἐφ. Ἀρχ. 1915 p. 106 f. no. 16 fig. with pl. 2, 16 and pl. 1, 16 (enlarged = my fig. 110), no. 17 fig. from Homolion with pl. 2, 17).

Fig. 110.

[3] Dr Farnell too is prepared to abandon the orthodox idea that the name originally designated the deity of the city's streets: 'to explain Ἀγυιεύς,' he says (*Cults of Gk. States* iv. 150), 'our imagination may turn back to the prehistoric epoch when the god—or the priest bearing his emblem—marched at the head of the immigrant tribe down its perilous path of conquest.' In fact we are to suppose (*ib.* iv. 308) 'that the Agyieus-emblem entered with the wandering deity, and that it was specially consecrated by serving to mark certain stations along the Sacred Way from the north.' The explanation is ingenious and, no doubt, possible. But the view proposed in the text is more consonant with the Germanic and the 'Minoan' evidence.

[4] Pind. *Ol.* 9. 50 ff. οὐδ' Ἄϊδας ἀκι|νήταν ἔχε ῥάβδον, | βρότεα σώματ' ἃ κατάγει | κοίλαν πρὸς (*v.l.* ἐς) ἄγυιαν | θνᾳσκόντων (*v.l.* θνησκόντων).

supported. It could therefore be attributed either to the earth-mother or to the sky-father, according as the worship of the goddess or the god prevailed.

We shall hardly expect to find chapter and verse for all this in extant Greek literature. Crude notions are not always articulate and comparatively seldom emerge on the literary level. We must be satisfied with stray hints and glimpses: pieced together they may tell their tale. Of the cosmic tree there is good evidence which would merit further investigation[1]. Our concern is now with the cosmic pillar. W. H. Roscher in a recent monograph[2] has shown that the Greeks, like many other peoples, conceived of the earth as a flat disk with a central point called its *omphalós* or 'navel,' and further that within the limits of Greece a variety of towns claimed to possess this all-important centre. He makes out a case not only for Delphoi, but also for other Apolline seats—Branchidai, Delos, Gryneion, Patara, etc. Among possible claimants he includes Byzantion[3], but without proving the existence of a Byzantine *omphalós*. Proof, however, is forthcoming. Coppers of this town struck in the third or second century B.C. have sometimes as obverse type a laureate head of Apollon and as reverse an *Agyieús*-pillar set on the top of an *omphalós*, which is covered with its net-work or *agrenón* (figs. 111—113)[4]. This monument has been plausibly explained by

[5] W. Drexler in the *Zeitschr. f. Num.* 1895 xix. 128 f., cp. *Num. Chron.* Third Series 1893 xiii. 233.

have been worshipped in aniconic form at the mother-town Megara[1]. Drexler may be right or wrong[2]; but in any case the Byzantine pillar is of interest, because it exhibits the *omphalós*, earth's centre, in combination with the *Agyieús*, heaven's prop[3].

[1] Paus. 1. 44. 2 ἔστι δὲ ἐν τῷ γυμνασίῳ τῷ ἀρχαίῳ πλησίον πυλῶν καλουμένων Νυμφάδων λίθος παρεχόμενος πυραμίδος σχῆμα οὐ μεγάλης· τοῦτον (τοῦτο codd., τοῦτον corr. M. Musurus) Ἀπόλλωνα ὀνομάζουσι Καρινόν, καὶ Εἰλειθυιῶν ἐστιν ἐνταῦθα ἱερόν. It is commonly supposed that this monument is represented on the coins of Megara (*supra* p. 162 fig. 108), though the small pyramid of Pausanias hardly squares with the *Agyieús*-pillar on the coins (Overbeck *Gr. Kunstmyth.* Apollon p. 4 f.). The epithet Καρινός is probably related to Κάρ, son of Phoroneus and first king of Megara (Paus. 1. 39. 5, 1. 44. 6), after whom the Akropolis of Megara was called Καρία (Paus. 1. 40. 6, Steph. Byz. *s.v.* Καρία): K. Schwenck in the *Rhein. Mus.* 1838 vi. 575 and Gerhard *Gr. Myth.* p. 316 rashly regarded Καρινός as a by-form of Κάρνειος.

[2] J. N. Svoronos in the Ἐφ. Ἀρχ. 1889 p. 92 takes the obelisk on the Byzantine coins to be one of the bronze *kamptêres* of the hippodrome with a half-egg on top, citing Hesych. Miles. *frag.* 4. 37 (*Frag. hist. Gr.* iv. 153 Müller) ἔνθα καὶ νῦν οἱ καμπτῆρες δηλοῦσι τὰ τῶν ἐφόρων (*sc.* τῶν Διοσκούρων) γνωρίσματα διὰ τῶν ἐπικειμένων ᾠῶν τοῖς χαλκοῖς ὀβελίσκοις, Kodinos *de signis Constantinopolitanis* 30 A (p. 54 Bekker) καὶ τῶν καμπτήρων οἱ λίθινοι κίονες καὶ οἱ χαλκοῖ ὀβελίσκοι τῶν καμπτήρων. But the top of the obelisk is much more like an *Agyieús*-finial than a half-egg, and the base is beyond all doubt an *omphalós*.

[3] Less conclusive are the following: (1) Certain autonomous coppers of Kyrene, struck between 323 and 305 B.C., have *obv.* head of Zeus *Ammon*, *rev.* an *omphalós* (?) topped by a pillar, on which rests a vase (L. Müller *Numismatique de l'ancienne Afrique* Copenhague 1860 i. 54, 72 f. no. 234 fig. (=my fig. 114) and no. 235, Babelon *Monn. gr. rom.* ii. 3. 1095 f. pl. 267, 16 f.). A. Duchalais in the *Rev. Num.* 1850 pl. 16, 7 (=my fig. 115), *ib.* 1851 pp. 89—95, was the first to recognise the tomb of Battos. His view was accepted by L. Müller *locc. citt.* and, more doubtfully, by E. Babelon *loc. cit.*

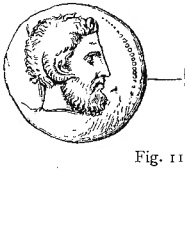

Fig. 114.

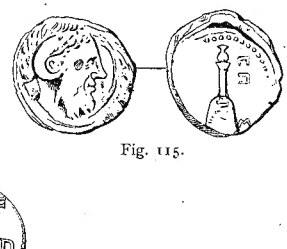

Fig. 115.

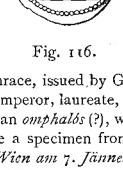

Fig. 116.

(2) A copper of Deultum in Thrace, issued by Gordianus iii (238–244 A.D.), has *obv.* GORDIANVS IMP AVG bust of emperor, laureate, to left, with spear etc., *rev.* C F P D (*Colonia Flavia Pacensis Deultum*) an *omphalós* (?), with a railing (?) in front of it, topped by a short pillar or knob. I figure a specimen from my collection, formerly in that of Prince Chakow (*Versteigerung in Wien am 7. Jänner* 1908 Brüder Egger (Collection de Mr. le Prince Ch.) p. 20 no. 299 pl. 9 'Cultbild der Artemis (?)'). Cp. J. Eckhel *Catalogus Musei Caesarei Vindobonensis numorum veterum* Vindobonae 1779 i. 68

(ξ) The Delphic *Omphalós*.

The occurrence of an *omphalós*-and-pillar at Byzantion leads us to reconsider the shape of the *omphalós* at Delphoi. Here, if anywhere, was the centre of the earth. Here, if anywhere, the sky would need a supporting column, an *Agyieús*-pillar. Accordingly local tradition told how the oracle had been established by Pagasos and divine Agyieus, sons of the Hyperboreoi[1]. And 'the author of the *Europia* teaches us that the image of Apollon at Delphoi is a pillar in the following lines:

> That we might hang for the god a tithe and trophy
> From his pure doorposts and his lofty pillar[2].'

These allusions at once become intelligible, if we assume that the *omphalós* at Delphoi, like the *omphalós* at Byzantion, was originally topped by an *Agyieús*-pillar. Let us be bold and make that assumption. Our pillar, erected at a time when men believed in a circular earth and a central sky-prop, would with increasing knowledge come to be viewed as the axis of a spherical world[3]. Nonnos describes the Delphic *omphalós* as the 'mid-navel axis[4]'—a description

Deultum no. 12 ('Telesphorus stans'), Mionnet *Descr. de méd. ant.* Suppl. ii. 294 no. 562 ('Telesphore deb.').

[1] Paus. 10. 5. 7 f. Βοιὼ δὲ ἐπιχωρία γυνὴ ποιήσασα ὕμνον Δελφοῖς ἔφη κατασκευάσασθαι τὸ μαντεῖον τῷ θεῷ τοὺς ἀφικομένους ἐξ Ὑπερβορέων τούς τε ἄλλους καὶ Ὠλῆνα· τοῦτον δὲ καὶ μαντεύσασθαι πρῶτον καὶ ᾄσαι πρῶτον τὸ ἑξάμετρον. πεποίηκε δὲ ἡ Βοιὼ τοιάδε· ἔνθα τοι εὔμνηστον χρηστήριον ἐκτελέσαντο | παῖδες Ὑπερβορέων Παγασὸς καὶ δῖος Ἀγυιεύς. ἐπαριθμοῦσα δὲ καὶ ἄλλους τῶν Ὑπερβορέων, ἐπὶ τελευτῇ τοῦ ὕμνου τὸν Ὠλῆνα ὠνόμασεν· Ὠλὴν θ', ὃς γένετο πρῶτος Φοίβοιο προφάτας, | πρῶτος δ' ἀρχαίων ἐπέων τεκτήνατ' ἀοιδάν. On Boio see G. Knaack in Pauly—Wissowa *Real-Enc.* iii. 633 f.

Prof. J. M. MacGregor drew my attention (March 21, 1917) to the fact that Euripides mentions both ἀγυιάς (*Ion* 460) and ἀγυιάτιδες θεραπεῖαι (*Ion* 186) in connexion with Delphoi.

[2] Eumel. *frag.* 11 Kinkel *ap.* Clem. Al. *strom.* 1. 24 p. 102, 26 ff. Stählin ἀλλὰ καὶ ὁ τὴν Εὐρωπίαν (Εὐρώπειαν Dindorf) ποιήσας ἱστορεῖ τὸ ἐν Δελφοῖς ἄγαλμα Ἀπόλλωνος κίονα εἶναι διὰ τῶνδε· ὄφρα θεῷ δεκάτην ἀκροθίνιά τε κρεμάσαιμεν | σταθμῶν ἐκ ζαθέων καὶ κίονος ὑψηλοῖο. Some critics (*e.g.* Boetticher *Baumkultus* p. 227, Overbeck *Gr. Kunstmyth.* Apollon p. 5, De Visser *De Gr. diis non rect. spec. hum.* p. 51 § 29) are disposed to minimise the force of this evidence. But κίων ὑψηλός here, like κίων μακρός in the fragment of the *Phoronis* cited by the same author (*supra* i. 453 n. 8), certainly refers to a single sacred pillar, not to the whole colonnade of the temple; and, in view of other aniconic forms of Apollon (Overbeck *op. cit.* p. 3 ff.), we need not doubt that Clement has interpreted this early couplet aright.

[3] W. H. Roscher *Omphalos* (*Abh. d. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1913 xxix. 9) Leipzig 1913 pp. 41 ff., 68, 74 f., 79.

[4] Nonn. *Dion.* 2. 697 f. σὺ δέ, Κάδμε, μεσόμφαλον ἄξονα βαίνων | Δελφίδος αὐδήεντα μετέρχεο τέμπεα Πυθοῦς, 4. 289 ff. ἔνθα κιχήσας | Δελφὸν ἀσιγήτοιο μεσόμφαλον ἄξονα Πυθοῦς | μαντοσύνην ἐρέεινε, καὶ ἔμφρονα Πύθιος ἄξων | κύκλον ἐπ' αὐτοβόητον (K. Lehrs cj. κυκλόθεν αὐτοβότητος, cp. 36. 325; but κύκλος αὐτοβότητος may refer to the oracular tripod, cp. 13. 133 and Poll. 10. 81 τὸ δ' ἐπίθημα τοῦ τρίποδος κύκλον καὶ ὅλμον προσήκει καλεῖν) ἐθέσπισε κοιλάδι φωνῇ. Cp. 27. 252 ἄξονος ὀμφαίοιο θεηγόρε κοίρανε Πυθοῦς. Similarly

which certainly suits and possibly presupposes an actual pillar[1]. It may be objected that of all the representations of the *omphalós* in ancient art, and they are many, not one has it surmounted by the pillar—an extraordinary omission, if my hypothesis is to stand. To this I should reply that the *omphalós* shown to travellers and multiplied throughout the Greek world was not the original, but a replica in marble placed outside the temple at the eastern end of the terrace (fig. 117)[2], where indeed it has been duly discovered in the course of the French excavations (fig. 118)[3]. The real *omphalós*,

Claud. *in Fl. Mallii Theodori consulatum prol.* 16 Pythius axis (*infra* p. 179 n. 1). But see *infra* § 3 (*a*) iii (*o*).

[1] W. H. Roscher *op. cit.* p. 40 ff. cites Iambl. *de myst.* 3. 11 p. 127 Parthey *καὶ μὴν ἥ γε ἐν Βραγχίδαις γυνὴ χρησμῳδὸς, εἴτε ῥάβδον ἔχουσα τὴν πρώτως ὑπὸ θεοῦ τινὸς παραδοθεῖσαν πληροῦται τῆς θείας αὐγῆς, εἴτε ἐπὶ ἄξονος καθημένη προλέγει τὸ μέλλον, εἴτε τοὺς πόδας ἢ κράσπεδόν τι τέγγουσα τῷ ὕδατι ἢ ἐκ τοῦ ὕδατος ἀτμιζομένη δέχεται τὸν θεόν, ἐξ ἁπάντων τούτων ἐπιτηδεία παρασκευαζομένη πρὸς τὴν ὑποδοχὴν ἔξωθεν αὐτοῦ μεταλαμβάνει* and contends that here too *ἄξων* denotes the cosmic axis. But must we not then read *ἐπὶ <τοῦ> ἄξονος*? And in any case the mathematical *ἄξων* is perfectly compatible with a material *κίων* (see Eustath. *in Od.* p. 1389, 59 ff.): Lieut. Peary at the north pole set up a flagstaff.

[2] A red-figured *amphora* with volute handles from Ruvo (fig. 117 = G. F. Jatta in the *Ann. d. Inst.* 1868 xl. 235—248 pl. E, *id. Catalogo del Museo Jatta* Naples 1869 no. 239, Baumeister *Denkm.* ii. 1009 f. fig. 1215, P. Weizsäcker in Roscher *Lex. Myth.* iii. 176 fig. 5, R. Engelmann *Bilder-Atlas zum Homer* Leipzig 1889 ii. 3 pl. 4, 18, J. H. Huddilston *Greek Tragedy in the light of Vase Paintings* London 1898 p. 83 ff. fig. 10, Reinach *Rép. Vases* i. 321, 1, W. H. Roscher *Omphalos* Leipzig 1913 p. 103 pl. 2, 1) representing the murder of Neoptolemos at Delphoi depicts the scene with some pretence to topographical accuracy. In the background stands a peripteral temple with decorated doors ajar. This will do for the fourth-century building (though it had Doric columns outside, Ionic inside) with its ivory doors. To the right of it sits ΑΠΟΛΛΩΝ with his bow, unmoved by the tragedy. To the left the Pythian priestess with a filleted key over her shoulder starts away in horror. In the foreground ΝΕΟΠΤΟΛΕΜΟΣ, already wounded, takes refuge on the altar; ΟΡΕΣΤΑΣ, sword in hand, approaches him stealthily from behind the *omphalós*; a Delphian, elsewhere called Machaireus (Roscher *Lex. Myth.* ii. 2226 f.), raises his lance to deal the fatal blow; and the stones in the left-hand corner hint at the fury of the populace (Eur. *Andr.* 1127 ff.). The altar here shown corresponds in position with that of the Chians (Frazer *Pausanias* v. 309 f., 631, É. Bourguet *Les ruines de Delphes* Paris 1914 p. 175 ff.), and the *omphalós* with that described *infra* n. 3. The palm-tree recalls the bronze palm dedicated by the Athenians out of the spoils won at the battle on the Eurymedon (Frazer *op. cit.* v. 313, *infra* § 3 (*a*) iii (*χ*)). The tripod on a round base in the middle distance may be reminiscent of the famous tripod dedicated by the Greeks who fought at Plataia (Frazer *op. cit.* v. 299 ff., É. Bourguet *op. cit.* p. 160 ff.). Lastly, the tripod beside the palm-tree and the shield next to Apollon are samples of the votive offerings with which the whole precinct was crowded.

[3] Fig. 118, after a photograph by Rhomaides (Delphoi no. 41), represents an *omphalós* of white marble found on the last turn of the Sacred Way close to the bases of Gelon (É. Bourguet *op. cit.* p. 248 n. 1) and rightly identified with that described by Paus. 10. 16. 3 (see G. Karo in Daremberg—Saglio *Dict. Ant.* iv. 199 fig. 5404, H. Pomtow in *Philologus* 1912 lxxi. 59, W. H. Roscher *Omphalos* Leipzig 1913 p. 81 f. pl. 6, 1). That this *omphalós* was a mere replica, is sufficiently proved by the *agrenón* (J. E. Harrison 'Ægis—ΑΓΡΗΝΟΝ' in the *Bull. Corr. Hell.* 1900 xxiv. 254—262) carved in relief

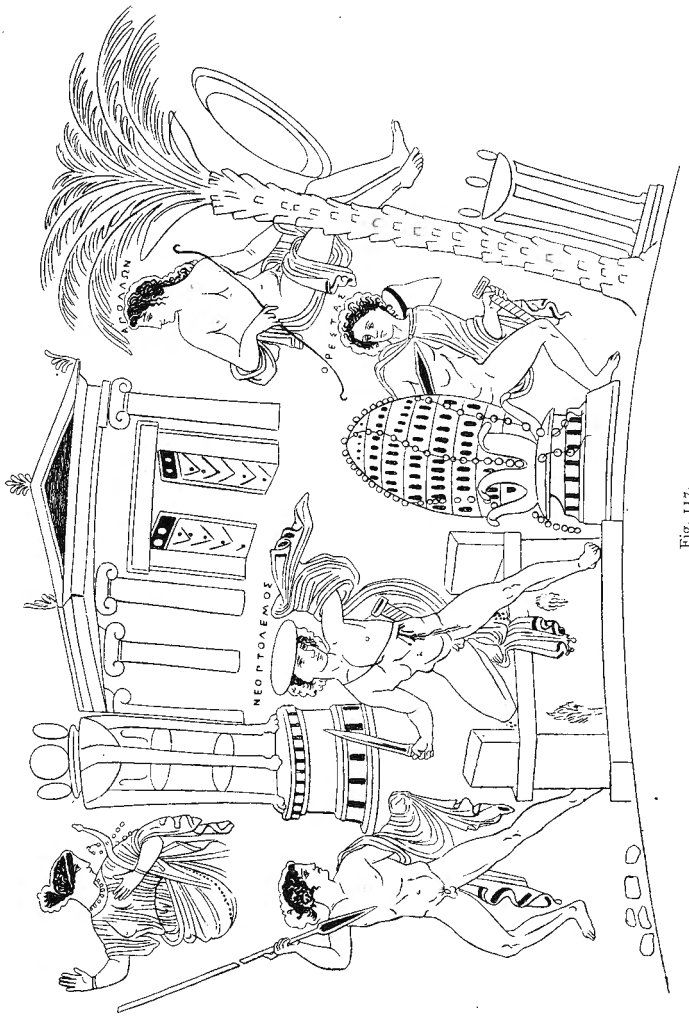

Fig. 117.

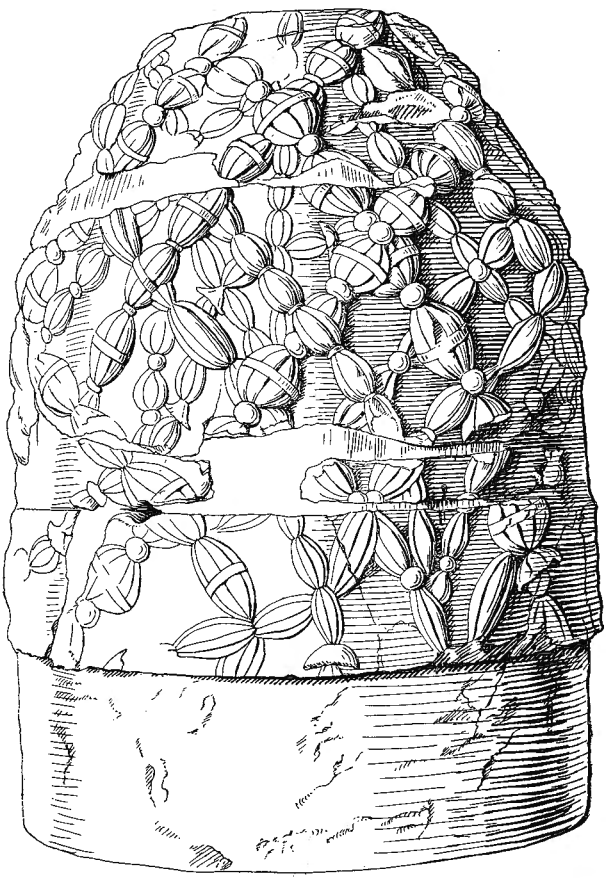

Fig. 118.

upon it. The flattened top is best explained on the assumption that the apex was made in a separate piece, though it is possible that at some period it served as the pedestal for a statuette (W. H. Roscher *op. cit.* p. 82 f. : but see *infra* p. 175 n. o). The band cut away round the bottom has been taken to imply that the whole *omphalós* was let into a larger base (G. Karo *loc. cit.* iv. 199, W. H. Roscher *op. cit.* p. 82), but may rather indicate that it was adorned with a metal collar of acanthus-leaves like that shown in the vase-painting (fig. 117).

unseen for example by Pausanias[1], was kept—as Varro knew—'in the temple at one side[2].' Delphic building-accounts of the year 343—342 B.C. and a little later prove that the *omphalós* had a porch in front of it and was protected by carefully surfaced walls supporting a roof[3]—circumstances which suggest that, like the *omphalós* at Argos[4], it stood in a small chapel of its own[5]. H. Pomtow provisionally locates it in the niche between the second and third columns of the north aisle, though he admits that it may equally

[1] On this much-disputed point see Frazer *Pausanias* v. 316 ff., F. Studniczka in *Hermes* 1902 xxxvii. 263, H. Pomtow in *Philologus* 1912 lxxi. 59 f., W. H. Roscher *Omphalos* Leipzig 1913 p. 72 f. It was reserved for F. Courby in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1914 p. 259 f. and in the *Fouilles de Delphes* ii. 1. 72 to appreciate the simple truth. Yet Paus. 10. 24. 5 ἐς δὲ τοῦ ναοῦ τὸ ἐσωτάτω, παρίασί τε ἐς αὐτὸ ὀλίγοι κ.τ.λ. drops a broad enough hint, as G. Karo saw (Daremberg—Saglio *Dict. Ant.* iv. 199 'l'omphalos lui-même était invisible pour le grand public').

[2] Varr. *de ling. Lat.* 7. 17 et terrae medium non hoc, sed quod vocant Delphis in aede ad latus (sic cod. F., *allatus* codd. G. H., *illatus* cod. a., *ablatus* cod. b. Lobeck cj. *arquatum*, Roscher *lanatum*?) est quiddam ut thesauri specie, quod Graeci vocant ὀμφαλόν, etc.

[3] É. Bourguet in the *Bull. Corr. Hell.* 1902 xxvi. 42 col. i. *a* line 30 ff. Θευγένει τᾶς ἐγκαύσιο|ς τοῦ ἐπιστυλίου τοῦ ἐπὶ τᾶι | προστάσει τᾶι πρὸ τοῦ ὀμφαλ|οῦ μισθὸς δραχμαὶ δέκα ἕξ.

Id. ib. 1902 xxvi. 65 col. ii. *b* line 14 ff. Θευφά|ντωι καὶ Σίωνι τοῦ Πασίωνος | ἔργου τοῦ περὶ τὸν ὀμφαλόν, π|[λ]ίνθων δέκ[α] ἑτεροπλεύρων, τι[ῶ]ν πλευρίων παρξοᾶς τοῦ ἄνω| σ[τ]ίχου τοῦ ὑπὸ τῶι ὑποδοκίω|ι, [ἑ]κάστου τοῦ πλευρίου δραχ|μα[ῖ] τέτο[ρε]ς, σύμπας μισθὸς ‖ [δραχμαὶ τετρ]ώκοντα.

During the building-operations the *omphalós* was safeguarded by a special construction of crude brick (*id. ib.* 1902 xxvi. 81 ff. F Inv. no. 207, 8 ff. οἰκοδομ[ῆ]σαι πλίνθοις γαίναις περ[ὶ] τὸν ὀμφαλόν, cp. *ib.* p. 92 H Inv. no. 1802 col. iii line 3 ff. [τ]ὼν σκ[απέτων τῶν περὶ τὸν ὀμφ]|αλόν).

[4] W. Vollgraff in the *Bull. Corr. Hell.* 1903 xxvii. 270 ff. no. 28 line 1 ff. θεός. προμάντιες ἀνέθεν | Ἀπόλλωνι Ἀρισ[τ]εὺς Σφυρή|δας, Φιλοκράτης Νατελιά|δας, προφῆται (Αἰ)σχύλος Ἀραχνά|δας, Τρυγῆς Αἰθωνίδας καὶ κα|τεσκεύασσαν καὶ ἔσσαντο [τὸν] | ἐκ μαντήας Γᾶς ὀμφαλὸν καὶ τ[ὰ]|ν περίστασιν καὶ τὸ φάργμα καὶ τὸν | βωμὸν πρόσ(β)ορον ποτ' ἀ(ρ)ῶ καὶ πέτ|ρινον ῥόον καὶ τὰν ἀρχιθύραν | ὑπὲρ αὐτοῦ καὶ θη[αυρὸν ἐν τῷ μαν|τήῳ κατεσκεύασσαν τοῖς πελά|νοις κλακτὸν καὶ τὰν ὁδὸν ἐργάσ|σαντο ἅπασαν κ.τ.λ. This inscription presumably refers to the cult of Apollon *Deiradiótes*, whose temple, said to have been founded by Pythaeus (Telesilla *frag.* 3 Bergk[4] *ap.* Paus. 2. 35. 2), stood on the way up to the Argive Larisa (Paus. 2. 24. 1 ἀνιόντων δὲ ἐς τὴν ἀκρόπολιν ἔστι μὲν τῆς Ἀκραίας Ἥρας τὸ ἱερόν, ἔστι δὲ καὶ ναὸς Ἀπόλλωνος, ὃν Πυθαεὺς πρῶτος παραγενόμενος ἐκ Δελφῶν λέγεται ποιῆσαι. τὸ δὲ ἄγαλμα τὸ νῦν χαλκοῦν ἐστιν ὀρθόν, Δειραδιώτης Ἀπόλλων καλούμενος, ὅτι καὶ ὁ τόπος οὗτος καλεῖται Δειράς. ἡ δὲ οἱ μαντικὴ—μαντεύεται γὰρ ἔτι καὶ ἐς ἡμᾶς—καθέστηκε τρόπον τοῦτον. γυνὴ μὲν προφητεύουσά ἐστιν, ἀνδρὸς εὐνῆς εἰργομένη· θυομένης δὲ ἐν νυκτὶ ἀρνὸς κατὰ μῆνα ἕκαστον, γευσαμένη δὴ τοῦ αἵματος ἡ γυνὴ κάτοχος ἐκ τοῦ θεοῦ γίνεται. See further Sir J. G. Frazer *ad loc.*, O. Jessen in Pauly—Wissowa *Real-Enc.* iv. 2409, O. Höfer in Roscher *Lex. Myth.* iii. 3364 ff.). It is reasonable to conclude that the Argive cult, if not a filial of the Delphic, was at least in some respects under the influence of Delphoi.

[5] So G. Karo in Daremberg—Saglio *Dict. Ant.* iv. 198, A. Frickenhaus in the *Ath. Mitth.* 1910 xxxv. 271 n. 1, H. Pomtow in *Philologus* 1912 lxxi. 60 f., cp. W. H. Roscher *Omphalos* Leipzig 1913 p. 81 n. 150.

well have occupied a corresponding position in the south aisle[1]. F. Courby[2] by a consideration of the tasks assigned to the various builders has made it probable that the *omphalós* in fact adjoined the southern rather than the northern wall of the temple[3]. Further, by a careful examination of the ruins as photographed in 1894[4] he shows that in the fourth century B.C. a side-chapel (2·90^{m} broad inside by 5·40^{m} deep) actually stood against the southern wall of the *naós*, close to its western end, thereby interrupting the inner line of Ionic columns[5]. Finally, in September 1913, buried in the made earth beneath this chapel he found the *omphalós* itself (pl. ix)[6]. It is a rough block of limestone, once coated with

[1] H. Pomtow in *Philologus* 1912 lxxi. 61, 68 ff. fig.

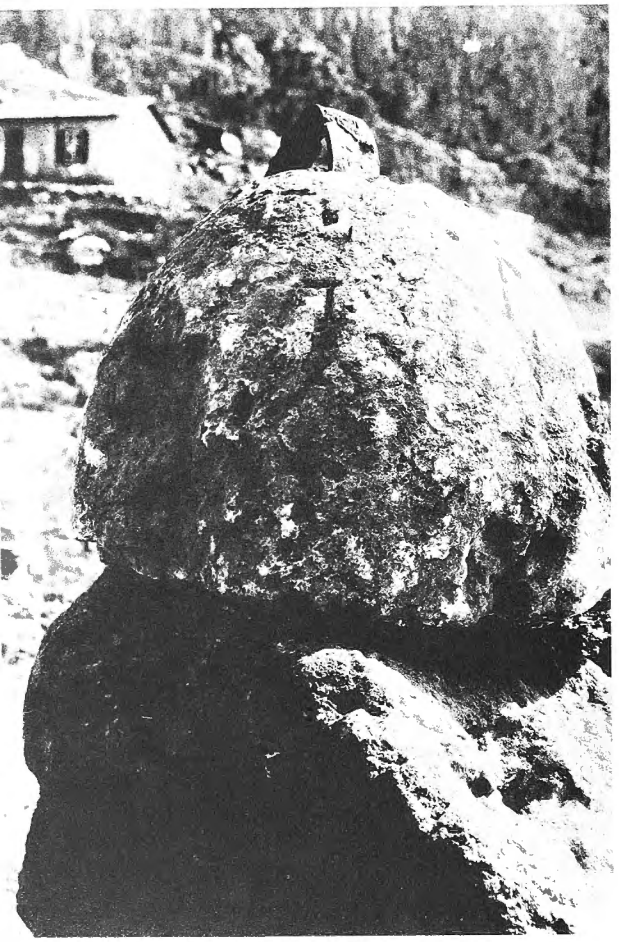
[2] F. Courby in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1914 pp. 263, 266, and in the *Fouilles de Delphes* ii. 1. 76.

[3] Pankrates was at work on the walls of the *opisthódomos* and on the eastern end of the north wall of the *naós* (*Bull. Corr. Hell.* 1902 xxvi. 65 col. iii *a* line 10 ff.). Theuphantos and Sion placed two angle-triglyphs in the *prónaos*, worked at the walls round the *omphalós*, and saw to the western end of the south wall of the *naós* (*ib.* 1902 xxvi. 64 col. ii *b* line 5 ff., 65 col. iii *a* line 1 ff.). 'Si les tâches,' says Courby, 'n'ont pas été distribuées au hasard entre les entrepreneurs et si, comme il faut bien l'admettre, quelque préoccupation de logique et de bon ordre a présidé à leur répartition, on supposera que Pankratès ayant opéré au Nord, Theuphantos et Sion opéraient au Sud, et c'est donc de ce côté qu'on replacera l'omphalos' (*Comptes rendus* etc. 1914 pp. 263, 266, cp. *Fouilles de Delphes* ii. 1. 76).

[4] The foundations of the inner colonnade, insufficiently filled in, have since given way.

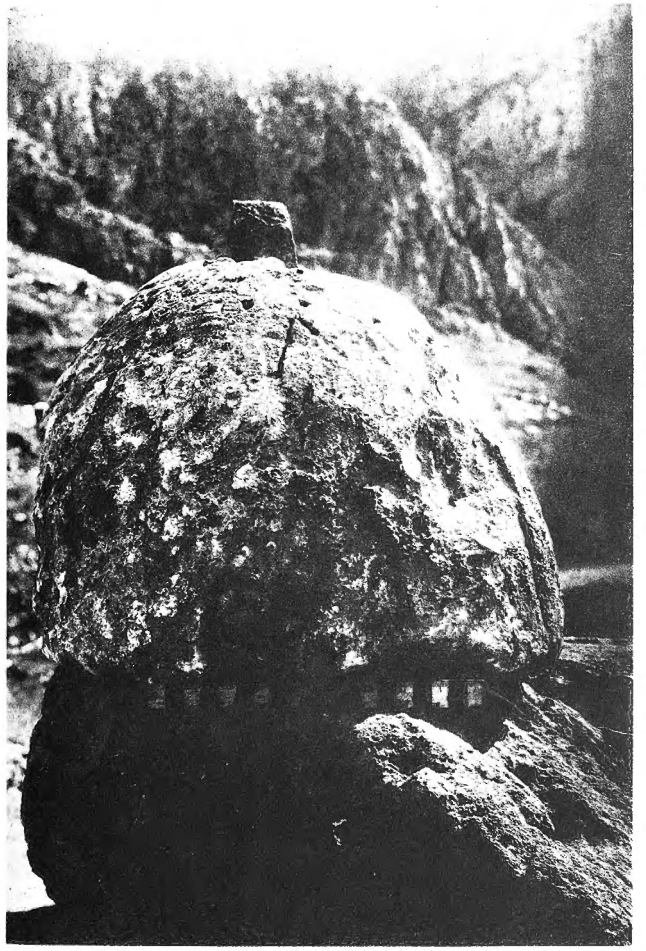
[5] Courby *Comptes rendus* etc. 1914 p. 266: 'Au Sud, sur une longueur de 3^{m} 96 à partir du mur ouest, couraient deux assises de blocs en calcaire, rigoureusement symétriques à celles du soubassement nord, et qui portaient, à n'en pas douter, un tronçon de la colonnade sud. En ce point, le soubassement est interrompu par une bâtisse en encoignure avec des restes d'un mur appliqué contre le côté sud de la cella, et d'un autre mur perpendiculaire au premier. Un examen attentif des détails que donnent les photographies [*ib.* p. 264 fig. 1, p. 265 fig. 2] prouve que cette bâtisse est, sinon tout à fait contemporaine du temple, du moins bien antérieure à notre ère.' See further Courby in the *Fouilles de Delphes* ii. 1. 47—69 ('Le fond de la cella') with figs. 45—61 and pls. 3, 4, F. Poulsen *Delphi* trans. G. C. Richards London 1920 p. 150 f.

[6] Courby *Comptes rendus* etc. 1914 p. 267 f. fig. 3. *Id.* in the *Fouilles de Delphes* ii. 1. 76 ff. figs. 64 (=my pl. ix), 65, 66, 67, 68 (=my fig. 119), 69: 'En septembre 1913, un sondage pratiqué contre le mur Sud de la cella au pied des blocs *α*, *β*, *β'* (pl. III, et fig. 47, 48, 49), dans le renfoncement inférieur de la fondation, fit apparaître un petit monument de poros en forme d'omphalos qui reposait debout, contre le parement, sur le remblai provenant des fouilles (fig. 64, 65, 66, 67). Il mesure o^{m} 385 de diamètre et o^{m} 287 de hauteur (fig. 68). Le travail en est assez grossier; les coups de ciseau du ravalement en sillonnent par endroits la surface. On aperçoit encore çà et là des débris d'un stuc analogue à celui qui recouvrait le poros du temple au IV^{e} siècle. Dans un canal de section rectangulaire qui le traverse de haut en bas pénètre, jusqu'à o^{m} 105 du bas, une tige de fer plate, tranchante d'un bord, à profil recourbé de ce côté et terminé en pointe, qui a toutes les apparences d'une lame de couteau (fig. 68): deux clous (fig. 69) enfoncés en arrière assujettissaient solidement cette lame. On peut reconstituer ainsi ce qui s'est produit. La cavité recevait une tige (de bois, sans doute, puisqu'il n'y en a plus trace) qu'on a calée, plus tard, d'une manière assez primitive et par des procédés de fortune. A o^{m} 18 environ du bas court une inscription archaïque profondément gravée, où l'on reconnaît



a

b



c

Three views of the inscribed *omphalós* found by F. Courby beneath the inner chapel of the Delphic

174 ff.

stucco and pierced from top to bottom by a square hole. From the edge of this hole projects a knife-shaped blade of iron, which is wedged in by a couple of nails and presumably served to keep in

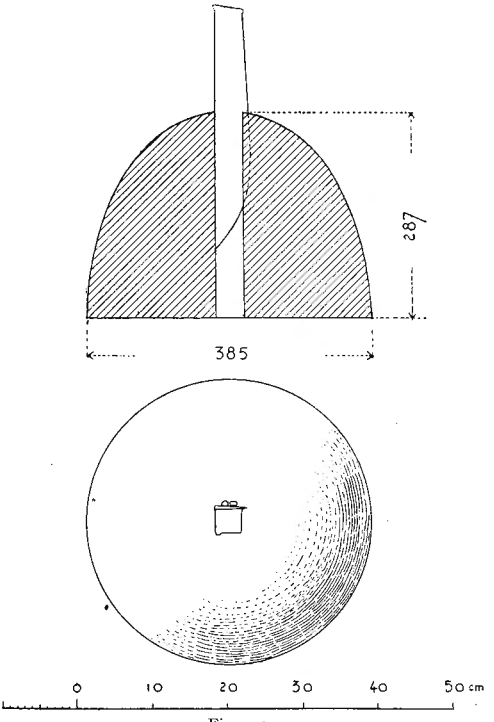


Fig. 119.

place a wooden stem, now lost. On the block are engraved four archaic letters, referable to the seventh century B.C. (fig. 120), of which the last three give us in the genitive case the name of

facilement les trois lettres ϵ γ α et, peut-être, dans le signe en z qui se voit à la suite, la lettre s. On lira donc : [facsimile to scale ⅓ = my fig. 120] ϵ γ α s.' 'S'il en est ainsi, on s'explique peut-être la destination de la tige qui traversait l'omphalos et qu'on a cru nécessaire d'y fixer solidement : on y attachait sans doute les bandelettes et les réseaux de l'*ἀγρηνόν*, mais il est probable qu'elle servait surtout à maintenir les images des deux aigles[1] ([1]On expliquera peut-être de cette manière la cavité profonde qui a été creusée au sommet de l'omphalos de marbre du Musée); ce qui nous engagerait à prendre le *ἐπ' αὐτῷ* de Strabon au sens de *ἐπ' αὐτοῦ*, comme le voulait M. Svoronos (p. 70).'

the earth-goddess Ga[1] and the first appears to be the mystic symbol E[2].

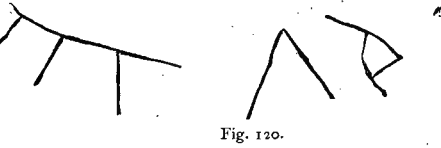

Fig. 120.

[1] The cult of Ge at Delphoi is attested by Aisch. *Eum.* 1 ff. πρῶτον μὲν εὐχῇ τῇδε πρεσβεύω θεῶν | τὴν πρωτόμαντιν Γαῖαν· ἐκ δὲ τῆς Θέμιν, | ἣ δὴ τὸ μητρὸς δευτέρα τόδ' ἕζετο | μαντεῖον, ὡς λόγος τις, Paus. 10. 5. 5 f. φασὶ γὰρ δὴ τὰ ἀρχαιότατα Γῆς εἶναι τὸ χρηστήριον, καὶ Δαφνίδα ἐπ' αὐτῷ τετάχθαι πρόμαντιν ὑπὸ τῆς Γῆς· εἶναι δὲ αὐτὴν τῶν περὶ τὸ ὄρος νυμφῶν· ἔστι δὲ ἐν Ἕλλησι ποίησις, ὄνομα μὲν τοῖς ἔπεσίν ἐστιν Εὐμολπία, Μουσαίῳ δὲ τῷ Ἀντιοφήμου (cp. Orph. *Arg.* 308) προσποιοῦσι τὰ ἔπη· πεποιημένον οὖν ἐστιν ἐν τούτοις Ποσειδῶνος ἐν κοινῷ καὶ Γῆς εἶναι τὸ μαντεῖον, καὶ τὴν μὲν χρᾶν αὐτήν, Ποσειδῶνι δὲ ὑπηρέτην ἐς τὰ μαντεύματα εἶναι Πύρκωνα. καὶ οὕτως ἔχει τὰ ἔπη· αὐτίκα δὲ Χθονίης φωνὴ (codd. σφῶν δὴ aut σφῶν, Lobeck ej. φωνὴ, Tyrwhitt cj. Χθονίη σφιν Γῇ cp. Dittenberger *Syll. inscr. Gr.*[2] no. 615, 25 Γῇ Χθονίῃ) πινυτὸν φάτο μῦθον, | σὺν δέ τε Πύρκων ἀμφίπολος κλυτοῦ Ἐννοσιγαίου [Mous. *frag.* 1 Kinkel, 11 Diels]. χρόνῳ δὲ ὕστερον, ὅσον τῷ Γῇ μετῆν, δοθῆναι Θέμιδι ὑπ' αὐτῆς λέγουσιν, Ἀπόλλωνα δὲ παρὰ Θέμιδος λαβεῖν δωρεάν, schol. Pind. *Pyth.* argum. 1 μητρῷον δέ, ὅτι Γῆς ἐστι τὸ μαντεῖον. The sanctuary of Ge is mentioned in the building-accounts *c.* 340 B.C. (É. Bourguet in the *Bull. Corr. Hell.* 1902 xxvi. 65 col. iii *a* line 3 f. ἐν τῶι σκέλει τῶι ποτὶ (τ)ὸ τᾶς Γᾶς ἱερόν) and in Plout. *de Pyth. or.* 17 περιελθόντες οὖν ἐπὶ τῶν μεσημβρινῶν καθεζόμεθα κρηπίδων <τοῦ> νεὼ πρὸς τὸ τῆς Γῆς ἱερὸν τό τε ὕδωρ ἀποβλέποντες (ante ἀποβλέποντες lacuna xii litterarum in E, post ἀποβλέποντες lacuna xi litterarum in B : W. R. Paton cj. τῆς Κασσοτίδος?)·...παρὰ τὸ νᾶμα καὶ τὸ τῆς Γῆς ἱερόν, ἧς λέγεται τὸ μαντεῖον γενέσθαι, κ.τ.λ. It seems likely too that at Delphoi the earth-mother bore at least one other name, *viz.* Themis (Gruppe *Gr. Myth. Rel.* p. 101 n. 7, H. Pomtow in *Philologus* 1912 lxxi. 57 f. ; cp. *Corp. inscr. Att.* iii. 1 no. 318 ἐρσηφόροις β' [Γ]ῆς Θέμιδος, *ib.* iii. 1 no. 350 ἱερίας Γῆς Θέμιδος, Aisch. *P.v.* 209 f. Θέμις | καὶ Γαῖα, πολλῶν ὀνομάτων μορφὴ μία, J. E. Harrison *Themis* Cambridge 1912 p. 480 ff.). O. Gruppe *op. cit.* p. 101 thinks that she bore here the further titles of Melaina (cp. *h. Ap.* 369 Γαῖα μέλαινα and Melaina or Melanis or Melantho or Kelaino the mother of Delphos together with Melantheia or Melantho his grandmother : this view, already sketched by Welcker *Gr. Götterl.* i. 326 f., is attractive ; but Γαῖα μέλαινα is, after all, a commonish tag—see Bruchmann *Epith. deor.* p. 72, and the blackness of Melaina & Co. need not be chthonian—see L. Weniger in Roscher *Lex. Myth.* ii. 2565 f.) and Eurysterna (cp. Hes. *theog.* 117 Γαῖ' εὐρύστερνος with schol. *ad loc.* Μναστέας ὁ Πατρεὺς (*cod.* C. Παταρεὺς) ἐν τῇ τῶν Δελφικῶν χρησμῶν συναγωγῇ (Mnaseas *frag.* 47 in *Frag. hist. Gr.* iii. 157 Müller) Εὐρυστέρνας ἱερὸν φησιν ἀναστῆσαι (whence Gruppe *op. cit.* p. 101 n. 11 restores Εὐρυστέρνας | ἱρὸν ἀναστῆσαι), Paus. 7. 25. 13 Γῆς δὲ ἱερόν ἐστιν ὁ Γαῖος (Schneider cj. ἔστι τὸ Γαΐον) ἐπίκλησιν Εὐρυστέρνου).

[2] In the temple at Delphoi visitors were shown three symbols resembling the letter E—a wooden original said to have been put up by the sages, a bronze copy of it presented by the Athenians, and a golden *replica* dedicated by the empress Livia (Plout. *de* E *apud Delphos* 3). Coppers of Delphoi struck by Hadrian and by Faustina Senior represent the *façade* of the temple with E in the centre of it (Imhoof-Blumer and P. Gardner *Num. Comm. Paus.* iii. 119 pl. x, 23 = my fig. 121 and pl. x, 22 = my fig. 122, J. N. Svoronos in the *Bull. Corr. Hell.* 1896 xx. 36 pl. 27, 12 and 46 pl. 29, 17 f., Head *Hist. num.*[2] p. 342). Attempts to explain the symbol have been numerous. Plout. *de* E *apud Delphos* 3 takes E as πέντε, the five sages Chilon, Thales, Solon, Bias, Pittakos ; *id. ib.* 4 equates

Thus far Monsieur Courby, whose modest but convincing announcement will rank among the most brilliant archaeological discoveries of our time. For the speculations that follow he is not responsible. But it seems to me that his momentous find goes a long way towards establishing my hypothesis of a Delphic *omphalós*-and-pillar. The slender wooden post implied by the square hole in the *omphalós* was—if I am right—none other than the 'lofty pillar' of Apollon, to which 'tithe and trophy' were attached in his earliest cult, the cult established by the Hyperboreans Pagasos and Agyieus[1]. As the veritable earth-centre it furnished the starting-point of later arithmology. In the mystic language of the Pythagoreans[2],

the second vowel **E** with the second planetary body, the sun; *id. ib.* 5 writes **E** as *εἰ*, 'if,' 'if only,' a word that might introduce a question or a prayer addressed to the god; *id. ib.* 6 treats **E** or *εἰ* as a symbol of dialectic; *id. ib.* 7—16 gives a Pythagorean disquisition on **E**, that is *πέντε*, as the numerical base resulting from the union of the first even *δύο* with the first odd *τρία*; *id. ib.* 17—21 concludes that **E** is for *εἶ*, 'thou art,' as a metaphysical invocation of the deity. Years ago I ventured the suggestion (W. H. D. Rouse *Greek Votive Offerings* Cambridge 1902 p. 354 n. 11, *Folk-Lore* 1903 xiv. 287 f.) that the **E** was a sacred relic, in fact the head of Poseidon's trident kept in the sanctuary, where he had an altar (Paus. 10. 24. 4) and probably a chapel (see H. Pomtow in *Philologus* 1912 lxxi. 45 ff.), much as the trident of Neptune is kept affixed to the wall of the ancient church of S. Vigil in Tridentum, the modern *Trento*, *Trent* (L. Schmitz in Smith *Dict. Geogr.* ii. 1230); and it will be admitted that the trident-head, which symbolises Poseidon on coins of Corinth, Leukas, Mantineia, Troizen, etc., is of the requisite shape—indeed Agathon *Telephos frag.* 4 Nauck[2] *ap.* Athen. 454 D describes the letter **E** as *τριόδους πλάγιος*, 'a trident laid crosswise.' My friend Mr A. H. Smith once told me that in his opinion the mystic **E** might possibly be explained by the resemblance that it bears to the **Ⲙ**-shaped window or smoke-hole over the door of hut-urns from Etruria etc. (*Folk-Lore* 1903 xiv. 288). Miss J. E. Harrison (*ib.* 1904 xv. 416 n. 271) has acutely compared the Delphic **E** with the trinity of pillars represented *e.g.* on Phoenician reliefs from Sardinia (G. Patroni in the *Mon. d. Linc.* 1904 xiv. 230 f. pl. 21, 2a and pl. 25, 2) and suggested 'that the **E** was originally three betyl stones or pillars placed on a basis and representing the three Charites' (J. E. Harrison in the *Comptes rendus du Congrès International d'Archéologie* Ière Session, Athènes 1905 pp. 194—196, citing Paus. 9. 38. 1, Plout. *de mus.* 14 (quoted *infra* § 3 (a) iii (χ)), schol. Pind. *Ol.* 14. 16 *παρὰ τῷ Ἀπόλλωνί φησι καθέζεσθαι τὰς Χάριτας διὰ τὴν πρὸς αὐτὸν οἰκειότητα. ἐν γοῦν Δελφοῖς ἐπὶ τῆς δεξιᾶς εἰσιν ἱδρυμέναι τοῦ Ἀπόλλωνος*). R. Eisler *Weltenmantel und Himmelszelt* München 1910 ii. 489 n. 4 draws attention to a passage in the *θεολογούμενα τῆς ἀριθμητικῆς* (*theolog. arithm.* 32 p. 30 f. Ast *τούτῳ δὴ τῷ τρόπῳ τῆς δικαιοσύνης τῷ ε' ἀριθμῷ δικαιότατα ἐνοφθείσης καὶ τῆς τοῦ στίχου ἀριθμητικῆς εἰκόνος ζυγῷ τινι οὐκ ἀπιθάνως εἰκασθείσης, τὸ παράγγελμα τοῖς γνωρίμοις ἐν συμβόλου σχήματι ὁ Πυθαγόρας ἐνεποιήσατο "ζυγὸν μὴ ὑπερβαίνειν," τουτέστι, δικαιοσύνην*), according to which Pythagoras assigned the number 5 or **E** to justice and saw in it the image of scales (*ζυγόν*): Eisler notes that this implies **E** 'in der Stellung des **Ⲙ** in der delphischen Inschrift.'

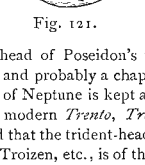

Fig. 121.

who are known to have been deeply interested in Delphoi[1], the 'axle,' the 'tower of Zan,' and 'Apollon' were all synonymous descriptions of the monad[2]; and an Orphic fragment uses 'Agyieus' with the same signification[3]. Further, Apollon's 'lofty pillar' was flanked by his 'pure doorposts[4].' That is to say, we have once more[5] the association of the sacred tree or pillar with a doorway, which we have already taken to denote the sky resting on its side-supports[6]. If this be so, we are at last in a position to solve the old problem of the Delphic Π. It was simply a graphic expression for the sky upborne by its central and lateral pillars[7].

The likeness of the Delphic *Agyieús*, thus reconstituted, to the Germanic *Irminsûl* is sufficiently striking. It becomes even more so, when we note that the *Irminsûl* described by Widukind[8] was erected at the gateway of the town with a pillar on either side of it

[1] Iambl. *v. Pyth.* 82 *τί ἐστι τὸ ἐν Δελφοῖς μαντεῖον; τετρακτύς· ὅπερ ἐστὶν ἡ ἁρμονία, ἐν ᾗ αἱ Σειρῆνες* (H. Diels *Die Fragmente der Vorsokratiker*[3] Berlin 1912 i. 358 n. explains that the Sirens produced the music of the spheres, and A. Delatte *op. cit.* p. 259 ff. adds that this harmony was the supreme revelation vouchsafed to men by Pythagoras as Apollon incarnate: see, however, *supra* i. 258 ff.), cp. Nikomachos of Gerasa (? = Iambl. *συναγωγὴ τῶν Πυθαγορείων δογμάτων* 7: G. Mau in Pauly—Wissowa *Real-Enc.* ix. 647, W. Kroll *ib.* ix. 650) *ap.* Phot. *bibl.* p. 144 a 16 Bekker who speaks of the *τετράς* as *ἁρμονίτα* (*sic*) *ἡ ἁρμονία*. Again, the Pythagoreans had their own name for the tripod (Hesych. *τρίοψ· ὁ ὑπὸ τῶν Πυθαγορικῶν ἐν Δελφοῖς τρίπους*) and perhaps their own interpretation of the mystic Ε (*supra* p. 177 n. 0).

[2] Nikomachos of Gerasa *ap.* Phot. *bibl.* p. 143 a 31 ff. Bekker *ἄξων τέ ἐστιν* (*sc. ἡ μονάς*) *αὐτοῖς καὶ ἥλιος καὶ πυράλιος, καὶ μορφὼ δὲ καὶ Ζανὸς πύργος, καὶ σπερματίτης λόγος, Ἀπόλλων τε καὶ προφήτης καὶ λόγιος.* But *id. ib.* p. 144 a 36 ff. describes the *πεντάς* in somewhat similar terms: ... *καὶ κυκλιοῦχος καὶ ἀμίθεος καὶ Ζανὸς πύργος καὶ διδυμαία καὶ ἄξων ἑδραία* (A. Delatte *op. cit.* p. 154 cj. *ἀξονεδραία*, cp. *ἀξονήλατος*, in the sense 'celle qui se tient ferme sur l'axe du monde').

[6] *Supra* p. 160.

[7] Cp. the Egyptian signs and , which depict the sky resting on or falling off the four pillars that support it (E. A. Wallis Budge *Easy Lessons in Egyptian Hieroglyphs* London 1899 p. 74, Sir G. Maspero *The Dawn of Civilization*[4] London 1901 p. 17 nn. 1 and 2).

The same conception of the pillared sky found ritual expression in the great festival-tent erected by Ion at Delphoi (Eur. *Ion* 1132 ff. *ὁ δὲ νεανίας | σεμνῶς ἀτοίχους περιβολὰς σκηνωμάτων | ὀρθοστάταις ἰδρύεθ'*...). That this was an imitation of the sky is clear, not only from the fact that it was made big enough to hold the entire populace (*ib.* 1140, 1167 f.), but also from the cosmic decoration of its roof (*ib.* 1146 ff.: see further R. Eisler *Weltenmantel und Himmelszelt* München 1910 i. 57 ff., 156 f.).

[8] *Supra* p. 53 f.

and an eagle set upon it. The mention of the eagle brings us up against another long-standing puzzle. What are we to make of the eagles on the *omphalós*? Can they too be explained in the light of this pillar connecting earth with heaven? The Delphic eagles appear in classical literature from the fifth century B.C. onwards[1]. Pindar, our earliest source, writing in 462 B.C. speaks of the Pythian priestess 'who sitteth beside the golden eagles of Zeus[2],' and an old Greek commentator on the passage tells the orthodox tale:

'A story is bruited abroad to the effect that Zeus, wanting to determine the centre of the world, let fly eagles of equal speed from west and east. They, winging their way in opposite directions, met at Pytho and by that very fact marked the central point of the whole world. Later, in token of what had befallen, he made other eagles of gold and set them up in the precinct of the god[3].'

Observe that, whenever this tale is told of Zeus, the teller uses the verb *aphiénai*, 'to let fly[4].' We shall not be far wrong, if we surmise that the tale was in fact aetiological and aimed at explaining the cult-epithet *Aphésios*, which Zeus is known to have borne in the Megarid[5] and at Argos[6]. Unfortunately the meaning of that epithet is doubtful. In modern times it has been usually taken to denote Zeus as a rain-god[7]. But 'He who lets fly' is rather, I think, suggestive of thunderbolts[8]. Be that as it may, Zeus *Aphésios* was

[1] Pind. *Pyth.* 4. 6 ff. with schol. *ad loc.*, Pind. *frag.* 27 Boeckh *ap.* Strab. 419, Eur. *Ion* 225 (if, with F. Studniczka in *Hermes* 1902 xxxvii. 269, we accept C. Pomtow in *Philologus* 1912 lxxi. 61 n. 22, we may take the words *ναὸ[ν]*... | *[ν]ε[ο]χρύσεον χρυσέοις τύποις* | ... *ἀργαίνοντε* to describe the two golden eagles, melted down by the Phocians but now renewed, and the words *αὐτόχθονι κόσμῳ* to denote the *omphalós* itself), Strab. 419, Plout. *de def. or.* 1, Loukian. *de salt.* 38 with schol. *ad loc.* p. 188, 25 ff. Rabe, Claud. *in Fl. Mallii Theodori consulatum prol.* 11 ff., schol. Bernens. *in* Lucan. 5. 71 ff. p. 156, 8 ff. Usener, schol. Eur. *Or.* 331, schol. Soph. *O.T.* 480.

Delphoi was haunted by eagles in the time of Euripides (Eur. *Ion* 153 ff.), and is so to this day (P. Gardner in the *Journ. Hell. Stud.* 1915 xxxv. 70). I once saw two eagles hovering above the deep glen of the Pleistos—a sight to be remembered.

[2] Pind. *Pyth.* 4. 6 ff. *ἔνθα ποτὲ χρυσέων* | *Διὸς αἰετῶν πάρεδρος* | *οὐκ ἀποδάμου Ἀπόλλωνος τυχόντος ἱέρεα* | *χρῆσεν* κ.τ.λ.

It remains, of course, possible that the connexion of 'Ἀφέσιος with *ἀφιέναι* was secondary, cp. U. von Wilamowitz-Moellendorff in *Hermes* 1898 xxxiii. 513 f. and H. Usener *Die Sintfluthsagen* Bonn 1899 p. 230 ff.

[8] *E.g. Il.* 8. 133 (Zeus) *ἀφῆκ' ἀργῆτα κεραυνόν*, *Od.* 24. 539 *Κρονίδης ἀφίει ψολόεντα κεραυνόν*.

in all probability worshipped at Delphoi. And it is interesting to find that as far back as Homeric times the Pythian Apollon was called *aphétor*, 'he that lets fly[1].' This appellation, which occurs but once, was and is still a bone of contention to Homer's expositors[2]. It looks as though Apollon had stepped into the place of Zeus and inherited his local title. The archer as well as the thunderer 'lets fly.' Under the rule of Apollon the eagles, however, were felt to be a mistake. Attempts were made to rewrite the myth with the somewhat cheap substitution of swans or ravens[3]. Perhaps Philomelos the Phocian, who seized the temple (*c.* 356 B.C.) and appropriated the golden eagles[4], salved his conscience with the reflection that after all eagles were not the rightful birds of Apollon. Whether the eagles melted down by Philomelos were subsequently renewed in gold, we cannot say for certain. But it appears that in later days a pair of eagles was represented in mosaic on the floor to right and left of the *omphalós*[5].

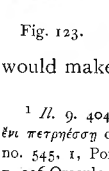

Fig. 123.

The evidence of literature may be supplemented by that of art. An electrum *statér* of Kyzikos, struck *c.* 450–400 B.C., shows two eagles, beak to beak, perched awkwardly enough on the sides of a filleted *omphalós* (fig. 123)[6]. This coin presumably depicts the famous *omphalós* at Delphoi, not—as W. H. Roscher would make out[7]—a counterpart of it at Branchidai.

A votive relief in fine yellowish marble, found at Sparta but clearly Attic in style and probably carved in the last quarter of the fifth century B.C., has Artemis with a *próchoos* filling the *phiále* of Apollon: between them is seen a plain *omphalós* set on a plinth, which supports two eagles with reverted heads (fig. 124)[1]. A very similar relief, found at Athens, decorates a pre-Euclidean decree, which confers upon a certain exegete—apparently one of those known as *Pythóchrestoi*—a throne in the Prytaneion and a seat

Relief from Phaleron: Xenokrateia and her b[illegible]te Kephisos and the deities associated with him.

See page 182 ff.

and sundry associated deities. This magnificent slab of Pentelic marble (pl. x)[1] fits into a large pillar-like base of *pôros*, which is inscribed—partly in prose and partly in verse—as follows:

'Xenokrateia, wife of Xeniades from the deme Cholleidai, as daughter (before her marriage) and mother (after it) set up by way of oblation and dedicated to Kephisos and the gods that share his altar this gift to instruct whoso will to sacrifice with a view to the consummation of blessings[2].'

It would seem that Xenokrateia had gained her heart's desire, a man-child born in lawful wedlock, by promising this tablet to Kephisos and the other fertility-powers that shared his altar. Their names are recorded on a sacred boundary-stone from the same site: 'To Hestia, Kephisos, Apollon *Pýthios*, Leto, Artemis *Lochía*, Eileithyia, Acheloios, Kalliroe, the Geraistian birth-nymphs, and Rhapso[3].' The list serves as a key to the composition of our relief[4]. On the left is Apollon *Pýthios*: he sits on a tripod-throne with a griffin for arm-rest, two coiled snakes for rings and back, and the *omphalós* with its eagles for foot-stool. Beside him in the background stands Leto binding her hair with a fillet, once added in colour. Before him Artemis holds a torch, similarly put in with paint. Next to these august persons are Xenokrateia and her boy, mere mortals and therefore figured on a smaller scale: they make

[2] Ξενοκράτεια Κηφισῶ(ι) ἱερ|ὸν ἱδρύσατο καὶ ἀνέθηκεν | ξυμβώμοις τε θεοῖς διδασκαλ|ίας τόδε δῶρον, Ξενιάδου θυγάτ|ηρ καὶ μήτηρ, ἐκ Χολειδῶν, | θύειν τῶι βουλομένωι ἐπὶ | τελεστῶν ἀγαθῶν. Staes read the concluding words as τελεστῶν 'Αγάθων[ος καὶ τοῦ δεῦνα]; but Svoronos could discover no certain trace of any letters after ἀγαθῶν, and certainly no trace of any further line such as would be needed to contain the name of Agathon's fellow-*telestés*. The queer diction and arrangement of the sentence is, I think, sufficiently explained by the exigencies of metre, an attempt being made to hitch the whole into dactylic hexameters and a final pentameter (?) thus: Ξε(ι)νοκράτεια | Κηφισῷ ἱερὸν ἱδρύσατο καὶ ἀνέθηκεν | ξυμβώμοις τε θεοῖσ(ι) διδασκαλίας τόδε δῶρον, | Ξε(ι)νιάδου θυγάτηρ καὶ μήτηρ, ἐκ Χολ(λ)ειδῶν, | θύειν τῷ βουλομένῳ ἐπὶ τελεστῶν ἀγαθῶν. Xenokrateia was no Sappho.

[3] 'Εστίαι, Κηφισ|ῶι, 'Απόλλωνι | Πυθίωι, Λητοῖ, | 'Αρτέμιδι Λοχ|ίαι, 'Ιλειθυίαι, 'Αχ|ελώωι, Καλλ|ιρόηι, Γεραισ|ταῖς Νύμφαι|ς Γενεθλ|ίαις, 'Ραψοῖ (B. Staes in the 'Εφ. 'Αρχ. 1909 p. 244 ff. fig. 1, Svoronos *Ath. Nationalmus.* p. 495, *supra* i. 112 n. 3).

[4] This was seen first by J. N. Svoronos *loc. cit.* p. 495 ff.: he did not, however, make sufficient use of the clue that he had himself discovered; for he takes Hestia (mentioned in the list) to be Ilisos (absent from the list).

B. Staes in the 'Εφ. 'Αρχ. 1909 p. 251 ff., *id. Marbres et Bronzes: Athènes*[2] p. 45 ff. no. 2756, had interpreted the whole relief as illustrating the myth of Ion: according to him, the six figures on the left (Apollon *Pýthios*, Leto, Artemis, the Pythian priestess, Ion, Xouthos setting foot on the threshold of the sanctuary) are grouped at Delphoi, the seven figures on the right (Hermes, four Nymphs, cult-image of Artemis or Eileithyia, Acheloios or Kephisos) at Athens.

their petition to Kephisos, a youthful god with a small horn (?) over his forehead and his foot supported on an altar. Behind him and facing the spectator is an older figure, whose draperies were formerly perhaps completed by the addition of a painted *chitón* and veil: she would thus have been sufficiently characterised as Hestia[1]. Then comes a group of four females, two stately matronal forms facing left in conversation with two more youthful goddesses facing right. The older figures are the Geraistian nymphs, the younger Eileithyia (holding a girdle)[2] and Rhapso (with painted needle and thread ?[3]). On the right stands Acheloios, represented as a bull with human face, and behind him his daughter Kalliroe, conceived as a Caryatid guarding a well-house. It will be observed that these three reliefs show an *omphalós* and eagles of identical type, and that in each case there is some reason to connect the scene with the *Pýthion* at Athens. Possibly, as J. N. Svoronos contends[4], eagles with reverted heads were actually to be seen on either side of the Athenian *omphalós*.

Eagles with reverted heads occur again on a votive relief of white marble (fig. 126)[5] found in Aigina some three hundred paces from a sanctuary of Apollon[6]. This monument, which may be dated *c.* 350 B.C., shows Apollon with a *kithára* in his left hand, a *phiále* in his right, and a worshipper drawing near to greet the god. Between them is an *omphalós* without a base, but covered with

[1] B. Staes and J. N. Svoronos *locc. citt.* regard this figure as male, the former calling it Hermes, the latter Ilisos. But Hermes would have had a *chlamýs* rather than a *himátion*; and Ilisos makes a very indifferent pair to Kephisos. Staes honestly remarks '*τὸ γυναικεῖον μᾶλλον πρόσωπον τῆς μορφῆς ταύτης*' ('Εφ. 'Αρχ. 1909 p. 255). That is right: all we have to do is to complete her costume in paint.

[2] Svoronos *Ath. Nationalmus.* p. 499 n. 1 cites Theokr. 17. 60 *Εἰλείθυιαν ἐβώσατο λυσίζωνον*. So Cornut. *theol.* 34 p. 73, 8 ff. [6] Four stones inscribed *ὅρος τεμένους 'Απόλλωνος Ποσειδῶνος* (*Inscr. Gr. Pelop.* i nos. 33—36) mark the boundaries of the *Apollónion* (*ib.* i no. 2, 37 *παρὰ τὸ 'Απολλών[ιον]*) or temple of Apollon (Paus. 2. 30. 1), who in Aigina bore a variety of titles (see K. Wernicke in Pauly—Wissowa *Real-Enc.* ii. 75 f.) including that of *Pýthios* (Pind. *Nem.* 3. 122 with schol. *ad loc.*, *Corp. inscr. Att.* ii. 1 no. 545, 8, 11, 35 ff.).

fillets and topped by the two birds. The design agrees exactly

Fig. 126.

with that of a copper coin (fig. 127)[1] struck by Septimius Severus at Megara, where there was an ancient cult of Apollon *Pýthios*[2].

Fig. 127.

Fig. 128.

[1] J. N. Svoronos in the *Journ. Intern. d'Arch. Num.* 1911 xiii. 312 fig. 7, *id.* in the Ἐφ. Ἀρχ. 1912 p. 254 f. pl. 22 (=my fig. 127), W. H. Roscher *Omphalos* Leipzig 1913 p. 126 f. pl. 1, 9.

[2] Paus. 1. 42. 5, cp. schol. Pind. *Nem.* 5. 84 Πύθια, *Corp. inscr. Gr.* i no. 1065 ἀρχ(ι)ερεὺς ὁ Ἀ[π]έλλωνος Π[υθίου? υθαέως?], *ib.* i no. 1058, 4 f. ἀγωνοθέτην Πυ[θαήων, Lebas–Foucart *Peloponnèse* no. 42 b, 1 Πυθάεια πυγμήν, 8 Πυθάεια [Σεβα]στε[ῖα π]αγκράτιον.

The worshipper on the coin is probably Septimius Severus himself. Another copper of Megara (fig. 128)[1], struck by Geta, repeats the type, but omits the emperor. J. N. Svoronos[2] and W. H. Roscher[3] infer that Aigina and Megara had similar *omphaloí* of their own in the service of Apollon *Pýthios*.

A copper coin of Patara (fig. 129)[4], struck by Gordianus Pius, represents Apollon, with a bay-branch in his right hand and a bow (?) in his left, standing beside a small *omphalós*, on which sits a single eagle with spread wings. Another copper of Patara (fig. 130)[5], struck in the same reign, shows the god between an *omphalós*, surmounted by an eagle and entwined with a snake, and a

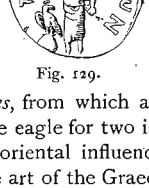

Fig. 129.

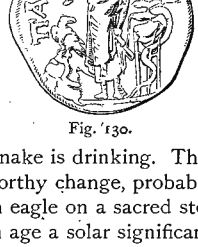

Fig. 130.

tripod-*lébes*, from which a second snake is drinking. The substitution of one eagle for two is a noteworthy change, probably brought about by oriental influence; for an eagle on a sacred stone had in Levantine art of the Graeco-Roman age a solar significance[6], which would well suit Apollon and might suffice to modify his Pythian attribute.

We have now passed in review the literary and the monumental evidence for the eagles connected with the Delphic *omphalós*. We have yet to determine their original meaning. More than fifty years ago C. Boetticher in the course of a careful monograph[7] arrived

[7] C. Boetticher *Der Omphalos des Zeus zu Delphi* (*Winckelmannsfest-Progr. Berlin* xix) Berlin 1859 pp. 1—17 figs. 1—4.

at the conclusion that the true owner of the *omphalós* was Zeus[1], and compared its two golden eagles with the two gilded eagles that flanked the altar of Zeus *Lýkaios*[2]. Whatever be thought of Boetticher's main contention, the analogy that he drew is sound and its implications are of some consequence. The altar of Zeus *Lýkaios* flanked by the gilded eagles was simply a circular summit of Mount Lykaion[3]. I am disposed to infer that the *omphalós* at Delphoi was likewise, to begin with, a mound—a mere mass of earth[4], which in process of time was conventionalised into a hemispherical or ovoid stone, but to the last bore upon its surface the tell-tale monosyllable *Gâs*[5]. This mound (the 'Archer's hill' some called it[6]) supported the sky-pillar[7], and was therefore haunted by the sky-god, who here as elsewhere came and went in the form of an eagle. I take it that both in Arkadia and in Phokis the eagles betoken the telephany of the god himself[8]. The fact that they

[1] *Id. ib.* p. 5: 'Der Omphalos ist vom Ursprunge an das Weihethum des Zeus Moiragetes und der ihm beisitzenden Moiren gewesen; durch eine Reihe schicksallenkender Mächte, welche alle nur Zeus Willen offenbaren, vererbt er sich auf den jüngsten Gott der Stätte, den Apollon, der nach einem bezeichnenden Worte Platons: in des Zeus Namen als Exeget der Satzungen und Anordnungen seines Vaters für die ganze Menschheit *ἐν μέσῳ τῆς γῆς ἐπὶ τοῦ ὀμφαλοῦ καθήμενος ἐξηγεῖται*' [Plat. *rep.* 427 c].

[5] *Supra* p. 175 f. The Delphic *omphalós* was known to Pindar, Bakchylides, the tragedians, etc. as the 'navel of the Earth' (see W. H. Roscher *Omphalos* Leipzig 1913 p. 54 ff.). But neither Homer nor Hesiod mentions it as such (*id. ib.* p. 10); our earliest source for the expression is Epimenides, who writes: *οὔτε γὰρ ἦν γαίης μέσος ὀμφαλὸς οὐδὲ θαλάσσης· | εἰ δέ τις ἐστί, θεοῖς δῆλος, θνητοῖσι δ' ἄφαντος* (*frag.* 6 Kinkel *ap.* Plout. *de def. or.* 1)—a passage considered *infra* p. 191.

were two, not one, is hardly to be explained as a device of heraldry[1], or the result of a desire for symmetry[2], or an attempt to represent both sides of a single bird[3], or a juxtaposition of memory pictures[4]. Rather it illustrates Usener's law of religious development[5]: the eagles are *Augenblicksgötter* that have not yet coalesced into a *Sondergott*.

But I am far from supposing that we have thus exhausted the import of the Delphic *omphalós*. It will not do to blink the question: Why was a particular mound of earth reduced to a compact shape and safeguarded by a whole network of fillets? When W. H. Roscher shows that the term *omphalós* was used of earth's central point[6], he does indeed insist upon a truth which helps to explain a variety of *data*, but he does not—to my thinking—really get down to the root of things. For, after all, early man was (*pace* Piette[7]) a poor mathematician and knew little of circles and centres. No, we must assume that to him the word *omphalós* meant just what it says—'the navel,' that is, the navel of the human body, not the hub of the universe. Now there is reason to believe that the Delphic cult was once comparable with that of 'Minoan' Crete[8].

P. Weizsäcker in Roscher *Lex. Myth.* i. 1598 f. fig.: but see P. Friedländer in Pauly—Wissowa *Real-Enc.* vii. 744).

It may be objected that some of these transformation-scenes are palpably late figments (*e.g.* the eagle spying upon Semele), that others were probably modelled on the myth of Ganymedes (*e.g.* the eagle ravishing Aigina: so P. Friedländer *loc. cit.* vii. 739), and that in his case earlier versions of the tale are extant not involving the bird-metamorphosis at all (*id. ib.* vii. 737 ff.). But we do well to bear in mind that late writers often used early materials (cp. Gruppe *Gr. Myth. Rel.* p. 126 n. 5), and that the appearance of Zeus as an eagle is supported by numerous parallels.

[8] The first priests of Apollon *Delphínios* at Pytho were Κρῆτες ἀπὸ Κνωσσοῦ Μινωίου (*h. Ap.* 388 ff.: see further W. Aly *Der kretische Apollonkult* Leipzig 1908 p. 35 ff., M. H. Swindler *Cretan Elements in the Cults and Ritual of Apollo* (Bryn Mawr College

It is therefore of importance to observe that the Cretans too had a holy centre called Omphalos, where it was said that the navel-string of the infant Zeus had fallen to the ground. Kallimachos, having told how Rhea entrusted the babe to the arms of Neda, continues:

> When bearing thee from Knossos, father Zeus,
> The Nymph left Thenai (Thenai near to Knossos),
> There, lord, fell off thy navel; wherefore now
> Cydonians call that spot the Omphalian Plain[1].

Diodoros tells the same tale in substantial agreement with Kallimachos:

'The story goes that, when he (Zeus) as an infant was being carried by the Kouretes, his navel fell off near the river named Triton, and that the place was consecrated and called Omphalos after the occurrence, the surrounding district being likewise known as the Omphalian Plain[2].'

This narrative was denounced by K. Hoeck as a piece of late

Monographs: Monograph Series xiii) Bryn Mawr 1913 pp. 22 ff., 41 f., 62 ff.). The leader of these Cretan settlers was Kastalios (*et. gen. s.v.* Δελφίνιος, *et. mag.* p. 255, 18 ff., Orion p. 46, 22 ff., Tzetz. *in* Lyk. *Al.* 207). After the slaughter of Python Apollon was purified in Crete by Karmanor (Paus. 2. 7. 7, cp. 10. 6. 7, 10. 7. 2, 10. 16. 5), the father of Euboulos whose daughter Karme became by Zeus the mother of Britomartis (Paus. 2. 30. 3, cp. Diod. 5. 76, Ant. Lib. 40, Verg. *Ciris* 220 ff.). According to others, Apollon was purified in Crete by Chrysothemis (schol. Pind. *Pyth.* argum. 3). This son of Karmanor is said to have won the prize in the earliest hymnic contest at Delphoi (Paus. 10. 7. 2). On another occasion the prize was secured by Eleuther (Paus. 10. 7. 3), perhaps the eponym of Eleutherna in Crete (so J. N. Svoronos in the *Bull. Corr. Hell.* 1896 xx. 8). Koretas, the reputed discoverer of the oracle (Plout. *de def. or.* 42, 46), bears a name suggestive of Crete (so J. N. Svoronos *loc. cit.*). And Pteras, the eponym of the Cretan Aptereoi, was supposed by some to have built the second temple at Delphoi (Paus. 10. 5. 10).

A leonine head in limestone, part of a ritual *rhytón*, found beneath the temple of Apollon (*Fouilles de Delphes* iv. 1. 3 fig. 2 *a*, *b*, v. 1. 3 ff. figs. 13, 13 *a*) resembles closely the famous lioness-*rhytón* in marble found at Knossos (J. de Mot in the *Rev. Arch.* 1904 ii. 217, G. Karo 'Minoische Rhyta' in the *Jahrb. d. kais. deutsch. arch. Inst.* 1911 xxvi. 254 ff. figs. 6 f., F. Poulsen *Delphi* trans. G. C. Richards London 1920 p. 15 f. figs. 1—3, p. 59). A bronze axe from Delphoi, which is engraved with 'Minoan' characters, will be figured later (*infra* § 3 (c) i (*μ*)). And 'Minoan' pottery etc. has come to light in the Delphic precinct (*Fouilles de Delphes* v. 1. 5 f., 8 ff. figs. 26—51, 15 ff. figs. 62—90, 20 f. figs. 91—97, v. 2. 133).

aetiology[1]. But it is clear that Kallimachos and Diodoros are drawing upon a common source. Moreover, since Kallimachos in his context has been paraphrasing Epimenides with regard to the tomb of Zeus[2], while Diodoros in his sequel mentions Epimenides as his first authority for things Cretan[3], it is legitimate to conclude that poet and prose-writer alike are indebted to Epimenides. As a native of Crete[4], and a Koures to boot[5], he would know the local myth. And the story, thus vouched for, must be at least as old as the beginning of the fifth century B.C.[6] That we are on the right track in attributing it to Epimenides appears from another consideration. Epimenides in a noteworthy couplet denied that the Delphic *omphalós* was the central point of land or sea[7]. Why? Because he knew the tale told about the Cretan *Omphalós*, and took the word to mean 'navel,' not 'central point.' So then Knossos, the metropolis of the Delphian shrine[8], had a sacred *Omphalós*, which *c.* 500 B.C. was believed to be the spot hallowed by the navel-string of Zeus. I submit that a like belief attached to Delphoi, and that the Delphic *omphalós* was originally the mound in which the navel-string of Zeus lay buried. Dare we add that the knife-blade, actually found by Courby and regarded by him as mere packing for the wooden pillar of the *omphalós*[9], was the very implement said to have been used at the primal *omphaletomía*?

This explanation of course presupposes an actual custom of burying the umbilical cord[10]. But such customs are amazingly fre-

[10] W. H. Roscher *Omphalos* Leipzig 1913 p. 18: 'Wer bedenkt, dass die Geburt des Zeus ebenso für das Prototyp aller menschlicben Geburten galt wie seine heilige Hochzeit (*ἱερὸς γάμος*) für das Ur- und Vorbild aller menschlichen Hochzeiten, der wird es doch wohl mit mir für recht wahrscheinlich erklären, dass der Mythos von der Nabelschnur des höchsten Gottes auch eine ähnliche Bedeutung und Behandlung dieses Organes bei den menschlichen Geburten voraussetzt. Ja, es scheint nicht unmöglich, dass man in uralter Zeit zu Omphalion die Nabelschnur des Zeus ebenso als kostbare Reliquie zeigte und verehrte, wie in Delphi den Stein, den Kronos nach der Geburt des Gottes ausgespien haben sollte (Paus. 10, 24, 6) oder zu Tegea die Locke der Gorgo Medusa (Paus. 8, 47, 5) usw.'

quent in uncivilised or semi-civilised communities[1]. To quote a typical case:

'among the Maoris, when the navel-string dropped off, the child was carried to a priest to be solemnly named by him. But before the ceremony of naming began, the navel-string was buried in a sacred place and a young sapling was planted over it. Ever afterwards that tree, as it grew, was a *tohu oranga* or sign of life for the child[2].'

Analogous practices have survived here and there in modern Greece[3]. Thus in Lesbos the severed portion of the cord is wrapped in cloth and thrown into the school, or the church, or the fields. It is believed that, if the cord falls in the school, the child will become a teacher; if in the church, a priest; if in the fields, a farmer. So, when a child hangs about a place, his mother gets angry and says to him: 'Did they throw your navel there?[4]' Similar usages are reported from Kephallenia, Aigina, Limnobria? (*Burdur*) in Pisidia, Sinasos in Kappadokia, etc., and there can be little doubt that from time immemorial the Greeks have believed in a sympathetic relation existing between the infant and the umbilical cord. It is therefore reasonable to conjecture that in Phokis, as in Crete, the navel-string of Zeus—or rather of a local king (Python?) personating the sky-god[5]—was deposited in a holy place. And where could it be more safely bestowed than beneath the central support of heaven itself? To make security doubly secure, the mound in which the relic lay buried was covered by the *agrenón* with its numerous knots[6]. So far as I can see, nothing short of this hypothesis will

See page 193 *n.* 2.

account for the awful sanctity attaching to the Delphic *omphalós*, for the manifest meaning of its name, and for the peculiar character of its decoration[1].

(*o*) The Delphic Tripod.

The Delphic *Agyieús*-pillar with its side-posts and lintel was in a manner duplicated by the Delphic tripod. Sir Arthur Evans, when discussing the libation-table found in the Dictaean cave, traced briefly but convincingly the whole pedigree of the columnar tripod[2]. He showed that the simplest form of sacred pillar, on the top of which libations were poured (fig. 132)[3], had already in the third period of the Late 'Minoan' age given rise to a tripod-*lébes* with a central stem (fig. 133)[4]; and that this in turn became the parent of such

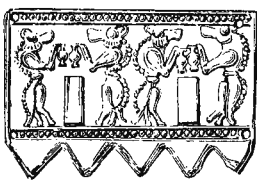

Fig. 132.

Fig. 133.

types as the tripod from Corinth with three lion-goddesses for its supports[5] or the Plataean tripod at Delphoi with a coil of three

[1] The cowrie-covered case, in which the umbilical cord of the king of Uganda was preserved (W. Ridgeway *The Dramas and Dramatic Dances of non-European Races* Cambridge 1915 p. 375 ff. figs. 85—87), bears a superficial resemblance to the fillet-covered *omphalós* at Delphoi.

[2] Sir A. J. Evans in the *Journ. Hell. Stud.* 1901 xxi. 117 f.

In the same context (p. 113 ff.) Sir Arthur traces the analogous evolution of the 'baetylic altar,' regarding it as essentially an 'offertory table placed above the sacred pillar,' and illustrating its ultimate shape from an imperial copper of the Cretan community (J. N. Svoronos *Numismatique de la Crète ancienne* Macon 1890 i. 353 pl. 35, 36 (= my pl. xi, *a*), cp. *ib.* pl. 35, 37, Κ(οινὸν) Κ(ρητῶν)). At a recent auction of Egyptian and Hellenistic antiquities I acquired a small bronze altar (pl. xi, *b*: extreme height $7\frac{1}{8}$ ins.), which closely resembles that of the Cretan coin. It has four legs, a thick central stem, and an upper tray, with widely projecting horns, so contrived that it can be lifted off from the pillar-like legs and the flat-topped barrel. This curious arrangement strongly confirms Sir Arthur's contention that the central cylinder was the original idol.

[3] Fig. 132 = Sir A. J. Evans *loc. cit.* p. 117 fig. 13 an impressed glass plaque found by Ch. Tsountas in a grave of the lower town at Mykenai. Cp. *supra* i. 36 f. fig. 9.

[4] Fig. 133 = Sir A. J. Evans *loc. cit.* p. 117 fig. 14 a similar plaque found by Ch. Tsountas in the same place.

[5] A. Michaelis *Ancient Marbles in Great Britain* trans. C. A. M. Fennell Cambridge 1882 p. 592 f., P. Gardner 'A stone tripod at Oxford' in the *Journ. Hell. Stud.* 1896 xvi. 275—280 with figs. 1 f. and pl. 12, C. Dubois in Daremberg—Saglio *Dict. Ant.* v. 475 fig. 7068. Height 0·66^{m}, lower diameter 0·54^{m}, upper diameter 0·36^{m}.

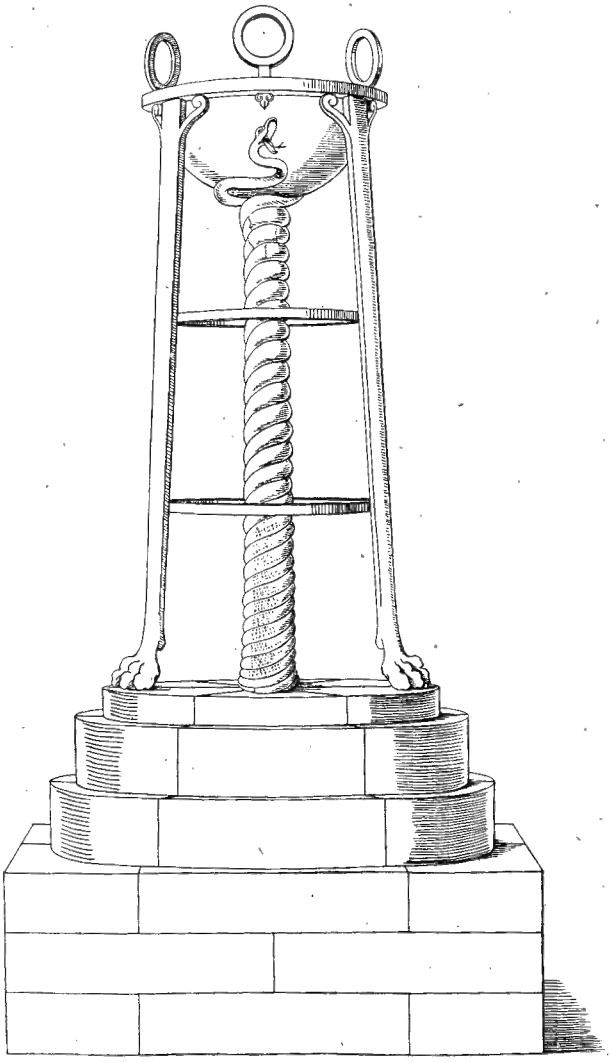

Fig. 134.

serpents for its base (figs. 134 and 135)[1]. Now the mantic tripod also appears to have been of the columnar kind—witness a certain number of sculptured copies. Thus a handsome tripod in Pentelic marble, found at Ostia and preserved in the Louvre (fig. 136)[2], has its

[1] The fullest collection of passages, ancient and modern, bearing on this famous monument is that printed by Roehl *Inscr. Gr. ant.* no. 70. See also É. Bourguet *Les ruines de Delphes* Paris 1914 pp. 160—162, Frazer *Pausanias* v. 299—307, F. Poulsen *Delphi* trans. G. C. Richards London 1920 p. 200 ff. Bourguet adopts the view advocated by H. Strack (*Denkschr. d. Akad. Wien* 1864 v Abh. p. 43 ff.), F. Wieseler (*Jahrb. f. class. Philol.* 1864 x. 245 ff., *id. Ueber den delphischen Dreifuss* (extr. from the *Abh. d. gött. Gesellsch. d. Wiss.* Phil.-hist. Classe xv) Göttingen 1871 p. 91 f. n.), P. Wolters (Friederichs—Wolters *Gipsabgüsse* p. 110 ff. no. 227), and E. Fabricius ('Das platäische Weihgeschenk in Delphi' in the *Jahrb. d. kais. deutsch. arch. Inst.* 1886 i. 176—191 with figs.), *viz.* that the serpent-base was a central column supporting the *lébes* and enclosed by the legs of the tripod. Frazer and Poulsen favour the rival view advanced by P. A. Dethier and A. D. Mordtmann ('Epigraphik von Byzantion und Constantinopolis' in the *Denkschr. d. Akad. Wien* 1864 v Abh. pp. 3—48 with figs. *x*, *y*, *z* and pls. 1—4), *viz.* that the feet of the tripod rested on the serpent-heads projecting from the top of the spiral column. Restorations on the former hypothesis are given by H. Strack (*Denkschr. d. Akad. Wien* 1864 v Abh. pl. 3, 24 *c*), B. Graef (*Jahrb. d. kais. deutsch. arch. Inst.* 1886 i. 189 fig.), and A. Tournaire (in his panorama of the precinct, *Fouilles de Delphes* ii. 1 pl. 9); restorations on the latter hypothesis, by P. A. Dethier and A. D. Mordtmann (*Denkschr. d. Akad. Wien* 1864 v Abh. pl. 2, 24, cp. pl. 4, 24 *a*, 24 *b*), and by F. Andre (H. Luckenbach *Erläuterungen zur Wandtafel von Delphi* München und Berlin 1904 pp. 22—25 fig. 22). I follow Strack, Wieseler, etc. rather than Dethier, Mordtmann, etc. because (*a*) the extant serpent-head shows no trace of a tripod-foot attached to its upper surface (*Denkschr. d. Akad. Wien* 1864 v Abh. p. 12 n. 1), and (*b*) the monument as reconstructed by Dethier, Mordtmann, etc. would have been *sui generis*, whereas the monument as reconstructed by Strack, Wieseler, etc. fits into a whole series of recognised types. The sketch that I give (fig. 134) is a fresh restoration, which takes into account (1) the plinth still *in situ* at Delphoi (Rhomaides phot. Delphoi no. 17); (2) the twenty-nine coils now in the Hippodrome (*Almeidan*) at Constantinople (*Jahrb. d. kais. deutsch. arch. Inst.* 1886 i pl. opposite to p. 176), (3) the serpent-heads figured in a Turkish miniature of 1530—1540 A.D. representing a festival in the *Almeidan* under Sultan Soliman (*Denkschr. d. Akad. Wien* 1864 v Abh. pp. 9, 30 pl. 1, 14 *c*, *d*, *e*), (4) the serpent-heads seen and drawn by Wheler in 1675 A.D. (G. Wheler *A journey into Greece* London 1682 p. 185 fig.), and (5) the upper part of one of the heads, found by Fossati in 1848 A.D. and preserved in the Museum of St Eirene at Constantinople (*Denkschr. d. Akad. Wien* 1864 v Abh. p. 8 pl. 1, 17 *a*, *b*, *c*, *d*).

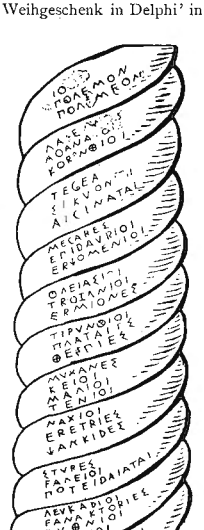

Fig. 135.

[2] Clarac *Mus. de Sculpt.* ii. 258—269 pl. 121 fig. 50 (= my fig. 136), Fröhner *Sculpt. du Louvre* i. 114 f. no. 90, Baumeister *Denkm.* i. 462 fig. 510, Reinach *Rép. Stat.* i. 20 no. 3. Height 1·16^{m}. The parts restored are the plinth, the griffin-feet, and all the lower portion of the monument including the hoop, the three uprights excepting one *bucranium* and the upper portion of another, the foliage-lyres, and the quiver-strap.

lébes resting on a central shaft, which is conceived as a bay-trunk and entwined with a snake—Python presumably, since the god's quiver is hanging beside it. Similarly a statuette in Greek marble that forms part of the same collection (fig. 137)[1] represents Apollon

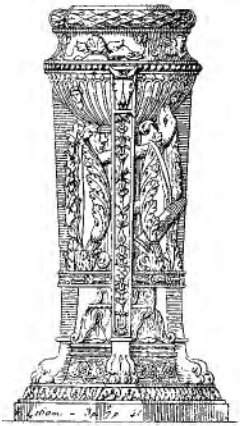

Fig. 136.

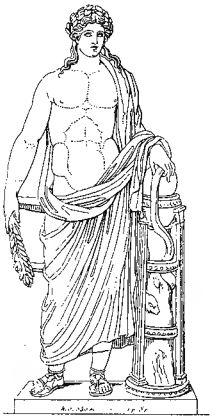

Fig. 137.

standing by a tripod, whose *lébes* again rests on a bay-trunk entwined with a snake. These examples remind us that the name *tripos* was given to a species of bay-tree with three roots[2]. But a statuette in Italian marble at Dresden (fig. 138)[3], which presupposes a Greek bronze[4] of Praxitelean character[5], shows Apollon leaning on a columnar tripod of a much earlier type[6]. If it be objected that the column necessary in a marble copy would have been absent from the bronze original, we can point not only to reliefs[7] and vase-

[1] Clarac *Mus. de Sculpt.* pl. 346 fig. 925 (=my fig. 137), Fröhner *Sculpt. du Louvre* i. 97 f. no. 73, Reinach *Rép. Stat.* i. 175 no. 5. Height 0 535^{m}. The parts restored are the plinth, both feet of Apollon, the tip of his nose, a patch over his left breast, his right hand with the bay-branch (tenon antique), his left hand with the snake's tail, the middle of the snake's body, and the greater portion of the tripod-hoops.

[6] Note that the supporting column tapers downwards like those of 'Minoan' art.

[7] E. Fabricius in the *Jahrb. d. kais. deutsch. arch. Inst.* 1886 i. 186 cites the Chigi base

paintings (fig. 139)[1], in which there is no question of structural exigency, as portraying such tripods, but also to sundry bases[2] and votive replicas[3] as furnishing additional proof of their existence. An architect's specification, found in or near Athens and dated by M. Holleaux before 350 B.C., actually gives a detailed description of one:

Fig. 138.

(*infra* p. 199 n. 2), a relief found in the theatre at Athens, which shows a tripod with a central support in the form of a Doric pillar (L. von Sybel *Katalog der Sculpturen zu Athen* Marburg 1881 p. 281 no. 3912), and a relief drawn by F. Adler on the Akropolis, which has a tripod with a central stem broad at the base and rapidly tapering upwards (not in L. von Sybel *op. cit.*).

[1] F. Wieseler *Ueber den delphischen Dreifuss* (extr. from the *Abh. d. gött. Gesellsch. d. Wiss.* Phil.-hist. Classe xv) Göttingen 1871 p. 90 n. adduces: (i) A red-figured *amphora* from Sorrento in the British Museum, signed by the vase-painter Polygnotos; this has for its main subject two women attaching fillets to the horns of two bulls, which stand before two large columnar tripods (*Brit. Mus. Cat. Vases* iii. 209 f. no. E 284, Gerhard *Auserl. Vasenb.* iv. 10 pl. 243, W. Klein *Die griechischen Vasen mit Meistersignaturen*[2] Wien 1887 p. 199, Reinach *Rép. Vases* ii. 123, 1, Hoppin *Red-fig. Vases* ii. 376 f. fig.). (ii) A red-figured *oinochóe* in the Pourtalès collection, which depicts Nike flying through the air with a fillet towards a columnar tripod (T. Panofka *Antiques du cabinet du comte de Pourtalès-Gorgier* Paris 1834 p. 30 f. pl. 6, 1 = my fig. 139). Both vases are referable to the fine style of vase-painting (*c.* 460—440 B.C.), and in both the tripod-support takes the form of a Doric column.

[2] E. Fabricius in the *Jahrb. d. kais. deutsch. arch. Inst.* 1886 i. 187 ff. notes the following examples: (i) Adjoining the S. angle of the pre-Periclean Propylaia there is still *in situ* the stepped base of a columnar tripod, which cannot be later than the first half of *s.* v B.C. (R. Bohn *Die Propyläen der Akropolis zu Athen* Berlin & Stuttgart 1882 p. 17 pl. 3, W. Doerpfeld in the *Ath. Mitth.* 1885 x pl. 2, W. Judeich *Topographie von Athen* München 1905 p. 198 fig. 22 = M. L. D'Ooge *The Acropolis of Athens* New York 1908 p. 31 fig. 7). (ii) An inscribed block, found W. of the theatre and now lying in the Asklepieion on the S. slope of the Akropolis, formerly supported a choragic tripod of the columnar kind and is assigned to a date not long after 292 B.C. (*Corp. inscr. Att.* ii. 3 no. 1295, Michel *Recueil d'Inscr. gr.* no. 926, Dittenberger *Syll. inscr. Gr.*[2] no. 710: Fabricius *loc. cit.* gives section and plan).

[3] E. Fabricius *loc. cit.* p. 186: 'Unter jenen kleinen Nachbildungen wirklicher Dreifüsse aus Olympia [see A. Furtwängler in *Olympia* iv. 72 ff. nos. 534—547 pl. 27, cp. *ib.* p. 212 f. no. 1370 fig.] befinden sich, wie K. Purgold mir mitgetheilt hat, einige Exemplare [but see A. Furtwängler in *Olympia* iv. 73 no. 538 pl. 27], bei denen unterhalb des Kessels in der Mitte zwischen den Beinen ein senkrechter Stab aus ineinandergedrehten Bronzedrähten angebracht ist.'

'The tripod to be fixed on the impost, after boring holes for its feet and running the same with lead; also a small column of Pentelic marble to be fixed beneath

Fig. 139.

the tripod, with a Doric capital to it, after cutting it straight below and working it smooth; and the capital to be painted in encaustic[1].'

As to Delphic usage, we may with some show of reason argue from the Plataean trophy to the Pythian tripod. If the former was columnar, it is natural to suppose that the latter was too; for votive

[1] M. Holleaux in the *Ath. Mitth.* 1906 xxxi. 134—144 with fig. 1: line 16 ff. *ἐπὶ δὲ τὸ κ|αταληπτῆρος τὸν τρίποδα καθαρμόσαι, ἐντετ|<τ>ράναντα τοῖς ποσὶ καὶ περιμολυβδοχοῆσαι, κ|αὶ κιόνιον ὑφαρμόσαι Πεντελεικὸν ὑπὸ τὸν τ|ρίποδα, Δωρικὸν ἔχον τὸ ἐπίκρανον· ἐπ' αὐτῶ, ὑπ|οξέσαντα ὀρθὸν καὶ ξύσαντα λεῖον, καὶ τὸ ἐπί|[κρανον] ἐγκαῦσαι.*

a

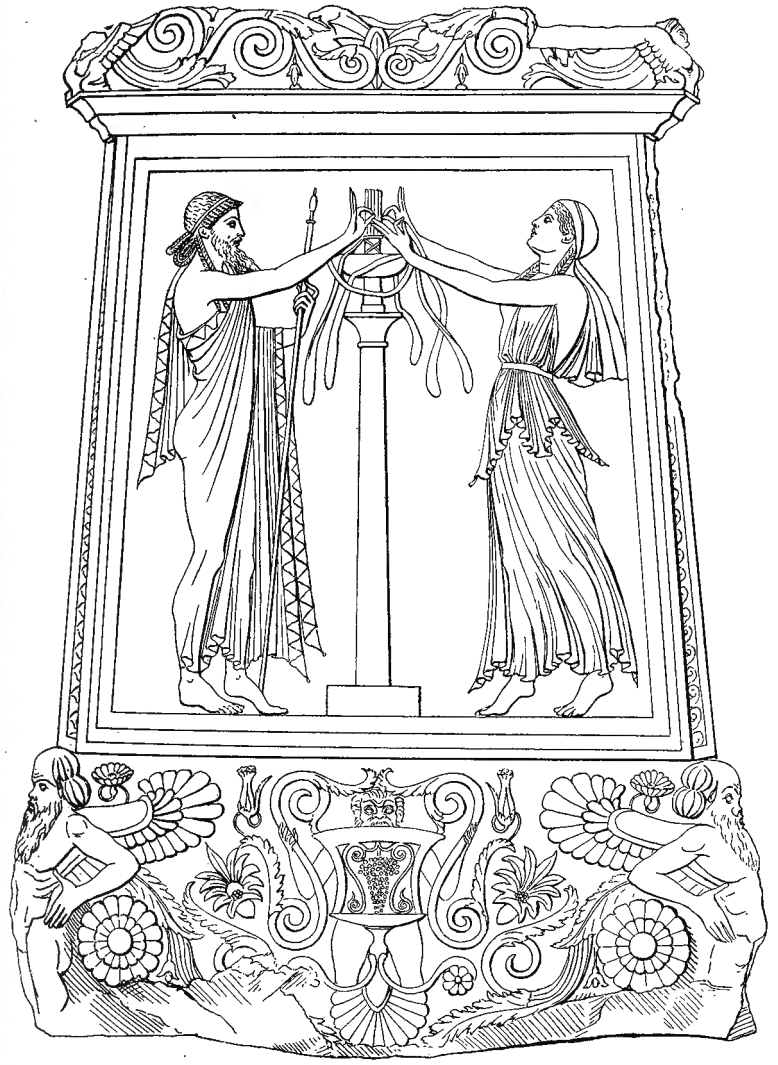
b

The Chigi base at Dresden, representing:

(*a*) The rape of the Delphic tripod by Herakles.

(*b*) The dedication of a columnar tripod by the *Pythía* and the *neokóros*.

(*c*) The dedication of a torch by a priest and priestess.



c

See page 199 *n.* 2.

offerings tend to repeat the pattern of the local *chose sacrée*[1]. Accordingly the Chigi base at Dresden (pl. xii)[2], which itself seems to have carried a columnar tripod[3], represents in one of its three archaistic panels a Pythian priest and priestess dedicating a similar tripod on the top of a pillar. Moreover, archaising reliefs of the imperial age (figs. 140, 141)[4], made in all probability to commemorate

[1] On the principle underlying this multiplication see *Folk-Lore* 1903 xiv. 271.

[2] This marble base (height 1·30m), which came to the Dresden Museum along with the Chigi collection, portrays (*a*) the rape of the Delphic tripod by Herakles, (*b*) the dedication of a columnar tripod by the *Pythía* and the *neokóroi*, (*c*) the dedication of a torch by a priest and priestess. Various archaeologists have attempted to combine the three scenes in a consistent whole. According to K. O. Müller *Handbuch der Archaeologie der Kunst*[2] Stuttgart 1878 p. 78, P. Pervanoglu in the *Ann. d. Inst.* 1861 xxxiii. 119 ff., Friederichs—Wolters *Gipsabgüsse* p. 169 ff. no. 423, the central panel represents the struggle between Herakles and Apollon as the mythical prototype of a Pythian contest for a prize-tripod, the panel to the right shows the consecration of the prize, the panel to the left that of the torch with which the victor had won his race. The base as a whole supported the tripod thus gained, which, to judge from the kneeling *Silenoí*, the *Sátyroi* with drinking-cups, etc., was dedicated to Dionysos. Hence the ivy-wreath and 'Sardanapalos' type (E. Thraemer in Roscher *Lex. Myth.* i. 1117 ff., P. Wolters in the *Jahrb. d. kais. deutsch. arch. Inst.* 1893 viii. 179 f., K. A. McDowall in the *Journ. Hell. Stud.* 1904 xxiv. 255 ff., V. Macchioro in the *Jahresh. d. oest. arch. Inst.* 1909 xii. 189 ff., W. Helbig *Führer durch die öffentlichen Sammlungen klassischer Altertümer in Rom*[3] Leipzig 1912 i. 210 f. no. 320) of the *neokóros*. A very different and far less probable explanation was given by C. Boetticher *Das Grab des Dionysos* (*Winckelmannsfest-Progr. Berlin* xviii) Berlin 1856 with figs. 1 f. and 'Zu den Bildwerken der dreiseitigen Basis in Dresden' in the *Arch. Zeit.* 1858 xvi. 197 ff. pl. 117. He took (*a*) as the rape of the tripod, marking the locality, (*b*) as the consecration of the tripod in which were the remains of Dionysos, torn to pieces by the Titans, (*c*) as the consecration of a *bákchos* or *phanós*, symbolising the resuscitation of the god. He also supposed that the priest and priestess were the *neokóros* and the principal *thyiás*, and that the base carried a *phanós*, not a tripod. See further W. G. Becker *Augusteum Dresden's antike Denkmäler enthaltend* Leipzig 1804 i. 42 ff. pls. 5—7, B. Leplat *Recueil des marbres antiques qui se trouvent dans la galerie du roy de Pologne à Dresden* Dresde 1733 pl. 3, H. Hettner *Die Bildwerke der königlichen antiken Sammlung zu Dresden*[4] Dresden 1881 no. 80, L. Stephani in the *Compte-rendu St. Pét.* 1868 pl. 46 f., Overbeck *Gr. Kunstmyth.* Apollon p. 405 Atlas pl. 24, 14, *id. Gr. Plastik*[4] i. 260 ff. fig. 70 a, b, *ib.* p. 298 n. 203, Brunn—Bruckmann *Denkm. der gr. und röm. Sculpt.* pl. 150, Müller—Wieseler—Wernicke *Ant. Denkm.* ii. 3. 328 f. pl. 27, 7, Reinach *Rép. Reliefs* ii. 60 nos. 1—3. My illustrations are made from the cast at Cambridge.

[3] This is the inference usually, and in my opinion correctly, drawn from the fact that the upper surface of the base is triangular in shape with a smooth circular mark (12¾ inches across) in the centre of it: see the diagrams given by C. Boetticher in the *Arch. Zeit.* 1858 xvi. 227 f. F. Hauser *Die neu-attischen Reliefs* Stuttgart 1889 p. 52 f. no. 69 and p. 117 holds that the base bore a moveable object such as a *candelabrum*, but admits (p. 52) that its reliefs must have been copied from those of a tripod-base.

central portion of the pillar and of the figure adjoining it, together with hands or fingers, nose-tips, etc.

(2) At Berlin (*Ant. Skulpt. Berlin* p. 373 f. no. 921, T. Schreiber *op. cit.* pl. 35 (=my fig. 141), F. Studniczka *Die Siegesgoettin* Leipzig 1898 p. 20 pl. 8, 38 (=*id.* in the *Jahrb. d. kais. deutsch. arch. Inst.* 1906 xxi. 77 f. fig. 1), Overbeck *op. cit.* Apollon p. 259 f. Atlas pl. 21, 10, *id. Gr. Plastik*[4] i. 262 fig. 71, Müller—Wieseler—Wernicke *Ant. Denkm.* ii. 3. 303 ff. pl. 25, 4). Restored: only the extreme edges of the relief and the top of Nike's nearer wing. Pentelic marble. Height 0·775^{m}, breadth 1·035^{m}.

(3) In the Louvre (Fröhner *Sculpt. du Louvre* i. 42 ff. no. 12, Clarac *Mus. de Sculpt.* ii. 236 pl. 120 fig. 39 (=Reinach *Rép. Stat.* i. 20 no. 1), T. Schreiber *op. cit.* pl. 36, Overbeck *Gr. Kunstmyth.* Apollon p. 260, Collignon *Hist. de la Sculpt. gr.* ii. 652 f. fig. 344, J. Warrack *Greek Sculpture* Edinburgh s. a. pl. 62). Restored: the edges of the relief, including plane-tree, head and left leg of small statue, top of Nike's wings, forearms of Apollon and Artemis, upper part of tripod, and most of pediment. Greek marble. Height 0·65^{m}, breadth 1·08^{m}.

(4) In the British Museum—fragment containing left half only (*Brit. Mus. Cat. Sculpture* i. 357 f. no. 775, *Description of the collection of Ancient Marbles in the British Museum* London 1842 ix. 157 ff. pl. 36, 2, F. Studniczka in the *Jahrb. d. kais. deutsch. arch. Inst.* 1906 xxi. 79 with fig. 3 on p. 82 from a photograph by W. A. Mansell & Co. no. 1050). Pentelic marble. Height 2 ft. 4 ins., breadth 1 ft. 9 ins.

Other replicas, excerpts, etc. are listed by Overbeck *Gr. Kunstmyth.* Apollon p. 260 ff. Atlas pl. 21, 11 f.

[1] Cp. the citharodic relief of *c.* 400 B.C. from Miletos (? Athens), acquired by the Dresden Museum in 1892 (P. Herrmann in the *Jahrb. d. kais. deutsch. arch. Inst.* 1894 ix Arch. Anz. p. 26 f. fig., F. Studniczka *ib.* 1906 xxi. 80 with fig. 2 on p. 79, Reinach *Rép. Reliefs* ii. 60 no. 4),—a possible forerunner of the archaising series. The prototype is, however, to be sought in an archaic original such as the fragmentary altar of the Barracco Museum (*Catalogue Barracco* no. 82, Reinach *Rép. Reliefs* iii. 160 nos. 2 and 3).

Delphoi[1] and bearing a tripod of the species under discussion. We conclude that the mantic tripod, like these votive tripods, had a central support.

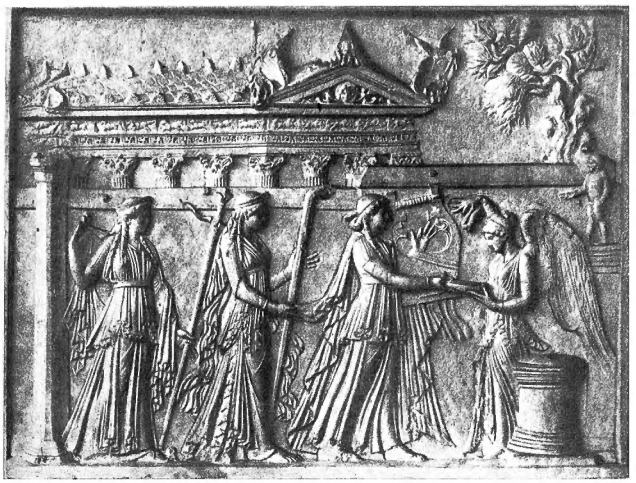

Fig. 141.

But if so, it follows that Apollon seated on his tripod is virtually seated on the top of a sacred pillar. He is thus a figure comparable with Zeus enthroned on the summit of his sky-pillar[2]. Indeed, an

[1] The locality of the scene represented has often been discussed. Most modern critics have identified the temple with that of Apollon at Delphoi (so *e.g.* F. G. Welcker *op. cit.* ii. 42 f., 49, 53, W. Fröhner *op. cit.* i. 42 f., Overbeck *Gr. Kunstmyth.* Apollon p. 267 f., W. Helbig *op. cit.* ii. 426). But L. Stephani in the *Compte-rendu St. Pét.* 1873 p. 222 ff., followed by B. Graef in Müller—Wieseler—Wernicke *op. cit.* ii. 3. 305, argued for the temple of the Palatine Apollo in Rome. F. Studniczka in the *Jahrb. d. kais. deutsch. arch. Inst.* 1906 xxi. 81 ff. favours the Pythion on the Ilissos with the Olympieion in the background, but *ib.* 1907 xxii. 6—8 candidly admits that there is much to be said in favour of the identification with Delphoi. In particular, the chariot-frieze of the temple, the plane-tree in the precinct (Klearchos περὶ παροιμιῶν 1 *frag.* 46 (*Frag. hist. Gr.* ii. 318 Müller) *ap.* Athen. 701 D, Theophr. *hist. plant.* 4. 13. 2, Plin. *nat. hist.* 16. 238), the terrace-wall rising from left to right, the small ancient-looking effigy of Apollon (Paus. 10. 16. 8), if not also the triangular pillar supporting the tripod (?=the trophy erected by the Messenians of Naupaktos, on which see Homolle in the *Bull. Corr. Hell.* 1897 xxi. 616 ff.), all find their readiest explanation in the Delphian precinct.

[2] *Supra* pp. 45 ff. (with i. 62 fig. 38), 89 f. Cp. the language of Eur. *I. T.* 1253 ff. τρίποδί τ' ἐν χρυσέῳ θάσσεις, ἐν ἀψευδεῖ θρόνῳ | μαντείας βροτοῖς | θεσφάτων νέμων | ἀδύτων ὕπο, κ.τ.λ.

art-type traceable to the fifth century B.C. (figs. 142, 143)[1] represents

Fig. 142.

[1] A fifth-century type of Apollon on the tripod is furnished by a relief in Pentelic marble (height 0·70m, breadth 0·69m), now at Athens (Svoronos *Ath. Nationalmus.* p. 334 f. pl. 54=my fig. 142, Staïs *Marbres et Bronzes : Athènes*[2] p. 238 f. no. 1389 fig.). The god rests his feet on a two-stepped base and raises his right hand, which may have held a *phiále* or, less probably, some attribute added in paint (bay-branch ?). Before him stands Artemis leaning on her bow, the string of which was presumably painted. Behind him stands Leto laying her right hand on the shoulder of her son. The three together form the *personnel* of the Athenian Pythion (A. Furtwängler in the *Ath. Mitth.* 1878 iii. 186 n. 1, Svoronos *loc. cit.* p. 335). The relief is inscribed [.....] ΒΑΚΧΙΟΑΝΕ-ΘΗΚΕ, *i.e.* [ὁ δεῖνα] Βακχίου ἀνέθηκε. On it see further Friederichs—Wolters *Gipsabgüsse* p. 371 no. 1131, Overbeck *Gr. Kunstmyth.* Apollon pp. 232, 282 Atlas pl. 20, 16, A. Furtwängler in Roscher *Lex. Myth.* i. 458, T. Schreiber *ib.* i. 600, B. Sauer *ib.* ii. 1977 fig. 4, Reinach *Rép. Reliefs* ii. 327 no. 2. The same type, with some variation of details, occurs on a red-figured vase of the second Hamilton collection (Tischbein *Hamilton Vases* i. 96 ff. pl. 28=my fig. 143, Lenormant—de Witte *Él. mon. cér.* ii. 142 f. pl. 46, Overbeck *Gr. Kunstmyth.* Apollon pp. 232, 326 no. 49, 329 Atlas pl. 22, 7, Reinach *Rép. Vases* ii. 286, 2), which shows Apollon on the tripod, with a *phiále* in his right and a bow in his left hand, flanked by two females (? *Pythia* and attendant).

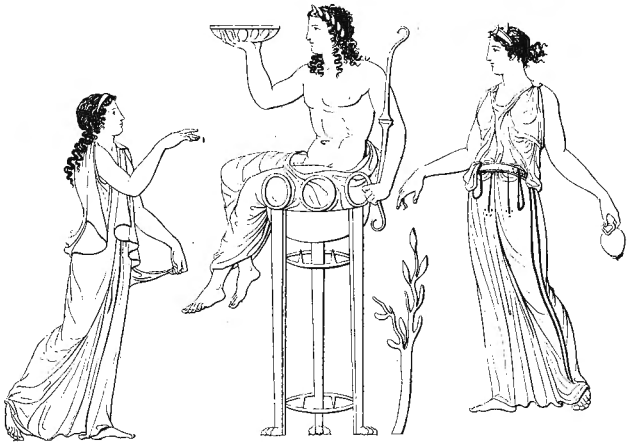

Fig. 143.

The figure of Apollon, isolated from this group, reappears on a handsome Apulian *amphora* with volute handles, found at Ceglie and now at Berlin (Furtwängler *Vasensamml. Berlin* ii. 905 ff. no. 3256), the neck of which shows Orestes at Pytho pursued by an Erinys: between them is Apollon on his tripod with his right hand outstretched and his left holding a long bay-branch; two females (*?Pythía* and attendant) fly in alarm (Raoul-Rochette *Monumens inédits d'antiquité figurée* Paris 1831 p. 193 ff. pl. 35, Overbeck *Gall. her. Bildw.* i. 710 f. Atlas pl. 29, 4, *id. Gr. Kunstmyth.* Apollon p. 232 Atlas pl. 22, 8, O. Höfer in Roscher *Lex. Myth.* iii. 982). Similarly a Lucanian *amphora* from Anzi in the same collection (Furtwängler *Vasensamml. Berlin* ii. 868 no. 3148) figures the god with a *phiále* raised in his right hand, but has the attribute in his left overpainted as a club, Apollon being thereby converted into a Herakles (E. Gerhard *Berlin's antike Bildwerke* Berlin 1836 i. 275 f. no. 979, Lenormant—de Witte *Él. mon. cér.* ii. 143). The same figure, reversed and bereft of its attributes, but still accompanied by Leto and Artemis, served for Apollon *Pýthios* in the dedication of Xenokrateia (*supra* p. 183 n. 1). It was even translated, without essential change, from sculpture in relief to sculpture in the round, cp. (i) a statue in the Villa Albani at Rome (S. Raffei *Ricerche sopra un Apolline della villa Albani* Rome 1821 with views of front, side, and back, Clarac *Mus. de Sculpt.* pl. 486 B fig. 737 A = Reinach *Rép. Stat.* i. 249 no. 6 side-view, T. Panofka *Die Heilgötter der Griechen* Berlin 1845 p. 5 pl. 1, 6 front-view, Overbeck *Gr. Kunstmyth.* Apollon p. 231 ff. Atlas pl. 23, 30 three-quarter position, Müller—Wieseler—Wernicke *Ant. Denkm.* ii. 3. 309 pl. 25, 14 front-view, W. Helbig *Führer durch die öffentlichen Sammlungen klassischer Altertümer in Rom*[3] Leipzig 1913 ii. 409 f. no. 1848); (ii) a statue at Naples (G. Finati in the *Real Museo Borbonico* Napoli 1843 xiii. 1—4 pl. 41, Clarac *Mus. de Sculpt.* pl. 485 fig. 937 front-view, *ib.* pl. 486 A fig. 937 three-quarter position = Reinach *Rép. Stat.* i. 248 no. 3 and i. 249 no. 2, Overbeck *Gr. Kunstmyth.* Apollon p. 231 ff.).

Overbeck *op. cit.* p. 282 rightly observes that in all these representations Apollon has a bare body with a *himátion* wrapped about his legs. Since this is the normal costume of the seated Zeus, we may, I think, conclude that Apollon is here conceived as the mouthpiece of Zeus himself.

The Delphic Tripod

Apollon in the customary garb of Zeus, seated as his *prophétes*[1] on the tripod and divining with uplifted *phiále* in the presence of Artemis and Leto. The tripod itself, for those that know its history, is tantamount to a celestial seat[2]. The god seated upon it is for the

[1] Aisch. *Eum.* 17 ff. *τέχνης δέ νιν Ζεὺς ἔνθεον κτίσας φρένα | ἵζει τέταρτον τόνδε μάντιν ἐν θρόνοις* (so A. [2] Ennius (*frag.* 416 Baehrens) *ap.* Varr. *de ling. Lat.* 7. 48 appears to have spoken of the sky as *cava cortina* on account of its likeness to the *lébes* of Apollon. The passage is thus printed by G. Goetz—F. Schoell (1910): apud Ennium (*Ann.* 9 V.[2]): '†quaeque in corpore cau[s]a c<a>eruleo †cęlo cortina receptat.' cava cortina dicta, quod est inter terram et caelum ad similitudinem cortinae Apollinis; ea a corde, quod inde sortes primae existimatae. C. O. Mueller (1833), followed by I. Vahlen[1] (1854) and L. Mueller (1884), restored the extract from Ennius as *quae cava corpore caeruleo cortina receptat*; Ae. Baehrens (1886), as *quaeque in corpore – – | – caua caeruleo caelo cortina receptat.* Probably Ennius was thinking of the sky as an inverted caldron. It should, however, be borne in mind that the tripod-*lébes* was sometimes fitted with a hemispherical lid (*e.g. supra* i pl. xiii), and that this lid might on occasion be banded with the astronomical zones and spangled with stars (F. Wieseler *Ueber den delphischen Dreifuss* (extr. from the *Abh. d. gött. Gesellsch. d. Wiss.* Phil.-hist. Classe xv) Göttingen 1871 pp. 33, 59 n., 81 n. 55, 93 n. 61, 95 fig. 7 after R. Garrucci *Vetri ornati di figure in oro trovati nei*

time being in heaven, released from the limitations of terrestrial life and free to range in thought over land and sea (fig. 144)[1]. Themis

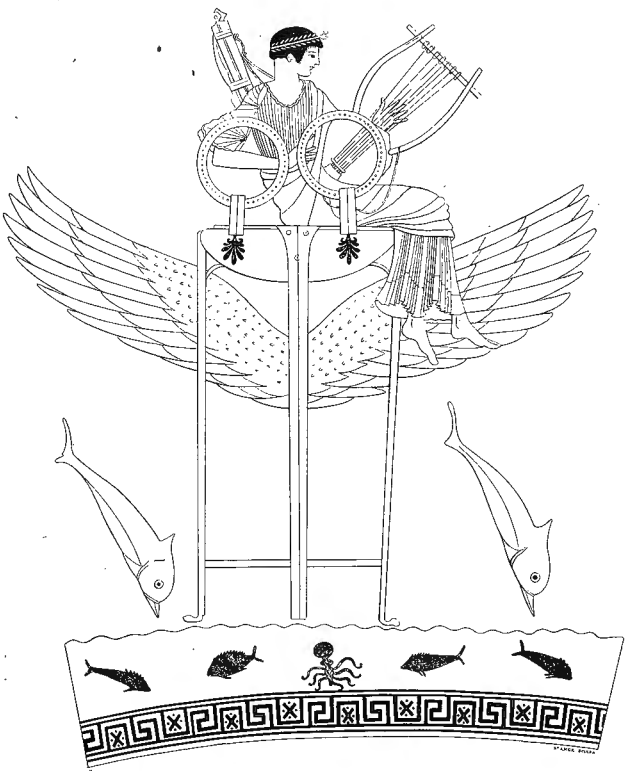

Fig. 144.

cimiteri dei cristiani primitivi di Roma Roma 1858 p. 75 f. pl. 36, 5 a fragmentary vessel of *s.* iv A.D., on which we see Apollon in a loose transparent *chitón* standing beside his tripod, inscribed [VI]VAS MVLTIS ANNIS PIE ♀ ZESES ♀, the whole being executed in gold foil between two layers of glass). Asklepiades of Myrlea thought that tripods dedicated to the gods were made round in imitation of the universe (Athen. 489 c).

[1] A magnificent red-figured *hydría*, painted *c.* 480 B.C. and now preserved in the Vatican, shows Apollon, with lyre, bow and quiver, uplifted on a great winged tripod above the sea, in which are four fish and an octopus: the plunging dolphins mark him as Apollon *Delphínios* (*Mus. Etr. Gregor.* ii pl. 15 (*ib.*[2] pl. 21), T. Panofka in the *Ann. d.*

is finely conceived by a fifth-century artist as sitting on the Delphic tripod and fixing her gaze on the *phiále*, while she divines the future for Aigeus (fig. 145)[1]. In this masterly painting Themis is but the prototype of the *Pythía*: even the *Pythía*, when she mounts the tripod (fig. 146, *b*)[2], lays by mortality and becomes more than human in her insight and foresight.

Inst. 1832 iv. 333 ff., *Mon. d. Inst.* i pl. 46 = my fig. 144, Lenormant—de Witte *El. mon. cér.* ii. 20 ff. pl. 6, L. de Ronchaud in Daremberg—Saglio *Dict. Ant.* i. 315 fig. 370, Baumeister *Denkm.* i. 102 fig. 108, Overbeck *Gr. Kunstmyth.* Apollon pp. 63 no. 13, 64 f., 360 Atlas pl. 20, 12, M. Mayer in Roscher *Lex. Myth.* i. 2839, K. Wernicke in Pauly—Wissowa *Real-Enc.* ii. 93, Reinach *Rép. Vases* i. 79, 4, W. Helbig *Führer durch die öffentlichen Sammlungen klassischer Altertümer in Rom*[3] Leipzig 1912 i. 311 no. 497, Hoppin *Red-fig. Vases* i. 66 no. 51, *supra* i. 335). As to the further interpretation of the scene, opinions differ. According to T. Panofka, C. Lenormant, J. de Witte, L. de Ronchaud, Apollon is crossing the sea from Crete to Delphoi. J. Overbeck, M. Mayer, S. Reinach, W. Helbig, hold that he is on his way from the land of the Hyperboreoi to Delphoi, where his advent was celebrated in the spring. K. Wernicke speaks more cautiously of 'der Meerfahrt des A. Delphinios.' A. Baumeister thinks 'dass hier das Orakel des Gottes als Kolonien gründend und aussendend gedacht wird.' Is it over-rash to see in this striking picture an artist's conception of the ecstasy or 'travelling clairvoyance' of the god? In any case an odd sequel to it is Artemid. *oneirocr.* 5. 21 ἔδοξέ τις ἐπὶ κύκλῳ τρίποδος διαπλεῖν πέλαγος μέγα: φεύγων (ἔφυγε B.) ἀδικημάτων γραφὴν ἑάλω καὶ εἰς νῆσον κατεδικάσθη· τὸ γὰρ περιέχον ἦν αὐτὸν περίῤῥυτον, καὶ ἐοικὸς (οἷκος codd. Ald. J. G. Reiff corr.) τὸ σχῆμα τῇ νήσῳ.

[1] Fig. 145 is the interior design of a red-figured *kýlix* from Vulci, now at Berlin (Furtwängler *Vasensamml. Berlin* ii. 719 f. no. 2538), painted by an Attic master (? Aison: see Hoppin *Red-fig. Vases* i. 16 no. 2) *c.* 440 B.C. The scene is laid in the temple at Delphoi, which is suggested by the Doric column and entablature in the background. ΑΙΓΕΥΣ, with *himátion*, bay-wreath, and fillet, propping his left arm-pit on a staff, awaits the response of ΘΕΜΙΣ, who sits on the tripod, wearing *chitón*, *himátion* drawn up over her head, ear-ring, and necklace. In her right hand she holds a sprig of bay, in her left a *phiále*, which she is apparently using as a divining-glass (so first Miss P. B. Mudie Cooke in the *Journ. Rom. Stud.* 1913 iii. 169, cp. *supra* i. 128). F. E. Robbins 'The Lot Oracle at Delphi' in *Class. Philol.* 1916 xi. 278—292 supposes that Themis is reading lots (*Class. Quart.* 1916 x. 235). See further E. Gerhard *Das Orakel der Themis* (*Winckelmannsfest-Progr. Berlin* vi) Berlin 1846 pp. 1—11 pl., *id. Auserl. Vasenb.* iv. 102—104 pl. 327 f. = Reinach *Rép. Vases* ii. 162, O. Benndorf in the *Wien. Vorlegebl.* A pl. 11, 2 (after Gerhard), Furtwängler—Reichhold—Hauser *Gr. Vasenmalerei* iii. 110—113 pl. 140. My fig. 145 is after the last-named publication. I cannot, however, agree with Hauser that the female figure on the tripod is but a priestess (*ib.* p. 110 'Sie wird hier Themis...genannt mit einem mythologisch nicht gerechtfertigten Namen.'): see Harrison *Myth. Mon. Anc. Ath.* p. c fig. 19, *ead. Themis* p. 480 f. fig. 142, who rightly remarks—'she is not the Pythia; the days of Ægeus are earlier than this; she is Themis, who came after Ge and before Apollo.'

[2] A red-figured *nestorís* from Basilicata, now at Naples (Heydemann *Vasensamml. Neapel* p. 155 f. no. 1984), shows on the one side Orestes pursued by two Furies, on the other Orestes in the presence of Apollon at Delphoi. Both paintings are of interest. In (*a*) the double row of striped pebbles may indicate the scene of murder (cp. Frazer *Golden Bough*[3]: The Scapegoat p. 15 ff.). The bared breast of the right-hand Fury recalls the last appeal of the desperate queen (Aisch. *cho.* 896 ff., Eur. *El.* 1206 ff., *Or.* 526 ff., 839 ff., with C. Sittl *Die Gebärden der Griechen und Römer* Leipzig 1890 p. 173). And the face seen in the uplifted mirror is that of Klytaimestra herself—a masterly device to express

(π) The *Pythia* as Bride of Apollon.

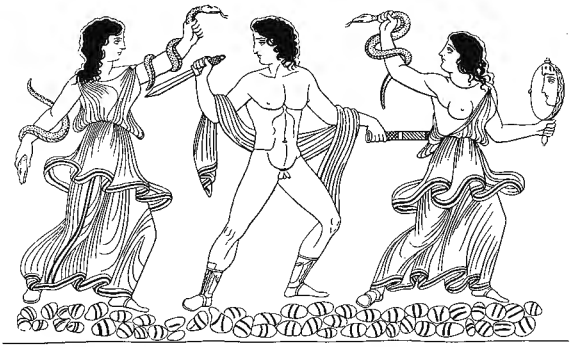
At this point two questions may be raised. If Themis, whom the Fates once bore 'up the dread stair' to Zeus[1], was really the

Fig. 145.

the haunting presence, and a reminder that the Erinys was originally none other than the angry ghost (Miss J. E. Harrison 'Delphika' in the *Journ. Hell. Stud.* 1899 xix. 205 ff. and in her *Proleg. Gk. Rel.*[2] p. 213 ff.). In (*b*) Apollon is seated, with bay-branch and lyre, on the *omphalòs*: to the left we see Orestes, to the right Pylades, both in traveller's attire, the former holding a sheathed sword and two spears, the latter a spear. Behind Orestes stands Elektra. Behind Pylades is the *Pythia*, seated on the tripod with a fillet in her hands. The moment represented is doubtful. According to C. Boetticher, Orestes is receiving from Apollon the sword and the commission to slay his mother. Raoul-Rochette and most critics regard the scene as one of purification after the deed: *e.g.* J. Overbeck thinks that Orestes is about to touch his blood-stained blade with the bay-branch of Apollon. H. Heydemann would recognise here the concluding act of the whole drama—'die Schwertweihe nach völliger Genesung und Rückkehr aus der Krim.' See further Raoul—Rochette *Monumens inédits d'antiquité figurée* Paris 1831 p. 186 ff. pls. 36 and 37=my fig. 146, Inghirami *Vas. fitt.* iv. 115 f. pl. 385 f., Overbeck *Gall. her. Bildw.* i. 706, 715 f. Atlas pl. 29, 2, 2[a], 11, C. Boetticher in the *Arch. Zeit.* 1860 xviii. 49 ff. pl. 138, 1=Reinach *Rép. Vases* i. 390, 2 f.

[1] *Supra* p. 37.

prototype of the *Pythia*, are we to infer that the *Pythia* was in some sense the bride of Apollon? It would seem so: at least the language



a

b

Fig. 146.

used by Origenes[1] and Ioannes Chrysostomos[2], if not that used by

[1] Orig. *c. Cels.* 3. 25 ὅτε διὰ τοῦ Πυθίου στομίου περικαθεζομένη τῇ καλουμένῃ προφήτιδι πνεῦμα διὰ τῶν γυναικείων ὑπεισέρχεται τὸ μαντικόν, ὁ Ἀπόλλων, τὸ καθαρὸν ἀπὸ γῆθεν σώματος (P. Koetschau *ad loc.* notes that ὁ Ἀπόλλων is not to be altered into τοῦ Ἀπόλλωνος with E. Bouhéreau, nor to be deleted with F. Guyet, but to be regarded as in apposition [an alternative propounded by Bouhéreau]), 7. 3 ἱστόρηται τοίνυν περὶ τῆς Πυθίας, ὅπερ δοκεῖ τῶν ἄλλων μαντείων λαμπρότερον τυγχάνειν, ὅτι περικαθεζομένη τὸ τῆς Κασταλίας στόμιον ἡ τοῦ Ἀπόλλωνος προφῆτις δέχεται πνεῦμα διὰ τῶν γυναικείων κόλπων· οὗ πληρωθεῖσα ἀποφθέγγεται τὰ νομιζόμενα εἶναι σεμνὰ καὶ θεῖα μαντεύματα. κ.τ.λ., 8. 46 ἡ μὲν Πυθία ἱστόρηται (so edd. ἱστόρησεν cod. A.) ὅτι καὶ νοθευθεῖσα ἔχρησέ ποτε.

[2] Io. Chrys. *hom.* 29. 1 *in epist. i ad Cor.* (lxi. 242 Migne) λέγεται τοίνυν αὕτη ἡ Πυθία γυνή τις οὖσα ἐπικαθῆσθαι τῷ τρίποδί ποτε τοῦ Ἀπόλλωνος, διαιροῦσα τὰ σκέλη· εἶθ' οὕτω

Strabon[1] before them, definitely implies that Apollon impregnated the *Pythia* as she sat on the tripod[2] and filled her with his own divinity[3]. Moreover, the marital relation of the god and his pro-

πνεῦμα πουηρὸν κάτωθεν ἀναδιδόμενον καὶ διὰ τῶν γεννητικῶν αὐτῆς διαδυόμενον μορίων πληροῦν τὴν γυναῖκα τῆς μανίας, καὶ ταύτην τὰς τρίχας λύουσαν λοιπὸν ἐκβακχεύεσθαί τε καὶ ἀφρὸν ἐκ τοῦ στόματος ἀφιέναι, καὶ οὕτως ἐν παροιν[ί]ᾳ γενομένην τὰ τῆς μανίας φθέγγεσθαι ῥήματα.

[3] In keeping with her character as bride of Apollon is the fact that the *Pythia* was always a virgin. At first a young woman was chosen, but after the outrage of Echekrates the Thessalian a woman over fifty years of age dressed as a virgin. See Eur. *Ion* 1324 f. Ιῶ. χαῖρ', ὦ *φίλη μοι μῆτερ, οὐ τεκοῦσά περ.* | ΠΥ. *ἀλλ' οὖν λεγόμεθά γ'* (so P. Elmsley for codd. *λεγόμεσθ'*. C. Badham cj. *ἐλεγόμεθ'*)*· ἡ φάτις δ' οὔ μοι πικρά,* Diod. 16. 26 *θεσπιῳδεῖν δὲ τὸ ἀρχαῖον λέγεται παρθένους διά τε τὸ τῆς φύσεως ἀδιάφθορον καὶ τὸ τῆς 'Αρτέμιδος ὁμογενές· ταύτας γὰρ εὐθετεῖν πρὸς τὸ τηρεῖν τὰ ἀπόῤῥητα τῶν χρησμῳδουμένων* (*χρησμοδοτουμένων* codd. F. L.). *ἐν δὲ τοῖς νεωτέροις χρόνοις φασὶν 'Εχεκράτην* ('*Εχεκράτη* cod. T. et schol. Aristoph. *Plout.* 9 in ed. Ald.) *τὸν Θετταλὸν παραγενόμενον εἰς τὸ χρηστήριον καὶ θεασάμενον τὴν χρησμολογοῦσαν παρθένον ἐρασθῆναι διὰ τὸ κάλλος αὐτῆς καὶ συναρπάσαντα βιάσασθαι· τοὺς δὲ Δελφοὺς διὰ τὸ γεγενημένον πάθος εἰς τὸ λοιπὸν νομοθετῆσαι μηκέτι παρθένον χρηστηριάζειν, ἀλλὰ γυναῖκα πρεσβυτέραν πεντήκοντα ἐτῶν χρησμολογεῖν· κοσμεῖσθαι δ' αὐτὴν παρθενικῇ σκευῇ καθάπερ ὑπομνήματι* (*ὑπόμνημά τι* schol. Aristoph. *loc. cit.*) *τῆς παλαιᾶς προφήτιδος* (sic codd. F. L. et schol. Aristoph. *loc. cit. προφητείας* cett.), Plout. *de def. or.* 51 *τούτων ἕνεκα καὶ συνουσίας ἀγνὸν τὸ σῶμα καὶ τὸν βίον ὅλως ἀνεπίικτον ἀλλοδαπαῖς καὶ ἄθικτον ὁμιλίαις* (sic codd. V. Barb. Ambr. *ὁμιλίαις καὶ ἄθικτον* cett.) *φυλάττουσι* (sic codd. V[1]. Barb. Ambr. F. *φυλαττούσης* cett.) *τῆς Πυθίας*

phetic priestess at Delphoi is strongly supported by later beliefs with regard to Python[1] and by the analogous cult at Patara, where so long as Apollon tarried in the town his prophetess was shut up with him in the temple by night[2].

(ρ) The *Pythia* and the Caldron of Apotheosis.

But, again, if the *Pythia*, a mere mortal, is thus raised to the rank of a goddess, must she not, either in grim earnest or in mock show, endure the ritual of apotheosis? Now one form of this ritual consisted in the real or simulated boiling of the person concerned. A mortal plunged in the seething caldron thereby lost his mortality. Old age dropped away from him: perennial youth remained. He died the death of a man: he lived the life of a god. This strange belief points backwards—it may be—to a time when the dead, or even the aged, were dismembered and boiled for the readier removal of the flesh from their bones and the consequent liberation of their souls[3]. In any case it underlies and explains a variety of Greek

(sic codd. V[1]. Barb. Ambr. Πυθιάδος cett.), Tert. *ad uxor.* 1. 6 Achaeae Iunoni apud Aegium oppidum virgo sortitur, et quae Delphis insaniunt nubere nesciunt, *id. de monogam.* 17 sunt et quae de tota continentia iudicent nos, virgines Vestae et Iunonis Achaicae et Dianae Scythicae et Apollinis Pythii, Hieron. *epist.* 123. 8 (xxii. 1051 Migne) ut omittam virgines Vestae et Apollinis Iunonisque Achivae (Erasmus cj. *Argivæ*, alii mallent *Achaïcæ*) et Dianae et Minervae, quae perpetua sacerdotii virginitate marcescunt. Similarly the priestess, who was also the prophetess, of Apollon *Deiradiótes* at Corinth is described as ἀνδρὸς εὐνῆς εἰργομένη (Paus. 2. 24. 1).

Ceremonial continence may doubtless be due to more causes than one. E. Fehrle *Die kultische Keuschheit im Altertum* Giessen 1910 traces it back to two main sources: (*a*) Whoever enjoys the love of a deity, must forgo the love of mortals; (*b*) Sexual intercourse defiles, and religious defilement implies the presence of evil spirits. In any given case either or both of these causes may be operant. But that the former at least was a *vera causa* to the worshippers of Apollon seems certain—witness *e.g.* the myth of Koronis.

[1] Souid. *s.v.* Πύθωνος· δαιμονίου μαντικοῦ. "τὰς τε πνεύματι Πύθωνος ἐνθουσιώσας καὶ φαντασίαν κινήσεως παρεχομένας τῇ τοῦ δαιμονίου περιφορᾷ ἠξίου τὸ ἐσόμενον προαγορεῦσαι· οἱ δὲ τῶν δαιμόνων κάτοχοι ἔφασκον τὴν νίκην Μήδοις παρέσεσθαι," with G. Bernhardy *ad loc.*

[2] Hdt. 1. 182 ἀμφότεραι δὲ αὗται (*sc.* the wife of Zeus *Bêlos supra* p. 128 n. 4 and the wife of Zeus *Thebaieús supra* i. 348 n. 1) λέγουτο· ἀνδρῶν οὐδαμῶν ἐς ὁμιλίην φοιτᾶν· καὶ κατάπερ ἐν Πατάροισι τῆς Λυκίης ἡ πρόμαντις τοῦ θεοῦ, ἐπεὰν γένηται—οὐ γὰρ ὦν αἰεί ἐστι χρηστήριον αὐτόθι (Serv. *in* Verg. *Aen.* 4. 143 states that Apollon was at Patara during the six winter months, at Delos during the six summer months)—ἐπεὰν δὲ γένηται, τότε ὦν συγκατακληῖεται τὰς νύκτας ἔσω ἐν τῷ νηῷ.

[3] See the facts collected by Frazer *Golden Bough*[3]: Taboo p. 372 n. 5, *ib.*[3]: The Dying God p. 96, *id. Belief in Immortality* i. 165 ff. My suggestion has been to some extent anticipated by W. Mannhardt *Germanische Mythen* Berlin 1858 p. 72 n. 5: 'Hängt mit dieser Anschauung zusammen, dass man im zwölften und dreizehnten Jahrhundert Leichname aufschnitt, das Fleisch mit Wein oder Wasser absott und ablöste und abgesondert von den gesammelten Knochen begrub? Pabst Bonifaz VIII. untersagte diese Sitte.' Mannhardt adds detailed proof of this singular custom, noting that it was chiefly observed when a man died abroad and his friends or relatives wished his bones to be buried at home.

rites, myths, and imaginings—the rites of Leukothea[1], the myths of Pelias[2] (fig. 147), Aison[3] (fig. 148), Iason[4] (pl. xiv), Pelops[5] (fig. 149),

[1] *Supra* i. 419 n. 10, 674 f.

[2] *Supra* i. 245, 419, 679. A relief of Pentelic marble, found at Rome in 1814 and now in the Lateran Museum (O. Benndorf—R. Schöne *Die antiken Bildwerke des lateranensischen Museums* Leipzig' 1867 p. 61 ff. no. 92, W. Helbig *Führer durch die öffentlichen Sammlungen klassischer Altertümer in Rom*[3] Leipzig 1913 ii. 7 f. no 1154, Friederichs—Wolters *Gipsabgüsse* p. 400 ff. no. 1200, Brunn—Bruckmann *Denkm. der gr. und röm. Sculpt.* pl. 341 b (=my fig. 147), Reinach *Rép. Reliefs* iii. 277 no. 1), shows the preparations for the boiling of Pelias. On the left in foreign garb stands Medeia ἐψάνδρα (*Anth. Pal.* 15. 26. 5 (Dosiadas)), with a basket or box of magic herbs in her hands (cp. *supra* i. 721 pl. xli); she lifts the lid to throw its contents into the caldron, which the younger sister is just placing in position before her. On the right stands the elder sister, irresolute, her knife ready drawn from its sheath, but her head sunk pensively on her hand (H. Brunn in the *Sitzungsber. d. kais. bayr. Akad. d. Wiss.* Phil.-hist. Classe 1881 ii. 95 ff., followed by A. Milchhoefer *Die Befreiung des Prometheus* (*Winckelmannsfest-Progr. Berlin* xiii) Berlin 1882 p. 37 f., took this figure for Medeia, and Medeia for one of the Peliades: but see O. Benndorf—R. Schöne *op. cit.* p. 63).

A replica, also of Pentelic marble, at Berlin (*Ant. Skulpt. Berlin* p. 375 f. no. 925 fig., R. Kekule von Stradonitz *Die griechische Skulptur*[3] Berlin 1907 p. 174 ff. fig.) has the same subject cleaned up and worked over by a Renaissance-artist, who has substituted a sprig of olive for the knife and has chiselled away the tell-tale sheath. The relation of the Berlin to the Lateran relief gave rise to a long controversy (A. Conze 'Das Berliner Medearelief' in *Historische und philologische Aufsätze Ernst Curtius...gewidmet* Berlin 1884 pp. 97—104 pl. 2, O. Kern 'Zu den beiden Peliadenreliefs' in the *Jahrb. d. kais. deutsch. arch. Inst.* 1888 iii. 68—72, A. Michaelis 'Nochmals die Peliadenreliefs' *ib.* 1888 iii. 225—229, E. Loewy 'Un rilievo del Museo Lateranense e le sue pretese repliche' in the *Bull. Comm. Arch. Comun. di Roma* 1897 pp. 42—50 pl. 3 f., R. Kekule von Stradonitz 'Über das Peliadenrelief in den Königlichen Museen zu Berlin' in the *Jahrb. d. kais. deutsch. arch. Inst.* 1897 xii. 96—100), which is summarised by H. Lechat in the *Rev. Ét. Gr.* 1897 x. 351 f. and by H. N. Fowler in the *Am. Journ. Arch.* 1897 i. 402 f.

A third relief, known only from a drawing of *s.* xvii in the dal Pozzo collection (ii. 28 no. 34) at Windsor Castle and from a sketch in bistre and white made in the first half of *s.* xviii and formerly owned by Cardinal Albani (both published by O. Kern *loc. cit.* 1888 iii. 68 fig. 1, 70 fig. 2), gave Medeia a *chitôn* with close-fitting sleeves down to the wrist and the elder sister a sheath of somewhat different shape (A. Michaelis *loc. cit.* 1888 iii. 225).

These copies presuppose as their common archetype an Attic relief of the late fifth or the early fourth century (the *coiffure* of the central figure and the pathos of the whole scene point rather to the latter date). They have moreover close stylistic affinity with two further reliefs—on the one hand that of Hermes, Eurydike, and Orpheus (the best copy is at Naples: see Brunn—Bruckmann *op. cit.* pl. 341a, L. Mariani in the *Guida del Mus. Napoli* p. 45 ff. no. 138 fig., J. Pickard 'The Orpheus Relief' in the *Am. Journ. Arch.* 1898 ii. 169—172), on the other that of Herakles, Peirithoos, and Theseus (the only complete copy is in the Museo Torlonia at Rome: see W. Helbig *op. cit.*[3] ii. 447 f. no. 1908, *id.* 'La composizione d'un rilievo Torlonia completata da un frammento conservato nel Museo di Berlino' in the *Mon. d. Linc.* 1892 i. 673—686 pl. 1, 2, Friederichs—Wolters *op. cit.* p. 402 f. no. 1201, A. Baumeister in his *Denkm.* iii. 1795 f. fig. 1880, Reinach *Rép. Reliefs* iii. 340 no. 4, P. Weizsäcker in Roscher *Lex. Myth.* iii. 1789 f. with fig. 15). In view of the fact that all three reliefs are approximately the same in size and shape it has been conjectured that they were originally parts of a connected whole—votive slabs commemorating successful dramas, perhaps a trilogy (E. Reisch *Griechische Weihgeschenke* (*Abhandlungen des archäologisch-epigraphischen Seminares der Universität Wien* viii)

Arkas[6], Melikertes[7], Peleus' sons[8], Dionysos' attendants[9], and the Aristophanic conception of Demos[10]. Nay more, it survives to this hour in the folk-tales of Sicily and Walachia[11], Germany and Scandinavia, Poland and Finland[12]. I am therefore inclined to conjecture

Wien 1890 p. 130 ff., pursuing a hint of P. Wolters *ib.* p. 130 n. 1), or even, since some copies at least are appreciably narrower above than below, the three sides of a triangular base on which, as on the Chigi base (*supra* p. 199 n. 2 pl. xii), stood a choragic tripod (L. Mariani *loc. cit.* p. 46 f., H. Bulle *Der schoene Mensch*[2] Muenchen—Leipzig 1912 p. 587). If so, the significance of the whole design is not hard to guess. Pelias was the subject of an attempted, but unsuccessful, resurrection. So was Eurydike. So was Peirithoos. Nothing could be more appropriate than the representing of these mytbs on the base of a tripod-*lébes*, the very caldron of apotheosis.

Other monuments of the Pelias-story are noted by K. Seeliger in Roscher *Lex. Myth.* ii. 2505 f., O. Höfer *ib.* iii. 1846 f. To the vases there given must be added a red-figured *hydría* of early fine style (*c.* 465 B.C.), formerly in the Hamilton collection (Tischbein *Hamilton Vases* i. 60 ff. pl. 7), which on the dispersal of the Deepdene treasures (*Hope Sale Catalogue* 1917 p. 16 no. 81 wrongly described) was acquired by the Fitzwilliam Museum, Cambridge. This magnificent vase (height 11½ ins.) has been attributed by Mr J. D. Beazley to the hand of 'the Villa Giulia painter' (Hoppin *Red-fig. Vases* ii. 464 ff.) and is in faultless condition. It represents the three Peliades about to carry out the instructions of Medeia, though Medeia herself is absent. On the left the eldest sister, in Ionic *chitón* and *himátion* tucked round her waist, grips a short sword in one hand and raises the other with a gesture of amazement; she is aghast, but resolved. The second sister, in a Doric *péplos* girt over its long *apóptygma*, bears high a *phiále* containing the fateful decoction, but betrays her inward misgivings by the nervous pressure of her hand against her cheek. On the right the third and youngest, in a Doric *péplos* with short *apóptygma* and *kólpos*, turns to flee from the spot in a horror of expostulation. Her *chignon* in profile, despite the all but full-face features, is a lingering trace of earlier style. Pl. xiii is from a photograph taken for me by Mr W. H. Hayles.

[3] *Nóstoi frag.* 6 Kinkel *ap.* schol. Eur. *Med.* argum. 1 and schol. Aristoph. *eq.* 1321, Ov. *met.* 7. 159 ff. O. Jahn *Archäologische Beiträge* Berlin 1847 p. 157 n. 155 (following the Duc de Luynes in *Nouv. Ann.* 1839 ii. 251) sees on a late black-figured *lékythos* now at Leyden (Gerhard *Auserl. Vasenb.* i pl. 69—70, 5 (=my fig. 148) and 6, Reinach *Rép. Vases* ii. 42, 6 and 7) 'die Darstellung des Verjüngungsprocesses..., welchen Medeia mit Jason oder Aison vornahm.' K. Wernicke in the *Jahrb. d. kais. deutsch. arch. Inst.* 1889 iv Arch. Anz. p. 149 and in Pauly—Wissowa *Real-Enc.* i. 1087 decides for Aison.

[4] Simonid. *frag.* 204 Bergk[4] and Pherekyd. *frag.* 74 (*Frag. hist. Gr.* i. 89 Müller) *ap.* schol. Eur. *Med.* argum. 1 and schol. Aristoph. *eq.* 1321. This version of the myth is illustrated by a red-figured *hydría* from Vulci now in the British Museum (*Brit. Mus. Cat. Vases* iii. 148 f. no. E 163. My pl. xiv is from a photograph by Mr R. B. Fleming); for we need not with H. Heydemann *Iason in Kolchis* (*Winckelmannsfest-Progr. Halle* 1886) p. 19 n. 48 regard the inscription IΑSON as a mistake for AISON.

[5] *Supra* i. 419 n. 10, 679. A mirror at Paris (Gerhard *Etr. Spiegel* iv. 101 ff. pl. 352, 1 (=my fig. 149), Babelon—Blanchet *Cat. Bronzes de la Bibl. Nat.* p. 537 ff. no. 1329) is best explained as representing Pelops, who emerges from the caldron in the presence of Tantalos, Ganymedes (cp. Mnaseas *frag.* 30 (*Frag. hist. Gr.* iii. 154 Müller) *ap.* schol. *Il.* 20. 234, Herodian. 1. 11. 2, Aug. *de civ. Dei* 18. 13, Io. Malal. *chron.* 4 p. 80 f. Dindorf, Souid. *s.v.* Ἴλιον, Kedren. *hist. comp.* 120 B f. (i. 211 Bekker)), Klotho, and Demeter. The dog is probably the golden hound of Tantalos (*supra* i. 720 n. 4).

Direct proof is wanting. But the following facts deserve to be weighed. Dodona, as well as Delphoi, had an oracular caldron[1].

Fig. 148.

A queer tale is told about it by Herakleides Pontikos (*c.* 390–*c.* 310 B.C.), who is known to have written a treatise *On Oracles*[2]:

'When the Thebans came to consult the oracle about a war, the prophetess at Dodona made answer that they would be victorious, if they had committed impiety. Hereupon one of the sacred envoys caught up Myrtila the prophetess, and cast her into a caldron of hot water that was set there[3].'

ing the boar Sæhrîmnir (*Grimnismál* 22, translated by O. Bray *The Elder or Poetic Edda* London 1908 p. 11; *Gylfaginnîng* 38, translated by K. Simrock *op. cit.* p. 273), but quite wrong in his explanation of the *motif*) can be capped—as my daughter points out to me—by 'The Three Cows' (J. Jacobs *More English Fairy Tales* London 1894 pp. 82—84, 228) and an incident in 'Rushen Coatie' (*id. ib.* pp. 150—155, 233—237).[4] See also 'The Sharp Grey Sheep' (J. F. Campbell *Popular Tales of the West Highlands* Edinburgh 1860 ii. 286—292 no. 43 English translation and Gaelic text). The same trait reappears in sundry miracles ascribed to the saints (*e.g.* Jacobus de Voragine *Legenda Aurea* cap. 107 p. 450 Graesse[2] St Germanus and the calf, S. Baring-Gould *The Lives of the Saints* Edinburgh 1914 xii. 653 St Abban and the calf, J. W. Wolf in his *Zeitschrift für deutsche Mythologie und Sittenkunde* Göttingen 1853 i. 213 St Mochua and the stags; W. J. A. von Tettau—J. D. H. Temme *Die Volkssagen Ostpreussens, Litthauens und Westpreussens* Berlin 1837 p. 33 St Adalbert's finger).

[3] Zenob. 2. 84 Βοιωτοῖς μαντεύσαιο· αὕτη καταρατικὴ ἐστιν. Ἡρακλείδης γάρ φησι, μαντευομένοις τοῖς Θηβαίοις περὶ πολέμου ἀπεκρίνατο ἡ προφῆτις ἡ ἐν Δωδώνῃ νίκην αὐτοῖς ἀσεβήσασιν ἔσεσθαι. εἷς δὲ τῶν θεωρῶν ἁρπάσας Μυρτίλαν τὴν προφῆτιν ἐνέβαλεν εἰς θερμοῦ παρακείμενον λέβητα. ἄλλοι δέ φασιν, ὅτι Θηβαίοις πολεμοῦσι Βόμβος μάντις πλείους ἔφη νικήσειν, εἰ προθύσαιεν τῶν ἡγεμόνων ἕνα. οἱ δὲ ἀποκτείναντες τὸν Βόμβον ἐνίκησαν. Plout. *prov. Alex.* 1. 9 repeats both explanations, but reads Βόμβρος and Βόμβρον.

Euripides had alluded to the story a century before in his *Erechtheus*; and either he or some later author gave it a sentimental turn by

Fig. 149.

making the priestess fall in love with one of the envoys[1]. The same

[1] *Appendix proverbiorum Bodleiana, Vaticana, Coisliniana* 3. 97 *μίασμα ὄρυός· παρ' Εὐριπίδῃ ἐν Ἐρεχθεῖ* (Eur. *frag.* 368 Nauck[2]) *αἰνιττόμενον τὸ Θηβαίων παρανόμημα εἰς τὸ ἐν Δωδώνῃ μαντεῖον, ἀφ' οὗ καὶ παροιμία Βοιωτοῖς μαντεύσαις. ἠσέβησαν γὰρ εἰς τὴν ἱέρειαν ἐμβαλόντες αὐτὴν εἰς τὸν ἐν Δωδώνῃ λέβητα ζέοντα, ἐρωτικῶς διατεθεῖσαν εἰς ἕνα τῶν θεωρῶν* (so A. Schott for codd. *θεῶν*). E. L. von Leutsch supposed a *lacuna* before *ἠσέβησαν κ.τ.λ.*; but this is unnecessary. The same source was utilised by Souid. *s.v.* *Μυίας δάκρυον· διὰ τὴν Θηβαίων παρανομίαν εἰς τὸ ἐν Δωδώνῃ μαντεῖον· ἀφ' οὗ εἴρηται καὶ τὸ παρὰ* (*περὶ* B.) *Βοιωτοῖς μαντεύσαιο* (*μαντεύσαις* V.). *ἠσέβησαν γὰρ καὶ οὗτοι εἰς τὴν ἱέρειαν, ἐμβαλόντες αὐτὴν εἰς τὸν ἐν Δωδώνῃ λέβητα, ἐρωτικῶς διατεθεῖσαν εἰς ἕνα τῶν θεωρῶν.* Here two points call for comment: (*a*) The saying *Μυίας δάκρυον* is not really explained by the story related; (*b*) The name *Μυῖα* attached to a priestess at Dodona suggests comparison with the *μέλισσα* of Delphoi (*supra* i. 443 f.). It forms a good pendant to *Βόμβος* (*supra* p. 214 n. 3), can be readily connected with Zeus (*supra* i. 532), and may well have been altered into *Μυρτίλα*.

story was told at greater length and with other variations by Ephoros the historian (*c.* 350 B.C.), whose account is preserved to us *in primis* by Strabon[1]:

'Ephoros states that the Thracians after making a treaty with the Boeotians attacked them one night, when their camp was off its guard in the enjoyment of peace. The Boeotians flung them back, and at once reproached them for breaking the treaty. "No," said the Thracians, "we agreed to a truce by day; we attacked you by night." Hence the common proverb—"a Thracian shuffle[2]." While the war was still being waged, the Pelasgians and the Boeotians too went to consult the oracle. He cannot tell, he says, what answer was given to the Pelasgians; but the prophetess replied to the Boeotians that they would prosper, if they committed impiety. The sacred envoys, suspecting the prophetess of showing favour to the Pelasgians in her reply on account of their kinship (for the sanctuary had originally been Pelasgian), caught up the woman and cast her on to a pyre. They thought that, whether she had done amiss or not, in either case their action was justified: if she had uttered a lying oracle, she was duly punished; if she had done no wrong, they had but carried out her bidding. Those in charge of the sanctuary did not like to put the perpetrators to death, in a sanctuary too, without a formal judgment, so brought them to trial and summoned them before the priestesses, that is the prophetesses, three in number to begin with and now reduced to two. The Boeotians protested that nowhere was it customary for women to act as judges. An equal number of men was therefore chosen. The men acquitted; the women condemned. As the votes were equal, those for acquittal prevailed. Ever since then at Dodona oracles have been delivered to the Boeotians, and to the Boeotians only, by men[3]. The prophetesses, however, put a different interpretation upon the oracle, to wit, that the god enjoined upon the Boeotians to steal the tripods in Boiotia and send one year by year to Dodona. And this in point of fact they do. They always take down by night one of their dedicated tripods, wrap it in cloaks, and have a clandestine tripod-carrying to Dodona[4].'

[3] Quoted by Eustath. *in Od.* p. 1760, 4 f.

[4] Cp. Prokl. *chrestom.* (after Ephoros?) *ap.* Phot. *bibl.* p. 321 b 32 ff. Bekker τὸ δὲ τριποδηφορικὸν μέλος (Poll. 4. 53 τριποδηφορικά) τρίποδος προηγουμένου παρὰ τοῖς Βοιωτοῖς ᾄδετο. ἔσχε δὲ καὶ τοῦτο αἰτίαν τοιαύτην. Πελασγῶν τινὲς Πάνακτον τῆς Βοιωτίας ἐπῴρθουν, Θηβαῖοι δὲ ἤμυνον καὶ πέμψαντες εἰς Δωδώνην περὶ τῆς τοῦ πολέμου νίκης ἐχρῶντο. χρησμὸς δὲ τοῖς Θηβαίοις ἐξέπεσεν ὡς, εἰ μέγιστον ἀσέβημα ἀσεβήσουσι, νικήσουσιν. ἔδοξεν οὖν αὐτοῖς ἀσεβημάτων εἶναι μέγιστον τὸ τὴν χρησμῳδήσασαν αὐτοῖς τὸν χρησμὸν ἀνελεῖν· καὶ ἀνεῖλον. αἱ δὲ περὶ τὸ τέμενος συνιέρειαι δίκην λαβεῖν ἀπῄτουν τοῦ φόνου τοὺς Θηβαίους. Θηβαῖοι δὲ οὐκ ἐπιτρέπουσι γυναιξὶ μόναις τὴν περὶ αὐτῶν δίκην· κοινῆς δὲ κρίσεως ἀνδρῶν καὶ γυναικῶν γεγενημένης, καὶ τῶν ἀνδρῶν λευκὰς αὐτοῖς ἐπενεγκόντων ψήφους, ἀπέφυγον οἱ Θηβαῖοι. ὕστερον δὲ ἐπιγνόντες αὐτοῖς τὸ ὑπὸ τοῦ χρησμοῦ προστασσόμενον, βαστάσαντες τῶν κατὰ τὴν Βοιωτίαν ἱερῶν τριπόδων ἕνα, καὶ κατακαλύψαντες ὡς ἱερόσυλοι, ἀνέπεμψαν εἰς Δωδώνην. εὐπραγήσαντες δὲ ἐξ ἐκείνου τοῦ λοιποῦ τὴν πρᾶξιν ἑορτὴν ἐποίουν. This tripod-carrying did not, like that of the Thebans to their *Ismênion* (Pind. *Pyth.* 11. 7 f. χρυσέων ἐς ἄδυτον τριπόδων | θησαυρόν with schol. vet. *ad loc.* οἱ γὰρ Θηβαγενεῖς ἐτριποδοφόρουν ἐκεῖσε), merely aim at increasing the property and *prestige* of the god; nor did it, like that of the Athenians from Delphoi (L. Couve in the *Bull. Corr. Hell.* 1894 xviii. 87 ff. no. 9, 90 ff. no. 10, Dittenberger *Syll. inscr. Gr.*[2] no. 665 and no. 718, Michel *Recueil d'Inscr. gr.*

Ephoros, in the interests of probability, eliminates the *bizarre* 'caldron of hot water' and tacitly substitutes a commonplace 'pyre,' thereby spoiling the end of his story, which suggests rather that the sacred tripods made amends for a sacred caldron. I surmise that the impiety of boiling the priestess at Dodona in a caldron of hot water, an impiety authorised or at least instigated by the oracle itself, implies a long-standing ritual, to which recourse might be had in dark and desperate times.

At Delphoi, it is true, the priestess was not boiled in a caldron. But we have to ask ourselves: What form would be taken by a simulated boiling? The Orphic votary in like circumstances pronounced the words

'I have fallen as a kid into milk,'

and in all probability stepped into an actual caldron for a make-believe seething[1]. At Delphoi a she-goat, over which cold water had first been poured, was sacrificed[2], and the *Pythía* then took her

no. 1285 and no. 266, *Fouilles de Delphes* iii. 2 nos. 32 f.), serve as a means of transporting sacred fire; still less was it, like that of Ptolemy ii Philadelphos (Athen. 198 C, D, 199 D, F, 202 B, C), a case of exaggerated pomp. Rather we may suppose that this was an expiation in kind. A sacred *lébes* (? tripod) had been defiled by an impious act: sacred tripods must be sent year by year to replace it. Why they had to be stolen, and wrapped in cloaks, we are not told. In Scotland at Hallowe'en divination was practised by means of stolen kail: 'It was necessary that the plants should be stolen without the knowledge or consent of their owner; otherwise they were quite useless for the purpose of divination' (Frazer *Golden Bough*[3]: Balder the Beautiful i. 234 f.). Possibly the same notion played some part in Herakles' theft of the Delphic tripod. The wrapping in cloaks was probably prophylactic (cp. *e.g. supra* i. 58, 107 n. 4, 523, *alib.*).

[1] *Supra* i. 676 f.

[2] Diod. 16. 26 λέγεται...τὸ παλαιὸν αἶγας εὑρεῖν τὸ μαντεῖον· οὗ χάριν αἰξὶ μάλιστα χρηστηριάζονται μέχρι τοῦ νῦν οἱ Δελφοί, Plout. *de def. or.* 49 τὴν δ' αἶγα διελέγχειν τὸ ψυχρὸν ὕδωρ· οὐ γὰρ εἶναι ψυχῆς κατὰ φύσιν ἐχούσης τὸ πρὸς τὴν κατάσπεισιν ἀπαθὲς καὶ ἀκίνητον. A decree of the Delphians, passed in honour of Nikomedes iii of Bithynia and Laodike (92—91 B.C.), mentions goats among the flocks and herds of the god (L. Couve in the *Bull. Corr. Hell.* 1894 xviii. 254 ff. no. 1409, 15 f., H. Pomtow in *Philologus* 1895 liv. 356 ff., J. Baunack in Collitz—Bechtel *Gr. Dial.-Inschr.* ii. 880 ff. no. 2738, 16 f. καὶ ποτὶ τὰς αἶγας τὰς ἱερ[ὰς 'Αρχελάωι or Ξένωνι Πει]σιθέου Μένωνα, Δῶρον, 'Ρόδωνα, 'Ιππίαν, Αυκέαν. And the rule of the Labyadai speaks of a she-goat offered to Bouzyge daughter of Phanotos (Dittenberger *Syll. inscr. Gr.*[2] no. 438 *d* 200, Michel *Recueil d'Inscr. gr.* no. 995 *D* 35, J. von Prott and L. Ziehen *Leges Graecorum sacrae* ii no. 74 D 35 χίμαιραν). Goats played a considerable part at Delphoi. The oracle was first discovered by a goat-herd (cp. Paus. 10. 5. 7 and *supra* p. 189 n. 8), who noticed that his goats on approaching a certain chasm and looking into it skipped about and bleated in an unusual manner: following their example, he too was similarly affected and began to foretell future events (Diod. 16. 26). When, according to one account, Python had been wounded and was trying to escape along the Sacred Way, Apollon pursued after him and κατέλαβε...αὐτὸν ἐκ τοῦ τραύματος ἄρτι τεθνηκότα, κεκηδευμένον ὑπὸ τοῦ παιδὸς ᾧ ὄνομα ἦν Αἴξ, ὡς λέγουσι (Plout. *quaestt. Gr.* 12: see further *Folk-Lore* 1904 xv. 402 ff.). Hesych. ὀμφαλὸς Αἰγός· ζητεῖται πῶς τὴν Πυθὼ ὀμφαλὸν Αἰγαῖον. τινὲς δὲ παρὰ τὸ τῆς Αἰγαίων γῆς was emended by Salmasius to ὀμφαλὸς Αἰγαῖος· ζητεῖται πῶς τὴν Πυθὼ εἴρηκεν ὀμφαλὸν Αἰγαῖον. τινὲς

seat in or on the caldron. I infer that the *Pythía*, like the Orphist, pretended to be boiled.

(σ) Dionysos and the Caldron of Apotheosis.

The inference here drawn with regard to the *Pythía* may seem rash, or even grotesque; but the Orphic ritual cannot be separated from the Orphic myth, which—if I am not mistaken—came to locate the caldron of apotheosis at Delphoi and to identify it with the mantic tripod.

Clement of Alexandreia, an excellent authority in such matters, after quoting Orpheus for the attack of the Titans upon the infant Dionysos, continues:

'The Titans, who had torn him in pieces, set a certain caldron upon a tripod, and dropping the limbs of Dionysos into it began by boiling them. After that, they pierced them with spits and "held them over Hephaistos." Zeus then made his appearance (being a god, he presumably had soon got a whiff of the roast flesh—your gods admit that they get that "as their guerdon"), struck the Titans with a thunderbolt, and entrusted the limbs of Dionysos to his son Apollon for burial. Apollon, obedient to the commands of Zeus, took the body in pieces to Parnassos and there deposited the same[1].'

δὲ παρὰ τὸ τῆς Αἰγαίων γῆς μέσον εἶναι. Gruppe *Gr. Myth. Rel.* p. 102 n. 12 reads ὀμφαλὸς Αἰγαῖος, but would connect the epithet with Αἴξ; and O. Höfer in Roscher *Lex. Myth.* iii. 3379 ff. apparently reverts to ὀμφαλὸς Αἰγός in the same connexion. But Αἰγαῖος, which implies an α-stem, cannot be legitimately derived from Αἴξ; and the existence of a stream called Αἰγᾶς and a plain called Αἰγαῖον close to Delphoi (Steph. Byz. *s.v.* Αἰγαίων πέλαγος citing Hes. *frag.* 193 Flach 42 Rzach, Eustath. *in* Dionys. *per.* 132) strongly supports the reading ὀμφαλὸς Αἰγαῖος. The people of Elyros in Crete dedicated at Delphoi a bronze she-goat suckling Phylakides and Philandros, children of Apollon by the nymph Akakallis (Paus. 10. 16. 5). Small silver coins of Delphoi struck *c.* 520—500 B.C. have as their reverse type the head of a goat to right in an incuse square (J. N. Svoronos in the *Bull. Corr. Hell.* 1896 xx. 19 f. pl. 25, 7 f.), or the heads of two goats facing each other, sometimes with a dolphin to right above them, in an incuse

square (*id. ib.* p. 21 pl. 25, 20—22 and 23 f.); others, struck *c.* 500—480, have rev. a goat's head facing in an incuse square, with or without Δ Δ (*id. ib.* p. 21 f. pl. 25, 25—28, 32 f. and 29 f.); others, *c.* 480—460, a goat's head facing, between two dolphins, in an incuse square (*id. ib.* p. 24 pl. 25, 36—43 and p. 25 f. pl. 26, 1—6, 7, 8—13, 14]; others, *c.* 460—448, the same type with ΔΑΛ above it (*id. ib.* p. 26 pl. 26, 15—20); others, *c.* 421—355, the same type with ΔΑΛ above it, but in a circular incuse (*id. ib.* p. 27 f. pl. 26, 22—24, 25); others, *c.* 355, a goat's head facing, between two dolphins and two ivy-leaves, with ΔΕΛ above it (*id. ib.* p. 28 pl. 26, 22—31): see also *Brit. Mus. Cat. Coins* Central Greece p. 24 ff. pl. 4, 1—3, 6—12 (my figs. 150—154 are from casts of nos. 1, 2, 10, 11, 12), Head *Hist. num.*[2] p. 340 f.

[1] Clem. Al. *protr.* 2. 18. 1 f. p. 14, 17 ff. Stählin (quoted by Euseb. *praep. ev.* 2. 3.

Other writers confirm this account and enable us to trace it back for more than four hundred years. Thus Tzetzes, the learned commentator on Lykophron's *Alexandra*, says:

'Dionysos too was honoured at Delphoi along with Apollon in the following way. The Titans, having rent the limbs of Dionysos, gave them to Apollon his brother, after dropping them into a caldron; and Apollon put them away beside the tripod, as is stated by Kallimachos and by Euphorion in the words—

They dropped Bakchos the divine above the bowl on the fire[1].'

These passages prove, to my thinking, that the Thraco-Phrygian myth of Dionysos had taken root at Delphoi at least as early as the third century B.C., and that the caldron of apotheosis, an essential feature of the myth, was then identified with the tripod of Apollon himself. If Aischylos two centuries earlier can make his *Pythia* say 'Bromios too possesses the place[2],' it will hardly be maintained that we have here to do with a late and valueless tradition. The burden of proof rests with those who contend that the Thraco-Phrygian myth reached Delphoi later than the Thraco-Phrygian god. Be that as it may, the tomb of Dionysos at Delphoi, like the tomb of Zeus in Crete[3], continued to be an object of interest till Byzantine times[4]. Tatian indeed (*c.* 152 A.D.) confuses it with the

25 f.) οἱ δὲ Τιτᾶνες, οἱ καὶ διασπάσαντες αὐτόν, λέβητά τινα τρίποδι ἐπιθέντες καὶ τοῦ Διονύσου ἐμβαλόντες τὰ μέλη, καθήψουν πρότερον· ἔπειτα ὀβελίσκοις περιπείραντες (ἀμπείραντες Euseb. omphalós[1]. But Ioannes Malalas[2] (*c.* 600 A.D.) and Georgios Synkellos[3] (*c.* 800 A.D.) quote, probably from Kephalion[4] (*c.* 125 A.D.), the statement of Philochoros[5] (*c.* 275 B.C.) that in his day the tomb of Dionysos was still to be seen at Delphoi beside the golden statue of Apollon, that it resembled a simple step, and that it was inscribed—

Here lies in death Dionysos the son of Semele.

The inscription reads like a copy (if not, indeed, the original) of that placed upon the tomb of Zeus[6]. But there is no reason to

praelio moritur. dicit autem (de his) Dinarchus poeta, non rhetor (*Frag. hist. Gr.* iv. 391 Müller), *id. ib. ann. [4] *Frag. hist. Gr.* iii. 628 Müller.

[5] *Id. ib.* iv. 391 suggests that Philochoros in his turn was copying Deinarchos the poet. But see E. Bethe in Pauly—Wissowa *Real-Enc.* iv. 2388 f.

[6] Cp. ἐνθάδε κεῖται θανὼν Διόνυσος ἐκ Σεμέλης (*supra* p. 219 n. 4) with ἐνθάδε κεῖται θανὼν Πῖκος ὁ καὶ Ζεύς (*supra* i. 158 n. 2). In view of Porph. *v. Pyth.* 17 ὧδε θανὼν κεῖται Ζᾶν δν Δία κικλήσκουσιν we may conjecture that the original epitaph was a hexameter

doubt the accuracy of Philochoros' account. It may even be that in the fifth-century type of Apollon seated on the tripod (fig. 142)[1] we should regard the stepped base beneath his feet as a representation of Dionysos' tomb[2].

Other legends of death and resurrection clung about the Delphic tripod. Writers of the Roman age maintained that the bones and the teeth of Python were kept in its caldron, and even tried to derive the word *cortina*, 'caldron,' from *corium*, 'skin,' on the ground that the tripod was covered or surrounded with Python's skin[3]. Perhaps the pebbles, which for purposes of divination were really kept in the bowl of the tripod[4], had been explained as the relics of Python, and the metallic sides of the *lébes* as plates from his coppery skin. The local *cicerone* would be equal to both inventions.

(τ) Pythagoras as Apollon reborn.

But the strangest of the stories attaching to the tripod remains to be told. Porphyrios (233—*c.* 304 A.D.) in his *Life of Pythagoras* writes:

'Later, when Polykrates became tyrant of Samos, Pythagoras thought it unseemly for a philosopher to live under a tyranny, and resolved to sail for Italy. In the course of his voyage he put in at Delphoi and inscribed on the tomb of Apollon an elegiac couplet, stating therein that Apollon was the son of Silenos, that he had been slain by Python, and that he had been buried in the so-called tripod, which had got this name from the fact that three maidens, the daughters of Triopas, had here made lamentation for Apollon[5].'

line. If Dionysos had the priority, his tomb might have borne some such inscription as ὧδε θανὼν κεῖται Σεμεληγενέτης Διόνυσος. But?

[1] *Supra* p. 202.

[2] This conclusion hardly squares with F. Courby's tentative reconstruction of the Pythian chapel (*infra* p. 239). But it is by no means certain that the block of limestone (*Fouilles de Delphes* ii. 1. 67 fig. 59), believed by Courby to have supported the tomb of Dionysos and an adjoining altar, really served that purpose, or even came from the chapel at all.

[5] Porph. *v. Pyth.* 16 (quoted by Kyrill. Al. *c. Iulian.* 10. 342 (lxxvi. 1025 f. Migne)) *μετὰ δὲ ταῦτα τῆς Πολυκράτους τυραννίδος Σαμίοις καταλαβούσης, οὐ πρέπον ἡγούμενος ὁ Πυθαγόρας ἐν τοιαύτῃ πολιτείᾳ βιοῦν ἀνδρὶ φιλοσόφῳ, διενοήθη εἰς Ἰταλίαν ἀπαίρειν. ὡς δὲ πλέων Δελφοῖς προσέσχετο, ἐλεγεῖον τῷ τοῦ Ἀπόλλωνος τάφῳ ἐπέγραψε, δι' οὗ ἐδήλου ὡς Σιληνοῦ μὲν ἦν υἱὸς ὁ Ἀπόλλων, ἀνῃρέθη δὲ ὑπὸ Πύθωνος, ἐκηδεύθη δὲ ἐν τῷ καλουμένῳ τρίποδι, ὃς ταύτης ἔτυχε τῆς ἐπωνυμίας διὰ τὸ τρεῖς κόρας τὰς Τριόπου θυγατέρας ἐνταῦθα θρηνῆσαι Ἀπόλλωνα.* F. Wieseler *Ueber den delphischen Dreifuss* (extr. from the *Abh. d. gött. Gesellsch. d. Wiss.* Phil.-hist. Classe xv) Göttingen 1871 p. 17 cj. *τριποτί* for *τρίποδι* (cp. *supra* p. 178 n. 1). One could imagine—if a moment's play be allowed to fancy—

What are we to think of this peculiar narrative? It is always unsafe to disregard Pythagorean vagaries; they are so often found to contain elements of primitive lore[1]. We must not, therefore, hastily assume that Python killing Apollon was a wilful perversion of Apollon killing Python[2]. That was not Pythagoras' attitude towards the gods, least of all towards Apollon, with whom he stood in relations of exceptional intimacy. Apollonios (of Tyana?[3]) states that, according to certain authorities, Pythagoras was nominally the son of Mnesarchos, but really the son of Apollon by Pythaïs. Had not a Samian poet penned the couplet?—

> Pythaïs fairest of the Samian fair
> Zeus-loved Pythagoras to Apollon bare[4].

The authorities in question included Epimenides, Eudoxos, and Xenokrates[5]. And even those who denied that Pythagoras was actually the son of Apollon admitted that there was some mys-

the Pythagorean couplet conceived somewhat as follows: Σιληνοῦ γόνος ὧδε δαμεὶς Πύθωνι τέθαπται | Φοῖβος, ὃν αἱ τρισσαὶ θρῆνεον αἱ Τρίοπος.

[1] *Supra* i. 66, 135, 282 n. 7, 303, 558 n. 5, 646, ii. 40 ff., *alib.*

[2] The notion, no doubt, is unique in ancient literature; but so in ancient art is the vase-painting of Iason swallowed by the Colchian snake and disgorged at the bidding of Athena (E. Gerhard in the *Ann. d. Inst.* 1836 viii. 289—295, *Mon. d. Inst.* ii pl. 35, Welcker *Alt. Denkm.* iii. 378—384 pl. 24, 1 f., Baumeister *Denkm.* i. 123 f. fig. 129, K. Seeliger in Roscher *Lex. Myth.* ii. 83 f. fig., Reinach *Rép. Vases* i. 101, 102, 1, W. Helbig *Führer durch die öffentlichen Sammlungen klassischer Altertümer in Rom*[3] Leipzig 1912 i. 344 f. no. 578, J. E. Harrison *Themis* Cambridge 1912 p. 435 f. fig. 135 from a photograph), to which however H. Schmidt *Jona* Göttingen 1907 p. 22 n. 1 with fig. 5 finds a partial parallel in a mirror-design of Iason grasping sword and fleece but already bitten, not to say half-eaten, by the snake (Gerhard *Etr. Spiegel* iii. 221 f. pl. 238).

[3] So J. Miller in Pauly—Wissowa *Real-Enc.* ii. 148 after E. Rohde in the *Rhein. Mus.* 1871 xxvi. 554 ff., *ib.* 1872 xxvii. 23 ff.

[4] Porph. *v. Pyth.* 2 Ἀπολλώνιος δ' ἐν τοῖς περὶ Πυθαγόρου καὶ μητέρα ἀναγράφει Πυθαΐδα, ἀπόγονον Ἀγκαίου, τοῦ οἰκιστοῦ τῆς Σάμου. τινὰς δὲ Ἀπόλλωνος αὐτὸν ἱστορεῖν καὶ Πυθαΐδος τῷ γόνῳ, λόγῳ δὲ Μνησάρχου φησὶν Ἀπολλώνιος. τῶν γοῦν ποιητῶν τῶν Σαμίων εἰπεῖν τινα· "Πυθαγόραν θ', ὃν ἔτικτε Διὶ φίλον Ἀπόλλωνι | Πυθαΐς, ἡ κάλλος πλεῖστον ἔχεν Σαμίων" (Cougny *Anth. Pal. Append.* 3. 15). Cp. Iambl. *v. Pyth.* 4 ff., who expands the above account, *e.g.* mentioning that Pythais' former name was Parthenis, but does not cite his source. In the epigram Iamblichos, followed by E. Cougny, reads Διὶ φίλῳ for Διὶ φίλον: but the reference is to the eagle which Pythagoras drew down and stroked at Olympia (Plout. *v. Num.* 8, Porph. *v. Pyth.* 25, Iambl. *v. Pyth.* 62) or to the white eagle which he patted at Kroton (Ail. *var. hist.* 4. 17, Iambl. *v. Pyth.* 142).

[5] Iambl. *v. Pyth.* 7 παραιτητέοι γὰρ Ἐπιμενίδης (identified by E. Rohde in the *Rhein Mus.* 1872 xxvii. 23 and by H. Demoulin *Épiménide de Crète* Bruxelles 1901 p. 85 with Epimenides ὁ γενεαλόγος of Diog. Laert. 1. 115: but see O. Kern in Pauly—Wissowa *Real-Enc.* vi. 178) καὶ Εὔδοξος (of Rhodes, according to F. Jacoby in Pauly—Wissowa *Real-Enc.* vi. 930) καὶ Ξενοκράτης (the famous philosopher of Kalchedon, on whom E. Rohde *loc. cit.* p. 23 f. supposes the fragment to be fathered) ὑπονοοῦντες τῇ Παρθενίδι τότε μιγῆναι τὸν Ἀπόλλω καὶ κύουσαν αὐτὴν ἐκ μὴ οὕτως ἐχούσης καταστῆσαί τε καὶ προαγγεῖλαι διὰ τῆς προφήτιδος. τοῦτο μὲν οὖν οὐδαμῶς δεῖ προσίεσθαι.

terious bond of union between the philosopher and the god[1]. Many persons went further and frankly spoke of Pythagoras as Apollon *Pythios* or *Hyperbóreos* or *Paiôn*, declaring that he had appeared as a god in human shape[2] and emphasising the resemblance of his oracular sayings to those of the Pythian Apollon[3]. I shall of course be told by our critical purists that all this is neo-Pythagorean nonsense, to be dismissed without further enquiry. But there is more in it than that. It is precisely when we confine ourselves to the earliest *stratum* of the Pythagorean tradition[4] that we come upon the most remarkable evidence of Pythagoras' claim to be Apollon *redivivus*. We have it on the word of Aristotle that the Pythagoreans held among their most cherished convictions the tripartite subdivision of 'rational animal' into 'god, man, and such as Pythagoras[5].' Moreover, Aristotle states that the Crotoniates called Pythagoras Apollon *Hyperbóreios*, and is aware of the story that at Kroton Pythagoras exhibited his golden thigh in proof of this identification[6]. Now the golden thigh of Pythagoras must, it

[1] Iambl. *v. Loukian. *somn. s. gall.* 16 (the cock that had once been Pythagoras speaks) *ὡς μὲν ἐξ* 'Απόλλωνος *τὸ πρῶτον ἡ ψυχή μοι καταπταμένη ἐς τὴν γῆν ἐνέδυ εἰς ἀνθρώπου σῶμα, ἤρτινα τὴν καταδίκην ἐκτελοῦσα, μακρὸν ἂν εἴη λέγειν.*

[2] Iambl. *v. Pyth.* 30 *καὶ μετὰ τῶν θεῶν τὸν* Πυθαγόραν *λοιπὸν καταρίθμουν ὡς ἀγαθόν τινα δαίμονα καὶ φιλανθρωπότατον. οἱ μὲν τὸν* Πύθιον, *οἱ δὲ τὸν ἐξ* 'Υπερβορέων 'Απόλλωνα, *οἱ δὲ τὸν* Παιῶνα, *οἱ δὲ τῶν τὴν σελήνην κατοικούντων δαιμόνων ἕνα, ἄλλοι δὲ ἄλλον τῶν* 'Ολυμπίων *θεῶν ἐφήμιζον, εἰς ὠφέλειαν καὶ ἐπανόρθωσιν τοῦ θνητοῦ βίου λέγοντες ἐν ἀνθρωπίνῃ μορφῇ φανῆναι τοῖς τότε, κ.τ.λ.*, cp. *ib.* 10, 91 f., 133, 135, 140, Loukian. *dial. mort.* 20. 3 (Menippos to Pythagoras) *χαῖρε, ὦ Εὔφορβε ἢ "Απολλον ἢ ὅ τι ἂν ἐθέλῃς.* See now A. Delatte *Études sur la littérature pythagoricienne* Paris 1915 p. 279 f.

[3] Iambl. *v. Pyth.* 161. Presumably the name Πυθαγόρας helped out the comparison, though it was also explained as meaning *ὅτι ἄρα ὑπὸ τοῦ* Πυθίου *προηγορεύθη* (*ib.* 7).

The cult of Apollon naturally appealed to the circle of Pythagoras. Mnesarchos built a sanctuary for Apollon *Pythios* in Samos (Iambl. *v. Pyth.* 9). Pythagoras in Delos would worship only at the altar of Apollon *Genétor*, where wheat, barley, and cakes were offered, but no burnt sacrifice (Aristot. *frag.* 447 Rose *ap.* Diog. Laert. 8. 13, Iambl. *v. Pyth.* 25, 35). The Pythagoreans in general followed suit (Mnesimachos *Alcmaeo frag.* 1 (*Frag. com. Gr.* iii. 567 Meineke) *ap.* Diog. Laert. 37 *ὡς* Πυθαγοριστῇ (Menagius cj. Πυθαγορισταί. C. G. Cobet restored Πυθαγοριστί) *θύομεν τῷ* Δοξίᾳ).

seems to me[1], be interpreted as strictly analogous to the ivory shoulder of Pelops. Indeed, Origenes speaks of 'Pythagoras, who performed many miracles and to a whole congregation of Hellenes showed that his thigh was made of ivory[2].' But the ivory shoulder of Pelops, as was pointed out by my far-sighted friend Mr F. M. Cornford[3], presupposes the rite of regeneration. Similarly we may

which see E. Zeller *A History of Greek Philosophy* trans. S. F. Alleyne London 1881 i. 338 n. 4). The same story is told by Plout. *v. Num.* 8, Loukian. *vit. auct.* 6, *somn. s. gall.* 18, Orig. *c. Cels.* 6. 8, Diog. Laert. 8. 11, Ail. *var. hist.* 4. 17, Porph. *v. Pyth.* 28, Iambl. *v. Pyth.* 91 f., 135, 140, of whom Plout. *loc. cit.* and Ail. *loc. cit.* state that the incident happened at Olympia.

[1] And to others before me. W. Mannhardt *Germanische Mythen* Berlin 1858 p. 74: 'so weicht der Grieche auch darin von den nördlichen Ueberlieferungen (mit Ausnahme des Märchens von Eisenlaci) ab, dass er die Mythe vom fehlenden Knochen, die der Germane von wiederbelebten Tieren erzählt, von aus dem Tode erweckten Menschen oder Heroen bewahrte. Ich mache ausser der Pelopssage, ohne die Mythe vom hölzernen Gliede des Osiris [Plout. *de Is. et Os.* 18, cp. Hippolyt. *ref. haeres.* 5. 7 p. 101 Miller] in Betracht zu ziehn, nur Jamblichs Nachricht vom hyperboreischen Apollônpriester Abaris, dem Luftwandelnden (*αἰθροβάτης*) namhaft, dem sich Pythagorâs durch eine goldene Hüfte als Wiedergeborener zu erkennen gab.' Cp. *id. Wald- und Feldkulte*[2] Berlin 1904 i. 116 n. 3. Frazer *Golden Bough*[2] ii. 418 f., *ib.*[3]: Spirits of Corn and Wild ii. 263 f. quotes Mannhardt to the same effect and views Pythagoras' golden thigh as his certificate of resurrection. R. Eisler *Weltenmantel und Himmelszelt* München 1910 ii. 680 likewise approves of Mannhardt's comparison, and (*ib.* n. 6) cites from N. J. Majláth *Magyarische Sagen, Mährchen und Erzählungen*[2] Stuttgart und Tübingen 1837 ii. 195 and J. Erdélyi *Ungarische Sagen und Märchen*, aus dem Erdélyischen Sammlung [*Népdalok és mondák*] übersetzt von G. Stier Berlin 1850 p. 105 ff. the Hungarian tale of a twelve-headed dragon, who vanquished the Magyar Eisenlaci, chopped him into a hundred pieces, and put them as promised in a cloth on his horse. This fled with them to the serpent-king, who laid the bones in order and washed them with water in which healing herbs had been cooked. Hereupon Eisenlaci woke up and was seven times as handsome as before. His right shoulder blade had fallen out of the bundle on his horse's back; but the serpent-king made him a new one out of gold and ivory. The Old Irish myth of Nuada *Argat-lám*, 'of the Silver Hand' (*Folk-Lore* 1906 xvii. 29), and the English tale of a woman with a golden arm (a variant gives it as a golden leg) take us in a different direction (J. Jacobs *English Fairy Tales* London 1898 pp. 138 f., 252 f.). So does an Epirote tale of a boy with a golden finger (J. G. von Hahn *Griechische und albanesische Märchen* Leipzig 1864 ii. 197 ff., L. Laistner *Das Rätsel der Sphinx* Berlin 1889 ii. 147). More to the point is a tale told by 'Old Macdonald, travelling tinker' to J. F. Campbell *Popular Tales of the West Highlands* Edinburgh 1860 i. xcv f. (The daughter of a wise woman fell in love with an enchanted prince. 'And the old woman agreed to help her to her will. A caldron was prepared and filled with plants; and the king's son was put into it stripped to the magic shirt, and the girl was stripped to the waist. And the mother stood by with a great knife, which she gave to her daughter. Then the king's son was put down in the caldron, and the great serpent, which appeared to be a shirt about his neck, changed into its own form, and sprang on the girl and fastened on her; and she cut away the hold, and the king's son was freed from the spells. Then they were married, and a golden breast was made for the lady').

[2] Orig. *c. Cels.* 6. 8 *περὶ δὲ Πυθαγόρου, πλεῖστα ὅσα τερατευσαμένου καὶ δείξαντος μὲν ἐν πανηγύρει Ἑλλήνων ἐλεφάντινον τὸν μηρόν,...τί χρὴ καὶ λέγειν;*

[3] F. M. Cornford in J. E. Harrison *Themis* Cambridge 1912 p. 243 ff., *id. The Origin of Attic Comedy* London 1914 p. 89, *supra* i. 419 n. 10, 679, ii. 210 ff.

with some assurance conclude that the Crotoniates knew of a myth in which Apollon *Hyperbóreos* was slain, boiled in a caldron, and pieced together again—the missing portion being replaced in gilded ivory. Pythagoras, who claimed to be the god come to life once more, must needs make good his claim by displaying a golden thigh.

Seven centuries later Alexandros the impostor of Abonou Teichos[1] aped the pretensions of Pythagoras and provided a butt for the satire of Lucian[2]:

'The torch ceremony with its ritual skippings often enabled him to bestow a glimpse of his thigh, which was thus discovered to be of gold; it was presumably enveloped in cloth of gold, which glittered in the lamp-light. This gave rise to a debate between two wiseacres, whether the golden thigh meant that he had inherited Pythagoras's soul, or merely that their two souls were alike; the question was referred to Alexander himself, and King Glycon[3] relieved their perplexity with an oracle[4]:

> Waxes and wanes Pythagoras' soul: the seer's
> Is from the mind of Zeus an emanation.
> His Father sent him, virtuous men to aid,
> And with his bolt one day shall call him home.'

But, if Pythagoras posed as Apollon resurgent, resurrection implies a previous death and burial. When did Apollon die? Where was he buried? The great crisis of his life had been his contest with Python. Pythagoras not unnaturally asserted that Apollon had been slain by Python[5] and buried in the Delphic tripod. His followers probably felt it to be significant that the principal coin-type of Kroton was, from first to last, a tripod-*lébes* (figs. 155—157)[6].

Hands *Coins of Magna Græcia* London 1909 p. 158 ff.) that the coin-types of Kroton were throughout inspired by the religious ideas of the Pythagoreans, the tripod symbolising Apollon *Pýthios*, the eagle Zeus, etc. The eagle, which occurs first as a reverse type incuse, was very possibly (*supra* i. 602 n. 5) suggested by the reverse type incuse of the

On this showing it would appear that the Pythagorean Apollon, living again in the person of Pythagoras, was near akin to the Thraco-Phrygian or Cretan form of the reborn Zeus. Further confirmation of the fact is to be found in Pythagorean legends both early and late. Herodotos was told by Greeks inhabiting the Hellespont and Pontos that Salmoxis was a slave of Pythagoras in Samos, that when freed he made his fortune and introduced

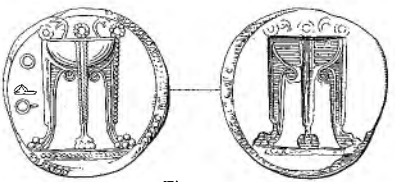

Fig. 155.

Fig. 156.

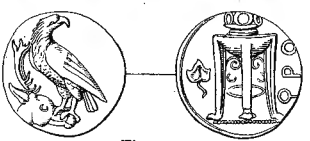

Fig. 157.

Ionic culture into his native land of Thrace: here he built a hall, feasted the foremost of the citizens, and taught them that he together with his fellow-feasters and their descendants instead of dying would come to a land of perpetual life and felicity; meantime he made an underground chamber and vanished from their sight, being mourned by them as dead, but after living for three years in his retreat reappeared in the fourth year and induced them to believe his words[1]. This tale, which was accepted without demur by later authors[2], Herodotos hesitates to believe, adding that in his opinion

tripod (cp. fig. 156 with fig. 155). It remains, however, likely enough that the Pythagoreans read their own meaning into the Crotoniate types, types which were fixed on other and more mundane grounds.

[1] Hdt. 4. 95.

[2] Strab. 297 f., 762, Porph. *v. Pyth.* 14 f. (quoted by Kyrill. Al. *c. Iulian.* 6. 208 (lxxvi.

Salmoxis lived long before Pythagoras and was perhaps a local *daímon* of the Getai[1]. The Getai, he says, practise deification[2]; they think that they themselves live for ever and that so-called death means merely going to the *daímon* Salmoxis[3], whom some of them call Gebeleizis[4]. Once in four years they send a messenger to Salmoxis by tossing him up in the air and catching him on the points of three javelins[5]. The Hellespontine account is no doubt a 'rationalizing story[6]'; but it contains indications of value. The feasting of the Thracians, the simulated death, the promise of immortal bliss—what are these but the *débris* of the very doctrine that we are investigating? Salmoxis, like Pythagoras, stands for the caldron of apotheosis. Later writers spell his name Zalmoxis, sometimes Zamolxis[7]; and Porphyrios does us a good turn by explaining it:

'Pythagoras had yet another lad, whom he had got from Thrace, named *Zálmoxis* because at birth a bear-skin had been thrown over him; for the Thracians call the skin *zalmós*[8].'

Now at Kyzikos near the Hellespont it was said that the nurses of

[4] Various attempts have been made to elucidate the word Γεβελέϊζιν (see Waser in Pauly—Wissowa *Real-Enc.* vii. 894). I should surmise that it is related to Latin *gabalus*, Old Irish *gabul*, Welsh *gebel*, Old High German *gabala*, Middle High German *gabel*, etc. (F. Kluge *Etymologisches Wörterbuch der deutschen Sprache*[6] Strassburg 1899 p. 130, Walde *Lat. etym. Wörterb.*[2] p. 330 f.), and signifies 'the god with a Fork.' The fork in question would be either a weapon (Schrader *Reallex.* p. 261) like the fork of Hades (*infra* § 3 (c) iv (δ)) or a divining rod comparable with the Pythagorean Y (*supra* i. 282 n. 7). All this, however, is the merest speculation.

the infant Zeus had been turned into bears[1], as was the case also with his nurses in Crete[2]. Moreover, an interesting myth told how the sinews of Zeus had on one occasion been cut out and wrapped in a bear-skin by Typhon[3]. Another made him consort with the Arcadian Kallisto[4], whom Artemis[5] or Hera[6] or he[7] transformed

[1] *Supra* i. 112 n. 5. [2] *Supra* i. 112 n. 3.

[3] *Infra* § 3 (a) vi (*κ*).

[4] R. Franz *De Callistus fabula* (*Leipziger Studien für classischen Philologie* xii) Leipzig 1890, *id.* in Roscher *Lex. Myth.* ii. 931—935, Farnell *Cults of Gk. States* ii. 438, Overbeck *Gr. Kunstmyth.* Zeus p. 415. It is commonly assumed that Kallisto, whose grave—a lofty mound of earth covered with trees—was topped by a sanctuary of Artemis *Kalliste* (Paus. 8. 35. 8), is a hypostasis or by-form of Artemis (so first K. O. Müller *Prolegomena zu einer wissenschaftlichen Mythologie* Göttingen 1825 p. 73 ff., C. O. Müller *The History and Antiquities of the Doric Race* trans. H. Tufnell and G. C. Lewis Oxford 1830 i. 390 f.). My contention is that in such cases we should rather suppose a priestess regarded as the goddess incarnate and bearing the name of the animal specially connected with her divinity (*supra* i. 453). The grave of Kallisto suggests a human embodiment. The complimentary name suits a 'bear' (J. Grimm *Teutonic Mythology* trans. J. S. Stallybrass London 1883 ii. 667 f., E. H. Meyer *Germanische Mythologie* Berlin 1891 p. 103 f., *Class. Rev.* 1894 viii. 383 f.). The metamorphosis at the hands of Artemis recalls the *ἄρκτοι* of Artemis *Brauronia* (*supra* i. 421 f., 442).

[5] So in the oldest accessible form of the myth: Hes. *frag.* 137 Flach 181 Rzach *ap.* pseudo-Eratosth. *catast.* 1. 1 (=E. [6] This version, which goes back to Kallim. *frag.* 385 *ap.* schol. A.D. *Il.* 18. 487, was commonly accepted throughout the Roman age (Ov. *met.* 2. 409 ff., Paus. 8. 3. 6, Hyg. *fab.* 177, *poet. astr.* 2. 1 p. 31, 3 ff. Bunte, Serv. *in* Verg. *georg.* 1. 67, 1. 138, Lact. Plac. *in* Stat. *Theb.* 3. 685, Isid. *orig.* 3. 70. 35, Myth. Vat. 1. 17, 2. 58, Tzetz. *in* Hes. *o.d.* 564, Eustath. *in Il.* p. 1156, 9 ff.).

[7] So Apollod. 3. 8. 2, Hyg. *poet. astr.* 2. 1 p. 31, 6 ff. Bunte, Liban. *narr.* 6 (iv. 1101 Reiske).

From *s.* iv B.C. onwards Zeus himself was said to have wooed Kallisto in one or other of several disguises. Either he took the form of Artemis (Amphis *inc. fab. frag.* 11 (*Frag. com. Gr.* iii. 320 Meineke) *ap.* Hyg. *poet. astr.* 2. 1 p. 30, 15 ff. Bunte and *ap.* schol. Caes. Germ. *Aratea* p. 381, 12 ff. Eyssenhardt, cp. Apollod. 3. 8. 2, Ov. *met.* 2. 425, interp. Serv. *in* Verg. *Aen.* 1. 744, Lact. Plac. in Stat. *Theb.* 3. 685, Myth. Vat. 2. 58), or he became Apollon for the nonce (Apollod. 3. 8. 2 Ζεὺς δὲ ἐρασθεὶς ἀκούσῃ συνευνάζεται, εἰκασθείς, ὡς μὲν ἔνιοι λέγουσιν, Ἀρτέμιδι, ὡς δὲ ἔνιοι, Ἀπόλλωνι, cp. Tzetz. *in* Lyk. *Al.* 480 Ἀρκὰς ὁ Διὸς ἢ Ἀπόλλωνος παῖς καὶ Καλλιστοῦς τῆς Λυκάονος θυγατρός), or else he appeared as a lion (Clem. Rom. *hom.* 5. 13 (ii. 184 Migne) Καλλιστοῖ τῇ Λυκάονος ἠγριώθη λέων, καὶ ἄλλον τίκτει Ἀρκάδα). The first of these metamorphoses is illustrated by a silver *simpulum* plated here and there with gold, which was found *c.* 1861 A.D. at Cullera near Valencia and is now in the Dutuit collection at Paris (pl. xv = W. Froehner *Les Musées de France* Paris 1873 pp. 21—23 pl. 5, W. Helbig in the *Bull. d. Inst.* 1865 pp. 120—122, R. Franz in Roscher *Lex. Myth.* ii. 934 fig., E. Pottier in Daremberg—Saglio *Dict. Ant.* iii. 707 fig. 4230, Reinach *Rép. Reliefs* ii. 242 nos. 1—3). The vessel is shaped like a saucepan (0·11[m] in diameter with handle 0·9[m] in length) and inscribed on the bottom in lettering of the second half of *s.* iii A.D. [F]ATE Ϙ PAVLINA D·V·S· = *Fat(a)e Paulina d(edit) v(otum) s(olvens)*? cp. *Corp. inscr. Lat.* ii no. 3727. The handle has the usual swan-head supports. On it appears Zeus with thunderbolt and sceptre beside a flaming altar: above are two garlands; below, an eagle between a pair of torches. The relief-frieze, first cast in a mould and then tooled, shows four scenes: (*a*) Zeus as a swan with Leda; (*b*) Zeus as a man with Semele, while Eros carries off his thunderbolt, an ornamented box or case (?) being hung in the background; (*c*) Zeus as Artemis with Kallisto and Eros between two oak-trees, one of which has beside it a pillar supporting a lighted torch; (*d*) Zeus as an eagle, dropping his thunderbolt to woo Ganymedes, while Eros with his bow escapes towards a third oak-tree.

[1] Clem. Rom. *hom.* 5. 13 (ii. 184 Migne) Ἀμαλθείᾳ δὲ τῇ Φώκου ὁμοιωθεὶς ἄρκτῳ συνευνάζεται, Rufin. *recognit.* 10. 22 Mantheam Phoci mutatus in ursum, ex qua nascitur Arctos. Whether Ἀμαλθείᾳ is a blunder, or *Mantheam*, or both, we cannot say, since the source of the legend is unknown.

these bear-stories[1] it is reasonable to infer that *Zálmoxis* was a Thracian appellative of the new-born Zeus.

Again, Antonius Diogenes in his *Marvels beyond Thoule* (*s.* i. A.D.[2]) had, *à propos* of Pythagoras, included a story, which—as Porphyrios says[3]—was by no means to be neglected;

'According to Diogenes, Mnesarchos was a Tyrrhenian by race, one of those that inhabited Lemnos, Imbros, and Skyros. Starting from thence he visited many different states and districts. And once upon a time he found an infant laid beneath a white poplar-tree of great size and shapely growth. He stopped and saw that the child lying on its back was looking up at the sky, staring straight at the sun without ever winking its eyes. It had in its mouth a small slender reed like a pipe; and he saw to his surprise that it was nurtured by dew, which dropped from the poplar. So, thinking that the child must have been born of some divine parentage, he took it up from the ground. The boy grew to manhood in Samos and was taken up by the Samian Androkles, who put him in charge of his household. Mnesarchos, being quite well-to-do, brought up the child under the name of Astraios along with his own three boys Eunostos, Tyrrhenos, and Pythagoras the youngest, whom Androkles adopted as his son[4].'

The fine poplar in a far-off land with a divine infant lying beneath it at once recalls the remarkable poplar growing in the mouth of the Idaean Cave[5], where Zeus was born[6],—a spot to which Pythagoras made pilgrimage[7]. Ability to stare straight at the sun was characteristic of the eagle[8] and might well mark an infant Zeus. Finally, the name *Astraîos* reminds us that the Cretan Zeus bore the title *Astérios*[9]. It is clear therefore that Diogenes wove into his romance a neo-Pythagorean account of the Cretan Zeus.

If so, it would seem that Zalmoxis and Astraios, the two familiars of Pythagoras, stand respectively for Thrace and Crete, and that the sage in representing himself as an *avatar* of Apollon was acting under the influence of the Thracian and Cretan cult of the reborn Zeus. Such an influence was not out of place at Delphoi, where the earliest priests of Apollon *Delphínios* had been Cretans

from Knossos[1] and his most doughty defenders in the middle of the fourth century B.C. were the Thrakidai[2].

(*v*) Zeus at Delphoi.

The arguments hitherto adduced point towards a conclusion of some importance, *viz.* that at Delphoi the worship of the sky-father (Zeus), the earth-mother (Ge, Themis), and their offspring (Dionysos) was anterior to the worship of Apollon, who inherited, so to speak, the eagles of Zeus[3], the *omphalós* of Ge[4], the tripod[5] and tomb of Dionysos[6].

A stranger visiting the site might indeed from first impressions suppose that here Apollon was all in all. But closer scrutiny would soon detect many a trace of the earlier occupants. At the very entrance of the town Zeus *Polieús* had a precinct adjoining that of Athena *Pronaía*[7]. Within the temple of Apollon the statues of the two Moirai were flanked by Zeus *Moiragétes* as well as by Apollon *Moiragétes*; and it is likely that the latter was named after the former god[8]. Again, the Delphians had a cult of Zeus *Eúhypnos*,

[7] A. D. Keramopoullos in the Ἐφ. Ἀρχ. 1909 p. 269 published a limestone boundary-block (?) inscribed Δ | Ο Σ | ΠΟΛΙΕΩΣ, which he had found in 1907 S. or S.E. of the large altar at *Marmaria* just below the southern wall of Athena's precinct. A. Frickenhaus in the *Ath. Mitth.* 1910 xxxv. 243 n. 1 agrees that this inscription must be a boundary-stone, infers (*ib.* p. 239 n. 3) that there was an adjoining precinct of Zeus *Polieús*, and assigns to it the trophy which the Delphians set up παρὰ τὸ τῆς Προναίας Ἀθηνᾶς ἱερόν (Diod. 11. 14). H. Pomtow, who in the *Jahrb. f. class. Philol.* 1884 xxx. 238 ff. had corrected the punctuation of the epigram on this trophy by reading μνᾶμά τ' ἀλεξάνδρου πολέμου καὶ μάρτυρα νίκας | Δελφοὶ μὲ στᾶσαν Ζανὶ χαριζόμενοι· | σὺν Φοίβῳ πτολίπορθον ἀπωσάμενοι στίχα Μήδων | καὶ χαλκοστέφανον ῥυσάμενοι τέμενος, in *Philologus* 1912 lxxi. 73—75 improves it still further by accepting F. W. Schneidewin's comma at the end of the first distich, reads the boundary-stone as Δ | Ο Σ | ΠΟΛΙΕΟΣ, and states that (in 1909?) he had arrived independently at the results obtained by Frickenhaus. For plans see *Ath. Mitth.* 1910 xxxv. 243 fig. 4 and col. pl. 13.

[8] Paus. 10. 24. 4 ἐν δὲ τῷ ναῷ... ἕστηκε δὲ καὶ ἀγάλματα Μοιρῶν δύο· ἀντὶ δὲ αὐτῶν τῆς τρίτης Ζεύς τε Μοιραγέτης καὶ Ἀπόλλων σφίσι παρέστηκε Μοιραγέτης. The title, which is used here only of Apollon (see D. Bassi *Apollo 'Moiragetes'* Torino—Roma 1895), occurs elsewhere of Zeus: (*a*) inscription from the *akrópolis* at Athens (*Corp. inscr. Att.* i no. 93, 10 ff. = J. v. Prott and L. Ziehen *Leges Graecorum sacrae* ii no. 14, 10 ff. [τά]δε *ho* Ἀπόλλων ἔχρεσεν [? νόμμα Πραχσιεργίδαις] | [ἀμ]φιεννύοσιν τὸν πέπλον [τὲν θεὸν καὶ προθύοσιν] | [Μοί]ραις Διὶ Μοιραγέτει γ – – –); (*b*) altar in the hippodrome at Olympia (Paus. 5. 15. 5 ἰόντι δὲ ἐπὶ τὴν ἄφεσιν τῶν ἵππων ἔστι βωμός, ἐπίγραμμα δὲ ἐπ' αὐτῷ Μοιραγέτα· δῆλα οὖν ἐστιν ἐπίκλησιν εἶναι Διὸς ὃς τὰ ἀνθρώπων οἶδεν, ὅσα διδόασιν αἱ Μοῖραι καὶ ὅσα μὴ πέπρωται σφισι. πλησίον δὲ καὶ Μοιρῶν βωμός ἐστιν ἐπιμήκης, μετὰ δὲ αὐτὸν Ἑρμοῦ καὶ δύο ἐφεξῆς Διὸς Ὑψίστου (K. Wernicke cj. δύο ἐφεξῆς Ἑρμοῦ καὶ Διὸς Ὑψίστου)); (*c*) relief in the precinct of Despoina near Akakesion in Arkadia (Paus. 8. 37. 1 ἰόντων δὲ ἐπὶ τὸν ναὸν στοά τέ ἐστιν ἐν δεξιᾷ καὶ ἐν τῷ τοίχῳ λίθου λευκοῦ τύποι πεποιημένοι, καὶ τῷ μέν εἰσιν ἐπειργασμέναι Μοῖραι καὶ Ζεὺς ἐπίκλησιν Μοιραγέτης,

'Giver of Good Sleep[1]': the title presupposes the custom of incubation[2], as practised *e.g.* in the cult of Zeus *Amphiáraos* near Oropos[3], and is doubtless of ancient date[4]. The Aetolian League

Fig. 160.

δευτέρῳ δὲ Ἡρακλῆς τρίποδα Ἀπόλλωνα ἀφαιρούμενος). It seems probable therefore that Apollon took the title from Zeus, who in turn may have derived it from the Idaean Daktyloi (Ap. Rhod. 1. 1126 ff. *Τιτίην θ' ἅμα Κύλληνόν τε, | οἳ μοῦνοι πολέων μοιρηγέται ἠδὲ πάρεδροι | μητέρος Ἰδαίης κεκλήαται ὅσσοι ἔασιν | Δάκτυλοι Ἰδαῖοι Κρηταιέες* with schol. *ad loc.* and K. Tümpel in Roscher *Lex. Myth.* ii. 3103 f.). Later the term was generalised (Alkiphr. 1. 20 *ὦ μοιραῖοι θεοὶ καὶ μοιραγέται δαίμονες*, Iambl. *de fato* p. 179, 1 ff. *τί οὖν; οἷόν τε ἐστι διὰ τῶν πολευόντων θεῶν λύειν ἑαυτὸν καὶ τοὺς αὐτοὺς ἡγεῖσθαι μοιρηγέτας καὶ δεσμοῖς ἀλύτοις τοὺς βίους δεσμεύοντας;* Hermeias *in* Plat. *Phaedr.* p. 96, 14 f. Couvreur *τῆς προνοίας ἐξηρημένως καὶ τῆς θείας δὲ φύσεως καὶ τῶν μοιρηγετῶν* (*μοιρηγενετῶν* codd.) *θεῶν συνδιαπλεκόντων πάντα ἐν τάξει καὶ κατὰ δίκην*, 23 *οἱ μέντοι μοιρηγέται* (*μοιρηγενέται* codd.) *θεοὶ κ.τ.λ.*, Prokl. *in* Plat. *Alcib.* 24 p. 77 Creuzer *τὰς τῆς εἱμαρμένης δόσεις καὶ τῶν μοιρηγετῶν* (so F. Creuzer or codd. *μοιρηγενετῶν*, *μοιρηνετῶν*)).

L. Stephani in the *Compte-rendu St. Pét.* 1881 p. 118 f. Atlas pl. 5, 18 (reproduced to a scale of ⅓ in my fig. 160) contends that an engraved chalcedony of Roman date, now in the Hermitage Museum at Petrograd, represents Zeus *Moiragétes* seated on a throne with an eagle at his feet, a sceptre in his raised left hand and the three Moirai on his outstretched right hand. Stephani admits that the little figures might be Horai (cp. F. Creuzer *Symbolik und Mythologie*[3] Leipzig and Darmstadt 1841 iii. 97) or Charites, but rules out the former as being less significant in relation to Zeus than the Moirai, and the latter as being normally undraped in late art. The three small females are certainly draped, and one of them has 'ein kleines beutelartiges und nicht genauer zu bestimmendes Attribut in die Hand.' But I confess, I should not accept Stephani's identification. I regard them as Charites, draped just because they are *not* a product of late art, but have been transferred to Zeus from the famous statue of Apollon at Delos by the archaic sculptors Tektaios and Angelion (Plout. *de mus.* 14 quoted *infra* § 3 (a) iii (χ), Paus. 2. 32. 5, 9. 35. 3, Athenag. *supplicatio pro Christianis* 17 p. 19 Schwartz; Overbeck *Gr. Fig. 161 is from a copper coin of Athens in my collection).

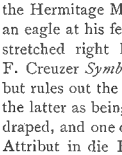

Fig. 161.

[1] Hesych. *Εὔυπνος· ὁ Ζεὺς [ἢ καλὸς ὕπνος] παρὰ Δελφοῖς.*

[2] Gruppe *Gr. Myth. Rel.* p. 1109 n. 5 (cp. *id. ib.* p. 932 n. 3) refers the title to a 'Traumorakel.' Other evidence of incubation at Delphoi is considered by Rohde *Psyche*[3] ii. 58 n. 1 and L. Deubner *De incubatione* Lipsiae 1900 p. 52 n. 2: neither of these scholars has, however, seen the relevancy of Zeus *Eúhypnos*.

[3] *Supra* i. 407 n. 4. For Amphiaraos as Zeus see *infra* Append. J.

[4] It recalls the sound sleep of Trophonios and Agamedes at Delphoi (*supra* i. 450). Incubation was in all probability practised in the cult of Trophonios at Lebadeia (L. Deubner *De incubatione* Lipsiae 1900 p. 8 n. 2, Miss M. Hamilton *Incubation* London 1906 p. 88 ff.). J. Vürtheim 'De Eugammonis Cyrenaei Telegonia' in *Mnemosyne* N.S.

commemorated the defeat of the Gauls near Delphoi (279—278 B.C.) by establishing a festival to be called Soteria in honour of Zeus *Sotér* and Apollon *Pýthios*[1]. But A. Mommsen's notion that the ordinary Pythian rites were performed for the *Moiragétai*, Zeus as well as Apollon[2], is an unsupported conjecture[3]. On the other hand, importance must be attached to the fact that at the feast Boukatia[4] in the month Boukatios (= the Attic Metageitnion)[5] the Delphic phratry of the Labyadai sacrificed not only to Apollon but also to Zeus *Patrôios*[6], a god by whom they swore[7].

(φ) Dionysos at Delphoi.

But if Zeus left his mark on Delphoi, so did Dionysos. Plutarch in an interesting section of his treatise *On the Delphic* E[8] writes as follows:

'If, then, any one ask what all this has to do with Apollon, we shall declare that it concerns not him alone but also Dionysos, who is partner on equal terms with Apollon at Delphoi. The theologians, now in verse, now in prose, sing or

1901 xxix. 23 ff. argues that Klymenos, Trophonios, and Agamedes were all hypostases of a chthonian god, the Zeus (or Hermes) of Lebadeia. *Klýmenos*, like *Periklýmenos* (Hesych. *s.v.*), was an appellative of Plouton (R. Engelmann in Roscher *Lex. Myth.* ii. 1228 f.). Zeus *Trophónios* or *Trephónios* was the full name of the Lebadean divinity (*infra* Append. K). *Agamédes* was a possible title for Zeus (cp. *supra* i. 14 n. 1).

[3] Rashly accepted by H. Pomtow in *Philologus* 1912 lxxi. 45.

[4] Βουκάτια, derived by A. Boeckh *ἀπὸ τοῦ καίνεσθαι βοῦς* (*Corp. inscr. Gr.* i. 733), was tantamount in meaning to *βουφόνια*.

[5] J. W. Kubitschek in Pauly—Wissowa *Real-Enc.* iii. 994, H. van Herwerden *Lexicon Graecum suppletorium et dialecticum*[2] Lugduni Batavorum 1910 i. 284.

[6] T. Homolle in the *Bull. Corr. Hell.* 1895 xix. 5 ff. *D* 45 ff. = J. Baunack in Collitz—Bechtel *Gr. Dial.-Inschr.* ii. 718 ff. no. 2561 D 45 ff. = Michel *Recueil d'Inscr. gr.* no. 995 *D* 45 ff. = Dittenberger *Syll. inscr. Gr.*[2] no. 438 *d* 210 ff. = J. v. Prott and L. Ziehen *Leges Graecorum sacrae* ii. 217 ff. no. 74 D 45 ff. = F. Solmsen *Inscriptiones Graecae ad inlustrandas dialectos selectae* Lipsiae 1905 no. 36 D 45 ff. Βουκατίοις | τῶι Διὶ πατρώιωι καὶ τῶπ|όλλωνι τὰν ἀκρόθινα, καὶ|ὶ συμπρῆσκεν (B. Keil in *Hermes* 1896 xxxi. 509 f. treats this verb as an iterative form of *πίμπρημι* 'zusammen verbrennen,' and so Baunack and Dittenberger *ad loc.* But Fournier in the *Bull. Corr. Hell.* 1898 xxii. 271 reads *συμπιπίσκεν*, which is accepted by Michel, Ziehen, and Solmsen) *ἀμεῖ τοὺς Λαβυάδας*.

[7] Their oaths were: (*a*) A 14 f. *ποὶ τοῦ Δι|ὸς τοῦ πατρώιου*
(*b*) B 12 ff. *ποὶ τὸ 'Απόλλω[ν]ος καὶ τοῦ Ποτειδᾶνος | τοῦ φρατρίου καὶ τοῦ Δ|ιὸς πατρώιου*
(*c*) C 1 ff. [*ποὶ τοῦ 'Απόλλωνος κ|αὶ Ποτειδᾶνος τοῦ φρ]ατ[ρ|ίου καὶ Διός*]
Dittenberger *loc. cit.* ii. 26 n. 3 justly infers that the Labyadai were a phratry (*φρατρία*), not a clan (*πατριά*), and notes that the cult of Zeus *Patrôios* was appropriate to any community bound together by ties of kindred and affinity.

[8] Plout. *de* E *apud Delphos* 9. I have followed throughout the text of W. R. Paton (Berolini 1893).

say to us that God, who by nature is imperishable and everlasting, yet owing to a certain necessity inherent in mind and reason undergoes transformation, and sometimes kindles his nature to a fire thereby reducing all things to a state of uniformity, sometimes becomes manifold in shapes and in diverse passions and powers thereby producing an orderly universe, as at present, and winning for himself the name that is famous above every name[1]. Our wiseacres keep this knowledge from the populace, and call his transformation into fire Apollon by reason of its unity[2] or Phoibos by reason of its pure and unpolluted character; but as to his turning into wind, water, earth, stars, births of plants and animals, and his ordering of the universe in general, they hint at his suffering and transformation by speaking of a certain rending-asunder and dismemberment: they call him Dionysos, Zagreus, *Nyktélios*, *Isodaítes*, and recount certain destructions and disappearances followed by rebirths and resurrections—mystifying and mythical phrases that suit the transformations I have mentioned[3]. Again, to the one god they sing dithyrambic songs full of passions and of a transformation that involves a certain wandering and scattering: as Aischylos puts it—

'Tis meet the dithyramb of mingled cry
With Dionysos should go revelling by[4].

To the other god they sing a paean, an orderly and discreet form of composition. Painters and sculptors always represent him as free from old age and youthful, his partner as taking on a variety of forms and shapes. Generally speaking, they ascribe to the former similarity, order, pure seriousness, to the latter ups and downs of sport and violence, seriousness and madness, invoking him as—'Lord of the Loud Cry, Waker of Women, Dionysos flowering forth with frenzied rites[5].' In fact they have seized aright the true nature of both transformations. But inasmuch as the periods of time allowed for these transformations are unequal, the former period which they call "satiety" having the longer duration, the latter period of "need" the shorter[6], they are careful to observe

the same proportion, and here employ the paean for their sacrifices throughout the greater part of the year; but, when winter begins, they stir up the dithyramb and stop the paean, calling for three months together upon the second god in place of the first[1]. They take it that, as three is to one in point of nature, so in point of time is the formation of the universe to its conflagration.'

The whole passage is obviously redolent of Greek philosophy. Herakleitos, Pythagoras, Platon, the Stoics have contributed their several quotas. But discounting all these philosophical elements

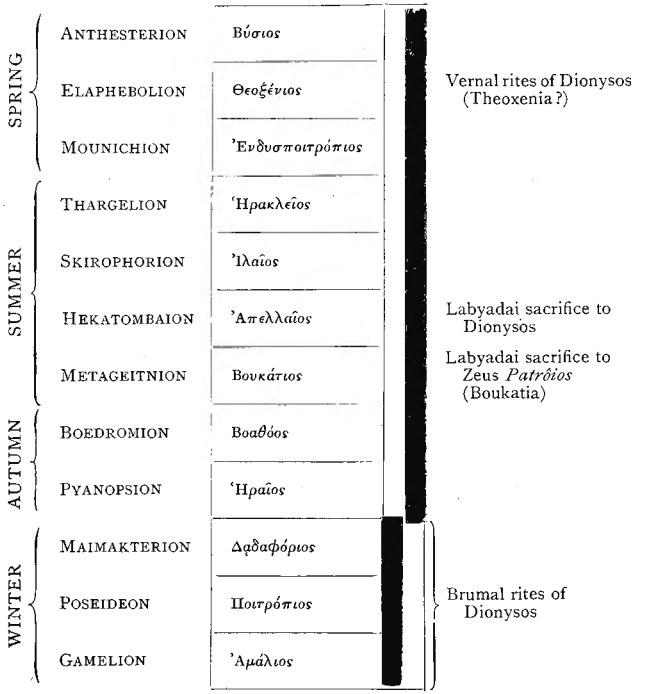

Fig. 162.

we have yet a residuum of popular religion that is well deserving of attention. It appears that at Delphoi Dionysos was admittedly no less essential than Apollon, whom he actually dispossessed for

[1] τὸ κατὰ λόγον τηροῦντες ἐνταῦθα τὸν μὲν ἄλλον ἐνιαυτὸν παιᾶνι χρῶνται περὶ τὰς θυσίας, ἀρχομένου δὲ χειμῶνος ἐπεγείραντες τὸν διθύραμβον τὸν δὲ παιᾶνα καταπαύσαντες, τρεῖς μῆνας ἀντ' ἐκείνου τοῦτον κατακαλοῦνται (ἀνακαλοῦνται B.V[3].) τὸν θεόν.

three months out of the twelve. Our recently-acquired knowledge of the Delphic calendar (fig. 162)[1] enables us to be more precise. The winter months Daidaphorios, Poitropios, and Amalios together constituted the season of Dionysos. The Locrians, near neighbours of the Delphians, called the second of these months not Poitropios but Dionysios[2], while the Dorian inhabitants of Chalkis, Byzantion, and Chersonnesos spoke of the following month as Dionysios instead of Amalios[3]. A comparison with the Attic calendar[4] will show that in Attike too the second and third winter months were marked by important Dionysiac festivals, the Rural Dionysia falling in Poseideon, the Lenaia in Gamelion. But if at Delphoi winter was reserved for Dionysos, the rest of the year belonged to Apollon. Spring came in with the month Bysios, the seventh day of which was kept as Apollon's birthday[5]. In early times—if Kallisthenes

[1] F. Hiller von Gaertringen in Pauly—Wissowa *Real-Enc.* iv. 2532. *Id. ib.* 2531 cites earlier literature, but omits the monograph of C. Petersen *Der Delphische Festcyclus des Apollon und des Dionysos* Hamburg 1859. See also W. Larfeld *Handbuch der griechischen Epigraphik* Leipzig 1907 i. 300 (bibliography), 302 (calendar), Lübker *Reallex.*[8] pp. 1135 (calendar), 1136 (bibliography).

[5] Apollon was variously connected with the number seven, as has been shown in detail by W. H. Roscher 'Die Heiligkeit der Siebenzahl im Kultus und Mythus des Apollon,' in *Philologus* 1901 lx. 360—368, *id. Die enneadischen und hebdomadischen Fristen und Wochen der ältesten Griechen* (*Abh. d. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1903 xxi. 4) Leipzig 1903 pp. 49 f., 67 n. 196, *id. Die Sieben- und Neunzahl im Kultus und Mythus der Griechen* (*Abh. d. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1904 xxiv. 1) Leipzig 1904 pp. 4—19, 23, 29 n. 65 b, 68 f., 107, *id. Die Hebdomadenlehren der griechischen Philosophen und Ärzte* (*Abh. d. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1906 xxiv. 6) Leipzig 1906 pp. 7, 21 ff., 178 f., 210—214, 219 n. 303, *id. Enneadische Studien* (*Abh. d. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1907 xxvi. 1) Leipzig 1907 pp. 1—170, *id. Über Alter, Ursprung und Bedeutung der hippokratischen Schrift von der Siebenzahl* (*Abh. d. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1911 xxviii. 5) Leipzig 1911 pp. 1—154. Roscher's investigations are valuable on account of the enormous mass of evidence that he has digested. But his main contentions ((*a*) The sidereal or lunar month of 27—28 days was in Boiotia, Euboia, etc. divided into 4 weeks of 7 days—a division which gave rise to periods of 7 months, 7 years, 7 generations, sevenfold offerings, rites, choruses, groups of 7 gods, heroes, etc. (*b*) The sidereal or lunar month of 27—28 days was later, in epic times, divided into 3 weeks of 9 days—a system which in myth and cult transformed many of the older hebdomads into enneads, besides producing a fresh crop of the latter. (*c*) But this second arrangement soon gave place to a third. The synodical month of 29—30 days was divided into 3 periods of 10 days. (*d*) The numerical speculation of Orphists and Pythagoreans is traced to early Ionic hylozoism of *s.* vi and *s.* vii B.C., and is found to rest upon beliefs of a primitive character. The same holds good with regard to the ancient medical teaching of critical days, months, and years) are open to dispute: see especially the objections raised by Gruppe *Myth. Lit.* 1908 pp. 362—367. On the whole it must be admitted that as yet no single or simple explanation of the sanctity attaching to the number seven has been reached. Further discussion by H. Diels 'Ein orphischer Demeterhymnus' in the *Festschrift Theodor Gomperz dargebracht zum siebzigsten Geburtstage* Wien 1902 p. 8 ff., F. von Andrian 'Die Siebenzahl im Geistesleben der Völker' in the *Mitteilungen der Anthropologischen Gesellschaft in Wien* 1901 xxxi. 225 ff.,

J. Loth in the *Revue celtique* 1904 xxv. 113 ff., M. P. Nilsson 'Die älteste griechische Zeitrechnung, Apollo und der Orient' in the *Archiv f. Rel.* 1911 xiv. 423 ff., *id. Primitive Time-reckoning* Lund 1920 p. 329 ff., F. Boll in Pauly—Wissowa *Real-Enc.* vii. 2547—2578, S. Eitrem *ib.* vii. 2579. *Infra* § 3 (a) vi (λ).

The principal *data* concerning Apollon are as follows. Like Dionysos (Loukian. *dial. deor.* 9. 2, Cornut. *theol.* 2 cod. G p. xiv Lang, cp. Arnob. *adv. nat.* 3. 10), he passed as being a seven-months' child (schol. Pind. *Pyth.* argum. 1, schol. Kallim. *h. Del.* 251, cp. Arnob. *adv. nat.* 3. 10). At Sparta on the first and seventh days of every month the kings sacrificed to Apollon (Hdt. 6. 57, cp. Roscher *Die Hebdomadenlehren* etc. p. 211 f.). At Athens the first and seventh days of every month were sacred to Apollon (schol. Aristoph. *Plout.* 1126). At Miletos the guild of singers (*μολποί*), who worshipped Apollon Δελφίνιος, had a festival called Ἑβδομαῖα in the month Boedromion (?) or Pyanepsion (?) (A. Rehm in *Milet* iii. 235, 277 ff. inscr. no. 133, 6, 21 ff., U. von Wilamowitz-Moellendorff in the *Sitzungsber. d. Akad. d. Wiss. Berlin* 1904 pp. 622, 626, F. Bechtel in Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 627 ff. no. 5495, Nilsson *Gr. Feste* p. 170 f., S. Eitrem in Pauly—Wissowa *Real-Enc.* vii. 2579): Boedromion 7 would correspond with the date of the Apolline Boedromia (Mommsen *Feste d. Stadt Athen* p. 176 f., E. Saglio in Daremberg—Saglio *Dict. Ant.* i. 713 f., P. Stengel in Pauly—Wissowa *Real-Enc.* iii. 594 f.), Pyanepsion 7 with that of the Apolline Pyanopsia or Pyanepsia at Athens (Mommsen *Feste d. Stadt Athen* p. 278 ff., E. Cahen in Daremberg—Saglio *Dict. Ant.* iv. 781). It is probable too that sacrifices were offered to Apollon on the seventh day of the month at Kroton (Timaios *ap.* Athen. 522 C with Roscher *Die Hebdomadenlehren* etc. p. 24 n. 31). In Boiotia (?) the seventh day of the month was sacred, for on it Leto had borne Apollon (Hes. *o. d.* 770 f., cp. Aristoboulos *ap.* Clem. Al. *strom.* 5. 14 p. 397, 20 ff. Stählin and *ap.* Euseb. *praep. ev.* 13. 12. 13, Prokl. *in* Plat. *Tim.* ii. 197, 28 ff. Diehl). At Delphoi Apollon's birthday was Bysios 7 (Plout. *quaestt. Gr.* 9), in Delos Thargelion 7 (Diog. Laert. 3. 2). At Athens the Apolline festival of the Thargelia was held on Thargelion 7 (Mommsen *Feste d. Stadt Athen* p. 469), and Platon, whose birthday fell on that day (Plout. *symp.* 8. 1. 1 f.), was regarded as the son of Apollon (Mommsen *op. cit.* p. 469 n. 3 even says 'einen inkarnierten Apoll'); at least it was said that Ariston, warned by a vision of Apollon, had abstained from his wife Periktione till on Thargelion 7 she gave birth to Platon (Plout. *symp.* 8. 1. 2; Speusippos, Klearchos *frag.* 43 (*Frag. hist. Gr.* ii. 316 Müller), and Anaxilaïdes (E. Schwartz in Pauly—Wissowa *Real-Enc.* i. 2083 suggests Anaxilaos of Larissa) *ap.* Diog. Laert. 3. 2 and *ap.* Hieron. *c. Iovinian.* 1. 42 (xxiii. 273 A—B Migne)). Similarly at Kyrene Karneades was born during the Apolline Karneia on the seventh day of the month (Plout. *symp.* 8. 1. 2). Apollon himself was entitled Ἑβδομαγενής (Plout. *symp.* 8. 1. 2 *καὶ τὸν θεὸν ὡς ταύτῃ γενόμενον ὑμεῖς, εἶπεν, οἱ προφῆται καὶ οἱ ἱερεῖς Ἑβδομαγένην* (J. J. Reiske ex edd. Ald. et Bas. *ἑβδομαγένη* corr. *ἑβδομαγενῆ*) *καλεῖτε*) and Ἑβδομεῖος (*Corp. inscr. Att.* ii. 3 no. 1653 an inscription of *s.* iv (?) from *Keratia* in Attike [*ἱ*]*ερὸν* | [Ἀ]πόλλωνος | Ἑβδομεῖο | *φρατρίας* | Ἀχιαδῶν = Michel *Recueil d'Inscr. gr.* no. 749 = Dittenberger *Syll. inscr. Gr.*[2] no. 441). On the seventh day of some month he had at Athens a sacrifice called *ἑβδομαῖον* (E. Ziebarth in the *Ath. Mitth.* 1898 xxiii. 24 ff. no. 1 = J. v. Prott and L. Ziehen *Leges Graecorum sacrae* ii no. 16 a, 7 ff. [*ἑ*]*βδόμηι ἱσταμένο* | *ἐς ἑβδομαῖον* | *οἷς λειπο*|*γνώμων* | *Πυθαιστ*[*α*]*ῖς θυ*|*ων. αις* – –). His name *ἑβδομαγέτης* (Aisch. *s. c. Th.* 800 f. with schol. *ad loc.*, Prokl. *in* Plat. *Tim.* ii. 197, 30 f. Diehl) may be compared with his other appellatives Ἀρχηγέτης, *κυνηγέτης*, Μοιραγέτης, Μουσηγέτης, Νυμφηγέτης, Προηγέτης (Gruppe *Gr. Myth. Rel.* p. 1703 f.): doubtless we have here, as A. W. Verrall *ad loc.* observed, 'an example of that curious verbal ingenuity which plays so marked a part in the religious and prophetic mysteries of Aeschylus'; but the poet is, I fancy, giving a new meaning to an old cult-title, for the Muses were sometimes conceived as being seven in number (Epicharm. *frag.* 41 Kaibel *ap.* Tzetz. *in* Hes. *o. d.* 6, Cramer *anecd. Oxon.* iv. 425, 3 ff., Myrsilos *frag.* 4 (*Frag. hist. Gr.* iv. 457 f.) *ap.* Clem. Al. *protr.* 2. 31. 1—4 p. 23, 8 ff. Stählin and *ap.* Arnob. *adv. nat.* 3. 37 cp. 4. 24, Cornut. *theol.* 14 p. 15, 2, 8 f. Lang: see also Roscher *Die Siebenund Neunzahl* etc. pp. 19, 35 f.) so that *ἑβδομαγέτης* may denote 'leader of the sevenfold

and Anaxandrides may be trusted—this was the one day in the year on which the Pythia gave responses[1]. Later, Apollon was more frequently 'at home[2]': indeed his period of residence extended from Bysios the first month of spring to Heraios the last month of autumn. Then with the advent of winter there recommenced the rule of Dionysos.

How is this Box-and-Cox arrangement of the Delphic year to be explained? We must *à priori* recognise two possibilities. Either Dionysos has intruded on Apollon, or Apollon has intruded on Dionysos. The former is the view held by the majority of modern critics[3]: the latter was the opinion of certain scholars in antiquity[4].

choir,' cp. Aisch. *s. c. Th.* 117 ff. *ἑπτὰ δ' ἀγήνορες πρέποντες στρατοῦ | δορυσσόοις σαγαῖς πύλαις ἑβδόμαις* (=*ἑπτά*) *| προσίσταντο, Anth. Pal.* 2. 380 (Christodoros) *ἑνάταις* (=*ἐννέα*) *ἀνεθήκατο Μούσαις, Il.* 8. 404 *ἐς δεκάτους* (=*δέκα*) *περιτελλομένους ἐνιαυτούς*, where the text need not be tinkered. Dionysos *Ἑβδομεύς* (*Inscr. Gr. ins.* ii no. 123 on a round base of *s.* ii A.D. from Mytilene [Δι]ωνύσω | Ἑβδομεῖ. | Ταὶς (?Ταὶς) *ἀνέθει[κεν εὐχήν*) appears to be analogous to Apollon *Ἑβδομεῖος* (Roscher *Die Sieben- und Neunzahl* etc. pp. 22 ff., 69, *id. Die Hebdomadenlehren* etc. p. 215) rather than modelled upon him (W. Quandt *De Baccho ab Alexandri aetate in Asia Minore culto* Halis Saxonum 1913 pp. 139, 141 n. 1).

Roscher *Die Sieben- und Neunzahl* etc. pp. 29, 116 thinks that the Apolline seven made its way into the cult of Zeus, citing the seven officials charged with the duty of setting up a tripod for the Boeotian Zeus *Ἐλευθέριος* (*Inscr. Gr. sept.* i no. 1672=Collitz—Bechtel *Gr. Dial.-Inschr.* i. 271 no. 865 Plataiai *Βοιωτοὶ Διὶ Ἐλευθερίοι τὸν [τρίποδα] | κατὰ τὰν μαντείαν τῶ Ἀπόλλω[νος], | κ.τ.λ.*, cp. i no. 1673=i. 271 no. 864, i no. 1674=i. 272 no. 866, and the similar dedications at Thespiai to the Muse (i no. 1795=i. 403 no. 807*a*), at Akraiphia to Apollon *Πτώϊος* (i no. 2723=i. 213 f. no. 570, i no. 2724=i. 214 no. 571, i nos. 2724a—e), at Orchomenos to the Charites (i no. 3207=i. 190 f. no. 494). These inscriptions all bore the names of seven *ἀφεδριατευόντων* (?=*ἀφιδρυόντων*), except one from Akraiphia (i no. 2724 b) which has eight), and comparing the seven cakes offered to Zeus *Πολιεύς* in Kos (J. de Prott *Leges Graecorum sacrae* Lipsiae 1896 Fasti sacri p. 19 ff. no. 5, 28 ff.=Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 357 ff. no. 3636, 28 ff. =Michel *Recueil d'Inscr. gr.* no. 716, 28 ff.=Dittenberger *Syll. inscr. Gr.*[2] no. 616, 28 ff. *τούτω δὲ [ἐλ]άντ[ω π|αρ]ὰ τὰν Ἰστίαν τὰν ταμίαν καὶ ὁ [τοῦ Ζηνὸς ἱ]ερεὺς* (W. R. Paton restores *ὁ [Πολιῆος ἱ]ερεύς*) *στέ(π)τει καὶ | [ἐκ]σπένδει κύλικα οἴνου κεκραμένου [π]ρὸ τοῦ [βοός]· ἔπειτα ἄγοντι τὸ[μ | βο]ῦν καὶ τὸγ καυτὸν καὶ [φ]θοΐας ἑπτὰ καὶ μέλι καὶ στέμμα· κ.τ.λ.* in a ritual calendar for the Coan month Batromios (=the Attic Poseideon) dating from *c.* 300 B.C.). He might have added the seven stars surrounding Zeus *Κρηταγενής* (*supra* i. 51 f. figs. 27 f., 149 n. 1 fig. 115, 547 f. figs. 415—418, cp. 276 n. 5, 754 n. 2). But in none of these cases have we any real reason to suspect the influence of Apollon.

[1] Kallisthenes *frag.* 4 (*Script. hist. Alex. Mag.* p. 12 Müller) and Alexandrides *frag.* 6 (*Frag. hist. Gr.* iii. 107 Müller) *ap.* Plout. *quaestt. Gr.* 9. The name of the second author, a Delphian by birth, should be Anaxandridas (L. Weniger *De Anaxandrida Polemone Hegesandro rerum Delphicarum scriptoribus* Berolini 1865 p. 7 ff.) or Anaxandrides (E. Schwartz in Pauly—Wissowa *Real-Enc.* i. 2079 f.).

[2] On the *ἀποδημίαι* and the *ἐπιδημίαι* of the Delphic Apollon see W. H. Roscher *Lex. Myth.* i. 426.

[3] *E.g.* O. Kern in Pauly—Wissowa *Real-Enc.* v. 1017 f. (after Rohde *Psyche*[2] ii. 52 ff.), Farnell *Cults of Gk. States* v. 112 f. See, however, F. Lenormant in Daremberg—Saglio *Dict. Ant.* i. 593, F. A. Voigt in Roscher *Lex. Myth.* i. 1032 ff., G. E. Marindin in Smith—Marindin *Class. Dict.* p. 295, who all support the priority of Dionysos.

[4] Schol. Pind. *Pyth.* argum. 1 *εἶτα ἔρχεται* (*sc.* Ἀπόλλων) *ἐπὶ τὸ μαντεῖον, ἐν ᾧ πρώτη*

I have, however, already[1] given reasons for thinking that at Delphoi Apollon was preceded, not only by the sky-father (Zeus) and the earth-mother (Ge, Themis), but also by their Thraco-Phrygian offspring (Dionysos). The little chapel in the Pythian temple (fig. 163)[2], the holiest spot in all Hellas, contained the tokens of these three deities—the eagles of Zeus, the *omphalós* of Ge, and the tomb of Dionysos[3]. Will it be seriously maintained that the tomb with its crude myth of rent limbs and boiling caldron[4] was a foreign element which had thrust itself into this august company at a comparatively recent date? Rather it had been there—I will not say, from the beginning, but at least from time immemorial. The real usurper was Apollon, though even he had made good his footing before the epic age[5].

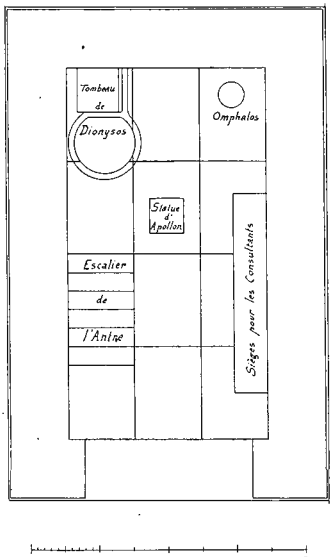

Fig. 163.

There are certain calendrical considerations which tend to confirm the foregoing sequence of cults. At intervals of eight years

Νὺξ ἐχρησμῴδησεν, εἶτα Θέμις. Πύθωνος δὲ τότε κυριεύσαντος τοῦ προφητικοῦ τρίποδος, ἐν ᾧ πρῶτος Διόνυσος ἐθεμίστευσε, <? καὶ κωλύοντος αὐτὸν παρελθεῖν ἐπὶ τὸ χάσμα, τοξεύει> καὶ ἀποκτείνας τὸν ὄφιν τὸν Πύθωνα ἀγωνίζεται τὸν Πυθικὸν ἀγῶνα κατὰ ἑβδόμην ἡμέραν (A. B. Drachmann cj. ἑπτὰ μέρη)· πεῖρον (sic codd. πεῖραν ed. Rom. 1515) μέν, ὅτι ἀπεπειράθη τῆς μάχης τῆς πρὸς τὸ θηρίον· ἴαμβον δὲ διὰ τὴν λοιδορίαν τὴν γενομένην αὐτῷ πρὸ τῆς μάχης, λέγεται γὰρ ἰαμβίζειν τὸ λοιδορεῖν· δάκτυλον δὲ ἀπὸ <? τῶν Ἰδαίων Δακτύλων .....· ? Βακχεῖον δὲ ἀπὸ > Διονύσου, ὅτι πρῶτος οὗτος δοκεῖ ἀπὸ τρίποδος θεμιστεῦσαι· Κρητικὸν δὲ ἀπὸ Διός· μητρῷον δέ, ὅτι Γῆς τὸ μαντεῖόν ἐστι· σύριγμα δὲ διὰ τὸν τοῦ ὄφεως συριγμόν. οὕτω μὲν οὖν κατέστη πρῶτον ὁ τῶν Πυθίων ἀγών. The scholiast is distinguishing seven parts of the νόμος Πυθικός, *viz.* πεῖρα, ἴαμβοι, δάκτυλοι, <? Βακχεῖοι >, Κρητικοί, μητρῷον, σύριγμα. Other writers enumerate five: thus Strab. 421 πέντε δ' αὐτοῦ μέρη ἐστίν, ἄγκρουσις, ἄμπειρα (cp. Hesych. *s.v.* ἀνάπειρα), κατακελευσμός, ἴαμβοι καὶ δάκτυλοι, σύριγγες, and Poll. 4. 84 τοῦ δὲ Πυθικοῦ νόμου τοῦ αὐλητικοῦ μέρη πέντε, πεῖρα, κατακελευσμός, ἰαμβικόν, σπουδεῖον, καταχόρευσις. κ.τ.λ.

[1] *Supra* p. 231.

the Delphians held a series of three solemnities called the Stepterion, the Heroïs, and the Charila[1]. Again, the Pythian games were originally celebrated once in eight years[2]. And at the close of the second century B.C. Delian priests and Attic magistrates were sending first-fruits to Apollon *Pýthios* in accordance with an eight-year period[3]. The same space of time is doubtless presupposed by the myth which told how Apollon served Admetos[4] for one year[5] or nine[6] or ten[7]. Indeed, an epic poet cited by Plutarch[8] and

[1] I have discussed these festivals in *Folk-Lore* 1904 xv. 402 ff. See also Nilsson *Gr. Feste* pp. 150 ff., 286 ff., 466 f., J. E. Harrison *Themis* Cambridge 1912 p. 415 ff., H. Usener 'Heilige Handlung' in the *Archiv f. Rel.* 1904 vii. 317 ff. (=*id. Kleine Schriften* Leipzig—Berlin 1913 iv. 450 ff.) (Stepterion), *id.* 'Italische Mythen' in the *Rhein. The earliest allusion to the myth is in *Il.* 2. 766 (cp. also *Il.* 21. 441 ff.).

[5] Pherekydes of Leros *frag.* 76 (*Frag. hist. Gr.* i. 90 Müller) *ap.* schol. Eur. *Alc.* 1 *εἰς ἐνιαυτόν*, Apollod. 3. 10. 4 *ἐνιαυτόν*. Cp. Panyassis *frag.* 16 Kinkel *ap.* Clem. Al. *protr.* 2. 35. 3 p. 26, 22 ff. Stählin.

[6] Serv. *in* Verg. *Aen.* 7. 761 = Myth. Vat. 1. 46, 2. 128 *novem annis*—by confusion with inclusive reckoning.

[7] Prob. *in* Verg. *georg.* 3. 1 *decem annis*—the nearest round number: so stories grow. In Myth. Vat. 1. 204 Admetus de Alcesta genuit Nisam et Stenoboeam. pro Nisa servivit ei Apollo *septem annis* the Greek myth has been modified by the Biblical tale of Jacob serving Laban seven years for Rachel (Gen. 29. 15 ff.).

[8] Plout. *amat.* 17 καὶ γὰρ τὸν Ἀπόλλωνα μυθολογοῦσιν ἐραστὴν γενόμενον "Ἀδμήτῳ παραθηεῦσαι μέγαν εἰς ἐνιαυτόν." The poet was very possibly Rhianos the Cretan (cp. schol. Eur. *Alc.* 1 Ῥιανὸς δέ φησιν ὅτι ἑκὼν ἐδούλευσεν αὐτῷ ἐρῶν τοῦ Ἀδμήτου), who may have told the tale in his *Thessalika* (W. Christ *Geschichte der griechischen Litteratur*[5] München 1911 p. 109); but see *infra* p. 241 n. 1.

Clement of Alexandreia[1] describes Apollon's servitude as lasting 'for a great year?.' And this myth was connected more[2] or less closely[4] with Delphoi. Thus usage and belief alike attest the recognition of the old lunisolar *oktaeterís* for the purposes of Delphic religion. Now A. Schmidt has argued that the *oktaeterís* was essentially Apolline[5], and in support of his thesis is able to cite, not only the bulk of the evidence given above, but also the Boeotian

[1] Clem. Al. *strom.* 1. 21 p. 69, 3 ff. Stählin καὶ οὐδὲν θαυμαστόν, ὅπου γε καὶ Ἀδμήτῳ θητεύων εὑρίσκεται (*sc.* Ἀπόλλων) σὺν καὶ Ἡρακλεῖ "μέγαν εἰς ἐνιαυτόν." The association of Apollon with Herakles (cp. Aug. *de civ. Dei* 18. 13, Myth. Vat. 1. 92, 3. 13. 3) makes it possible that Rhianos dealt with the theme in his *Herakleias* (W. Christ *loc. cit.*).

[2] This ἐνιαυτός was ὀκτὼ ἔτη (Apollod. 3. 4. 2 quoted *supra* i. 540 n. 1).

[3] Alexandrides *frag.* 5 (*Frag. hist. Gr.* iii. 107 Müller; but see *supra* p. 238 n. 1) *ap.* schol. Eur. *Alc.* 1 Ἀναξανδρίδης (G. J. Voss cj. Ἀλεξανδρίδης) δὲ ὁ Δελφός φησι θητεῦσαι αὐτὸν διότι τὸν ἐν Πυθοῖ δράκοντα ἀνεῖλεν. To the same effect C. O. Müller *The History and Antiquities of the Doric Race* Oxford 1830 i. 232, 338 f., observing that the boy who represented Apollon at the Stepterion imitated the servitude of the god (Plout. *de def. or.* 15 καὶ τελευταῖον αἵ τε πλάναι καὶ ἡ λατρεία τοῦ παιδὸς οἵ τε γιγνόμενοι περὶ τὰ Τέμπη καθαρμοὶ μεγάλου τινὸς ἄγους καὶ τολμήματος ὑποψίαν ἔχουσι). When Python came to be regarded, not as a holy snake whose murder demanded expiation, but as an unholy dragon whose slaughter was a meritorious act, the tale of Apollon's bondage had to be furnished with a fresh motive (K. Wernicke in Pauly—Wissowa *Real-Enc.* ii. 25 f.).

[4] Asklepios brought to life again those that died at Delphoi (Pherekydes of Leros *frag.* 8 (*Frag. hist. Gr.* i. 71 f. Müller) *ap.* schol. Eur. *Alc.* 1 Φερεκύδης ἐν τῇ ὀγδόῃ τῶν ἱστοριῶν (τῇ η τῶν ἱστοριῶν A. τῇ ἡ ἱστορίᾳ B. τῇ ἱστορίᾳ Fl. 6. 15) τοὺς ἐν Δελφοῖς φησι θνήσκοντας αὐτὸν ἀναβιώσκειν and *ap.* schol. Pind. *Pyth.* 3. 96 Φερεκύδης δὲ ὅτι τοὺς ἐν Δελφοῖς θνήσκοντας ἀναβιοῦν ἐποίησεν (ἐποίει B.))—a strange statement, which may have reference to those that underwent the Delphic rite of regeneration (*supra* p. 210 ff.). For this reason Asklepios was slain by Zeus with a thunderbolt at Delphoi (Pherekydes of Leros *ap.* schol. Eur. *Alc.* 1 κτείνει Ζεὺς Ἀσκληπιὸν τὸν παῖδα αὐτοῦ κεραυνῷ (κεραυνῷ om. A.) ἐν Πυθῶνι. ἀνίστη γὰρ ἰώμενος τοὺς τεθνεῶτας). Mnaseas of Patrai or Patara, a pupil of Eratosthenes (W. Christ *Geschichte der griechischen Litteratur*[5] München 1911 ii. 1. 187, 196), apparently identified Asklepios with Apollon and treated the myth in Euhemeristic fashion (Mnaseas Patrensis *frag.* 16 (*Frag. hist. Gr.* iii. 152 Müller) *ap.* Fulgent. *exp. serm. ant.* 2 p. 112, 2 ff. Helm Mnaseas scribit in Europae libro Apollinem (E. Mehler cj. *Apopidem*, cp. Plout. *de Is. et Os.* 36), posteaquam a Iove victus atque interfectus est, a vispillonibus ad sepulturam delatus est (*delatum esse* codd. B. E. Φ), unless indeed the passage of Mnaseas cited by Fabius Planciades Fulgentius is an impudent forgery, which is very possible (F. Skutsch in Pauly—Wissowa *Real-Enc.* vii. 219 f.). Others spoke of Asklepios' fate as his apotheosis and introduced him into Olympos along with Herakles (Apollod. *frag.* 72 (*Frag. hist. Gr.* i. 442 f. Müller) *ap.* Clem. Al. *strom.* 1. 21 p. 68, 1 ff. Stählin = Euseb. *praep. ev.* 10. 12. 19. Loukian. *dial. deor.* 13. 1 f.), or identified him, like Herakles (Hyg. *poet. astr.* 2. 14, schol. Arat. *phaen.* 74, cp. Gruppe *Gr. Myth. Rel.* p. 497 n. 3), with the constellation Ophiouchos (pseudo-Eratosth. *catast.* 6, Hyg. *poet. astr.* 2. 14, schol. Caes. Germ. *Aratea* p. 384, 22 ff. Eyssenhardt, Serv. *in* Verg. *Aen.* ii. 259, Myth. Vat. 3. 10. 6). Be that as it may, Apollon killed the Kyklopes (Hes. *frag.* 47 Flach, 88 Rzach), who had made the fatal bolt for Zeus, or killed their sons (Pherekyde of Leros *ap.* schol. Eur. *Alc.* 1), and for this impiety was bidden by Zeus to serve Admetos (Eur. *Alc.* 1 ff. with schol. *ad loc.*, Apollod. 3. 10. 4, Diod. 6. 8, Prob. *in* Verg. *georg.* 3. 1, Stat. *Theb.* 6. 375 f., Loukian. *de sacrif.* 4, Hyg. *fab.* 49, Serv. *in* Verg. *georg.* 3. 2, *id. in* Verg. *Aen.* 7. 761, Myth. Vat. 1. 46, 2. 43, schol. Lucan. 6. 368, Orph. *Arg.* 175 ff.).

[5] A. Schmidt *Handbuch der griechischen Chronologie* Jena 1888 p. 61 ff.

Daphnephoria[1], a festival likewise held every eighth year. Yet, if Apollon settled at Delphoi in days when the octennial cycle was in vogue, we must not therefore jump to the conclusion that he had staked out his claim before the arrival of Dionysos. For, though the Stepterion included a mimetic representation of Apollon's fight with Python, the Heroïs and the Charila were distinctly Dionysiac: the former resembled the ascent of Semele and was explained by a mystic tale known to the Thyiads; the latter assigned important duties to the principal Thyiad[2]. The fact is that the *oktaeterís* was an ancient rectification of the calendar, which left its mark on a variety of customs and myths[3]. It was never the exclusive property of any one god or goddess, and at Delphoi it was common to the rites of Apollon and Dionysos. Fortunately for our solution of the problem we can appeal from the early *oktaeterís* to the still earlier *trieterís*[4]. Delphoi was in classical times the centre of certain far-famed trieteric rites[5]; and these were notoriously the rites, not of Apollon, but of Dionysos[6]. Unless, therefore, we hold—in defiance of the Greek and Roman chronologists[7]—that the *trieterís* was no

[1] I have dealt in detail with the Daphnephoria in *Folk-Lore* 1904 xv. 409 ff. See also Boetticher *Baumkultus* p. 385 ff., P. Paris in Daremberg—Saglio *Dict. Ant.* ii. 24 ff., P. Stengel in Pauly—Wissowa *Real-Enc.* iv. 2140, O. Jessen *ib.* iv. 2140 f., Nilsson *Gr. Feste* p. 164 f., Farnell *Cults of Gk. States* iv. 284 ff., Frazer *Pausanias* v. 41 ff., *id. Golden Bough*[3]: The Magic Art ii. 63 n. 2, The Dying God pp. 78 f., 88 f., Adonis Attis Osiris[3] ii. 241. Sir J. G. Frazer (The Dying God p. 79) contends that at Thebes 'in historical times Apollo appears to have ousted Cadmus from the festival,' and thinks it 'not impossible that at Delphi also...Apollo may have displaced an old local hero in the honourable office of dragon-slayer.'

[3] *Supra* i. 692. See further A. Schmidt *Handbuch der griechischen Chronologie* Jena 1888 p. 56 ff. (with the *caveat* of W. H. Roscher *Die enneadischen und hebdomadischen Fristen und Wochen der ältesten Griechen* (*Abh. d. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1903 xxi. 4) Leipzig 1903 p. 73 n. 204[b]), F. K. Ginzel *Handbuch der mathematischen und technischen Chronologie* Leipzig 1911 ii. 365 ff., Gruppe *Gr. Myth. Rel.* p. 957 n. 1.

[4] *Supra* i. 690. The historical priority of the *trieterís* is accepted also by A. Schmidt *Handbuch der griechischen Chronologie* Jena 1888 p. 31 ff., G. F. Unger *Zeitrechnung der Griechen und Römer*[2] (in I. von Müller *Handbuch der klassischen Altertums-wissenschaft* i[2]) München 1892 p. 731 f., G. F. Schoemann *Griechische Alterthümer*[4] Berlin 1902 ii. 460 n. 2, Gruppe *Gr. Myth. Rel.* p. 955 f. It is too summarily rejected by M. P. Nilsson *Primitive Time-reckoning* Lund 1920 p. 1.

[5] Gruppe *Gr. Myth. Rel.* p. 956 n. 2.

[6] The myth and the rites in question are well put together by L. Weniger in the *Archiv f. Rel.* 1906 ix. 231 ff. Cp. M. Ross *De Baccho Delphico* Bonnae 1865 p. 2 ff.

[7] Gemin. *elem. astr.* 8. 25 f. οἱ δὲ Ἕλληνες τὴν ἐναντίαν γνώμην ἔχοντες τοὺς μὲν ἐνιαυτοὺς καθ' ἥλιον ἄγουσι, τοὺς δὲ μῆνας καὶ τὰς ἡμέρας κατὰ σελήνην. οἱ μὲν οὖν ἀρχαῖοι τοὺς μῆνας τριακονθημέρους ἦγον, τοὺς δὲ ἐμβολίμους παρ' ἐνιαυτόν. ταχέως δ' ἐπὶ (sic V[1]. δ' ὑπὸ V[2]. V. δὲ ὑπὸ edd.) τοῦ φαινομένου ἐλεγχομένης τῆς ἀληθείας διὰ τὸ τὰς ἡμέρας καὶ τοὺς μῆνας μὴ συμφωνεῖν τῇ σελήνῃ, τοὺς δὲ (δ' V[1]. edd.) ἐνιαυτοὺς μὴ στοιχεῖν (στιχεῖν V[1].) τῷ ἡλίῳ,

true precursor of the *oktaeterís*[1], we are bound to admit that at Delphoi the cult of Dionysos was regulated by a more primitive calendar than the cult of Apollon; and it becomes at least reasonable[2] to suppose that Dionysos was first in the field.

(χ) Dionysos displaced by Apollon at Delphoi.

With the advent of Apollon Dionysos suffered a partial, but never a total, eclipse. In addition to his winter season he was invoked by Philodamos, the Locrian author of a Delphic *paián* (335—334 B.C.), to come 'in the holy time of spring[3],' and even in the summer month Apellaios he received (*c.* 400 B.C.) a sacrifice

[δθεν] (del. C. Manitius. Petavius cj. *ἐντεῦθεν. et quia invenichant illud diversum veritati...*, *quaesiverunt aliquid, quo* versio Latina ex Arabico sermone conversa *s.* xii) *ἐζήτουν περίοδον, ἥτις κατὰ μὲν τοὺς ἐνιαυτοὺς τῷ ἡλίῳ συμφωνήσει, κατὰ δὲ τοὺς μῆνας καὶ τὰς ἡμέρας τῇ σελήνῃ, κ.τ.λ.*, Censorin. *de die nat.* 18. 2 veteres in Graecia civitates cum animadverterent, dum sol annuo cursu orbem suum circunit, lunam novam interdum tridecies (*terdecies* vulg.) exoriri idque saepe alternis fieri, arbitrati sunt lunares duodecim menses et dimidiatum ad annum naturalem convenire. itaque annos civiles sic statuerunt, ut intercalando facerent alternos duodecim mensium, alternos tredecim, utrumque annum separatim vertentem, iunctos ambo annum magnum vocantes. idque tempus trieterida appellabant, quod tertio quoque anno intercalabatur, quamvis biennii circuitus et re vera dieteris esset; unde mysteria, quae Libero (*Libero patri* vulg.) alternis fiunt annis, trieterica a poetis dicuntur. See further Hdt. 1. 32, 2. 4.

[1] So F. K. Ginzel *Handbuch der mathematischen und technischen Chronologie* Das Zeitrechnungswesen der Völker Leipzig 1911 ii. 370 ff. He points out that, since the solar year contains 365·2422 days and the lunar year 354·3671 days, a cycle of two years containing 360 and 390 days would give no sort of approximation to natural fact. He rightly infers that we must understand Geminos' *μῆνας τριακονθημέρους* as a popular expression denoting the ordinary Greek month. But, if so, twelve months of alternately 30 and 29 days followed by thirteen months of alternately 30 and 29 days produce a cycle of 354+384=738 days. This exceeds two solar years by about 7½ days—an excess which in the course of four such cyles would amount to another month. The *trieterís*, in fact, would naturally and inevitably lead on to the *oktaeterís*.

[2] Not, of course, necessary. It remains possible to argue that the more primitive cult was introduced at a later date from a less civilised region.

[3] H. Weil in the *Bull. Corr. Hell.* 1895 xix. 393 ff., cp. W. Christ *Geschichte der griechischen Litteratur*[5] München 1911 ii. 1. 114. The *paián* was inscribed in the archonship of Etymondas, the date of which I give after H. Pomtow in Pauly—Wissowa *Real-Enc.* iv. 2589 f., 2697. Weil reconstructs the opening lines thus: [Δεῦρ', ἄνα Δ]ιθύραμβε Βάκχ' | ε[ῦτε, θυρσῆ]ρες, βραϊ·]τά, βρόμι(ε), ἠρινα[ῖς ἰκοῦ | ταῖσδ(ε)] ἱεραῖς ἐν ὥραις: | Εὐοῖ ὦ ἰὸ [Βάκχ' ὦ ἰὲ Παιά]ν· | *κ.τ.λ.*, supposing an allusion to the spring festival Theoxenia, and suggesting that *βραϊτάς=ϝραϊτάς=ῥαϊτῆς* (*ῥαίω*, 'I strike'), cp. *supra* i. 469 n. 4, 659 f., 711 Dionysos Ἀνθρωπορραίστης. Miss J. E. Harrison in the *Class. Rev.* 1902 xvi. 332 and in her *Proleg. Gk. Rel.*[2] p. 416 f. argued that the epithet is connected with the late Latin *braisum* (Ducange *Gloss. med. et inf. Lat. s.vv.* brace, braesium, braisum), 'grain prepared for making beer.' But in the *Class. Rev.* 1910 xxiv. 245 she follows W. Vollgraff, who in *Mnemosyne* N. S. 1905 xxxiii. 379 proposed *κισσο]χαΐ]τα*. H. van Herwerden *Lexicon Graecum suppletorium et dialecticum*[2] Lugduni Batavorum i. 289 observes: 'e Guil. Vollgraffio, qui lapidem vidit, audivi se pro certo tantum agnovisse AITA, sed antecedentem litteram sibi videri fuisse X, itaque latere compositum, velut *κισσόχαιτα*.' Thus two ingenious guesses lose their *raison d'être*.

from the Labyadai[1]. These commemorations are of interest. The first implies that at Delphoi, as at Athens, Dionysos had spring-rites as well as winter-rites[2]. The second implies that in Apellaios, the opening month of the Delphic year, he was not forgotten by an ancient Delphic phratry, a phratry which in the following month paid a like compliment to Zeus *Patrôios*[3].

This process of mutual accommodation tended to produce a certain similarity in the parties concerned. Dionysos became to some extent Apolline, Apollon to some extent Dionysiac. On the one hand Dionysos was equipped with bay-wreath[4] and lyre[5]; on

[1] T. Homolle in the *Bull. Corr. Hell.* 1895 xix. 5 ff *D* 43 ff. = J. Baunack in Collitz—Bechtel *Gr. Dial.-Inschr.* ii. 718 ff. no. 2561 D 43 ff. = Michel *Recueil d'Inscr. gr.* no. 995 *D* 43 ff. = Dittenberger *Syll. inscr. Gr.*[2] no. 438 *d* 208 ff. = J. v. Prott and L. [2] The vernal rites of Dionysos at Delphoi (? the Theoxenia in Theoxenios = Elaphebolion) corresponded with the City Dionysia at Athens; the brumal rites of Dionysos at Delphoi (culminating in Amalios = Gamelion) corresponded with the Lenaia at Athens. See *supra* i. 691 fig. 511 and ii. 235 fig. 162.

[3] *Supra* p. 233.

[4] An epic hymn, perhaps of *s.* v B.C. (L. Malten in the *Archiv f. Rel.* 1909 xii. 307 n. 3, R. Wünsch in Pauly—Wissowa *Real-Enc.* ix. 156), describes Dionysos as *κισσῷ καὶ δάφνῃ πεπυκασμένος* (*h. Dion.* 26. 9). At Phigaleia the lower part of the cult-statue of Dionysos *Ἀκρατοφόρος* was covered with leaves of bay and ivy (Paus. 8. 39. 6), possibly to conceal an erect *phallós* (G. Kaibel in the *Nachr. d. kön. Gesellsch. d. Wiss. Göttingen* Phil.-hist. Classe 1901 p. 510, Gruppe *Gr. Myth. Rel.* p. 1422 n. 8); if so, we may conjecture that a late moralistic intention had been read into an early fertility-charm (cp. Paus. 1. 27. 1). Tert. *de cor. mil.* 7 Liberum, eundem apud Aegyptios Osirin, Harpocration industria hederatum argumentatur, quod hederae natura sit cerebrum ab eluco defensare. sed et alias Liberum principem coronae plane laureae, in qua ex Indis triumphavit, etiam vulgus agnoscit, cum dies in illum sollemnes Magnam appellat Coronam, *ib.* 12 sed et de corona prius dicam. laurea ista Apollini vel Libero sacra est, illi ut deo telorum, huic ut deo triumphorum. sic docet Claudius, etc. Interp. Serv. *in* Verg. *ecl.* 8. 12 alii ideo lauri et hederae simul mentionem factam accipiunt, quoniam Apollo carminum deus, idem Liber pater putatur. See also F. Lenormant in the *Gaz. Arch.* 1876 ii. 103 f. and in Daremberg—Saglio *Dict. Ant.* i. 618, 623. On an Attic *kratér* at Naples (Heydemann *Vasensamml. Neapel* p. 292 ff. no. 2419, Inghirami *Vas. fitt.* iv. 23 ff. pl. 317 f., T. Panofka *Dionysos und die Thyaden* Berlin 1853 pp. 2 ff., 49 pl. 1, 1 and 1[a] (extr. from the *Abh. d. berl. Akad. 1852* Phil.-hist. Classe p. 341 ff.), A. Rapp in Roscher *Lex. Myth.* ii. 2266 ff. fig. 6 after the *Real Museo Borbonico* Napoli 1839 xii pl. 22, and above all Furtwängler—Reichhold *Gr. Vasenmalerei* i. 193 ff. pl. 36 f.) a post dressed up as Dionysos is decked with ivy-sprays, but has sprigs of bay starting from its base and a bay-wreath apparently slung from its girdle: the wreath is probably meant for an embroidered pattern and as such occurs on a variety of late Attic vases mostly connected with the style of the potter Meidias (A. Milchhöfer 'Zur jüngeren attischen Vasenmalerei' in the *Jahrb. d. kais. deutsch. arch. Inst.* 1894 ix. 63 f., G. Nicole *Meidias et le style fleuri dans la céramique attique* Geneva 1908 p. 109 f.), *e.g. supra* i pl. xi; it seems likely, however, that such 'Gürtelkränze' were credited with a magical influence over the generative organs beneath them. The horned Dionysos of Libye (?) holds a bay-branch on an Apulian *kratér* discussed *supra* i. 374 ff. fig. 287. A red-figured vase

in the second Hamilton collection shows Dionysos seated with Ariadne, while a young Satyr stands before them: all three are wreathed with bay; Dionysos has a bay-garland slung round his body, Ariadne a bay-branch behind her chair; both sit beneath festoons of bay (Tischbein *Hamilton Vases* ii. 78 f. pl. 45, Reinach *Rép. Vases* ii. 302, 4). Dionysos appears elsewhere wreathed with bay, *e.g.* on a red-figured vase in the first Hamilton collection ([P. F. Hugues, dit d'Hancarville] *Antiquités étrusques, grecques et romaines* Naples 1766 i pl. 104), in a wall-painting (*Monumenti amaranziani* illustrati del marchese Luigi Biondi Roma 1849 pl. 29), and on coins of Pantikapaion, Phanagoreia, and Gorgippeia struck under Mithradates vi Eupator, who himself took the title of Dionysos (E. H. Minns *Scythians and Greeks* Cambridge 1913 p. 629 pl. 6, 8 f., pl. 9, 16 f., 23 f.; T. Reinach *Mithridate Eupator* Paris 1890 pp. 49, 262, 277). Another red-figured vase in the first Hamilton collection represents the infant Dionysos held by a Nymph seated on a rock: before her stands Hermes, behind her a second Nymph, who carries a sprig of bay for the child's brows (Inghirami *Vas. fitt.* ii. 133 pl. 194); cp. the Nymph (?) seated on a rock, who wreathes the infant Dionysos in a wall-painting from the Villa Farnesina (W. Helbig *Führer durch die öffentlichen Sammlungen klassischer Altertümer in Rom*[3] Leipzig 1913 ii. 207 f. no. 1477, A. Mau in the *Ann. d. Inst.* 1885 lvii. 310 f., *Mon. d. Inst.* xii pls. 18 (coloured) and 20, G. Rodenwaldt *Die Komposition der pompejanischen Wandgemälde* Berlin 1909 p. 38). An ivory relief at Milan makes a Maenad hold a bay-wreath towards young Dionysos riding in a car drawn by two panthers (E. Gerhard in the *Arch. Zeit.* 1846 iv. 219 pl. 38, *supra* i. 153 n. 5). See further L. Stephani in the *Compte-rendu St. Pét.* 1861 p. 59 n. 2.

[5] The evidence cited by F. Lenormant in Daremberg—Saglio *Dict. Ant.* i. 618 n. 931 f. is illusive. But better grounds are given by Farnell *Cults of Gk. States* v. 253—256. A red-figured *kýlix* attributed to Brygos, now in the Cabinet des Médailles at Paris (no. 697, published by P. Hartwig *Die griechischen Meisterschalen* Stuttgart und Berlin 1893 p. 309 ff. pls. 32, 33, 1, J. E. Harrison—D. S. MacColl *Greek Vase Paintings* London 1894 p. 25 pl. 38, Farnell *op. cit.* v. 264 pl. 44), has for its inner design an ivy-wreathed Dionysos playing the lyre and singing an orgiastic song as he stands between two Satyrs, who with a flourish of vine-shoots and castanets share in the ecstasy of his performance. A red-figured *kratér* from Ruvo, now at Naples (no. 3240, *supra* i. 701 n. 4), shows Dionysos and Ariadne advancing in the midst of their *thíasos*, all wreathed with ivy; he carries a tortoise-shell lyre. Another famous vase from Ruvo, the Apulian *kratér* representing the obsequies of Archemoros (Heydemann *Vasensamml. Neapel* p. 584 ff. no. 3255, E. Gerhard 'Archemoros und die Hesperiden' in the *Abh. d. berl. Akad. 1836* Phil.-hist. Classe pp. 251 ff., 359 ff. pls. 1—4 (=*id. Gesammelte akademische Abhandlungen* Berlin 1866 i. 1—98 pls. 1—4) and also in the *Nouv. Ann.* 1836 i. 352—356 with pls. 5 f., *id. Il vaso dall' Archemoro* Roma 1837 pp. 1—4 pls. 1—3, Inghirami *Vas. fitt.* iv. 98 ff. pls. 371—373, Overbeck *Gall. her. Bildw.* i. 114 ff. Atlas pl. 4, 3, *supra* i. 456 n. 5), includes in the top left-hand corner of its principal face the figure of Dionysos reclining on cushions and a skin spread over vine-leaves beneath a vine-branch: he holds in his left hand a lyre, in his right a *phiále*, which a young Satyr is about to fill; below him stands Euneos, eponym of the Euneidai, an Athenian clan of κιθαρῳδοί or κιθαρισταί (Harpokr. *s.v.* Εὐνείδαι, Hesych. *s.v.* Εὐνείδαι, cp. Phot. *lex.* s.v. Εὐνείδαι, *et. mag.* p. 393, 35 ff., Eustath. *in Il.* p. 1327, 41 f.), who appear to have been hereditary priests of Dionysos Μελπόμενος (*Corp. inscr. Att.* iii. 1 no. 274 an inscription of the Hadrianic age on a seat in the theatre at Athens ἱερέως | Μελπομένου | Διονύσου | ἐξ Εὐνειδῶν). It is therefore a reasonable suggestion (Gerhard *Ant. Bildw.* p. 240) that Dionysos Μελπόμενος (on whom see Welcker *Gr. Götterl.* ii. 611, iii. 153, *id. Alt. Denkm.* iii. 130 f., Preller—Robert *Gr. Myth.* i. 675 n. 4, 710 f., O. Höfer in Roscher *Lex. Myth.* ii. 2649 f., Gruppe *Gr. Myth. Rel.* pp. 36, 829 n. 3, 1421 n. 2, 1428 n. 10, Farnell *Cults of Gk. States* v. 143, 254 f., 307) was conceived as a lyre-player. The marble statue of a seated Dionysos from the choragic monument dedicated by Thrasyllos in 320 B.C. and reconstructed by his son Thrasykles in 270 B.C. probably represented the god with a lyre, the base of which rested on his left thigh (*Brit. Mus. Cat. Sculpture* i. 257 ff. no. 432,

the other, Apollon had ivy-leaves[1], flutes[2], and pan-pipes[3]. Appel: Brunn—Bruckmann *Denkm. der gr. und röm. Sculpt.* pl. 119, Overbeck *Gr. Plastik*[4] ii. 124 f., 138, Collignon *Hist. de la Sculpt. gr.* ii. 459 f. fig. 240). A red-figured *kratér* from Campania, now at Petrograd, has a lyre-playing Dionysos grouped with two Maenads and a Satyr (Stephani *Vasensamml. St. Petersburg* ii. 293 f. no. 1774). And an Apulian *kántharos* at Boston shows him seated beneath a grape-vine, *thýrsos* in hand; on the ground at his left is a lyre, at his right a pair of pipes (Robinson *Cat. Vases Boston* p. 186 f. no. 515). Less conclusive is a red-figured *kratér* in the Cabinet des Médailles at Paris (no. 4778), which shows an ivy-crowned Dionysos seated on a rock, playing a lyre, with Maenads and Satyrs grouped about him (Reinach *Vases Ant.* p. 73 pl. 53; but Lenormant—de Witte *Él. mon. cér.* ii. 213 ff. pl. 71 interpret the scene as '*Apollon* à Nysa' cp. Diod. 3. 59, Overbeck *Gr. Kunstmyth.* Apollon pp. 325, 330 no. 28). The *motif* of Dionysos with the lyre, which is not found in art before the beginning of *s.* v B.C., seems not to occur at all in literature; for in Kallistr. 8. 4 *εἰστήκει δὲ* (*sc.* ὁ Διόνυσος) *τὴν λύραν ἐπερείδων τῷ θύρσῳ* Jacobs, followed by K. Schenkl and E. Reisch, cj. λαιάν and Pierson cj. *πλευράν*.

[1] Aristoteles *theologumena* (=Aristot. *frag.* 284 (*Frag. hist. Gr.* ii. 190 Müller)) *ap.* Macrob. *Sat.* 1. 18. 2 apud Lacedaemonios etiam in sacris quae Apollini celebrant (celebrabant B. G.), Hyacinthia vocantes, hedera coronantur Bacchico ritu. On this festival see Nilsson *Gr. Feste* p. 129 ff., Farnell *Cults of Gk. States* iv. 125 ff., 264 ff., P. Stengel in Pauly—Wissowa *Real-Enc.* ix. 1 f., E. Bischoff *ib.* ix. 3 f., S. Eitrem *ib.* ix. 7 ff. Mart. Cap. 10 item eum (*sc.* Apollinem) in Helicona Delon Lyciamque sectantur. sed alibi lauros primores (primos D.) arentesque ederas alibi cariantem (carientem D.) tripodem crepidasque situ murcidas (marcidas D.) praesagiorumque interlitam memoriam reppererunt. *H. mag.* 2. 27 (Abel *Orphica* p. 288) *δεῦρο, τάχος δ' ἐπὶ γαῖαν, ὑμέ, κισσεοχαῖτα* (so E. Abel for *κισσεοχαίτα* pap.): with this description of Apollon cp. that of Dionysos in Pratinas *frag.* 1. 17 Bergk[4] *ap.* Athen. 617 F *κισσοχαῖτ'* (leg. *κισσοχαῖτ'* T. Bergk and E. Hiller print *κισσόχαιτ'* after J. Schweighaeuser) *ἄναξ, ἄκουε τὰν ἐμὰν Δώριον χορείαν*, in Ekphantides *fab. inc. frag.* 2 (*Frag. com. Gr.* ii. 13 Meineke) quoted by Kratinos *fab. inc. frag.* 52 (*Frag. com. Gr.* ii. 194 f. Meineke) and thence by Hephaistion *ench.* 15. 21 *εὖε κισσοχαῖτ' ἄναξ, χαῖρ'*, and perhaps in the *paián* of Philodamos (*supra* p. 243 n. 3), also *h. Dion.* 26. 1 *κισσοκόμην Διόνυσον, Inscr. Gr. ins.* vii no. 80 (Arkesine) *Ἀγαθῖνος Ἀγαθίνου τοῦ* Κλεοφά[*ντου*] | *Διονύσῳ κισσοκόμαι καὶ τῶι* [*Δήμωι*], where *κισσοκόμας* with its non-Ionic termination is, as Wilamowitz *ad loc.* saw, a tag from some lyrical poet, *Anth. Pal.* 6. 56. 1 (Makedonios of Thessalonike) *κισσοκόμαν Βρομίῳ Σάτυρον κ.τ.λ.*, where O. Höfer in Roscher *Lex. Myth.* ii. 1207 needlessly supposes a Satyr-name Κισσοκόμης and it is at least a question whether we should not read *κισσοκόμᾳ* with the *ed. princeps* (*Florentina a.* 1494) of Planoudes. At Voni, N.E. of Nikosia in Kypros, is the sanctuary of a god, who is called Apollon by inscriptions (M. Ohnefalsch-Richter in the *Ath. Mitth.* 1884 ix. 135 ff. nos. 1—6, J. L. Myres and M. Ohnefalsch-Richter *A Catalogue of the Cyprus Museum* Oxford 1899 p. 148 nos. 5143—5145) but has the attributes of Zeus, *viz.* eagle (*ib.* p. 145 no. 5048 f.) or Nike (*ib.* p. 146 no. 5050): I figure nos. 5048 and 5050 after Ohnefalsch-Richter *Kypros* pp. 266, 330, 376 pl. 40, 1 f. and 4 f., cp. *id.* in the *Ath. Mitth.* 1884 ix. 133 f. no. 10 f. pl. 5, 6 f.; fig. 164 is a limestone statue (height 1·16^{m}) of Apollon wreathed with bay, resting his left arm on a round column with a debased Doric capital and holding a cylindrical object (scroll?) in his left hand, while an eagle perched on his wrist looks up at him; fig. 165 is a similar statue (height 1·95^{m}), of which the left arm rests on a Doric column, the left hand holds a Nike, the right hand a palm-branch—the pose being reproduced in fig. 166 (after *Kypros locc. citt.* pl. 40, 3, cp. *Ath. Mitth.* 1884 ix. 134 f. pl. 5, 8, *Catalogue* p. 145 no. 5037)=a similar statue (height 2·0^{m}) of a votary holding the same lustral branch. An irregular block of limestone found in this precinct records in lettering of *s.* ii (?) B.C. a series of sacrifices (to Apollon?) performed by certain *thíasoi* including ὁ *θίασος τῶ*[*ν*] | Κισσά*ω*[*ν*], which has been taken to mean 'the ivy-men' (M. Ohnefalsch-Richter in the *Ath. Mitth.* 1884 ix. 137 f. no. 8, *id. Kypros* pp. 5 no. 9,

124, 254 n.*, J. L. Myres and M. Ohnefalsch-Richter *A Catalogue of the Cyprus Museum* Oxford 1899 p. 148 no. 5147, Gruppe *Gr. Myth. Rel.* p. 1246 n. 6). The interpretation is precarious, though no doubt ivy-wreaths played their part in Cypriote cult—witness *e.g.* a bearded head of *c.* 450 B.C., at New York, wearing a wreath of bay-leaves above and ivy-leaves with their berries below (J. L. Myres *The Metropolitan Museum of Art: Handbook of the Cesnola Collection of Antiquities from Cyprus* New York 1914 p. 204 no. 1291 fig., L. P. di Cesnola *A descriptive Atlas of the Cesnola Collection of Cypriote Antiquities in the Metropolitan Museum of Art, New York* Boston [Mass.] 1885 i pl. 82 no. 539). Should the Cypriote *κίτταρις* (Hesych. *κίτταρις· διάδημα δ φοροῦσι Κύπριοι. οἱ δὲ τὰ διαδήματα φοροῦντες κίτταροι λέγονται*) be referred to *κίσσαρος*, which Hippokrates

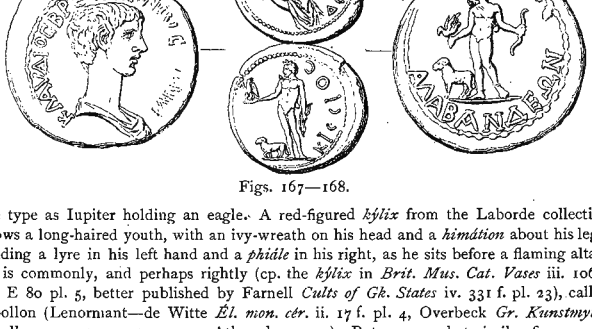
Fig. 164.

Fig. 166.

Fig. 165.

used in the sense of *κισσός* (Erotian. *τῶν παρ' Ἱπποκράτει λέξεων συναγωγή* p. 83, 15 Klein *κίσσαρον· τὸν κισσόν* (so all the MSS. A. Foes cj. *κύσσαρον· τὸν κυσόν*)), and so be rendered 'ivy-crown'? Another Zeus-like Apollon, more certainly connected with ivy, is found on a *quasi*-autonomous copper of Alabanda in Karia (J. Friedlaender in the *Zeitschr. f. Num.* 1881 viii. 9 pl. 2, 5 = my fig. 167, J. Rendel Harris *The Origin of the Cult of Apollo* (reprinted from *The Bulletin of the John Rylands Library* January—March 1916) p. 15 f. fig. 1): obv. ΑΛΑΒΑΝ ΔΕΩΝ youthful head of Dionysos to right, wreathed with ivy; rev. KICCIOC Apollon standing, nude, with wreathed head, quiver on back, bow in lowered left hand, looking towards eagle on outstretched right hand, and a small ram at his feet. A similar reverse occurs on coppers of the same town struck

under Britannicus (Mionnet *Desc. de méd. ant.* Suppl. vi. 439 no. 24 after A. Visconti *Medaglie antiche inedite* Roma 1810 pl. 3, 5, J. Friedlaender *loc. cit.* pl. 2, 4=my fig. 168) and Maximus (Mionnet *Descr. de méd. ant.* iii. 310 no. 41 after J. Eckhel *Catalogus Musei Caesarei Vindobonensis numorum veterum* Vindobonae 1779 i. 177): obv. ΚΛΑΥΔΙΟCΒΡΕΤΑΝΝ[ΙΚΟ]C[ΚΑΙCΑΡ] head of Britannicus to right, or Γ·ΙΟΥ·ΟΥΗ·ΜΑΖΙΜΟC·Κ· head of Maximus to right; rev. ΑΛΑΒΑΝΔΕΩΝ Apollon standing, nude, quiver on back, bow in outstretched left hand, looking towards eagle on outstretched right hand, and a small ram at his feet. With regard to these types, Dr Rendel Harris *loc. cit.* notes that the head on the obverse of the first coin might be, not Dionysos, but 'a variant of Apollo'; others, reading ΚΙCCΕΟC on the reverse of the same coin, have taken the god there figured to be, not Apollon, but Dionysos (D. Sestini *Lettere e Dissertazioni numismatiche...Le quali servir possono di continuazione ai nove tomi già editi* Firenze 1819 vi. 30 f. no. 8, Mionnet *Descr. de méd. ant.* Suppl. vi. 436 no. 11, A. Fabretti *Regio Museo di Torino. Monete Greche* Torino 1883 p. 292 no. 4199, H. Heydemann *Satyr- und Bakchennamen* (*Winckelmannsfest-Progr. Halle* 1880) p. 37; D. Sestini *loc. cit.* p. 31 suggests that the bird may be a jay (*κίσσα*), J. Friedlaender *loc. cit.* makes it a raven, as does Head *Hist. num.*[2] p. 607, but unbiased inspection shows that it is almost certainly an eagle—a fact which led J. Eckhel *loc. cit.*, Rasche *Lex. Num.* i. 267 f., and Mionnet *Descr. de méd. ant.* iii. 310 no. 41 to describe



Figs. 167—168.

the type as Iupiter holding an eagle. A red-figured *kýlix* from the Laborde collection shows a long-haired youth, with an ivy-wreath on his head and a *himátion* about his legs, holding a lyre in his left hand and a *phiále* in his right, as he sits before a flaming altar: he is commonly, and perhaps rightly (cp. the *kýlix* in *Brit. Mus. Cat. Vases* iii. 106 f. no. E 80 pl. 5, better published by Farnell *Cults of Gk. States* iv. 331 f. pl. 23), called Apollon (Lenormant—de Witte *Él. mon. cér.* ii. 17 f. pl. 4, Overbeck *Gr. Kunstmyth.* Apollon p. 325 no. 27, p. 330 Atlas pl. 21, 20). But a somewhat similar figure on a red-figured *kratér* in the Cabinet des Médailles is more probably to be identified with Dionysos on account of his *entourage* (*supra* p. 246 n. 0). Lastly, a wall-painting from Herculaneum, now at Naples, has Apollon wreathed with ivy and half-draped in a *himátion*, with lyre beneath left hand, *plêktron* in right, sitting on a stool beside a female figure (Muse?), who is similarly wreathed and holds a garland of bay; the group forms part of a scene depicting the punishment of Marsyas (Helbig *Wandgem. Camp.* p. 64 no. 231[b], *Antichità di Ercolano* Napoli 1760 ii (Pitture ii) p. 121 ff. pl. 19, *Real Museo Borbonico* Napoli 1832 viii pl. 19 ivy not clear, W. Ternite *Wandgemälde aus Pompeji und Herculanum*...mit einem erläuternden Text von C. O. Müller Berlin s.a. i. 5 f. pl. 7 ivy quite clear and noted as 'eine seltne Bekränzung des Gottes' in the commentary, Müller—Wieseler *Denkm. d. alt. Kunst* i. 34 pl. 43, 204 ivy clear, Overbeck *Gr. Kunstmyth.* Apollon p. 344 no. 32, p. 348 Atlas pl. 25, 13 rightly assuming a seated statue of Apollon as prototype).

[2] Plout. *de mus.* 14 οὐ μόνη δὲ κιθάρα Ἀπόλλωνος, ἀλλὰ καὶ αὐλητικῆς καὶ κιθαριστικῆς εὑρετὴς ὁ θεός. δῆλον δὲ ἐκ τῶν χορῶν καὶ τῶν θυσιῶν ἃς προσῆγον μετὰ αὐλῶν τῷ θεῷ, καθάπερ ἄλλοι τε καὶ Ἀλκαῖος ἔν τινι τῶν ὕμνων (Alkaios *frag.* 3 Bergk[4]) ἱστορεῖ. καὶ ἡ ἐν Δήλῳ δὲ τοῦ ἀγάλματος αὐτοῦ ἀφίδρυσις ἔχει ἐν μὲν τῇ δεξιᾷ τόξον ἐν δὲ τῇ ἀριστερᾷ Χάριτας, τῶν τῆς μουσικῆς ὀργάνων ἑκάστην τι ἔχουσαν· ἡ μὲν γὰρ λύραν κρατεῖ, ἡ δὲ αὐλούς, ἡ δ' ἐν μέσῳ προκειμένην ἔχει τῷ στόματι σύριγγα (*supra* p. 232 n. 0). ὅτι δ' οὗτος οὐκ ἐμὸς ὁ λόγος Ἀντικλῆς (H. Valesius restored Ἀντικλείδης (*frag.* 5 in *Script. hist. Alex. Mag.* p. 147 Müller)) καὶ Ἴστρος ἐν ταῖς Ἐπιφανείαις (Istr. *frag.* 35 (*Frag. hist. Gr.* i. 423 Müller)) περὶ τούτων ἀφηγήσαντο· οὕτω δὲ παλαιὸν ἐστι τὸ ἀφίδρυμα τοῦτο ὥστε τοὺς ἐργασαμένους αὐτὸ τῶν καθ' Ἡρακλέα Μερόπων φασὶν εἶναι. ἀλλὰ μὴν καὶ τῷ κατακομίζοντι παιδὶ τὴν Τεμπικὴν δάφνην εἰς Δελφοὺς παρομαρτεῖ αὐλητής· καὶ τὰ ἐξ Ὑπερβορέων δὲ ἱερὰ μετὰ αὐλῶν καὶ συρίγγων καὶ κιθάρας εἰς τὴν Δῆλόν φασι τὸ παλαιὸν στέλλεσθαι. ἄλλοι δὲ καὶ αὐτὸν τὸν θεὸν φασιν αὐλῆσαι, καθάπερ ἱστορεῖ ὁ ἄριστος μελῶν ποιητὴς Ἀλκμάν (Alkm. *frag.* 102 Bergk[4]). ἡ δὲ Κόριννα καὶ διδαχθῆναί φησι τὸν Ἀπόλλω ὑπ' Ἀθηνᾶς αὐλεῖν (Korinn. *frag.* 29 Bergk[4]), Paus. 5. 7. 10 τούτου δὲ ἕνεκα καὶ τὸ αὔλημα τὸ Πυθικὸν φασι τῷ πηδήματι ἐπεισαχθῆναι τῶν πεντάθλων, ὡς τὸ μὲν ἱερὸν τοῦ Ἀπόλλωνος τὸ αὔλημα ὄν, τὸν Ἀπόλλωνα δὲ ἀγῶνα νικᾶς. On Apollon's match with the flautist Marsyas see O. Jessen in Roscher *Lex. Myth.* ii. 2441 ff., *supra* i. 128 f. pl. xii. *Quasi*-autonomous and imperial coppers of Magnesia ad Maeandrum give the title Αὐλαείτης or Αὐλαΐτης or Αὐλίτης or Αὐλητής to the lyre-playing Apollon (Mionnet *Descr. de méd. ant.* Suppl. vi. 235 f. nos. 1024 ΑΥΛΗΤΟΥ, 1025 ΑΥΛΑΙΤΗϹ, 1026 ΑΥΛΑΙΤΟΥ, *Brit. Mus. Cat. Coins* Ionia p. 164 nos. 49 ΑΥΛΑΙΤΗ[Ϲ ΜΑΓΝΗΤΩΝ], 50 f. ΑΥΛΑΙΤΗϹ, *Hunter Cat. Coins* ii. 348 nos. 11 f. ΑΥΛΑΙΤΗϹ – – –; Imhoof-Blumer *Kleinas. Münzen* i. 79 no. 25 pl. 3, 3 ΑVΛΑЄΙΤΗϹ ΜΑΓΝΗ, cp. Mionnet *op. cit.* Suppl. vi. 238 no. 1039 ΑΥΛΑЄΡΤΗ·ΜΑΓΝΗ·: O. Kern *Die Inschriften von Magnesia am Maeander* Berlin 1900 p. xxv queries Αὐλητής and Αὐλαέρτης). Eckhel *Doctr. num. vet.*[2] ii. 526 remarks: 'Vocabulum ΑΥΛΑΙΤΗϹ esse nomen magistratus, etsi insolens, dubium non videtur. Apollinis cognomen esse nequit; nam etsi quis opinari vellet, scriptum esse ΑΥΛΑΙΤΗϹ pro ΑΥΛΗΤΗϹ, quoniam vocabulum istud *tibicinem* notat, Latonae filio competere nequit, qui tibicen nunquam, citharoedus semper fuit, et citharoedus in hoc ipso numo proponitur. Forte *Aulactes* magistratus propter nominis cum *Aulete* adfinitatem deum aliquem musicum sibi in typum legit, eumque Apollinem Colophonium.' L. Dindorf in Stephanus *Thes. Gr. Ling.* i. 2. 2456 C comments: 'αὐλαΐτης necessario esse ad αὐλαία referendum, nihil vero commune habere cum αὐλοῖς ostendere α interpositum ante terminationem.' U. von Wilamowitz-Moellendorff in the *Gött. Gel. Anz.* 1900 clxii. 572 n. 3 derives the appellation from αὐλή, 'a cave,' citing Paus. 10. 32. 6 ἔστι δὲ καὶ τοῖς ἐπὶ ποταμῷ Ληθαίῳ Μάγνησιν Ὕλαι καλούμενον χωρίον· ἐνταῦθα Ἀπόλλωνι ἀνεῖται σπήλαιον (cp. *ib.* 5), κ.τ.λ., where he emends ὕλαι into Αὐλαί—an emendation printed in the text by F. Spiro (1903) and supported by the fact that Pan had a cave-sanctuary (?) in Arkadia (Ail. *de nat. an.* 11. 6 ἐν Ἀρκαδίᾳ δὲ χώρα ἐστὶν ἱερὸν Πανός· Αὐλὴ τῷ χώρῳ τὸ ὄνομα) and Zeus at *Inönü* in Phrygia (A. Koerte in the *Ath. Mitth.* 1900 xxv. 419 ff. no. 32 a limestone altar inscribed Διὶ ἐξ αὐλῆς ἐ|πηκόῳ θεῶ | οἱ Παπᾶ καὶ Γαίου | κληρονόμοι ὑπὲρ Ἀσ|κληπιάδου τοῦ Δα|μᾶ υἱοῦ εὐχὴν | τήνδε ἀνέστησαν | δόντες καὶ τεμένους | ὑπὲρ αὐτοῦ τῶ θεῶ | καὶ τῇ κώμη ἀττικὰς | ,β καὶ ί | εἵνεκα εἴλωα ἔχιν τὸν | θεόν). Gruppe *Gr. Myth. Rel.* p. 1249 n. 2 refers Αὐλαίτης to the 'anscheinend barbarische Epikleseis' borne by Apollon in various parts of Asia Minor. To me it seems probable that Αὐλαΐτης, Αὐλίτης, Αὐλητής are progressive attempts to read a Greek meaning into a non-Greek title (cp. *supra* i. 18 f., 25, 25 n. 2, 651).

[3] For the pan-pipes as an attribute of one of the Charites held by the Delian Apollon see *supra* pp. 232 n. 0, 249 n. 2, as an instrument used in the rites of the Hyperborean Apollon see *supra* p. 249 n. 2. Theopomp. *frag.* 320 (*Frag. hist. Gr.* i. 330 Müller) *ap.* Hesych. Δοναστάν· τὸν Ἀπόλλωνα. Θεόπομπος has been variously emended. J. Barnes cj. Δονητήν; but Salmasius restored Δονάκταν, which is accepted by M. Schmidt as 'God of the Reed-Pipes,' cp. schol. Pind. *Pyth.* 12. 44.

latives as well as attributes were common to the two: Dionysos was *Mousagétes* in Naxos[1], *Smínthios* (?) in Rhodes[2], *Iatrós*[3] and *Paián*[4] at Delphoi; Apollon was *Thýios* at Miletos[5], *Mýstes* at

[1] Artemid. *oneirocr.* 2. 70 <τὸν> Δαλδιαῖον (so cod. B for ἐν Δαλδίᾳ vulg.) Ἀπόλλωνα, ὃν Μύστην καλοῦμεν ἡμεῖς πατρῴῳ ὀνόματι. A copper of Septimius Severus shows the god in his temple (*Brit. Mus. Cat. Coins* Lydia p. 71 pl. 8, 5 = my fig. 169).

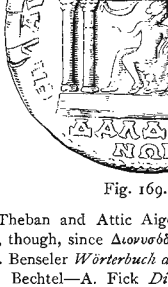

Fig. 169.

[2] Paus. 1. 31. 4 Φλυεῦσι δέ εἰσι...Ἀπόλλωνος Διονυσοδότου καὶ Ἀρτέμιδος Σελασφόρου βωμοὶ Διονύσου τε Ἀνθίου καὶ νυμφῶν Ἰσμηνίδων καὶ Γῆς, ἣν Μεγάλην θεὸν ὀνομάζουσι. The supposed cult-title Διονυσόδοτος (in Paus. 9. 35. 3 καὶ Ἀγγελίων τε καὶ Τεκταῖος †ὅσοι γε Διονύσου† τὸν Ἀπόλλωνα ἐργασάμενοι Δηλίοις κ.τ.λ. T. Bergk ingeniously cj. οἱ τὸν Διονυσόδοτον; but??) has been explained as 'le produit de quelque combinaison savante due aux travaux d'un collège de prêtres établis dans cet endroit' (R. de Tascher in the *Rev. Ét. Gr.* 1891 iv. 8) or attributed to the importation of Apollon Δαφνηφόρος from Thebes by the 'Dionysiac' clan to which the Theban and Attic Aigeidai belonged (E. Maass in the *Gött. Gel. Anz.* 1889 cli. 813 ff.), though, since Διονυσόδοτος is a theophoric name of regular formation (W. Pape—G. E. Benseler *Wörterbuch der griechischen Eigennamen*[3] Braunschweig 1875 i p. xxviii, F. Bechtel—A. Fick *Die Griechischen Personennamen*[2] Göttingen 1894 pp. 102 f., 104 ff., E. Sittig *De Graecorum nominibus theophoris* Halis Saxonum 1911 p. 4 f., W. Fröhner 'Göttergaben' in the *Archiv f. Rel.* 1912 xv. 380 ff., and F. Bechtel *Die historischen Personennamen des Griechischen bis zur Kaiserzeit* Halle a. d. S. 1917 pp. 140 f., 144 ff. give lists of names in -δοτο- and -δωρο-) actually found (Sosibios *frag.* 5 (*Frag. hist. Gr.* ii. 626 Müller) *ap.* Athen. 678 c τοὺς Διονυσοδότου τοῦ Δάκωνος παιᾶνας, Dittenberger *Syll. inscr. Gr.*[2] no. 268, 95 f. Στρόμβιχος| Διονυσοδότου Ἀπολλωνιάτας), it might rather have been inferred that the altar in question was that of a man called Dionysodotos who in the mystic cult of Phlya (on which see especially J. Toepffer *Attische Genealogie* Berlin 1889 pp. 39 f., 208 ff.) played—like Pythagoras (*supra* p. 221 ff.)—the part of Apollon *redivivus*. However, it is far from certain that the title of Apollon was Διονυσόδοτος. It may have been, and probably was, Διονυσοδότης (cp. *e.g.* Zeus Πλουτοδότης *supra* i. 503). As such it is quoted and expounded by Olympiod. *in* Plat. *Phaed.* 67 c p. 111, 14 ff. Norvin ὅτι τὰ ὅμοια μυθεύεται καὶ ἐν τῷ παραδείγματι. ὁ γὰρ Διόνυσος, ὅτε τὸ εἴδωλον ἐνέθηκε τῷ ἐσόπτρῳ, τούτῳ ἐφέσπετο, καὶ οὕτως εἰς τὸ πᾶν ἐμερίσθη. ὁ δὲ Ἀπόλλων συναγείρει τε αὐτὸν καὶ ἀνάγει καθαρτικὸς ὢν θεὸς καὶ τοῦ Διονύσου σωτὴρ ὡς ἀληθῶς, καὶ διὰ τοῦτο Διονυσοδότης ἀνυμνεῖται (ἀνυμνεῖται ex εὐφημεῖται post ∴ ∴ ∴ ∴ in ras. M.), cp. *id. ib.* p. 43, 14 ff. Norvin πῶς δὲ ἄρα οὐ τὰ Ὀρφικὰ ἐκεῖνα παρῳδεῖ νῦν ὁ Πλάτων, ὅτι ὁ Διόνυσος σπαράττεται μὲν ὑπὸ τῶν Τιτάνων, ἀνοῦται δὲ ὑπὸ τοῦ Ἀπόλλωνος; διὸ συναγείρεσθαι καὶ ἀθροίζεσθαι, τουτέστιν ἀπὸ τῆς Τιτανικῆς ζωῆς ἐπὶ τὴν ἑνοειδῆ, Prokl. *in* Plat. *Alcib.* p. 83 = Orph. *frag.* 193 Abel Ὀρφεὺς ἐφίστησι

The fact is, they were gods of very much the same general character, both young male powers intimately related to Father Sky and Mother Earth, both closely connected with vegetation, both famous for their ecstatic and orgiastic rites[1]. Small wonder that fusion and confusion resulted, when one cult had been amalgamated with the other.

The gradual *rapprochement* and ultimate identification of Dionysos with Apollon can be well traced in extant literature. In the sixth century B.C. Pythagoras declared that Apollon was the son of Silenos[2]—a view perpetuated by the pedantic systematisers, who distinguished five Apollons, the fourth being Apollon *Nómios* the son of Silenos, born in Arkadia[3]. In the fifth century B.C. Herodotos learnt from the Egyptians that Apollon (Horos) and Artemis (Boubastis) were children of Dionysos (Osiris) and Demeter (Isis), nursed and preserved by Leto. Accordingly Herodotos charges Aischylos, who alone of the Greek poets had made Artemis a daughter of Demeter, with drawing from the same Egyptian source[4]. Having already detected one Egyptism in a play of Aischylos[5], we shall not straightaway scout the notion of a second. Still, we have not in this case, as we had in that, the support of a definitely Egyptian context. We shall therefore be slow to conclude that Aischylos was really Egyptising. More probably he was in Orphic

τῷ βασιλεῖ Διονύσῳ τὴν μονάδα τὴν Ἀπολλωνιακὴν ἀποτρέπουσαν αὐτὸν τῆς εἰς τὸ Τιτανικὸν πλῆθος προόδου καὶ τῆς ἐξαναστάσεως τοῦ βασιλείου θρόνου καὶ φρουροῦσαν αὐτὸν ἄχραντον ἐν τῇ ἐνώσει. The Orphists were fond of describing Apollon by titles comparable with Διονυσοδότης; in a hymn of but 26 lines they dub him βιοδώτην...ἐλπιδοδώτην...Ζηνοδοτῆρα (Brodaeus cj. ζηλοδοτῆρα)...ξυνοδοτῆρα...πλουτοδοτῆρα...ψυχοδοτῆρα...ὠρεσιδώτην (*h. Ap.* 3, 6, 7, 15, 17, 24, 25 (Abel *Orphica* p. 285))!

[1] L. Stephani in the *Compte-rendu St. Pét.* 1861 p. 57: 'Vor allen anderen Elementen aber, welche im Wesen dieser beiden jugendlich-schönen Söhne des Zeus gleichmässig ausgeprägt sind, macht sich bekanntlich der ekstatische Charakter bemerklich, welcher an ihrem Gefolge nicht weniger, als an ihnen selbst hervortritt,' cp. Strab. 468 οἱ μὲν οὖν Ἕλληνες οἱ πλεῖστοι τῷ Διονύσῳ προσέθεσαν καὶ τῷ Ἀπόλλωνι καὶ τῇ Ἑκάτῃ καὶ ταῖς Μούσαις καὶ Δήμητρι, νὴ Δία (καὶ διί cod. *x*), τὸ ὀργιαστικὸν πᾶν καὶ τὸ βακχικὸν καὶ τὸ χορικὸν καὶ τὸ περὶ τὰς τελετὰς μυστικόν, κ.τ.λ. E. Maass *Orpheus* München 1895 p. 185 notes that in Orph. *Arg.* 9 f. Orpheus was inspired to sing Βάκχοιο καὶ Ἀπόλλωνος ἄνακτος | κέντρῳ ἐλαυνόμενος.

mood[1]. And like enough it was under Orphic influence that he ventured even to equate Apollon with Dionysos, when in an unknown play—perhaps the *Bassarai*—he wrote:

Apollon of the Ivy, he the Bacchant, he the Seer[2].

Similarly Euripides, another poet who had more than a bowing acquaintance with Orphism, in his *Likymnios* penned the following invocation:

Lord who lov'st the Baytree, Paian, Bakchos, Apollon of the Lyre[3].

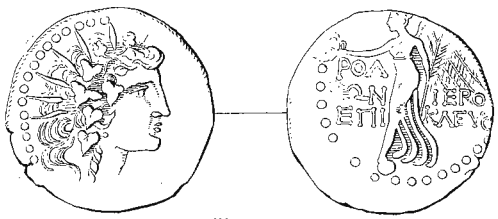

Fig. 170.

Later we get the identification more explicitly stated. In the first century of our era Dion Chrysostomos, addressing the Rhodians, says:

'Yet some maintain that Apollon, Helios, and Dionysos are all one and the same; and that is your own accepted view[4].'

The best commentary on this passage is a series of early imperial coppers, struck in Rhodes, which has for obverse type (fig. 170)[5]

ΚΛΙΣΑΡ · ΑΥΤΟ-ΚΡ[ΑΤΩΡΝΕΡΩ] Ν Head of Nero, laureate and radiate, to right; rev. ΡΟΔΙ ΩΝ Nike on the prow of a ship, holding wreath in right hand, palm in left, with rose before her.

[5] Nero's interest in Rhodes (Suet. *Ner.* 7) and personation of the Rhodian Helios will account for some of his vagaries. Thus his vice-gerent in Italy, 66—68 A.D., was a freedman named Helius (De Vit *Onomasticon* iii. 325, C. Merivale *History of the Romans under the Empire* London 1881 vii. 35 f.). Again, his banqueting-hall was circular and revolved day and night like the sky (Suet. *Ner.* 31)—a suitable abode for a would-be sun-god. Lastly, it was no doubt the colossal Helios made for the Rhodians by Chares of Lindos (Overbeck *Schriftquellen* p. 291 ff. nos. 1539—1554) that prompted Nero to have a colossus of himself made by Zenodoros (Plin. *nat. hist.* 34. 45) and set up in the vestibule of his Golden House (Suet. *Ner.* 31), cp. Mart. *ep.* 1. 70. 7 f. nec te detineat miri radiata colossi quae Rhodium moles vincere gaudet opus. Vespasian had the big figure repaired (Suet. *Vesp.* 18) and re-erected in the same place (Dion Cass. 66. 15, Hieron. *chron. ann. Abr.* 2091 = 76 A.D.: Euseb. *chron. ann. Abr.* 2090 (ii. 158 Schoene) and Synkell. *chron.* 342 B (i. 647 Dindorf) say ὁ κολοσσὸς Ῥόδου!): but the usual statement that he substituted the head of Apollo for that of Nero is not sufficiently supported by Mart. *lib. spect.* 2. 1 sidereus...colossus; the statue may well have been radiate from the outset. Hadrian caused his architect Decrianus to move it, by means of two dozen elephants, to its later position near the northern entrance of the amphitheatre; he also re-dedicated it to Sol, and commissioned Apollodoros of Damaskos to make a pendant figure of Luna (Spart. *v. Hadr.* 19. 12 f., cp. Plin. *nat. hist.* 34. 45). Commodus cut the head off and replaced it by a portrait-head of himself; moreover, by adding a club and a lion he transformed the whole figure *more suo* into a Hercules (Dion Cass. 72. 22, Herodian. 1. 15. 9, Lamprid. *v. Commod.* 17. 10: according to the *Chron. Pasch.* 263 D (i. 492 Dindorf) and Synkell. *chron.* 354 B (i. 668 Dindorf) Commodus beheaded the colossus of Rhodes and substituted a likeness of himself; Kedren. *hist. comp.* 251 C

oratory traditionally ascribed to Menandros the rhetorician of Laodikeia on the Lykos (*c.* 270 A.D.)[1], but more probably composed by an anonymous rhetorician of Alexandreia in the Troad[2], concludes with an appeal to Apollon *Smínthios*:

'But, Sminthian and Pythian god,—for with thee my discourse began, and with thee shall it end—by what titles shall I address thee? Some name thee *Lýkeios*, some *Délios*, others *Askraîos*, others again *Áktios*. At Sparta men call thee *Amyklaîos*, at Athens *Patrôios*, at Miletos *Branchiátes*. Every town and country and nation thou dost traverse. Yea, even as thou dost dance round the sky with the choruses of the stars about thee, so dost thou traverse the whole world of men. The Persians name thee Mithras, the Egyptians Horos—for thou bringest round the seasons (*hôrai*) in their circuit—, the Thebans Dionysos; and the Delphians honour thee with a twofold title, calling thee at once Apollon and Dionysos. About thee are the Muses (?), about thee the Maenads. From thee the moon too gets her radiance, and the Chaldaeans name thee leader of the stars. Whether, then, thou carest for these titles, or for others better than these, grant that our city may ever enjoy full prosperity, and that this festival may for ever be held on thy behalf. Give grace, moreover, to the words that are spoken; for of thee come speech and city alike[3].'

(i. 441 Bekker) carries the confusion further by asserting that Commodus decapitated the colossus of Rhodes and placed its head on his own statue!). But these accessories were afterwards removed (Lamprid. *v. Commod.* 17. 9), and in the fourth century A.D. the Neronian image once more had a rayed crown (*Curiosum urbis regionum xiv* reg. iv = *Notitia regionum urbis xiv* reg. iv (H. Jordan *Topographie der Stadt Rom im Alterthum* Berlin 1871 ii. 546)). Its base of brickwork is still *in situ* (H. Jordan—C. Huelsen *op. cit.* Berlin 1907 i. 3. 320 ff.). The probability is that from first to last the colossus was recognised as the sun-god. If it bore the features of a Nero or a Commodus, we must remember that the former had posed as the Rhodian Helios and the latter at least as Hercules (R. Peter in Roscher *Lex. Myth.* i. 2987 ff., *Class. Rev.* 1906 xx. 418).

Dionysos displaced by Apollon

Towards the close of the fourth century Servius *à propos* of Aeneas and his comrades, whom Virgil had described as worshipping the Delian Apollo with bent heads[1], remarks:

'We should realise that, in accordance with the character of the deity addressed, the worshippers look sometimes down, sometimes up; for some powers are heavenly, others earthly, others a blend of both. Hence now, when beseeching Apollo, they turn towards the ground, since he is at once himself and Sol and Father Liber, who descended to the dead—as Horace puts it: "Cerberus saw thee and harmed thee not[2]." So they do well to turn towards the ground: it is from the ground that oracular responses come to them, and Apollo is known even to the dead below[3].'

Elsewhere, commenting on Virgil's apparent equation of the sun and moon with Liber and Ceres[4], Servius attributes the same unitarian doctrine to the Stoics:

'The Stoics hold that there is but one god and one goddess, and that it is the self-same power which is called by various names according to its functions and activities. Hence, on the one hand, they identify Sol, Liber, and Apollo; on the other, Luna, Diana, Ceres, Iuno, and Proserpina. Virgil—so they maintain—has here invoked Liber and Ceres in place of Sol and Luna[5].'

Again, Servius cites a similar view from a neo-Platonic source:

'But, according to Porphyrios' book entitled *The Sun*, it is clear that the power of Apollo is threefold, and that we should identify Sol in heaven, Father Liber on earth, Apollo under the earth. And this is why we see three attributes grouped about his effigy—the lyre which represents to us heavenly harmony,

συγκροτεῖσθαι M. m.) *τὴν παν*ήγυριν· *νεῦσον δὲ καὶ χάριν τοῖς λόγοις, παρὰ σοῦ* (*παρά σοι* p.) *γὰρ οἱ* (*γὰρ καὶ οἱ* M. m.) *λόγοι καὶ ἡ πόλις.*

[3] Serv. *in* Verg. *Aen.* 3. 93 et sciendum pro qualitate numinum orantes interdum ima, interdum summa respicere; nam potestates aliae caelestes sunt, aliae terrenae, aliae permixtae: unde nunc Apollinem deprecantes terram petunt. ipse est enim et Sol et Liber Pater, qui inferos petiit, ut Horatius *te vidit insons* (sic F. m. *insomnis* L. H. M. *in somnis* E.) *Cerberus*. bene ergo terram petunt, unde ad eos responsa perveniunt, et quia Apollo etiam inferis notus (motus F.) est.

[4] Verg. *georg.* 1. 5 ff. vos, o clarissima mundi | lumina, labentem caelo quae ducitis annum, | Liber et alma Ceres.

[5] Serv. *in* Verg. *georg.* 1. 5 Stoici dicunt non esse nisi unum deum et unam <deam>, eandemque (esse) potestatem, quae pro ratione officiorum nostrorum (*pro* nostrorum *leg.* et actuum) variis nominibus appellatur. unde eundem Solem, eundem Liberum, eundem Apollinem vocant. item Lunam, eandem Dianam, eandem Cererem, eandem Iunonem, eandem Proserpinam dicunt: secundum quos, pro Sole et Luna, Liberum et Cererem invocavit. The passage is cited by Myth. Vat. 2 *prooem.* Stoici dicunt non esse nisi unum deum et unam deam, eademque esse potestate; qui pro ratione officiorum et actuum variis nominibus appellantur (eandemque esse potestatem, quae pro ratione officiorum variis nominibus appellatur C. D.). deum (unde C. D.) eundem Solem, eundem Liberum, eundem Apollinem vocant. item deam eandem (deam eandem *om.* C. D.) Lunam, eandem Dianam, eandem (*om.* C. D.) Cererem (*om.* D.), eandem Junonem, eandem Proserpinam dicunt. numina autem utriusque sexus esse videntur, ideo quia incorporea sunt. Cp. Serv. *in* Verg. *Aen.* 4. 638 (=J. von Arnim *Stoicorum veterum fragmenta* Lipsiae 1903 ii. 313 no. 1070).

the griffin which shows him as an earthly deity too, the arrows which mark him as a destructive god of the underworld[1].' Etc.

Finally, Macrobius (*c.* 400 A.D.), after adducing the Aeschylean and Euripidean evidence already quoted[2] by way of proof that Mount Parnassos was not sacred to two diverse deities, puts his case thus[3]:

'We began with the statement that Apollo is the sun. We next showed that Father Liber is none other than Apollo. Consequently there can be no doubt that Sol and Father Liber refer to the same god. Nevertheless this shall be established by yet clearer arguments. Mystic religion in its rites observes the following rule: when the sun is in the upper or diurnal hemisphere, it is called Apollo; when in the lower or nocturnal, it is held to be Dionysos[4], that is Father Liber.' Etc.

In short, it appears that a variety of influences—Pythagorean, Egyptian, Orphic—tended towards the assimilation of Dionysos

[1] Serv. *in* Verg. *ecl.* 5. 66 sed constat secundum Porphyrii librum, quem *Solem* appellavit, triplicem esse Apollinis potestatem, et eundem esse Solem apud superos, Liberum Patrem in terris, Apollinem apud inferos. unde etiam tria insignia circa eius simulacrum videmus—lyram quae nobis caelestis harmoniae imaginem monstrat, gryphen quae eum (see H. A. Lion *ad loc.* n. 66: Myth. Vat. 3. 8. 16 has more correctly *gryphen qui eum*) etiam terrenum numen ostendit, sagittas quibus infernalis deus et noxius indicatur. The passage is quoted by Myth. Vat. 3. 8. 16 and, in a shortened form, by Myth. Vat. 2. 18 (where G. H. Bode would rightly restore *gryphem* as against A. Mai's *quadrigam*).

[2] *Supra* p. 253.

[3] Macrob. *Sat.* 1. 18. 7 f. sed licet, illo prius [*Sat.* 1. 17. 7 ff.] adserto eundem esse Apollinem ac solem, edoctoque postea [*Sat.* 1. 18. 1 ff.] ipsum esse Liberum patrem qui Apollo est, nulla ex his dubitatio sit Solem ac Liberum patrem eiusdem numinis habendum, absolute tamen hoc argumentis liquidioribus astruetur. in sacris enim haec religiosi arcani observatio tenetur, ut sol, cum in supero—id est in diurno—hemisphaerio est, Apollo vocitetur, cum in infero—id est in nocturno—Dionysus, qui est Liber pater, habeatur.

[4] An etymologising (*νύξ* + *ἥλιος* or *ἠέλιος*!) explanation of *Νυκτέλιος*, a title borne by Dionysos at Megara (Paus. 1. 40. 6 *μετὰ δὲ τοῦ Διὸς τὸ τέμενος ἐς τὴν ἀκρόπολιν ἀνελθοῦσι καλουμένην ἀπὸ Καρὸς τοῦ Φορωνέως καὶ ἐς ἡμᾶς ἔτι Καρίαν ἔστι μὲν Διονύσου ναὸς Νυκτελίου, πεποίηται δὲ Ἀφροδίτης Ἐπιστροφίας ἱερὸν καὶ Νυκτὸς καλούμενόν ἐστι μαντεῖον καὶ Διὸς Κονίου* (L. C. Valckenaer cj. *Κρονίου*. Welcker *Gr. Götterl.* i. 642 n. 75 cj. *Κωνίου*, 'kegelförmig, metae modo.' K. F. Hermann in *Philologus* 1848 iii. 518 cj. *σκοτίου* or *χθονίου*. And H. Hitzig—H. Blümner *ad loc.* state that the text 'scheint keine plausible Erklärung zuzulassen.' Zeus 'of the Dust,' cp. Pind. *Nem.* 9. 102 *ἐν κονίᾳ χέρσῳ*, was possibly chthonian, but more probably the god that sent dusty weather—a very material consideration in Greece, where the ancient wayfarer—witness Plat. *rep.* 496 D—was glad to take shelter from the swirling dust-storm behind the nearest wall and the modern hotel-manager keeps a man in the hall to flap your boots with a feather-broom) *ναὸς οὐκ ἔχων ὄροφον*), at Delphoi (Plout. *de* E *apud Delphos* 9 cited *supra* p. 234), and doubtless elsewhere (Ov. *met.* 4. 15, *ars am.* 1. 567, *Anth. Pal.* 9. 524. 14 = *h. Dion.* 14 (Abel *Orphica* p. 284), Nonn. *Dion.* 7. 349, 22. 6, 27. 173, 44. 203). But the title certainly originated in the fact that Dionysiac rites were held at night (Plout. *quaestt. Rom.* 112, *et. mag.* p. 609, 20 f., schol. Soph. *Ant.* 1147): see further Soph. *Ant.* 1146 f., Eur. *Ion* 1074 ff., *Bacch.* 485 ff., Aristoph. *ran.* 340 ff., Verg. *georg.* 4. 521, Hesych. *s.v.* *νυκτελεῖν*, and the epithets *νυκτέριος* (Orph. *h. triet.* 52. 4), *νυκτίπολος* (Eur. *frag.* 472, 11 Nauck[2] cited *supra* i. 648 n. 1 cp. i. 667 n. 4, Nonn. *Dion.* 7. 288), *νυκτιφαής* (Nonn. *Dion.* 44. 218).

and Apollon, who were completely unified by the solar syncretism of the Graeco-Roman age. But it would be a gross blunder to regard these two as identical from the outset. Rather they were analogous gods, of whom one proved a not uncongenial intruder upon the other. The welcome guest became in time a recognised member of the family circle, and ultimately the main representative of the house, his former naturalisation having been obscured by the later developments of religion and philosophy.

The situation thus arising may be illustrated by a short sequence of Greek vase-paintings[1]. A polychrome *pelike* from Jüz Oba, now at Petrograd (pl. xvi)[2], Attic work of the fourth century B.C., has for its principal figures the earlier *personnel* of the Delphic oracle. The obverse design shows Zeus, with golden bay-wreath and sceptre, enthroned beside Themis, who, clad in a *chitón* and a *himátion* partly blue partly red, sits on the yellow-touched gold-filleted *omphalós*, her left foot raised upon a stone. God and goddess are in earnest conversation, as befits the supreme counsellors of all the world[3]. The subject of their talk is presumably the glorification

[1] The Etruscan mirror from the Luynes collection (Gerhard *Etr. Spiegel* iv. 24 f. pl. 292), now at Paris (Babelon—Blanchet *Cat. Bronzes de la Bibl. Nat.* p. 517 f. no. 1300 fig.), adduced by Miss Harrison in her *Themis* p. 442 f. fig. 136 as representing Apollon and Dionysos *vis-à-vis* with the sun's disk between them, would make a delightful illustration of the same point. But unfortunately the interpretation of the second figure as Dionysos is far from certain. The duc de Luynes in the *Bull. d. Inst.* 1848 p. 36 described it as Diana; E. Gerhard *loc. cit.*, E. Babelon and J. A. Blanchet *loc. cit.*, as Artemis.

[2] Stephani *Vasensamml. St. Petersburg* ii. 324 ff. no. 1793, *id. Compte-rendu St. Pét.* 1860 p. 39 ff. Atlas pl. 2, 1 f. = Reinach *Rép. Vases* i. 3, 1 f., C. Strube *Studien über den Bilderkreis von Eleusis* Leipzig 1870 p. 86 n., Overbeck *Gr. Kunstmyth.* Zeus pp. 181 K, 183, 185 f., *Wien. Vorlegebl.* A pl. 9, 1, C. Robert *Archaeologische Maerchen aus alter und neuer Zeit* Berlin 1886 p. 188 ff. pl. 3, W. Klein 'Zur Einleitungsscene der Kyprien' in the *Jahrb. d. kais. deutsch. arch. Inst.* 1894 ix. 251 ff. fig. 1, and above all Furtwängler—Reichhold *Gr. Vasenmalerei* ii. 46—50 fig. 21 f. pl. 69 (= my pl. xvi). Height $0{\cdot}443^{m}$.

[3] Themis as an earth-goddess (*supra* p. 176 n. 1) knows the right order of events and from experience of the past can give good advice for the future. In poetry she is εὔβουλος (Pind. *Ol.* 13. 11, *Isthm.* 8. 68 cited *infra* § 9 (h) ii (κ). *frag.* 30. 1 Schroeder cited *supra* p. 37 n. 1), ὀρθόβουλος (Aisch. *P. v.* 18), πινυτά (Bakchyl. 14. 55, cp. *frag. adesp.* 82 A as completed by Bergk[4] *ad loc.*), in prose Βουλαία (Plout. *praec. ger. reip.* 5, Synes. *de regno* 15 (lxvi. 1093 Migne)).

Zeus is wise as a forefather (Aisch. *suppl.* 592 ff. πατὴρ φυτουργὸς αὐτόχειρ ἄναξ | γένους παλαιόφρων μέγας | τέκτων, τὸ πᾶν μῆχαρ οὔριος Ζεύς. Cp. for his wisdom as conceived by Aischylos *P. v.* 61 f., *suppl.* 1058 f., and the remarks of W. Kausche in the *Dissertationes philologicae Halenses* Halis Saxonum 1888 ix. 137), as a magician (*supra* i. 14 n. 1, 758 n. 1 f.), as an all-seeing sky-god (*supra* i. 187 n. 9, 196 f., 459 ff., 731 n. 1, 783), and as ideal mind (Nonn. *Dion.* 20. 266 περισσονόοιο Διός, Tzetz. *chil.* 6. 930 ὁ Ζεὺς ὁ νοῦς ὁ πάνσοφος, *proleg. alleg.* 315 ὁ Ζεὺς γὰρ νοῦς ἐκέλευσε, *alleg. Od.* 1. 163 ὦ Ζεῦ, σὺ νοῦ καὶ φρόνιμε). But it is as a chthonian god or, more strictly, as a god associated with chthonian goddesses that he gives counsel to men. Thus he is Zeus Βουλεύς in Mykonos (*supra* i. 668 f., 717 n. 3, with Demeter and Kore), Zeus Εὐβουλεύς in Amorgos (*supra*

Polychrome *pelike* from Jüz Oba: Zeus takes counsel with Themis.

See page 258 ff.

Βουλαίου μόνου ἔχρηζον, Cornut. *theol.* 9 p. 9, 16 f. Lang καὶ βουλαῖον...προσαγορεύουσιν, Achilles *in* Arat. *phaen.* 3 (E. Maass *Commentariorum in Aratum reliquiae* Berolini 1898 p. 84, 16 ff.) λέγεται γὰρ καὶ βουλαῖος Ζεὺς καὶ (so Wilàmowitz for ὡς V.) ξένιος καὶ ἑταίρειος φίλιος (so Maass for φίλος V.) φυτάλμιος (so Scaliger for φυτάλμιος V.) ἐπικάρπιος, Schöll—Studemund *anecd.* i. 265 no. 23 βουλαίου cp. *ib.* i. 274 n. 18, 282 n. 14) and of whom it was a virtual synonym (Lyk. *Al.* 435 f. (Kapaneus) δν Γογγυλάτης εἶλε Βουλαῖος Μυλεύς, | ἀγηλάτῳ μάστιγι συνθραύσας κάρα, with Tzetz. *ad loc.* ὁ Ζεὺς ὁ Γογγυλάτης, δι' οὗ αἱ γογγύλαι καὶ συνεσφιγμέναι χεῖρες κινοῦνται, ὁ Βουλαῖος, δι' οὗ καὶ τὸ βουλεύειν τοῖς ἀνθρώποις ἐστίν, ὁ Μυλεύς, δι' οὗ οἱ ἄνθρωποι τὰς μύλας καὶ τοὺς ὀδόντας κινοῦσιν, ἢ ὁ ἀρτοδότης, ἀπὸ τῆς μύλης, cp. Schöll—Studemund *anecd.* i. 265 no. 27 γογγυλάτου, no. 65 μυλέως. O. Jessen in Pauly—Wissowa *Real-Enc.* vii. 1585 says: 'Vermutlich entspricht Zeus G. dem Zeus Palamnaios.' H. W. Stoll in Roscher *Lex. Myth.* ii. 3307 cp. Zeus Μυλεύς with Iupiter *Pistor*; L. Bachmann *ad loc.* cp. Iupiter *Lapis*. Was Zeus Γογγυλάτης connected with turnips (γογγύλαι), as Iupiter with onions (*Class. Rev.* 1903 xvii. 270)? And was Zeus Μυλεύς, like Apollon *Mýlas* or *Mylántios* (O. Höfer in Roscher *Lex. Myth.* ii. 3306), the Mylanteioi Theoi (K. Tümpel *ib.* ii. 3305 f.), and Promylaia (O. Höfer *ib.* iii. 3110 f.), a protector of mills? *Non liquet*. Both titles might be local, Γογγυλάτης from some island *Γογγύλη, Μυλεύς from some town akin to Μύλασα). Βουλαῖος meant 'God of the *Council*' and at most connoted the power of giving *counsel* (cp. Theokr. 16. 70 Διὸς μέγα βουλεύοντος); it is not directly connected with the *quasi-*

of Athens[1], since Athena, who stands before them wearing a golden *aigís* slung across a lilac (?) *péplos* spangled with gold and having in her left hand a golden spear, on her head a golden red-crested helmet, is in the act of receiving a golden olive-wreath from a Victory, in a bright-coloured *péplos*, poised on wings of blue and gold. The remaining figures are less dazzling, being in effect little more than conventional 'filling': Selene on her horse led by Hesperos to the right; Hermes in waiting behind Zeus; Aphrodite with Peitho to the left. The central group plainly recalls the east pediment of the Parthenon; and the same great original, haunting the imagination of the painter, has contributed something to his Selene, Hermes, and Aphrodite[2]. The reverse design represents Dionysos seated with Ariadne. Each holds a *thýrsos*, and Eros hovers between them. Dionysos' panther, caressing Ariadne, and a Maenad, with a timbrel at her side, complete the picture. Thus front and back of the vase taken together[3] portray Zeus, Themis,

magical *βουλή* or *βουλαί* of Zeus (*supra* i. 14 n. 1). Zeus *Ἀμβούλιος* at Sparta (Paus. 3. 13. 6 *πρὸς τούτῳ Διὸς Ἀμβουλίου καὶ Ἀθηνᾶς ἐστιν Ἀμβουλίας βωμὸς καὶ Διοσκούρων καὶ τούτων Ἀμβουλίων*, Souid. *s.v.* *Ἀμβούλιος· ὄνομα κύριον i.e.* a theophoric name (?)) was probably a warlike deity (Wide *Lakon. Kulte* p. 13 f.), who on some historic occasion, unknown to us, had saved the state by a sudden change of plans and was therefore worshipped as 'the Reverser of the Decree' (cp. Preller—Robert *Gr. Myth.* i. 145 n. 1, O. Jessen in Pauly—Wissowa *Real-Enc.* i. 1816, Gruppe *Gr. Myth. Rel.* p. 1117 n. 3). H. van Herwerden *Lexicon Graecum suppletorium et dialecticum*[2] Lugduni Batavorum 1910 p. 81 thinks that the Spartans would have called these deities *ἄμβωλοι* (*sic*) and *ἀμβωλία*.

[1] The vase has been much misinterpreted. L. Stephani *locc. citt.*, deserted by his usual good sense, made the meaning of the obverse turn on the nature of the horse-rider: if she were Selene led by one of the Dioskouroi, the other figures from left to right might be two Hesperides, Hestia, Hermes, Atlas, Nike, Athena; but if—as he preferred to think—she were Artemis *Pheraía* led by a Satyr, they might be Iphthime, Alkestis, Hestia, Hermes *Pheraîos*, Admetos, Nike, Athena. C. Strube *loc. cit.*, followed by J. Overbeck and A. Furtwängler *locc. citt.*, made a much better suggestion. The vase-painter had been inspired by the opening scene of the *Kypria*, in which Zeus took counsel with Themis how to lessen the tribes of men that burdened the earth by bringing about the Trojan war (Prokl. *chrestom.* 1 (p. 17 Kinkel) *Ζεὺς βουλεύεται μετὰ τῆς Θέμιδος* (so C. G. Heyne for codd. *θέτιδος*) *περὶ τοῦ Τρωικοῦ πολέμου. παραγενομένη δὲ Ἔρις εὐωχουμένων τῶν θεῶν ἐν τοῖς Πηλέως γάμοις νεῖκος περὶ κάλλους ἐνίστησιν Ἀθηνᾷ Ἥρᾳ καὶ Ἀφροδίτῃ, κ.τ.λ.* cp. *Kypria frag.* 1 Kinkel *ap.* schol. *Il.* 1. 5 f.). Strube's notion that the horse-rider was Eris led by Oistros is rightly abandoned by Furtwängler. C. Robert *loc. cit.* put forward the odd idea that Zeus is about to bear Dionysos, who is as yet hidden in his left thigh, and that Themis is foretelling the child's future. Robert takes the rider to be Selene led by Phosphoros—an indication that the scene is laid just before day-break. W. Klein *loc. cit.*, comparing the famous Dareios-vase (Furtwängler—Reichhold *Gr. Vasenmalerei* ii. 142 ff. pl. 88), will have it that Athena and Aphrodite here stand for Hellas and Asia, that the seductive rider is Apate, etc. S. Reinach *loc. cit.* is eclectic naming the *dramatis personae* Peitho (?), Aphrodite, Hestia (?), Hermes, Zeus, Nike, Athena, Artemis or Selene led by an *éphebos*.

[2] *Infra* § 9 (h) ii (*θ*).

[3] An objection to my view is that late vases of this type as a rule have for reverse

and Dionysos—the early Delphic triad—in thoroughly characteristic surroundings.

Another fourth-century vase, likewise found at Jüz Oba and preserved at Petrograd[1], is a red-figured *kratér*, which has for obverse design a judgment of Paris[2] comparable with that depicted on the *hydría* at Karlsruhe[3] and for reverse the arrival of Apollon at Delphoi (pl. xvii)[4]. The scene is marked by the *omphalós* with its fillets and bay-wreath, the palm-tree[5], and the tripod[6]. Dionysos —a kingly figure bearded, wreathed with ivy, clad in fine under-*chitón*, richly decorated upper-*chitón*, and *himátion*, and holding his *thýrsos* like a sceptre—is evidently lord of the locality[7]. Round him is his retinue, three naked Satyrs and three Maenads, who with flutes, lyre, and timbrel make music as their master extends the right hand of fellowship[8] to the youthful Apollon, a simpler personage in a dotted *himátion* with bay-wreath and bay-branch. One of the Maenads prepares a seat for him beside the *omphalós*—a sufficiently significant action. The guest has come to stay. And it may be added that Zeus and Themis, the original occupants of the place, are already relegated to the other side of the vase.

A later moment is represented on a red-figured bell-*kratér* of

design some commonplace subject (draped youths, etc.) unconnected with the obverse. That is true. But there are notable exceptions (*e.g. Compte-rendu St. Pét.* 1859 p. 32 ff. Atlas pl. 1 f. = Reinach *Rép. Vases* i. 1, 1 f., 2, 2 or Collignon—Couve *Cat. Vases d'Athènes* p. 590 f. no. 1854), and this may well be one. Robert *op. cit.* p. 190 is not averse from connecting the two sides of our vase.

[1] Stephani *Vasensamml. St. Petersburg* ii. 339 ff. no. 1807. Height 0·49^{m}.

[2] *Infra* § 9 (h) ii (*θ*).

[3] *Supra* i. 125 f. pl. xi.

[4] L. Stephani in the *Compte-rendu St. Pét.* 1861 p. 33 ff. Atlas pls. 3 and 4 (= my pl. xvii) = Reinach *Rép. Vases* i. 7, 5 f., 8, 1, L. Weniger in the *Arch. Zeit.* 1866 xxiv. 185 ff. pl. 211, Overbeck *Gr. Kunstmyth.* Apollon pp. 331 no. 73, 333 Atlas pl. 21, 25 (central group only), Farnell *Cults of Gk. States* iv. 316 pl. 17, Harrison *Proleg. Gk. Rel.*^{2} p. 390 f. fig. 122, *ead. Themis* p. 443 f. fig. 137.

[5] Recalling the bronze palm at Delphoi (Plout. *v. Nic.* 13, *de Pyth. or.* 8, Paus. 10. 15. 4 f.). On the relation of palms to Apollon see L. Stephani in the *Compte-rendu St. Pét.* 1861 p. 68 f.

[6] *Omphalós*, palm, and tripod are all found on the *amphora* from Ruvo (*supra* p. 170 n. 2).

[7] Miss Harrison is a trifle less dogmatic in her *Proleg. Gk. Rel.*^{2} p. 390 f.: 'It is perhaps not quite certain which is regarded as the first comer, but the balance is in favour of Dionysos as the sanctuary is already peopled with his worshippers.'

[8] L. Weniger in the *Arch. Zeit.* 1866 xxiv. 190 f. and Farnell *Cults of Gk. States* iv. 316 suggest that Dionysos is greeting Apollon on his return from the Hyperboreans—a possible interpretation. L. Stephani in the *Compte-rendu St. Pét.* 1861 p. 114 after many pages reaches the wrong conclusion, *viz.* that Apollon and Dionysos grasp each other's hand merely to show their essential similarity—'Eine...rein theoretische, nicht dramatische Anwendung des Handschlags'—or, if the gesture has any reference to the particular occasion, their unanimity in regard to the judgment of Paris.

Kratér from Jüz Oba: Apollon visits Dionysos at Delphoi.

See page 262.

Kratér in the British Museum: Apollon honoured by the followers of Dionysos at Delphoi.

Attic style now in the British Museum (pl. xviii)[1]. The mountain-side with a stepped altar in the foreground stands for the precinct at Delphoi[2], which is still largely Dionysiac—witness the ivy-leaves that strew the ground, the company of Satyrs and Maenads, and the presence of Dionysos himself. But the principal deity is now Apollon, who is seated in the centre with short *chitón* and embroidered *himátion*, a bay-wreath round his hair, a bay-branch in

Fig. 173.

his left hand, a tortoise-shell lyre in his right. He glances over his shoulder at Dionysos, who occupies a subordinate seat on the extreme left, similarly clad in a short *chitón* with an embroidered *himátion*, wearing fillet and ivy-wreath, and holding a *thýrsos* in one hand, a *rhytón* in the other. His former retainers seem bent on honouring the new arrival. One of the Satyrs turns towards him, fingering a lyre. The other, carrying an *oinochóe*, offers him an ivy-patterned *kántharos*. And both Maenads present him with flat baskets of fruit. It is clear that Apollon is in process of displacing Dionysos.

[1] *Brit. Mus. Cat. Vases* iv. 50 f. no. F 77, [P. F. Hugues, dit d'Hancarville] *Antiquités étrusques, grecques et romaines* Naples 1767 ii pl. 68, Inghirami *Vas. fitt.* ii. 137 f. pl. 196, Lenormant—de Witte *Él. mon. cér.* ii. 222 ff. pl. 74 A, E. Gerhard in the *Arch. Zeit.* 1865 xxiii. 102 ff. pl. 202, 2 = Reinach *Rép. Vases* i. 397, 6, L. Stephani in the *Compte-rendu St. Pét.* 1861 p. 59 n. 2, Overbeck *Gr. Kunstmyth.* Apollon pp. 326 no. 53, 330. Pl. xviii is from a photograph of the vase (height 15¼ inches) in its present condition. Previous illustrations are grossly inaccurate, Dionysos having been restored as a nude goddess and many details wrongly repainted.

[2] This may be disputed, since the *omphalós* does not appear (are we to think of it as concealed beneath Apollon's drapery?). But the painting fills a gap in a series of undoubtedly Delphic scenes, and Gerhard *loc. cit.* p. 102 was probably right in describing it as 'Apollon zu Delphi.'

Dionysos displaced by Apollon

The displacement is well nigh complete in the scene painted on a late Attic bell-*kratér* from Santa Agata de' Goti, now at Berlin (fig. 173)[1]. Apollon, with a bordered *himátion* about his legs, a bay-wreath and fillet on his head, and a bay-branch in his left hand, is seated on the *omphalós*, itself garlanded with bay, whilst he dangles a sprig of bay-leaves[2] over a white deer at his side[3]. Before him

These multifarious usages—mantic, prophylactic, cathartic, hygienic, etc.—probably go back to a belief that the bay-tree was highly charged with divinity (cp. Boetticher *Baumkultus* pp. 264 f., 338 ff., A. de Gubernatis *La Mythologie des Plantes* Paris 1882 ii. 188 ff., R. Folkard *Plant Lore, Legends, and Lyrics* London 1884 p. 404 ff.). It would, however, be a mistake to regard the bay as a vegetable form of Apollon (despite his

stands a Maenad[1], in a richly embroidered *péplos* with a wreath of ivy on her hair, grasping a couple of lit torches; behind him, a similarly draped and wreathed Maenad[2] carrying a *thýrsos*, and a clumsy dancing Satyr. To the left is Hermes, who beckons the *thíasos* away to their nightly revels on the mountain. In the background are seen the upper parts of four Doric columns supporting an architrave—a rough sketch of the Delphic temple on its terrace[3]. Dionysos, it will be observed, has gone: the Maenads and the Satyr are going.

But even when Apollon had entered into full possession of the Delphic seat it was not forgotten that he derived his authority from Zeus. Another late Attic bell-*kratér*, formerly in the Lamberg collection and now at Vienna (fig. 174)[4], shows Zeus instructing Apollon in the presence of other deities. Apollon, with a bay-wreath on his head, a bay-branch in his right hand, and a bay-bush at his left side, sits before the filleted *omphalós*, on the other side of

epithets Δαφναῖος, Δαφνηφόρος, Δαφνίτας, on which see K. Wernicke in Pauly—Wissowa *Real-Enc.* ii. 46 f., 110). The myth of Daphne (L. von Sybel in Roscher *Lex. Myth.* i. 954 f., O. Waser in Pauly—Wissowa *Real-Enc.* iv. 2138 ff., Gruppe *Myth. Lit.* 1908 p. 449 ff.) points rather to a close connexion between the tree and the earth-mother.

[3] The inhabitants of Dion in Makedonia dedicated at Delphoi τὸν Ἀπόλλωνα ὃς εἰλημμένος ἐστὶ τῆς ἐλάφου (Paus. 10. 13. 5). See further K. Wernicke in Pauly—Wissowa *Real-Enc.* ii. 110.

[1] Furtwängler *loc. cit.* says 'Artemis'; but the resemblance to the pendant Maenad is too close. The ivy-wreath is clearer in Gerhard's drawing.

[2] Furtwängler *loc. cit.* says 'Nymphe'; but the *thýrsos* is decisive.

[3] Cp. *supra* p. 170 n. 2.

[4] Laborde *Vases Lamberg* i pl. 27 = Reinach *Rép. Vases* ii. 183, 1 (Peitho (?), Zeus, Aphrodite on swan, Apollon, Hermes, Athena (?)), Inghirami *Vas. fitt.* iii. 70 ff. pl. 235 (apotheosis of Helene! cp. (Zeus announces to Apollon the appearance of Kyrene on a swan, cp. F. G. Welcker in the *Rhein. Mus.* 1847 ii. 498), L. Stephani in the *Compte-rendu St. Pét.* 1863 p. 70 f. (Dionysos (!) and Apollon with Hermes and three Muses or Maenads or Thyiads), Overbeck *Gr. Kunstmyth.* Zeus pp. 182 HH, 185 f. Atlas pl. 1, 33 Zeus only (Kyrene (?)), H. Heydemann in the *Ann. d. Inst.* 1871 xliii. 114 f. (the judgment of Paris 'trasportato a Delfo per rendere più palpabile l'importanza del giudizio e le sue conseguenze per l'avvenire,' the figures being Hera, Zeus, Aphrodite on swan, Paris (!), Hermes, Athena, cp. G. Minervini in the *Bull. Arch. Nap.* 1845 iii. 79 = *id. Descrizione di alcuni vasi fittili della collezione Jatta* Napoli 1846 i. 23), O. Benndorf *Griechische und sicilische Vasenbilder* Berlin 1877 p. 78 ff. fig. = my fig. 174 (a variation on the opening scene of the *Kypria* (*supra* p. 261 n. 1)—Zeus takes counsel with Apollon on the strife between the goddesses, which led up to the Trojan war), Furtwängler *Samml. Sabouroff* Vasen p. 14 ff. (Zeus instituting Apollon as god of the Delphic oracle (Aisch. *Eum.* 17 ff.), while the previous occupants depart, Gaia and Themis to right and left, Phoibe on the swan), A. Kalkmann in the *Jahrb. d. kais. deutsch. arch. Inst.* 1886 i. 258 ff. ('Zeus dem Apollo befiehlt, die Kyrene nach Libyen zu senden, und Hermes sich anschickt, diesen Auftrag auszuführen, während die schwesterlichen Nymphen nicht ohne Theilnahme nach ihrer zur Abfahrt gerüsteten Gespielin sich umschauen').

which stands[1] Zeus, with bay-wreath and sceptre, announcing to his 'prophet[2]' the mandate of omnipotence. Who the remaining deities may be and what exactly they are doing, has been the subject of much futile discussion. Apparently the painter has utilised

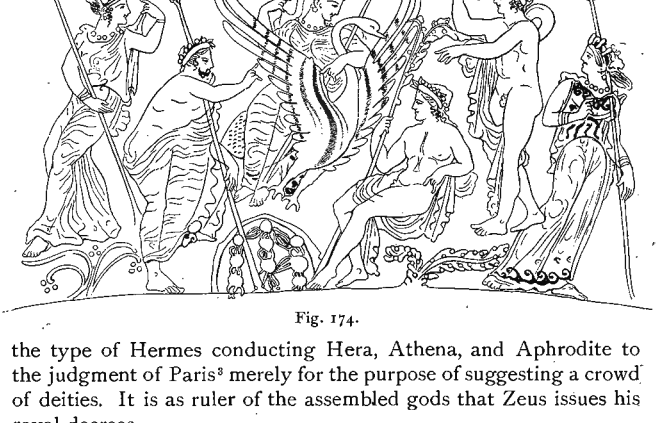

Fig. 174.

the type of Hermes conducting Hera, Athena, and Aphrodite to the judgment of Paris[3] merely for the purpose of suggesting a crowd of deities. It is as ruler of the assembled gods that Zeus issues his royal decrees.

(ψ) The stratification of Delphic Cults.

We are now in a position to gather up results and to venture upon a conspectus of Delphic worship. The main cults appear to be stratified as in the following diagram:—

iii.	APOLLON	Bay
ii.	DIONYSOS	Tripod
i.	ZEUS *Aphésios* (?) and GE *Thémis* (?)	Eagles and *omphalós*

[1] The pose is unusual for Zeus (Overbeck *Gr. Kunstmyth.* Zeus p. 185 f.), who does not appear elsewhere in the attitude of the supported foot (*infra* § 9 (h) ii (*θ*)).

[2] *Supra* p. 204 n. 1, *infra* § 3 (a) vi (λ) *sub fin.*

[3] Objections brought against the interpretation of this scene as a judgment of Paris—*viz.* that Athena would then have some distinctive attribute (Furtwängler *loc. cit.* p. 14) and that Aphrodite would not be riding on a swan (A. Kalkmann *loc. cit.* p. 259)—lose their force, if, as I suppose, the artist is reminiscent and no more; for in that case he is free to contaminate or adapt.

Further, the circumstances suggest that these *strata* represent distinct racial elements in the population, which had arrived, by dint of much mutual accommodation, at a joint-recognition of their respective deities. Zeus and Ge *Thémis*, the original possessors of the sanctuary, were throughout classical times admitted to be the ultimate source of the oracles there delivered. Of the younger gods first Dionysos, and subsequently Apollon, was affiliated to Zeus. And, since they were gods of approximately similar character, the populace came to regard them almost as obverse and reverse aspects of the same divinity[1]. Finally, our survey of the *data* may enable us to hazard at least a provisional guess concerning the races involved in this curious superposition of cults. Alluvial deposits often tell their own tale.

iv. Zeus and Dionysos.

Zeus and Ge, the sky-father and the earth-mother, were essentially Hellenic, their worship being common to every branch of the Hellenes[2]. The precise character of the relations between them will be explained in a later section[3]. Here it must suffice to observe that the early Delphians seem to have worshipped Zeus as a storm-god under the title *Aphésios*, which may be rendered 'He that lets fly[4],' and Ge as a fertility-goddess under the title *Thémis*[5],

[1] In this connexion the pedimental sculptures of the temple at Delphoi are noteworthy. From fragments found on the site it seems that in the sixth-century building the east pediment contained a marble group with Apollon in his chariot as centre-piece, the west pediment a *pôros* Gigantomachy with Zeus in the middle, Athena to the left of him, Dionysos to the right (T. Homolle in the *Bull. Corr. Hell.* 1901 xxv. 457—515 figs. 1—6 pls. 9—16, 18 f., F. Courby *ib.* 1914 xxxviii. 327—350 pl. 6 f. and in the *Fouilles de Delphes* ii. 1. 103 f. fig. 83 pl. 12). And from Paus. 10. 19. 4 *τὰ δὲ ἐν τοῖς ἀετοῖς, ἔστιν Ἄρτεμις καὶ Λητὼ καὶ Ἀπόλλων καὶ Μοῦσαι δύσις τε Ἡλίου καὶ Διόνυσός τε καὶ αἱ γυναῖκες αἱ Θυάδες. κ.τ.λ.* it has been justly inferred that in the fourth-century structure the east pediment was occupied by Apollon and deities of his cycle, the west pediment by Dionysos and his *cortège* (T. Homolle in the *Bull. Corr. Hell.* 1902 xxvi. 627—639, F. Courby in the *Fouilles de Delphes* ii. 1. 20). The numismatic evidence is inconclusive (Imhoof-Blumer and P. Gardner *Num. Comm. Paus.* iii. 118 ff. pl. X, 22—25, J. N. Svoronos in the *Bull. Corr. Hell.* 1896 xx. 35 f. nos. 53 f. pl. 27, 10—12, 44 ff. nos. 81—88 pl. 29, 11—18, T. Homolle *ib.* 1902 xxvi. 629, F. Courby in the *Fouilles de Delphes* ii. 1. 21).

[2] For Ge see W. Drexler in Roscher *Lex. Myth.* i. 1566 ff., A. Dieterich *Mutter Erde*[2] Leipzig-Berlin 1913, Farnell *Cults of Gk. States* iii. 1 ff., 307 ff., S. Eitrem in Pauly—Wissowa *Real-Enc.* vii. 467 ff., J. A. Hild in Daremberg—Saglio *Dict. Ant.* v. 73 ff.

[3] *Infra* § 9 (e) ii.

[4] *Supra* p. 179.

[5] Dr Farnell *op. cit.* ii. 495 rightly recognizes 'that Ge herself developed into a Ge Themis, and thence into Themis alone,' and *ib.* iii. 13 ff. rejects the notion 'that Themis began her religious career as the mere personification of the abstract idea of righteousness,' concluding that she 'was something more concrete than this, and was allied to an earth-divinity of fertilizing function.' He compares—as does Gruppe *Gr. Myth. Rel.* p. 1080 n. 6—the Themis of Boucheta (Harpokr. *s.v.* Βούχετα·...πόλις ἐστὶ τῆς Ἠπείρου,...ἣν Φιλοστέφανος ἐν τοῖς Ἠπειρωτικοῖς (*frag.* 9 a (*Frag. hist. Gr.* iii. 30 Müller)) ὠνομάσθαι

which probably once denoted 'She that creates or produces[1]'—a possible doublet of it being the name *Thétis*[2].

Dionysos—as would be admitted by modern scholars[3] with scarcely a dissentient voice[4]—was a god of Thraco-Phrygian extraction[5]. And his presence at Delphoi implies that a wave of Thracian immigrants had early reached Phokis—a fact attested also by the existence of the Delphian Thrakidai[6]. Herodotos indeed

φησὶ διὰ τὸ τὴν Θέμιν ἐπὶ βοὸς ὀχουμένην ἐκεῖσε ἐλθεῖν κατὰ τὸν Δευκαλίωνος κατακλυσμόν, cp. Souid. *s.vv.* Βούκετα and Θέμιν, *et. mag.* p. 210, 34 ff., Favorin. *lex.*, p. 385, 31 ff.) with the Cretan Europe, a vegetative earth-goddess (*supra* i. 524 ff.), and cites to the same effect a convincing passage from Clem. Al. *protr.* 2. 22. 5 p. 17, 9 ff. Stählin *καὶ προσέτι Γῆς* (so Wilamowitz for *τῆς* P. Euseb. *praep. ev.* 2. 3. 40) Θέμιδος (C. A. Lobeck cj. *θεσμοθέτιδος* or 'Αρτέμιδος) *τὰ ἀπόρρητα* (*ἄρρητα* Euseb. *loc. cit.*) *σύμβολα ὁρίγανον, λύχνος, ξίφος, κτεὶς γυναικεῖος, <ὃς>* (*ὃς* Euseb. *loc. cit.* δ M. P.[2] and cod. H. of Euseb. *loc. cit.* above the line) *ἐστιν, εὐφήμως καὶ μυστικῶς εἰπεῖν* (om. Euseb. *loc. cit.*), *μόριον γυναικεῖον*.

[1] Boisacq *Dict. étym. de la Langue Gr.* p. 338 relates *θέμις* to Zend *dāmiš* fem. 'creation,' adj. 'who creates, creator,' and for the vocalisation of the root compares *θέμα*, Zend *dąma* 'creation, creature, abode.' See, however, E. Fraenkel 'Grammatische und syntaktische Bemerkungen zu griech. *θέμις*' in *Glotta* 1913 iv. 22 ff. and P. Kretschmer 'Zum Namen der Themis' *ib.* 1913 iv. 50 f.

[2] This equation *saute aux yeux*. But others have seen otherwise. Omitting the common but certainly misleading comparison of Thetis with Tethys, we have to reckon with a whole string of more or less doubtful conjectures: W. Mannhardt *Wald- und Feldkulte*[2] Berlin 1905 ii 207 f. (shortened form of **Κυμοθέτις, *'Αλοθέτις, *Υδατοθέτις*, 'Wassermuhme,' cp. *τηθίς, θεῖος*), L. Laistner *Das Rätsel der Sphinx* Berlin 1889 i 140 f. (shortened form of **Παιδοθέτις, *'Ονομαθέτις, *Νομοθέτις, *Πυριθέτις*); Gruppe *Gr. Myth. Rel.* pp. 94, 116, 618 n. 1, 657, 1140, 1163, 1168 n. 3, 1197 n. 1 (shortened form of Demeter *Thesmothétis*), G. Prellwitz *De dialecto Thessalica* Gottingae 1885 p. 26 (related to Θεσσαλός, Boeotian Φερταλός, Thessalian Πετθαλός, original form *Χεθjαλός*, cp. *θέσασθαι*).

[3] See *e.g.* O. Kern in Pauly—Wissowa *Real-Enc.* v. 1011 ('Nehmen wir als sicher an, dass die Heimat des D. Thrakien ist,' etc.), Farnell *Cults of Gk. States* v. 85 f. ('the theory that he was of Thrako-Phrygian origin, carried by a Phrygian migration from Thrace into Asia Minor, and spreading his influence and name from the Balkan district into Macedonia and certain communities of Greece at an early period, appears to be generally accepted'). Evidence in A. Rapp *Die Beziehungen des Dionysoskultus zu Thrakien und Kleinasien* Stuttgart 1882, F. A. Voigt in Roscher *Lex. Myth.* i. 1031 f., Gruppe *Gr. Myth. Rel.* p. 211 ff. and in Roscher *Lex. Myth.* iii. 1110 ff.

[4] S. Schneider 'Über den Ursprung des Dionysoskultes' in the *Wiener Studien* 1903 xxv. 147—154 brings Dionysos from Egypt *via* Lydia and Thrace to Greece. P. Foucart *Le culte de Dionysos en Attique* (*Mémoires de l'Institut National de France: Académie des inscriptions et belles-lettres* xxvii. 2) Paris 1906 argues in support of an Egyptian Dionysos, cp. the same author's recent restatement of his views on the Eleusinian mysteries (*Les mystères d'Éleusis* Paris 1914 p. 445 ff.). Gruppe *Gr. Myth. Rel.* pp. 211 ff., 1410 and in Roscher *Lex. Myth.* iii. 1111 thinks it probable that Dionysos was originally a Boeotian god introduced by Greek settlers into Thrace. The latest leader of a forlorn hope is Miss G. M. N. Davis *The Asiatic Dionysos* London 1914. There is of course an element of truth in most of these hypotheses, even when they are otherwise misleading. The name *Bákchos* perhaps came from Egypt (*supra* i. 438), the name *Zagreús* probably came from Mt Zagron (*supra* i. 651); but Dionysos as such was certainly Thraco-Phrygian.

[5] *Supra* i. 669, 677, 695, 705, 706, 780, ii. 114 f., 219, 239.

[6] *Supra* p. 231 n. 2. Cp. P. Kretschmer *Einleitung in die Geschichte der griechischen Sprache* Göttingen 1896 p. 242 f.

knew of no nearer parallel to the Delphic oracle than that of Dionysos among the Thracian Bessoi[1]. In Thrace Dionysos had many ap-

Fig. 175.

[1] Hdt. 7. 111 Σάτραι δὲ...διατελεῦσι τὸ μέχρι ἐμεῦ αἰεὶ ἐόντες ἐλεύθεροι, μοῦνοι Θρηίκων. οἰκέουσί τε γὰρ οὔρεα ὑψηλὰ ἴδησί τε παντοίῃσι καὶ χιόνι συνηρεφέα, καὶ εἰσὶ τὰ πολέμια ἄκροι. οὗτοι οἱ τοῦ Διονύσου τὸ μαντήϊόν εἰσι ἐκτημένοι. τὸ δὲ μαντήϊον τοῦτο ἐστι μὲν ἐπὶ τῶν οὐρέων τῶν ὑψηλοτάτων· Βησσοὶ δὲ τῶν Σατρέων εἰσὶ οἱ προφητεύοντες τοῦ ἱροῦ, πρόμαντις δὲ ἡ χρέουσα, κατάπερ ἐν Δελφοῖσι, καὶ οὐδὲν ποικιλώτερον. In 29 B.C. M. Licinius Crassus took the sanctuary of Dionysos from the Bessoi and gave it to the Odrysai (Dion Cass. 51. 25). Later, Vologaisos, a Bessian priest of Dionysos, moved by divine frenzy, headed a revolt, slew Rhaskyporis son of Kotys, drove out Rhymetalkes uncle of

pellatives: he was *Aúalos*(?) and *Dýalos* among the Paiones[1], *Sábos* or *Sabázios* among the Saboi[2], *Asdoúles* in the vineyards of Maidike (fig. 175)[3], *Pleístoros* (?) at Apsinthos[4], *Bálin* or the like elsewhere[5].

Rhaskyporis in obedience to his god's command, and pursued him to the Chersonese—a revolt quelled by L. Piso, praetor of Pamphylia, in 11 B.C. (Dion Cass. 54. 34). On the Bessoi see further E. Oberhummer in Pauly—Wissowa *Real-Enc.* iii. 329 ff.

[1] *Supra* p. 250 n. 4. [2] *Supra* i. 395, 400.

[3] This relief (height, exclusive of tenon, 0·46^{m}: breadth 0·41^{m}), found in the ruins of an old church at Melenikos (*Melnik*) on the S.W. flank of Mt Orbelos, brought to Thessalonike in 1895 (J. H. Mordtmann in the *Ath. Mitth.* 1896 xxi. 100 f. no. 6), and now at Brussels (F. Cumont *Catalogue des sculptures & inscriptions antiques* (*monuments lapidaires*) *des Musées Royaux du Cinquantenaire*[2] Bruxelles 1913 p. 63 ff. no. 52 fig.), shows a youthful god riding from left to right. His long hair is bound by a *stróphion*, in the front of which are stuck two little clusters of ivy-berries. Across his chest is slung a *nebrís*. On his feet are Thracian boots. Being in a festive mood, he grasps with his right hand the beard of a goat-footed Pan, who follows his master, hanging on in true Greek fashion to the horse's tail. In the background is a huge vine with two small vintagers in its branches. One of these holds out a big bunch of grapes to the god as he passes by. Old Silenos in a tufted costume, with his *chitón* knotted round his waist, dangles a bunch in his right hand and raises a reaping-hook in his left to gather a second. Under the horse is seen a panther, half-hidden by the vine. The slab is inscribed Κλαυδιανὸς Πύρρος καὶ Πύρρος | Λάνδρου καὶ οἱ περὶ αὐτοὺ(ς) σαλτάριοι θεῷ 'Ασδούλῃ τῷ ϛμϛ' ἔτ(ε)ι (246 of the Actian era = 215 A.D.). Λάνδρου is perhaps an abbreviation of Λεάνδρου rather than a slip for Μάνδρου. The σαλτάριοι are the *saltuarii*, Low Latin *saltarii*, people employed about a *saltus*, 'vineyard-keepers.' The god's name should be read 'Ασδούλῃ (Cumont); not 'Ασδουλήτῳ (Mordtmann) nor 'Ασδουλητῷ (Perdrizet). It recurs as that of a man in the *Corp. inscr. Lat.* x no. 216 = Orelli—Henzen *Inscr. Lat. sel.* no. 6840 (from Grumentum in Lucania) ....VIX.... AVR·ASDVLA·MIL | COH·V·PRETORIE | FRATRI·BENMEREN (*sic*) | QVI·MECV LABORAIT (*sic*) | AN·XII ET·FRVNINONE | EST IN BARBARICO. Reliefs* ii. 162 no. 1, F. Cumont *loc. cit.*

[4] So W. Tomaschek 'Die alten Thraker' in the *Sitzungsber. d. kais. Akad. d. Wiss. in Wien* Phil.-hist. Classe 1894 cxxx. 2. 42, comparing Hdt. 9. 119 Οἰόβαζον μέν νυν ἐκφυγόντα ἐς τὴν Θρηΐκην Θρηΐκες 'Αψίνθιοι λαβόντες ἔθυσαν Πλειστώρῳ ἐπιχωρίῳ θεῷ τρόπῳ τῷ σφετέρῳ with Dionys. *per.* 575 f. Θρήικος ἐπ' ᾠόσιν 'Αψινθιοιο | Βιστονίδες καλέουσιν ἐρίβρομον Εἰραφιώτην. The same comparison was made earlier by C. Müller in his note on Dionys. *per.* 575 and is repeated by O. Höfer in Roscher *Lex. Myth.* iii. 2563.

[5] *Et. mag.* p. 186, 32 καὶ Βάλιν, τὸν Διόνυσον, Θρᾶκες (so T. Gaisford following codd. D. P. M. F. Sylburg had omitted the essential word Βάλιν, including the rest under the gloss Βαλίαι· κ.τ.λ.). Cp. Hesych. Εὐρυβάλινδος· ὁ Διόνυσος. The meaning of these titles is clear from Aisch. *Pers.* 658 βαλὴν ἀρχαῖος βαλὴν ἴθι, ἰκοῦ with schol. *ad loc.* βαλλὴν (βαλὴν H. vulg.) βαρβαρικῶς ὁ βασιλεὺς λέγεται. Εὐφορίων δέ φησι Θουρίων (Meineke cj. Φρυγίων) εἶναι τὴν διάλεκτον [ὅθεν καὶ Βαληναῖον ὄρος, ὅ ἐστι βασιλικόν]. φησὶν οὖν· ὦ ἀρχαῖε βασιλεῦ, ἰκοῦ κ.τ.λ., Soph. *poiménes frag.* 472 Nauck[2], 515 Jebb, *ap.* Sext. *adv. math.* i. 313 οἱ παρὰ τῷ Σοφοκλεῖ ποιμένες "ἰὼ βαλλήν" λέγοντες ἰὼ βασιλεῦ λέγουσι Φρυγιστί, Herodian. *περὶ μονήρους λέξεως* 17, 5 f. p. 52 Lehrs βαλλήν, οὕτως (so K. W. Dindorf for cod. οὗτος) ὁ βασιλεύς, Arkad. p. 9, 1 Barker βαλλήν, p. 9, 5 βαλλήν, Hesych. βαλ[λ]ήν· βασιλεύς. Φρυγιστί, Plout. *de flum.* 12. 3 f. παράκειται δὲ αὐτῷ (*sc.* the river Sagaris in Phrygia) ὄρος Βαλληναῖον καλούμενον, ὅπερ ἐστὶν μεθερμηνευόμενον βασιλικόν, τὴν προσηγορίαν ἔχον ἀπὸ Βαλληναίου τοῦ Γανυμήδους καὶ Μηδησιγίστης παιδός· οὗτος γὰρ τὸν γεννήσαντα θεασάμενος ἀποτηκόμενον τοῖς ἐγχωρίοις (lacunam indicavit D. Wyttenbach) καὶ Βαλληναῖον ἑορτὴν κατέδειξεν μέχρι νῦν καλούμενον. γεννᾶται δ' ἐν αὐτῷ λίθος καλούμενος ἀστήρ· οὗτος εἴωθεν νυκτὸς

Diónysos, the name that lends unity to these local cults, has been very variously interpreted[1].

(*a*) P. Kretschmer's hypothesis.

The view that at present holds the field is that of P. Kretschmer[2], whose arguments may be here resumed. Side by side with *Diónysos* there existed a form *Deónysos*[3], the non-Greek change of *i* to *e* in

βαθείας πυρὸς δίκην λάμπειν, τοῦ φθινοπώρου τὴν ἀρχὴν λαμβάνοντος· προσαγορεύεται δὲ τῇ διαλέκτῳ τῶν ἐγχωρίων βαλλήν, ὅπερ μεθερμηνευόμενόν ἐστιν βασιλεύς, καθὼς ἱστορεῖ Ἑρμησιάναξ Κύπριος ἐν β' Φρυγιακῶν (*frag.* 1 (*Frag. hist. Gr.* iv. 427 f. Müller)), Eustath. *in Il.* p. 381, 15 ff. *Αἰσχύλος δὲ...βαλῆνα τὸν βασιλέα ἐν τῷ "βαλὴν ἀρχαῖος βαλήν." γλώσσης δὲ τοῦτο, ἐξ οὗ καὶ ὄρος Βαλιναῖον, ὅ ἐστι βασιλικὸν παρὰ Πλουτάρχῳ ἐν τῷ περὶ ποταμῶν, id. in Od.* p. 1854, 26 ff. *λέγει δὲ καὶ Αἰσχύλος ἐθνικώτερον καὶ οὐ κατὰ Ἀττικοὺς βαλῆνα τὸν βασιλέα ἐν τῷ "βαλὴν ἀρχαῖος βαλήν." ὅθεν καὶ Βαληναῖον ὄρος παρὰ Πλουτάρχῳ ἐν τῷ περὶ ποταμῶν ἀντὶ τοῦ βασιλικόν*. It would seem, then, that the Thracian Dionysos was called Βάλιν or Βαλήν, *i.e.* 'King,' and that his title *Εὐρυβάλινδος* meant 'Wide-ruling' (cp. Pind. *Ol.* 13. 33 ff. *ὕπατ' εὐρὺ ἀνάσσων | Ὀλυμπίας,...Ζεῦ πάτερ*, Bakchyl. 5. 19 f. *αἰετὸς εὐρυάνακτος ἄγγελος | Ζηνὸς ἐρισφαράγου*, and the Euryanaktidai of Kos (J. Escher-Bürkli in Pauly—Wissowa *Real-Enc.* vi. 1318)). If so, we may conjecture that the Thracian kings who devoured Zagreus (*supra* i. 654 ff. pl. xxxvi), not merely assimilated the virtue of the god (*ib.* p. 656), but actually posed as Dionysos incarnate.

R. Förster in the *Ath. Mitth.* 1894 xix. 373 published an inscribed marble block from Bithynia reading ΔΙΙ ☙ ΒΑΛΗΩ | ☙ ΠΟΠΛΙΟΣ | ΑΝΤΩΝΙΟΣ | ☙ ΑΡΕΣΤΟΣ ☙. This Zeus *Βάλης* was compared with the Thracian Dionysos Βαλιός (*sic*) of *et. mag.* p. 186, 32 by O. Höfer in the *Jahrb. f. Philol. u. Pädag.* 1896 cliii. 472, and with the Phrygian *βαλήν* by H. van Herwerden *Lexicon Graecum suppletorium et dialecticum*[2] Lugduni Batavorum 1910 i. 261 (cp. *ib.* ii. 1090 *s.v.* παλήν).

P. Carolidis *Bemerkungen zu den alten kleinasiatischen Sprachen und Mythen* Strassburg 1913 p. 47 connects *βαλήν* or *βαλλήν* with the Armenian *gal, gal-am*, 'herrschen,' the Carian *γέλας*, 'king' (Steph. Byz. *s.v.* Σουάγελα), and even the Lydian *κοαλδεῖν*, 'king' (Hesych. *s.v. κοαλδδεῖν*. M. Schmidt *ad loc.* cp. *βαλλήν* and cites Hesych. *καλδῖς· βασιλεύς* and *λαίλας· ὁ τύραννος, ὑπὸ Λυδῶν*, on which see Steph. *Thes. Gr. Ling.* v. 41 A).

[1] Ancient and modern etymologies are collected by Preller—Robert *Gr. Myth.* i. 664 n. 1, Gruppe *Gr. Myth. Rel.* pp. 1409 n. 1, 1412 f., 1413 n. 1, 1414 n. 1, 1427 n. 9, O. Kern in Pauly—Wissowa *Real-Enc.* v. 1011.

[2] P. Kretschmer 'Semele und Dionysos' in *Aus der Anomia* Berlin 1890 pp. 17—29 criticised by Rohde *Psyche*[2] ii. 38 n. 1, to whom Kretschmer replies in his *Einleitung in die Geschichte der griechischen Sprache* Göttingen 1896 p. 241.

[3] *Et. mag.* p. 259, 30 *τοῦ ι τραπέντος εἰς ε γίνεται Δεόνυσος· οὕτω γὰρ Σάμιοι προφέρουσι*, where cod. V. has *εἶτα τραπέντος τοῦ ῑ εἰς ε̄ γέγονε δεόνυσος· Σάμιοι γὰρ οὕτω λέγουσι*. 'Samians' can hardly mean Samothracians, though Σάμος is used for Σαμοθράκη (W. Pape—G. E. Benseler *Wörterbuch der griechischen Eigennamen*[3] Braunschweig 1875 ii. 1337). ΔΕΟΝΥΣ or ΔΕΟΥΝΥΣ on tetradrachms of Maroneia *c.* 450—400 B.C. (*Brit. Mus. Cat. Coins* Thrace etc. p. 124 no. 10, Head *Hist. num.*[2] p. 249, *Ant. Münz. Berlin* Taurische Chersonesus, etc. i. 178 no. 28, Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 717 f. no. 5685, 7 with n. *ad loc.*). ΔΕΟ on tetradrachms and drachms of Abdera *c.* 512—478 B.C. (*Brit. Mus. Cat. Coins* Thrace etc. p. 66 no. 11 f., *Hunter Cat. Coins* i. 382 no. 1 pl. 26, 1, Head *Hist. num.*[2] p. 253, M. L. Strack in *Die antiken Münzen Nord-Griechenlands* Berlin 1912 ii Thrakien 1. 1. 47 no. 19, 1. 1. 51 no. 36 pl. 1, 8). [Δ] | ΕΟ | Ν[Υ] | ΔΟΣ on a tetradrachm of Abdera *c.* 478—450 B.C. (H. Montagu in the *Num. Chron.* Third Series 1892 xii. 27 pl. 2, 10, M. L. Strack *op. cit.* 1. 1. 54 no. 45), like *Δεονῦδος* in an inscription from Erythrai in Asia Minor (W. Judeich in the

the first syllable being due to the intermediate sound of the Thraco-Phrygian vowel[1] and pointing to the conclusion that Dionysos is '*von Haus aus ein Thraker*.' Greek dialects represent his name as *Diónysos*, *Dio͂nysos* and *Diónnysos*, thereby presupposing two original forms, *viz. Diónysos* and **Diosnysos*[2], of which the one is a compound *Dió-nysos*, the other a synthesis of the genitive *Diós* and **nȳsos*[3]. As to the meaning of the combination, Kretschmer insists that the first half contains the name of Zeus, who—he holds—was called *Zeús* alike by Thracians and by Hellenes. The second half he connects with *Nýsa* or *Nýse*, the mythical place to which Hermes brought Dionysos for the nymphs to rear[4], and with *Nȳsa*, the nymph who nursed the infant god[5]. Raising the question whether the nymph was called after the place or the place after the nymph, Kretschmer decides for the latter alternative on the ground that one of the fragments (fig. 176)[6] of a vase painted by Sophilos (*c.* 600—

Ath. Mitth. 1890 xv. 338 no. 1, Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 730 no. 5694. So Dittenberger *Syll. inscr. Gr.*[2] no. 744, 10 [Διον]ῦδος in a Rhodian inscription) and Δεονῦος in an inscription from Thasos (E. Jacobs in the *Ath. Mitth.* 1897 xxii. 120 ff. no. 1, 2, O. Hoffmann *Die Griechischen Dialekte* Göttingen 1898 iii. 38 no. 74, 2 cp. *ib.* p. 262 f., Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 2. 604 f. no. 5469, 2. Similarly Διονῦος in an inscription from Olbia: Collitz—Bechtel *op. cit.* iii. 2. 661 no. 5553), is gen. of Δεονύς=*Δεονύσιος. Δεύνυσος (schol. Townl. *Il.* 14. 325, *et. mag.*. p. 259, 28 and 31), Δεύνυσε (Anakr. *frag.* 2, 11 Bergk[4]), Δεύνυσον (Anakr. *frag.* 11, 2 Bergk[4], *et. mag.* p. 277, 37) have Ionic ευ for εο.

[1] W. Tomaschek 'Die alten Thraker' in the *Sitzungsber. d. kais. Akad. d. Wiss. in Wien* Phil.-hist. Classe 1894 cxxxi. 1. 31 cites Thracian names beginning with *Deo-* (*e.g.* Δεό-βιζος, Deo-pus) and *Dio-* (*e.g.* Διο-σκέβριος, Dio-bessi). P. Kretschmer in *Aus der Anomia* p. 23 notes the δεος or διως of Phrygian inscriptions (*infra* p. 278 n. 2) and the Macedonian *ινδέα* (Hesych. *ινδέα· μεσημβρία. Μακεδόνες*) for *ἐνδία* (*supra* i. 4 f.).

[2] P. Kretschmer in *Aus der Anomia* p. 24: 'Also haben wir nicht eine, sondern zwei Grundformen unseres Namens anzusetzen: Διόνυσος und *Διοσνυσος; jene blieb in allen Mundarten unverändert, diese gab im Aiolischen und Thessalischen regelrecht Διόννυσος, in den Mundarten aber, die o zu ω dehnen, Διώνυσος.' Etc.

[3] *Id. ib.* p. 25: 'Denn die Doppelform des Namens erklärt sich am einfachsten so, dass Διό-νυσος ein Compositum, *Διόσ-νυσος aber eine Zusammenrückung aus dem Gen. Διός und *νῦσος ist, von derselben Art wie Διόσ-κουρος, Διόζοτος=Διόσ-δοτος, Διόσ-πολις. Vgl. Prellwitz, *dial. thess.* 31.' *Id. Einleitung* etc. p. 241: 'Auch darauf sei noch hingewiesen, dass die doppelte Bildungsweise, das Kompositum Διό-νυσος und die Zusammenrückung *Διός-νυσος=aiol. Ζόννυσος, thess. kret. Διόννυσος (Knossos, Athen. Mitt. X 92. Eleutherna, Mus. Ital. II 165 f. n. 8), im Thrakischen ebenfalls ihre Parallele hat. Neben den Personennamen *Diu-zenus*, Δεύ-βιζος, *Dio-bessus* finden sich hier *Deos-por*, *Dios-cuthes*, deren Analyse sich aus *Muca-por*, bezw. Μιλτο-κύθης ergiebt[3] [*Tomaschek teilt unrichtig *Deo-spor*, *Dio-scuthes* ab.]' See, however, *infra* p. 279.

[5] R. Wagner in Roscher *Lex. Myth.* iii. 567 ff. For an excellent illustration of the Nymphs nursing the infant Dionysos among trees see the silver *alábastron* of *c.* 200 B.C. from Metropolis (*Karditsa*) in Thessaly published by A. S. Arvanitopullos in the *Ath. Mitth.* 1912 xxxvii. 76 ff. pls. 2 and 3, cp. A. de Ridder in the *Rev. Ét. Gr.* 1913 xxvi. 434 fig.

[6] F. Winter 'Vase des Sophilos' in the *Ath. Mitth.* 1889 xiv. 1—8 and col. pl. 1,

550 B.C.) represents a pair of nymphs inscribed *Nýsai*: a mere eponym would not have been thus pluralised. Kretschmer further suggests that *Nýsa* as a place-name is a shortened form of *Nyseía* or *Nysaía*, and observes that Homer uses only the adjectival phrase *Nyséïon*[1]. On this showing *nȳ́sā* was the Thracian term for a nymph or maid, and its masculine correlative was *-nȳ́sos*, the second element in *Dió-nysos*. We are thus led along a legitimate route[2] to the conclusion that *Diónysos* denoted simply 'Zeus' Son,' 'Zeus' Hero,'—a view confirmed by another remarkable vase-painting (fig. 177)[3], which describes the child Dionysos as *Diòs phós*, 'Zeus' Man,' 'Zeus' Hero,' not to mention a third, which dubs Herakles *Diòs païs*, 'Zeus' Son[4].'

[2] J. Savelsberg in the *Zeitschrift für vergleichende Sprachforschung* 1867 xvi. 60 n. had already related 'Διό-σνυσος "zeussohn"' to *νυός*, *nurus*, but he had spoilt his etymology by attempting to work in *νέος*, *νῦν*, and other totally unconnected words.

[3] G. Minervini *Monumenti antichi inediti posseduti da Raffaele Barone* Napoli 1852 i. 1—7 and Appendice p. vi pl. 1 (=my fig. 177), Jahn *Vasensamml. München* p. lxi n. 402, L. Stephani in the *Comple-rendu St. Pét.* 1861 p. 12, H. Heydemann *Dionysos' Geburt und Kindheit* (*Winckelmannsfest-Progr. Halle* 1885) Halle 1885 p. 13, P. Kretschmer *Die griechischen Vaseninschriften* Gütersloh 1894 p. 199, De Ridder *Cat. Vases de la Bibl. Nat.* i. 127 f. no. 219, P. Milliet—A. Giraudon *Vases antiques de la Bibliothèque Nationale* Paris 1891 i pl. 32 f. A (IVME Classe, viii[e] Série), O. Kern in Pauly—Wissowa *Real-Enc.* v. 1144. The obverse design of this small black-figured *amphora* from S. Maria di Capua shows Zeus seated to the right, in *chitón* and *himátion*, with a fillet on his head, a thunderbolt in his right hand, a sceptre in his left. On his lap stands a naked boy, with a fillet on his head and two flaming torches (not *thýrsoi*) in his hands. Moving to the right, but turning to speak with Zeus, is Hera, in *chitón* and *himátion*, her hair bound with a double fillet. Inscribed ΚΑΛΟΣ (καλός, not καλόν) ΔΙΟΣΦΟΣ ΗΕΡΑ O. Jahn *loc. cit.* recognised the scene as the 'Geburt des Dionysos'—an interpretation strongly supported by the analogous types of Athena's birth (*infra* § 9 (h) ii (*θ*)). P. Kretschmer in *Aus der Anomia* p. 29 was the first to read Διὸς φῶς as 'einen volkstümlichen oder sacralen... Ausdruck für das Verhältnis des Dionysos zu Zeus,' rightly objecting to such a poetic locution as Διὸς φῶς (cp. *supra* i. 7 n. 3 and Xen. *an.* 3. 1. 12 φῶς μέγα ἐκ Διὸς ἰδεῖν ἔδοξε).

[4] J. Millingen *Ancient Unedited Monuments* London 1822 i. 91 f. pl. 38, 1, Müller—

(β) Criticism of P. Kretschmer's hypothesis.

Kretschmer's solution of the problem, being phonetically unassailable, has been accepted by the majority of scholars, but is perhaps open to criticism on two grounds. In the first place,

Fig. 177.

Pherekydes of Leros is credited with the statement that *Diónysos* was so named because he flowed from *Zeús* on to the *nýsai* or 'trees[1].' This rather enigmatic assertion probably hangs together with Pherekydes' description of Semele as *Hýe* and the nurses of

Wieseler *Denkm. d. alt. Kunst* i. 14 pl. 19, 96 a small black-figured *amphora* in the Louvre (E. Pottier *Vases antiques du Louvre* 2me Série Paris 1901 p. 133 no. F 385, *id. Cat. Vases du Louvre* iii. 811 no. F 385) representing the combat between Herakles and Kyknos inscribed HEPAKLLES (*sic*) ΔIOSΓAIS and KY+NOS (retrograde). Cp. *Corp. inscr. Gr.* iii no. 7610.

[1] Schol. Aristeid. iii. 313 Dindorf εὐεργετεῖν φησι τὸν Διόνυσον καὶ (C. Müller lacunam indicat) δοῦναι ἀνθρώποις. δηλοῖ δὲ (καὶ D.) ὁ Φερεκύδης (*frag.* 1 *a* (*Frag. hist. Gr.* iv. 637 Müller)), καὶ μετ' (ἐπ' D.) ἐκεῖνον Ἀντίοχος (*sc.* of Syracuse), λέγοντες καὶ διὰ τοῦτο κεκλῆσθαι Διόνυσον, ὡς ἐκ Διὸς ἐς νύσας ῥέοντα· νύσας (νύσσας D.) γάρ, φησίν, ἐκάλουν τὰ δένδρα· κ.τ.λ.

Dionysos as *Hyádes*[1]. Since this fifth-century author, the earliest writer of Attic prose[2], indited a book *On the Festivals of Dionysos*[3], he was doubtless well posted on the mythology of the god, and we must not dismiss his remarks as idle invention[4]. They fit on to a number of stray hints and intimations. Thus lexicographers and scholiasts tell us that *Sabázios*, the Phrygian Zeus[5] or Dionysos[6], was entitled *Hýes*[7], *Hýas*[8], *Hyeús*[9]. Kleidemos, the oldest exponent of local Attic lore[10], said that Dionysos was called *Hýes* 'because we sacrifice to him in time of rain[11].' Others explained 'that Dionysos was *Hýes* from the rain that fell at his begetting, when Zeus rained ambrosia upon him[12].' Plutarch in a more philosophical mood declares that the Greeks name 'Dionysos *Hýes* as lord of watery nature[13].' Nonnos waxes eloquent on the theme and makes Gaia address Dionysos in the following terms:

> Zeus' son, grain-giver, murderer--ay, thou rulest
> Both fruitful rain and bloody snow alike:
> With rain thou didst bedew the whole rich field
> Of Hellas, and with gore hast drenched the tilth
> Of India; sheaves thy harvest once, now death.
> Thy flakes found ears for the peasants; thou hast reaped
> The Indian host and cut men down like corn.
> Raindrops thou bringest from Zeus, from Ares blood[14].

[14] Nonn. *Dion.* 22. 276 ff.

Elsewhere the same author expresses the Orphic belief that the infant Dionysos 'was a second Zeus | And sent the rain-storm[1].' These and other indications of an essential connexion between Dionysos and the rain[2] warrant us in attaching weight to Pherekydes' statements. It would seem that, in Thraco-Phrygian myth, not only did Zeus descend in rain upon Semele when he begat Dionysos[3], but Dionysos himself 'a second Zeus' came upon the *nýsai* or 'trees' in the form of rain. And after all, *nýsai* 'trees' are compatible with *nýsai* 'nymphs'; for nymphs may be tree-nymphs, and it is on record that Dionysos was nursed by the Dryads[4].

In the second place, exception might be taken to Kretschmer's view that the sky-god was called *Zeús* by Thracians as well as Hellenes. That view is based[5] on the fact that, just as Hellenic names derived from *Zeús, e.g. Diódoros, Diogénes, Dioméde*s, have for their first element *Dio-*, so Thracian names begin sometimes with *Deo-*[6], *Dio-*[7], *Diu-*[8], sometimes with *Deos-*[9], *Dios-*[10],—the twofold

Classe 1893 cxxviii. 71 f.

Δῖο-σκέβριος in an inscription from Miletopolis in Mysia first published by Lebas—Waddington *Asie Mineure* v no. 1105 ΑΙΟCΚΕΡΒΙΟCΡΟΥΦΟC κ.τ.λ. and later corrected by G. Perrot—E. Guillaume—J. Delbet *Exploration archéologique de la Galatie et de la Bithynie d'une partie de la Mysie de la Phrygie, de la Cappadoce et du Pont* Paris 1872 i. 99 ΔΙΟCΚΕΡΒΙΟCΡΟΥΦΟC κ.τ.λ.

method of formation producing on the one hand a compound, *e.g.* *Dió-nysos*, on the other a synthesis, *e.g.* **Diós-nysos*. But these data, it seems to me, are susceptible of another interpretation, *viz.* that corresponding with the Hellenic sky-god *Zeús* there was a Thracian sky-god *Díos*, whose name coupled with an appellative appeared now as *Díos Pápas* or the like, 'Dios the Father[1],' now as *Díos Nŷsos*, 'Dios the Son[2].' The Greeks, familiar with *Diós* as the genitive case of *Zeús*, would inevitably take this *Díos Nŷsos* to mean 'Son of Zeus' and would therefore readily form the Hellenic compound *Dió-nysos*[3].

(γ) *Díos* and *Díos Nŷsos*.

Further evidence of a Thraco-Phrygian sky-god called *Díos* may be sought both on the Asiatic and on the European side of the Dardanelles. Epitaphs of the Roman imperial age found in Phrygia and published by Sir W. M. Ramsay[4] and Mr W. M. Calder[5] com-

[8] *Diu-zenus*, a Bessian, is mentioned in a bronze diptych found at Stabiae in 1749 A.D. and now preserved at Naples: *Corp. inscr. Lat.* iii. 844, x no. 769, Wilmanns *Ex. inscr. Lat.* no. 2863, 13 f., Dessau *Inscr. Lat. sel.* no. 1986 gregali: Spartico Diuzeni f. Dipscurto (altered from *Dibpscurto*), | Besso.

[9] *Deos-por* in a military dedication of 223 A.D. found at Xanten and now at Bonn: Orelli—Henzen *Inscr. Lat. sel.* no. 6804, Dessau *Inscr. Lat. sel.* no. 2350 Sept. Deospor etc. W. Tomaschek in the *Sitzungsber. d. kais. Akad. d. Wiss. in Wien* Phil.-hist. Classe 1894 xxxi. 1. 31 divided *Deo-spor*, cp. Σποράκης (Dion Cass. 68. 21). P. Kretschmer (*supra* p. 272 n. 3) divides *Deos-por*.

[10] *Dios-cuthes* on a large broken coffer from Reusilava or Orsilava near Kirlikova in Makedonia: *Corp. inscr. Lat.* iii no. 703, 5 SABINVS · DIOSCVTHIS. W. Tomaschek *loc. cit.* divided *Dio-scuthes* like Διο-σκέβριος (*supra* p. 276 n. 7). P. Kretschmer (*supra* p. 272 n. 3) divides *Dios-cuthes*.

[1] On Πάπας as the Thracian term for 'Father' see W. Tomaschek in the *Sitzungsber. d. kais. Akad. d. Wiss. in Wien* Phil.-hist. Classe 1894 xxxi. 1. 18. *Infra* § 3 (a) iv (δ).

[2] *Díos Nŷsos* could presumably pass into **Diós-nysos*. Cp. *Dies* + *Pater* = *Diespiter* (K. Brugmann *Kurze vergleichende Grammatik der indogermanischen Sprachen* Strassburg 1904 p. 298, K. Brugmann—A. Thumb *Griechische Grammatik*[4] München 1913 pp. 182, 200).

[3] Another possible, but—I think—less probable, explanation would be to suppose that the compound *Diónysos* was originally Thracian and meant the same as *Díos Nŷsos*, 'Dios the Son.' The main objection is the rarity of such appositive compounds: K. Brugmann *Kurze vergleichende Grammatik der indogermanischen Sprachen* Strassburg 1904 p. 303 quotes *ἰατρό-μαντις* and analogous forms from Gothic, Old Church Slavonic, and Russian. Other examples are collected by F. H. M. Blaydes in his notes on Aristoph. *ran.* 499, 937. But these are all cases of mixed human (Διονυσαλέξανδρος etc.) or animal (*τραγ-έλαφος* etc.) types. What of Δειπάτυρος (*supra* i. 681 n. 4)?

[4] Sir W. M. Ramsay 'Phrygian Inscriptions of the Roman Period' in the *Zeitschrift für vergleichende Sprachforschung* 1887 xxviii. 381—400, *id.* 'Neo-Phrygian Inscriptions' in the *Jahresh. d. oest. arch. Inst.* 1905 viii Beiblatt pp. 79—120. See also A. Fick in the *Beiträge zur kunde der indogermanischen sprachen* 1889 xiv. 50 f. with the reply of Sir W. M. Ramsay *ib.* pp. 308—312.

[5] W. M. Calder 'Corpus inscriptionum Neo-Phrygiarum' in the *Journ. Hell. Stud.* 1911 xxxi. 161—215 and 1913 xxxiii. 97—104.

monly end with a curse on the violator of the tomb[1]. This curse, expressed in the Phrygian language though the rest of the inscription is in Greek, devotes the offender to Attis among certain powers, who are described as *deōs zemelōs, deōs zemelōs ke, zemelō ke deos, diōs zemelōs, dios ke szemelōs ke,* or the like[2]. The most probable interpretation of this vexed phrase[3] is that proposed by G. Meyer[4],

[1] Such *formulae* of execration were in use among the Phrygians a thousand years earlier (*id. ib.* 1913 xxxiii. 102).

[2] The examples so far published are the following (numbered in accordance with Mr Calder's *Corpus*):

nos. 4 *δη διως ζεμελω[s τιττετ]ικμενος ειτὸν (or ζεμελω [ετιτ...]).*
5 *με διω[s ζ]ομολω ετιτετικμενος ητου.*
6 *τος νι με ζεμελω κε δεος ετι ητιττετικμενος ε[ιτ]ου.*
7 *δεος κε ζεμ[ελωs...] ακεοι ειροια τι ετιτ[τετικμενα ειττ]νου.*
21 *με ζεμελως τιττετικμενος ειτου.*
25 *τος νι [δεος ζ]ιμ[ε]λως τι με κ(ε) Ατ[τι] τιττετικμενος ειτου.*
30[a] *[δ]ιος [κ]ε [σ?]ζεμ[ελ]ως κε τιτ[τ]ε[τ]ικμε[νος] ειτου Αττιη κε αδειτου.*
40 *δεως ζεμελως κε τιττετικμε[ν]ος ειτου.*
42 *[με ζε]μελως κε [δ]ε[ω]s....*
62 *Αττιη κε δεως κε τιτεττικμενος ειτου.*
63 *δεως ζεμελως [τ]ε τιτετ[ουκμενος ειτου].*
68 *[δεως ζεμελως] ετι[τ]τετικ[μενος ειτου].*

The whole *formula* was almost certainly metrical. Prof. A. H. Sayce in the *Jahresh. d. oest. arch. Inst.* 1905 viii Beiblatt p. 85 restores the original as a hexameter couplet: ΙΟC ΝΙ CЄΜΟΥΝ ΚΝΟΥΜΑΝΙ ΚΑΚΩΝ ΑΔΔΑΚЄΤΟ ΖЄΙΡΑ | ΜЄ ΖЄΜЄΛΩC ΚЄ ΔЄΟC ΚЄ ΤЄΤΙΚΜЄΝΟC ΑΤΤΙЄΑΔ ЄΙΤΟΥ, where ΙΟC =ὅs, ΝΙ is a particle like ἄν or *νυ*, CЄΜΟΥΝ is dat. of a demonstrative stem, ΚΝΟΥΜΑΝΙ is dat. of a noun meaning 'tomb,' ΚΑΚΩΝ=*κακόν*, ΑΔΔΑΚЄΤΟ is from the stem seen in *ἔθηκα, θήκη*, ΖЄΙΡΑ=χεῖρα, ΜЄ=*μετά*, ΚЄ=*καί*, ΤЄΤΙΚΜЄΝΟC must mean 'devoted to,' etc. R. Meister in the *Indogermanische Forschungen* 1909 xxv. 318 n. 1 says: '*ττετικμενος* (zur Bestrafung) "zugesprochen" oder "angezeigt," auch in den Formen *ατετικμενος* (d. i. *ατ-τετικμένος*) 41 und mit Vereinfachung der Gemination *τετικμενος* 5, 11, 14, 20, 21, 38, 45; *τ-τικω* "ich spreche zu, zeige an" (=griech. *ἐπι-δείκνυμι*, lat. *ad-dīco*) ist zusammengesetzt mit der Schwundstufe der Präposition *ατ*, idg. *ad* (Brugmann, KVG. 476),' etc. *Id. ib.* 1909 xxv. 318 n. 2: '*ατ Τιαδ* "zu Zeus hin" mit Verdoppelung der Richtungsangabe wie z. B. im lat. *ad-versus*; *Τιαδ* geht auf **Diyŋ-dhe*: **Τιαν-δ(ε)* zurück, *-(ε)* ist vor Vokal elidiert. *ν* ist im Phrygischen vor *s* (Akk. Plur. *δεως διως* "die Götter" 4a, 5, 40, *ζεμελως* "die Unterirdischen" 4a, 6, 25, 42 u. a.) und vor dem spirantisch gewordenen und oft (nicht nur vor *ι* [Kretschmer Einl. 196]) mit *s* wechselnden *δ* mit Ersatzdehnung geschwunden. Statt *Τι-ᾱδ* 11, 41, 44 steht auch *Τι-εαδ* 12, 45 und *Τι-ηκ-εαδ* 39 (mit *εα* werden ebenso wie mit *αε lange* Vokale bezeichnet), das letztere eine Weiterbildung des Zeusnamens mit dem Kosesuffix *-ēκ* (Brugmann Grundriss II[2], 501), das auch in *βαν-ηκ-os* "des Weibes" 30 vorliegt.' But W. M. Calder in the *Journ. Hell. Stud.* 1911 xxxi. 204 ff., 214 f., *ib.* 1913 xxxiii. 98 proves that the concluding words are the equivalent of *κατηραμένος* *Αττι ἔστω* and must be divided ΨΑΤΤΙЄ (dat.) ΑΔЄΙΤΟΥ (cp. *adesto*). Accordingly I would amend Sayce's restoration as follows:

ΙΟC ΝΙ CЄΜΟΥΝ ΚΝΟΥΜΑΝЄ ΚΑΚΟΥΝ ΑΔΔΑΚЄΤΙ ΖЄΙΡΑ,
ΜЄ ΖЄΜЄΛΩC ΤЄ ΔЄΩC ΤЄ ΤЄΤΙΚΜЄΝΟC ΑΤΤΙ' ΑΔЄΙΤΟΥ.
Whosoever upon this tomb lays evil hand,
Among gods below and gods above let him be devoted to Attis.

[3] Sir W. M. Ramsay in the *Zeitschrift für vergleichende Sprachforschung* 1887 xxviii.

P. Kretschmer[1], and W. M. Calder[2], who agree in rendering 'heavenly and chthonian gods.' We may reasonably infer that in Phrygia the earth-goddess Semele[3] was associated with a sky-god known as

397 n. 1 translated *με ζεμελω* by '*μετὰ τέκνων*.' A. Torp 'Zu den phrygischen Inschriften aus römischer Zeit' in the *Skrifter udgivne af Videnskabsselskabet i Christiania* 1894 ii Historisk-filosofisk Klasse Christiania 1895 no. 2 p. 16 f., *id.* 'Zum Phrygischen' *ib.* 1896 no. 3 p. 4 takes *με* = *μετά* and regards *δεως κε ζεμελως* as meaning 'himself and his family.' P. Kretschmer in *Aus der Anomia* Berlin 1890 p. 19 f., cp. *id. Einleitung in die Geschichte der Griechischen Sprache* Göttingen 1896 p. 226, renders *δεως διως* 'Himmel' and *ζεμελω* 'Erdgottheit, Erde.' F. Solmsen 'Zum Phrygischen' in the *Zeitschrift für vergleichende Sprachforschung* 1897 xxxiv. 54 f. understands *δεος διως* as a gen. sing. = *Διός* and *ζεμελως* as a gen. sing. = *Σεμέλης*. Sir W. M. Ramsay in the *Jahresh. d. oest. arch. Inst.* 1905 viii Beiblatt p. 107 translates *με διως ζεμελως τι, με ζεμελω κε δεος* by 'among gods and men,' regarding the termination as that of a dat. plur. (*-ως* rather than *-οs*).

[4] G. Meyer 'Albanesische Studien' iii in the *Sitzungsber. d. kais. Akad. d. Wiss. in Wien* Phil.-hist. Classe 1892 cxxv. 11. 21 n. 2 says: 'Mir scheint, dass in jener phrygischen Verwünschungsformel *ζεμελω* derselbe Casus sei, wie das parallele *δεος* oder *διως*, und zwar eine Pluralform (in Nr. 25 bei Ramsay Phrygian Inscriptions, KZ xxviii, 381 ff., steht *ζ]εμελως*), mit Nichtschreibung des *-s*, und dass die Formel bedeute: "bei den irdischen und himmlischen (Gottheiten)."' Cp. *id.* as cited by W. Gurlitt in the *Gött. gel. Anz.* 1892 p. 514.

[1] P. Kretschmer in the *Jahresh. d. oest. arch. Inst.* 1905 viii Beiblatt p. 79 n. 1 'would prefer ΔΕΦC ΚΕ ΖΕΜΕΛΦC "heavenly and Chthonian gods."'

[2] W. M. Calder in the *Journ. Hell. Stud.* 1911 xxxi. 207 f.

[3] The opinion of ancient scholars that Semele was but another name of Ge (Apollod. *frag.* 29 (*Frag. hist. Gr.* i. 433 Müller) *ap.* Lyd. *de mens.* 4. 51 p. 107, 1 ff. Wünsch *φέρεται δὲ καί τις μῦθος περὶ αὐτοῦ κατὰ τὸν Ἀπολλόδωρον, ὡς εἴη γεγονὼς ἐκ Διὸς καὶ Γῆς, τῆς δὲ Γῆς Θεμέλης προσαγορευομένης διὰ τὸ εἰς αὐτὴν πάντα καταθεμελιοῦσθαι, ἣν κατὰ συναλλαγὴν ἑνὸς στοιχείου, τοῦ σ̄, Σεμέλην οἱ ποιηταὶ προσηγορεύκασι, et. Gud.* p. 498, 39 ff. *Σεμέλη, θεός, θεμελίς, θεμελιῶτις οὖσα. θέμελις ἡ γῆ προσαγορεύεται· διὰ τὸ ἐν αὐτῇ πάντα καταθεμελιοῦσθαι· καὶ κατ' ἐναλλαγὴν τοῦ θ εἰς σ, Σεμέλη*; Diod. 3. 62 *ὁμοίως δὲ καὶ τὴν ἐκ Σεμέλης γένεσιν εἰς φυσικὰς ἀρχὰς ἀνάγουσιν, ἀποφαινόμενοι Θυώνην ὑπὸ τῶν ἀρχαίων τὴν γῆν ὠνομάσθαι, καὶ τεθεῖσθαι τὴν προσηγορίαν [καὶ* del. H. K. A. Eichstädt] *Σεμέλην μὲν ἀπὸ τοῦ σεμνὴν εἶναι τῆς θεοῦ ταύτης τὴν ἐπιμέλειαν καὶ τιμήν, Θυώνην δ' ἀπὸ τῶν θυομένων αὐτῇ θυσιῶν καὶ θυηλῶν*. Conclusions right: etymologies wrong) has been confirmed, not only by modern mythologists (Welcker *Gr. Götterl.* i. 434 ff., Gerhard *Gr. Myth.* i. 182, 505, Preller—Robert *Gr. Myth.* i. 660, O. Jessen in Roscher *Lex. Myth.* iv. 664 ff. A notable dissenter is Gruppe *Gr. Myth. Rel.* p. 1415 n. 6), but—what is more to the point—by modern philologists. V. Hehn *Kulturpflanzen und Hausthiere in ihrem Übergang aus Asien nach Griechenland und Italien sowie in das übrige Europa*[1] Berlin 1870 pp. 24, 412 f. n. 15 conjectured that *Σεμέλη* was a Thracian word for 'Erde, Erdgöttin,' related to *χαμαί, humus*, etc. P. Kretschmer 'Semele und Dionysos' in *Aus der Anomia* Berlin 1890 p. 17 ff. first established the conjecture on a sound basis by proving that the word really occurred in Thraco-Phrygian sources: 'Zur Deutung des zweiten Begriffes *ζεμελω* kann uns die hesychische Glosse *ζεμελεν· βάρβαρον ἀνδράποδον· Φρύγες* behilflich sein, welche man mit Recht zu indogermanisch *ghem-*, skr. *kṣam-*, avest. *zâo*, Gen. *zemō* "Erde," slav. *zemlja*, lit. *žẽmė* "Erde," *žẽmas* "niedrig," gr. *χθών*, Loc. *χαμαί, χθαμαλός*, lat. *humus* "Erde," *humilis* "niedrig," *homo homo* "Mensch," *humānus*, got. *guma* "Mensch" gestellt hat[1] [[1]Die Bildung ist dieselbe wie die von phryg. *βρίκελος*, *Κυβέλη* (auf einer phryg. Inschrift *matar Kubile*) und gr. *χθαμαλός*, lat. *humilis*.]. Fick, Spracheinh. a.a. O [A. Fick *Die ehemalige Spracheinheit der Indogermanen Europas* Göttingen 1873 pp. 321, 416, 429].' This view, which links Semele with Nova *Zembla*

Déos or *Díos*. The inference can, I think, be raised to a high degree of probability. At Dorylaeion (*Eskishehir*), a great centre of Zeus-worship[1] in north-eastern Phrygia, G. Radet in 1893 found an altar dedicated to Zeus *Dios*[2]. A. Körte, reviewing Radet's discovery in 1897, threw out the ingenious suggestion that this title may attest a local survival of the primitive sky-god *Díos*[3] postulated by H. Usener[4]. Sir W. M. Ramsay in 1906 assumed a long vowel and wrote Zeus *Dîos*[5]—a course in which I formerly followed him[6]. But Körte's case is materially strengthened by the occurrence of *deos*, *dios*, etc. in the neo-Phrygian inscriptions cited above[7]; and his

(Harrison *Proleg. Gk. Rel.*[2] p. 404), has met with almost universal accceptance and is clearly correct. See further Walde *Lat. etym. Worterb.*[2] p. 372 f. *s.v.* 'humus.'

[1] F. Cumont in Pauly-Wissowa *Real-Enc.* iii. 891 argues that Dorylaeion was the principal cult-centre of Zeus *Brontôn* (*infra* § 4 (d)). A. Körte in the *Ath. Mitth.* 1900 xxv. 409 f. demurs to this statement, though he admits that thirteen dedications to the god have been found there. Coins of the town show more than one type of Zeus. A copper struck by Trajan has rev. ΔΟΡΥΛΑ ΕΩΝ ΜΕΛΗΝΟC Zeus Μεληνός (meaning unknown) seated with *phiále* in right hand, sceptre in left, and eagle on ground behind the seat (Imhoof-Blumer *Kleinas. Münzen* i. 225 no. 1, *Brit. Mus. Cat. Coins* Phrygia p. lvii). Coppers of Titus have rev. ΙΤΑΛΙΚΩΑΝΘΥΠΑΤΩ ΔΟΡΥΛΑΕΩΝ Zeus enthroned to left with thunderbolt in right and sceptre in left hand (*Brit. Mus. Cat. Coins* Phrygia p. 195 pl. 25, 1). A 'third brass' of Domitian has rev. ΔΟΡΥΛΑΕΩΝ Zeus, naked, standing with *phiále* in right, sceptre in left hand (Rasche *Lex. Num.* Suppl. ii. 657). A copper of Philippus Senior has rev. ΕΠΙΜΑΥΡΤΙΜΑΙΟΥ·Α· ΑΡΧ·Κ·CΤΕΦΑΟΡΥΛΑΕ Ω Ν (ἐπὶ Μ. Αὐρ. Τιμαίου α' ἀρχ. κε στεφ.) Zeus standing to front, but facing left, with thunderbolt in right hand (*Brit. Mus. Cat. Coins* Phrygia pp. lvii, 198 pl. 25, 8). Cp. a copper of Gordianus Pius, having for reverse type two men (Dorylaos and Akamas?), each of whom holds a *phiále* over a flaming altar, while an eagle hovers above it (Imhoof-Blumer *Kleinas. Münzen* i. 226 no. 4, *Brit. Mus. Cat. Coins* Phrygia p. 197 pl. 25, 7). I. Meliopoulos in the *Ath. Mitth.* 1897 xxii. 480 f. publishes a dedication from Dorylaeion [- - - -?] *βου υἱῶι Διὶ Πατρῴ[ωι - - - -] | [σωτῆρι ἄπαν]τος ἀνθρώπων γένο[υς - - - - -] | [... καὶ θεοῖ]ς Σεβαστοῖς καὶ θεαῖς Σεβαστα[ῖς [καὶ Ὁ]μονοίαι Σ]εβαστῆι καὶ θεᾶι Ῥώμηι καὶ θεῶι Συνκλήτωι|[καὶ τῶι] δήμωι Ῥωμαίων κ.τ.λ.* Zeus Πατρῷος here means Hadrian as in *Corp. inscr. Gr.* ii no. 3187, 5 ff. Smyrna Διὸς Πατρῴου, Αὐτοκ[ράτορος, ἀρχιερέως]| *μεγίστου, πατρὸς τῆ[ς πατρίδος? καὶ σωτῆρος?]| τοῦ σύμπαντος ἀν[θρωπείου γένους· κ.τ.λ.]*. Sir W. M. Ramsay *Studies in the History and Art of the Eastern Provinces of the Roman Empire* Aberdeen 1906 p. 276 f. among other dedications to Zeus *Brontôn* at Dorylaeion includes no. 9 a *stêle* with pointed pediment, garland underneath, and letters under garland: Αὐρ. Δημᾶς Ἀσ[ι]|νίου *ὑπὲρ ἑαυ|τοῦ κὲ τῶν ἰδί|ων πάντων Διὶ Σ|ημαντικῷ εὐ|χήν*. The god that sent thunder and lightning thereby gave *σήματα* (*supra* p. 4).

Evidence of the worship of Dionysos at Dorylaeion is collected by W. Quandt *De Baccho ab Alexandri aetate in Asia Minore culto* Halis Saxonum 1913 p. 221 f.

[2] G. Radet 'En Phrygie' in the *Nouvelles Archives des Missions Scientifiques* Paris 1895 vi. 425—594.

[3] A. Körte in the *Gött. gel. Anz.* 1897 clix. 409 f.

[4] H. Usener *Götternamen* Bonn 1896 pp. 43, 70 f.

[5] Sir W. M. Ramsay *Studies in the History and Art of the Eastern Provinces of the Roman Empire* Aberdeen 1906 p. 275.

[6] *Supra* i. 4 n. 2.

[7] *Supra* p. 277 ff.

view must—as it now seems to me—be definitely preferred to the alternative hypothesis. If so, we have here the old Thraco-Phrygian *Díos* Hellenised, as might have been expected, into a Zeus *Díos*. Körte remarks that at Dorylaeion there were seven tribes named after the Mother of the gods, Zeus, Poseidon, Sarapis, Apollon, Aphrodite, and Augustus respectively[1]. But, since the tribe of Zeus was known as *Deía*[2], its eponymous deity was conceivably the Phrygian *Déos* rather than the Greek *Zeús*[3]. Be that as it may, Zeus *Díos* was a god of Dionysiac character, for his altar is decorated with grape-bunches[4] and a plough[5]. He should therefore be

[1] A. Körte in the *Gött. gel. Anz.* 1897 clix. 401 f.

[2] *Id. ib.* 400 f. no. 45 a marble base inscribed *θεὸς ἡγοῦ.* | *εἰκόνα τήνδε στῆσαν ἀγακλει|τῷ Στρατονεί|κῳ φυλέται οἱ Δείας εἶ|ναι ἀγαλλόμενοι. κ.τ.λ.*

[3] The inference is uncertain : *ει* may be for *ī* as in *Στρατονείκῳ*. But cp. the name *Δευονειας* in the neo-Phrygian inscription no. 69, 10 f. (W. M. Calder in the *Journ. Hell. Stud.* 1913 xxxiii. 98 ff. cites *Δεουας* from G. Perrot—E. Guillaume—J. Delbet *Exploration archéologique de la Galatie et de la Bithynie d'une partie de la Mysie de la Phrygie, de la Cappadoce et du Pont* Paris 1872 i. 52).

[4] Zeus is connected with the vine by an early Phrygian myth. According to Akousilaos of Argos, one of the older logographers (*c.* 525 B.C.), Priamos persuaded Astyoche, wife of Telephos, to send her son Eurypylos from Mysia to Troy by presenting her with a golden vine (Akousilaos *frag.* 27 (*Frag. hist. Gr.* i. 103 Müller) *ap.* schol. Q.V. *Od.* 11. 520, cp. schol. B.Q. *Od.* 11. 521). Some said that Priamos had himself made the vine (schol. Iuv. 6. 655—a notice full of confusions). But others stated that it was the golden vine which Zeus had given to Tros in exchange for Ganymedes and that it had passed to Priamos by way of inheritance (schol. T.V. *Od.* 11. 521, Eustath. *in Od.* p. 1697, 31 ff.). This version was derived from Lesches of Lesbos (*c.* 660—657 B.C.), who in his *Ilias parva frag.* 6 Kinkel *ap.* schol. Eur. *Tro.* 821 and *Or.* 1392 described the vine as follows : *ἄμπελον, ἣν Κρονίδης ἔπορεν οἱ* (so G. W. Nitzsch for *οὗ*) *παιδὸς ἄποινα χρυσείην* (*χρυσείοις* schol. Eur. *Tro.* 821) *φύλλοισιν ἀγανοῖσι* (J. Barnes *corr. ἀγαννοῖσιν*, F. Osann cj. *ἀγαυροῖσιν*, Jortin cj. *ἀγαυοῖσιν*, J. G. Schneider cj. *ἰανθέσι καὶ* or *ἅμ' ἄνθεσι καὶ*, J. G. J. Hermann cj. *παναργυρέοις*—an amazingly stupid emendation) *κομόωσαν βότρυσί θ'* (*βότρυσι* schol. Eur. *Or.* 1392), *οὓς Ἥφαιστος ἐπασκήσας Διὶ πατρὶ* | *δῶχ', ὁ δὲ* (*πατρὶ δῶκεν*, | *αὐτὰρ ὁ* schol. Eur. *Or.* 1392) *Λαομέδοντι πόρεν Γανυμήδεος ἀντί.* The tree, which forms the background for Ganymedes and the eagle in the Vatican group after Leochares (Overbeck *Gr. Kunstmyth.* Zeus p. 521 ff. Atlas pl. 8, 4 : bibliography in W. Helbig *Führer durch die öffentlichen Sammlungen klassischer Altertümer in Rom*[3] Leipzig 1912 i. 249 f. no. 386, ii. 473), is perhaps meant for this famous vine-stem. A similar tale told how Tithonos, the brother of Priamos, was induced by the gift of a golden vine to send Memnon, his son by Heos, to help the Trojans (Serv. *in* Verg. *Aen.* 1. 489). I take it that the golden vine belonged to the *regalia* of Troy and that its presence ensured the protection of the Thraco-Phrygian Zeus.

Parallels are not wanting. Pythios son of Atys, a Lydian, gave Dareios a golden plane-tree and vine (Hdt. 7. 27, Plin. *nat. hist.* 33. 137 (Pythis Bithyni), Aristeid. *or.* 13. 129 (i. 210 Dindorf) with schol. *ad loc.* p. 147, 19 ff. Dindorf, Tzetz. *chil.* 1. 923 ff., cp. Plout. *mul. virt.* 27, Polyain. 8. 42). These no doubt became heirlooms. For the Persian kings had a golden vine studded with gems above their couch (Chares of Mitylene *frag.* 10 (*Script. hist. Alex. Mag.* p. 117 Müller) *ap.* Athen. 514 E—F, Amyntas *frag.* 4 (*Script. hist. Alex. Mag.* p. 136 Müller) *ap.* Athen. 514 F), or golden planes and a golden vine with jewels for grapes, beneath which they often sat to transact business (Phylarchos *frag.* 41 (*Frag. hist. Gr.* i. 345 Müller) *ap.* Athen. 539 D. And over the doors of Herod's temple at Jerusalem rose a gigantic golden vine with hanging clusters (Ioseph. *ant. Iud.* 15.

compared with Zeus *Diónysos* (fig. 178) of north-eastern Thrace[1],

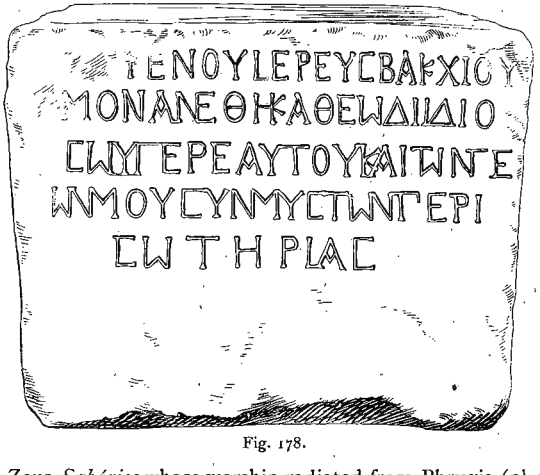

Fig. 178.

with Zeus *Sabázios* whose worship radiated from Phrygia (pl. xix)[2],

11. 3), which made people think that the Jews worshipped Liber Pater (Tac. *hist.* 5. 5). See further Boetticher *Baumkultus* pp. 212—214 ('Metallene Bäume') and G. W. Elderkin in the *Am. Journ. Arch.* 1917 xxi. 407 f. ('The Vine of Pythios and Andocides'). Note also *Inscr. Gr. Deli* ii no. 161 B 44 ἄμπελος χρυσῆ ἄσταχυς in an inventory of 279/280 B.C.

[5] Galen. *de aliment. facult.* 1. 13 (vi. 515 Kühn) notes that the grain called *ζεόπυρον* was grown at Dorylai (*sic*) in Phrygia.

[1] G. Kazarow in the *Jahrb. d. kais. deutsch. arch. Inst.* 1915 xxx Arch. Anz. pp. 87—89 fig. 1 (=my fig. 178) publishes a marble base (0·55^{m} high, 0·65^{m} broad) of late Roman date, from *Malko-Tirnovo* in the Bulgarian territory of *Burgas*, inscribed with a dedication *θεῷ Διὶ Διονύσῳ* by the priest of a *Βακχεῖον* (*Am. Journ. Arch.* 1916 xx. 228). The text runs: *..ιενοῦ ἱερεὺς Βακχίου [τὸν βω]μὸν ἀνέθηκα θεῶ Διὶ Διο[νύ]σω ὑπὲρ ἑαυτοῦ καὶ τῶν τέ[κν]ων μου συνμύστων περὶ | σωτηρίας.* The interest and importance of the find made in this locality is great. *Malko-Tirnovo* is within easy reach of *Vize*, the ancient Bizye, chief town of the Thracian Astai.

[2] *Supra* i. 390 ff. Thanks to the courtesy of Mr W. H. Buckler, I am enabled to supplement my previous account by publishing a new and important *stêle*, which he has lately presented to the British Museum. Pl. xix is from a photograph by Mr R. B. Fleming. Mr Buckler writes: 'This small stele, in good preservation except for the missing base, was bought for 20 francs at the bazaar in Constantinople in June, 1914, from a dealer who professed to know nothing of its origin. It then consisted of two closely fitting fragments, divided by a line of breakage passing through the eagle's neck and down along the front of the horse's fore leg. The lower part of the stele appeared to have recently been chiselled away; before restoration the lower edge, showing the coarse-grained bluish marble, of a kind common in Western Asia Minor, looked quite freshly cut. The inscription was then intact: *Εὔτυχος Διὶ Σαβαζείω | κατ' ὄνιρον χαριστήριον.* This inscription (Λ, Σ, Ω) might be as early as 1st century B.C., but of course dating from such indications is pretty uncertain. On the journey to London the larger fragment was broken in

Stéle obtained by W. H. Buckler in Constantinople: Zeus *Sabázios* on horseback, with altar, *kratér*, and leafless tree, in which are eagle and snake, surmounted by votive inscription.

See page 282 *n.* 2.

two, and this break, which shows clearly in the plate, almost destroyed the fifth letter in *δνιρον*. Dimensions as follows: Height, as now restored, 46 cm. Original portion: height 34 cm.; width at top 36 cm., at bottom 36½ cm.; depth of recessed panel 1½ cm.; thickness at top 6 to 4 cm. Back roughly tooled.'

The relief shows Zeus *Sabázios* as a bearded god on horseback advancing towards an ancient leafless tree. He wears a *chitón* with short sleeves, a stiff *chlamýs* over his back, and a diadem round his head. He holds a thunderbolt in his right hand, a couple of spears in his left. In the tree is an eagle side by side with a snake. Beneath the tree burns a small square altar, close to which stands a wide-mouthed *kratér*. Thunderbolt and eagle characterise the god as Zeus; snake and *kratér* (cp. Dem. *de cor.* 259 *κρατηρίζων*), as *Sabázios*. All four attributes are found on the *Sabázios*-monuments already noted (*supra* i. 391 ff. fig. 296 bronze hand, pl. xxvii bronze relief), which likewise have the

Fig. 179.

eagle and snake juxtaposed in friendly fashion. The unusual features of this *stéle* are the conception of the god as a rider and his connexion with a dream. Zeus *Sabázios* is not elsewhere an equestrian figure, unless it be he who on the well known but little understood bronze plaque from Rome, now at Berlin (F. Lajard in the *Mon. d. Inst.* iv pl. 38, 1, *id. Recherches sur le culte du cyprès pyramidal* Paris 1854 pp. 113 ff., 281 f., 360 pl. 7, 6, E. Gerhard 'Phrygische Götter zu Pferd' in the *Arch. Zeit.* 1854 xii. 209 ff. pl. 65, 3 (§ 3 (c) i (o)), Reinach *Rép. Reliefs* ii. 30 no. 3, W. Drexler in Roscher *Lex. Myth.* ii. 2744, T. Eisele *ib.* iv. 250), swings a double axe as he gallops over a prostrate human form. But the god appears in a variety of poses (figs. 179, 180, 185) according to local convention, and here it is not difficult to recognise the influence of Thrace (*supra* fig. 175). As to the dream, it will be remembered that in Aristoph. *vesp.* 9 ff. Sosias and Xanthias both get dreams from *Sabázios*. Xanthias sees a great eagle carry off an asp to the sky;

Sosias sees sheep in the *ekklesía*, etc.—fancies obviously suggested by the attributes (eagle, snake, ram) of *Sabázios* himself.

Other reliefs illustrating the cult of Zeus *Sabázios* are listed by T. Eisele in Roscher *Lex. Myth.* iv. 243 ff. They include: (1) A relief in white marble, drawn by A. Conze at *Schoinoudi* in Imbros, but said to have come from Blaudos (*Balát*) in the Mysian district of Abrettene (A. Conze *Reise auf den Inseln des Thrakischen Meeres* Hannover 1860

Fig. 180.

p. 98 ff. pl. 17, 7 = my fig. 179, T. Eisele *loc. cit.* iv. 243 fig. 2). The god, who is beardless, sits on a high-backed throne, with a band (?) round his head, a *phiále* in his right hand, and a spear or sceptre in his left. Beside him is a tree (palm?), up which his snake is coiled. Before him an altar, on which a man, followed by a woman, deposits a pinch of incense. Inscribed: Μέναν̣δρος Ἀθηνοδώρου Διὶ Σαξίωι | εὐχήν. Σαξίος is a mason's mistake for Σαξάζιος = Σαβάζιος (O. Höfer in Roscher *Lex. Myth.* iv. 229). Height *c.* 0·25^{m},

with Zeus *Poteos* (fig. 187) of Dionysopolis on the upper Maiandros in Phrygia[1], with Zeus *Poteús* (?) of Limnobria? (*Burdur*) on the breadth *c.* 0·18m. (2) A relief in white marble, found by A. Wagener in the court of a private house at Koloë (*Koula*) in Lydia (A. Wagener *Inscriptions grecques recueillies en Asie Mineure* (in *Mémoires couronnés et mémoires des savants étrangers, publiés par l'académie royale des sciences, des lettres et des beaux-arts de Belgique* 1858—1861 xxx) pp. 3—19 pl. A, 1 inscription only, T. Eisele *loc. cit.* iv. 243 f. fig. 3 = my fig. 180). The upper register shows a beardless male figure (Zeus *Sabázios*) driving towards the left a two-horsed vehicle. On the reins is seen an eagle; beneath the horses, a snake. The equipage is accompanied by a male figure (Men, cp. *supra* i. 193, 642) with a Phrygian cap (so Wagener: Eisele says, a bowl-shaped helmet) and a wingèd *caduceus*, between which appears a crescent moon. The remainder of the panel is filled by a personage pouring a libation at a raised altar and by three worshippers with gestures of adoration. The lower register groups thirteen worshippers about an altar, behind which rises a sacred tree. On the altar are piled round objects like loaves. Inscribed: *ἔτους* $\overline{ρπε}$ (185 of the Sullan or Lydo-Phrygian era = 101 A.D.), *μη(νὸς) Δαισίου ά, ἐπὶ στεφανη|φόρου Γλύκωνος, ἡ Κολοηνῶν κατοικία καὶ|θιέρωσαν Δία Σαβάζιον, ἐπὶ ἱερέων Ἀπολ|λωνίου τοῦ Ἰόλλα καὶ Ἀπολ|λωνίου τοῦ Δαΐπ|που Διὸς ὠπου καὶ Μητρᾶ Ἀσκληπιάδου καὶ | [Ἀρτε]μιδώρου Κλέωνος καὶ Κλέωνος Με|[νεκράτους καὶ Ἀ]πολλωνίου Δίωνος καὶ Α..* Height *c.* 1·50m, breadth *c.* 0·75m. Wagener with much probability concludes that a solar Zeus *Sabázios* is here conducted to his temple by the lunar Men, who is equipped with the *caduceus* of Hermes. The personage pouring a libation is—he supposes—the *stephanephóros* Glykon, and the sixteen suppliants are the priests of the god assisting at his installation. Since the Macedonian Daisios = the Attic Thargelion (W. Dittenberger in Pauly—Wissowa *Real-Enc.* iv. 2014), it would seem that Daisios 1 was a sort of May-day festival. (3) A marble relief at Philadelphia (*Ala-Shehir*) in Lydia represents Zeus *Sabázios* seated on a throne, holding a large-bodied vase in which a shrub is planted (O. Rayet in the *Bull. Corr. Hell.* 1877 i. 307—309, T. Eisele *loc. cit.* iv. 244). Inscribed: *Διὶ Κορυφαίῳ Δία Σα|ουάζιον Νεαυλ|είτην | Πλουτίων Πλουτίωνος | Μαίων εὐχήν.* Height 0·60m, breadth 0·37m. The image of Zeus *Σαουάζιος Νεαυλείτης* (*i.e.* Zeus *Σαβάζιος* of *Νεαυλή* (*Νέα Αὐλή*)) is here dedicated to Zeus *Κορυφαῖος* of Philadelphia (on whom see *infra* Append. B). (4) In the winter of 1864—1865 workmen digging at *Vichy* (? = Aquae calidae in Aquitania: M. Ihm in Pauly—Wissowa *Real-Enc.* ii. 298) near a well full of Roman remains found a packet of eighty *plaques* of thin silver foil, together with a coin of Gordianus and the statuette of a newborn babe in thin silver backed with resin. The *bratteae*, which vary from 0·05m to 0·17m in height and from 0·02m to 0·07m in breadth, are now in the Musée de Saint-Germain. They have in almost every case a tree or leaf impressed upon them (figs. 181, 182). Some add an *aedicula*, in which stands Iupiter with sceptre, bolt, and eagle (figs. 184—186), flanked on one specimen by a couple of grape-vines (fig. 186). Others symbolise the god by his bolt and reduce the vines to mere scrolls (fig. 183). The most important type subjoins a label inscribed: Numin·Aug·deo Iovi Sa|ba·sio (*sic*)·G·Iul·Caras|-sounus·v·s·l·m (fig. 185). See further C. Rossignol—A. Bertrand 'Notice sur les découvertes faites à Vichy et en particulier sur des Bractéoles votives d'argent' in the *Bulletin de la Société d'Émulation du département de l'Allier* (Sciences, Arts et Belles-lettres) Moulins 1889 xviii. 185—232 pls. 1—8, of which pl. 1, 1 and 2 = my figs. 181, 182, pl. 3, 1 and 3 = my figs. 184, 186, pl. 4, 1 = my fig. 183, pl. 5 = my fig. 185, T. Eisele *loc. cit.* iv. 245, *Corp. inscr. Lat.* xiii no. 1496. Similar *bratteae* in S. Lysons *Reliquiæ Britannico-Romanæ* London 1817 ii pls. 38—41, *Corp. inscr. Lat.* vii nos. 80 f., 84—86, *supra* i. 626 ff. Cp. the 'silver shrines of Diana' made at Ephesos (Acts 19. 24).

[1] A *quasi*-autonomous copper of Dionysopolis, struck in the time of Alexander Severus (?), has obv. ZEVCΠOTHOC ΔIONVCOΠOΛEITΩN· Head of Zeus *Ποτηος*, wearing fillet, to right, within border of dots; rev. CTPATHΓOVN-TOC[C]Ω[C] TPATOVB The river-god Maiandros recumbent to left, with reed and

cornu copiae, and behind him an inverted vase from which flows his river. ΜΕΑΝΔΡΟC in exergue. All within border of dots (Eckhel *Doctr. num. vet.*[2] iii. 150 f., Overbeck *Gr. Kunstmyth.* Zeus p. 223, *Brit. Mus. Cat. Coins* Phrygia pp. lv, 183 pl. 23, 4, Head *Hist. num.*[2] p. 671, O. Höfer in Roscher *Lex. Myth.* iii. 2902 f.). Fig. 187 is from a cast of the specimen in the British Museum. R. Rochette in the *Journal des savants* 1842 p. 10 n. 1 held that Ποτηος was a local epithet. Gerhard *Gr. Myth.* i. 169 took ποτέος (*sic*) to denote a rain-god. Sir W. M. Ramsay *The Cities and Bishoprics of Phrygia* Oxford 1895 i. 126 n. 2 suggests 'a rude attempt at the Greek Πύτιος (for Πύθιος...).' Lenormant—de Witte *Él. mon. cér.* i. 29 were the first to detect 'un caractère bachique,' which is rendered practically certain by the inscription from *Burdur* (*infra* n. 1).

[1] A *stèle* mentioning Zeus Ποτεύς (?) or Πότης (?) or Πότις (?), found at *Bouldour* or *Burdur* in Pisidia, was published by M. Collignon in the *Bull. Cor. Hell.* 1879 iii. 335 no. 3 Μεννέας Ἀρ|τεμιδώρου | ἐ|ρεὺς | Διὶ | Ποσ|ει | τὸν [β]ωμὸν | ἀνέστησεν. The stone (0·65[m] high, 0·33[m] broad, 0·20[m] thick) is adorned with reliefs—a bunch of grapes on its right side, a wreath on its left, and a *bucranium* adjoining the inscription in front. This interesting record of a Dionysiac Zeus was re-published by Sir W. M. Ramsay *The Cities and Bishoprics of Phrygia* Oxford 1895 i. 337 f. no. 178, cp. *ib.* i. 126 n. 2. See also O. Höfer in Roscher *Lex. Myth.* iii. 2902 f.

[2] *Corp. inscr. Gr.* ii no. 3538, 30 ff. = M. Fränkel in *Pergamon* viii, 1 no. 324, 30 ff. = Kaibel *Epigr. Gr.* no. 1035. 20 ff. = Cougny *Anth. Pal. Append.* 6. 172. 20 ff. (directions to avert the plague of 166 A.D.) ἑπτὰ γεραιρόντων εἰς ἥματα μῆρα ἑπὶ βωμ(ῶ)ν, | Παλλάδι μὲν μόσχου διετήρονος ἄζυγος ἀγνοῦ | δαίοντες, τριένου δὲ βοὸς Διί, καὶ Διὶ Βάκχωι | ὡσαύτως καὶ παιδὶ Κορωνίδος ἠθαλέοιο (E. Cougny cj. Αἰθαλέοιο cp. Pind. *Pyth.* 3. 75 ff.). | ταύρου μηρία ῥέξοντες προτιτύσκετε δαῖτα, | ἠίθεοι, χλαμύδεσσι ἀμφεμμένοι ὄπποσοι ἑ[στέ] | μὴ σφετέρων νόσφιν πατέρων· κ.τ.λ. See further *infra* Append. B Mysia.

Zeus Βάκχος is presumably to be equated with the important Pergamene god Zeus Σαβάζιος (M. Fränkel in *Pergamon* viii, 1 no. 248, 31 ff. Attalos iii Philometor (138—133 B.C.), nephew and successor of Attalos ii Philadelphos (159—138 B.C.), says of Sosandros, *σύντροφος* of Eumenes ii (197—159 B.C.) and priest of Dionysos Καθηγεμών at Pergamon: τοῦτον ἐγέννησεν, ὧι καὶ γενομένωι ἀξίωι τοῦ οἴκου ἡμῶν τὸ | μὲμ πρῶτον Ἄτταλος ὁ θεῖός μου σὺγ καὶ τῆι ἐμῆι γνώμηι ζῶντος | ἔτι τοῦ Σωσάνδρου ἔδωκε διὰ γένους ἱερεωσύνην τὴν τοῦ Διὸς | τοῦ Σαβαζίου τιμιωτάτην οὖσαμ παρ' ἡμῖν, ὕστερον δὲ μεταλλάξαντος | τοῦ Σωσάνδρου διὰ τὴμ περὶ αὐτὸν οὖσαγ καλοκἀγαθίαγ καὶ περὶ τὸ θε[ῖ]ον εὐσέβειαγ καὶ τὴν πρὸς ἡμᾶς εὔνοιαγ καὶ πίστιγ καὶ τῆς τοῦ Καθηγε|μόνος Διονύσου ἱερεωσύνης ἠξιώσαμεν αὐτόν, κρίναντες αὐτὸγ καὶ | ταύτης εἶναι ἄξιον τῆς τιμῆς καὶ πρεπόντως προστήσ(ε)σθαι μυστ[ηρί]ων τηλικούτωγ κἀγὼ καὶ Ἄτταλος ὁ θεῖός μου, κ.τ.λ., *ib.* 45 ff. Attalos iii says of Stratonike, wife of Eumenes ii: ἐπεὶ βασ[ί]λισσα Στρατονίκη ἡ μήτηρ μου εὐσεβεστάτη μὲγ γενομένη πασῶν, φιλ[ο]στοργοτάτη δὲ διαφερόντως πρός τε τὸμ πατέρα μου καὶ πρὸς ἐμέ, | πρὸς ἅπαντας μὲν τοὺς θεοὺς εὐσεβῶς προσηνέχθη, μάλιστα δὲ | πρὸς τὸν Δία τὸν Σαβάζιον, πατροπαράδοτον (see *infra*) αὐτὸγ κομίσασα εἰς | τὴμ πατρίδα ἡμῶν, δγ καὶ ἐμ πολλαῖς πράξεσι καὶ ἐμ πολλοῖς κινδύνοις παραστάτηγ καὶ βοηθὸν ἡμῖγ γενόμενον ἐκρίναμεν διὰ τὰς ἐξ αὐτοῦ | γενομένας ἐπιφανείας συγκαθιερῶσαι τῆι Νικηφόρωι Ἀθηνᾶι (*sc.* in the

and Dionysos were but different aspects of the self-same god. As Sir W. M. Ramsay, the highest living authority on Phrygia and all its ways, expresses it, 'The father and the son...are merely complementary forms of the single ultimate form of the divinity as male[1],' or again 'the character and personality of the God-father and God-son pass into one another in such a way in the divine tale or drama, that no clear line can be drawn to separate them[2].' This essential unity *saute aux yeux*, if—as I have supposed—the former deity was originally named Dios and the latter Dios *Nysos*. Well might Christianity take root and flourish (we know that it did[3]) among a people, who had already learnt that the Son was in the Father and the Father in the Son[4]. One of the earliest extant representations of our Lord, the tombstone of Abirkios and his wife Theuprepia, erected *c.* 300 A.D. at Prymnessos (*Seulun*) in central Phrygia (fig. 188)[5], shows Him as a youth raising His right

Nikephórion outside the city), νομισαν|τες τοῦτον αὐτῶι ἄξιογ καὶ πρέποντα τόπον ὑπάρχειν, διεταξάμε|θα δὲ ἀκολούθως τούτοις καὶ περὶ θυσιῶγ καὶ πομπῶγ καὶ μυστηρίων | τῶν ἐπιτελουμένωμ πρὸ πόλεως αὐτῶι ἐν τοῖς καθήκουσι καιροῖς καὶ τόποις· | ἐποήσαμεν δὲ αὐτοῦ καὶ ἱερέα διὰ γένους Ἀθήναιον τὸν ἐμόν (a slip for τὸν συγγενῆ τὸν ἐμόν, as Fränkel saw), εὐσεβείαι κα[ὶ] | καλοκἀγαθίαι διαφέροντα καὶ τῆι πρὸς ἡμᾶς πίστει· κ.τ.λ.=Michel *Recueil d'Inscr. gr.* no. 46, 31 ff., 45 ff.=Dittenberger *Orient. Gr. inscr. sel.* no. 331, 31 ff., 45 ff.).

In this connexion it is not without significance that P. Aelius Aristides, a native of Hadrianoi in Mysia, who had studied rhetoric under Aristokles at Pergamon (Philostr. *v. Aristid.* p. 83, 25 ff. Kayser), remarks: ἤδη δέ τινων ἤκουσα καὶ ἕτερον λόγον ὑπὲρ τούτων ὅτι αὐτὸς ὁ Ζεὺς εἴη ὁ Διόνυσος (Aristeid. *or.* 4. 29 (i. 49 Dindorf)). The allusion is in all probability to the Thraco-Phrygian god called by the Pergamenes Zeus Βάκχος or Zeus Σαβάζιος, whom Stratonike, wife of Eumenes ii, had introduced from the court of her father Ariarathes iv Eusebes, king of Kappadokia (*c.* 220—*c.* 163 B.C.).

It is noteworthy that on the Akropolis of Pergamon, south of the great altar of Zeus (*supra* i. 118 ff.), stood a Hellenistic temple of Dionysos (Καθηγεμών?) with a prostyle tetrastyle *façade* of *quasi*-Doric order (R. Bohn *Der Tempel des Dionysos zu Pergamon* Berlin 1885 (extr. from the *Abh. d. berl. Akad. 1884* Phil.-hist. Classe), E. Fabricius in Baumeister *Denkm.* ii. 1217, E. Pontremoli and M. Collignon *Pergame, restauration et description des monuments de l'acropole* Paris 1900 pp. 55—57, K. Hachtmann *Pergamon* Gütersloh 1900 p. 26).

My note on this incident in the *Class. Rev.* 1903 xvii. 417 n. 1 is far-fetched and improbable. Better service has been done by J. Schaefer *De Iove apud Cares culto* Halis Saxonum 1912 p. 370 f. (cp. P. Foucart in Lebas—Foucart *Peloponnèse* Explications ii. 221 and in the *Rev. Arch.* 1876 ii. 103, P. Kretschmer *Die Griechischen Vaseninschriften* Gütersloh 1894 p. 149), who rightly restores Ἀρκαδίαν for Καρίαν, remarking that the name Κερκιδᾶς is not found in Karia but is found in Arkadia, especially at Megalopolis (W. Pape—G. E. Benseler *Wörterbuch der griechischen Eigennamen*[3] Braunschweig 1875 i. 649, *Inscr. Gr. Arc. Lac. Mess.* ii nos. 439, 40, 550, 3), that another odd tale is told about the death of a Megalopolitan Kerkidas (Ail. *var. hist.* 13. 20), and that the cult of Zeus Ὀπλόσμιος is attested only for Methydrion, an Arcadian town which passed into the possession of Megalopolis (Collitz—Bechtel *Gr. Dial.-Inschr.* ii. 148 f. no. 1634, 17 ff. = Michel *Recueil d'Inscr. gr.* no. 199, 17 ff. = Dittenberger *Syll. inscr. Gr.*[2] no. 229, 17 ff. = *Inscr. Gr. Arc. Lac. Mess.* ii no. 344, 17 ff. περ[ὶ | δὲ τᾶς Νί]κας τᾶς χρυσέ[α]ς τοῦ Διὸς τοῦ Ὀπλοσμίου, ἃν καταθέντες ἐνέχυρα οἱ Μεθυ[δρι|εῖς οἱ μετοικ]ήσαντες ε[ἰ]ς Ὀρχομενὸν διείλοντο τὸ ἀργύριον κ.τ.λ. in an Achaean decree of *c.* 234/3 B.C., cp. Collitz—Bechtel *Gr. Dial.-Inschr.* i. 344 no. 1203, 10 = O. Hoffmann *Die Griechischen Dialekte* Göttingen 1891 i. 18 no. 8, 10 = Michel *Recueil d'Inscr. gr.* no. 614, 10 = *Inscr. Gr. Arc. Lac. Mess.* ii no. 271, 10 Ὀπλοδμίας (*sc.* φυλᾶς) in a tribal list not later than *c.* 350 B.C. Hera, and perhaps Athena, shared the title with Zeus. Lyk. *Al.* 613 f. τύμβος... | Ὀπλοσμίας refers to the Argive Hera (Tzetz. *in* Lyk. *Al.* 610) rather than to Athena (schol. Lyk. *Al.* 614, cp. schol. *Il.* 5. 412); Lyk. *Al.* 857 f.

hand with the thumb and two fingers extended in the attitude peculiar to the Phrygian Zeus[1]—an attitude known to later ages as the *benedictio Latina*[2].

θεᾷ Ὁπλοσμίᾳ to Hera Λακινία. Hera Ὁπλοσμία was worshipped in Elis and Triphylia (Tzetz. *in* Lyk. *Al.* 858, cp. Zonar. *lex. s.v.* Ὁπλοσμένα· ἡ Ἥρα, where J. A. H. Tittmann corr. Ὁπλοσμία); and there is said to have been a τύμβος (=βωμός) of Athena Ὁπλοσμία in Elis (Tzetz. *in* Lyk. *Al.* 614). As to the origin of the appellative, Ὁπλόσμιος < Ὁπλόδμιος < *Ὁπλοδάμιος (P. Kretschmer *Die Griechischen Vaseninschriften* Gütersloh 1894 p. 149 'also ein Compositum von ὅπλον und der reducirten Form von δαμ- in δάμνημι'), cp. Ὁπλάδαμος (P. Foucart cj. Ὁπλόδαμος), the giant of Methydrion who, when Rhea was pregnant with Zeus, was prepared to defend her against Kronos (Paus. 8. 32. 5, 8. 36. 2). See further Immerwahr *Kult. Myth. Arkad.* p. 26 f., O. Jessen in Pauly—Wissowa *Real-Enc.* viii. 2299). Possibly the same belief in the sanctity of the decorporated head accounts for the *Chiesa delle Anime de' Corpi Decollati* at Palermo (see E. S. Hartland in *Folk-Lore* 1910 xxi. 168 ff. pls. 8—10).

[1] *Supra* i. 391 n. 3.

[2] On the *benedictio Graeca* and the *benedictio Latina* see R. Sinker in Smith—Cheetham *Dict. Chr. Ant.* i. 199 figs. and E. Fehrenbach in the *Dictionnaire d'Archéologie Chrétienne et de Liturgie* publ. par Le R. P. dom F. Cabrol Paris 1910 ii. 749 ff. figs. 1489—1492. Various attempts have been made to read a symbolic meaning into these gestures, as may be seen in the articles here cited. A new, but not very probable, notion was started at Oxford in 1908 by my friend Dr J. Rendel Harris, who concluded an important address on 'Some points in the Cult of the Heavenly Twins' by suggesting—to the manifest alarm of a French ecclesiastic in the front row—'that the episcopal benediction with two fingers was originally a prayer that those blessed might have twin children' (*Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 176). Possibly both the Greek and the Latin forms of benediction may prove to have been but variants of the prophylactic gesture known all round the northern shores of the Mediterranean as 'the fig': if so, it was once sexual in character, the thumb perhaps representing the *phallós* and the fingers the *ktéis* (*vide* my paper on 'ΣΥΚΟΦΑΝΤΗΣ' in the *Class. Rev.* 1907 xxi. 133—136. The view there taken had been in part at least anticipated by C. Sittl *Die Gebärden der Griechen und Römer* Leipzig 1890 p. 103 n. 1 (S. Reinach in the *Rev. Ét. Gr.* 1906 xix. 342 n. 2 (*id. Cultes, Mythes et Religions* Paris 1908 iii. 98 n. 4) objects: 'Je ne crois pas qu'un Grec eût employé φαίνειν dans le sens d' "exhiber" une partie du corps.' But cp. the words φαινομηρίς and παραφαίνειν, ὑποφαίνειν as used in the passages collected *supra* p. 223 n. 6). Similar conclusions were reached independently by V. Riffer 'Συκοφάντης' in the *Indogermanische Forschungen* 1912 xxx. 388—390: 'Diese Gebärde stellt bekanntlich die weibliche Scham dar, und soll ursprünglich in den Dämonen das sie abschreckende Gefühl des Abscheus hervorrufen, um sie auf diese Weise von den Menschen abzuwehren.' Cp. also S. Seligmann *Der böse Blick und Verwandtes* Berlin 1910 ii. 184 ff., Boisacq *Dict. étym. de la Langue Gr.* p. 924. For rival hypotheses see M. Bréal in the *Comptes rendus de l'Acad. des inscr. et belles-lettres* 1906 p. 740 (συκοφάντης is a mere insult = the ἱεροφάντης of nothing at all), S. Reinach 'Sycophantes' in the *Rev. Ét. Gr.* 1906 xix. 335—358 (*id. Cultes, Mythes et Religions* Paris 1908 iii. 93—118) (just as the ἱεροφάντης exhibited an ear of corn to the initiates of Eleusis, so we may assume that an official called the σϋκοφάντης exhibited a fig in the mysteries of the Phytalidai at Τερὰ Συκῆ, where Demeter had once revealed (ἔφηνεν) the fig to Phytalos: such an official would doubtless have the right to exclude undesirables from his audience—hence the transition to συκοφαντεῖν in its usual meaning: close at hand was the ancient altar of Zeus Μειλίχιος, 'god of the Fig' (μείλιχον), at which Theseus had been purified. perhaps with fig-juice, by the Phytalidai—an attractive combination, which however L. R. Farnell in *The Year's Work in Class. Stud. 1907* p. 62 f. is too cautious to accept. I have discussed it further *infra* Append. M), W. R. Paton 'The Pharmakoi and the Story of the Fall' in the *Rev.*

(δ) *Pápas* and *Áttis.*

The same relation of the Phrygian Son-god to the Phrygian Father-god is implied in the cult of Attis. Michael Konstantinos Psellos, the most famous Byzantine scholar of the eleventh century (1018—1078 A.D.)[1], boldly asserts that *Átis* in the language of Phrygia meant 'Zeus[2]'—an assertion based on the Demosthenic evidence for Attis as a rain-god[3]. More weight must be attached to the fact that Attis, like Zeus, bore the title *Pápas* or *Papâs*[4]—a

Arch. 1907 i. 51—57 (*ib.* p. 52 n. 1 in support of S. Reinach: 'I believe we both ventured the conjecture that there were at some time rival mysteries to those of Eleusis in which the hierophant, instead of solemnly exhibiting an ear of corn, as the Eleusinian hierophant did, exhibited a fig, and was described by the devotees of Eleusis, not as a *ἱεροφάντης*, but as a *συκοφάντης* (with an allusion, no doubt, to the improper meaning of *σῦκον=pudendum muliebre*, a meaning which still survives in Turkey).'), P. Girard 'Quelques réflexions sur le sens du mot *sycophante*' in the *Rev. Ét. Gr.* 1907 xx. 143—163 (*ἱεροφάντης*, on the analogy of *ἱεροκήρυξ*, is taken to mean '*apparition sacrée*': so *συκοφάντης* must have meant '*celui qui paraissait dans le figuier, en train de voler des figues*' !)).

[4] *Supra* i. 399 n. 3. P. Kretschmer *Einleitung in die Geschichte der Griechischen Sprache* Göttingen 1896 pp. 334, 344 f., followed by H. Hepding *Attis seine Mythen und sein Kult* Gieszen 1903 p. 208 n. 7, prefers to accentuate Παπᾶς.

With Zeus Πάπας or Παπᾶς of Bithynia (Arrian. *frag.* 30 cited *supra* i. 399 n. 3) and Phrygia (Sir W. M. Ramsay in the *Journ. Hell. Stud.* 1884 v. 260 no. 12 on a small *stéle* of common stone found in a field near Nakoleia Δάδα Καν|κάρου Νουνά|δος Οὐεκρο-κ|ωμήτισσα | Διὶ Παπᾷ | *εὐχήν* 'Probably Dada was daughter of Kankaros Nounas, who had according to Phrygian custom two names, and her native village was Vekrokome,' cp. *id. ib.* 1884 v. 257 f. no. 8 on a similar *stéle* found in the same place Οὐλπία Σά|βις Παπᾷ *εὐχὴν* 'I copied the inscriptions from six similar stelai, all found in the same field: the owner said that the ground around was full of them. They are all evidently grave-stones of common people: the top is ornamented in the style of a pediment, and there is a plain pedestal ending in a projecting spike to stick in the ground. The one which is here published differed from the others in having a representation of the god on it: the god is apparently intended to be androgynous, like the Carian Zeus, but in such rude work, the point can hardly be asserted positively,' A. Körte in the *Ath. Mitth.* 1897 xxii. 32 no. 8 on the marble pediment of a small *stéle* from Bejad 'Αρτέμων Πάπα: Körte regards all these *stêlai* as votive rather than funerary; they may well be both) and Zeus Παπίας of Dorylaeion (*Corp. inscr. Gr.* iii no. 3817 on the road from *Eskishehir* to *Syed-Guz* or *Seid-el-Ghazi* Δημᾶς καὶ | Γάϊος ὑπὲρ | *βοῶν ἰδίων* Πα|πία Διὶ Σωτῆ|ρι *εὐχὴν καὶ* | 'Ηρακλῆ ἀνικ|ήτ[ῳ] we must group Zeus Παππῶος of Prousa ad Olympum (A. von Domaszewski in the *Arch.-ep. Mitth.* 1883 vii. 174 f. no. 17 on a white marble altar now used as base of a wooden pillar in the mosque at *Ermeni Bazardshik* ['Αγαθῇ] *τύχῃ* | Διὶ Παππώω κα|τὰ ἐπιταγὴν ο[ἱ σ]υγενεῖς ἀνέσ|τησαν ἱερήων | ..... | ....'Απολλ.... | κ.τ.λ. in the earth: P. Kretschmer *Einleitung* etc. pp. 199, 241 f. renders Παππῶος by 'Vater,' but *id.* p. 242 n. 1 suggests that the word may be an ethnic), Zeus Παπαῖος of Scythia (Hdt. 4. 59 *θεοὺς μὲν μούνους τούσδε ἱλάσκονται*, 'Ιστίην μὲν μάλιστα, *ἐπὶ δὲ Δία καὶ Γῆν, νομίζοντες τὴν Γῆν τοῦ Διὸς εἶναι γυναῖκα, μετὰ δὲ τούτους 'Απόλλωνά τε καὶ Οὐρανίην 'Αφροδίτην καὶ 'Ηρακλέα καὶ "Αρεα. τούτους μὲν πάντες Σκύθαι νενομίκασι, οἱ δὲ καλεόμενοι*

sobriquet strictly comparable with our 'Papa[1].' Indeed, the term *Áttis* itself, as A. Fick proved in 1873[2], was just a pet-name for 'Father.' Now it is not a little remarkable that a youthful god, who stood to Kybele in the same relation as Adonis to Aphrodite[3], should have been thus habitually saluted in a tone of affectionate familiarity as 'Daddy[4].' The paradox ceases to be paradoxical, if

βασιλῆιοι Σκύθαι καὶ τῷ Ποσειδέωνι θύουσι. ὀνομάζεται δὲ Σκυθιστὶ (on these names consult H. Hirt *Die Indogermanen* Strassburg 1907 ii. 587, E. H. Minns *Scythians and Greeks* Cambridge 1913 p. 85 f.) Ἰστίη μὲν Ταβιτί, Ζεὺς δὲ ὀρθότατα κατὰ γνώμην γε τὴν ἐμὴν καλεόμενος Παπαῖος, Γῆ δὲ Ἀπία (with variant Ἀπί), Ἀπόλλων δὲ Οἰτόσυρος (Orig. *c. Cels.* 6. 39 thrice quotes Celsus as reading Γογγόσυρον, cp. Hesych. Γοιτόσυρον· τὸν Ἀπόλλωνα. Σκύθαι), Οὐρανίη δὲ Ἀφροδίτη Ἀρτίμπασα (with variants Ἀρίπτασα, Ἀργίμπασα, cp. Orig. *c. Cels.* 6. 39 quoting Ἀργίμπασαν as read here by Celsus, Hesych. Ἀρτιμήασαν· Οὐρανίαν Ἀφροδίτην, ὑπὸ Σκυθῶν. See further Gruppe *Cult. Myth. orient. Rel.* i. 111, *id. Gr. Myth. Rel.* p. 1363 n. 3, O. Jessen in Pauly—Wissowa *Real-Enc.* ii. 1454), Ποσειδέων δὲ Θαμιμασάδας (with many variants: Orig. *c. Cels.* 6. 39 gives Θαγμάσαδα as Celsus' reading). ἀγάλματα δὲ καὶ βωμοὺς καὶ νηοὺς οὐ νομίζουσι ποιέειν πλὴν Ἄρεϊ· τούτῳ δὲ νομίζουσι, Orig. *c. Cels.* 5. 41 quoting Celsus "οὐδὲν οὖν οἶμαι διαφέρειν Δία Ὕψιστον καλεῖν ἢ Ζῆνα ἢ Ἀδωναῖον ἢ Σαβαὼθ ἢ Ἀμοῦν, ὡς Αἰγύπτιοι, ἢ Παπαῖον, ὡς Σκύθαι," 5. 45 ἀλλ' ἐπεὶ Κέλσος οἴεται μηδὲν διαφέρειν Δία Ὕψιστον καλεῖν ἢ Ζῆνα ἢ Ἀδωναῖον ἢ Σαβαὼθ ἤ, ὡς Αἰγύπτιοι, Ἀμοῦν ἤ, ὡς Σκύθαι, Παπαῖον, φέρε κ.τ.λ., 5. 46 λεγέτωσαν δὲ καὶ Σκύθαι τὸν Παπαῖον θεὸν εἶναι τὸν ἐπὶ πᾶσιν· ἀλλ' ἡμεῖς οὐ πεισόμεθα, τιθέντες μὲν τὸν ἐπὶ πᾶσι θεόν, ὡς δὲ φίλον τῷ λαχόντι τὴν Σκυθῶν ἐρημίαν καὶ τὸ ἔθνος αὐτῶν καὶ τὴν διάλεκτον οὐκ ὀνομάζοντες τὸν θεὸν ὡς κυρίῳ ὀνόματι τῷ Παπαῖον, Eustath. *in Il.* p. 565, 6 ὁμοίως καὶ Ἡροδότου τὸ καλεῖται Ζεὺς ὑπὸ Σκυθῶν ὀρθότατα Παπαῖος. C. Müller in his note on Anon. *per. pont. Eux.* 13 (*Geogr. Gr. min.* i. 405 Müller) says of the Bithynian river Παπάνιος: 'Num forte nomen hoc a *πάπα*, Bithynico Jovis nomine, repetendum?' —a view adopted by W. Pape—G. E. Benseler *Wörterbuch der griechischen Eigennamen*[3] Braunschweig 1875 ii. 1129, but rightly queried by O. Höfer in Roscher *Lex. Myth.* iii. 1559) and probably also the πόποι of the Scythians (*et. mag.* p. 823, 31 f. οἱ γὰρ Σκύθαι, ἀγάλματα τινὰ ἔχοντες ὑπόγαια (ὑπόγεα V.) τῶν θεῶν, πόπους αὐτὰ (αὐτοὺς V.) καλοῦσιν =*et. [4] The simplest nursery-names for 'father' and 'mother' used by the ancients were

we assume—as, I think, we must—that *Áttis* was but *Pápas* reborn. After all, the Phrygians were not alone in the belief that a son may be the rebirth of his own father. This has been the faith of numerous tribes in all five continents[1]. And readers of Samuel Butler's *Life and Habit* are aware that analogous views can still be held by sane men.

(ε) The Mother-goddess and her *páredros*.

The Phrygian conception of the Son as the Father reborn throws light upon a variety of religious problems. It helps us to understand that otherwise perplexing aspect of old Anatolian worship, the association of the Mother-goddess with a youthful *páredros*, who is at once her consort and her child[2]. This is seen to involve no sanctioning of an essentially illicit union, but rather—at least in original intention—a primitive view of normal relations between father, mother, and son. Accordingly in the dactylic and spondaic lines quoted by Hippolytos (*c.* 235 A.D.)[3] from a Naassene source (*c.* 200 A.D.)[4], but composed at some earlier date, perhaps under Hadrian, for a citharodic performance in the theatre[5], Attis is equated with such divinities as Adonis, Osiris, Dionysos, and the like. The first fragment is as follows:

> Blest son of Kronos, or of Zeus,
> Or mighty Rhea, hail!
> Attis (sad name for Rhea's use),
> Whom weeping Syrians wail

πâs (*πâ*?) and *μâ* (Stephanus *Thes. Gr. Ling.* vi. 187 D f., H. van Herwerden *Lexicon Graecum suppletorium et dialecticum*[2] Lugduni Batavorum 1910 ii. 907 f., 1082, 1100). Even these childish vocables made their way into the language of religion. The former seems to have occurred in the hymn of the Salii (in Fest. p. 205 *a* 11 f. Müller, p. 222, 22 f. Lindsay pa pro parte, et po pro potissimum positum est in Saliari carmine L. C. Valckenaer corr. *patre*—a reading accepted by C. O. Müller and by R. Kühner—F. Holzweissig *Ausführliche Grammatik der lateinischen Sprache*[2] Hannover 1912 i. 196): the latter became the name of the great mother-goddess of Asia Minor (W. Drexler in Roscher *Lex. Myth.* ii. 2215 ff., Gruppe *Gr. Myth. Rel.* pp. 1527, 1548, *alib.*, *id. Myth. Lit.* 1908 p. 557). Both are found in Aisch. *suppl.* 890 ff. = 899 ff. *μâ Γâ*, *μâ Γâ*,... | ...*ὦ βâ*, *Γâs παῖ*, *Ζεῦ* with schol. *ὦ πάτερ Ζεῦ*, *Γῆς παῖ*, whence L. C. Valckenaer cj. *ὦ παῖ Γâs*, *πâ Ζεῦ*, C. A. Lobeck *ὦ μâ γâ*, *πâ Ζεῦ*, H. L. Ahrens (*infra* § 3 (c) i (*η*)) *ὦ Βαγαῖε Μαῖεῦ* or *ὦ Βαγαῖε πâ Ζεῦ*.

[5] U. von Wilamowitz-Moellendorff in *Hermes* 1902 xxxvii. 329.

As lost Adonis ; Egypt's eyes
  Have her Osiris seen ;
Hellenic sages recognise
  The heavenly horn of Men ;

In thee the Samothracians chant
  Adamna's[1] sanctity ;
Haemonians find their Corybant ;
  'Papas' the Phrygians cry,

Now dead, now deity ycleped,
  Fruitless and all forlorn,
A goatherd, or a green ear reaped[2],
  A piper almond-born[3].

[1] Hesych. *ἀδαμνεῖν· τὸ φιλεῖν. καὶ Φρύγες τὸν φίλον Ἀδάμνα λέγουσιν.* I suspect connexion with the nursery-names Ἄδα, Ἄδας, etc. (P. Kretschmer *Einleitung in die Geschichte der Griechischen Sprache* Göttingen 1896 p. 337 f.). If so, Ἄδαμνα meant 'Fatherly One' (suffix *-μν-* as in *ἀθέλιμνοι, ἀπάλαμνος, νώνυμνος*, etc.)—a doublet of Ἄττις (*supra* p. 293). A. Fick *Die ehemalige Spracheinheit der Indogermanen Europas* Göttingen 1873 p. 416, misled by P. de Lagarde and F. Müller, says 'eranisches Lehnwort.'

[2] Hippolytos has already compared the crowning rite at Eleusis, the exhibition to the mystics of a corn-ear reaped in silence (*ref. haeres.* 5. 8 p. 162 Duncker—Schneidewin λέγουσι δὲ αὐτόν, φησί, Φρύγες καὶ "χλοερὸν στάχυν τεθερισμένον," καὶ μετὰ τοὺς Φρύγας Ἀθηναῖοι μυοῦντες Ἐλευσίνια καὶ ἐπιδεικνύντες τοῖς ἐποπτεύουσι τὸ μέγα καὶ θαυμαστὸν καὶ τελειότατον ἐποπτικὸν ἐκεῖ μυστήριον ἐν σιωπῇ τεθερισμένον στάχυν). This corn-ear probably represented Kore, Demeter and her daughter being the Corn-mother and the Corn-maiden of the Eleusinian harvest-field (*supra* i. 397 n. 4 pl. xxviii). It is even possible that the identification of Kore with the young corn may help to clear up the obscurity which still surrounds the name Περσεφόνη. L. Bloch in Roscher *Lex. Myth.* ii. 1286 ff. and Gruppe *Gr. Myth. Rel.* p. 1181 n. 6 collect the extant forms. Gruppe emphasises the following points: (*a*) The first half of the compound, to judge from such vase-inscriptions as Περ(ρ)όφατ(τ)α (P. Kretschmer *Die Griechischen Vaseninschriften* Gütersloh 1894 pp. 122, 178), was probably not verbal. If an adverb **πέρσε* be assumed, Περσέ-φασσα, Περ(ρ)ό-φατ(τ)α, etc. might be related to it as Τηλέ-μαχος, Τηλο-κλῆς, etc. to *τῆλε*. (*b*) The second half of the compound cannot be directly derived from *φαίνω*. But Περσέ-φασσα may be formed like Τηλέ-φασσα for Τηλε-φάεσσα ; in which case Περσε-φόνη might be a hypocoristic name. The *crux*, then, is to devise a suitable meaning for **πέρσε*. And the matter is complicated by the Laconian forms Πηρεφόνεια (Hesych. *s.v.*), .]ΕΡΙΦΟΝΑΙ (*Inscr. Gr. Sic. It.* no. 631 Lokroi Epizephyrioi). With all diffidence I suggest the root of *σπείρω, σπέρμα*, which appears with loss of initial *σ* in *πρώξ, περκνός*, etc. and with determinative *s* as *parš-* for **spere-s-* in Old Indian *pṛ́šan, pṛ́šat*, etc. (see Walde *Lat. etym. Wörterb.*[2] p. 728 f.). On this showing Περσε- would be cognate with our word *spring* and Περσέφασσα, Περσεφόνη, could mean 'She that appears in Spring.' Cp. Orph. *h. Phers.* 29. 12 f. *εἰαρινή... | ἱερὸν ἐκφαίνουσα δέμας βλαστοῖς χλοοκάρποις.*

Be that as it may, it is clear that in Phrygia Attis was sometimes identified with the young corn (Frazer *Golden Bough*[3]: Adonis Attis Osiris[3] i. 279). Possibly the Phrygian Zeus stood in a similar relation to the old corn, for he bore the title *πολύσταχυς* (Hesych. Βαγαῖος·...ἢ Ζεὺς Φρύγιος. *μέγας. πολύς, ταχύς*, where W. Drexler in Roscher *Lex. Myth.* ii. 2552 convincingly (O. Höfer *ib.* iii. 1560) restored *μέγας πολύσταχυς*). The Phrygian Lityerses, the Bithynian Bormos, etc. were analogous figures: see the highly important chapter on 'Lityerses' by Sir James Frazer (*Golden Bough*[3]: Spirits of Corn and Wild i. 214 ff.). Attis was variously interpreted by late writers: he is the ripe corn cut by the reaper (Firm. Mat. 3), or more often the short-lived flowers of spring contrasted with Adonis as the maturer crops (Porph. *ap.* Euseb. *praep. ev.* 3. 11. 12, 3. 13. 14, and *ap.*

The second fragment runs thus:

> Attis, Rhea's son, I'll sing,
> Not with blare of trumpeting,
> Nor with flute Kouretes shrill
> Up the steep of Ide's hill,
> Nay, but Phoibos' lyric muse
> I must mingle and confuse,
> Crying still *Euoî Euán*,
> For our god's a very Pan,
> He's a Bakchos, he's a swain
> Shepherding the white stars' train[4].

Aug. *de civ. Dei* 7. 25, cp. Sallustius *περὶ θεῶν καὶ κόσμου* 4, Amm. Marc. 19. 1. 11, 22. 9. 15, 'Sosicles Atticus' *ap.* Fulgent. *myth.* 3. 5, Remigius *ap.* Myth. Vat. 3. 2. 4).

Some of the multiple corn-ears figured on coins of Bithynia, Kappadokia, Lydia, Phrygia, etc. (*e.g.* Anson *Num. Gr.* iii. 124 ff. nos. 1292—1313 pl. 23 f.) may be meant for ceremonial sheaves.

[3] *Infra* Append. B Galatia.

Schneidewin cj. *Μαιόνιοι*, Bergk *Ἀκμόνιοι*) *Κορύβαντα, καὶ οἱ Φρύγες ἄλλοτε μὲν Πάπαν, ποτὲ δὲ νέκυν, ἢ θεόν, ἢ ὃν πολύκαρπος ἔτικτεν ἀμύγδαλος ἀνέρα συρικτάν." τοῦτον φησὶν εἶναι <τὸν> πολύμορφον Ἄττιν, ὃν ὑμνοῦντες λέγουσίν οὕτως· "'Ἄττιν ὑμνήσω τὸν Ῥείης, οὐ κωδώνων* (so Schneidewin for *ὠδινῶν* cod. C.) *σὺν βόμβοις* (so Schneidewin for *συμβόμβοις* cod. C.), *οὐδ' αὐλῶν* (Wilamowitz cj. *αὐλῷ*) *Ἰδαίων Κουρήτων μυκητᾷ* (so Wilamowitz for *μύκητα* cod. C.), *ἀλλ' εἰς* (so Schneidewin for *οἷς* cod. C.) *Φοιβείαν μίξω μοῦσαν φορμίγγων, εὐοῖ, εὐάν* (so Schneidewin for *εὐὼν* cod. C.), *ὡς Πάν, ὡς Βακχεύς, ὡς ποιμὴν λευκῶν ἄστρων." διὰ τούτους καὶ τοὺς τοιούτους λόγους παρεδρεύουσιν οὗτοι τοῖς λεγομένοις Μητρὸς μεγάλης μυστηρίοις, κ.τ.λ.*

These important excerpts have been variously handled: see F. G. Schneidewin 'Hymnorum in Attin fragmenta inedita' in *Philologus* 1848 iii. 247—266, G. Hermann in the *Ber. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1849 pp. 1—5, F. G. Schneidewin in the *Nachr. d. kön. Gesellsch. d. Wiss. Göttingen* Phil.-hist. Classe 1852 p. 101 ff., *Poet. lyr. Gr.* iii. 685—687 Bergk[4], W. Froehner *Mélanges d'Epigraphie et d'Archéologie* Paris 1873 i. 49 ff., U. von Wilamowitz-Moellendorff in *Hermes* 1902 xxxvii. 328—331, H. Hepding *Attis seine Mythen und sein Kult* Gieszen 1903 pp. 34—36. Schneidewin took the first fragment to be written in dactylic and anapaestic measures. Hermann completed it as a set of hexameters. Bergk printed it as eight anapaestic lines followed by six dactylic tetrameters. Wilamowitz restores it as thirteen dactylic tetrameters, viz.: *Εἴτε Κρόνου γένος, εἴτε Διὸς μάκαρ, | εἴτε Ῥέας μεγάλας, χαῖρ(ε) <ὦ> τὸ κα|τηφὲς ἄκουσμα Ῥέας Ἄττι· σὲ κα|λοῦσι μὲν Ἀσσύριοι τριπόθητον Ἄ|δωνιν, ὅλη δ' Αἴγυπτος Ὄσιριν, ἐπ|ουράνιον Μηνὸς κέρας Ἕλλη|νος σοφία, Σαμοθρᾳικες Ἄδαμνὰ σε|βάσμιον, Αἰμόνιοι Κορύβαντα, καὶ | οἱ Φρύγες ἄλλοτε μὲν Πάπαν, ποτὲ | δ(ὲ) <αὖ> νέκυν ἢ θεὸν ἢ τὸν ἄκαρπον ἢ | αἰπόλον ἢ χλοερὸν στάχυν ἀμη|θέντ(α) ἢ <τ>ὸν πολύκαρπος ἔτικτεν ἀ|μύγδαλος ἀνέρα συρικτάν...* (I should prefer to spell *Ἄττης* and *Παπᾶς*: see P. Kretschmer *Einleitung* etc. pp. 350, 345). Schneidewin, followed by Bergk, prints the second fragment as eight spondaic

Syncretism of this sort can be illustrated by a marble statue of Hadrianic date (fig. 189)[1] found during the winter of 1867—1868 in the hall of the Dendrophori[2] adjoining the Metroion at Ostia[3] and now preserved in the Lateran Museum at Rome[4]. Attis, a youth

Fig. 189.

of markedly feminine type, is reclining on a rock, whose hard surface is softened by the spread of his mantle. His left arm is propped on a bust of Zeus[5]. His left hand, with a ring on the ring-finger, holds a *lagobólon*; his right, a bunch of corn, fruit, and

lines (two catalectic dimeters, two tripodies, four catalectic dimeters); Wilamowitz, as ten spondaic lines (a dimeter, a catalectic dimeter, four catalectic monometers, four catalectic dimeters), viz.: "Αττιν ὑμνήσω τὸν Ῥείης | οὐ κωδώνων σὺμ βόμβοις, | οὐκ αὐλῶι | Ἰδαίων | Κουρήτων μυκητᾶι, ἀλλ' εἰς Φοιβείαν μίξω | μοῦσαν φορμίγγων· εὐοῖ, εὐάν, ὡς Πάν, ὡς Βακχεύς, ὡς ποιμὴν λευκῶν ἄστρων. (I should again spell the name of "Αττης with η, not ῑ.)

flowers. His head, twined with a garland of pine-cones, almonds, pomegranates, poppy-heads, and flowers, wears a Phrygian cap, which is encircled below by five rays (restored in their ancient holes) and embellished above by a crescent moon and two upstanding ears of corn. The whole figure with its air of pensive melancholy, not to say unmanly slackness, aptly embodies the Graeco-Roman conception of Attis. Particular traits and adjuncts recall other deities. The crescent is that of Men. The hair, with its long side-curls and a ribbon across the brow, is reminiscent of

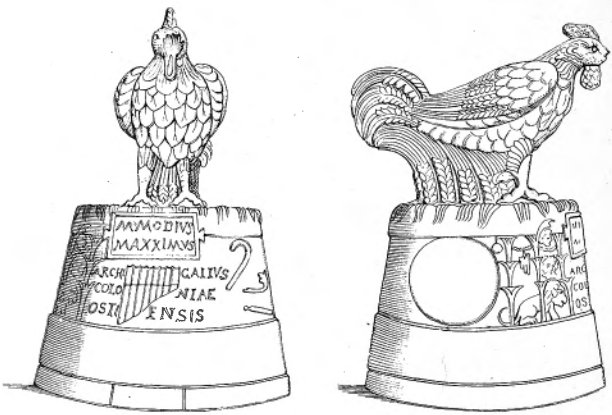

Fig. 190.

Dionysos. The attitude of graceful repose would suit Adonis[1]. And, lest the lines should degenerate into weakness, we have a rigid framework formed by the bearded bust and the underlying rock—a reminder that Attis after all was akin to the great powers of nature, Zeus and Kybele, the sky-father and the mountain-mother.

Zeus, as husband of Kybele[2], appears on other monuments of the same cult. From the Metroion at Ostia came also a votive marble basket (fig. 190)[3], the lid of which has a handle shaped like a cock in obvious reference to the *Gallus* or emasculated priest of

[1] Cp. Theokr. 15. 84 ff., 127 ff.

[2] Ioul. *or.* 5 p. 166 A f. *τίς οὖν ἡ Μήτηρ τῶν θεῶν;...ἡ καὶ τεκοῦσα καὶ συνοικοῦσα τῷ μεγάλῳ Διὶ θεὸς ὑποστᾶσα μεγάλη μετὰ τὸν μέγαν καὶ σὺν τῷ μεγάλῳ δημιουργῷ, ἡ πάσης μὲν κυρία ζωῆς, πάσης δὲ γενέσεως αἰτία, ἡ ῥᾳστα μὲν ἐπιτελοῦσα τὰ ποιούμενα, γεννῶσα δὲ δίχα πάθους καὶ δημιουργοῦσα τὰ ὄντα μετὰ τοῦ πατρός· αὕτη καὶ παρθένος ἀμήτωρ καὶ Διὸς σύνθωκος καὶ μήτηρ θεῶν ὄντως οὖσα πάντων.*

[3] C. L. Visconti in the *Ann. d. Inst.* 1869 xli. 240 ff., *Mon. d. Inst.* ix pl. 8[a], 1[a], 1[b] (=my fig. 190), P. Decharme in Daremberg—Saglio *Dict. Ant.* i. 1688 fig. 2249, Frazer

the goddess. The rest of the lid is covered with corn-ears, which fall outwards from the centre: the cock's tail is formed by some of them[1] and supported by others. On the front of the basket is inscribed 'M. Modius Maximus, Archigallus of the colony of Ostia[2].' The latter part of the inscription is grouped about pan-pipes, and round it are disposed other tokens of the cult; to the right, a *lagobólon*, a pipe, a flute (?); to the left, a timbrel and a bed of reeds[3], among which are seen the head of Attis, the head of Zeus, the lion of Kybele, etc. This curious relic seems to have been a corn-measure or *modius* dedicated by the chief-priest, presumably because his own name happened to be *Modius*. Sir James Frazer supposes that it contained the priest's ashes[4]. But, arguing from the analogy of the Cabiric basket[5], I should surmise that it was the receptacle for the genitals of which, in accordance with the Phrygian rite (fig. 191)[6], the Archigallus had deprived himself[7]. Votaries of Kybele, Zeus, and Attis were wont to wear effigies of the gods that they served[8]. A statue brought from

Graillot *Le culte de Cybèle Mère des dieux à Rome et dans l'empire romain* Paris 1912 p. 236 ff.

genitals. Finally, he bears on his breast an *aedicula* with a half-length figure of Attis, and on his head a bay-wreath of gold (?) adorned with three medallions[1] representing a bust of Zeus between

Fig. 193.

two busts of Attis, while both ends of his whip-handle exhibit the same bearded head of Zeus. A pendant to this relief is furnished by another, formerly in the Villa Mattei and now in the Vatican (fig. 194)[2], which portrays Laberia Felicla, chief priestess of

[1] A broken diadem in gilt bronze, which came from Rome to Berlin, shows a bay-wreath decorated with two medallions (busts of Kybele and Attis) with a rosette between them (A. Furtwängler in the *Jahrb. d. kais. deutsch. arch. Inst.* 1892 vii Arch. Anz. p. 111). On such diadems see *supra* i. 22, cp. i. 354, and *Brit. Mus. Cat. Jewellery* p. 364 nos. 3044, 3045 pl. 70.

[2] Visconti *Mus. Pie-Clém.* vii. 107 ff. pl. 18 (=my fig. 194), Baumeister *Denkm.* ii. 802 fig. 868, Reinach *Rép. Reliefs* iii. 410 no. 3, Amelung *Sculpt. Vatic.* ii. 614 f. no. 403 pl. 58. Height $1{\cdot}04^{m}$, breadth $0{\cdot}74^{m}$. Fine-grained, light grey marble. Restored: upper part of scallop, head and neck, part of left breast, left hand with wreath and parts of garland, right lower arm with hand and *patera*.

Kybele[1]. Set against the background of a great scallop-shell, a *motif* appropriate to a Mother-goddess[2], we see Laberia pouring a libation, not, as we might have expected, to Kybele, but to Zeus. The small

Fig. 194.

altar decorated with a festooned eagle, the garland of bay-leaves[3] hanging from the left hand of the priestess, the bearded head slung between her breasts, all proclaim the essential relation of the Mother-goddess to the Father-god.

[1] The inscription (*Corp. inscr. Lat.* vi no. 2257 = Dessau *Inscr. Lat. sel.* no. 4160) runs: Laberia Felicla | sacerdos maxima Matris deum m(agnae) I(daeae).

[2] See L. Stephani in the *Compte-rendu St. Pét.* 1870—1871 p. 17 ff., Gruppe *Gr. Myth. Rel.* p. 1349 f., S. Seligmann *Der böse Blick und Verwandtes* Berlin 1910 ii. 126 f., 204 ff., *alib.*, O. Keller *Die antike Tierwelt* Leipzig 1913 ii. 560 f. The symbolism rests on the resemblance of the shell to the womb: the Greeks spoke of the scallop as κτείς or κτένιον (Stephanus *Thes. Gr. Ling.* iv. 2028 A—C).

[3] So Amelung *loc. cit.* Baumeister *loc. cit.* says 'Eichenzweig,' Dessau *loc. cit.* 'coronam quernam.' Apparently a trail of bay-leaves has been wrongly restored as a wreath of oak.

(ζ) Attis in relation to Christianity.

The cult of Attis had points of contact with Christianity itself. A Father manifesting himself anew in the person of his Son, a Son bearing the name of his Father,—such beliefs naturally predisposed men to faith in that Son whom the Father sent to be 'the effulgence of his glory, and the very image of his substance[1].' Outward ceremonies and inward doctrines alike lent themselves to this end. The rites of Attis, apart from certain crudities, might almost have passed for Christian usage—witness the body of the divine Son affixed to the pine-tree[2], the lamentation over his prostrate form, the sudden

[1] Hebrews 1. 3.

[2] At the festival of the vernal equinox (March 22) known as *arbor intrat* (H. Hepding *Attis seine Mythen und sein Kult* Gieszen 1903 p. 149 ff., Frazer *Golden Bough*[3]: Adonis Attis Osiris[3] i. 267 f.). Firmicus Maternus (*c.* 347 A.D.), who alone mentions the effigy fastened to the tree, already cites parallels (Firm. Mat. 27. 1 f. in sacris Frygiis, quae matris deum dicunt, per annos singulos arbor pinea caeditur et in media arbore simulacrum iuvenis subligatur. in Isiacis sacris de pinea arbore caeditur truncus, huius trunci media pars subtiliter excavatur: illic (so F. Oehler for *illis* cod. P.) de segminibus (so Wowerius for *seminibus* cod. P.) factum idolum Osiridis sepelitur (cp. Plout. *de Is. et Os.* 8, 16, 18, 21, 42). in Proserpinae sacris caesa arbor in effigiem virginis formamque componitur et cum intra civitatem fuerit inlata, quadraginta noctibus plangitur, quadragesima vero nocte comburitur). The same method of comparative study has been followed with conspicuous success by W. Mannhardt *Wald- und Feldculte*[2] Berlin 1904 i. 572 f., 1905 ii. 291 ff. and by Frazer *Golden Bough*[3]: The Magic Art ii. 59 ff., *ib.*[3]: The Dying God p. 251 ff. The former regards the tree with its effigy of Attis as a 'Verkörperung des vom Tode erwachten Wachstumsgeistes' (*op. cit.*[2] ii. 295). The latter says: 'The bringing in of the pine-tree from the woods, decked with violets and woollen bands, is like bringing in the May-tree or Summer-tree in modern folk-custom; and the effigy which was attached to the pine-tree was only a duplicate representative of the tree-spirit Attis' (*op. cit.*[3]: Adonis Attis Osiris[3] i. 277).

I confess, I do not agree with these conclusions. So far as I can judge the evidence available, at least in the classical area, the tree-spirit was essentially female, being but a vegetable form of the earth-mother (*supra* i. 1 n. 3, 339, 396 f., 525 f., 779 f.). Her consort was male, being originally an embodiment or representative of the sky-father. The May-queen in popular custom stands for the fertilised vegetation-power, the May-king for her fertilising partner: their union ensures the fertility of the whole neighbourhood. On this showing (to get back to Attis) the man in the tree was not conceived as 'a duplicate representative of the tree-spirit,' but as in some sense (husband? victim? both?) devoted to the tree—the male to the female—for the purpose of promoting fertility. Attis, like Pentheus (on whom see an illuminating article by my friend the Rev. A. G. Bather 'The problem of the *Bacchae*' in the *Journ. Hell. Stud.* 1894 xiv. 244—263, Farnell *Cults of Gk. States* v. 167 f., Frazer *Golden Bough*[3]: Adonis Attis Osiris[3] ii. 98, *ib.*[3]: Spirits of Corn and Wild i. 24 f., *supra* i. 679), whose name—Prof. H. M. Chadwick suggests to me—may hang together with that of the Thracian Bendis (cp. the Thracian Penthesileia, if not also the Lesbian Penthilos, etc.), was a divine king (Ioul. *or.* 5. 168 c τοῦ βασιλέως Ἄττιδος, 169 c ὁ βασιλεὺς Ἄττις, *Inscr. Gr. Sic. It.* no. 913, 3 f. Ostia [Ἄττει] | Μηνοτυ[ράννῳ], *Corp. inscr. Lat.* vi nos. 499, 3 f. Attidi | Menotyranno invicto, 500, 2 f. Attidi Meno|tyranno, 501, 2 f. Attidi sancto | Menotyranno, 508. 1 f. [At]ti Menotyranno, 511, 1 Attidi Menoturano, 10 Attidis Minoturani, 512, 1 [Attidi Menotyranno]) and, as Sir James Frazer has shown (*Golden Bough*[3]: Adonis Attis Osiris[3] i. 285 ff.), presupposes a line of priestly kings once sacrificed at periodic intervals for the good of the community.

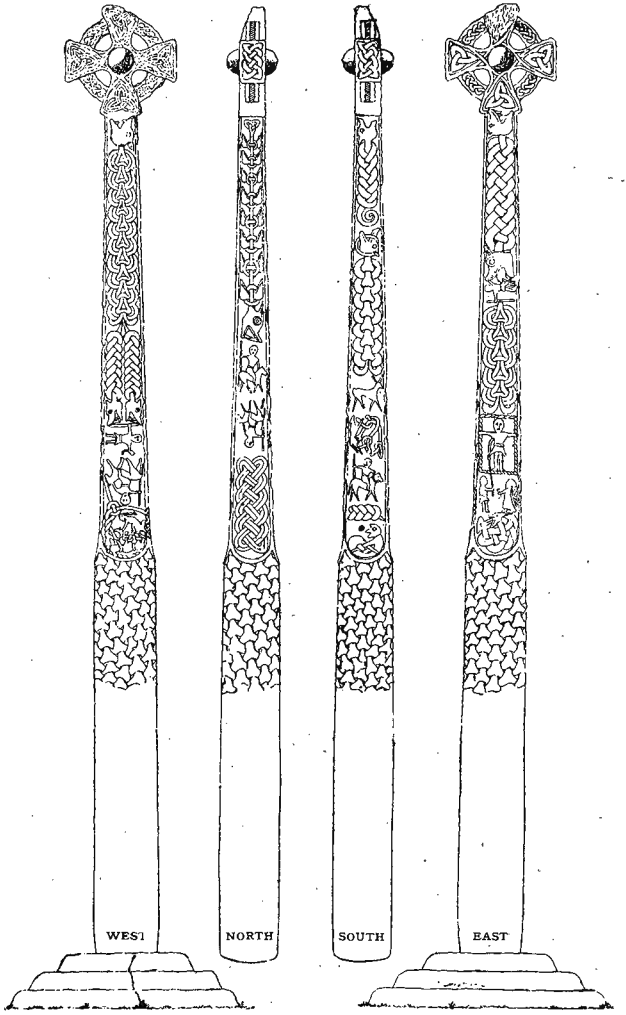

Fig. 195.

I add a northern parallel to the Christianisation of the Phrygian tree-cult. The Gosforth Cross (C. A. Parker *The Ancient Crosses at Gosforth, Cumberland* London 1896 with pls. and figs. of which pl. 1 = my fig. 195 and pl. 2 my fig. 196, *id. The Gosforth District: its Antiquities and Places of Interest* Kendal 1904 pp. 80—92 with figs.) is a red sandstone monolith (14½ ft high) still standing S. of the church at Gosforth in Cumberland. A fellow-cross of much the same design formerly stood some 7 ft away, but was cut down in 1789 to serve as a sun-dial. Between the two crosses was a horizontal stone, on which was carved the figure of a large sword. The extant shaft, which rises from a rectangular three-stepped base, is circular in section below (40 ins round) but oblong above (6 × 5 ins) and supports a wheel-shaped head (20 ins across). The whole monument is carved to look like a tree: the bole is patterned as if half-covered with bark, and the interlaced lines higher up are suggestive of branches. All four sides, where the trunk has been, so to say, squared, exhibit carvings susceptible of a twofold interpretation, either Scandinavian or Christian. G. Stephens dated them *c.* 680 A.D.; but S. Bugge assigned them to *s.* ix A.D., and C. A. Parker now places them as late as *c.* 950—1050 A.D. The subjects represented run, from bottom to top, as follows: (*a*) *Western series.* Loki bound beneath snake, whose venom drips upon him: Sigyn, his wife, catches venom in cup = Satan bound. Odhin on his horse Sleipnir rides down to Mimir's well at one of the roots of Yggdrasil: Heimdallr the sentinel with the Gjallarhorn keeps back the wolf-serpents Hati and Skǫll = Death on the pale horse overcome by Christ the shepherd, who defies the powers of evil. A wolf-headed monster, the progeny of the wolf Fenrir, attacking the solar wheel = A devil attacking the cross. (*b*) *Southern series.* Odhin riding through the hall of serpents on Nastrand = Christ trampling on Satan. The wolf Fenrir and the Midhgardh-serpent attacking the hart Eikthyrnir = The powers of evil attacking the hart, symbol of Christ. Fenrir as a wolf-headed monster gagged by Thor's sword = Leviathan tamed. Serpent attacking the solar wheel = Devil attacking the cross. (*c*) *Eastern series.* Serpents beneath the feet of Nanna, the faithful wife of Baldr: blind Hǫdhr with a lance of mistletoe stabs Baldr, son of Odhin = The serpent's head bruised by the heel of the woman, Mary Magdalene with her *alábastron*: Longinus the blind soldier with his lance stabs Christ on the cross. Headless monster = Evil subdued. Vidharr, son of Odhin, slays the wolf-serpent Fenrir, whose jaw he rends open with left arm and right foot = The descent of Christ into hell. Fenrir attacking the solar wheel = Devil attacking the cross. (*d*) *Northern series.* Endless interlacing = Symbol of eternity. Odhin on Sleipnir overcome by Fenrir at the end of the world = Death on the pale horse overcome by Christ. Odhin battling with the fire-demon Surtr = Christ as conqueror: Satan cast down from heaven. The solar wheel = the cross. Several of these bilingual interpretations are far from certain. Here it is in point to notice an alternative explanation of the central scene on the eastern face. C. A. Parker comments: 'Baldur the beautiful, or, Odin hanging on the tree self sacrificed.' The latter view, that of the Rev. W. S. Calverley, is based on *Hávamál* 138 f., a remarkable passage translated by H. M. Chadwick *The Cult of Othin* London 1899 p. 72 thus: '138. "I know that I hung full nine nights on the gallows tree (or "windy tree") wounded by the javelin and given to Othin, myself to myself; on that tree, of which no one knows from whose roots it proceeds." 139. "They cheered me (or "assuaged my hunger and thirst") neither with bread nor drink; I looked down and took up runes, took them up crying; from thence I fell again."' Prof. Chadwick *ib.* p. 80 notes: 'Othin is both the person sacrificed and the person to whom the sacrifice is offered. There is no indication that Othin was also the sacrificer or that the sacrifice was voluntary

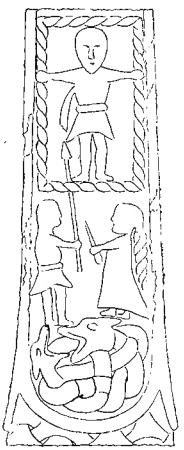

Fig. 196.

blaze of light, the words of comfort whispered by the priest:

> Courage, ye mystics of the god now saved;
> Salvation shall be ours from all our woes[1]!

No less suggestive was the teaching connected with the *taurobolium* and *criobolium*[2]. In all the Zeus-cults of the Mediterranean world the bull and the ram play their part as centres of procreative power[3]. And by this dread baptism in their blood and reception of their vital forces[4] the worshipper (I quote a Roman altar of the fourth century) was 'reborn to life eternal[5].' The devotee of Attis belonged

on the part of the victim.' But, if those Eddic stanzas represent a genuine Norse belief, the sacrifice of Odhin to Odhin on the gallows tree might well be taken as the nearest pagan parallel to the crucifixion of Christ.

[1] Firm. Mat. 22. 1 nocte quadam simulacrum in lectica supinum ponitur et per numeros digestis fletibus plangitur: deinde cum se ficta lamentatione satiaverint, lumen infertur: tunc a sacerdote omnium qui flebant fauces unguentur, quibus perunctis sacerdos hoc lento murmure susurrat: *θαρρεῖτε μύσται τοῦ θεοῦ σεσωσμένου· | ἔσται γὰρ ἡμῖν ἐκ πόνων σωτηρία.* That the allusion is to the rites of Attis appears from Firm. Mat. 3. 1 ff., cp. Damaskios *v. Isid.* ap. Phot. *bibl.* p. 345 a 5 ff. Bekker *τότε τῷ Ἱεραπόλει ἐγκαθευδήσας ἐδόκουν ὄναρ ὁ Ἄττης γενέσθαι, καί μοι ἐπιτελεῖσθαι παρὰ τῆς μητρὸς τῶν θεῶν τὴν τῶν Ἱλαρίων καλουμένων ἑορτήν· ὅπερ ἐδήλου τὴν ἐξ ᾅδου γεγονυῖαν ἡμῶν σωτηρίαν.*

[1] Attis was ποιμήν (schol. Nik. *alex.* 8, Loukian. *amor.* 42), *pastor* (Tertull. *apol.* 15, *ad nat.* 1. 10, Paulin. Nol. *poem. ult.* 79 ff. (lxi. 699 A Migne), *Aegritudo Perdicae* 29 f. (in *Poet. Lat. min.* v. 113 Baehrens)), αἰπόλος (Hippol. *ref. haeres.* 5. 9 p. 168 Duncker—Schneidewin), βουκόλος (Theokr. 20. 40), *bubulcus* (Arnob. *adv. nat.* 4. 35).

Cp. the formula *μαθητὴς ποιμένος ἀγνοῦ*, which occurs in the epitaph of Alexandros son of Antonios (216 A.D.) found by Sir W. M. Ramsay at the Phrygian Hierapolis and in its original the epitaph written for himself by Aberkios bishop of Hierapolis (end of *s.* ii), included in his biography by Simeon Metaphrastes (cxv. 1211 ff. Migne), found in a fragmentary condition by Sir W. M. Ramsay at Hierapolis, presented by the Sultan to Pope Leo xiii, and now preserved in the Lateran Museum at Rome. On both inscriptions see Sir W. M. Ramsay in the *Journ. Hell. Stud.* 1882 iii. 339 ff., 1883 iv. 424 ff. no. 36 (cp. *Bull. Corr. Hell.* 1882 vi. 518 f.), J. B. Lightfoot *The Apostolic Fathers*[2] Part II London 1889 i. 493 ff., G. Ficker 'Der heidnische Charakter der Abercius Inschrift' in the *Sitzungsber. d. Akad. d. Wiss. Berlin* 1894 p. 87 ff., A. Harnack in *Texte und Untersuchungen* 1895 xii. 4, L. Duchesne in the *Mélanges d'Archéologie et d'Histoire* 1895 xv. 155 ff., A. Dieterich *Die Grabschrift des Aberkios* Leipzig 1896, S. Reinach in the *Revue critique d'Histoire et de Littérature* 1896 xlii. 447 ff., W. Drexler in Roscher *Lex. Myth.* ii. 2880—2882, H. Hepding *Attis seine Mythen und sein Kult* Gieszen 1903 pp. 83—85, W. R. Paton 'Note on the Inscription of Abercius' in the *Rev. Arch.* 1906 ii. 93 ff., W. Lüdtke—T. Nissen *Die Grabschrift des Aberkios, ihre Überlieferung und ihr Text* Lipsiae 1910, T. Nissen *S. Abercii vita* Lipsiae 1912, C. M. Kaufmann *Handbuch der christlichen Archäologie* Paderborn 1913 pp. 717—725. As A. Dieterich *Kleine Schriften* Leipzig and Berlin 1911 p. 538 observes, 'bei Aberkios hat man streiten können, ob er Attisdiener oder Christ war.' The former view is held by Ficker, Harnack, Dieterich, Hepding; the latter, by Duchesne, Paton, and Kaufmann.

[2] Aug. *in Io. ev. tract.* 7. 1. 6′ (xxxv. 1440 Migne) quia iam non possunt seducere Christianos, ut dent venenum, addunt mellis aliquid, ut per id quod dulce est, lateat quod amarum est, et bibatur ad perniciem; usque adeo ut ego noverim aliquo tempore illius Pileati sacerdotem solere dicere: 'et ipse Pileatus Christianus est.' The history of the Ophites (F. Legge *Forerunners and Rivals of Christianity* Cambridge 1915 ii. 25 ff.) shows how easy it was for Phrygian Christianity to be gravely contaminated with Phrygian paganism (cp. T. Eisele 'Die phrygischen Kulte und ihre Bedeutung für die griechisch-römische Welt' in the *Neue Jahrb. f. klass. Altertum* 1909 xxiii. 620 ff.). Synesios in a hymn that betrays Ophitic influence addresses God as at once Father and Son of Himself (*h.* 3. 145 ff. *πατέρων πάντων | πάτερ, αὐτοπάτωρ, | προπάτωρ, ἀπάτωρ, | υἱὲ σεαυτοῦ*); and Synesios shortly afterwards became a bishop of the orthodox church.

[3] A small head of white marble in my possession (figs. 197, 198: height 5§ ins.) gives a good idea of the *formosus adulescens* (Lact. *div. inst.* 1. 17, *epit.* 8. 6) wearing his *pileum*.

[4] *Supra* i. 250 fig. 180, 763 n. 4, 765 ff. fig. 554 ff.

and raises the question: In what relation did the Phrygian Attis stand to the Hellenic Kastor and Polydeukes? Was he too in any sense a twin? There is something to be said for the view that he was.

Years ago Haakh pointed out that Roman tombstones from

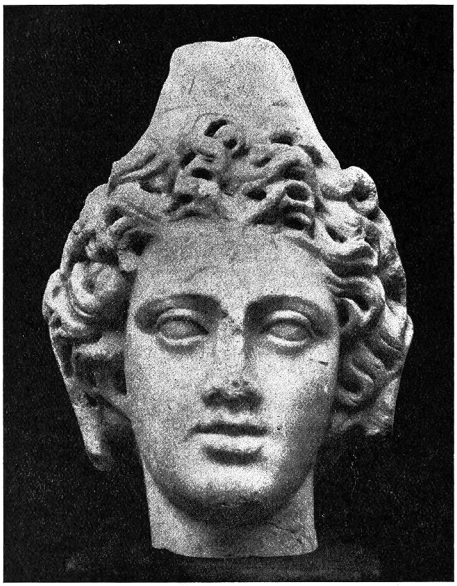

Fig. 197.

districts drained by the Rhine or the Danube not infrequently duplicate the person of Attis (*e.g.* fig. 199), and argued that such monuments go to prove the existence of a Phrygian pair resembling the better known Hellenic and Italian twins[1]. This argument,

[1] Haakh 'die Attisbilder auf römischen Grabdenkmälern' in the *Verh. d. 60. Philologenversamml. in Stuttgart* Stuttgart 1857 pp. 176—186 citing: (1) and (2) Two tombstones found at Rottenburg (K. L. von Urlichs in the *Jahrb. d. Vereins v. Alterthumsfreund. im Rheinl.* 1856 xxiii. 49 ff. pls. 1, 2, Haakh *loc. cit.* p. 177 with figs.); (3) A tombstone found near Bonn (K. L. von Urlichs *loc. cit.* 1846 ix. 146 ff. pl. 6, 1856 xxiii. 49, Haakh *loc. cit.* p. 180); (4) A tombstone at Coblenz, on which each Attis has above his head a pair of double axes and an Amazonian shield, below his feet vegetation of some sort (L. Lersch *Centralmuseum rheinländischer Inschriften* Bonn 1842 iii. 63, Haakh *loc. cit.* p. 181 f. with fig.); (5) A tombstone in the castle of Enseck, which shows two Lares in the guise of Attis with Phrygian cap and *pedum* flanking a dog and a

however, is of doubtful value. F. Cumont[1] assumes confusion with Cautes and Cautopates[2]. We have also to reckon with the funerary type of the pensive, torch-bearing Eros common enough in the

Fig. 198.

Graeco-Roman age[3]. Moreover, Attis, as a god reborn, would be a favourite emblem of resurrection and, like Nike in a different setting, peculiarly liable to decorative multiplication. But Haakh has more to urge in support of his Phrygian twins: he appeals to literary as

bay-tree (*Beiträge zur Landeskunde für Oesterreich ob der Enns und Salzburg* Linz 1846 v pl. 3, no. 4, Haakh *loc. cit.* p. 184 f. with fig.). To these should be added: (6) A tombstone from Andernach, on which each Attis has above his head an Amazonian shield (J. Klein in the *Bonner Jahrbücher* 1884 lxxvii. 14—37 pl. 1 = my fig. 199, Reinach *Rép. Reliefs* ii. 54 no. 1, *Corp. inscr. Lat.* xiii no. 7684); (7) A tombstone from Bingerbrück, now at Kreuznach (Reinach *Rép. Reliefs* ii. 66 no. 1, *Corp. inscr. Lat.* xiii no. 7507). Doubtless other examples could be collected.

well as to monumental evidence. According to Polybios, Cn. Manlius, when encamped in 189 B.C. on the bank of the river Sangarios, 'was visited by Galloi from Attis and Battakes, priests of the Mother of the gods at Pessinous[1].' The historian's description suggests a double priesthood. The jingling names[2] would suit the priests of twin deities. And both names were traditional. 'Attis the priest,' who carried on a correspondence with Eumenes ii in

Fig. 199.

[1] Polyb. 21. 37. 5.

[2] Cp. the *Ἀτταβοκαοί* or mystics of the goddess at Pessinous (Dittenberger *Orient. Gr. inscr. sel.* nos. 540, 20 and 541, 7).

163 B.C. and with Attalos ii before and after his accession in 159 B.C.[1], may have been the same Pessinuntine hierarch: he evinces the same anti-Galatian ideas[2]. Another 'Attis the priest,' one out of ten, who are distinguished from the chief priest, is recorded in an inscription from Pessinous of early imperial date[3]. And as to Battakes, Diodoros states that in 102 B.C. 'a certain man named Battakes, priest of the great Mother of the gods, came from Pessinous in Phrygia' to Rome demanding expiation for the defilement of her temple[4]. Plutarch puts it differently: Battakes came 'with a message that the goddess from the temple (*anáktora*) had announced to him the triumphant victory of the Romans' over the Teutones[5]. Haakh contends that Plutarch's *anáktora* is again suggestive of a twin cult, since the Dioskouroi were *Ánaktes*[6]. But the word *anáktoron* is of much wider application, and no stress can be laid on the use of the plural *anáktora*[7]. Nor is Haakh's contention much strengthened by the Herodotean tale of Adrastos and Atys[8]. The former was son of the Phrygian king Gordios iv; the latter, son of the Lydian king Kroisos—unpromising material for a myth concerning twins, even if it be conceded that the episode had no historical foundation[9]. There remains the old Lydian pedigree, which represented Atys and Kotys as sons of Manes[10]. Manes, the fore-

[8] Adrestos, son of Gordies son of Mides, having unintentionally slain his brother, was driven out by his father and took refuge with Kroisos, who purified him and received him kindly at his court. Some time afterwards Mysia was devastated by a monstrous boar from the Mysian Mt Olympos. Atys, son of Kroisos, was eager to join the chase. His father, having dreamt that Atys would perish by means of an iron spear, at first would not let him go, but later sent Adrestos as his guardian. Adrestos, aiming with his javelin, missed the boar and slew Atys. Kroisos in deep distress invoked Zeus Καθάρσιος and Ἑπίστιος and Ἑταιρήϊος, but, regarding the accident as the fulfilment of his dream, pardoned Adrestos. Thereupon Adrestos killed himself on the tomb of Atys (Hdt. i. 35—45).

father of the Lydians, was recognised also by the Phrygians[1]. He seems to have been called Masnes by the logographer Xanthos[2], a Lydian who wrote four books on Lydia in the reign of Artaxerxes i (465—425 B.C.)[3]. Manes later passed as the son of Zeus and Ge[4]. Indeed, an inscription discovered at Oturak by Sir W. M. Ramsay actually identifies him with Zeus[5]. Atys and Kotys may, therefore, have been regarded as *Dióskouroi*, sons of Zeus; and the assonance of their names is, as Dr Rendel Harris has abundantly shown[6], characteristic of divine twins. Nevertheless the whole case is com-

[5] Sir W. M. Ramsay in the *Journ. Hell. Stud.* 1883 iv. 419 ff. no. 33 *ὁ* [*ἀ*]*θάνατος* Ἐπιτύνχα[*ν*]*ος Πίον τιμηθ*(*ε*)*ὶς ὑπὸ* Ἑκά|*της πρώτης, δεύτε*[*ρ*]*ον ὑπὸ* Μάνου Δάου· | [Ἡ]λιο|*δρόμου Διός, τρί*|*τον Φοίβου* Ἀρχηγέτο[υ] Χρησμοδότου *ἀ*|*ληθῶς δῶ*|[*ρ*]*ον ἔλαβ*|[*ο*]*ν χρησ*|[*μ*]*ο*|*δότι*|*ν ἀλη*|[*θε*]*ίας ἐν* | *πατρ*|*δι κὲ* (*ἐ*)*ν δ*|[*ρ*]*οις χρ*|[*η*]*σμοδότιν* | *νόμους τιθ*(*ε*)*ῶν* (perhaps *τί*(*ε*)*ιν*) *ἐν ὅροις* | [*χ*]*ρησμοδότιν* | [*π*]*ᾶσιν τοῦτο ἔχω δῶ*|[*ρ*]*ον ἐξ ἀθανά*|*των πάντων· κ.τ.λ.* an inscription of 313—314 A.D. from the neighbourhood of Akmoneia accompanied by a series of three reliefs—above, a radiate head; in the middle, the rider-god with a battle-axe over his shoulder (much defaced); below, a bust with hands folded across breast. The altar adorned with these carvings commemorates several members of one family, two at least of whom held office as *ἀρχιερεύς* in some pagan cult. The god Manes Daes (or Daos) Heliodromos Zeus is of mixed origin. Manes was father of Akmon, founder of Akmoneia (Alexandros Polyhistor *frag.* 45 (*Frag. hist. Gr.* iii. 233) *ap.* Steph. Byz. *s.v.* Ἀκμονία). Daes (or Daos) might be the singular of the Scythian tribe *Δάαι, Δᾶαι, Δάοι, Dahae* (W. Tomaschek in Pauly—Wissowa *Real-Enc.* iv. 1945 f.); Daos, the singular of the nomad Persians called Δάοι by Hdt. i. 125 (*id. ib.* iv. 2133): other possibilities would be to see in Daes the masculine deity corresponding with the feminine Daeira (*supra* i. 212), or to quote Hesych. *δάος· φῶς, δᾷδα. πῦρ, φλόξ, φέγγος, αἰγή. καὶ ὑπὸ Φρυγῶν λύκος.* Sir W. M. Ramsay in the *Journ. Rom. Stud.* 1918 vii. 145 and in the *Journ. Hell. Stud.* 1920 xl. 197, 202 adopts the last expedient, takes Δάος to mean 'the Wolf,' and cp. *Lyk*(*ábas?*) *Sázon* on a *quasi*-autonomous copper of Themisonion in Phrygia (Imhoof-Blumer *Kleinas. Münz.* i. 299 no. 1, *Brit. Mus. Cat. Coins* Phrygia pp. civ, 419 pl. 49, 2 *obv.* ΑVΚ· CΩZΩN Bust of the god, radiate). I prefer to regard Δάος as a Persian ethnic, because Ἡλιοδρόμος is in obvious allusion to the Mithraic Ἡλιοδρόμοι (A. Dieterich *Eine Mithrasliturgie*[2] Leipzig und Berlin 1910 p. 151)—indeed, the titles Δάος Ἡλιοδρόμος Ζεύς would tally with the grades *Perses, Heliodromus, Pater* (*supra* i. 443 n. 1). Cp. also Hesych. *Μηδινεύς, μηδεὺς παραμηδοτιοῦν. Μηδαπλῶς. παρὰ δὲ Λυδοῖς ὁ Σεὺς ζεῦσις* (cod.), which M. Schmidt prints as *Μηδινεύς· Μηδεύς, παρὰ* [*μηδοτιοῦν. μηδαπλῶς.*] *παρὰ δὲ Λυδοῖς ὁ Ζεὺς* [*ζεῦσις*]. P. Carolidis *Bemerkungen zu den alten kleinasiatischen Sprachen und Mythen* Strassburg 1913 p. 88 connects (unconvincingly) *Μηδεύς, Μηδινεύς* with *Μίδας*.

[6] J. Rendel Harris *The Dioscuri in the Christian Legends* London 1903 pp. 1 f., 52 f., *id. The Cult of the Heavenly Twins* Cambridge 1906 p. 58 ff.

paratively weak, and, sooner than insist upon it, I would push enquiry in a somewhat different direction.

Whether the Phrygians had in early days a twin-cult corresponding with that of the *Nâsatia* mentioned in the prehistoric (*s.* xiv B.C.) records of Boghaz-Keui[1], we can hardly hope to determine. The appearance of the Dioskouroi or their attributes on coins of Aizanoi[2], Akmoneia[3], Apameia[4], Bria[5], Synnada[6], Temenothyrai[7], and Themisonion (?)[8] is late and of no great significance. I would rather lay stress on the fact that in the Thraco-Phrygian area the Father and the Son, being diverse manifestations of the same god, formed, not indeed divine twins, but at least a divine pair likely to influence or be influenced by any adjacent cult of twins.

(*θ*) The *Kábeiroi* or *Megáloi Theoí*.

The situation is complicated by the variety of names under which the Thraco-Phrygian Father and Son won their way to general recognition. Of *Díos* and *Díos Nŷsos*[9], of *Pápas* and *Áttis*[10], we have already spoken. If we termed the former pair Thracian and the latter Phrygian, that was merely in order to give a rough indication of their range without implying that they were ultimately of diverse origin. And here we must add that the Samothracian Kabeiroi were originally of kindred stock. In common with R. Pettazzoni[11], L. R. Farnell[12], and Miss Harrison[13] I hold that these mys-

Coins* Phrygia p. 420 pl. 49, 5 and *Hist. num.*[2] p. 687 would recognise in the third figure Lykabas Sozon (?)—a precarious guess.

[9] *Supra* p. 277 ff.

[10] *Supra* p. 292 ff.

[11] R. Pettazzoni 'Le origini dei Kabiri nelle isole del mar tracio' in the *Memorie della R. Accademia dei Lincei.* Classe di Scienze Morali, Storiche e Filologiche. Serie Quinta. Roma 1909 xii. 635—740 argues for a threefold stratification of the Cabiric cult. (1) In

terious powers were Thracian deities called *Kábeiroi* by Phoenician traders and *Megáloi Theoí* by Hellenic settlers. I further agree with Miss Harrison's acute surmise that their triad included 'one woman the Mother, two males, the Father and the Son—older and younger forms of each other[1].' I take it that Axiokersa was the Mother, Axiokersos the Father, and Axieros the son[2] conceived as a rebirth of the Father. The names bear witness to the vitality of the very ancient axe-cult in the northern islands of the Aegean[3]. *Axiokérsa* appears to mean 'She that is cleft with the Axe,' *Axió-*

prehistoric times the worship of Dionysos-Sabazios with his Satyrs and of Bendis-Hekate with her Maenads spread from Thrace to the neighbouring islands Thasos, Samothrace, Imbros, Lemnos. These two Thracian deities with their respective *πρόπολοι* formed the indigenous element of the cult in question. (2) Phoenician merchants brought to some of the Thracian islands their own *Kábeiroi* or 'Great Ones,' seven gods serving an eighth named Ešmun (Philon Bybl. *frag.* 2. 27 (*Frag. hist. Gr.* iii. 569 Müller) *ap.* Euseb. *praep. ev.* 1. 10. 38, Damaskios *v. Isid. ap.* Phot. *bibl.* p. 352 b 11 ff. Bekker). The islanders identified Ešmun with the Thracian Dionysos-Sabazios and the *Kábeiroi* with his *πρόπολοι*. Hence Dionysos-Sabazios acquired the Phoenician title of Ešmun *Kadmîlos*, and Bendis-Hekate came to be called *Kabeiró*. (3) Hellenic settlers came to Samothrace with the Eleusinian cult of Demeter, Kore, Hades. This trio was installed beside *Kadmîlos*, the resultant quartette being henceforward called by the Phoenician name *Kábeiroi* or its Greek equivalent *Megáloi Theoí*. Finally, the name *Kábeiroi* degenerated into an appellation of the *πρόπολοι*.

[1] L. R. Farnell 'Kabeiroi' in J. Hastings *Encyclopædia of Religion and Ethics* Edinburgh 1914 vii. 628—632 independently of Pettazzoni suggests the following sequence of events: 'Phœnician traders may have found an aboriginal mystery-cult in this remote and inaccessible island [Samothrace]; they may have attached their own descriptive title "Kabeirim," "the mighty ones," to the divinities that they found in the island, because this corresponded to some local divine appellative that the later Greeks translated by the phrase *οἱ μεγάλοι θεοί*; then, through the spread of Phœnician trade, the Semitic name for the island deities acquired permanent vogue' (*ib.* p. 628). Dr Farnell holds that 'the original Samothracian trio' included, not only an elder and a younger god, later identified with the Dioskouroi, but also a 'female earth-spirit, conceived as earth-mother or earth-bride' and 'subordinate to the male principle of divinity' (*ib.* p. 630).

[2] Miss J. E. Harrison in *The Year's Work in Class. Stud. 1915* p. 76 f.

[1] *Ead. ib.* p. 77.

[2] This does not square with schol. Ap. Rhod. 1. 917 cod. Laur. (ed. H. Keil Lipsiae 1854) *μυοῦνται δὲ καὶ ἐν τῇ Σαμοθρᾴκῃ τοῖς Καβείροις, ὡς Μνασέας φησί* (*frag.* 27 (*Frag. hist. Gr.* iii. 154 Müller))· *καὶ τὰ ὀνόματα αὐτῶν ὃ τὸν ἀριθμόν*, 'Αξίερος 'Αξιόκερσα 'Αξιόκερσος· 'Αξίερος *μὲν οὖν ἐστιν ἡ Δημήτηρ*, 'Αξιόκερσα *δὲ ἡ Περσεφόνη*, 'Αξιόκερσος *δὲ ὁ* Ἄιδης· *ὁ δὲ προστιθέμενος τέταρτος Κάσμιλος ὁ Ἑρμῆς ἐστιν, ὡς ἱστορεῖ Διονυσόδωρος* (*Frag. hist. Gr.* ii. 84 Müller). R. Pettazzoni, who *loc. cit.* p. 21 f. has a critical discussion of this passage, concludes that the names 'Αξίερος 'Αξιόκερσα 'Αξιόκερσος, together with their exegesis as *Δημήτηρ Περσεφόνη Ἄιδης*, are probably not derived from Mnaseas, but from Dionysodoros a grammarian of uncertain date. The author of the explanation, whoever he was, appears to have equated in a purely mechanical way the early Samothracian triad Axieros, Axiokersa, Axiokersos with the late Eleusinian triad Demeter, Persephone, Hades. The equation does not inspire confidence.

[3] I have dealt with the matter in a paper on 'The Cretan Axe-cult outside Crete' in the *Transactions of the Third International Congress for the History of Religions* Oxford 1908 ii. 194, cp. *supra* i. 109.

kersos 'He that cleaves with the Axe[1],' and *Axíeros* the 'Axe-Eros[2]' or 'Axe-spirit[3].' On this showing *Axiokérsa* was an appellative of the Thracian earth-goddess, *Axiókersos* an appellative of the Thracian sky-god, while *Axíeros* was the name given to an emanation or rebirth of the latter. The same substratum of primitive Thracian belief probably underlies several of the early Greek theogonies. Thus Hesiod was aware of three primeval powers, Chaos, Gaia, and Eros[4]. Pherekydes of Syros, not only recognised Zeus,

[1] Hesych. *κέρσαι· κόψαι, τεμεῖν, κεῖραι, γαμῆσαι* (so cod. A. Meineke cj. *γαλλίσαι*) and *κέρσης· γάμος* (so cod. M. Schmidt cj. *γάλλος*). The Hesychian glosses were cited in this connexion by Welcker *Gr. Götterl.* i. 329 n. 3 and after him by L. Bloch in Roscher *Lex. Myth.* ii. 2526. Other views in R. Pettazzoni *loc. cit.* p. 693.

[2] That the second element in the compound *Ἀξί-ερος* is none other than Eros (Homeric *ἔρος*) was perceived by F. G. Welcker *Die Aeschylische Trilogie Prometheus und die Kabirenweihe zu Lemnos* Darmstadt 1824 p. 240 (after N. Fréret), E. Gerhard *Hyperboreische-römische Studien* Berlin 1852 ii. 209, C. Strube *Studien über den Bilderkreis von Eleusis* Leipzig 1870 p. 74. G. F. Unger in the *Jahrb. f. Philol. u. Pädag.* 1887 cxxxv. 57 assumes a word meaning 'earth' connected with *ἔρα, ἔραζε*. O. Crusius *Beiträge zur griechischen Mythologie und Religionsgeschichte* Leipzig 1886 p. 26 n. 2 divides 'ἀξι-ερός?'

[3] The derivation of *ἔρως, ἔρος* is much disputed (see *e.g.* Prellwitz *Etym. Wörterb. d. Gr. Spr.*[2] p. 152, Boisacq *Dict. étym. de la Langue Gr.* p. 270 f.) and need not concern us. The essential thing is to realise that Eros was the form taken by the soul of the sky-god on the occasion of his rebirth; for the art-type of Eros is the art-type of souls in general. Miss J. E. Harrison hits the nail on the head, when she says: 'Eros is but a specialized form of the Ker; the Erotes are Keres of life, and like the Keres take the form of winged *Eidola*' (Harrison *Proleg. Gk. Rel.*[2] p. 631). Eros is therefore the male Harpy (Hesych. *ἅρπυν· ἔρωτα. Αἰολεῖς* with M. Schmidt *ad loc., et. mag.* p. 148, 33 ff. "Αρπυς· ὁ Ἔρως· ὡς παρὰ Παρθενίῳ ἐν Κρηναγόρᾳ, "ἀμφοτέροις ἐπιβὰς Ἅρπυς ἐληΐσατο":—παρὰ τὸ ἁρπάζειν τὰς φρένας) or Erinys (Hesych. *ὄρπα· Ἐρινύς*). On the relations of Eros to Psyche see L. Stephani in the *Compte-rendu St. Pét.* 1877 pp. 53—219, A. Furtwängler in Roscher *Lex. Myth.* i. 1370—1372, O. Waser in Pauly—Wissowa *Real-Enc.* vi 531—542 and in Roscher *Lex. Myth.* iii. 3237—3256, G. Nicole in Daremberg—Saglio *Dict. Ant.* iv. 747—750, Gruppe *Gr. Myth. Rel.* p. 871 ff., *id. Myth. Lit.* 1908 p. 320 ff. The soul of a double-axe might be represented also as a butterfly (*infra* § 3 (c) i (*v*)).

[4] Hes. *theog.* 116 ff. as cited by Plat. *symp.* 178 B, Aristot. *met.* 1. 4. 984 b 27 ff., *de Xenoph.* 1. 975 a 11 ff., Sext. *adv. math.* 9. 8, Asklepios *in* Aristot. *met.* p. 29, 30 ff. Hayduck, Stob. *ecl.* 1. 9. 5 p. 112, 20 ff. Wachsmuth, cp. 1. 9. 12 p. 115, 5 ff. Cp. Paus. 9. 27. 2, Theophil. *ad Autol.* 2. 12, schol. Ap. Rhod. 3. 26, schol. Theokr. 13. 1, and, though Hesiod is not named, Serv. *in* Verg. *Aen.* 1. 664 = Myth. Vat. 2. 35. See further A. Rzach *ad loc.* Similarly Akousilaos *frag.* 1 (*Frag. hist. Gr.* 1. 100 Müller) *ap.* Damaskios *quaest. de primis principiis* 124 (i. 319, 8 ff. Ruelle), cp. Philodem. *περὶ εὐσεβείας* 137, 13 p. 61 Gomperz, made Chaos come first, then Erebos and Nyx, from whose union arose Aither, Eros, Metis: Plat. *symp.* 178 C and Stob. *ecl.* 1. 9. 12 p. 115, 7 f. Wachsmuth state generally that Akousilaos agreed with Hesiod; schol. Theokr. 13. 1 asserts that, according to Akousilaos, Eros was the son of Nyx and Aither. Sappho *frag.* 132 Bergk[4] *ap.* schol. Ap. Rhod. 3. 26, Eudok. *viol.* 354 held that his parents were Ge and Ouranos. Ibykos *frag.* 31 Bergk[4] *ap.* schol. Ap. Rhod. 3. 26, Eudok. *viol.* 354 is said to have traced the descent of Eros from Chaos; but T. Bergk *ad loc.* points out that cod. Laur. of schol. Ap. Rhod. 3. 26 reads "Ιβυκος <.....> ὁ δὲ Ἡσίοδος ἐκ Χάους λέγει τὸν Ἔρωτα, which leaves us in the dark as to Ibykos' view. In Parmenides *frag.* 13

Chthonia, and Eros[1], but in a passage of profound significance declared 'that Zeus had transformed himself into Eros, when about to create' the world[2]. The cosmogonic Eros, as G. F. Schoemann[3] called him, figures also in Orphic literature both early and late[4]: the *Rhapsodies* represent 'delightsome Eros' as contained in and issuing from 'the great body of Zeus[5]'; the *Hymns* make 'Eros' a synonym of 'Bakcheus,' whom they invoke as 'Sire of the gods and Son[6]'—a manifest echo of the old Thracian creed[7].

v. The Double Zeus.

(*a*) Zeus *Didymaîos.*

If now we set the principal types of Father and Son over against the principal types of Twin Brethren, we might fairly expect to find

Diels *ap.* Plat. *symp.* 178 B, Aristot. *met.* 1. 4. 984 b 25 ff., Simpl. *in* Aristot. *phys.* p. 39, 18 *πρώτιστον μὲν Ἔρωτα θεῶν μητίσατο πάντων* the subject of *μητίσατο* is probably *δαίμων ἢ πάντα κυβερνᾷ* (*frag.* 12, 3 Diels). Aët. 2. 7. 1 in H. Diels *Doxographi Graeci* Berolini 1879 p. 336, 12 *ap.* Stob. *ecl.* 1. 22. 1ª p. 195, 10 ff. Wachsmuth *ἤντινα καὶ δαίμονα κυβερνῆτιν καὶ κληδοῦχον* (so Fülleborn for *κληροῦχον* F.P.) *ἐπονομάζει, δίκην τε καὶ ἀνάγκην* is supposed by J. Burnet *Early Greek Philosophy* London and Edinburgh 1892 p. 204 to confuse the goddess in question (whom he regards as the Pythagorean Hestia = the Platonic Ananke) with the gate-opening Dike of Parmenides' prologue. But in Hermes Trismeg. *ap.* Stob. *ecl.* 1. 49. 44 p. 393, 18 Dike is sister of Ananke; and F. M. Cornford in his very notable book *From Religion to Philosophy* London 1912 p. 214 ff. argues that the goddess throned in the centre is not only Moira, Lachesis, Ananke, and Dike, but Aphrodite to boot. If so, Plout. *amat.* 13 was not far wrong, when he made Aphrodite the subject of *μητίσατο*. Certainly the common Greek tradition, which stretches back to Sappho *frag.* 132 Bergk[4] *ap.* schol. Theokr. 13. 1 (*Ἀφροδίτης καὶ Οὐρανοῦ*, cp. Paus. 9. 27. 3. C. J. Blomfield cj. *Γῆς*. Wilamowitz cj. *Ἀφροδίτης <ἢ Γῆς>*), regarded Eros as the son of Aphrodite. His father is Zeus in Eur. *Hipp.* 534 *Ἔρως, ὁ Διὸς παῖς* (cp. *Cirris* 133 ff. sed malus ille puer, quem nec sua flectere mater | iratum potuit, quem nec pater atque avus idem | Iuppiter, etc.). But the genealogy of Eros was notoriously a bone of contention: see Gruppe *Gr. Myth. Rel.* p. 1071 n. 1, O. Waser in Pauly—Wissowa *Real-Enc.* vi. 488 f.

the former influenced to some extent by the latter, or the latter by the former:

Father and Son	Twin Brethren
Zeus and Dionysos	Eurytos and Kteatos
Papas and Attis	Otos and Ephialtes
Kabeiroi	Idas and Lynkeus
	Aiolos and Boiotos
	Pelias and Neleus
	Chrysaor and Pegasos
	Podaleirios and Machaon (? Twins)
	Herakles and Iphikles
	Amphion and Zethos
	Iasos and Dardanos
	Eëtion and Polyarches
	Kastor and Polydeukes
	Hypnos and Thanatos

How far is our expectation justified? Zeus is never described as a twin; for his epithet *Didymaîos*[1] merely indicates that he was worshipped along with Apollon at Didyma near Miletos[2]. Macro-

[1] Athen. 477 B *Νίκανδρος δ' ὁ Κολοφώνιος ἐν τῷ πρώτῳ τῶν Αἰτωλικῶν γράφει "ἐν τῇ ἱεροποιίᾳ τοῦ Διδυμαίου Διὸς κισσοῦ σπονδοποιέονται πετάλοισιν, ὅθεν τὰ ἀρχαῖα ἐκπώματα κισσύβια φωνέεται."* The same passage is cited by Macrob. *Sat.* 5. 21. 12 and by Eustath. *in Od.* p. 1632, 8 f. (cod. P. of Macrob. omits *Διὸς*. cod. C. of Athen. reads *τῷ διδυμαίῳ κισσοῦ*. Eustath. has *Διὸς δυμαίῳ Διΐ*.).

Rehm in *Milet* iii. 263 ff. no. 165, 3 f. *[Συλ]λαῖος, ἀδελφὸς βασιλ[έως, ὑπὲρ βασιλέως Ὀβόδα] | ἀνέθηκεν Διὶ Δου[σάρηι Σωτῆρι (?)]* the Greek half of a bilingual inscription on a marble base erected in the Delphinion by Syllaios, vizier of the Nabataean king Obodas, probably in January 9 B.C.), as *Νόσιος* (*supra* i. 733 n. 6), as *Σωτήρ* (A. Rehm in *Milet* iii. 152 no. 130 *Διὸς Σωτῆρος* on a round altar or base in the Delphinion. This cult seems to have been much in evidence at Didyma: *Corp. inscr. Gr.* ii no. 2852, 10 ff. = Michel *Recueil d'Inscr. gr.* no. 39, 10 ff. = B. Haussoullier *Études sur l'histoire de Milet et du Didymeion* Paris 1902 p. 194 ff. no. 1, 10 ff. = Dittenberger *Orient. Gr. inscr. sel.* no. 214, 10 ff. *βασιλεὺς Σέλευκος* (Seleukos i Nikator rather than Seleukos ii Kallinikos) *Μιλησίων τῆι βουλῆι | καὶ τῶι δήμωι χαίρειν· ἀφεστάλκαμεν εἰς | τὸ ἱερὸν τοῦ Ἀπόλλωνος τοῦ ἐν Διδύμοις | τήν τε λυχνίαν τὴν μεγάλην καὶ ποτήρια | χρυσᾶ καὶ ἀργυρᾶ εἰς ἀνάθεσιν τοῖς θεοῖς | τοῖς Σωτῆρσι κομίζοντα Πολιάνθην, ἐπιγραφὰς ἔχοντα κ.τ.λ.*, 43 ff. *κέρας ἐπιγεγραμμένον "Διὶ Σωτῆρι" ἕ[ν,] | ὁλκὴ δραχμαὶ ἑκατὸν ἑβδομήκοντα τρεῖς, | τρεῖς ὀβολοί*, A. Rehm in *Milet* iii. 200 ff. no. 144 A, 9 f. *[τῶι τε Ἀπόλ]λωνι τῶ[ι Διδυμεῖ καὶ τῶι Διΐ | τῶι Σωτῆρι]* in a treaty with some unknown town, *id. ib.* 233 ff. no. 150, 21 f. *τῶι τε Ἀπόλλωνι τῶι Διδυμεῖ καὶ Ἀρτέμιδι καὶ Λητοῖ καὶ Ἀθηνᾶ(ι) καὶ τῶι Διὶ τῶι | Σωτῆρι, 112 ff. νὴ τὸ[ν] | Ἀπόλλωνα τὸν Διδυμέ(α) καὶ τὴν*

bius, it is true, tried to explain *Didymaîos* by the 'twofold' aspect of Apollon, who shines with direct rays in the sun, with reflected rays in the moon[1]; and Lucian held that Didyma was named after the Heavenly 'Twins[2].' But such guesses, whether ancient or modern[3], make shipwreck on the fact that other place-names of south-western Asia Minor (Idyma, Sidyma, Loryma, Kibyma, Olymos) point to a Carian[4], not to a Greek[5], origin. I cannot, therefore, agree with my friend Dr Rendel Harris, when he urges 'that Didyma was an original twin-town[6].'

(β) Zeus duplicated on a gem.

Equally illusory is the monumental evidence that has been produced in support of a twin Zeus. An engraved cornelian of Roman date in the Berlin collection (fig. 200)[7] certainly shows two very similar forms of Zeus seated side by side, each holding a thunderbolt in his right hand and an eagle-sceptre in his left. Above them appears a bearded (?) male head[8]; and beneath them are the letters MVH. This enigmatic design has exercised the ingenuity of archaeologists.

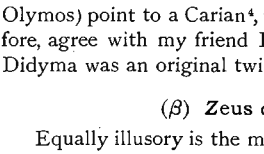

Fig. 200.

'Εστίαν τὴν Βουλαίαν καὶ τὸν Δία καὶ τὴν 'Αθηνᾶν καὶ | τοὺς ἄλλους θεούς in a treaty of April 180 B.C. (?) with Herakleia on Mt Latmos, cp. *infra* § 9 (h) i), as 'Τέτιος (at Didyma: see *infra* § 9 (h) i). For the Milesian festival known as Διὸς βοῦς see *supra* i. 717 n. 2, *infra* § 9 (h) i, and B. Haussoullier 'Le culte de Zeus à Didymes, la Βοηγία' in the *Mélanges Henri Weil* Paris 1898 pp. 147—158.

[5] *Pace* the frequent topographical use of the Greek Δίδυμα, Διδυμαί, Διδύμη, Δίδυμοι, Δίδυμον (W. Pape—G. E. Benseler *Wörterbuch der griechischen Eigennamen*[3] Braunschweig 1875 i. 297 f., A. Fick *Vorgriechische Ortsnamen* Göttingen 1905 p. 15).

[6] Rendel Harris *Boanerges* Cambridge 1913 p. 318.

[7] Furtwängler *Geschnitt. Steine Berlin* p. 121 no. 2608 pl. 23 (=my fig. 200: scale 2/3), J. J. Winckelmann *Description des pierres gravées du feu Baron de Stosch* Florence 1760 ii Classe no. 42, A. H. F. von Schlichtegroll *Choix des principales Pierres gravées de la collection qui appartenait autrefois au Baron de Stosch et qui se trouve maintenant dans le Cabinet du Roi de Prusse* Nuremberg 1798 (a German ed. was issued under the title *Dactyliotheca Stoschiana*) ii Classe no. 42 pl. 21, E. Gerhard *Prodromus mythologischer Ktensterklärung* (Text to Gerhard *Ant. Bildw.*) München 1828—1844 p. 129 n. 35, *id. Zwei Minerven* (*Winckelmannsfest-Progr. Berlin* viii) Berlin 1848 p. 5 n. 13 pl. 1, 5, C. Lenormant *Nouvelle galerie mythologique* (Trésor de numismatique et de glyptique) Paris 1850 p. 47 f. no. 4 pl. 8, Overbeck *Gr. Kunstmyth.* Zeus p. 257 f. Gemmentaf. 3, 6.

[8] Gerhard *Zwei Minerven* p. 5 n. 13 (followed by Overbeck *loc. cit.*) says: 'der oberwärts befindliche anscheinend weibliche Kopf.' Furtwängler *loc. cit.* tacitly corrects him: 'Oben ein undeutlicher bärtiger Kopf.' The blunder was facilitated by the fact

P. D. Lippert pronounced the divine pair to be Iupiter and Iuno[1]! C. Lenormant saw Iupiter in the double *rôle* of *Summus* and *Summanus*[2]. J. J. Winckelmann tried to justify the duplication by citing a copper coin of Smyrna, struck by M. Aurelius, which showed both a standing and a seated Zeus—Aither and Ouranos, he supposed[3]. But this coin (fig. 201)[4], as Montfaucon had already observed[5], merely symbolises an alliance between Smyrna and Laodikeia on the Lykos by a juxtaposition of the Smyrnaean Zeus *Akraîos*[6] seated with the Laodicean Zeus[7]

Fig. 201.

that the hair is crimped or waved. But this was a method of *coiffure* employed by the Romans not only for women (A. Furtwängler in the *Journ. Hell. Stud.* 1901 xxi. 221, Steininger in Pauly—Wissowa *Real-Enc.* vii. 2139) but also on occasion for men—witness the numismatic portraits of Otho (J. J. Bernoulli *Römische Ikonographie* Stuttgart 1891 ii. 7 Münztaf. 1, 5 f.).

[1] P. D. Lippert *Dactyliothec* (Supplement) Dresden, Leipzig 1767—1776 1, 30. On Lippert and his services to archaeology see C. Justi *Winckelmann in Deutschland* Leipzig 1866 i. 361 ff. and Furtwängler *Ant. Gemmen* iii. 414 f. Lippert was perhaps misled by the large nipples of the left-hand figure: but that is merely proof of haste and clumsiness on the part of the gem-engraver.

[2] C. Lenormant *loc. cit.*

[3] J. J. Winckelmann *op. cit.* p. 38, Gerhard *Zwei Minerven* p. 5 n. 13.

[4] *Brit. Mus. Cat. Coins* Ionia p. 307 pl. 39, 11 (=my fig. 201) rev.: ATTAΛOCCO ΦICTHCTA ICΠATPICI CMVPΛAO *i.e.* "Ατταλος σοφιστὴς (*sc.* ἀνέθηκε) ταῖς πατρίσι Σμυρ(ναίων) Λαο(δικέων). The Smyrnaean Zeus *Akraîos* is seated to left, with *himátion* wrapped about his legs, holding Nike in his outstretched right hand and leaning his left on a sceptre. Before him stands the Laodicean Zeus to right, with long *chitón* and *himátion*, holding an eagle on his outstretched right hand and a sceptre over his left shoulder. Rasche *Lex. Num.* viii. 1280. Cp. *Brit. Mus. Cat. Coins* Phrygia p. 324 f. pl. 52, 7 f.

[5] Montfaucon *Antiquity Explained* trans. D. Humphreys London 1725 Suppl. i. 33 pl. 5 no. 6.

Rasche *Lex. Num.* iii. 675, iv. 829 records similar alliance-coins of Ephesos and Kyzikos, struck by Antoninus Pius, with the type of two Zeuses joining their right hands and the legend ΕΦΕCIOC KYZIKOC (*sic*). But this is presumably a mistaken interpretation of the type correctly described by W. Wroth in the *Brit. Mus. Cat. Coins* Mysia p. 60 no. 290 and by W. Drexler in Roscher *Lex. Myth.* ii. 1774 f. as two youthful male figures (KVZIKOC and ЄΦЄCOC) grasping right hands.

[6] Append. B Lydia.

[7] A similar type of Zeus appears on *quasi*-autonomous and imperial coppers of Laodikeia (*Brit. Mus. Cat. Coins* Phrygia pp. lxxxi, 289 f. pl. 35, 1, 293 f., 296 f.: fig. 202 is from a specimen in my collection. *Brit. Mus. Cat. Coins* Phrygia p. 300 ff. pl. 37, 1, 3=my fig. 203). Sometimes he is flanked by Hera and Athena in a group intended to recall the Capitoline triad (*Brit. Mus. Cat. Coins* Phrygia p. 308 pl. 37, 7, *Hunter Cat. Coins* ii. 491 pl. 57, 3, Imhoof-Blumer *Kleinas. Münzen* i. 266 no. 21 pl. 8, 25=my fig. 204). Another interesting imperial type shows the city-goddess (ΛAO Δ IKЄIA) enthroned to left, with *kálathos*, *chitón*, and *himátion*: in her right hand is a statuette of the Laodicean Zeus, in her left a sceptre; below are two river-gods

standing. E. Gerhard too recognised 'ein Doppelzeus,' whom he at

Fig. 202.

Fig. 204.

Fig. 203.

(ΛVKOC and ΚΑΠΡ OC) with waves (Imhoof-Blumer *Kleinas. Münzen* i. 268 no. 26 pl. 8, 26=my fig. 205). A variant makes Laodikeia hold the statuette in her right hand, but a *cornu copiae* in her left (*Brit. Mus. Cat. Coins* Phrygia p. 317 pl. 38, 3). On another specimen Laodikeia, with a *phiale* in her right hand and the statuette in her left, stands between a wolf (ΛVKOC) and a boar (ΚΑΠΡΟC) representing the rivers (F. Imhoof-Blumer 'Zur griechischen und römischen Münzkunde' in the *Revue suisse*

Fig. 205.

Fig. 206.

de numismatique 1908 p. 161, Sir W. M. Ramsay *The Cities and Bishoprics of Phrygia* Oxford 1895 i. 35 f., ii. 785 f.: the latter by an intelligible slip says 'a goat ΚΑΠΡΟC'). On yet another she is enthroned to left, with the statuette in her right hand and a *cornu copiae* in her left, between two standing figures of ΦΡVΓΙΑ and ΚΑΡΙΑ (J. von Schlosser in the *Num. Zeitschr.* 1891 p. 1 ff. pl. 1, 1=my fig. 206, *Brit. Mus. Cat. Coins* Phrygia p. 317 pl. 38, 2). Head *Hist. num.*[2] p. 678 ff.

The temple of Zeus, before which Q. Pomponius Flaccus laid a white marble pavement (G. Weber in the *Ath. Mitth.* 1891 xvi. 144 f. no. 1, 13 f. with Ramsay *op. cit.* i. 50 n. 3), has not been identified. At some period before *c.* 150 A.D. the cult of Zeus was amalgamated with that of the Roman emperor in the festival Δεῖα Σεβαστὰ Οἰκουμενικά (E. L. Hicks *The Collection of Ancient Greek Inscriptions in the British Museum* iii. 2. 233 f. Oxford 1890 no. 605, 5 Δεῖα Σεβαστὰ οἰκουμενικὰ ἐν Λαοδικείᾳ ἀγενείων πυγμ[ήν·] | κ.τ.λ., 11 Δεῖα Σεβαστὰ οἰκουμενικὰ ἐν Λαοδικείᾳ ἀνδρῶν πυγμ[ήν·] | κ.τ.λ., *ib.* iii. 2. 239 f. no. 615, 14 ἐν Λαδικείᾳ ἀνδρῶν Δεῖα with Ramsay *op. cit.* i. 51, 53 f.).

Ramsay *op. cit.* i. 33, 50 f., F. Imhoof-Blumer *Kleinas. Münzen* i. 265 ff., and G. Macdonald in the *Hunter Cat. Coins* ii. 490 ff. speak of the god as Zeus Λαοδικηνός, *Laodicenus*, and most writers call him Zeus Λαοδικεύς, *Laodicensis*. But I am not aware of any such cult-title. *Corp. inscr. Lat.* ii no. 2525 Iovi *Ladico* M. Ulp. Aug. lib. Gracilis

first christened *Meilíchios* and *Epidótes*[1], but later compared with the *Dies Ktésioi* of Athenaios[2]: his first suggestion is improbable, his second impossible. Much more acute was the view of E. H. Toelken, who in the two Zeuses detected the reigning pair, Marcus Aurelius Antoninus and Lucius Aurelius Verus. The letters MVH may of course, as he suggested, indicate the name of the owner[3]. It is, however, very possible that they are the initials of Marcus, Verus, and Helios—the deity whose cult was specially connected with the Aurelii[4]. If the sun-god is bearded, that perhaps implies that he was identified by the gem-engraver with the preceding emperor, Antoninus Pius. The full official name T. Aelius Hadrianus Antoninus Augustus Pius would be likely enough to provoke such identification,

ex voto is best connected with Mt Ladicus in Gallaecia (De Vit *Onomasticon* iii. 735). If, as seems likely, the coin-types reproduce local statues, we must distinguish this Zeus of Laodikeia from Zeus Ἀσεύς of the same town (*supra* i. 706).

[1] E. Gerhard *Prodromus mythologischer Kunsterklärung* (Text to Gerhard *Ant. Bildw.*) München 1828—1844 p. 129 n. 35, cp. Plout. *non posse suaviter vivi secundum Epicuri decreta* 22 ἀλλὰ ὁ μὲν μέγας ἐν οὐρανῷ Ζεὺς πτηνὸν ἅρμα ἐλαύνων κάτω πρῶτος πορεύεται διακοσμῶν πάντα καὶ ἐπιμελούμενος· τῶν δὲ ἄλλων θεῶν ὁ μέν ἐστιν Ἐπιδότης, ὁ δὲ Μειλίχιος, ὁ δὲ Ἀλεξίκακος· κ.τ.λ. But this passage expressly distinguishes Zeus from the gods described as Ἐπιδότης and Μειλίχιος.

The title Ἐπιδότης or Ἐπιδώτης (O. Jessen in Pauly—Wissowa *Real-Enc.* vi. 60 f., Gruppe *Gr. Myth. Rel.* p. 932 n. 3) is used of various deities, sometimes as an epithet (*e.g.* Paus. 2. 10. 2 at Sikyon Ὕπνος κατακοιμίζων λέοντα, Ἐπιδώτης δὲ ἐπίκλησιν), sometimes as a name (*Inscr. Gr. Pelop.* i no. 526 from the Argive Heraion φιάλα ἃ Ἐπιδώτα, Paus. 2. 27. 6 at Epidauros ἱερὸν θεῶν οὓς Ἐπιδώτας ὀνομάζουσιν, Collitz—Bechtel *Gr. Dial.-Inschr.* i. 133 no. 342 on a rock near the ruins of Pagasai ΕΠΙΔΟ[ΤΑ]ΙΣ =Ἐπιδόταις). As an appellative of Zeus it is attested for Sparta by Hesych. *s.v.* Ἐπιδώτας (so Salmasius for cod. ἐπιδότας)· Ζεὺς ἐν Λακεδαίμονι (cp. Paus. 3. 17. 9 Λακεδαιμόνιοι δὲ ἐκτελοῦντες πρόσταγμα ἐκ Δελφῶν τάς τε εἰκόνας ἐποιήσαντο τὰς χαλκᾶς καὶ δαίμονα τιμῶσιν Ἐπιδώτην (so Ag. Ped. R *pr. man.* Ἐπιδωτὴν Lab. R *corr.* Vb. Ἐπιδότην M. Va.), τὸ ἐπὶ Παυσανίᾳ τοῦ Ἰκεσίου μήνιμα ἀποτρέπειν τὸν Ἐπιδώτην λέγοντες τοῦτον) and perhaps for Mantineia by Paus. 8. 9. 2 Μαντινεῦσι δέ ἐστι καὶ ἄλλα ἱερά, τὸ μὲν Σωτῆρος Διός, τὸ δὲ Ἐπιδότου (Ἐπιδότου Pc. Vab.) καλουμένου (so Kayser for καλούμενον)· ἐπιδιδόναι γὰρ δὴ ἀγαθὰ αὐτὸν ἀνθρώποις. Since ἐπιδίδωμι properly signifies 'I give a further gift' (*e.g.* Pind. *Pyth.* 5. 163 ff. Διός τοι νόος μέγας κυβερνᾷ | δαίμον' ἀνδρῶν φίλων. | εὔχομαί νιν Ὀλυμπίᾳ τοῦτο | δόμεν γέρας ἔπι Βάττου γένει) and so 'a liberal gift' (see Stephanus *Thes. Gr. Ling.* iii. 1577 D ff.), Ἐπιδότης or Ἐπιδώτης must mean 'the Generous Giver.' Cp. Kallim. *h. Zeus* 91 f. Κρονίδη πανυπέρτατε, δῶτορ ἐάων, | δῶτορ ἀπημονίης, and an inscription copied by E. Falkener in the theatre at Termessos beginning ΜΑΡΣΥΑΝ ΤΡΩΙΛΟΣΕΥΣ | ΔΙΟΣΛΩΤΗΡΟΣΕΙΤΑΙΟ, on which C. Henzen remarks: 'Titulus erat fortasse honorarius Marsyae Troili filii. Ζεὺς Δωτὴρ nimis certo in eo legi videtur, quam ut Σωτῆρος emendare liceat' (*Ann. d. Inst.* 1852 xxiv. 176 f.). ΕΙΤΑΙΟ is presumably Ἰδαῖον. Cp. Zeus Ἀναδώτης (Append. M *sub fin.*).

[3] E. H. Toelken *Erklärendes Verzeichniss der antiken vertieft geschnittenen Steine der Königlich Preussischen Gemmensammlung* Berlin 1835 p. 98 no. iii, 95.

[4] E. Klebs in Pauly—Wissowa *Real-Enc.* ii. 2431, *supra* i. 630 n. 6. *Aurelius* would inevitably be associated with Ἥλιος, *Helius*.

for *Aelius* was sometimes spelled *Elius*[1], while *Helius* on occasion appears as *Haelius*[2].

(γ) Zeus *Tetráotos*.

Again, Zeus—like other ancient divinities[3]—is sometimes Janiform. But here each case has to be investigated separately, and we must not assume without more ado that the duplication of features necessarily points to twinhood[4].

There seems to have been a cult of Zeus *Tetráotos*, 'the Four-eared,' in Phrygia[5], just as there was a cult of Apollon *Tetráotos* in Lakonike[6], while *Tetráotos* pure and simple occurs at Gela, apparently as the name of an ancient Sicanian deity (?)[7].

[1] Dessau *Inscr. Lat. sel.* nos. 2431, 6122, 6122[a].

[2] *Corp. inscr. Lat.* vi no. 19138.

[3] See *e.g.* W. H. Roscher's collection of Janiform heads in Roscher *Lex. Myth.* ii. 49—55.

[4] Other possibilities with regard to the origin and development of these multiple types are discussed in *Folk-Lore* 1904 xv. 282 ff.

[5] A. Körte in the *Gött. Gel. Anz.* 1897 clix. 408 no. 51 *Shar-öjük* (the stone is broken at the top and damaged in the last line but one) – – – [σὺ]‖ν γυναι|κὶ κὲ τέκν|οις ὑπὲρ τ|ῶν ἰδίων | Διὶ Τετρα|ώ[τω κατ'] ε|ὐχήν. Körte suggests Τετράωτος, but remarks that this necessitates *κατ' εὐχήν*, an unusual *formula*.

[6] Zenob. 1. 54 ἄκουε τοῦ τὰ τέσσαρα ὦτα ἔχοντος· ἐπὶ τῶν ἀπειθούντων. χρησμὸς γὰρ ἐδόθη Ἐντίμῳ τῷ Κρητὶ καὶ Ἀντιφήμῳ τῷ Ῥοδίῳ φυλάξασθαι τὸν Τετράωτον· ἦν δὲ οὗτος ληστὴς Φοίνιξ· οἱ δὲ τοῦ χρησμοῦ ἀμελήσαντες ἀπώλοντο. ἢ ἐπὶ τοῦ πολλὰ ἰδόντος καὶ πολλὰ ἀκούσαντος, ὡς Ἀριστοφάνης φησίν. ἄλλοι δὲ τὴν παροιμίαν παραγγέλλειν τῶν ἀληθευόντων ἀκούειν· οὐδεὶς γὰρ ἀψευδέστερος τοῦ Ἀπόλλωνος, ὃν τετράχειρα καὶ τετράωτον ἱδρύσαντο Λακεδαιμόνιοι, ὥς φησι Σωσίβιος (*frag.* 11 (*Frag. hist. Gr.* ii. 627 Müller)), ὅτι τοιοῦτος ὤφθη τοῖς περὶ Ἀμύκλαν μαχομένοις. Similar statements occur in Diogeneian. 2. 5 and Apostol. 1. 93. Cp. Liban. *or.* 11. 204 (i. 2. 507, 9 ff. Foerster) anent the shape of the new town at Antiocheia on the Orontes ἐκ δὲ ἀψίδων τεττάρων ἀλλήλαις συνηρμοσμένων εἰς τετράγωνον τύπον ὥσπερ ἐξ ὁμφαλοῦ τέτταρες στοῶν συζυγίαι καθ' ἕκαστον τμῆμα τοῦ οὐρανοῦ τέτανται, οἷον ἐν Ἀπόλλωνος τετράχειρος ἀγάλματι, Hesych. *s.v.* κουρίδιον·... Λάκωνες δὲ κουρίδιον καλοῦσι τὸν παρ' αὐτοῖς (so Stephanus *Thes. Gr. Ling.* iv. 1893 A for καλοῦσι. παρὰ δὲ αὐτοῖς cod.) τετράχειρον Ἀπόλλωνα, *id. s.v.* κυναγίας· ἱμάντες, οἱ ἐκ βύρσης τοῦ σφαγιασθέντος τετράχειρι Ἀπόλλωνι βοὸς ἕπαθλα διδομένου, Schöll—Studemund *anecd.* i. 267 (Ἀπόλλωνος) 38 τετραχείρου, H. J. W. Tillyard in the *Ann. Brit. Sch. Ath.* 1905–1906 xii. 378 f. no. 44, 1 f. = *Inscr. Gr. Arc. Lac. Mess.* i no. 259, 1 f. (slab with carved pediment from the precinct of Artemis *Orthia*) ἱρεὺς σεῖο, Μάκαιρα, κα[σιγνήτου] | τετράχειρος μῶαν [νικήσας ἀν]|θετο Καλλικράτης. κ.τ.λ. See further O. Höfer in Roscher *Lex. Myth.* v. 398 f.

[7] Entimos and Antiphemos, the founders of Gela (Hdt. 7. 153, Thouk. 6. 4, Athen. 297 E), consulted the Pythia (Diod. 8. 23, Aristainetos (*Frag. hist. Gr.* iv. 319 Müller) *ap.* Steph. Byz. *s.v.* Γέλα, *et. mag.* p. 225, 1 ff., cp. schol. Pind. *Ol.* 2. 16) and were bidden *inter alia* to beware of τὸν Τετράωτον (*supra* n. 6). They became embroiled with the Sikanoi (Artemon of Pergamon *frag.* 5 (*Frag. hist. Gr.* iv. 341 f. Müller) *ap.* schol. Pind. *Ol.* 2. 16), and Antiphemos, having sacked the Sicanian town of Omphake, carried off to Gela an image made by Daidalos (Paus. 8. 46. 2, 9. 40. 4). Since Janiform deities other than Ianus were not unknown in southern Sicily (*Brit. Mus. Cat. Coins* Sicily p. 186 Syracuse no. 283, G. F. Hill *Coins of Ancient Sicily* London 1903 p. 150 pl. 11, 4), it

(δ) The Celtic Janiform god.

Silver *statêres* struck by the Celts far up the Danube valley, in imitation of the fine tetradrachms issued by Philippos ii of Makedonia (figs. 207, 208)[1], sometimes transform the head of Zeus into that

Fig. 207.

Fig. 208.

of a two-faced bearded god resembling Ianus (figs. 209, 210)[2]. Again,

may be conjectured that this Sicanian image was ὁ *Τετράωτος*, later rationalised into a Phoenician freebooter (*supra* n. 6).

[1] I illustrate two specimens in my collection: (1) Fig. 207 = obv. Head of Zeus, laureate, to right; rev. ΦΙΛΙΓ ΠΟΥ Youth on horseback to right, carrying palm-branch. In the field a thunderbolt, probably the mint-mark of Pella. In the exergue Ν. (2) Fig. 208 = obv. Head of Zeus, with olive-wreath and olive-berries, to right; rev. ΦΙΛΙΓ ΠΟΥ Bearded Macedonian horseman, in short *chitón*, *chlamýs*, and *kausía*, raising his right hand. In the field forepart of winged horse, probably the mint-mark of Lampsakos, and bow. See also Head *Coins of the Ancients* p. 44 pl. 22, 18, *id. Hist. num.*[2] p. 223 fig. 136, P. Gardner *Types of Gk. Coins* pp. 153, 155 pl. 7, 29 and 39, Overbeck *Gr. Kunstmyth.* Zeus pp. 93, 96 f., 104 f. Münztaf. 1, 21, G. F. Hill in the *Journ. Hell. Stud.* 1897 xvii. 79 pl. 2, 11, *id. A Handbook of Greek and Roman Coins* London 1899 pp. 164, 171, 176 f., 261 pl. 7, 1, *id. Historical Greek Coins* London 1906 p. 80 ff. pl. 5, 44.

[2] E. Muret—M. A. Chabouillet *Catalogue des monnaies gauloises de la Bibliothèque Nationale* Paris 1889 p. 235 nos. 9897—9899, H. de la Tour *Atlas de monnaies gauloises* Paris 1892 no. 9899 pl. 51 (=my fig. 209) in the Bibliothèque Nationale at Paris, E. Fiala *Collection Ernst Prinz zu Windisch-Grätz* Prag 1895—1897 no. 2891, R. Forrer *Keltische Numismatik der Rhein- und Donaulande* Strassburg 1908 pp. 167, 169 fig. 328 pl. 36 found in the district of Tolna, Hungary, and now in the Forrer collection, M. Dessewffy *Barbár Pénzei* Budapest 1910 p. 40 no. 814 pl. 33 (I owe this reference to the kindness of my friend Mr G. F. Hill), R. Ratto *Catalogo di una grande collezione di un distinto numismatico straniero* Milano 1912 p. 16 no. 169 pl. 3. Fig. 210 is from a specimen of mine, referred to Pannonia (?): obv. Janiform bearded head; rev. Horseman, with plumed helmet, to right. In front of the horse's nose is Π, the last remains of the legend ΦΙΛΙΓ ΠΟΥ. Weight 189 grains.

gold *statêres* and quarter-*statêres* struck by the Mediomatrici, whose

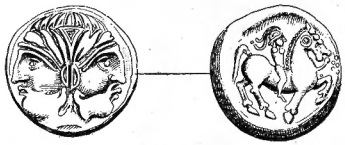

Fig. 209.

Fig. 210.

chief town was Divodurum (Mettis, *Metz*) on the Moselle, have for obverse type a beardless Janiform head (figs. 211—213)[1]. And coppers

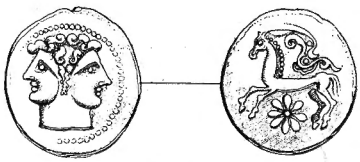

Fig. 211.

Fig. 212.

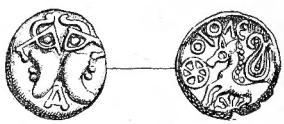

Fig. 213.

issued by Cunobelinus at Camulodunum (*Colchester*) have on one side a similar Janiform head, on the other a sow seated beneath an oak(?)-tree (fig. 214)[2]. This may be taken to imply that the Danubian, Rhenic, and British Celts recognised a god facing both ways. Such a god might appear in Roman dress as the Ianus *Geminus*[3] of

[1] E. Muret—M. A. Chabouillet *op. cit.* p. 207 nos. 8933 ff., H. de la Tour *op. cit.* nos. 8933, 8937, 8944 pl. 36 (=my figs. 211—213), R. Forrer *op. cit.* p. 346 fig. 543.

[2] Sir J. Evans *The Coins of the Ancient Britons* London 1864 p. 344 ff. pl. 13, 1 (=my fig. 214).

[3] *Corp. inscr. Lat.* iii no. 5092 *a* = Dessau *Inscr. Lat. sel.* no. 3319 (found near Wolfsberg at the foot of Mt. Saualpe in Carinthia, now at Klagenfurt) Iano Ge|mino etc. See further *infra* p. 338 n. 3 *fin.*

Noricum, the Ianus *Pater*[1], Ianus *Augustus*[2], Ianus *Pater Augustus*[3] of Dalmatia, the Ianus *Vaeosus*[4] of Gallia Narbonensis. Indeed, the memory of this dicephalous deity lingered on through the middle ages into modern times. Geoffrey of Monmouth, who died in 1154 A.D., describes the burial of King Lear by his daughter Cordelia in the following terms[5]:

Fig. 214.

'But Cordeilla, now mistress of the helm of state, buried her father in a certain underground chamber, which he had bidden to be made beneath the river Sora within the town of Legecestria. Now this underground chamber had been founded in honour of the two-faced Janus. And here, when the day of celebration came round, all the workmen of the town used to begin the work that would occupy them throughout the year.'

Geoffrey professes to be translating literally from a very ancient manuscript in the Welsh tongue lent to him by Walter, archdeacon of Oxford[6]. And it must be admitted[7] that the extant chronicle in Old Welsh attributed to Tysilio, bishop of Wales (*s.* vii A.D.)[8], agrees closely with Geoffrey's account:

[1] *Corp. inscr. Lat.* iii no. 2881 (Corinium (*Karin*)) Iano Pat[ri] | etc., no. 3030 (Flanona (*Fianona*)) Iano | Patri.

[2] *Corp. inscr. Lat.* iii no. 2969 = Dessau *Inscr. Lat. sel.* no. 3321 (Aenona (*Nona*)) Iano Aug. | etc.

[3] *Corp. inscr. Lat.* iii no. 3158 = Dessau *Inscr. Lat. sel.* no. 3320 (brought from Salonae (*Salona*) (?) to *Padua*, and now at *Este*) Iano Patri | Aug. etc.

[4] *Corp. inscr. Lat.* xii no. 1065 (*Cadenet* near Iulia Apta (*Apt*)) Iano Vaeo|so etc.

[5] Galfredus Monumetensis *hist. reg. Brit.* 2. 14 Cordeilla vero regni gubernaculum adepta sepelivit patrem in quodam subterraneo, quod sub Sora fluvio intra Legecestriam fieri praeceperat (*praecepit* ed. Ascensii). erat autem subterraneum illud conditum in honorem bifrontis Jani. ibi omnes operarii urbis adveniente solemnitate diei (I should prefer to read *dei*) opera, quae per annum acturi erant, incipiebant.

[6] Galfredus Monumetensis *hist. reg. Brit.* 1. 1, cp. 11. 1, 12. 20. For a discussion of these passages see San-Marte's ed. pp. xiii—xx ('Gottfrieds Quellen').

[7] W. M. Flinders Petrie 'Neglected British History' in *Proceedings of the British Academy* 1917 viii argues that the Brut Tysilio is really the original from which Geoffrey was drawing. See further an important *critique* of this paper in *The Cambridge Review* 1918 xxxix. 363 f. by [Dr] M. R. J[ames].

[8] The text is printed by W. Owen *The Myvyrian Archaiology of Wales* London 1801 ii. 81—390. I give the translation by P. Roberts *The Chronicle of the Kings of Britain* London 1811 p. 44 f. *Id. ib.* p. 354 well compares the description given by Giraldus Cambrensis *itin. Cambr.* 1. 2 (p. 349 of Sir R. C. Hoare's trans. in Bell's reprint 1905) of the festival of St. Almedha as celebrated on Aug. 1, Lammas Day (one of the four cross-quarter days—Roodmas, Lammas, Martinmas, Candlemas: see *infra* p. 326 n. 4), near Aberhodni: 'You may see men or girls, now in the church, now in the churchyard, now in the dance, which is led round the churchyard with a song, on a sudden falling on the ground as in a trance, then jumping up as in a frenzy, and representing with their hands and feet, before the people, whatever work they have unlawfully done on feast days; you may see one man put his hand to the plough, and another, as it were, goad on the oxen, mitigating their sense of labour, by the usual rude song: one man imitating

Cordalia now took the sovereignty of Britain into her own hands. Lear was buried in a cavern formed below the River Soar at Leicester, and which had been magnificently constructed in honour of the God Bifrons. Here likewise all the artificers of the kingdom were assembled annually, to work at what trade soever they were to pursue, to the end of the year from that time.

Sir John Rhŷs comments: 'This seems to mean that Llyr as a Celtic Dis was a god of beginnings, and that he had, like the Dis of the Gauls, more than one face, which naturally led him to be identified with the Roman Janus. The town of Leicester seems to have been a great centre of this cult, and only one thing is wanting; but it is a very important thing, namely, the discovery on the spot of some relic of antiquity inscribed with some such words as *Deo Jano Liro Sacrum*[1].' Recently Miss M. A. Murray in an article of exceptional interest[2] has called attention to the fact that the devil worshipped by the witches of southern France as late as the seventeenth century was Janiform[3], and has made it probable that at the 'Sabbaths' held on the four cross-quarter days[4] he was represented by a man with a double mask[5].

(ε) Iupiter *Ambisagrus* and Iupiter *Dianus*.

Zeus and Iupiter were seldom, if ever, Janiform in classical art. In 1843 E. Braun published a bifrontal head in the Palazzo Spada

the profession of a shoemaker; another, that of a tanner. Now you may see a girl with a distaff, drawing out the thread, and winding it again on the spindle; another walking, and arranging the threads for the web; another, as it were, throwing the shuttle, and seeming to weave. On being brought into the church, and led up to the altar with their oblations, you will be astonished to see them suddenly awakened, and coming to themselves.' P. Roberts *ib.* p. 354 further cites the ceremony known (*c.* 1750) as 'riding the Franchises': 'Upon this occasion the artizans of a corporation went in procession, and those of each trade exhibited a kind of booth, or shop, on a car, in which there was one or more working at the trade.'

[1] Sir J. Rhŷs *Studies in the Arthurian Legend* Oxford 1891 p. 131 f. *Id. ib.* p. 131 derives *Leicester* from *Leir-Cestre*: on which, however, see J. B. Johnston *The Place-names of England and Wales* London 1915 p. 342.

[2] M. A. Murray 'Organisations of Witches in Great Britain' in *Folk-Lore* 1917 xxviii. 228 ff.

[3] P. de Lancre *Tableau de l'inconstance des mauvais Anges et Demons* Paris 1612 p. 72 'Ianette d'Abadie de Siboro agee de 16. ans, dict qu'il auoit vn visage deuant, & vn visage derriere la teste, comme on peint le Dieu Ianus,' *ib.* p. 132 f. 'elle dict qu'elle y vid le Diable en forme d'homme noir & hideux, auec six cornes en la teste, parfois huict, & vne grande queuë derriere, vn visage deuant & vn autre derriere la teste, comme on peint le dieu Ianus.' Cp. *ib.* p. 72 'D'autres qu'il est comme vn grand bouc, ayant deux cornes deuant & deux en derriere:... & vne grande queuë au derriere, & vne forme de visage au dessoubs: duquel visage il ne profere aucune parole, ains luy sert pour le donner à baiser à ceux que bon luy semble, honorant certains sorciers ou sorcieres plus les vns que les autres.'

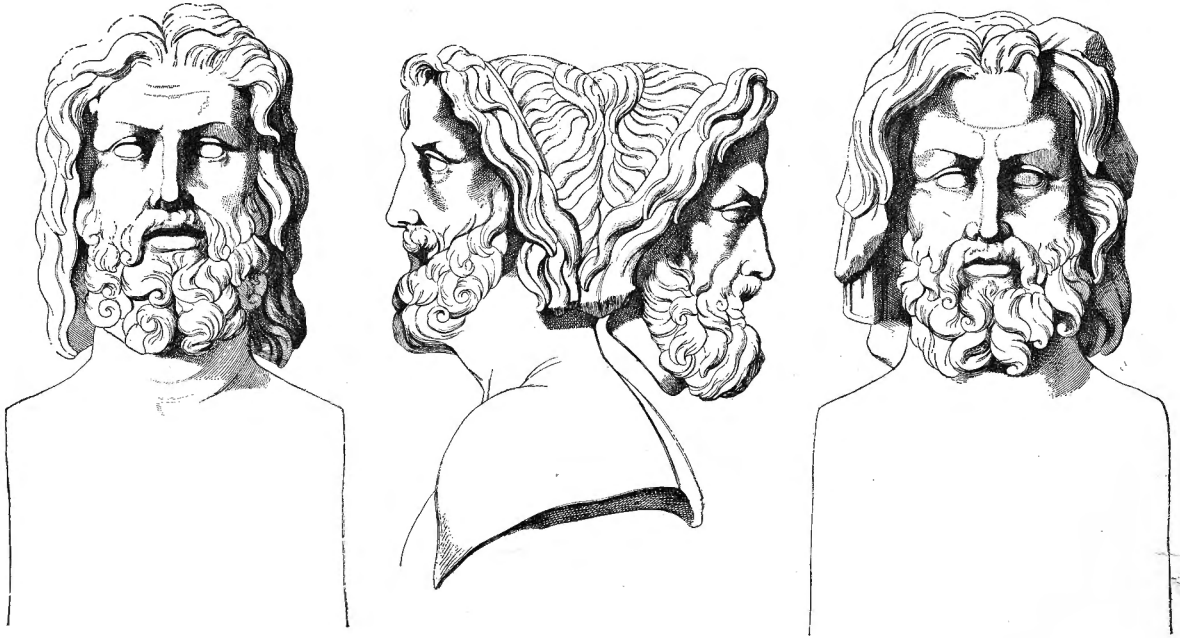
[5] Cp. *infra* § 3 (a) v (o) *fin.*



Bifrontal head (Ianus?) in the Palazzo Spada at Rome.

See page 326 f.

at Rome (pl. xx)[1], which he took to be a representation of Zeus in his celestial and chthonian characters, the former mild, the latter stern. Braun was followed by J. Overbeck[2]. But E. Gerhard, when confronted with the head, failed to detect any such distinction[3]. And K. F. Hermann[4], P. W. Forchhammer[5], K. O. Müller[6], W. H. Roscher[7], were all inclined to think that the sculptor meant to portray, not a Janiform Zeus, but Ianus himself. However, Braun was able to support his contention by quoting from P. Pedrusi (fig. 215)[8] a silver coin of Geta, struck in 211 A.D., which certainly shows a beardless(?)[9] two-faced god—presumably Iupiter[10]—holding a thunderbolt in his left hand and a reversed spear in his right. Forchhammer observed that the attributes are those of Iupiter *Conservator*, and suggested that this god was fused with Ianus *Conservator* in a unique numismatic type commemorating the double rule of Geta and Caracalla[11]. I should explain the type somewhat

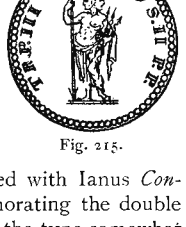


Fig. 215.

[1] E. Braun *Antike Marmorwerke zum ersten Male bekannt gemacht* Erste und zweite Decade Leipzig 1843 p. 4 no. 3 pl. 3[a] and pl. 3[b] (combined in my pl. xx). The double head is about life-size and broken off at the neck. We cannot therefore be sure whether it came from a statue or from a herm. In the Palazzo Spada it is set on an ancient, but single, herm, which does not belong to it. Both noses are damaged, and restored in the drawing.

[2] Overbeck *Gr. Kunstmyth.* Zeus p. 91 f. Matz—Duhn *Ant. Bildw. in Rom* i. 9 no. 32 remark that, of the two faces, the one here figured on the right is more like Zeus, the one here figured on the left more like Poseidon.

[3] See E. Braun *op. cit.* p. 4. E. Gerhard in the *Arch. Zeit.* 1850 viii. 137 n. 6 is non-committal.

[4] K. F. Hermann in the *Gött. gel. Anz.* 1844 i. 335.

[5] P. W. Forchhammer in the *Zeitschrift für die Alterthumswissenschaft* 1844 ii. 1074—1077.

[6] K. O. Müller *Handbuch der Archaeologie der Kunst*[3] Stuttgart 1878 p. 669 § 407 n. 2.

[7] W. H. Roscher in Roscher *Lex. Myth.* ii. 50 f.

[8] P. Pedrusi *I Cesari in argento da Adriano sino a' Caracalla, e Geta Raccolti nel Farnese museo E pubblicati colle loro congrue Interpretazioni* Parma 1703 iii. 365—367 pl. 24 no. 16 fig. (=my fig. 215).

[9] E. Braun *op. cit.* inset on pl. 3[b]=*Class. Rev.* 1904 xviii. 367 fig. 2 shows apparently a beardless + a bearded face, but is a very inexact reproduction of Pedrusi's figure.

[10] P. Pedrusi *loc. cit.* interprets the type as a two-faced Ianus regarding at once the past and the future. Cohen *Monn. emp. rom.*[2] iv. 274 no. 197 says: 'Janus? ou Jupiter à double tête' etc. J. Khell *Ad numismata imperatorum Romanorum aurea et argentea a Vaillantio edita, a Cl. Baldinio aucta ex solius Austriæ utriusque, iisque aliquibus Museis Subplementum a Julio Caes. ad Commenos se porrigens* Vindobonæ 1767 p. 131, describing a similar piece (Cohen *op. cit.*[2] iv. 274 n. 1), has: 'Juppiter seminudus stans d. hastam præpilatam inversam, s. fulmen.' See also *Folk-Lore* 1905 xvi. 276.

[11] P. W. Forchhammer *loc. cit.* A silver coin of Pertinax, with reverse of Ianus half-draped standing, spear in right hand, is inscribed IANO CONSERVAT (Rasche *Lex. Num.* iv. 505 f., 512, Suppl. iii. 70, Cohen *Monn. emp. rom.*[2] iii. 392 no. 17).

differently. A remarkable inscription engraved on a small altar found at Aquileia records the worship of Iupiter *Optimus Maximus Co(nservator) et Ambisagrus*[1]. The last title is commonly regarded as quite obscure[2]. But in view of our coin it becomes transparently simple. *Ambisagrus* is vulgar Latin for *Ambisacrus*[3] and means 'Sacred on both sides[4].' It implies that the Iupiter in question was a god resembling the two-faced Ianus. Accordingly, we are not surprised to discover that in the same town Aquileia there was a cult of Iupiter *Dianus*[5]—an ancient form of Ianus identified with the later Iupiter. It is hardly accidental that this Janiform Iupiter occurs in a district which was permeated with Celtic influences.

(ζ) Iupiter and Ianus in the Salian Hymn.

The *rapprochement* between Ianus on the one hand and Zeus or Iupiter on the other is attested, not only by Augustine[6] and Proklos[7] in the fifth century A.D., but also—to all appearance—by a Salian hymn which is one of the very oldest specimens of the Latin language[8].

[6] Aug. *de civ. Dei* 7. 9 has a discussion 'de Iovis potestate atque eiusdem cum Iano comparatione.' *Id. ib.* 7. 10 raises the question 'an Iani et Iovis recta discretio sit.'

[7] Proklos begins and ends a *quasi*-Orphic hymn to Hekate and Ianus with the lines: χαῖρε, θεῶν μῆτερ, πολυώνυμε, καλλιγένεθλε· | χαῖρ', Ἑκάτη προθυραία, μεγασθενές· ἀλλὰ καὶ αὐτὸς | χαῖρ', Ἴανε προπάτορ, Ζεῦ ἄφθιτε· χαῖρ', ὕπατε Ζεῦ (Prokl. *h.* 6. 1 ff., 13 ff. in E. Abel *Orphica* Lipsiae—Pragae 1885 p. 281).

[8] Varr. *de ling. Lat.* 7. 26 in multis verbis in quo[d] antiqui dicebant S, postea dicunt R, ut in carmine Saliorum sunt haec: 'cozeulodorieso. omnia vero adpatula coemisse. ian cusianes duonus ceruses. dunus Ianusue uet pom melios eum recum' * * * I give the text as printed by the latest editors, G. Götz and F. Schöll (1910). Within the last forty years numerous critics have attempted to rewrite this puzzling passage.

(1) H. Jordan *Kritische Beiträge zur Geschichte der lateinischen Sprache* Berlin 1879 pp. 152, 223 f. proposes the following Saturnian lines:

o Zeúl adóriésis—†ómniaueroad
patúlcius clusívius—Iánus cusiánus's
duonu' cérus es duonu' Iánus—prómeliós es récum

where *o Zeúl* = *o Sol* and *adórié(n)sis* is adjectival.

(2) L. Havet *De Saturnio Latinorum versu* Paris 1880 pp. 243 ff., 249 ff., 410 gives:

Cozevi, adoriose, †omnia vero ad; patulti, oenus es; jancus, Jan(e), es;
dvonus Cerus es; †dun; Janus †vevet; po meliose im recum...

with the interpretation: *Consivi, adoriose, ...tod; Patulti, unus es; janitor, Jane, es; bonus Cerus es; .....Janus.....; potissimum, meliorem eum regum....*

(3) T. Bergk *Kleine philologische Schriften* Halle a. S. 1884 i. 477 ff. ('De carminum Saliarium reliquiis' = *Indices lectionum...in academia Marburgensi*...MDCCCXLVII... MDCCCXLVIII) had suggested:

(*a*) Ozeul adosiose...
(*b*) ...omína vero ád Patúlcie mísse
Iánitós Iánes: duonús cerus és, Iánes.
(*c*) dúonus Iánus aúctet, pó meliósem récum...

where *Ozeul* (*Oozeul?*) etc. = *Sol adoriose; omína* etc. = *precationes vero admitte, Patulcie Ianitor Iane: bonus creator es, Iane*; and *dúonus* etc. = *bonus Ianus auctet, quo meliorem regum* (*nullum terra vidit Saturnia unquam*).

(4) E. Bährens in his edition (Lipsiae 1886) of the *Poet. Lat. min.* vi. 30 *frag.* 3 prints:

Ozeúl, o dómine, es ómnium
patér! Patúlci, Cloési,
es iáneús, ianés *es*!
duonús cerús es oénus,
promélios déuom récum.

At the end of the third line Bährens has added *es*. After the fourth line he has suppressed *Ianusue uet* as a variant on the third line transcribed 'ex uetusto codice.' The fifth line he takes to mean: *maximus dominorum caelestium*.

(5) C. M. Zander *Carminis Saliaris reliquiae* Lundæ 1888 pp. 1—4, 16—29, 39—53 defends the following text and translation:

O Zaúl, adorfese ómnia !
Veroᵘᵐ ád pätlá cõẽmís es iáneús, Iánes.
Dvonus Cérus és, dvonus Iánus.
Veueís promérios próme diús enúm recónde.

= *O sol oriens inuade omnia!* | *Portarum ad patulos aditus comis es ianitor, Iane.* | *Bonus Genius es, bonus Ianus.* | *Vivis* (dat. plur.), (optime) *promeritus, prome dies et reconde.*

(6) B. Maurenbrecher 'Carminum Saliarium reliquiae' in the *Jahrb. f. class. Philol.* Suppl. 1894 xxi. 332—335 *frags.* 2 and 3:

2. O Zol, adoriso omnia—verod Patulci cosmis;
Es Sancus Ianis duonus,—Cerus es duonus Ianus.
3. Potissimum meliosum recum.

The third word in *frag.* 2 is either *adoríso* = *adorīris* or *adoríso* = *adoreris*. The fragment is rendered: *O Sol*, (qui) *ad omnia vadis* (surgis), *re vera comis Patulci:* | *es bonus Sancus Ianius, es bonus Cerus*, (es) *Ianus*. *Frag.* 3 describes Ianus as most powerful of the gods (*meliores reges*).

(7) T. Birt in the *Rhein. Mus.* 1897 lii Ergänzungsheft ('Sprach man avrum oder aurum?') pp. 162, 193—197:

Conzéviós hordésios óptimos máximos Iános
Patulcós geminós seiánes cúsianés, duonus cérus es,
Duonus Iánus réxque óptimus méliosúm récum.

Conzéviós = *Consevius*; *hordésios* is an adjective formed from *hordeum*; *seiánes* is con-

nected with *Seia*, *Fructiseia*, the goddess of sowing; *cúsianés=curianus* (cp. *Curiatius*, *Quirinus*).

(8) G. Hempl 'The Salian Hymn to Janus' in the *Transactions and Proceedings of the American Philological Association* 1900 xxxi. 182—188 would restore the lines with (*a*) stressed or (*b*) quantitative scansion:

(*a*) cocéulōd oriēso · ómnia uḗrōd pátula cóemis ·
es iános cúsiátios · duónos céros es [*or* és] ·
duónos iános uéniet · potíssimos meliósom rḗcom ·

(*b*) co|ceulōd | oriē|so · omnia | uērōd | patula | coemis ·
es | iānos | cūsi|ātios | · duonos | ceros es ·
du|onos iā|nos ueni|et · poti|mos meli|ōsom rēcom ·

Here *coceulōd=cucūlō*, *oriēso=oriēre*, *coemis=comis* ('bring together, bring about, make, arrange'), *cūsiātios=cūriātius*. Hempl translates: 'Come forth with the cuckoo! Truly all things dost thou make open. | Thou art Janus Curiatius, the good creator art thou. | Good Janus is coming, the chief of the superior rulers.'

(9) T. von Grienberger 'Die Fragmente saliarischer Verse bei Varro und Scaurus' in the *Indogermanische Forschungen* 1910 xxvii. 205—223 recognises two sentences:

co zēulōd oriēs oomina ueruād patulāco ĕmisse;
iān cerus iān es, duonus cerus es, duonus iānusue et pom-melios eum recum!

=cum diluculo oriens exta apud portam patulam accipe! | Iane creator, Iane es; bonus creator es, bonus Ianusve, et multo melior (optimus) *illorum regum!* Thus **zeulom* is for **dǐēu-lo-m*, a derivative of **dǐēu-* ('sky, sky-god, day'); *ueruād patulāco* is for *ueroād* **pátŭlād-cō*, substantive (Italic masc. *uēro-*, 'door') and adjective in ablative case governed by the postposition *-co* ('at, by'); *ĕmisse* is the second person singular of the imperative of **ĕmissere* (a frequentative or intensive form of *ĕmĕre* in its older sense 'to take') governing *oomina* the accusative plural of *ōmen* (not for *osmen*, 'omen,' but a by-form of *omentum*, 'entrails'); *pom-melios* is for **pōt-melios* from **pōte-melios* ('much better').

To these nine reconstructions I am tempted to add a tenth. For convenience' sake I print the traditional text side by side with my reading of it:

cozeulodorieso.	io, Zeu Loidorie, io.
omnia vero adpatula coemisse.	omnia vera da patula, Camise.
ian cusianes duonus ceruses.	Ianus Ian es; duonus Cerus es,
dunus Ianus	duonus Ianus,
ue uet pom melios eum recum.	vel veterum promerios recum.

'Ho, Festal Iupiter, ho! | Fling wide all the doors, god of the Archway. | Thou art Ianus Ian; thou art the good Creator, | good Ianus, | foremost, an thou wilt, of ancient kings.' To justify text and translation I would urge the following points. W. M. Lindsay *The Latin Language* Oxford 1894 p. 5 suggested *O zeu=ὦ Ζεῦ*: the Grecism *Zeu* was perhaps due to the Greek appearance of *Loidorie*. Walde *Lat. etym. Wörterb.*² p. 444 connects *loidos*, the archaic form of *ludus*, with λοίδορος, λοιδορεῖν, as do Prellwitz *Etym. Wörterb. d. Gr. Spr.*² p. 273 and Boisacq *Dict. étym. de la Langue Gr.* p. 586: hence *Loidorie*='god of the *Ludi*.' T. von Grienberger (*supra* (9)) pointed out that *vĕro-* is the Italic word for 'door.' Kamise was the sister and wife of Ianos, when he first came to Italy (Drakon of Kerkyra *περὶ Λίθων* (*Frag. hist. Gr.* iv. 402 f. Müller) *ap.* Athen. 692 D—F: cp. Demophilos (*Frag. hist. Gr.* ii. 86 Müller) *ap.* Lyd. *de mens.* 4. 2 p. 66, 7 ff. Wünsch *Καμασήνῃ*, interp. Serv. *in* Verg. *Aen.* 8. 330 Camasenae (*v.l.* Camesenae)). Or, Cameses and Ianus were two indigenous rulers, who divided Italy between them (Protarchos of Tralleis (*Frag. hist. Gr.* iv. 485 Müller) followed by Hyg. *frag.* 6 Peter *ap.* Macrob. *Sat.* 1. 7. 19 cum Camese (Camase cod. G. camasene ('alterum *e* ex corr.') cod. A.)). Both versions are best explained by the assumption that Ianus himself had an old cult-title *Cameses* or *Camises* meaning 'god of the Archway' (cp. *camera*, *caminus*, and the group of words, including the German *Himmel*, discussed by Prellwitz *op. cit.*² p. 206, Walde *op. cit.*² p. 120, Boisacq *op. cit.* p. 401 f.). Fest. p. 205 *a* 19 ff. Müller, p. 222, 30 ff. Lindsay *promeriom* (promeriom cod. W., promerion cod. Y., promorion cod. X.

(η) Ianus and Iupiter on coins.

It is, moreover, borne out by numismatic evidence. The Roman *as* from *c.* 338 B.C. onwards[1], both in its original form as a pound of bronze (figs. 216—218)[2] and in its subsequent reductions (figs. 219—230)[3], had for obverse design the head of Ianus, while the corresponding *semis*, both early (figs. 231, 232)[4] and late (figs. 233—236)[5], had that of Iupiter. Similarly in the Romano-Campanian series of the half-century *c.* 290 to *c.* 240 B.C. silver didrachms (figs. 237—239)[6] and drachms, struck at Capua (?) in the name of Rome[7], showed a beardless head of Ianus on the obverse, and on the reverse Iupiter with thunderbolt and sceptre in a four-horse chariot driven by Victory. Thus within and without Rome itself Ianus was associated with Iupiter as senior with junior deity.

J. J. Scaliger cj. promerito, F. Lindemann cj. promeritom, E. Bährens cj. promedion (=promelion)) praecipuum, praeter caeteros meritum aut promedium, hoc est participat (E. Thewrewk de Ponor cj. participatum, J. J. Scaliger cj. participem, C. O. Müller cj. pro *μορίῳ* hoc est particula); ut (aut cod. W.) pro indiviso dicimus. I take *promerios* to be cognate with the Greek *πρόμος* and the Umbrian *promum* (=Latin *primum*): for the suffix cp. G. Goetz *Corpus glossariorum Latinorum* Lipsiae 1888 ii. 124, 34 *Lucerius*, Ζεύς, and such names as *Numerius*, *Valerius*.

Mr J. Whatmough, whom I consulted on the matter, proposes *Ieu* as vocative (djeu > Ieu > Iou > Iu-piter) and would be rid of rhotacism. On this showing the original (corrupted in Varro's text by Grecism and rhotacism) might have run:

io, Ieu Loidosie, io.
omnia vera da patula, Camese.
Ianos Ian es; duenos Ceros es,
duenos Ianos,
vel vetesom promesios recom.

(θ) Ianus an older Iupiter.

But the relations subsisting between Ianus and Iupiter call for clearer statement and closer definition.

Ianus was commonly recognised as the oldest god of Italy. Juvenal addresses Ianus *Pater* as 'most ancient of the gods[1].' Herodian speaks of him as the 'most ancient indigenous god of Italy[2].' Prokopios says: 'This Ianus was the first of the ancient gods, whom the Romans in their language termed *Penates*[3].' With regard to his essential character there was less agreement. According to Varro, some authorities identified him with the sky, others with the universe[4]. Varro himself appears to have shared the latter opinion[5]. But M. Valerius Messalla, consul in 53 B.C. and an augur of fifty-five years' standing, began a treatise on Ianus with the following words[6]:

He who fashions all things and rules them too has linked together, on the one hand water and earth, heavy elements slipping downwards into the abyss, on the other hand fire and air, light elements escaping upwards into space, by means of the sky put round about them: thus the great potency of the sky has bound together two unlike forces.

This extract, for the preservation of which we are indebted to the erudition of Macrobius, enables us to see how a philosophic mind might pass from a belief in Ianus as the sky to a belief in Ianus as the universe[7]. Others equated him with the air[8], or with chaos[9] the

Lindsay Chaos... ex eo et *χάσκειν* Graeci, et nos hiare dicimus. unde Ianus detracta aspiratione nominatur id, quod fuerit omnium primum; cui primo supplicabant velut parenti, etc.

yawning void[1]. Others, under the influence of Orphism[2], saw in him 'a power that controls the two Bears and sends divine souls to join the lunar dance[3].' And of course the solar mythologists of the republic[4] and the empire[5] claimed him for their own. Another natural extension of meaning transformed the sky-god into a time-god[6]. He was god of the day[7]. He was god of the months[8]. He was god of the seasons[9]. He was god of the year[10]. He was god of eternity,

[8] Macrob. *Sat.* 1. 9. 16 Iunonium, quasi non solum mensis Ianuarii sed mensium omnium ingressus tenentem; in ditione autem Iunonis sunt omnes Kalendae, unde et Varro libro quinto Rerum divinarum scribit Iano duodecim aras pro totidem mensibus dedicatas, Lyd. *de mens.* 4. 2 p. 65, 3 ff. Wünsch Φοντήϊος (so C. Wachsmuth for φροντήϊος: see further Kappelmacher in Pauly—Wissowa *Real-Enc.* vi. 2842, and for Ianus on coins of the *gens Fonteia infra* § 3 (a) v (o)) δὲ ἐν τῷ περὶ ἀγαλμάτων ἔφορον αὐτὸν οἴεται τοῦ παντὸς χρόνου τυγχάνειν, καὶ ταύτῃ δωδεκάβωμον εἶναι τὸν αὐτοῦ ναὸν κατὰ τὸν τῶν μηνῶν ἀριθμόν.

[9] Ov. *fast.* 1. 125 praesideo foribus caeli cum mitibus Horis, Lucan. 5. 5 f. instabatque dies (*sc.* Jan. 1) qui dat nova nomina fastis | quique colit primus ducentem tempora Ianum, Serv. *in* Verg. *Aen.* 7. 607 = Myth. Vat. 3. 4. 9 cited *infra* n. 10.

[10] Arnob. *adv. nat.* 3. 29 incipiamus ergo solemniter ab Iano et nos patre, quem quidam ex vobis mundum, annum alii solemve esse prodidere nonnulli, Serv. *in* Verg. *Aen.* 7. 607 alii anni totius (*sc.* dominum volunt), quem in quattuor tempora constat esse divisum. anni autem esse deum illa res probat, quod ab eo prima pars anni nominatur = Myth. Vat. 3. 4. 9 quem tamen alii totius anni dominum volunt, quem in quatuor tempora constat esse divisum, ideoque eundem quadrifrontem pingunt. anni autem eum esse dominum res illa probat, quod ab eo prima pars anni, id est Ianuarius nominatur. Cp. Plin. *nat. hist.* 34. 33 aut per significationem anni temporis = Lyd. *de mens.* 4. 1 ὥσπερ τὸν ἐνιαυτόν = Souid. *s.v.* Ἰανουάριος· ...ὥσπερ τὸν ἐνιαυτόν, Ov. *fast.* 1. 65 Iane biceps, anni tacite labentis origo, Mart. *ep.* 10. 28. 1 annorum nitidique sator pulcherrime mundi, Luxor. 506. 1 (*Poet. Lat. min.* iv. 415 Baehrens) lucifer annorum et saeclis, o Iane (so E. Baehrens for *seclissollane* cod. S. N. Heinsius cj. *saeclis, Sol, Iane*), secundus.

Ausonius even uses *Iani* in the sense of *anni* (Auson. *lib. de fastis concl.* 1. 7 p. 194 Peiper tu quoque venturos per longum consere Ianos, *epist.* 24. 13 p. 269 Peiper vive, vale et totidem venturos consere Ianos, | etc.).

being either the father of Aion[1] or Aion's very self[2]. Now if we assume—as, I think, we are justified in assuming—that Ianus, like Iupiter[3], was, to begin with, simply the divine Sky, we can understand, not only all the foregoing attempts to interpret him in terms of space and time, but also the very remarkable description of him as 'god of gods' contained in an extant fragment of the Salian hymn[4].

[1] Lyd. *de mens.* 4. 1 p. 64, 6 ff. Christ *Geschichte der griechischen Litteratur*[3] München 1898 p. 756 ff., Sir J. E. Sandys *A History of Classical Scholarship*[2] Cambridge 1906 i. 338 f.

[2] Lyd. *de mens.* 4. 1 p. 64, 12 ff. ὅθεν ὁ Μεσσαλᾶς (*supra* p. 335) τοῦτον εἶναι τὸν Αἰῶνα νομίζει· καὶ γὰρ ἐπὶ τῆς πέμπτης τοῦ μηνὸς τούτου (*sc.* Jan. 5) ἑορτὴν Αἰῶνος ἐπετέλουν οἱ πάλαι. Cp. Plin. *nat. hist.* 34. 33 et aevi esse deum indicent. *Supra* i. 192 n. 1.

[3] *Supra* i. 3 n. 2, 6 n. 3, 10 f. See further *Folk-Lore* 1905 xvi. 260 ff.

[4] Varr. *de ling. Lat.* 7. 27 ab eadem voce canite, pro quo in Saliari versu scriptum est cante, hoc versu: 'divum empta cante, divum deo supplicante.' The line thus printed by G. Götz and F. Schöll (1910) requires emendation. In the first half of it T. Bergk cj. *eni pa*, E. Bährens *parentem*, S. Linde *Ianem patrem*, B. Maurenbrecher *patrem*: in the second half Grotefend cj. *supplicate*, C. O. Müller *supplice cante*. The most satisfactory reading is that of E. Bährens (*Poet. Lat. min.* vi. 29): diuóm paréntem cánte, | diuóm deo súpplicáte. Cp. Macrob. *Sat.* 1. 9. 14 Saliorum quoque antiquissimis carminibus deorum deus canitur (*sc.* Ianus), 1. 9. 16 cur Geminum invocemus, supra iam diximus: Patrem, quasi deorum deum, etc., and Paul. ex Fest. p. 52, 12 f. Müller, p. 45, 24 Lindsay cited *supra* p. 335 n. 9.

Fortunately doubt does not extend to the words *divom deo* (*pace* C. M. Zander *Carminis Saliaris reliquiae* Lundae 1888 p. 54 ff.), and we may take it as certain that Ianus was styled 'god of gods.' My friend Mr W. Warde Fowler, who has given us two of the best books in existence on the religion of Rome, comments: 'The phrase "Deorum" or "Divum deus" is indeed remarkable, and unparalleled in Roman worship; but no one acquainted with Roman or Italian ritual will for a moment suspect it of meaning "God of gods" in either a Christian or metaphysical sense' (*The Religious Experience of the Roman People* London 1911 p. 140). H. Jordan *Kritische Beiträge zur Geschichte der lateinischen Sprache* Berlin 1879 p. 222 renders 'der Gott aus der Zahl der ungezählten Himmlischen,' comparing the epic δῖα θεάων [Ennius *ann. frag.* 51 Baehrens sancta deurum, Verg. *Aen.* 4. 576 sancte deorum]. S. Linde *De Iano summo Romanorum deo* Lundae 1891 p. 27 ff. argues that we have here a common Indo-European phrase for 'greatest of the gods': he cites the Sanskrit locution *devó devá-nām* ('god of gods'), the Old Persian *khshâyathiya khshâyathiyânâm* ('king of kings'), the Greek βασιλεὺς βασιλέων, and such passages as Aisch. *suppl.* 524 ff. ἄναξ ἀνάκτων, μακάρων | μακάρτατε καὶ τελέων τε|λειότατον κράτος, ὅλβιε Ζεῦ, *Pers.* 666 δέσποτα δεσπότου φάνηθι (*sc.* Dareios, master of our master Xerxes), 675 δυνάτα δυνάτα (so cod. M. with schol. ἀντὶ τοῦ δυνάστα. δυνάστα δυνάστα cett. M. Haupt cj. δυνάστα δυναστᾶν. S. Linde cj. δυνάτα δυνατᾶν), Plaut. *capt.* 825 regum rex regalior, *Trin.* 309 victor victorum cluet, Hor. *epist.* 1. 1. 107 rex denique regum. The fact is, these cumulative expressions are found, not merely with adjectives in the superlative (Soph. *O. T.* 334 ὦ κακῶν κάκιστε, Hor. *sat.* 1. 3. 136 magnorum maxime regum: other examples in R. Kühner—B. Gerth *Ausführliche Grammatik der griechischen Sprache* Hannover—Leipzig 1898 ii. 1. 21, 339) or even in the positive degree (Soph. *O. C.* 1237 f. ἵνα πρόπαντα | κακὰ κακῶν ξυνοικεῖ: other examples in Kühner—Gerth *locc. citt.*), but also with substantives (O. Riemann—H. Goelzer *Grammaire comparée du grec et du*

His title *Matutinus*[1] too acquires fresh point, and we can appreciate to the full the lines of Horace:

> Sire of the morning (do I call thee right,
> Or hear'st thou Janus' name with more delight?)
> Who introducest, so the gods ordain,
> Life's various tasks, inaugurate my strain[2].

Moreover, the Roman conception of Ianus thus falls into line with that of the Etruscans, who, as Varro admits[3], took him to be the sky pure and simple. Finally, this view of Ianus is borne out by the most probable etymology of his name. Corresponding with the series

Diviana[4] *Diana*[5] *Iana*[6]

latin Syntax Paris 1897 p. 123 n. 5 quote Eur. *Andr.* 520 ff. καὶ γὰρ ἀνοία | μεγάλη λείπειν ἐχθροὺς ἐχθρῶν, | ἐξὸν κτείνειν [Plat. *Tim.* 41 A θεοὶ θεῶν, ὧν ἐγὼ δημιουργὸς πατήρ τε ἔργων, on which I have said my say in *The Metaphysical Basis of Plato's Ethics* Cambridge 1895 p. 92 ff.]). If Ianus was the animate Sky, there was special justification for the phrase: the living abode of all celestial beings might well be termed *divum domus*.

[1] The epithet is transferred from Ianus to Iupiter, or rather to Domitian occupying the place of Iupiter (see *Folk-Lore* 1905 xvi. 314), by Mart. *ep.* 4. 8. 11 f. gressu timet ire licenti | ad matutinum nostra Thalia Iovem. There is, of course, a connotation of sobriety and seriousness, cp. Mart. *ep.* 13. 2. 10.

[2] Hor. *sat.* 2. 6. 20 ff.

[3] Varro *frag.* 134 Funaioli *ap.* Lyd. *de mens.* 4. 2 p. 64, 18 ff. Wünsch ὁ δὲ Βάρρων ἐν τῇ τεσσαρεσκαιδεκάτῃ τῶν θείων πραγμάτων φησὶν αὐτὸν (*sc.* τὸν Ἰανόν) παρὰ Θούσκοις οὐρανὸν λέγεσθαι καὶ ἔφορον πάσης πράξεως καὶ Ποπάνωνα (ποπάωνα cod. B.) διὰ τὸ ἐν ταῖς Καλένδαις ἀναφέρεσθαι πόπανα.

W. Deecke *Etruskische Forschungen* Stuttgart 1880 iv. 24 ff. identified the *ani* of the first marginal region marked on the bronze liver found near Piacenza in 1877 (*ib.* pl. 1) with the *Ianus* mentioned among the deities of the first region (*ib.* pl. 5) by Mart. Cap. 45—an identification corroborated by the equivalence of *uni* in the second marginal region of the liver (*ib.* pl. 5) to *Iuno* among the deities of the second region (*ib.* pl. 5) in Mart. Cap. 46. Deecke (*ib.* p. 25 n. 22 *a*) further observed the occurrence of the name in A. Fabretti *Corpus inscriptionum Italicarum* Aug. Taurinorum 1867 no. 2279, 3 pl. 42 ⋉ΞΛΙ↾ : ⋀ΛΑ = *ani* : *tineri*, where Ianus (*ani*) is associated with Iupiter (*tina*), and in the same connexion cited, not only Plutarch's derivation of the river Ἄννιον (the *Anio*) from an Etruscan king Ἄννιος, the father of Σαλία mother of Σάλιος the eponym of the *Salii* (Aristeides of Miletos *frag.* 8 (*Frag. hist. Gr.* iv. 322 Müller) and Alexander Polyhistor *frag.* 26 (*Frag. hist. Gr.* iii. 230 Müller) *ap.* Plout. *parall. Gr. et Rom.* 40), but also the Etruscan gentile name *ani, ane, anie, aneie, anei* (C. O. Müller *Die Etrusker* Stuttgart 1877 ii. 470 ff.) and the Latin *Anius*, later *Anniis* (see now E. Klebs in Pauly—Wissowa *Real-Enc.* i. 2261). C. Thulin *Die Götter des Martianus Capella und der Bronzeleber von Piacenza* Gieszen 1906 p. 22 f. in the main accepts Deecke's results, and adds: '" Anlautendes j fällt im Etruskischen, mit Ausnahme des volaterranischen Dialektes, ab" (Pauli, Bezz. Beitr. xxv 1899, S. 218); beibehalten ist es z. B. in der Inschrift Not. d. Scav. 1892 S. 261 ..iane.., wo vielleicht auch der Gott gemeint ist.'

Perhaps the puzzling *Anigemiius* of Orelli—Henzen *Inscr. Lat. sel.* no. 5771 = *Corp. inscr. Lat.* iii no. 5157 (Noricum) genio | Anigemio | cultores eius | v. s. l. m. should be regarded as an Etruscan form of the Ianus *Geminus* worshipped in the same district (*Corp. inscr. Lat.* iii no. 5092 *a* (Noricum), *supra* p. 324 n. 3).

[4] Varr. *de ling. Lat.* 5. 68 hanc ut Solem Apollinem quidam Dianam vocant; Apollinis vocabulum graecum [alterum], alterum latinum et hinc quod luna in altitudinem et

we have the series

**Divianus* *Dianus*[1] *Ianus.*

latitudinem simul e<a>t (so C. Schoppe for *et*), Diviana, appellata. Cp. Varr. *frag.* 103 Funaioli *ap.* Prob. *in* Verg. *ecl.* 6. 31 p. 354 f. Lion Varro etiam in Logistorico, quem inscripsit Mesalla de valitudine (*leg.* Messalla de valetudine), ait: 'antiquos agrestes venandi peritos, cum plurimum in silvis agerent, quod veluti Diana duce ad investigandas feras solas et devias silvas peterent, Devianam appellasse deam, mox Dianam, quod intellegerent eandem esse, quae diem nascentibus daret,' Isid. *orig.* 8. 11. 56 Dianam autem vocatam quasi Duanam, quod luna die ac noctu appareat=Myth. Vat. 1. 112 Diana etiam eadem est, quasi Duana, quia luna et die et nocte appareat.

F. Solmsen *Studien zur lateinischen Lautgeschichte* Strassburg 1894 p. 112 notes that *Diviana* as the oldest form of *Diana* is supported by W. Deecke's interpretation of *Tiv* as an Etrusco-Roman moon-goddess (in Roscher *Lex. Myth.* i. 1011). [On the convex side of the Piacenza liver are the inscriptions *usils*='solis' and *tivs*='lunae': see further W. Deecke *Etruskische Forschungen* Stuttgart 1880 pp. 7 ff., 82, C. Thulin *Die Götter des Martianus Capella und der Bronzeleber von Piacenza* Gieszen 1906 p. 15.]

[5] G. Wissowa in Pauly—Wissowa *Real-Enc.* v. 325 f. shows that this form of the name was pronounced first *Dīana* (Plaut. *Bacch.* 312, Ennius *ann. frag.* 79 Baehrens, *Alcmeo frag.* 3, 7 Ribbeck[3], [Verg. *Aen.* 1. 499 with Serv. *in* Verg. *Aen.* 1. 498 sane Dianam veteres ideo melius producebant, quia sub divo dea sit, venandi gratia]), then *Dĭana* (the oldest example of this, the usual, scansion is Lucil. *sat.* 3 *frag.* 72, 3 Baehrens) or *Deana* (in vulgar inscriptions of imperial date: *e.g.* Dessau *Inscr. Lat. sel.* nos. 111, 1, 3184, 9, 3244, 1, 3265, 1, 3276, 1, 3430, 11, 3536, 6, 3915, 2, 4045, 1, 4281, 2, 7099, 1, 8065, 3, 8745 (menologium rusticum Colotianum) *bis* (Aug. and Nov.), 9241, 1).

[6] P. Nigidius Figulus (*c.* 98–45 B.C.) identified Ianus with Apollo and Iana with Diana (*frag.* 42 Funaioli *ap.* Macrob. *Sat.* 1. 9. 8 pronuntiavit Nigidius Apollinem Ianum esse Dianamque Ianam, adposita *d* littera, quae saepe *i* litteraе causa decoris adponitur, *reditur redhibetur redintegratur* et similia). And M. Terentius Varro, his contemporary (116—27 B.C.), represented the country folk as speaking of *Iana*, when they meant 'the moon' (Varr. *rer. rust.* 1. 37. 3 Tremelius, Numquam rure audisti, inquit, octavo Ianam (so G. Merula in the ed. princ. 1472, for *lanam*) lunam et crescentem et contra senescentem, et quae crescente luna fieri oporteret, [et] tamen quaedam melius fieri post octavum (so H. Keil for *octauo*) Ianam (so G. Merula for *lanam*) lunam quam ante?). Tertullian (*c.* 150—*c.* 230 A.D.) mentions Iana as a goddess of arches (Tert. *ad nat.* 2. 15 et diva Arquis est Iana (so D. Godefroy for *lana* cod.)). Orosius (417–418 A.D.) speaks of the *Dianium* on the Aventine as *Ianium* (Oros. *hist.* 5. 12. 6 Flaccus duobus filiis armatis cinctus, comitante etiam Graccho togato brevemque gladium sub sinistra occultante, quamvis et praeconem frustra praemisisset, qui servos ad libertatem vocaret, Ianium (K. Zangemeister cj. *Dianium*) tamquam arcem occupavit).

G. Wissowa in Pauly—Wissowa *Real-Enc.* v. 326 and in his *Rel. Kult. Röm.*[2] p. 247 n. 2 is hyper-sceptical.

[1] *Supra* p. 328 n. 5. The quantity of the *i* in *Dianus* is unknown.

The word occurs as a *cognomen* in *Corp. inscr. Lat.* vi no. 730=Dessau *Inscr. Lat. sel.* no. 4211 (Rome) deo Soli invicto | Mytrae, felix Messala, | cum omnes sacratos, Catel|lus et Dianus posuerunt. Cp. L. A. Muratori *Novus thesaurus veterum inscriptionum* Mediolani 1740 iii. 1666 no. 14 P. Diani (=Dianius) P. f. | Fab. Nig. | ossa, Wilmanns *Ex. inscr. Lat.* no. 341 (Rome) M. Perperna | Aeschinus | emit ol. iii de Diani (=Dianii?) Erote, *Corp. inscr. Lat.* xi no. 2089=Dessau *Inscr. Lat. sel.* no. 1296 (near *Perugia*) Memmius Sallustius | Salvinus Dianius v(ir) s(pectabilis) | basilicam sanctorum | angelorum fecit, in | qua sepelliri non licet.

Ducange *Gloss. med. et inf. Lat.* ed. 1884 iii. 99 cites *Vita S. Cæsar. Arelat.* apud Surium: 'Dæmonium, quod rustici Dianum vocant.' But the *Vita* as printed by L. Surius *De probatis sanctorum historiis* Coloniae Agrippinae 1579 iv. 943—953 contains no such

Ianus, therefore, can be legitimately connected with *dīus* (for *dĭŭĭos*), a word familiar to us in the phrase *sub dīo*[1], 'under the open sky[2].'

(*ι*) Zan an older Zeus.

In short, I conceive that Ianus and Iupiter were the sky-gods worshipped by two successive *strata* in the population of Italy. Ianus, it would appear, belonged to the older stock[3]—which, for want

passage. The reference should be corrected to the *Acta Sanctorum* edd. Bolland. Augusti vi. 79 (*Vita* 2. 2. 15) Quodam alio tempore, dum dioceses visitaret, & ad castellum quod Luco [le Luc, castrum diœcesis Forujuliensis ad Carauniam fluviolum, *inquit Mabillonius*] dicitur, venimus; erat ibi matrona quædam Eucheria (*al.* Euthyria) nomine, quæ ancillam suam offerens ante pedes ejus prostravit: pro qua ut Domino supplicaret, lacrymabiliter exorabat. Ille autem causam perscrutans, ut erat Vir Deo plenus, & in omnibus perscrutantissimus, quid infirmitatis haberet, interrogavit. Dixerunt: Dæmonium, quod rustici Dianam appellant: quæ sic affligitur, ut pæne omnibus noctibus assidue cædatur, & sæpe etiam in ecclesiam ducitur inter duos viros ut maneat: & sic flagris diabolicis occultè fatigatur, ut vox continua ipsius audiatur; & eis, qui sibi adhærent, respondere penitus non possit. Etc. The Bollandists had the story from J. Mabillon *Acta Sanctorum ordinis s. Benedicti*[2] Venetiis 1733 Saec. i Append. pp. 659—677. But Mabillon *op. cit.* Lutetiæ Parisiorum 1668 i. 673 (*Vita* 2. 14) reads 'DIANAM.'

[1] On *sub dīō*, *sub dīū*, *sub dīvō* see F. Solmsen *Studien zur lateinischen Lautgeschichte* Strassburg 1894 p. 113 f., who concludes that the original form *sub dīō* (from *dīum*) became *sub dīū* under the influence of *dīū* ('by day') and *sub dīvō* under that of *dīvos* (just as *subdīalis* passed into *subdīvalis*).

[2] Walde *Lat. etym. Wörterb.*[2] p. 374 advocates a very different derivation: '**Jānus** "altitalischer Gott des Sonnenlaufs."... *Jānus* ist trotz *Diānus* C. J. L. v, 783 die ursprgl. Form (s. Stolz HG. 1, 305), während *Jana* "Mondgöttin" allerdings nur vulgäre Entstellung aus *Diana* ist (Wissowa *Rel.* 198 a 6). *Jānus* (*o*- und *u*-St.) ist nach Wissowa N. Jbb. 1, 164, Schulze Eigenn. 474 f. "der personifizierte Torbogen," **jānus* "Pförtner" direkt, dagegen **jānua* "Tür" durch Vermittlung des Gottesnamens abgeleitet ist, als die Stätte seines göttlichen Wirkens. **jānos* zu ai. *yána-ḥ* "Bahn," *yāna-m* "Gang, Vehikel,"... Idg. **i̯ā-* ist Erweiterung von **ei-* "gehn" (s. *eo*; eine parallele Erweiterung **i̯ē-/i̯ō-* möglicherweise in got. *jēr* "Jahr" usw., s. *hornus*).'

My friend Dr P. Giles, Master of Emmanuel College, Cambridge, tells me (Dec. 14, 1917) that in his opinion the view given in the text is right. If so, Walde is here for once on the wrong tack.

[3] My friend and colleague Sir W. Ridgeway in *The Early Age of Greece* Cambridge 1901 i. 231 ff., in his paper *Who were the Romans?* (extr. from the *Proceedings of the British Academy* iii) London 1907 p. 1 ff., and in Sir J. E. Sandys *A Companion to Latin Studies*[2] Cambridge 1913 p. 20 ff. argues that the main aboriginal element in the population of upper and central Italy was formed by the Ligurians, who were closely related on the one hand to the Illyrians, on the other to the Iberians, and spoke a language destined to develope into classical Latin; also, that these Ligurians were conquered by the Sabines, an Umbro-Sabellian tribe, who were closely related to the Keltoi and represented the Indo-Europaean *Q*, not by *C* or *Q*, but by *P*; finally, that at Rome the plebeians were Ligurians, the patricians Sabines, the latter having adopted the language of the former. In accordance with these views Sir W. Ridgeway *Who were the Romans?* p. 11 f. asserts: (1) that Ianus was a Sabine god, whose worship was introduced to Rome by Numa the Sabine (Varr. *de ling. Lat.* 5. 165, Liv. 1. 19); (2) that his priest was originally the *flamen Dialis*, whose title *Dia*-lis betrays his connexion with *Dia*-nus (Ianus); and (3) that his cult was partially fused with that of Iupiter, 'who was already in possession of Rome,' the fusion being perhaps symbolised by the double male face of Ianus.

of a better name, I should term Illyrian[1]—and was retained by the incoming Latins, despite the fact that their own Iupiter was a god of essentially similar character. Further, I should be prepared to find that, corresponding with Dianus (Ianus) and Diana (Iana) the ancient sky-god and his consort of the Italian peninsula, there was a similar divine pair of kindred origin on the opposite side of the Adriatic. And here we are struck by the fact that the name Dianus (Ianus) occurs both as an *o*-stem (*Ianus*) and as an *i*-stem (*Ian*)[2] in the Salian hymn. In our search for a Greek equivalent we naturally turn to the scanty remains of Doric literature and to Doric inscriptions, coins, etc., since the Dorians, as Sir W. Ridgeway rightly insists, were *ab origine* an Illyrian tribe[3]. Now the phonetic counterpart of the Salian *Ian* is *Zān*, which R. Meister[4] has proved to be no hyperdorism for *Zēn*[5] but a genuine Doric form attested by all dialect-sources[6]. *Ianus* or *Ian* was equated with *Zān* by

I am not here concerned to controvert the main lines of Sir W. Ridgeway's ethnology (which, however, I do not accept), but merely its application to the particular case of Ianus. To his contentions I reply:—(1) Neither Varro nor Livy states that Ianus was a Sabine god, whose worship was introduced by Numa. What Varro (or rather L. Calpurnius Piso Frugi *frag.* 9 Peter *ap.* Varr. *de ling. Lat.* 5. 165) and Livy (1. 19) say is that Numa introduced the custom of keeping the gate of Ianus always open in war-time—a very different matter. (2) Our most competent etymologist, Walde *Lat. etym. Wörterb.*[2] p. 231, refers *Diālis*, not to *Diānus*, but to *Dīespiter*, the old nominative of *Iupiter*, and cites convincingly the forms *aequi-dialis*, *noven-dialis*. (3) If the double face of Ianus implies the fusion of two gods, are we to explain in the same way the double face of Hermes? of Boreas? of Argos? and of all other Janiform deities from Babylonia to Britain? And what of deities with three heads, or four? We must obviously rest our case on some more comprehensive principle.

[1] See now the succinct and well-documented account of G. Dottin *Les anciens peuples de l'Europe* Paris 1916 pp. 151—156 ('Les Illyriens').

[2] For the nom. *Ian* see *supra* p. 328 n. 8 (9) and (10). The abl. *Iane* is specially noticed by Tertull. *ad nat.* 2. 12 (Saturnus) exceptus ab Iano sive Iane, ut Salii vocant =*id. apol.* 10 (Saturnus) exceptus a Iano, vel Iane, ut Salii volunt (*carmen Saliare frag.* 12 Baehrens).

Ζάνωνος — *Inscr. Gr. ins.* i no. 1307, 3—6=Collitz—Bechtel *Gr. Dial.-Inschr.* iii. 1. 617 no. 4245, 403 on *amphora*-handles from Rhodes Ζάνωνος.

A. F. Pott (1833)[1], H. L. Ahrens (1843)[2], G. Legerlotz (1858)[3], C. Petersen (1870)[4], H. Usener (1900)[5]; and the equation has not been successfully challenged by any later critic. The cult of Zan can be traced most clearly in Crete, where he bore the title *Mégas*, 'the Great' Zan,—a natural appellative of the sky-god. Thus Euripides in his *Cretans* speaks of Minos as

'Child of Europa and of Zan the Great[6].'

Aristophanes appears to be poking fun at the same Euripidean play, when in his *Birds* he makes Euelpides ejaculate:

'So now let him thunder, Zan the Great[7]!'

According to the Greek grammarians, Ζάν was used by the later Aeolians and by the later Ionians: Herodian. περὶ μονήρους λέξεως 6, 14 ff. (ii. 911, 7 ff. Lentz) ὅτι δὲ ποικίλως εἴρηται ὑπὸ παλαιῶν ὁ θεὸς οὐκ ἀγνοῶ. καὶ γὰρ Δὶς καὶ Ζῆν καὶ Δῆν καὶ Ζάς (so K. Lehrs for Ζεύς. He further suggests inserting καὶ Ζάν, cp. Aristoph. *av.* 570), καὶ Ζῆς παρὰ Φερεκύδει (so K. Lehrs for Φερεκύδῃ) κατὰ κίνησιν ἰδίαν, καὶ (so K. Lehrs for κίνησίν τινα) ὑπὸ Βοιωτῶν καὶ Δεὺς καὶ Δάν = Eustath. *in Od.* p. 1387, 27 ff. καὶ ὅτι πολλαῖς εὐθείαις παρὰ τοῖς παλαιοῖς ποικίλλεται. Δὶς γάρ, οὗ γενικὴ Διός· καὶ Ζῆν καὶ Ζὰν καὶ Ζὰς καὶ Ζῆς παρὰ Φερεκύδῃ καὶ Βοιωτικῶς Ζεὺς (H. L. Ahrens cj. Δεὺς) καὶ Δάν, cp. Eustath. *in Il.* p. 114, 3 ff. συνηθέστερον γὰρ ὁ Ζεὺς ἢ περ ὁ Ζὰν καὶ ὁ Ζῆν καὶ ὁ Δὶς καὶ ὁ Δὰν καὶ ὅσα ἄλλα κεῖνται παρὰ τῷ παλαιῷ τεχνικῷ (*sc.* Herodian.), Herodian. περὶ καθολικῆς προσῳδίας 14 (i. 394, 26 ff. Again, the famous tomb in Crete was inscribed with an epitaph which, according to the best attested version, ran :

'Here lies Great Zan, whom men call Zeus[1].'

If the cult of the Cretan Zeus resembled that of Adonis or Tammuz[2] and in historical times involved an annual festival, at which the god was killed and eaten in the form of a bull[3], there is point in the curious variant of his epitaph :

'Here lies a Great Ox, whom men call Zeus[4].'

The votaries of the Cretan Zeus actually ate of the Great Ox as part of their mystic rites. When, therefore, the watchman in the *Agamemnon* exclaims—

'For the rest I'm silent : a Great Ox hath come
Upon my tongue[5],'

he was, I take it, simply repeating a *formula*[6] of the Cretan mysteries that had passed into a proverb for sworn secrecy.

[1] *Anth. Pal.* 7. 746 Pythagoras (*supra* p. 341 n. 6 *s.v.* Ζάν) = Kyrill. Al. *c. Iulian.* 10. 342 (lxxvi. 1028 Migne) *ὧδε μέγας κεῖται Ζᾶν* (*leg.* Ζὰν) *ὃν Δία κικλήσκουσιν.*

[4] *Ὧδε μέγας κεῖται βοῦς, ὃν Δία κικλήσκουσι* (*supra* p. 341 n. 6 *s.v.* Ζάν).

[5] Aisch. *Ag.* 36 f. *τὰ δ' ἄλλα σιγῶ· βοῦς ἐπὶ γλώσσῃ μέγας | βέβηκεν.* The current explanations are, as every scholar knows, unsatisfactory. See A. Sidgwick, A. W. Verrall, F. H. M. Blaydes, W. Headlam, etc. *ad loc.* Cp. Menand. *ἁλιεῖς frag.* 1 (*Frag. com. Gr.* iv. 74 Meineke) *ap.* Athen. 549 c *παχὺς γὰρ ὃς ἔκειτ' ἐπὶ στόμα.*

[6] I seize this opportunity of attempting to explain another mystic *formula*, which has come down to us in two versions :

(1) Firm. Mat. 18. 1 habent enim propria signa, propria responsa, quae illis in istorum sacrilegiorum coetibus diaboli tradidit disciplina. in quodam templo, ut in interioribus partibus homo moriturus (A. Dieterich *Eine Mithrasliturgie*[2] Leipzig—Berlin 1910 p. 103 : 'der in sakramentalem Sinne sterben soll.' C. A. Lobeck cj. *oraturus*. C. Bursian, followed by C. Halm, cj. *introiturus*) possit admitti, dicit : 'de tympano manducavi, de cymbalo bibi, et religionis secreta perdidici,' quod Graeco sermone dicitur : *ἐκ τυμπάνου βέβρωκα, ἐκ κυμβάλου πέπωκα, γέγονα μύστης Ἄττεως.*

(2) Clem. Al. *protr.* 2. 15. 3 p. 13, 10 ff. Stählin *τὰ σύμβολα τῆς μυήσεως ταύτης* (for context see *supra* i. 392 n. 5)..."*ἐκ τυμπάνου ἔφαγον· ἐκ κυμβάλου ἔπιον· ἐκερνοφόρησα· ὑπὸ τὸν παστὸν ὑπέδυν.*" Cp. schol. Plat. *Gorg.* 497 c *ἐτελεῖτο δὲ ταῦτα καὶ Δηοῖ καὶ Κόρῃ, ὅτι ταύτην μὲν Πλούτων ἁρπάξειε, Δηοῖ δὲ μιγεὶς Ζεύς· ἐν οἷς πολλὰ μὲν ἐπράττετο αἰσχρά, ἐλέγετο δὲ πρὸς τῶν μυουμένων ταῦτα "ἐκ τυμπάνου ἔφαγον, ἐκ κυμβάλου ἔπιον, ἐκερνοφόρησα"* (*κέρνος δὲ τὸ λίκνον ἤγουν τὸ πτύον ἐστίν* [but see L. Couve in Daremberg—Saglio *Dict. Ant.* iii. 822 ff.]), "*ὑπὸ τὸν παστὸν ὑπέδυον*" *καὶ τὰ ἑξῆς.*

Now the timbrel was made from the stretched hide (*supra* i. 650 n. 2 : add Eur. *Hel.* 1347, *Bacch.* 513, Hesych. *s.v. τύμπανα*, Phot. *lex. s.v. τύμπανον*, Souid. *s.v. τύμπανον*, *et. mag.* p. 771, 43 f., Zonar. *lex. s.v. τύμπανον*, Favorin. *lex.* p. 1783, 42 f., *et. Gud.* p. 537, 40) of a bull (Ov. *fast.* 4. 342, Nonn. *Dion.* 10. 390 f., 14. 351, 20. 307 : cp. the account of Indian drums in Souid. *s.v. τύμπανα*), which was probably credited with the powers of the living animal (in Opp. *cyneg.* 3. 282 ff. we are told that a *τύμπανον* of wolf's-skin will silence other *τύμπανα*, because the dead wolf is feared by the dead sheep !). Hence I should conjecture that to eat food out of the timbrel was a civilised surrogate for the earlier practice of eating the bull raw (*supra* i. 659 ff., 695). The mystic thereby became one with his god (*supra* i. 650, 673).

But why must he drink from a cymbal? Nonnos states that Mystis, the Sidonian Bacchant, who instructed Dionysos and devised the Dionysiac equipment, fastened bronze bowls to her naked breasts (Nonn. *Dion.* 9. 125 f. *καὶ φιάλας* (Count de Marcellus cj. *φάλλους sic*) *γυμνοῖσιν ἐπὶ* (H. Koechly cj. *γυμνοῖσι περὶ*) *στέρνοισι καθάψαι* | *χαλκείας* (Count de Marcellus cj. *χαλκείους*) *ἑνόησε*), and that, when the god first came to Athens, the women there put bowls over their mailed breasts (Nonn. *Dion.* 47. 9 f. *φιάλας* (Count de Marcellus cj. *φάλλους sic*) *δὲ σιδηροφόρων διὰ μαζῶν* | *στήθεσι μυστιπόλοισιν ἀνεζώννυτο γυναῖκες*). The custom has given rise to discussion (F. Creuzer *Dionysus sive commentatio academica de rerum Bacchicarum Orphicarumque originibus et causis* Heidelberg 1809 i. 63, K. Schwenck *Sinnbilder der alten völker* Frankfurt 1851 p. 39, R. Koehler *Über die Dionysiaka des Nonnus von Panopolis* Halle 1853 p. 19 n. 2, O. Jahn in the *Ber. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1868 p. 177). E. Maass *Orpheus* München 1895 p. 119 n. 167 shrewdly surmises that these bowls were the cymbals from which the mystics drank. I would support his conjecture by pointing out that in Kypros a breast-shaped cup was known both as *μαστός* (Athen. 487 B ΜΑΣΤΟΣ. *Ἀπολλόδωρος ὁ Κυρηναῖος* (*Frag. hist. Gr.* i. 469 Müller), *ὡς Πάμφιλός φησι, Παφίοις τὸ ποτήριον οὕτως καλεῖν*, Eustath. *in Il.* p. 1258, 59 f. *ἐκ δὲ τούτου ἴσως καὶ μασθάλης, κύλιξ τις παρὰ τοῖς παλαιοῖς. καὶ παρὰ Παφίοις δὲ μασθὸς ποτήριον, σύστομον, ὡς εἰκός, ἐξ οὗ ἐβδάλλετο τρόπον τινὰ ὡς ἐκ μασθοῦ τὸ πινόμενον*) and as *κύμβα* (Athen. 482 E *κύμβα ποτήριον Ἀπολλόδωρος* (*frag.* 245 (*Frag. hist. Gr.* i. 469 Müller)) *Παφίοις*, 483 A *Ἀπολλόδωρος δ' ἐν τῷ περὶ ἐτυμολογιῶν* (*frag.* 189 (*Frag. hist. Gr.* i. 463 Müller)) *Παφίους τὸ ποτήριον καλεῖν κύμβα* (*κύμβαν* cod. C.)). Its usage spread from the Levant to Greece, for a cup called *μαστός* is, not only mentioned by grammarians (Poll. 6. 95 *μαστούς*, Hesych. *s.v. μαστός· ποτήριον*), but also recorded among articles of silver in the temple-inventories of Delos (T. Homolle in the *Bull. Corr. Hell.* 1882 vi. 1 ff. no. 15 C 44 f. = Dittenberger *Syll. inscr. Gr.*[2] no. 588, 44 f. *μαστὸς ἐπ' ἀρ|χοντος Τλησιμένου* (= 216 B.C.), *ἱεράζοντος τοῦ Ἀσκληπιοῦ Σωτέλου*, 93 *μαστοὶ* ΔΙ) and Oropos (B. I. Leonardos in the *Ἐφ. Ἀρχ.* 1889 p. 2 ff. no. 26, 11 *μαστὸς ἱερὸς* ΠΕ *ἄλλος ἱερὸς* ΟΒS *ἄλλος ἱερὸς* ΟΑ, and in lines 13, 23, 25, 26, 27, 29, 30 *bis*, 31, 32, 33, 45, 52, 56, 57, 62, 65, 66, 68 *bis*, 70, 72, cp. 14 *μασαστίον* (*sic*) *ἱερὸν* ΜΞ *ἄλλο ἱερὸν* ΛCS *ἄλλο ἱερὸν* MS, 15 *μαστίον Ἀριστοκρίτης* KHS, 21 *μαστίον ἀπὸ τῶν περισμημάτων* ΛΗ, 56 *μαστία* Β *ἀπὸ τῶν ἐ(π)ανθέτων ἄγοντα ἀνὰ* Ι·Ι See further B. Keil 'Ein Silberinventar des Amphiaraos von Oropos' in *Hermes* 1890 xxv. 598—623). Sundry specimens in *terra cotta* have come down to us (*e.g.* (*a*) A. P. di Cesnola *Salaminia* London 1882 p. 251 f. pl. 19, 11, Ohnefalsch-Richter *Kypros* p. 455 pl. 150, 20, *Brit. Mus. Cat. Vases* i. 2. 155 no. C 801 pl. 4: (*b*) *Brit. Mus. Cat. Vases* ii. 209 f. nos. B 375—B 377, E. Pottier in Daremberg—Saglio *Dict. Ant.* iii. 1625 fig. 4856 a black-figured *mastós* in room E of the Louvre: (*c*) *Brit. Mus. Cat. Vases* iii. 392 f. nos. D 9 and D 10 a pair of *mastoí* by Sotades (?)), which appear to have been evolved from a feeding-bottle in the shape of the mother's breast. No doubt the Greeks, like other peoples (H. Ploss—M. Bartels *Das Weib*[10] Leipzig 1913 i. 376 fig. 252), struck by the similarity of breast and bowl, made such vases for purely secular purposes. But religious significance is sometimes probable (Plin. *nat. hist.* 33. 81 Minervae templum habet Lindos insulae Rhodiorum, in quo Helena sacravit calicem ex electro; adicit historia, mammae suae mensura. C. Blinkenberg *Die lindische Tempelchronik* Bonn 1915 p. 15 comments: 'Die art dieses geschenkes ist durch die auf die kleine Ilias (Schol. Aristoph. Lysistr. 155, vgl. Ed. pr. [= C. Blinkenberg 'La chronique du temple lindien' in the *Bulletin de l'académie royale des sciences et des lettres de Danemark* 1912 nos 5—6] s. 119) zurückgehende erzählung von der rettung Helenas bestimmt. Die notiz des Plinius stammt aus der reisebeschreibung des C. Licinius Mucianus, der um 60 n. Chr. den Orient bereist und auch Lindos besucht hatte (s. Ed. pr. s. 118 und 124 ff.) und von den besuchten örtlichkeiten allerlei kuriositäten berichtete. Wolters meint (Süddeutsche Monatshefte 1913), die stiftung des bechers sei erst nach der zeit unserer chronik erfunden; da aber Mucianus sich ausdrücklich auf eine literarische quelle beruft ("adicit historia"), war die

Again, if the death of Zan the Great was, like that of Tammuz, the subject of a yearly lamentation, we cannot but recall Plutarch's account[1] of the voice which bade the pilot Thamous bear the mysterious tidings

'Pan the Great is dead[2].'

Are we to conclude that this singular tale was ultimately based on the ritual of Zan? The locality of the alleged occurrence is worth considering. The unknown voice came from the direction of Paxoi, a couple of small islands, now called *Paxo* and *Antipaxo*, off the mouth of the Thesprotian river Acheron, which flows through the Acherusian Lake to the sea. Thamous was to make his announcement

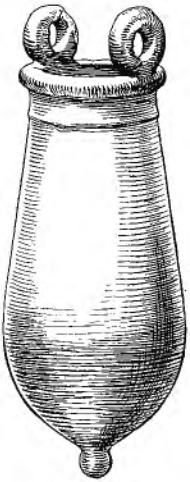

Fig. 240.

geschichte vielmehr von einem anderen, von Timachidas nicht gekannten oder beiseite gelassenen lokalhistoriker oder mythographen erzählt.' The theme is embroidered in D. G. Rossetti's *Troy Town*) and sometimes certain (Apul. *met.* 11. 10 idem gerebat et aureum vasculum in modum papillae rutundatum de quo lacte libabat, with W. Drexler's remarks in Roscher *Lex. Myth.* ii. 502 f. Fig. 240 is a breast-shaped *situla* of bronze from Egypt, now in my possession, which may serve to illustrate the Isiac milk-bowl. On St Agatha of Catania as successor of the Bona Dea see J. E. Wessely *Ikonographie Gottes und der Heiligen* Leipzig 1874 p. 54 f., H. Ploss—M. Bartels *op. cit.*[10] i. 372 f.). I am therefore disposed to conclude that drinking from the cymbal was regarded as tantamount to drinking from the breast of the goddess—a ritual act which made the mystic her very child (cp. *Class. Rev.* 1906 xx. 416 f. fig. 4). A goat-*rhytón* (*supra* i. 108) is substituted for the cymbal on an engraved cornelian at Florence, which represents a Bacchant milking her own breast into the vessel (A. F. Gori *Museum Florentinum* Gemmae antiquae ex thesauro Mediceo et privatorum dactyliothecis Florentiae exhibitae tab. cc Florentiae 1731 i. 160 pl. 84 no. 10=my fig. 241, Reinach *Pierres Gravées* p. 43, no. 84, 10 pl. 40, R. E. Raspe *Catalogue raisonné d'une collection générale de pierres gravées antiques et modernes moulées en pâtes de couleurs...par J. Tassie* London 1791 no. 4695. The stone measures $16 \times 12^{mm.}$ and is not demonstrably postclassical. Gori took the subject to be 'vel Ino, vel Autonoë, vel Agave, vel Hippa' as nurse of Bakchos (*supra* i. 395 n. 3: the name should be Hipta, according to O. Kern in *Hermes* 1914 xlix. 480); but the identification is quite arbitrary).

Fig. 241.

[2] Plout. *de def. or.* 17 Πὰν (ὁ πὰν cod. Ambr.) ὁ μέγας τέθνηκε and later ὁ μέγας Πὰν τέθνηκεν, Euseb. *praep. ev.* 5. 17. 6 Πὰν ὁ μέγας τέθνηκεν, 5. 17. 8 Πὰν ὁ μέγας τέθνηκεν.

'over against Palodes,' a muddy lake at the outlet of which stood the town Bouthroton or Bouthrotos[1]. Neither place had anything whatever to do with Pan. Both may be readily connected with Zan. For at the Acherusian Lake was the tomb of Plouton, which the author of the Clementine *Homilies* expressly compares with the tomb of Zeus in Crete[2]. And a copper coin of Bouthroton, struck when the town had become a Roman colony, has for obverse type the head of Zeus wearing a wreath of oak, for reverse an ox[3]. Other coppers of the same town show either a standing ox or an ox-head[4]. The ox indeed played a part in the foundation-legends both of Boucheta (Bouchetos, Boucheton, Bouchetion) near the mouth of the Acheron[5] and of Bouthroton too[6], being comparable on the one hand with Europa's bull, on the other with

the cow of Ilos at Troy[1] or the 'Adiounian bull' in Crete[2]. It seems likely enough that in this district, peopled with Illyrian tribes[3], which had pushed their way from north to south[4] and were partially Hellenised by contact with their neighbours, *Zeús* represents *Zán*—a name reappearing in the *Zânes* of Olympia[5]. When *Zán* had dropped out of popular parlance, a story involving his half-forgotten name might well become attached to *Pán*. Epitherses, who told the tale, was a grammarian of Nikaia in Bithynia living in the reign of Tiberius[6]; and coins of Nikaia, struck by Marcus Aurelius[7], Caracalla[8], Macrinus[9], Elagabalos[10], Severus Alexander[11], Maximinus[12], Gordianus iii[13], Philippus ii[14], Trebonianus Gallus[15], and Gallienus[16], make much of Pan[17]. Moreover, the Orphic Theogony of Hellanikos had long since identified Zeus with Pan[18], misled by what seemed an obvious etymology[19]. On the whole, therefore, it may be inferred that Plutarch's story really does postulate as its original source the liturgy of Zan the Great[20].

[19] Πάν = πᾶν!

[20] I regret that I find myself unable to accept the admirably ingenious hypothesis put forward by S. Reinach ('La mort du grand Pan' in the *Bull. Corr. Hell.* 1907 xxxi. 5—19=*id. Cultes, Mythes et Religions* Paris 1908 iii. 1—15), according to which the words heard off Paxos were ΘΑΜΟΤΣ ΘΑΜΟΤΣ ΘΑΜΟΤΣ ΠΑΝΜΕΓΑΣ ΤΕΘΝΗΚΕ, 'Tammuz, Tammuz, Tammuz the Almighty is dead.' But (*a*) it is highly improbable that the Syrian god would have been lamented as Θαμοῦς on the north-west coast of Greece—he would almost certainly have been called Ἄδωνις. And (*b*), as Reinach himself points out, the precise epithet *πανμέγας* is not known to occur as a divine appellative except in a Byzantine (first half of *s.* xii A.D.) description of Zeus (Theod. Prodr. *Rhod. et Dos.* 8. 116 ὦ πάμμεγα Ζεῦ). See further G. A. Gerhard 'Der Tod des grossen Pan' in the

The same may be said of the ritual chant at Dodona, where the Peleiades are reported to have sung :

> Zeus was, Zeus is, Zeus shall be : O Great Zeus !
> Earth sends up fruits ; so hymn ye Mother Earth[1].

The epithet '*Great* Zeus' inclines me to suspect that here too Zeus had displaced Zan. M. Mayer's notion that the older name of the god (*Djan, *Zán*) has survived in the modern *Jánina*[2] is, I fear, a simple mirage[3]. But it is tempting to seek, with R. Meister, the female counterpart of *Zán* in **Díaina*[4] or **Diáne*[5], the weak forms corresponding with the strong form *Diṓne*[6].

Sitzungsber. d. Heidelb. Akad. d. Wiss. Phil.-hist. Classe 1915 Abh. v, *id.* 'Nochmals zum Tod des grossen Pan' in the *Wiener Studien* 1916 xxxviii. 343—376.

[1] Paus. 10. 12. 10 *τὰς* Πελειάδας (so F. Sylburg for Πελιάδας codd.) *δὲ Θημονόης τε ἔτι προτέρας γενέσθαι λέγουσι, καὶ ᾆσαι γυναικῶν πρώτας τάδε τὰ ἔπη· Ζεὺς ἦν, Ζεὺς ἐστί (ἐστιν* codd. Pc. M. [3] See W. M. Leake *Travels in Northern Greece* London 1835 iv. 130 'Τὰ Ἰωάννινα, as the name of this city occurs in the Byzantine history, and is still written by ecclesiastics, is corrupted in the vulgar idiom to Ἰάννινα, Ἰάνενα, Γιάνενα, or more frequently Γιάννινα, from whence the Italian form Giannina. The ordinary pronunciation conforms to the vulgar spelling, and may be nearly represented in English by Yánnina ; but the better educated not only adhere to the orthography derived from the name Ἰωάννης, but preserve also the sound of the omega in vocal utterance.' This paragraph was penned while Leake was staying at 'Ioánnina' in July, 1809.

[4] Apollod. *ap.* schol. *Od.* 3. 91 *ὡς καὶ ἡ* Ἥρα *Διαίνη* (*διαίνη* codd. H.Q. *διόνη* cod. M. P. Buttmann cj. *Διώνη*). C. A. Lobeck *Pathologiae sermonis Graeci prolegomena* Lipsiae 1843 p. 32 n. 27 and K. W. Dindorf in Stephanus *Thes. Gr. Ling.* ii. 1595 C accept Buttmann's *Διώνη*. W. Pape—G. E. Benseler *Wörterbuch der griechischen Eigennamen*[3] Braunschweig 1875 i. 296 are less positive : '*Διαίνη*, f. vielf. *Διώνη*,' etc. C. T. Angermann in the *Studien zur griechischen und lateinischen Grammatik* ed. by G. Curtius Leipzig 1868 i. 59 n. 1 defends *Διαίνη* : 'Sed quidni Dodonaei *Διαίνη*, quam formam regularem esse cognovimus, servari (*sic*) potuerint ?' Finally, R. Meister in the *Ber. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1894 p. 201 says : 'Dass der Scholiast oder seine Quelle *Διαίνη* mit *-η* schrieb statt *Δίαινα* mit dem allein berechtigten *-ᾱ*, ist ein Fehler, den bereits Welcker, Gr. Götterlehre 1, 353 ["*Διαίνη* (*Δίαινα*)"] corrigirt hat.'

[5] See *infra* n. 6, and cp. the formation of *εὐδιανός* (Pind. *Ol.* 9. 146 f. *ψυχρᾶν... εὐδιανὸν φάρμακον αὐρᾶν.* In *Pyth.* 5. 10 J. G. J. Hermann and A. Boeckh read *εὐδιανὸς* for *εὐδίαν ὃς κ.τ.λ.* with J. G. Schneider, who cited *εὐδιανὴν* from the cod. Voss. of Plat. *legg.*[1]919 A *εὐδιεινὴν γαλήνην*—see Steph. *Thes. Gr. Ling.* iii. 2224 B).

[6] R. Meister 'über die Namen : "*Διώνη, Ζήν, Ζᾶν*" ' in the *Ber. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1894 p. 200 ff. : 'Wir finden auf griechischem Boden die starke Form dieses *-en*-Stammes vertreten mit *o*-Färbung des Suffixvocals in *dii̯-ōn-* : **Δίων*, *Διώνη*, und mit *e*-Färbung in *dii̯-ēn-* : *Ζήν.* **Δίων*, *Διώνη* waren die altdodonäischen Himmelsgötter ; für den Namen **Δίων* trat später *Ζεὺς Νάιος* ein, der Name *Διώνη* erhielt sich. Neben diesen beiden starken Stammformen **Δίων* und *Ζήν* lassen sich im Griechischen zwei schwache Stammformen nachweisen : (1) *di̯-ăv-* (d.i. urspr. *dii̯-g-* vor Vocalen und vor *ɻ*) in *Δίαινα*, (2) *di̯-ăv-* (d.i. urspr. *dii̯-g-*, ebenso vor Vocalen und vor *ɻ*) in *Zᾶν-*, dem Ausgangspunkt für die Neubildung des Flexionssystems *Ζᾶν, Ζᾶνός*.... Ein zweite Bildung von diesem schwachen Stamm *di̯-ăv-* würden wir in *διαίνω* "befeuchte" vor uns

In *Zás*, the form of *Zeús* used by Pherekydes of Syros[1] and declined as *Zás, Zántos*, etc., by later Greek scholars[2], P. Kretschmer

haben, wenn die alten Etymologen Recht haben sollten, dieses Verbum trotz der abweichenden Bedeutung mit dem Namen des Himmels und des Himmelsgottes zusammenzubringen, vgl. z. B. Eustath. zu Hom. Il. 21, 202 p. 1231, 28: *ἱστέον ὅτι ἐκ τοῦ Διὸς ἦτοι ἀέρος τὸ διαίνω παρῆκται, καὶ δηλοῖ τὸ ὑγραίνειν καὶ ὡς εἰπεῖν διαβρέχειν*; Et. M. 266, 56: *διαίνω .. κυρίως τὸ ἐκ Διὸς βρέχεσθαι*. Die Bezeichnung des epeirotischen Himmelsgottes als *Ζεὺς Νάιος* "der feuchte, regenspendende Zeus" hebt dasselbe als Eigenschaft des Himmelsgottes hervor, was, wenn wirklich *διαίνω* stammverwandt mit **Δίων* (richtiger dann **δίων* zu schreiben) sein sollte, das Verbum herausheben würde als Thätigkeit des Himmels; was den Bedeutungsübergang anlangt, könnte man mit **δίων* "Himmel": *διαίνω* "befeuchte" etwa vergleichen den von *αἰθήρ*: *αἰθρέω* (=*χειμάζω*).... Von der Existenz der Form **Διᾶν* liegt eine unsichere Spur vor. Zu Theokrit 15, 106 giebt nämlich der gute cod. p die Lesart *Κύπρι Διαναία*, wo die übrigen Handschriften *Διωναία* oder *Διωναίη* haben, und Ahrens (Philol. XXIII, 1866, S. 208 f. = Kl. Schr. I, 421) erklärte nachträglich *Διαναία* für die echte Lesart, unter dem Ausdruck seines Bedauerns sie nicht in den Text seiner Ausgabe aufgenommen zu haben. Ist dieser Lesart zu vertrauen, so haben wir für die epeirotische Himmelsgöttin drei Namensformen überliefert: *Διώνη, Δίαινα* und *Διᾶνη*, denen der starke, der schwache und der aus dem schwachen neu gebildete Stamm zu Grunde liegen.'

detects yet another name comparable with that of *Ianus*[1]. And it should be noticed that *Dīīas* and *Dīas*, the immediate precursors of *Zās*, have been handed down to us as variants of the name borne by one of the Titans[2], whose relation to the Cretan Zeus or Zagreus we have already considered[3]. Indeed, according to one of the Greek etymological lexicons, Zeus himself was called *Dīas*[4]—a remark which has not attracted the attention that it deserves. We may therefore with some confidence point to the series

Dīīas *Dīas* *Zās*

as a Greek equivalent of the Latin[5]

**Divianus* *Dianus* *Ianus.*

[1] P. Kretschmer in O. Kern *De Orphei Epimenidis Pherecydis theogoniis quaestiones criticae* Berolini 1888 p. 93 n. 64: 'Graeci ex antiquissimis temporibus duo habebant summi dei nomina, quae non radicibus, sed suffixis inter se differebant: Ζεύς ex *Ζ-ηυ-ς et Ζᾶνς ex *Ζ-ᾱν-ς (cf. lat. Iānus, Abl. Iane) exortum; quae hoc modo flectebantur:

I Ζεύς	II Ζᾶνς	Plur. Ζᾶνες (eliac.)
Ζῆν	Ζᾶνα (cf. cret. Τᾶνα)	
Διϝός	Ζᾱνός	
Διϝί	Ζᾱνί (cf. lac. Ζανί)	

Ex Ζῆν et Ζᾶνα compluribus in dialectis novus accusativus Ζῆνα (cf. cret. Δῆνα, Τῆνα, Ττῆνα; Pind. Ζῆνα) mixtus est, a quo aliorum quoque casuum nova flexio (gen. Ζηνός, dat. Ζηνί, nom. Ζής) proficiscebatur.—In ionica autem dialecto cum -ᾱνς in -ᾶς et ᾱ in η transiret, altera (II) flexio ita mutanda erat:

Ζᾶς (Pherecyd.)
Ζῆνα, Ζηνός, Ζηνί } Homer.

Ergo Ζᾶς apud Pherecydem exspectanda atque postulanda est forma, Ζής—si ab eo scripta est—per analogiam ficta. Alia autem flexio quae apud illum scriptorem inveniri videtur: Ζᾶς Ζάντα (non Ζᾶντα!) Ζάντος Ζάντι exemplo participiorum ut βᾶς βάντα βάντος βάντι adducta est.'

After this we can hardly maintain with Gruppe *Gr. Myth. Rel.* p. 1100 n. 1 that the Pherecydean Ζᾶς was 'Freie Erfindung,' though we may well suppose with him *ib.* pp. 427, 1114 n. 1 that Pherekydes saw in the name an allusion to the 'life' of the world (*supra* i. 11 n. 5, 28 n. 8, 29 n. 4, 31 n. 3, 196 f.).

[4] *Et. Gud.* p. 144, 57 ff. Δίας· ὁ Ζεύς, διʼ οὗ ζῶμεν, παρὰ τὸ διαίνειν, τουτ' ἔστι πλύνειν τὴν γῆν. ἢ παρὰ τὸ δεῖν, ὅ ἐστι συνέχειν καὶ δεσμεύειν τὸ σύμπαν αἰσθητόν. ἢ παρὰ τὸ ζῆν.

[5] *Supra* p. 339.

Diṓne[1], the name habitually given to the goddess of Dodona, implies that her partner was known as *Díōn*[2] or **Zōn*. *Díōn* as the god's name was presumably ousted by *Zeús*. Servius, however, tells the story of an early Laconian King *Dion*, who entertained first Apollo and then Liber Pater[3]. Since the Spartan kings were priests of Zeus[4], it is just possible that their forbears played the part and bore the name of Zeus himself. Be that as it may, the simultaneous existence of the parallel forms *Zā́n* and **Zṓn* is by no means without analogy. It would even appear that both forms have persisted in Crete down to modern times. The peasant of Anogeia still ejaculates 'God *Zános*!' or 'Hear me, god *Zónos*![5]'

It will be convenient to summarise in tabular form the names here discussed and the equations proposed :

LATIN		GREEK		MODERN GREEK
**Divianus*	*Diviana*	Διίας		
Dianus	*Diana*	Δίας	**Δίαινα, *Διάνη*	
Ianus	*Iana*	Ζᾶς		
Ian		Ζᾶν		Ζάνος
		Δίων	Διώνη	Ζῶνος

I hold, then, that there was an ancient Illyrian (?) sky-god, who appears on the west of the Adriatic as Ianus, on the east as Zan. Throughout the historical period Ianus was more and more eclipsed by Iupiter : at an early date Zan was practically superseded by Zeus. Nevertheless Ianus was still accorded a foremost place in the prayers and invocations of the Romans[6], while Zan was never wholly forgotten by the Greeks.

If we are to understand the outward expression given by both peoples to the cult of this great deity, we must keep in mind the fact that he was *ab origine* the divine Sky and nothing more[7].

[1] Διώνη is scanned with ῑ in *h. Ap.* 93 (ὅσσαι ἄρισται ἔσαν, Διώνη τε Ῥείη τε where T. W. Allen and E. E. Sikes rightly retain the manuscript reading as against F. A. Wolf's cj. ἔασι), with ῐ in *Il.* 5. 370, 381, Hes. *theog.* 17, 353, Eur. *Hel.* 1098, *Antigone frag.* 177, 1 Nauck[2], *alib.* Cp. *Dīana* and *Diana* (*supra* p. 339 n. 5).

[2] *Supra* p. 350 n. 6.

[3] Serv. *in* Verg. *ecl.* 8. 30 Dion rex Laconiae fuit, qui habuit uxorem Iphiteam (G. Thilo cj. *Amphitheam*) Prognai filiam, etc. These names should find a place in P. Poralla *Prosopographie der Lakedaimonier bis auf die Zeit Alexanders des Grossen* Breslau 1913.

[7] *Supra* p. 337 ff.

Accordingly the Greeks did not at first carve him a statue or even construct him a temple.

> Why, where's the need of Temple, when the walls
> O' the world are that?[1]

The Persians on their mountain heights worshipped 'the whole circle of the sky[2],' offering sacrifice to him whom they called in the accusative case **Diân*[3]. And in like manner the Cretans honoured Zan on a mountain-top, expressly identifying him with the sky-god Zeus[4]. So far as we know, Zan was not figured forth by any anthropomorphic image. At most he was represented by the divine bull annually eaten of his worshippers[5]. The tomb of Zan was indeed, for those who could receive it, the tomb of 'a Great Ox[6].' A parallel to the Cretan sacrament may be found in a Paris papyrus already quoted[7]: 'Zeus went up into the mountain with a golden calf and a silver knife. To all he gave a share.' The cult of this aniconic god appealed to the Pythagoreans. Pythagoras himself is said to have written the epitaph of Zan[8], and his followers speak of 'the tower of Zan' or 'the watch-tower of Zan' as the very centre of the universe[9]. It is not till Zan has been definitely ousted by Zeus that we hear of 'bronze images of Zeus...called *Zânes*[10].'

(κ) Ianus represented as Vault or Archway.

In the Italian area the representation of the sky-god was developed along different lines. Since the sky itself was conceived as resting on four pillars[11], the primitive effigy of Ianus, the divine Sky, was a vault resting on four supports, in short an archway. It needs an effort of imagination on our part to realise that the arch of Ianus was no mere attribute or emblem of a sky-god, but an actual copy of the animate sky. And excellent scholars, like my friend Mr Warde Fowler, will no doubt continue to assert that the

Possibly Zan was at one time worshipped in Samos, the original home of Pythagoras. The name Σάμος, which means 'height' (Strab. 346, 457), recalls at once Σάμη or Σάμος (*Samo*) in Kephallenia; Σάμος, later Σαμία or Σαμικόν, in Triphylia; Σάμος or Σαμοθράκη; Σάμος in Karia; etc. A. Fick *Vorgriechische Ortsnamen* Göttingen 1905 p. 54 f. (cp. *ib.* pp. 65, 88 f., 113, 115 f., 135 f.) regards this whole group of names as belonging by rights to the Leleges, who were driven eastwards by the advance of the Illyrians (*ib.* p. 142).

[10] *Supra* pp. 341 n. 6 *s.v.* Ζâνες, 349.
[11] *Supra* p. 140 ff.

famous gateway at the north-western end of the Forum Romanum was 'a symbolic entrance to the heart of the city[1].' But the early Roman cared little for symbols. What he wanted was to have the god he worshipped present in his midst. So, if the god he worshipped was the shining vault of heaven, he must needs have a glittering *simulacrum* of it continually before him. W. Deecke in 1876 had already got a glimpse of the truth, when he urged that Ianus denoted the sky as an arch or vault[2]; L. Preller and H. Jordan in 1881 admitted that the simple arch stood for the heavenly vault[3]; and S. Linde in 1891, while improving on his predecessors' etymology, still upheld their opinion that the vaulted archway of Ianus was but an image of the sky[4]. I agree with this view, which seems to me strongly supported by the fact that the Romans used the self-same word on the one hand of the god (*Ianus*), on the other of his arch (*ianus*).

The archway of Ianus in all probability forms part of the background carved on one of the well-known balustrades in the Forum (fig. 242)[5]. The emperor (Trajan?) is here seen standing with his suite on the *rostra* in front of the old *curia*; and the adjoining gateway, a simple round-headed arch between two Corinthian columns supporting a horizontal entablature, was identified by

[1] W. Warde Fowler *The Religious Experience of the Roman People* London 1911 p. 126. Cp. B. R. Burchett *Janus in Roman Life and Cult* Menasha, Wisconsin 1918 p. 37 f. ('the symbolical entrance-way,' 'the symbolical entrance,' 'the one symbolical gate').

[2] W. Deecke *Etruskische Forschungen* Stuttgart 1876 ii. 125: 'Ianus bezeichnete also den Himmel als „Bogen, Gewölbe" und wurde so Name des Himmels-, nicht des Sonnengottes. So knüpft sich auch die Einführung seines Dienstes in Rom an den Bau des Ianus geminus auf dem Forum' etc.

[3] Preller—Jordan *Röm. Myth.*[3] i. 168: 'daher der einfache Bogen, ianus, eigentlich ein offener Durchgang (transitio pervia, Cic. N. D. II, 27) das Symbol des himmlischen Gewölbes und seines Pförtners Janus, des himmlischen Lichtgottes wurde.'

[4] S. Linde *De Iano summo Romanorum deo* Lundae 1891 p. 18: 'Ianum caelum repraesentasse forma quoque templi eius indicat, quod arcus vel fornix erat—quae fornix imago caeli mihi videtur fuisse, ut pro caelo et germanice *Himmelsgewölbe* et suethice *himlahvalf* dicitur. Recte igitur, opinor, Deecke (Etr. Forsch. II p. 125 sq.) Ianum esse *deum caeli* statuit. Falso tamen putat Ianum idem atque transitum esse et etiam per se a principio fornicem vel arcum significasse, nam fornix vel arcus est imago sola caeli* [*Cfr Preller, Röm. Myth.[3] I. p. 168], non ipsa interpretatio nominis Iani.'

but without the entablature, occurs on the reverse of *aurei* struck by Nero (fig. 245)[1]. It is, however, from the 'first brass' (figs. 246—249)[2] and 'second brass' (figs. 250, 251)[3] of this emperor that we gain the clearest idea of the building. The said pieces show us a small oblong edifice with a heavy flat roof. At either end is a pair of Roman Doric or Corinthian columns carrying a semicircular arch, which is filled by shut doors and adorned with a festoon. The long side of the structure is of unusual design, consisting of two or more courses of masonry topped by an open grill, above which is seen the entablature, sometimes embellished with palmettes and scroll-work. H. Jordan justly infers that this peculiar building was not, to speak strictly, an *aedes* at all, but rather a double archway, a *ianus Geminus* as the Romans themselves termed it[4]. Sheathed throughout with bronze[5] it would aptly represent the bronze sky of early belief[6]—a similitude borne out by its arched vault and its four supporting pillars[7].

fig. 244), Rasche *Lex. Num.* ii. 76, iv. 504 f., Suppl. iii. 70, A. Boutkowski *Dictionnaire numismatique* Leipzig 1878 p. 327 no. 717, Cohen *Monn. emp. rom.*[2] i. 79 no. 110, Stevenson—Smith—Madden *Dict. Rom. Coins* p. 473. Morell's two specimens are hardly above suspicion. The first was derived from H. Goltz, the second from J. Oisel; and Goltz, though an enthusiast, was no critic (Babelon *Monn. gr. rom.* i. 1. 102 ff.).

[7] *Supra* p. 141.

(λ) The Triumphal Arch.

Incidentally this conception will serve to clear up a long-standing puzzle, the original character and purpose of the triumphal arch. P. Graef[1], who, in a list large but by no means exhaustive, enumerates one hundred and twenty-five such arches, scattered throughout the Roman empire and ranging in date from the middle of the first century B.C.[2] to the middle of the fourth century A D.[3], states frankly that nothing certain is known with regard to the early history of the type[4]. The various theories that have been propounded are conveniently summarised and discussed by G. Spano[5]. Most recent critics, it appears, himself included, have looked to the Greeks of the Hellenistic age as the originators of this and other such architectural structures. Not so A. L. Frothingham, who after a wide survey of the facts concluded that the true parent of the triumphal arch was the old Roman *ianus*[6]. Frothingham argued (*a*) that in early days, when Rome consisted in a group of neighbouring tribes, each tribe

[1] P. Graef 'Triumph- und Ehrenbögen' in Baumeister *Denkm.* iii. 1865—1899 with pls. 80—85 and numerous figs. (an article of capital importance). C. D. Curtis 'Roman Monumental Arches' in the *Supplementary Papers of the American School of Classical Studies in Rome* New York 1908 ii. 26—83 with 18 figs. discusses the origin of triumphal arches and describes 73 specimens in chronological order (*Am. Journ. Arch.* 1918 xxii. 218). See also J. Guadet in Daremberg—Saglio *Dict. Ant.* i. 391—394, J. H. Flather and W. Smith in Smith—Wayte—Marindin *Dict. Ant.* i. 172—174, H. Wölfflin in the *Repertorium für Kunstwissenschaft* 1893 xvi. 11 ff., O. Puchstein in Pauly—Wissowa *Real-Enc.* ii. 603—606, C. Huelsen 'Zu den römischen Ehrenbögen' in the *Festschrift zu Otto Hirschfeld's 60. Geburtstag* Berlin 1903 pp. 423—430, Durm *Baukunst d. Röm.*[2] pp. 718—733.

[2] The arch of *Saint Remy*, the ancient Glanum in Gallia Narbonensis, probably commemorates the victory of Iulius Caesar over Vercingetorix and the capture of Alesia in 52 B.C.

[3] The arch of *Rheims*, anciently Durocortorum the chief town of the Remi in Belgica Secunda, is said to have been erected by Julian in 360 A.D.

It is noteworthy that both the earliest and the latest datable examples of triumphal arches are to be found in France, which can boast fourteen extant monuments of the sort (Rome 10, rest of Italy 20, France 14, Germany 1, Spain 6, Africa 54, Asia and other lands 20: see P. Graef *loc. cit.* p. 1866).

[4] P. Graef *loc. cit.* p. 1871.

[5] G. Spano 'L'origine degli archi onorari e trionfali romani' in *Neapolis* 1903 i. 144 ff.

[6] A. L. Frothingham 'De la véritable signification des monuments romains qu'on appelle "Arcs de Triomphe"' in the *Rev. Arch.* 1905 ii. 216—230. Cp. W. Warde Fowler *Roman Essays and Interpretations* Oxford 1920 p. 73 n. 2 (*id.* 'Passing under the Yoke' in the *Class. Rev.* 1913 xxvii. 48 ff.): 'Nearly all forms of Roman art are now thought to be traceable to Greek originals, and without doubt the ornamentations of the triumphal arches which have survived are Hellenistic; but such a thing as a triumphal arch is not known in Hellas, and I believe that the idea is far more likely to be Roman.' Mr Warde Fowler argues that the *iugum*, the *tigillum*, and the *porta triumphalis* alike imply a 'rite de passage,' in which human beings pass through a narrow space in order to be rid of disease, blood-guiltiness, or some other trouble. He is not, of course, committed to Mr Frothingham's views, still less to mine.

had its separate *ianus* on the line of its own *pomoerium* (*ianus Curiatius*, *ianus Carmentalis*, *ianus Quirinus*), such *iani* being, not gates in a fortified wall, but arches built outside to commemorate events of communal importance and placed under the protection of the communal god Ianus; (*b*) that the unified Servian state similarly had its *ianus*, the *porta triumphalis*, on the enlarged pomoerial line of the *via Flaminia*; and (*c*) that this famous portal was copied and re-copied by communal arches far and wide through the dominions

Fig. 252.

Fig. 253.

Fig. 254.

of imperial Rome. Now, without necessarily endorsing the precise lineage traced by Frothingham, we must surely admit that in point of shape the triumphal arch[1] is indistinguishable from the arch of Ianus; even the four-sided variety of the former[2] can be paralleled by the four-sided variety of the latter[3]; and, if the *ianus Geminus* had side-windows (figs. 246—251), so on occasion had the triumphal arch (fig. 252)[4]. Accordingly, I should conjecture[5] that in its significance too the *arcus* resembled the *ianus*—in short that it represented

[1] See *e.g.* the restoration of Titus' Arch at Rome as given by P. Graef *loc. cit.* p. 1867 pl. 82 fig. 1969 after L. Canina *L'architettura romana* Roma 1834 pl. 188.

[2] P. Graef *loc. cit.* p. 1889 ff. fig. 1991 describes and illustrates the four-sided arch erected at Oea in Tripolitana (*Tripoli*) by C. Calpurnius Celsus and dedicated by Ser. Cornelius Scipio Salvidienus Orfitus, when proconsul of Africa in 162/3 or 163/4 A.D., to Marcus Aurelius and Lucius Verus (*Corp. inscr. Lat.* viii no. 24, cp. viii Suppl. no. 10999, with Groag in Pauly—Wissowa *Real-Enc.* iv. 1508). Within the coffered arches the monument is roofed with a low dome resting on an octagonal cornice.

[3] P. Graef *loc. cit.* p. 1880 pl. 80 fig. 6 and pl. 81 fig. 8 gives a description, ground-plan, and restored elevation of the so-called *ianus Quadrifrons* in the Forum Boarium at Rome, which was probably erected by Septimius Severus. See further L. Rossini *Gli archi trionfali onorarii e funebri degli antichi Romani* Romae 1836 pl. 62, L. Canina *Gli edifizi di Roma antica* Romae 1848—1856 iv pl. 253 f., H. Jordan *Topographie der Stadt Rom im Alterthum* Berlin 1885 i. 2. 470—472, H. Kiepert et C. Huelsen *Formae urbis Romae antiquae*[2] Berolini 1912 p. 100.

[5] *Pace* Durm *Baukunst d. Röm.*[2] p. 732 'Der Form und nicht der Bedeutung nach sind hier noch die eingangs erwähnten *Jani* einzustellen,' etc.

the heavenly vault[1], and that the triumphing general whose statue stood upon it (fig. 253)[2] was viewed as an embodiment of the sky-god uplifted on his mimic sky[3]. This suggestion is corroborated by a 'first brass' of Trajan, which displays (fig. 254)[4] a fine triumphal arch[5] supporting the emperor's chariot and explicitly dedicated I O M, 'to Iupiter Best and Greatest.' It thus appears that such modern structures as the Arc de Triomphe or the Marble Arch have behind them a long classical history, in which religious beliefs no less than military and political considerations have played their part. But the significance of the design has progressively dwindled; and in these democratic days the monument that once stood for apotheosis merely marks a stage for the motor-omnibus.

[5] Cohen *loc. cit.* says 'Façade du temple de Jupiter, en forme d'arc de triomphe'—which is absurd. Dion Cass. 68. 29 informs us that a triumphal arch was being prepared for Trajan in his own Forum during the year 116 A.D. Excavations in 1594 (F. Vacca 'Memorie di varie antichità trovate in diversi luoghi della città di Roma nell' anno 1594' § 9 published by T. Schreiber in the *Ber. sächs. Gesellsch. d. Wiss.* Phil.-hist. Classe 1881 p. 59, 15 ff.) and again in 1863 (A. Pellegrini 'Arco di Trajano' in the *Bull. d. Inst.* 1863 pp. 78—80) brought to light its foundations, together with numerous architectural and sculptural fragments, under the old church of S. Maria in Campo Carleo, which in the sixteenth century bore the name of *Spolia Christi* or *Spoglia Cristo*. It was formerly assumed that the four Trajanic reliefs representing a battle with Dacians, which now embellish the Arch of Constantine (for a convenient publication with a summary of recent controversy see Reinach *Rép. Reliefs* i. 238 ff.), belonged originally to this Arch of Trajan. The assumption, disputed by E. Petersen in the *Röm. Mitth.* 1889 iv. 314 ff. but reaffirmed by R. Lanciani *The Ruins and Excavations of Ancient Rome* London 1897 p. 193, may well be sound; for on the first of the slabs in question the emperor, whose head has been replaced by that of Constantine, is conducted by Roma and Victoria towards an Arch (G. P. Bellori *Veteres arcus Augustorum triumphis insignes* Romæ 1690 pl. 42=Reinach *Rép. Reliefs* i. 252 no. 1, Brunn—Bruckmann *Denkm. der gr. und röm. Sculpt.* pl. 580, 1 with text by J. Sieveking, Mrs A. Strong *Roman Sculpture from Augustus to Constantine* London 1907 p. 157 ff. pl. 48, 4 from a photograph by Anderson).

H. Kiepert et C. Huelsen *Formae urbis Romae antiquae* Berolini 1912 p. 54 regard the coin illustrated in my fig. 254 as the Arch of Trajan in *regio* I recorded by the *curiosum urbis regionum xiv* and *notitia regionum urbis xiv* reg. 1 (H. Jordan *Topographie der Stadt Rom im Alterthum* Berlin 1871 ii. 542). But that was originally a triple arch (H. Jordan—C. Huelsen *Topographie der Stadt Rom im Alterthum* Berlin 1907 i. 3. 216 f.).

(μ) The goddess under the Arch.

Again, the representation of the sky as an arch will explain why various ancient goddesses of the earth appear either immediately beneath, or in close connexion with, an arcuated structure. The Hittite Chipa under her winged arch[1] is a case in point. Similarly,

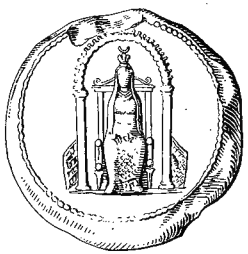

Fig. 255.

[2] Sir J. Evans in the *Num. Chron.* Third Series 1896 xvi. 48 ff. pl. 5, 2, Gnecchi *Medagl. Rom.* ii. 41 no. 24 pl. 68, 9 = my fig. 255.

(fig. 256)[1] Semele (?), crowned and sceptred, with the infant Dionysos (?) on her arm and a goat at her feet, stands beneath a dotted vault, which rises from two Corinthian columns. Imperial coppers from Sinope (fig. 257)[2] show Nemesis under a two-pillared arcade. Others from Philadelpheia (fig. 258)[3] represent Aphrodite beneath an arch with twisted columns. Others again from Pogla in Pisidia (figs. 259, 260)[4] have an aniconic goddess, resembling Artemis *Pergaia*, overarched by a distyle canopy. Examples such as these—and the list could be lengthened—confirm my previous[5] conjecture that the gateway or arch, so noticeable a feature in the old-fashioned Diana-cults of central Italy, originally signified the sky raised on its supports. *Diana* was thereby associated with *Dianus*.

(*v*) The *Tigillum Sororium* and Iupiter *Tigillus*.

And here we must notice one of the most curious monuments to be seen in ancient Rome, the *Tigillum Sororium* or 'Sister's Beam[6],' which spanned a narrow lane leading down from the Carinae to the Vicus Cuprius[7]. It was connected by tradition[8] with the famous

fight between the triplets of Alba and the triplets of Rome. Horatius, the sole survivor, had stabbed his sister for lamenting the loss of her lover, one of the vanquished Curiatii. Condemned to death by the *duoviri*, Horatius appealed to the people, who acquitted him of the capital charge, but bade his father make satisfaction for the offence. The elder Horatius thereupon offered certain expiatory sacrifices, which were afterwards perpetuated by the family, laid a beam across the street, and caused his son with covered head to pass under it as under a yoke[1]. This beam, adds Livy[2], was kept in constant repair at the public expense. Indeed, it is mentioned as still existing by more than one fourth-century writer[3]. With regard to its construction our authorities are not in exact agreement. Dionysios of Halikarnassos, who was long resident in Rome (30—8 B.C. or later) and no doubt knew the locality well, states that the beam was let into a wall at either end[4]. But Pompeius Festus, presumably epitomising the account given by M. Verrius Flaccus (*c.* 10 B.C.), asserts that the beam rested on a couple of uprights[5]. Be that as it may, both Dionysios and Festus speak of two altars, which stood beneath it[6] and were dedicated to Iuno *Sororia* and to Ianus *Curiatius* respectively[7]. Dionysios' observation that the beam was 'honoured with sacrifices by the Romans every year[8]' is confirmed by the fragmentary calendar of the Arval Brothers[9], which against the first of October—a day appropriate both to Ianus and to Iuno—has the entry : '(Sacrifice) to the Sister's Beam at the Cross-road of Acilius.' T. Mommsen drew attention to the surprising fact that the Beam itself is here the object of worship[10]. This, however, ceases to surprise us, when we remember that the Beam was a sort

[10] T. Mommsen in the *Corp. inscr. Lat.* i. 1^2 p. 330 K·OCT·(Oct: 1).—N Tigillo soror(io) ad compitum Acili *ARV.* (*inter add. posteriora et scriptum sic, ut possit trahi ad Oct.* 2); Tigill(o) sor(orio) *PAVL.* ...Ipsum tigillum pro numine cultum esse (aliter enim non videntur accipi posse) docuerunt nos fasti Arvalium.

of *ianus*[1] and as such represented that primitive sanctity, the animate Sky[2]. Ianus the celestial roof was, in fact, fitly embodied in the *Tigillum* and as yet required no other effigy. His association with Iuno suggests that he here played the part of Iupiter. Augustine, after insisting that Ianus and Iupiter are but diverse forms of the same deity[3], remarks that Iupiter was named *Tigillus* 'because, like a Beam, he kept the world together and supported it[4].'

(ξ) The god under the Arch.

When Ianus passed from the zoïstic[5] to the anthropomorphic stage, he was represented as a double-faced deity standing beneath

Fig. 262.

Fig. 261.

Fig. 263.

the arch that had been his former self. Such was the bronze statue five cubits high, which looked east and west in the *ianus Geminus* of

[1] O. Gilbert *Geschichte und Topographie der Stadt Rom im Altertum* Leipzig 1883—1885 i. 180 ff., ii. 61, O. Richter in Baumeister *Denkm.* iii. 1528, *id. Topographie der Stadt Rom*[2] München 1901 p. 311, W. H. Roscher in Roscher *Lex. Myth.* ii. 21, and Wissowa *Rel. Kult. Röm.*[2] p. 104 all rightly regard this trixylon as a *ianus*. W. F. Otto 'Römische Sondergötter' in the *Rhein. Mus.* 1909 lxiv. 466 f. denies it. Cp. Cat. 67. 37 ff. ianua...suffixa tigillo.

[2] *Supra* p. 354 ff.

[3] *Supra* p. 328 n. 6.

[4] Aug. *de civ. Dei* 7. 11 dixerunt eum (*sc.* Iovem)...Tigillum...quod tamquam tigillus mundum contineret ac sustineret... puto inter se propinquiora esse causas rerum atque primordia, propter quas res unum mundum duos deos esse voluerunt, Iovem atque Ianum, quam continere mundum et mammam dare animalibus; nec tamen propter haec opera duo tam longe inter se vi et dignitate diversa duo dii esse compulsi sunt; sed unus Iuppiter propter illud Tigillus, propter hoc Ruminus appellatus est.

In *Folk-Lore* 1905 xvi. 279 n. 6 I mistakenly inferred from this passage that Iupiter *Tigillus* owed his appellation to some reminiscence of the world-tree. I now hold that he was the Latin equivalent of an earlier Ianus, whose beam was horizontal, not vertical. E. Pais *Ancient Legends of Roman History* trans. M. E. Cosenza London 1906 p. 156 speaks of 'ceremonies in honor of Jupiter Tigillus and Juno Sororia.' But the phrase oversteps our *data*. J. A. Hartung *Die Religion der Römer* Erlangen 1836 ii. 43 was content to say: 'Zuerst richtet er ein Joch auf, *sororium tigillum* genannt, mit Einwilligung, wie es scheint, des *Jupiter Tigillus*.' And even that is more than we really know.

[5] *Supra* i. 27 n. 4.

the Forum[1]. And such is the god as he appears on a bronze medal-

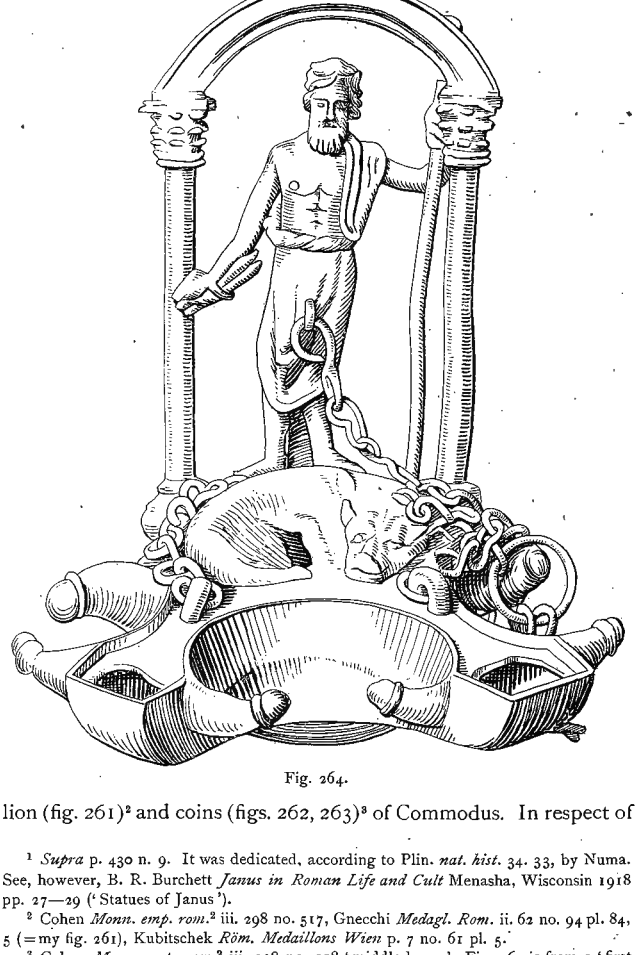

Fig. 264.

lion (fig. 261)[2] and coins (figs. 262, 263)[3] of Commodus. In respect of

[1] *Supra* p. 430 n. 9. It was dedicated, according to Plin. *nat. hist.* 34. 33, by Numa. See, however, B. R. Burchett *Janus in Roman Life and Cult* Menasha, Wisconsin 1918 pp. 27—29 ('Statues of Janus').

[2] Cohen *Monn. emp. rom.*[2] iii. 298 no. 517, Gnecchi *Medagl. Rom.* ii. 62 no. 94 pl. 84, 5 (=my fig. 261), Kubitschek *Röm. Medaillons Wien* p. 7 no. 61 pl. 5.

[3] Cohen *Monn. emp. rom.*[2] iii. 298 no. 518 'middle brass.' Fig. 262 is from a 'first brass' of similar types belonging to Mr C. T. Seltman; fig. 263, from another in my collection: *obv.* M COMMODVSANTP FELIXAVG BRIT Head of Commodus, laureate, to

the arch he is still comparable with Iupiter, who on a Roman bronze lamp stands with thunderbolt and sceptre underneath an arch resting on two Corinthian columns (fig. 264)[1]. Similarly in modern Hindu

art Brahmā is a four-faced (fig. 265), Vishnu a one-faced god (fig. 266) seated above a lotus beneath a starry arch[2].

(*o*) Ianus bifrontal on coins.

The really distinctive feature of the anthropomorphic Ianus is, of course, his double face. On republican and imperial coins he is almost[3] invariably bifrontal. *Denarii* of the *gens Furia*, struck

right; *rev.* PMTRPX[III]MP VII[I] COSVPP S C Ianus holding long sceptre, on a base beneath an arch.

[1] *Brit. Mus. Cat. Bronzes* p. 326 no. 2519=*Brit. Mus. Cat. Lamps* p. 8 no. 38 pl. 2 (=my fig. 264). Height $7\frac{3}{4}$ inches. In neither publication does Mr H. B. Walters give the history of this interesting lamp. Very similar, but not (apparently) identical, is one figured by Montfaucon *Antiquity Explained* trans. D. Humphreys London 1722 v. 143 pl. 39 no. 1 and by F. Creuzer *Symbolik und Mythologie*[3] Leipzig and Darmstadt 1841 iii. 207 f. pl. 9, 41 after G. P. Bellori *Le antiche lucerne sepolcrali figurate* Roma 1704 Pt. ii. 1 pl. 1. Bellori's interpretation '*Jupiter Custos*,' on account of the dog curled up round the hole for the wick, is fanciful. The dog, as a symbol of watchfulness, is a frequent ornament on lamps (*e.g. Brit. Mus. Cat. Lamps* p. 2 no. 4 pl. 1, p. 6 no. 26 fig. 5, p. 12 no. 65 pl. 8, p. 13 no. 68 pl. 7, p. 16 no. 93, p. 62 no. 430 and no. 431 pl. 11, p. 90 no. 594, p. 174 no. 1155 and no. 1156 fig. 245, p. 209 no. 1394, p. 225 no. 1498 pl. 37), and need not be viewed as an attribute of Iupiter. The phalloid horns are of course prophylactic.

[2] Figs. 265 and 266 are from two alabaster carvings in my possession. Height: $6\frac{1}{16}$ ins.

[3] *Infra* § 3 (a) v (*o*) *fin.*

c. 92 B.C., have for obverse type a full-bearded head of Ianus (fig. 267)[1], while others of the *gens Fonteia*, struck *c.* 91 B.C., show a

Fig. 267.

Fig. 268.

Fig. 269.

slightly-bearded head (fig. 268)[2], probably meant for Fontus, eponym of the clan, who was said to have been a son of Ianus[3]. Heavy *asses*

[1] Morell. *Thes. Num. Fam. Rom.* i. 189 f. pl. Furia, 3, Babelon *Monn. rép. rom.* i. 524 f. fig., *Brit. Mus. Cat. Rom. Coins* Rep. ii. 283 pl. 94, 5 and 6. Fig. 267 is from a specimen in my collection.

[2] Morell. *Thes. Num. Fam. Rom.* i. 180 f. pl. Fonteia, 1, Babelon *Monn. rép. rom.* i. 499 f. fig., *Brit. Mus. Cat. Rom. Coins* Rep. ii. 292 f. pl. 94, 12—14. Fig. 268 is from a specimen of mine.

Since the Furii and the Fonteii are the only Roman families to put a Janiform head on their *denarii*, and since both of them appear to have originated in Tusculum (for the Furii see F. Münzer in Pauly—Wissowa *Real-Enc.* vii. 315; for the Fonteii, *eund. ib.* vi. 2841), it is possible that the double heads, like those of the Dioskouroi on other coins of the *gens Fonteia* (*id. ib.* vi. 2841: cp. M. Albert *Le culte de Castor et Pollux en Italie* Paris 1883 p. 13 ff.), perpetuated the memory of a Tusculan cult.

[3] Arnob. *adv. nat.* 3. 29 Ianum, quem ferunt Caelo atque Hecata procreatum in Italia regnasse primum, Ianiculi oppidi conditorem, patrem Fonti, Vulturni generum, Iuturnae maritum. This genealogy has been labelled 'spätere Kombination' (Boehm in Pauly—Wissowa *Real-Enc.* vi. 2839). But, in view of the *ara Fontis* (Cic. *de leg.* 2. 56) near the Ianiculum (H. Jordan—C. Huelsen *Topographie der Stadt Rom im Alterthum* Berlin

with the types of Ianus and Mercurius, issued at Rome between *c.* 290 and *c.* 240 B.C., represent the former god as beardless

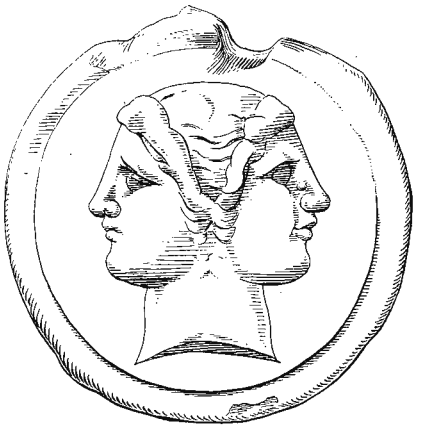

Fig. 270.

Fig. 271.

Fig. 272.

(figs. 269, 270)[1]—a point in which they agree with the contemporary

1907 i. 3. 624), it was at least *bien trouvée*. Similarly Lambaesis in Numidia worshipped both Ianus *Pater* (*Corp. inscr. Lat.* viii no. 2608 = Dessau *Inscr. Lat. sel.* no. 3324 Iani Patro (*sic*)|etc.) and Fons (*Corp. inscr. Lat.* viii no. 2656, 2 aedem Fontis etc.). Iupiter, like Ianus, came to be associated with fountain-powers: *Corp. inscr. Lat.* vi no. 404 (cp. no. 30756) = Dessau *Inscr. Lat. sel.* no. 3062 (Rome) Iovi Optimó Maximó | Caelestíno, Fontibus, et | Minervae etc., *Corp. inscr. Lat.* viii no. 4291 = Dessau *Inscr. Lat. sel.* no. 3063 (Lambaesis) Iovi (*v.l.* Iovo) | Propagatori | Conservatori | et Genio Fontis, etc.

[1] E. J. Haeberlin *Aes grave* Frankfurt a. M. 1910 p. 76 Tafelband pl. 36, 1 (= my fig. 269) in the Museo Kircheriano weighing 270·15 grammes and pl. 36, 3 (= my fig. 270) at Copenhagen weighing 262·70 grammes. The former specimen is figured also by Garrucci *Mon. It. ant.* p. 19 pl. 36, 1. See further Garrucci *ib.* p. 20 pl. 37, 1, G. F. Hill *Historical Roman Coins* London 1909 p. 18 pl. 5, 8, p. 24 f.

series of Romano-Campanian silver[1]. Certain electrum pieces, struck —it would seem—at Capua during the occupation of that town by the Carthaginians in the Hannibalic war (216—211 B.C.), give the twofold face a frankly feminine cast and, adding a corn-wreath, transform the Italian Ianus into a Punic Persephone (fig. 271)[2].

Fig. 273.

Fig. 274.

In imperial times Commodus was evidently a special devotee of the old sky-god. Apart from the mintages already mentioned[3], he placed on his bronze medallions sometimes the familiar bust of Ianus (fig. 272)[4], sometimes a Janiform novelty consisting of his own face combined with that of Iupiter (?) his *alter ego* (figs. 273, 274)[5].

[1] *Supra* p. 331.

[2] *Brit. Mus. Cat. Rom. Coins* Rep. ii. 139 f. pl. 75, 14 (=my fig. 271), G. F. Hill *Historical Roman Coins* London 1909 p. 50 f. pl. 10, 28. The correct attribution and dating of these coins is due to P. Gardner in the *Num. Chron.* Third Series 1884 iv. 220—224.

[3] *Supra* p. 366.

[4] Gnecchi *Medagl. Rom.* ii. 62 no. 92 and no. 93 pl. 84, 4 (=my fig. 272), Cohen *Monn. emp. rom.*[2] iii. 298 no. 516 fig. The specimen reproduced above is from F. Gnecchi's collection. The medallion was struck in 187 A.D., and shows the god with a *paludamentum* over his shoulder.

[5] Gnecchi *Medagl. Rom.* ii. 66 no. 131 pl. 87, 1, *Brit. Mus. Cat. Medallions* p. 25 no. 20 pl. 32, 1, Fröhner *Méd. emp. rom.* p. 131 fig. (=my fig. 273), Kubitschek *Röm. Medaillons Wien* p. 7 no. 62 pl. 5 (=my fig. 274), Cohen *Monn. emp. rom.*[2] iii. 322 no. 717 fig. These medallions were struck in 187 A.D.

For this bold and somewhat grotesque device a precedent may be found in the action of Sex. Pompeius Magnus Pius, the younger son of the triumvir, who *c.* 45—44 B.C. struck *asses* in Spain bearing as obverse design a head of Ianus with the features of Cn. Pompeius Magnus (fig. 275)[1]. Commodus in turn was followed by Caracalla, who a few years later (214 A.D.) visited Thrace and, posing as Alexander *redivivus*, had himself painted in the Janiform type of

Fig. 275.

Fig. 276.

'Alexander and Antoninus[2].' *À propos* of Commodus, we must rule out one of his medallions (fig. 276), a bronze piece in the cabinet at Arolsen, published by E. Gerhard in 1861[3] and still accepted as genuine by W. H. Roscher in 1890[4] and by J. Toutain in 1899[5]. On it the emperor in the guise of Ianus, with one face bearded, the other beardless, holds a staff in his left hand and lays his right on a hoop (described by courtesy as an arch[6]), from which the four

Numismatists differ in naming the emperor's partner. Gnecchi *loc. cit.* says 'Ercole'; H. Cohen *loc. cit.*, 'Hercule'; H. A. Grueber in the *Brit. Mus. Cat. Medallions* p. 25, 'Janus'; W. Fröbner *loc. cit.*, 'Jupiter'; W. Kubitschek *loc. cit.*, 'Juppiter.'

[1] Morell. *Thes. Num. Fam. Rom.* i. 334 f. pl. Pompeia 1, 5, Babelon *Monn. rép. rom.* ii. 351 no. 20 fig., *Brit. Mus. Cat. Rom. Coins* Rep. ii. 371 f. pl. 101, 13 and 14, A. Boutkowski *Dictionnaire numismatique* Leipzig 1881 p. 12 f. nos. 25, 26. I figure a specimen in my collection.

Since Sex. Pompeius after the battle of Munda (45 B.C.) rallied the troops that had served under his father and brother, who both bore the name Cn. Pompeius Magnus, it is just conceivable that this Janiform head was intended to combine the paternal and fraternal features. *Aurei* of Sex. Pompeius, struck soon after 42 B.C., have obv. his own head in an oak-wreath, rev. the heads of his father and brother confronted (Morell. *op. cit.* i. 335 ff. pl. Pompeia 1, 6, Babelon *op. cit.* ii. 353 no. 24 fig., *Brit. Mus. Cat. Rom. Coins* Rep. ii. 561 pl. 120, 9 and 10, Boutkowski *op. cit.* p. 99 ff. no. 238, G. F. Hill *Historical Roman Coins* London 1909 p. 126 ff. pl. 13, 78). See further *infra* p. 389 n. 2.

Seasons issue towards a boy symbolising the New Year. This *bizarre* medallion is, I think[1], merely a tooled specimen of a type

Fig. 277.

Fig. 278.

Fig. 279.

first struck by Antoninus Pius in 158 A.D. (fig. 277)[2] and subsequently repeated by Commodus in 185 A.D. (fig. 278)[3]. The god is Iupiter[4], not Ianus, and a Paris example of the later issue shows

[1] Mr G. F. Hill, with whom I have discussed the type, endorses my opinion. I see too that Fröhner *Méd. emp. rom.* p. 121 n. 1 has expressed the same doubt.

[2] Gnecchi *Medagl. Rom.* ii. 15 no. 54 pl. 48, 9 (=my fig. 277) from a specimen formerly in the Stroganoff, latterly in the Evans collection.

[3] Gnecchi *Medagl. Rom.* ii. 60 no. 75 pl. 83, 3 (=my fig. 278) from a specimen at Monaco, *ib.* no. 76, *ib.* no. 77 pl. 83, 4, *Brit. Mus. Cat. Medallions* p. 24 no. 15 pl. 30, 2, Kubitschek *Röm. Medaillons Wien* p. 7 no. 57 pl. 4 (mounted and silvered to serve as a *bulla*), E. Gerhard in the *Arch. Zeit.* 1861 xix. 137 pl. 147, 6 and 7 with comments by F. Wieseler *ib.* pp. 137—140.

[4] Eckhel *Doctr. num. vet.*[2] vii. 113 already describes him as 'Iuppiter.' F. Wieseler in Müller—Wieseler *Denkm. d. alt. Kunst* ii. 4. 65 pl. 74, 960 and in the *Arch. Zeit. loc. cit.* says 'Zeus'; H. A. Grueber in the *Brit. Mus. Cat. Medallions* p. 24, 'Jupiter'; Gnecchi *op. cit.* ii. 60, 'Giove o il Secolo' (cp. *infra* p. 373 n. 2). The notion of C. Lenormant *Nouvelle galerie mythologique* (Trésor de numismatique et de glyptique) Paris 1850 p. 135 no. 8 pl. 42 that a specimen on which the god is apparently beardless (??) represents 'Le jeune empereur' is justly ridiculed by F. Wieseler in the *Arch. Zeit. loc. cit.*; but his own view that the medallion in question shows 'Helios-Apollon' is not much better. Possibly Lenormant's drawing (reproduced in the *Arch. Zeit.* 1861 xix pl. 147, 7) is incorrect.

him with thunderbolt in lieu of sceptre (fig. 279)[1]. The symbolism is of the simplest. Iupiter as sky-god is sending forth from the *orbis annuus* or 'circle of the year[2]' the four Seasons laden with their gifts—a complementary design to that of Tellus the earth-goddess, who reclining beneath her vine witnesses the same four pass in gracious procession over the star-spangled globe (figs. 273, 274)[3].

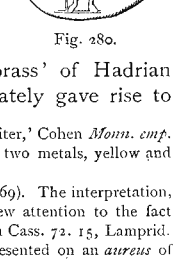

Fig. 280.

The only exception to the bifrontality of Ianus traceable on the coins of Rome is more apparent than real. The quadruple effigy of the god, brought from Falerii in 241 B.C. and erected in a temple with four doors on the Forum Transitorium[4], appears on a 'second brass' of Hadrian (fig. 280)[5]. But this fourfold type, which ultimately gave rise to

[1] Fröhner *Méd. emp. rom.* p. 121 f. fig. (=my fig. 279) 'Jupiter,' Cohen *Monn. emp. rom.*[2] iii. 291 no. 474 fig. 'Jupiter.' This specimen is struck in two metals, yellow and red copper (Babelon *Monn. gr. rom.* i. 1. 667, 944 fig. 32).

[2] So Fröhner *loc. cit.* in allusion to Verg. *Aen.* 5. 46 (cp. 1. 269). The interpretation, however, is not certain. Eckhel *Doctr. num. vet.*[2] vii. 113 f. drew attention to the fact that Commodus claimed to have restored the Golden Age (Dion Cass. 72. 15, Lamprid. *v. Commod.* 14. 3), and observed that the Golden Age was represented on an *aureus* of Hadrian (Cohen *Monn. emp. rom.*[2] ii. 216 no. 1321, cp. *ib.* ii. 216 no. 1322 the same coin in silver, *fourrée*) by a beardless, semi-draped figure (SAEC • AVR) standing within a hoop and carrying a globe surmounted by a phoenix. Again, the circle might be spatial rather than temporal: cp. Ov. *fast.* 1. 85 Iupiter arce sua totum cum spectet in orbem, etc.

[3] This type (TELLVS STABILita), introduced by Hadrian (Gnecchi *Medagl. Rom.* iii. 19 no. 90 pl. 145, 12, *Brit. Mus. Cat. Medallions* p. 5 no. 17, Cohen *Monn. emp. rom.*[2] ii. 225 no. 1435), was copied by Faustina Iunior (Gnecchi *op. cit.* ii. 39 no. 5, Cohen *op. cit.*[2] iii. 154 no. 219), and by Commodus (Gnecchi *op. cit.* ii. 65 f. no. 125 pl. 86, 8, nos. 126—128, no. 129 pl. 86, 9, no. 130 pl. 86, 10, no. 131 pl. 87, 1, *Brit. Mus. Cat. Medallions* p. 25 no. 20 pl. 32, 1, no. 21, Fröhner *Méd. emp. rom.* p. 130 f. with four figs., of which the last=my fig. 273, Kubitschek *Röm. Medaillons Wien* p. 7 no. 62 pl. 5 (=my fig. 274), Cohen *op. cit.*[2] iii. 322 no. 714 fig., nos. 715, 716, no. 717 fig.); also, with wider variations, by Antoninus Pius (Gnecchi *op. cit.* ii. 20 no. 97 pl. 54, 7, *Brit. Mus. Cat. Medallions* p. 9 no. 14 pl. 11, 2, Fröhner *op. cit.* p. 72 fig., Cohen *op. cit.*[2] ii. 392 no. 1168 fig.).

[4] Serv. *in* Verg. *Aen.* 7. 607 and 12. 198, Macrob. *Sat.* 1. 9. 13, Lyd. *de mens.* 4. 1 p. 64, 4 ff. Wünsch. Cp. Mart. *ep.* 8. 2. 1 ff., 10. 28. 1 ff., Stat. *silv.* 4. 3. 9 f., Aug. *de civ. Dei* 7. 8, Isid. *orig.* 8. 11. 37. See further H. Jordan *Topographie der Stadt Rom im Alterthum* Berlin 1885 i. 2. 449 with n. 18, W. H. Roscher in his *Lex. Myth.* ii. 25 f., 28, 53, O. Richter *Topographie der Stadt Rom* München 1901 p. 114, B. R. Burchett *Janus in Roman Life and Cult* Menasha, Wisconsin 1918 pp. 28 f., 40.

[5] Rasche *Lex. Num.* iv. 514 f., Suppl. iii. 74, Coben *Monn. emp. rom.*[2] ii. 129 no. 281 (left hand on hip), no. 282 (right hand on hip). Cohen, who gives no illustration, simply ignores the third face of the god, though it is clearly enough shown in early publications such as Montfaucon *Antiquity Explained* trans. D. Humphreys London 1721 i. 18 pl. 5 no. 19 or J. Harduin's ed. of Plin. *nat. hist.* ii pl. 10, 1. Fig. 280 is from a specimen in my collection. In *Folk-Lore* 1905 xvi. 278 f. I wrongly took the type to be evidence of a triple Ianus, though I noted (*ib.* p. 278 n. 6) that R. Mowat in the *Bulletin épigraphique* iii. 168 had regarded it as Ianus *Quadrifrons* with his fourth face concealed.

the mediaeval representations of January[1], was after all a mere duplication of the twofold type.

(π) Ianus bifrontal in ritual.

The conception of Ianus as a double-faced deity was not without its influence on his ritual. Ioannes the Lydian, writing in the sixth century on the usage of his native town, says:

'Our own Philadelpheia still preserves a trace of the ancient belief. On the first day of the month (*sc.* January) there goes in procession no less a personage than Ianus himself, dressed up in a two-faced mask, and people call him Saturnus, identifying him with Kronos[2].'

The confusion of Ianus with Kronos no doubt presupposes the usual blunder *K*ronos = *Ch*ronos, which from the fifth century B.C. onwards[3] queered the course of Greek theology. But the interest of the passage lies in its record of a Ianus-mask. And of this there is much earlier monumental evidence. A. de Gregorio in his recent publication of prehistoric antiquities from Sicily has included a bronze belonging to the Prince of Torrebruna at Palermo (fig. 281)[4], which represents a male dancer wearing a Janiform mask. This grotesque little figure is clad in a close-fitting fleecy costume, presumably of sheep-skin, which reaches to elbows and knees, buttons down the chest, and is clasped about by a girdle or girdles. He

J. Brand *Popular Antiquities* rev. Sir H. Ellis London 1849 i. 19 f.: 'Upon the Circumcision, or New Year's Day, the early Christians ran about masked, in imitation of the superstitions of the Gentiles. Against this practice Saint Maximus and Peter Chrysologus declaimed; whence in some of the very ancient missals we find written in the Mass for this day, "Missa ad prohibendum ab Idolis." See Maeri Hiero-Lexicon, p. 156 [D. Magri *Hierolexicon*[6] Bononiæ 1765 i. 505 f.].' The pagan rites for Jan. 1 are denounced by Christian writers of *s.* iv—v: Io. Chrys. *hom. in kalendas* (xlviii. 953—962 Migne), Aug. *serm.* 197 'de calendis Januariis, contra paganos' and 198 'de calendis Januariis, ii' (xxxviii. 1021—1026 Migne), Asterios of Amaseia *hom.* 4 'adversus kalendarum festum' (xl. 215—226 Migne), Ambros. *serm.* 7 'de kalendis Januariis' (xvii. 617 f. Migne), Prudent. *c. Symm.* 1. 237 ff., Petrus Chrysologus *serm.* 155 'de kalendis Januarii, quae varia gentium superstitione polluebantur' (lii. 609—611 Migne). Cp. *conc. Trull.* can. 62, *conc. Turon. ii* can. 17, *conc. Tolet. iv* can. 11. On the other side read Liban. *or.* 9 *εἰς τὰς καλάνδας* (i. 2. 393—398 Foerster).

[3] M. Mayer in Roscher *Lex. Myth.* ii. 1495 ff., 1546 f.

[4] A. de Gregorio *Iconografia delle collezioni preistoriche della Sicilia* Palermo 1917 p. 128 f. pl. 126, 1^a, 1^b, 1^c (=my fig. 281). Height 0·106m. Not having seen the original, I can only assume the genuineness of this *bizarre* little bronze. Gregorio's sketch hardly inspires confidence. But would any forger have ventured upon a creation so remote from the common run of classical types?

wears a flat cap on his head. In one hand he flourishes a drumstick with knobbed ends. In the other he holds a second stick, with which apparently he drums on an oval shield. The shield is adorned with a Gorgon's head in front and a goat (?) behind. On the ground at the dancer's feet is placed a mask with a tragic (?) face on either side. The nearest parallel to the Palermo bronze is furnished by a

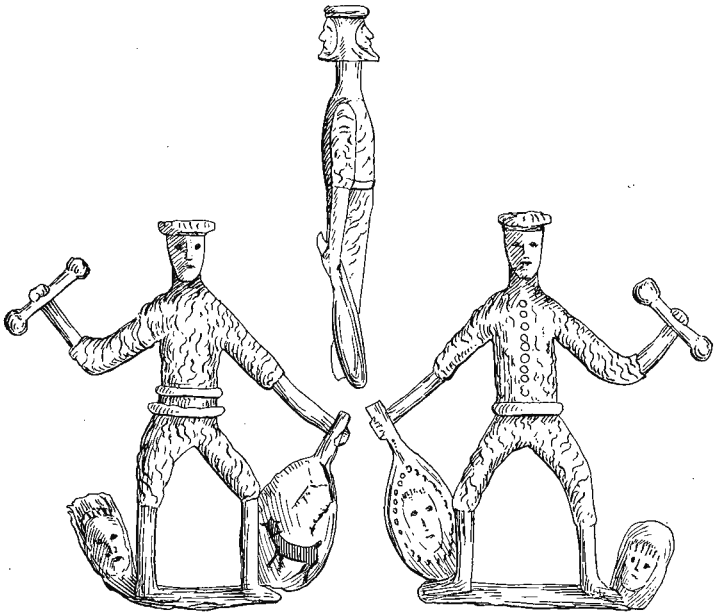

Fig. 281.

frieze of Greek marble found at Anagnia, on which we see (fig. 282)[1] Salii advancing with knobbed staves and oval shields decorated with Gorgon's head and tragic mask. It is, therefore, reasonable to conclude that the bronze too portrays one of the Salii. If it be objected that the chief distinguishing feature is here the double face, I should reply that the Salii are known to have worshipped Ianus[2]. Indeed, they not improbably personated that deity; for certain

[1] O. Benndorf 'Rilievo di Anagni con rappresentanza dei Salii' in the *Ann. d. Inst.* 1869 xli. 70—74 pl. E (=my fig. 282), Reinach *Rép. Reliefs* iii. 3 no. 1, Harrison *Themis* p. 194 ff. fig. 49.

[2] The Salian hymn to Ianus is discussed *supra* p. 328 n. 8.

verses chanted by them bore the name of *Ianuli*[1]. Further, it would seem that our bronze gives us an earlier form of the Salian costume—

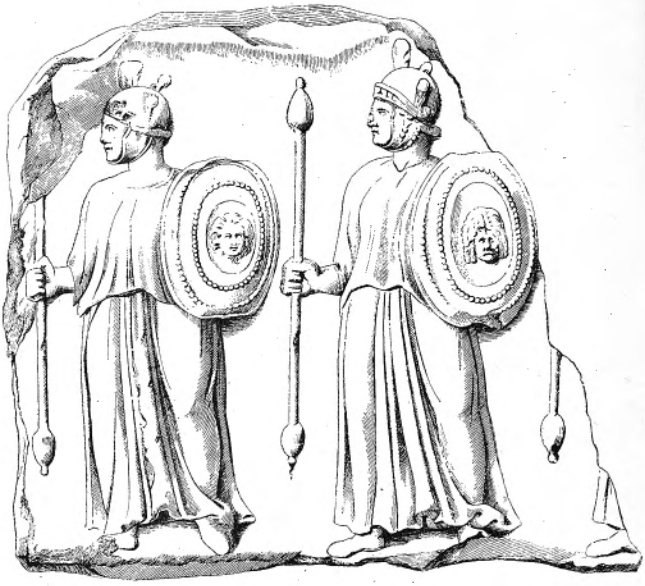

Fig. 282.

not a priestly robe resembling the Doric *péplos* (figs. 282—284)[2],

[1] Paul. ex Fest. p. 3, 6 ff. Müller, p. 3, 12 ff. Lindsay axamenta dicebantur carmina Saliaria, quae a Saliis sacerdotibus componebantur, in universos homines (C. O. Müller cj. deos A. Dammann cj. heroes J. A. Hartung cj. semones W. M. Lindsay: '*vix* omnes') composita. nam in deos singulos versus ficti a nominibus eorum appellabantur, ut Ianuli, Iunonii, Minervii. The relief of Anagnia, which equips the Salii with plumed helmets, shields, and Doric *péploi*, perhaps represents them in the guise of Minerva singing the *Minervii*.

[2] An *aureus* (*Brit. Mus. Cat. Rom. Coins* Rep. ii. 78 pl. 68, 3, Babelon *Monn. rép. rom.* ii. 83, 416 ff. fig.) and *denarii* (Morell. *Thes. Num. Fam. Rom.* i. 372 pl. Sanquinia, 1, *Brit. Mus. Cat. Rom. Coins* Rep. ii. 79 pl. 68, 4 (=my fig. 283), Babelon *Monn. rép. rom.* ii. 83, 418, M. Bahrfeldt *Nachträge und Berichtigungen zur Münzkunde der römischen Republik* Wien 1897 p. 233 pl. 10, 244) of the *gens Sanquinia*, struck in 12 B.C., show the herald of the *ludi saeculares* in Salian garb (G. F. Hill *Historical Roman Coins* London 1909 p. 149 f.).

Denarii of Domitian, struck in 88 A.D., represent one of the Salii, with plumed helmet, staff, and shield on which is the head of Mars, standing before a *candelabrum* and a *cippus* inscribed COS XIIII LVD SAEC FEC (Morell. *Thes. Num. Imp. Rom.* ii. 428 f. pl. 8, 19, Cohen *Monn. emp. rom.*[2] i. 476 nos. 73 f., Stevenson—Smith—Madden *Dict. Rom. Coins*

but a jerkin and hose of sheep-skin. This was in all probability the pelt of an animal sacrificed to the god, whose victim was normally a ram[1] or at least a lamb[2]. The fleece survived into classical times as a mere head-dress[3], which is specially mentioned in connexion

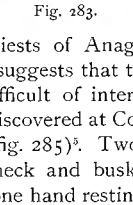

Fig. 283.

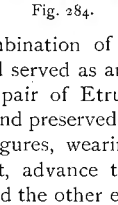

Fig. 284.

with the priests of Anagnia[4]. The combination of goat (?) and *Gorgóneion* suggests that the Salian shield served as an *aigís*.

More difficult of interpretation is a pair of Etruscan bronze statuettes, discovered at Cortona in 1847 and preserved in the *Museo Comunale* (fig. 285)[5]. Two nude male figures, wearing a *torques* round the neck and buskins on the feet, advance towards each other with one hand resting on the hip and the other extended in a gesture of greeting. The two obviously belong together; and both

p. 526 fig. Fig. 284 is from a specimen in my collection. Cp. Cohen *loc. cit.* no. 72 fig. a 'middle brass' with similar *rev.*). An *aureus*, *denarii*, and a *quinarius* of the same date show the priest only, without *candelabrum* or *cippus* (Morell. *Thes. Num. Imp. Rom.* ii. 414 pl. 6, 11 wrongly described, Cohen *Monn. emp. rom.*[2] i. 476 nos. 75—78 wrongly described).

bear dedicatory inscriptions in the Etruscan language. But, whereas one has a Janiform head, the other is coifed in a lion's scalp (?).

Fig. 285.

It may be conjectured that they are Etruscan players[1] taking the parts of Ianus (*Culśanś*)[2] and Hercules in some forgotten drama.

(ρ) The significance of Ianus' double face.

We have yet to tackle the problem, difficult indeed, but not—I think—insoluble: What was the ultimate significance of Ianus' double face? Ancient and modern explanations being admittedly unsatisfactory, we must perforce look further afield and take into account certain facts noted by students of comparative anthropology. And here I shall avail myself at once of an *obiter dictum* in Sir James Frazer's discussion of African beliefs about twins:

'On the Slave Coast when a woman has brought forth stillborn twins, she has a statue made with two faces and sets it up in a corner of her house....This suggests that elsewhere two-faced images, like those of Janus, may have been intended to represent twins[3].'

Let us fit the new key into our rusty lock and see if the door will open. Ianus, we have said, was originally the divine Sky. The divine Sky is bright by day and dark by night. Being, therefore, of a twofold or twin character, Ianus was naturally represented as a double-faced god.

[1] Cp. a bronze from Cortona, now at Leyden (G. Micali *Monumenti per servire alla storia degli antichi popoli italiani*[2] Firenze 1833 pl. 119, 2, Reinach *Rép. Stat.* ii. 558 no. 2).

[3] Frazer *Golden Bough*[3]: The Magic Art i. 269 n. 1, citing the *Missions Catholiques* 1875 vii. 592.

But, if so, we might reasonably expect to find other sky-gods duplicated in the same manner. Argos, who in his earliest form appears to have been a sky-god comparable with Zeus[1], is described in the Hesiodic *Aigímios* as 'looking this way and that way with four eyes[2]' and portrayed on vases from *s.* vi onwards with a Janiform head. An Attic black-figured *amphora*, formerly in the

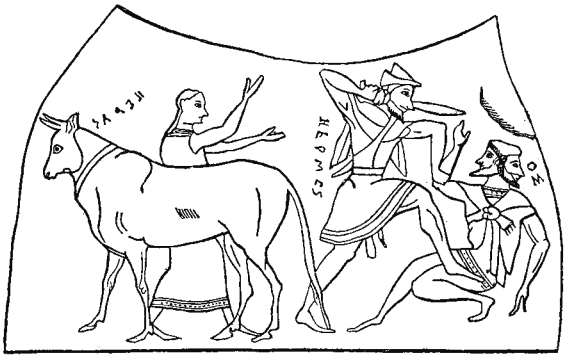

Fig. 286.

possession of the art-dealer Bassegio at Rome, depicts Hermes about to slay Argos in the presence of Hera and the heifer Io (fig. 286)[3]. A red-figured bell-*kratér* from Ruvo, in the collection of R. Barone at Naples, shows a similar group of Hermes attacking Argos, though here Io is a horned maiden and Hera is omitted (fig. 287)[4]. The earlier vase gives Argos two bearded faces, and

[3] Babelon—Blanchet *Cat. Bronzes de la Bibl. Nat.* p. 322 no. 734 'Hermès janiforme' fig., S. Eitrem in Pauly—Wissowa *Real-Enc.* viii. 706. Height 47 mill.

design a beardless Janiform head wearing a pointed *pétasos*, and for reverse either a dolphin[1] or a club (fig. 291)[2] or a mere mark of value[3]. Coins of Telamon in Etruria with a similar Janiform head on the obverse and a prow on the reverse are probably spurious[4]. It is commonly held that the dicephalous god of Volaterrae was Ianus—a view strongly advocated by W. Deecke[5]; but the absence of a beard and the presence of a *pétasos* point rather to the justice of W. H. Roscher's[6] suspicion that we should here recognise, not Ianus, but Hermes.

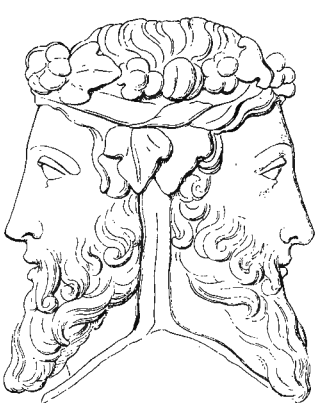

Fig. 290.

On the whole I incline to the conclusion that all these double-faced deities—*Hermês* the 'Pillar'-god (?)[7] among them—were originally local varieties

Ἑρμᾶνι dat. etc. Les opinions de Kuhn (: skr. *Sāramēyaḥ* "fils de la déesse-chienne *Sarámā*," gr. ὁρμή "*tempête"), Max Müller (Ἑρμέᾶς "*fils de l'aurore"), Welcker (: gr. ὁρμή "succession du jour et de la nuit, de la vie et de la mort"), Preller (: gr. ἔρμα "tas de pierres," cf. les ἑρμαῖα, ἑρμαῖοι λόφοι, ἕρμᾰκες), A. Legrand dans

of the divine Sky, or at least stood in such a relation to him that

Fig. 291.

they could borrow his bifrontal type. And in the development of

Saglio III, 2, 1802 bibl. (: gr. ὁρμή "*désir passionnel" et confusion avec ἕρμακες) sont désuètes.'

Id. ib. p. 281 f. distinguishes (1) ἕρμα for *σϝέρμα, 'prop, post': (2) ἕρμα for *ϝέρσμα, 'rock': (3) ἕρμα for *σέρμα, 'earring.' Attempts to connect Ἑρμῆς with ἕρμα have hitherto operated with ἕρμα, 'rock' (Preller—Robert *Gr. Myth.* i. 385 n. 5 'Grosse Wahrscheinlichkeit hat die vom Verf. in der ersten Ausgabe [1854] vorgetragene Ableitung von ἕρμα, vgl. Αἰνείας αἶνος, Αὐγείας αὐγή; wie denn die ἑρμαῖα, ἑρμαῖοι λόφοι, ἕρμακες, d. h. die aufgeschütteten Steinhaufen auf Bergen und an den Strassen, die älteste Vergegenwärtigung des Hermes waren; vgl. Dio Chryst. or. 78 p. 420 R ὥστε μεγάλα ἕρματα ἀθροίζεσθαι λίθων.' K. O. Müller *Handbuch der Archaeologie der Kunst*[3] Stuttgart 1878 p. 586 n. 1 'Wahrscheinlich ist die Pfeilerbildung des H. so alt wie der Gott selbst, da Ἑρμῆς deutlich mit ἕρμα, ἕρμαξ zusammenhängt.'); and it is no doubt possible to assume that this word developed in Greek a meaning similar to that of its Irish congener *farr*, 'column, pillar' (Boisacq *op. cit.* p. 282). I should, however, prefer to suppose that Ἑρμῆς is related to ἕρμα, 'prop, post,' and that the earliest Greek effigy of the god was a wooden phallic pillar (*e.g.* Furtwängler—Reichhold *Gr. Vasenmalerei* ii. 292 f. pl. 115), forerunner of the stone or marble herm (*e.g.* E. Gerhard 'Ueber Hermenbilder auf griechischen Vasen' in his *Gesammelte akademische Abhandlungen und kleine Schriften* Berlin 1868 ii. 126—148 pls. 63—67).

Hermes was, *bien entendu*, a god of many parts, at once terrestrial and celestial. We shall see reason to compare him with Zeus Κτήσιος (Append. H *fin.*), and we shall find analogous deities represented by phallic herms (Append. L *fin.*). It may be added that his combination of earthly with heavenly powers is well brought out by the description of him as διάκτορος ἀργεϊφόντης—an old pre-Homeric tag (cp. *supra* i. 444). On the one hand, J. B. Bury (in the *Beiträge zur kunde der indogermanischen sprachen* 1892 xviii. 295), A. Fick (*ib.* 1894 xx. 179), F. Solmsen ('Διάκτορος' in the *Indogermanische Forschungen* 1894 iii. 90—99), and F. Bechtel (*Lexilogus zu Homer* Halle a. d. S. 1914 p. 100), all relate διά-κτορος to κτέρας, κτέρεα, κτερίζω (cp. Zonar. *lex. s.v.* διάκτορος·...ἐπὶ δὲ τοῦ Ἑρμοῦ ὁ τὰ κτέρεα καὶ τὰ θύματα τοῖς τετελευτηκόσι κομίζων=*et. mag.* p. 268, 18 f. ἐπὶ δὲ τοῦ Ἑρμοῦ φασὶ παρὰ τὸ τὰ κτέρεα (so P. K. Buttmann for τὸ κέαρ or τὸ τὰ κέαρ codd.) τῶν τετελευτηκότων κομίζειν). Fick remarks that Hermes in *Il.* 24. 397 feigns to be the son of Πολύ-κτωρ, and that Lyk. *Al.* 679 uses Κτάρος as a title of Hermes himself (schol. and Tzetz. *ad loc.*). Solmsen argues that the root κτερ meant 'schenken, geben,' and that διά-κτορος had the force of 'Spender, Geber,' δια- denoting transference as in διάβολος,

that type I notice two tendencies, which may be held to reinforce my contention.

(σ) The Sky-god's hat.

Firstly, the bifacial god is apt to wear a broad-brimmed hat. For instance, on an engraved cornelian at Berlin, Greek work of Hellenistic date, he has a wide hat on his head and a long staff in his hand (fig. 292)[1]. We are reminded of Ovid's Ianus 'leaning on

Fig. 292.

Fig. 293.

Fig. 294.

the staff, which he carried in his right hand[2].' Again, a brown sard in the same collection, a convex gem of the early Roman period, shows a bearded and an unbearded head combined beneath a round hat with dotted decoration (fig. 293)[3]. Such a hat suggests com-

διάδοχος, διάκονος. He cp. Od. 8. 335 Ἑρμεία, Διὸς υἱέ, διάκτορε, δῶτορ ἐάων, *h. Herm.* 18. 12 χαῖρ', Ἑρμῆ χαριδῶτα, διάκτορε, δῶτορ ἐάων, and such passages as *Il.* 14. 489 ff., 16. 179 ff., *Od.* 15. 319 f. Bechtel renders 'einer, der gründlich über Schätze verfügt.' It appears, then, that Hermes διάκτορος was a chthonian god resembling Zeus Πλουτοδότης or Πλούτων (*supra* i. 503 f.). On the other hand, ἀργεϊφόντης almost certainly means 'slaying with a flash.' Bechtel *op. cit.* p. 53 says: 'Die Mythologen müssen entscheiden, ob sie mit der Bezeichnung "durch den Glanz tötend," "in dem Glanze tötend" etwas ausrichten können.' I gladly take up this challenge. This epithet so interpreted suits admirably the sky-god with his fatal lightning-flash. Hermes ἀργεϊφόντης, in fact, recalls Zeus, who slays ἀργῆτι κεραυνῷ (*supra* i. 31 n. 4). And if Hermes' epithet came to be misunderstood as 'the slayer of Argos,' that piece of popular etymology is at least of interest inasmuch as it implies the conflict of two rival gods. It is tempting to conjecture that the *caduceus* of the victor originated as a bipartite lightning-fork (*infra* § 3 (ε) iv (β) and (δ)); but the subject cannot here be pursued.

Since the foregoing paragraph was written an article on Ἀργεϊφόντης by P. Kretschmer has appeared in *Glotta* 1919 x. 45—49. Kretschmer holds that Ἀργεϊφόντης is *metri gratia* for Ἀργοφόντης and compares the epic ἀνδρεϊφόντης for ἀνδροφόντης (though U. von Wilamowitz-Möllendorff *Homerische Untersuchungen* Berlin 1884 p. 299 n. 10 took ἀνδρεϊφόντης to have been formed on the analogy of Ἀργεϊφόντης). 'Wir kommen also zu dem Schluss: die Wissenschaft wie die Schule mag ruhig bei der Übersetzung *Argostöter* bleiben.' As to the question put by Bechtel, 'Ich meine, die Mythologen müssen diese Frage energisch verneinen. Ein solcher Beiname würde allenfalls auf den blitzeschleudernden Zeus passen, aber nicht auf Hermes, der auch kein Lichtgott ist.' This suits my argument well enough.

parison with the beardless Janiform head wearing a helmet on *asses* of Ouxenton (*Ugento*) in Calabria (fig. 294)[1]. Now R. Eisler has rightly insisted that throughout the Levant the sky was often symbolised as a hat[2]—witness the tiara of Zeus *Oromádses*[3], the starry *pîlos* of Men or Attis or Mithras (?)[4], etc.[5] The same conception prevailed among the nations of northern Europe, as may be seen from Odhin's broad hat[6], though hardly from the umbrella-like head-gear of Rugiwit[7]. And the Greeks themselves were capable of equally crude ideas; for Anaximenes of Miletos, who speaks of his *aér* as condensed by a process of 'felting' (*pílesis*)[8], declares that the stars move round the earth horizontally 'as the felt hat (*pîlíon*) turns about on our head[9].' We need not, therefore, hesitate to interpret the *pétasos* of Hermes or Argos or Ianus as an unsophisticated symbol for the sky overhead.

(7) The differentiation of the Sky-god's faces.

Secondly, the two faces of the bifrontal deity are often differentiated. And this differentiation may vary much in its degree. Boreas, as we have just seen[1], had two bearded profiles, one dark, the other light. Argos on the *kratêr* from Ruvo[2] and Ianus (?) on the Roman sard[3] joined a bearded to a beardless visage. The

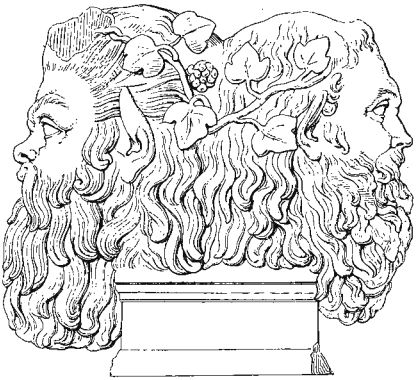

Fig. 295.

result was a piquant contrast, which acquired a certain popularity. Thus a double herm to be seen in the Museo Capitolino at Rome[4] combines a bearded with a beardless Dionysos. Another, a work of Augustan date now in the Vatican, links a would-be archaic with a Hellenistic head of Silenos (fig. 295)[5]. Or again, two heads are

[1] *Supra* p. 380 f. fig. 288.

Height 1·085^{m} to base of shaft, which does not belong to the heads. Luna marble. The nose of the unbearded head and a lock of hair by its left ear have been restored.

A bronze in the Museum at Cassel shows a nude youth of effeminate aspect holding an adze (?) in his lowered right hand and a Janiform amulet in his raised left hand: the little figure has a beardless face in front, a bearded face behind (Gerhard *Etr. Spiegel* i. 40 pl. 13, 5 f., *id. Ant. Bildw.* pl. 303, 4 f., Reinach *Rép. Stat.* ii. 176 no. 9 'Hermaphrodite?'). Gerhard *Etr. Spiegel* i. 40 pl. 13, 2—4 cp. a bronze amulet, acquired by him in Rome, which unites the face of a child with that of a lion.

[5] E. Pistolesi *Il Vaticano Descritto ed Illustrato* Roma 1829 iv. 141 pl. 55, 1 (=my fig. 295), A. Nibby in F. A. Visconti—G. A. Guattani *Il Museo Chiaramonti aggiunto al Pio-Clementino da N. S. Pio VII P. M.* Roma 1843 iii pl. 9, A. Furtwängler in the *Ann. d. Inst.* 1877 xlix. 199 n. 1 and 234 f. (=*id. Kleine Schriften* München 1912 i. 145 n. 2 and 173), Helbig *Guide Class. Ant. Rome* i. 44 no. 75, Amelung *Sculpt. Vatic.* i. 461 f. no. 229 pl. 47. Height 0·365^{m}. Yellowish marble of fine grain.

associated that might be regarded as diverse manifestations of the same power, whether divine or human. Accordingly Zeus *Ammon* was paired with Dionysos[1] or with a Satyr[2] or with Sarapis (?)[3]; Zeus wearing an oak-wreath and acorns, with Hermes (?) wearing a winged hat like a helmet[4]. Cicero's *Hermeraclae*[5] may mean no more than 'herms of Herakles[6].' But the actual grouping Ianus-wise of Hermes with Herakles is sufficiently attested by an *as* of the *gens Rubria*, struck *c.* 86 B.C. (fig. 296)[7], perhaps also by a double bust in the Vatican[8]. Another bust in the same collection couples a youthful Hermes, wearing a *pétasos*, and a bearded Dionysos, with wings on his head[9]. One in the Cabinet de France joins a bearded Dionysos, with head-wings and a diadem, to a beardless Satyr, wearing an ivy-wreath[10]. Another at Berlin combines a bearded Dionysos and a beardless Satyr, both crowned with ivy[11]. Yet another, in the Fitzwilliam Museum at Cambridge, shows an ivy-wreathed Silenos together with a bay-wreathed Apollon (fig. 297)[12]. We find a Janiform arrangement even of a tragic and

probably brought at an earlier date from the same locality[1] and now preserved in the Capitoline Museum (pl. xxiii, 1—3)[2]. Both herms combine a beardless with a bearded head and are characterised by curious foliated decoration, which has been diversely explained.

To speak first of the bust found by Lord Savile at Nemi. In 1885 G. Fiorelli described it as a double Bacchic herm[3], presumably because he took its foliation for vine-leaves. But in the same year W. Helbig suggested that we have here to do with a pair of water-divinities, arguing that fins start from their brows and aquatic plants spread over the cheeks of the bearded head, the neck and chest of both; further, that the younger face has a small fin at each angle of the mouth, the elder face a beard saturated with water, while the hair of both alike is damp and wind-blown[4]. In 1886 Helbig proposed to regard them as personifications of the neighbouring lakes of Albano and Nemi[5]—a view which has been favourably received[6]. In 1902 I put forward a new surmise[7]. Since the shaft of the herm is inscribed 'Sacred to Diana[8],' it seemed reasonable to interpret the Janiform bust as that of Diana's favourite—Hippolytos transformed into Virbius, who in Ovid's account says of the goddess:

> She made me older and henceforth of features
> Unrecognisable[9].

Rossbach 'Das Dianaheiligtum in Nemi' in the *Verh. d. 40. Philologenversamml. in Görlitz* 1889 p. 159 is content to treat them as indeterminate aquatic powers.

[7] *Class. Rev.* 1902 xvi. 373.

[8] SACR·DIAN (*supra* p. 392 n. 9) must, at Nemi, be completed as 'sacrum Diana*e*,' not 'Diano' (*Folk-Lore* 1905 xvi. 289).

[9] Ov. *met.* 15. 539 f. addidit aetatem nec cognoscenda reliquit | ora mihi. Cp. Auson. *cento nuptialis* 360 *epist.* p. 207, 28 ff. Peiper ne in sacris et fabulis aut Thyonianum mireris aut Virbium, illum de Dionyso, hunc de Hippolyto reformatum.

Accepting the aquatic traits noted by Helbig, I contended that fish-forms were not inappropriate to a companion of Artemis and that Virbius might turn out to be a river-god rather than a tree-spirit. In 1905[1] I was still disposed to think that Virbius in Italy, if not also in Greece[2], was a stream-god. But I urged that the Janiform bust from Nemi identified him with Diana's consort Dianus or Ianus[3], a god incarnate in the *rex Nemorensis*. Prof. F. Granger in 1907[4] threw fresh light on the problem by remarking that the two ends of the moustache upon the bearded face are formed of oak-leaves, that the foliage round the necks of both figures is clearly to be explained as oak-leaves, and that the alleged fins are not fins at all, but merely conventionalised leafage. Hence he enquires 'whether the double bust may stand for Virbius-Hippolytus as a wood-spirit, perhaps the king of the wood.' The younger face with its barbaric type might represent the ruffian assailant; the older face, anxious and wrinkled, might portray the king-priest haunted by the dread of sudden attacks. In 1908[5] Sir James Frazer, after examining the cast of the herm at Nottingham, admitted 'that, whether accidentally or not, the modelling of the moustache on one side of the face does resemble an oak leaf,' but raised doubts with regard to the rest of the foliage. He concluded as follows:

'Thus the identification of the leaves on the bust as oak-leaves, and with it my theory of the priest as a personification of the oak, remains uncertain. I will only add that Miss Darwin's proposal to identify as leaves of some sort the

[1] *Folk-Lore* 1905 xvi. 289 ff.

[2] Vibius Sequester, who in *s.* iv—v wrote for his son Virgilianus a guide to the geographical names of Virgil, Ovid, Lucan, Silius Italicus, etc. (W. S. Teuffel—L. Schwabe *History of Roman Literature*[5] trans. G. C. W. Warr London 1892 ii. 436 f., Lübker *Reallex.*[8] p. 1108), includes in his list of rivers (p. 152, 6 f. Riese) Virbius Laconices, ubi Hippolytum Aesculapius arte medicinae reddidit vitae, unde et Virbius dictus, and in his list of springs (p. 152, 33 Riese) Virvinus Laconices. J. J. Oberlin (ed. Argentorati 1778 pp. 211 f., 242) thinks that Vib. Seq. invented the stream Virbius, and possibly the spring Virvinus to boot, prompted by Ov. *fast.* 6. 756 Aricino Virbius ille lacu. C. Bursian (ed. Turici 1867 pp. 10, 11) would alter *Laconices* into *lacu* (or *luco*) *Ariciae*, and treats *Virvinus* as a blundering repetition of *Virbius*. A. Riese (ed. Heilbronnae 1878 p. 152) cj. *in agro Ariciae* for *Laconices*, and brackets *Virvinus Laconices* as a meaningless duplication. *Infra* p. 421.

[3] Accordingly I laid stress on the watery aspect of Ianus, husband of Iuturna (*supra* p. 368 n. 3) the old Latin goddess of lakes and rivers, and father of Fontus (*ib.*) the god of springs and wells, father also of the river Tiber (interp. Serv. *in* Verg. *Aen.* 8. 330) and of Canens the water-nymph, whom king Picus preferred to the Naiads of Nemi (Ov. *met.* 14. 320 ff.). It was said that, when the Sabines on one occasion attempted to force their way into Rome, a raging flood of waters burst out from the temple of Ianus and drove them back (Ov. *met.* 14. 778 ff., *fast.* 1. 259 ff., Serv. *in* Verg. *Aen.* 1. 291, Macrob. *Sat.* 1. 9. 17 f.). See further W. H. Roscher in his *Lex. Myth.* ii. 18 and 41.

[4] F. Granger 'A portrait of the Rex Nemorensis' in the *Class. Rev.* 1907 xxi. 194—197 with two figs.

[5] Sir J. G. Frazer 'The leafy bust at Nemi' in the *Class. Rev.* 1908 xxii. 147—149.

things which project from the mouth of the younger face seems to me excellent.... Perhaps...the candidate for the priesthood at Nemi chewed oak-leaves in order to nerve his arm for the fatal stroke. It may have been with oak-leaves in his mouth, as well as with sword in hand, that he advanced upon his adversary. Can it be that in the face of the older man the artist has purposely shewn us a grinning empty mouth as if to indicate that the sacred oak and with it the god had passed from him to another?'

Later in 1908[1] Prof. Granger returned to the charge. Sir James Frazer had cited the opinion of Mr R. I. Lynch, Curator of the Botanic Garden at Cambridge, who 'thought the leaves more like nettle or perhaps dead-nettle (*Lamium*).' Prof. Granger would adopt this suggestion, but limit it to the scalloping under the eyes. He adds:

'To quote a local example, on Royal Oak Day (May 29) boys go about Nottingham armed with nettles, and they demand of passers-by to "show their oak" under penalty of being nettled. Whether, therefore, the nettle be intended, or some other vervain, a further and most interesting line of inquiry has been opened[2]. And Prof. Frazer's theory that the priest of Nemi personifies the oak, remains as convincing as ever.'

[1] F. Granger 'The leafy bust at Nemi' in the *Class. Rev.* 1908 xxii. 217.

[2] Of vervain in antiquity we possess two parallel accounts, that of Pliny transcribed from Sextius Niger *περὶ ὕλης* (10—40 A.D.: see M. Schanz *Geschichte der römischen Litteratur*[2] München 1899 ii. 1. 315), and that of Dioskorides based on the same work with lists of synonyms etc. added from the illustrated *ῥιζοτομικόν* of Krateuas, physician to Mithradates vi Eupator (120—63 B.C. The most famous codex of this herbal, Vindob. Med. Gr. 1, written for the elder Iuliana Anicia, wife of Olybrius the consul of 379 A.D., has been published by A. W. Sijthoff in Scato de Vries *Codices Graeci et Latini photographice depicti* vol. x i. ii Dioscurides Lugduni Batavorum 1906: see further W. Christ *Geschichte der griechischen Litteratur*[5] München 1911 ii. 1. 347 f.):

Cameron *The Gaelic Names of Plants*[2] Glasgow 1900 p. 73 f., P. Sébillot *Le Folk-Lore de France* Paris 1905 ii. 303, 1906 iii. 472, 476 f., 483 f., 494, K. Simrock *Handbuch der Deutschen Mythologie*[5] Bonn 1878 p. 272 f.

Here it is in point to observe that both Pliny and Dioskorides compare the leaves of vervain with those of the oak (*quercus*, *δρῦs*), associate the plant with Iupiter (Plin. *nat.*

hist. 25. 105 hac Iovis mensa verritur, Dioskor. 4. 61 p. 550 Sprengel *οἱ δὲ Διὸς ἡλακάτην*, cp. 'Apuleius Barbarus' *op. cit.* 4 iidem dios elacaten (the ed. of Albanus Torinus, Basileae 1528, reads *alii diosatim*). No proveable connexion with Steph. Byz. *s.v.* *Ἡλακάταιον· ὄρος Θεσσαλίας, ὅπου καὶ Διὸς Ἡλακαταίου ἱερόν. τὸ ἐθνικὸν Ἡλακαταιεὺς καὶ Ζεὺς Ἡλακατεύς.* H. Usener *Die Sintfluthsagen* Bonn 1899 p. 156, cp. *id. Kleine Schriften* Leipzig—Berlin 1913 iv. 43 n. 82, would connect Zeus *Ἡλακαταῖος* with *ἤλεκτρον*, *Ἠλέκτρα*, *Ἠλέκτωρ*, *Ἠλεκτρυών* as Zeus 'the Glittering.' But??), and regard it as a panacea.

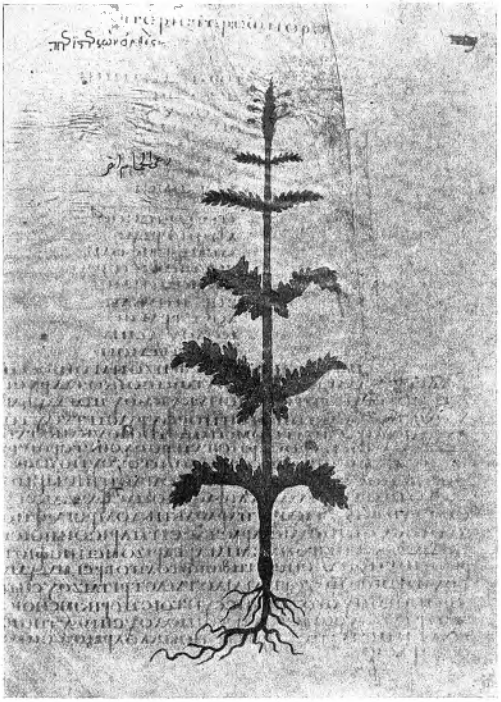

Fig. 301.

Such being its character, vervain would form an appropriate decoration for a bust of Virbius at Nemi. Indeed, there remains the possibility, already mooted by P. Buttmann (in the *Abh. d. berl. Akad. 1819* p. 209=*id. Mythologus* Berlin 1829 ii. 152), Sir James Frazer (*Golden Bough*[3]: The Magic Art ii. 379 n. 5) and myself (*Folk-Lore* 1905 xvi. 290 n. 9), that *verbena* and *Virbius* are words of kindred origin. My friend Dr P. Giles tells me (May 1, 1918) that the difference of vowel may be a matter of dialect, as in *Mercurius* beside the Praenestine *Mircurios*, *Mirqurios* (Walde *Lat. etym.*

Finally, in 1909[1] Miss L. Morpurgo published a minute investigation of the herm. She claims that the leaves on the breast of either figure are beyond doubt those of the *quercus robur*, that the beard of the

Wörterb.[2] p. 478). Assuming that both *Virbius* and *verbena* were related to *viridis* (cp. L. Morpurgo in the *Mon. d. Linc.* 1903 xiii. 356 n. 9), Sir James Frazer had rendered *Virbius*, 'The Green One,' and I had suggested, 'He of the sacred branch.' These, however, are uncertain conjectures; and there is a tempting alternative (see *infra* p. 421 f.).

Fig. 302.

[1] L. Morpurgo 'La rappresentazione figurata di Virbio' in *Ausonia* 1909 iv. 109—127 with figs. 1—6 and pls. 5, A—C and 6, A—C (=my pl. xxii, 1—3). Miss Morpurgo's results are accepted by Stuart Jones *Cat. Sculpt. Mus. Capit. Rome* p. 150 f. But W. Helbig *Führer durch die öffentlichen Sammlungen klassischer Altertümer in Rom*[3] Leipzig 1912 i. 439 still advocates his own identification of the double bust as the lakes of Albano and Nemi.

older head is surmounted by a series of lobes recalling the leafage on the breast, that the lower edge of the long moustache has a leaf-like dentation, that the mouth of the younger head shows similar leaves at its corners, that the Satyr-ears of both heads are lobed like leaves[1], that the eyebrows throughout are dentate, and that the appendages above the brows and beneath the ears exhibit veined vegetable forms.

The Capitoline herm has been commonly regarded as representing a pair of water-deities[2]. But Miss Morpurgo, pursuing her theme, contends that the foliation under the eyes of the two figures and over the beard of the elder is certainly meant for leaves—not whole leaves, but parts of leaves, which (to judge from size and shape) are those of the *quercus ilex*. She remarks that the chest on either side shows a continuous fringe of leaves, modified to look like the frilled edge of a *tunica* or *chitón*, that the moustache and eyebrows of the bearded head are, again, formed of *quasi*-leaves, that the ears of both heads are dentated, and that the appendages on head and neck are neither horns nor fins, but leafage like that which decorates the chest.

On the whole, I conclude (1) that the two herms represent the same personages; (2) that those personages, as I conjectured in 1902[3], are Hippolytos and Virbius, the mythical prototypes of the *rex Nemorensis*; (3) that Hippolytos-turned-Virbius is portrayed as a Janiform bust, partly because, as I argued in 1905[4], Diana's favourite is conceived as Diana's consort Dianus or Ianus, partly because, as Miss Morpurgo insisted in 1909[5], the ancients clung to the folk-etymology of *Virbius*, 'a man twice over' (*vir bis*); (4) that the

[1] In the large frieze from the great altar at Pergamon (*supra* i. 119 figs. 87 f.) the Giant fighting Phoibe has horns in his hair and a left ear like a pointed leaf (*Pergamon* iii. 2. 37 Atlas pl. 29, 3); another, opposed to Parthenos, has long serrated leaves on the heads of his two snake-legs and at the juncture of their scales with his skin (*ib.* iii. 2. 69 Atlas pl. 16). It may be suspected that Pergamene art contributed its quota to the style of the Nemi bust.

[2] *Supra* p. 393 n. 2.

[3] *Supra* p. 393 n. 7.

[4] *Supra* p. 394 n. 1.

[5] L. Morpurgo 'La rappresentazione figurata di Virbio' in *Ausonia* 1909 iv. 122 (cp. her 'Nemus Aricinum' in the *Mon. d. Linc.* 1903 xiii. 356 ff.), citing Cassiod. *de orthographia* 6 (in H. Keil *Grammatici Latini* Lipsiae 1880 vii. 181, 9 ff.) Virbius etiam abstractus a regula, quoniam virum bis factum esse memorant, quem numerum per b mutam scribi ante dicta declarant: quidam virum bonum, alii herobium, tamquam sit ἥρως ἀναβεβιωκώς, alii deum esse qui Viribus praeest interpretantur (Cassiodorus notes that his information is taken 'ex Martyrio de mediis syllabis.' Martyrius of Sardes, who lived in *s.* vi (?) A.D., was son and pupil of the Latin grammarian Adamantius: see De Vit *Onomasticon* iv. 383, G. Plac. *narr. fab.* 15. 45, schol. Pers. *sat.* 6. 56.

double bust is decorated, not, as Helbig suggested in 1885[1], with fins and aquatic plants, but, as Prof. Granger pointed out in 1907[2], with oak-leaves—those of the *quercus robur*, according to Miss Morpurgo[3], in the case of the first herm and those of the *quercus ilex* in the case of the second. I do not, however, agree with Sir James Frazer and Prof. Granger that the priest of Nemi personified the oak[4]. Rather I should maintain that the oak was the tree of Diana, and that Virbius is plastered with oak-leaves because he is her partner[5]—the local Dianus or Ianus.

(φ) Diana and the Oak.

Diana, as I have elsewhere shown[6], had a special liking for oak-trees. At Rome her chief temple was that founded by Servius Tullius on the Aventine[7], whose slopes in early days were shaded by a grove of holm-oaks, the haunt of Picus and Faunus[8]. A 'very great and venerable sanctuary of Diana' was on the Caeliolus[9], which formed part of the *Mons Querquetulanus*[10] or "Mount of Oaks[11]." There was also an ancient Dianium at the upper end of the

[11] G. Gatti in the *Bull. Comm. Arch. Comun. di Roma* 1887 pp. 314—317 pl. 19 (=my fig. 303) publishes a large marble relief, originally found near the *Malum Punicum* between the Baths of Diocletian and the slope of the Quirinal towards the Viminal, which represents three male figures: (*a*) in the centre, Iupiter standing *en face*, with a *chlamys* over his left shoulder, a sceptre in his left hand, a thunderbolt (?) in his right, and an eagle at his feet; (*b*) to the left, Hercules (? a portrait of the youthful Commodus) erect facing the spectator, with lion-skin on his left arm, apples (restored) in his left hand, and club in his lowered right; (*c*) to the right, a mountain-god seated on a rock towards Iupiter, with a *himation* wrapped about his legs. Between Iupiter and Hercules grows an oak. Beside the mountain-god is a bay-tree. Beneath runs the inscription (*Corp. inscr. Lat.* vi no. 334 with Add. no. 30739, Dessau *Inscr. Lat. sel.* no. 3080) Herculi | Iuliano, Iovi | Caelio, || Genio | Caeli Montis || Anna sacrum. C. L. Visconti in the *Bull. Comm. Arch. Comun. di Roma* 1887 p. 342 f. conjectures that the oak alludes to the *Mons Querquetulanus*. H. Jordan—C. Huelsen *op. cit.* i. 3. 221 n. 6 doubt it. Reinach *Rép. Reliefs* iii. 200 no. 3 is silent. Possibly in the oak planted near Iupiter *Caelius*, or else in the bay-tree clasped by the Genius Caeli Montis, we should recognise the *arborem sanctam* mentioned among the sights of the *Mons Caelius* by the *curiosum urbis regionum xiv* and the *notitia regionum urbis xiv* reg. 2 (H. Jordan *Topographie der Stadt Rom im Alterthum* Berlin 1871 ii. 543).

Be that as it may, Iupiter *Caelius* was happily named. His worshippers would think, not merely of the *Mons Caelius*, but also of Iupiter *Caelus* (?) (*supra* i. 59 n. 11), *Caelestis*

Vicus Cuprius, where the Clivus Virbius turns to the right and leads up the Fagutal onto the Esquiline[1]. The existence of oaks on the Esquiline can be inferred from its chapel of the Lares *Querquetulani*[2].

Popular etymology has often been pressed into the service of religion.

[1] Liv. 1. 48, Solin. 1. 25.

[2] Varr. *de ling. Lat.* 5. 49 secundae regionis Esquili[n]ae. alii (*grammaticae antevarronianae ex incertis incertorum libris* frag. 8 Funaioli) has scripserunt ab excubiis regis dictas (cp. Ov. *fast.* 3. 245 f.), alii ab eo quod excultae (A. Spengel cj. *aescul<is*

Moreover, the beech-trees of the *Fagutal* may have been a ritual, as they were certainly an etymological, equivalent for oaks[1]. The same

consi>tae B.tenBrink cj. *<aesculis> excultae* G. Goetz—F. Schoell cjj. *excultae <arboribus>*) a rege Tullio essent (C. O. Müller suppl. *alii ab aesculetis*). huic origini magis concinunt loca vicini (G. Goetz—F. Schoell note that we must read either *loci vicini* with P. Canal or *loca vicina*), quod ibi lucus dicitur Facutalis et Larum (C. O. Müller ins. *et*) Querquetulanum sacellum et lucus Mefitis et Iunonis Lucinae, quorum angusti fines. I take it that *Querquetulanum* is an old gen. plur. agreeing with *Larum*, not a nom. sing. agreeing with *sacellum*. These *Lares Querquetulani*, of whom nothing more is known, presumably stood in some relation to the *Querquetulanae Virae* described as 'Nymphs presiding over a verdant oak-grove such as that said to have grown within the gate thence called *Querquetularia*' (Fest. p. 261 *a* 17 ff. Müller, p. 314, 11 ff. Lindsay Querquetulanae virae putantur significari nymphae praesidentes querqueto virescenti, quod genus silvae iudicant fuisse intra portam, quae ab eo dicta sit Querquetularia, ep. Paul. ex Fest. p. 260, 5 Müller, p. 315, 6 f. Lindsay, with Plin. *nat. hist.* 16. 37 porta Querquetulana). It is therefore tempting to suppose with B. Borghesi *Œuvres complètes* Décades numismatiques Paris 1862 i. 365 ff. that *denarii* struck *c.* 41 B.C. by P. Accoleius Lariscolus have for obv. type the bust of Acca Larentia, and for rev. the Querquetulanae Virae—three statues in the form of archaistic Caryatids supporting a beam or stand, from which rise five trees: the nymph on the left holds a bow, the nymph on the right a lily (Morell. *Thes. Num. Fam. Rom.* i. 2 pl. Accoleia, 1, Babelon *Monn. rép. rom.* i. 98 ff. figs., *Brit. Mus. Cat. Rom. Coins* Rep. i. 569 f. (where H. A. Grueber says: 'the nymph on the l. holds a poppy') pl. 55, 19 (=my fig. 304) and 20. Fig. 305 f. are from specimens

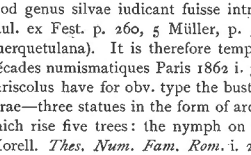

Fig. 304.

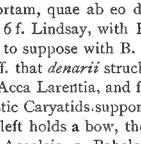

Fig. 305.

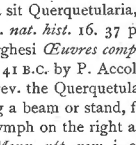

Fig. 306.

in my collection). Nevertheless this popular explanation (O. Höfer in Roscher *Lex. Myth.* iv. 9 fig.) is demonstrably wrong. The name *Lariscolus* cannot possibly mean 'Worshipper of the Lar or Lares,' but is a diminutive of *larix* (*laric-isco-lo->lariscolo-, cp. *cornix*, *Corniscae*) and denotes 'Young larch.' Cp. the name M. Caesius Larix (*Corp. inscr. Lat.* x no. 2019, 3 Puteoli). Again, the trees, of which three are springing from the heads of the alleged oak-nymphs, do not bear the least resemblance to oaks, but may well be intended for larches. I therefore fall back on the view adopted by Eckhel *Doctr. num. vet.*[2] v. 118 (curiously misrepresented by H. A. Grueber *op. cit.* i. 569 n. 1) that the three female figures are those of Phaethon's sisters here conceived as transformed into larches. See further De Vit *Onomasticon* iv. 48, who defends Eckhel by citing Vitr. 2. 9. 14 larix vero, quae non est nota nisi is municipalibus qui sunt circa ripam fluminis Padi et litora maris Hadriani, etc. *Infra* § 3 (a) vi (λ) *med.*

[1] *Fagus*=*φηγός*. Several altars dedicated to a god Fagus have come to light in Aquitania (*Corp. inscr. Lat.* xiii no. 33 (*Ladivert* near *Saint-Béat*) Fago deo | Erdenius | Erdesci f(ilius) | v.s.l.m., no. 223=Dessau *Inscr. Lat. sel.* no. 4531 (near Lugdunum Convenarum (*Saint-Bertrand-de-Comminges*)) Fago | deo | Bonxus | Taurini f(ilius), *Corp. inscr. Lat.* xiii no. 224 (found with no. 223) Fago | deo | Iustus | v.s.l.m., no. 225 (found in the same neighbourhood as nos. 223, 224) Fago deo | Pompeia | C. filia | v.s.l.m.). The beech-tree seems to have retained something of its sanctity in this district, cp. A. de Gubernatis *La Mythologie des Plantes* Paris 1882 ii. 170 f. 'D'après une tradition toujours vivante aux Pyrénées, un homme, au moment même où le bon Dieu passait

change from oak to beech seems to have taken place on the hill called Corne near Tusculum, where Diana was worshipped in a remarkable grove of beeches[1]. But outside Rome the most famous

près de lui, murmurait et blasphémait; Dieu le changea immédiatement en ours. D'après une autre tradition [des Pyrénées] (cf. [E.] Rolland, *Faune populaire de la France* [Paris 1877 i. 42 f.]), un homme, en battant le fer chaud sur l'enclume, en fit jaillir les étincelles jusqu'aux yeux du bon Dieu lui-même, qui ne manqua point de le maudire, le condamnant à devenir ours, avec la condition qu'il pourrait monter à son gré sur tous les arbres, à l'exception du hêtre. Devenu ours, l'homme songea alors à déraciner cet arbre: "Ous bos esta, et ous seras, | En tout arbre puyeras, | Sous qu'en hau nou pouderas. | Arringa lou que harey." ' [*i.e.* 'Ours tu veux être, ours tu seras, | à tout arbre tu grimperas, | hormis au hêtre.' | 'Eh bien je le déracinerai.']. In the Luxemburg Ardennes and in Lorraine it is believed that the beech is never struck by lightning (P. Sébillot *Le Folk-Lore de France* Paris 1906 iii. 381, cp. R. Folkard *Plant Lore, Legends, and Lyrics* London 1884 p. 250). A list of 253 trees venerated in the department of Oise, which was drawn up in 1854, included 74 elms, 27 oaks, 24 thorns, 15 walnuts, 14 beeches, 14 limes, etc. (P. Sébillot *op. cit.* iii. 424). It will be observed that the beech stands next to the oaks in the list of lucky trees preserved by Macrob. *Sat.* 3. 20. 2 ait enim Veranius de verbis pontificalibus (*frag.* 3 Funaioli): 'felices arbores putantur esse quercus, aesculus, ilex, suberies (so L. Jan for *suberius* cod. P.), fagus, corylus, sorbus, ficus alba, pirus, malus, vitis, prunus, cornus, lotus.' Iupiter *Fagutalis* was worshipped on the Fagutal (Varr. *de ling. Lat.* 5. 152 Fagutal a fago, unde etiam Iovis Fagutalis, quod ibi sacellum, Paul. ex Fest. p. 87, 6 Müller, p. 77, 13 f. Lindsay Fagutal sacellum Iovis, in quo fuit fagus arbor, quae Iovis sacra habebatur, Plin. *nat. hist.* 16. 37 silvarum certe distinguebatur (*sc.* Roma) insignibus, Fagutali Iove etiam nunc ubi lucus fageus fuit, etc.), where his cult is known to have lasted on till the year 109 A.D. (*Corp. inscr. Lat.* vi no. 452 = Dessau *Inscr. Lat. sel.* no. 3620 [Laribus A]ugust. vici Iovis Fagutal[is et | Genis Caesarum, i]mp. Nerva divi Nervae f. Traian[o | Aug.
